A recent traffic count shows New York city's busiest corner to be Park row and Frankfort street, where for twenty-five days an average of 296,200 pedestrians and 6,700 vehicles passed daily between 8:20 a. m. and 6:30 p. m. Fifth avenue and Forty-second street averaged 113,780 pedestrians and 18,800 vehicles.—New York Sun.

### Too Cold For Icelanders.

An Icelander visiting in Utah recently stated that probably a third of his countrymen had come to this country, most of them settling in Washington, and ended with the startling statement that "they seek a milder climate, more like Iceland—the east and central states are too cold for them."

### PRACTICAL HEALTH HINT.

**Chilblains.**

With the advent of cold weather many persons complain of painful, burning, swelling and itching in the fingers and toes which had at some time, probably a year or more ago, been frostbitten. The annoying and painful trouble is frequently obstinate to treat. Simple measures often are effective, however. After the condition has appeared, practice keeping the parts warm, but not by directly applying heat (as from the fire), but by improving the circulation of the blood in the fingers or toes. This can be accomplished by plunging the parts in cold water for a few seconds and drying them and rubbing them thoroughly. Many persons are more troubled by the chilblains at night. Being kept awake by the discomfort is a common complaint. For this affection at night hot goose grease well rubbed into the feet or hands or wherever the burning and itching are gives great relief. It is best to sit before the fire when rubbing in the goose grease. If this simple home treatment does not give permanent relief it is then time to go to a physician for electrical treatment.

## A Royal Tiger Cat Domesticated

Designed by Franklin Simon & Co., New York.

OVER a white broadcloth skirt is worn this gorgeous tiger skin coat, beaver trimmed. The cap is of matching fur. Cut on loose, mannish lines and snugly buttoned, this coat may be worn for motoring and all winter sports, as well as skating.

• • •

Purple, plum and cyclamen are distinctly fashionable shades this winter. Purples, though rather striking for the street, are charming for indoor wear, particularly when the shade is becoming. For a woman with whitening tresses a very attractive house frock of violet mohair and worsted mixture has just been completed. The round, gathered skirt has three bands of violet, and bodice and skirt are joined under a wide, soft girdle of the velvet. There is a deep collar of the velvet outlining the V shaped neck, and over this is a second collar, also deep and wide and made of sheer white crape hemstitched. White bone ball buttons add a further touch of contrast.

• • •

Lingerie crape is a beautiful silk that is washable. While it was originally created for lingerie, it can be used for all parts of outer garments. It is very lovely and almost lusterless. It comes in various pale shades and in white.

ANNA MAY.

### Useful Waist For All Occasions.

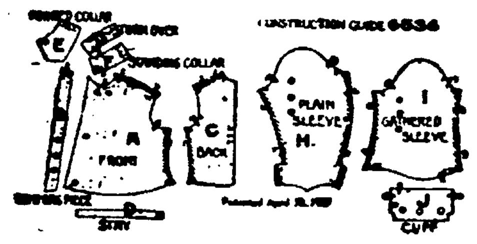
6536

A blouse of silk crepe de Chine trimmed with silk soutache braid, designed for the woman who wishes simplicity to characterize her clothes.

The woman who wishes simplicity to characterize her blouses could not select a better design than the one illustrated here. At this season there are not so many radical changes in separate waists, but many details of cut and trimming make a blouse a delightful as well as a difficult article of apparel. Silk crepe de Chine trimmed with soutache braid is used for this model, which requires, in medium size, 2¼ yards 36-inch material, with 8 yards of soutache for trimming.

For service it is best to have the vest of the same material. Stitch on the braid first, then arrange the vest on front, the front edge of the vest along the line of single small "o" perforations in front. Baste the back edge of vest to position.

Form, pleat in front, creasing on line of slot perforations, lap to line of double "oo" perforations in front and in trimming piece; stitch ⅛ inch from folded edge. Gather the shoulder edge of front between double "TT" perforations. Close under-arm and shoulder



seams as notched. Turn hem in front at notches. Gather back on crossline of small "o" perforations and ⅛ inch above; adjust stay over gathers, center-backs even, small "o" perforation at under-arm seam and fasten at center-front.

Join standing collar and turn-over as notched; sew to neck edge, notches, center-fronts and center-backs even; large "O" perforation in collar indicates center-front.

Close sleeve seam as notched; gather lower edge between double "TT" perforations. Close cuff seam as notched to large "O" perforation; face and roll the lower part back on large "O" perforations. Sew to lower edge of sleeve as notched, small "o" perforation in cuff at seam of sleeve, regulating gathers. Sew sleeve in arm-hole as notched, small "o" perforation at shoulder seam, easing in any fulness.

A frill of lace, an embroidered turnover or any dainty bit of trimming may be used to finish the collar.

Pictorial Review Waist No. 6536. Sizes 32, 36, 38, 40, 44, 46 and 48 inches bust. Price, 15 cents.

## The Children's Pleasure

How to amuse children is one of the problems which every mother must face. The little ones often become restless and want new amusement.

A delightful pastime is played with a small feather. The children are grouped together, and a mass of fluff is thrown into the air. It is the business of every player to blow the feather toward his or her neighbor, for if the mass of fluff should fall on or near an individual that person loses the game.

The children are not allowed to run away from the feather outside a definite line, which may be marked with chalk. Any one who is responsible for sending the fluffy stuff outside of bounds also goes out of the game.

An old fashioned game, which is none the less absorbing, is known as "rural spilikens." A number of straws or little straight sticks are gathered together, and these are stood up so that they all meet at the top and spread out like a tent at the bottom.

Two or three additional sticks are obtained, and on the end of these are placed crooked pins.

Each player takes a crook in turn and endeavors to remove a straw or stick without shaking or throwing down the others. Any culprit goes out of the game, and the winner is the child who has obtained the greatest number of sticks.

Another simple game which can be arranged anywhere is called "take care," played out of doors.

On a flat piece of ground a little pile of dry earth or sand or snow is made. Take a small stick and in a cleft at the top fit a square of white paper to represent a flag. Finally push the stick down the center of the mound.

Each player is given a stick, and the object of the game is to remove a little of the snow from the mound without upsetting the flag. The last stages of the game are exciting, seeing that a trifle will often upset the flag.

The player who is responsible for the failure goes out of the game, and the flag is set up once more. The player who holds out to the end is the winner.

Another delightful pastime for stormy days is Japanese water flowers, which may be bought for 5 cents a box at any oriental bazaar. Give the children a bowl of tepid water and let them drop the charming wads in. A flower blooms instantaneously. Convalescent children, who must be kept quiet and happy, adore these flowers.

## SET UP FOR WINTER.

**A Bit Dressier Than Her School Coat Is This One.**

At this difficult age a girl needs a serviceable coat, even for best. This one is not too dressy for harum scarum comfort and yet presents vel-

GOING TO SUNDAY SCHOOL.

vet in the modish stripe of navy blue and gray. Plain blue velvet is used for the collar, cuffs and belt, which fastens with two novelty buttons, while the blue velvet hat to match has a tiny ostrich tip above a ribbon rosette as appropriate trimming.

### Baked Crab With Cheese.

Remove the meat from one or two crabs, crack the claws and take out the meat also. Flake the crab meat. Butter a baking dish and spread the bottom with a layer of white sauce, then put in a layer of crab meat and season with salt and pepper. Next sprinkle over with fresh breadcrumbs, grated cheese and more sauce. Continue this until the crab meat is used up. Cover the surface with white sauce, then sprinkle over with breadcrumbs and grated cheese. Put here and there a few tiny bits of butter and bake in a fairly hot oven for about twenty minutes.

## TODAY'S FASHION NOTE

Full of innocent artistry in this frock of soft white batiste, having the skirt finished with a soft ruffle and the waist extending over the raised waistline with a narrow peplum. There is not a suggestion of lace about the frock and herein does it qualify for chic simplicity. Four yards 40-inch material required.

Pictorial Review Dress No. 6162. Sizes, 6 to 14 years. Price, 10c.

**Pictorial Review Patterns may be procured at the J. R. Sullivan and M. Katz & Co. Department store, Fulton.**

## A PRACTICAL COAT.

**This Youthful Effect Is One That Still Holds Popular.**

FOR ONE PIECE FROCKS.

For one piece frocks wide striped corduroy is used for this fetching coat with its modish bit of fur around the high collar and deep cuffs. Fastened with novelty buttons, low belted and well flared, this garment means "good style." With it go smart buttoned boots and a dashing turban.

### BE CHEERFUL.

A cheerful and glad spirit attains to perfection much more readily than does a melancholy spirit.—St. Philip Neri.

Robert Mantell in "THE BLINDNESS OF DEVOTION" at The Quirk Today. His first Appearance in the movies.

# WANT TO SET ASIDE A WILL

Oswego—Objections to the probate of the will of Bridget Gibbons, who died in Fulton last month, leaving most of her property of the estimated value of $59,000 to charity, were filed in Surrogate's Court yesterday by R. J. Shanahan of Syracuse, attorney for William O'Melia and Bridge Wittner and George M. Fanning for John O'Melia, Nealia and Nora O'Melia. Giles S. Piper was given until next Saturday to file objections for Catherine O'Melia. All are nephews and nieces and were cut of with $100 each. St. Francis Home, this city, down for $1,000 was among the legatees and the residue was left to Attorney E. L. Moore, of Syracuse, named as executor with permission to give it to such charities as he saw fit. The contest is made on the usual grounds and a jury trial is demanded.

In the matter of the estate of Esther Hadlock, who left practically everything she had to her nephew, W. L. Woodbury, of Fulton, an adjournment was taken for two weeks to permit objections to be filed, after F. G. Spencer and Dr. A. W. Irwin, the subscribing witnesses, had been examined. E. B. Powell appeared for a brother and sister, Levington Ketcham and Ann K. Williams, both of Hannibal, and S. J. Kelly, of Syracuse, appeared for Nellie K. Pratt, a sister, of Buffalo, who is incompetent.

Albert W. Schaufler, Sr., asked for letters on the estate of his wife, Bertha Schaufler, who died on January 5th, leaving $2,000 real property which she gives to her husband.

The appraisal of the estate of George Henry Monroe shows property of the gross value of $22,064.83 and of the net value of $20,652.90. The widow Sarah J., receives $13,122.50, and the daughter Ella A. Paine, $6,-884.38. The tax was fixed at $106.53.

The inventory of the estate of Julia A. Broadwell, Fulton, shows personal property valued at $7,122.50, and the appraisal of the estate of William Mosier, Hannibal, shows a net of $17,-267.38.

Letters were asked this afternoon on the estate of George E. Buck Scriba, who left $200 personal and $1,700 real, to his father, brother, Milliam J. Buck and sister, Mrs. Emma Killam, who left $7,000 personal and ..10,444 real; on the estate of Cordelia E. Coe, who left $75 personal and $3,000 real, all to her daughter, Mary Rogers; on the estate of Patrick Moran who died in Oswego in 1910 leaving $6,000 personal and $400 real, and on the estate of Henry Sculley, who left $3,600 personal and $4,500 real, all to his nephew, Michael H. Donahue, of Oil City, Pa. The will of A. J. Hirschboltz was admitted to probate.

## AMERICAN MECHANICS INSTALLED OFFICERS

At the regular weekly meeting of the American Mechanics last night, officers were installed as follows:

Councilor, W. W. Drury; vice councilor, Albert Guernsey; Jr. ExCouncilor, D. J. Read; Recording Secretary B. G. Boigeol; Financial Secretary, Warren Tallman; Treasurer, A. B. Kinne; Conductor, A. H. Parke; Examiner, William Baggs, Outside Protector, F. McClellan; Inside Protector, J. Richardson; Trustee, Eugene Drury.

District Deputy John F. Ebinger, and staff of eight assistants from Syracuse performed the installation. After the meeting, the members enjoyed a supper in the Lewis House. At this event, E. P. Cole, William S. Merrill, Rev. H. D. Holmes, and Dr. Joy spoke. Several of the visitors gave short addresses.

## WEATHER FORECAST

Cloudy tonight and Wednesday, probably local snows or rain. Colder, west winds shifting to northwest Wednesday.

## STATE OF NEW YORK
# 4 Per Cent. Gold Bonds

**Exempt From Taxation, Including the Federal Income Tax**

**AMOUNTING TO**

**$25,000,000.00**

**Issued in Coupon or Registered Form**

**Will be sold Thursday, Jan. 27, 1916, at 12 o'clock, noon**

**At the State Comptroller's Office, Albany, N. Y.**

*This is the only public sale of New York State bonds that is contemplated during the present calendar year.*

**These bonds have been segregated into two classes, and bidders will be required to state clearly in the proposal the class of bonds and the amount and the price for each $100 bid for, coupon bonds being issued in denominations of $1,000.00 and registered bonds in denominations of $1,000.00, $5,-000.00, $10,000.00 and $50,000.00.**

**Class No. 1. $17,000,000.00 for the improvement of the Erie, Champlain and Oswego canals, dated January 1, 1916, due January 1, 1966; $5,-000,000.00 for the Improvement of Highways, dated September 1, 1915, due September 1, 1965.**

***As the bonds enumerated above are all 50-year bonds, bearing 4 per cent. interest, the Comptroller will reserve the right to allot to the successful bidder, bonds of either or both of the above issues in Class No. 1, notwithstanding the specific issue may be stated in the bid.***

**Class No. 2. $3,000,000.00 for the construction of aBrge Canal Terminals, dated January 1, 1916, due January 1, 1946.**

Temporary receipts will be issued which will be exchanged for the permanent bonds when ready for delivery.

**THESE BONDS ARE LEGAL INVESTMENTS FOR TRUST FUNDS**

No bids will be accepted for less than the par value of the bonds nor unless accompanied by a deposit of money or by a certified check or bank draft upon a solvent bank or trust company of the cities of Albany or New York, payable to the order of the Comptroller of the State of New York, for at least two per cent of the par value of the bonds bid for.

All proposals, together with the security deposits, must be sealed and endorsed "Loan for Improvement" and enclosed in a sealed envelpoe directed to the "Comptroller of the State of New York, Albany."

All bids will include accrued interest.

The Comptroller reserves the right to reject any or all bids which are not in his opinion advantageous to the interests of the State.

Circular descriptive of these bonds and of outstanding state bonds, sinking funds, etc. will be mailed upon application to

**EUGENE M. TRAVIS, State Comptroller, Albany, N. Y.**

Albany, January 4, 1916.

# POWELL TOOK HIGH HONORS

## Three Games Played Last Night Were Hotly Contested—Chubb Rolled 557.

The West End bowling outfit, by taking three straight games from the Crescent A. C. last night, went into first place. The Nondescripts were forced into second place, but owing to the fight which the two teams have waged since the season commenced, there is no certainty that the Nondescripts will not displace the winners of last night's match before the end of the week. The Nondescripts and West End outfits for thep ast month have been bitting a hot pace, the feature of their bowling being the uniformity. In practically every match the members of both teams bowla steady game and roll consistently in the pinches. This fact is responsible for most of the victories.

In the three games last night, the first was won by 28 pins, the second by 25 and the third by 49. The three games were hotly contested and much interest was shown in them. Powell, of the losing team, took honors for high game, while Chubb, as usual, rolled high total of 557.

Ther esults:

**West Side**

| | 1 | 2 | 3 | Total |
|---|---|---|---|---|
| Chubb | 189 | 189 | 179 | 557 |
| Brosnahan | 203 | 157 | 156 | 516 |
| Brown | 126 | 134 | 155 | 415 |
| Stearns | 157 | 170 | 194 | 521 |
| Dingle | 159 | 175 | 182 | 516 |
| Totals | 834 | 825 | 866 | 2525 |

**Crescent A. C.**

| | 1 | 2 | 3 | Total |
|---|---|---|---|---|
| P. Van Buren | 123 | 137 | 134 | 394 |
| Martin | 176 | 134 | 170 | 480 |
| Powell | 211 | 160 | 168 | 539 |
| Rathburn | 160 | 188 | 191 | 539 |
| H. Van Buren | 136 | 181 | 154 | 471 |
| Totals | 806 | 800 | 817 | 2423 |

## FIRST GAME PLAYED IN POOL TOURNAMENT

The first game in the pool tournament arranged between the All-Fulton and All-Oswego teams was won last night by the latter. The game was played in Walsh's pool parlor before a large gathering.

Morris of the Oswego team defeated Westover by a score of 50 to 42, while his teammate, Powers, defeated the other Fulton cueist 50 to 27. The next game will be played in the Alhambra, Oswego.

Stevenson refereed the game last night. The teams will play for 1,000 points. A $50 purse and supper at the Pontiac is the prize.

## BOWLING MATCH IS POSTPONED

The bowling match scheduled at the Onyx alleys tonight between Fulton and Baldwinsville bowlers for a side bet of $25 has been postponed. The local team will journey to Oneida tomorrow for a match with the strong All-Oneida outfit.

## NEWS NOTES OF COURT AND LEGAL PROCEEDINGS

Justice Hubbs has confirmed a report of A. D. Merry granting a divorce to Ada A. Kimball, of Oswego, from her husband, Horatio M. Kimball of this city. They were married by Justice of the Peace Wood in Palermo in 190,6 and afterwards resided in this city. They separated in 1912. There is one child, Lillian, eight years old. She is given into the custody of the mother, who is alsa permitted to resume her maiden name of Ada A. Lanning.

• • •

Costs to the defendant in the sum of $77.60 were taxed in the County Clerk's office yesterday in the case of Franklin D.Olier vs. the Hayes Knitting Company. This covers an appeal to the Appellate Division in which defendant was successful.

• • •

Judge Coville has appointed Jennie E. Bigelow guardian for infant son, Dan Bigelow, in order to bring an action either against the Oswego River Power Transmission company or the Seneca River Power company. The boy was injured on April 10th, 1914. Udelle Bartlett is attorney.

• • •

Judge Coville has affirmed a decision on appeal that of City Judge Wilson, for the plaintiff, the case of Gertrude E. Church vs. William McNamara. Mrs. Church sued to eject the defendant from her store, and he interposed ac ounter claim of $700 in the shape of repairs made which he claimed was to apply on rent.

## FRANK MASSARO PURCHASES STORE

Peter Massaro's grocery store and bakery, situated at 210 Oneida st., has been sold to Frank Massaro, who at present conducts a store at 201 Oneida st. The purchaser will move his stock into the newly purchased property, and in addition to conducting his grocery business there will enlarge the bakery plant.

He intends to make extensive repairs in the bakeshop, installing all the latest equipment. Perfect sanitary conditions will be in order, all loaves will be wrapped in waxed paper, and in fact, every effort will be made by the new owner to have an output equal to that of any high grade bakeshop.

Thef ormer owner of the plant has been engaged in baking principally for the Italian patronage. Theb read is baked in the Italian style, but of late Mr. Massaro has been able to work up an extended trade. Local hotels and restaurants are among his best patrons. The use of the Italian bread on the tables of the best families in the city is becoming fixed, Frank Massaro stated today, and it is in anticipation of further progress in this increased patronage that a considerable sum of money will be expended in improving the facilities of the bakeshop.

## MANTELL SAW TREND OF MODERN TIMES

"Ten years ago I would have despised even the thought of going into motion pictures. But today they have become so artistic, they have increased in the value of artistry, at least one thousand per cent. The greatest people are going into them, and why should I not do so?"

Robert B. Mantell discussed various phases of his many years' experience in theatrical life before signing with William Fox for a series of modern dramas, of which the first is "The Blindness of Devotion."

"I'm as enthusiastic as a schoolboy," said he, "Iacnh ardly wait to begin my work on the screen, and I wish to state that I am going to give the best that there is in me. I am thoroughly enthused by the pictures and really cannot say whether I should care to return to the legitimate stage again." At the uirk today.

## ICE CROP BEING HARVESTED NOW

After suspending ice-cutting operations for several days, due to the thaw, W. J. Sharp, ice dealer,, had twenty employes resume work this morning on Spafford pond, where the crop is being harvested. Mr. Sharp has already been able to harvest about half the amount required.

The ice is now ideal, he stated, being about 13 inches thick and it is one of theb est crops we have had in years. It is clear and clean from snow.

Daniel George is also cutting ice on Lake Neahtawanta and he also reports a successful crop.

## FAVOR BOULDER OVER GRAVE OF JOHN BROWN

Glens Falls—An appropriation will be sought from the state legislature for the purpose of placing a memorial shaft over the grave of John Brown, the famous abolitionist, at North Elba. Byron R. Brewster, who is leading the movement to secure the necessary funds, has received offers of financial aid from different sources, but will also request the representatives in the senate and assembly from that district to secure a modest appropriation.

The movement to raise a fund to place a monument on the grave of Brown and several of his followers was started last summer and many summer residents of that vicinity pledged money. It was planned to have a "John Brown Day," which was postponed until this year, owing to the lateness of the season.

Persons interested in the movement declare it is proper that New York state should perpetuate the memory of one of its most illustrious citizens. The grave is in a spot surrounded by rugged mountain grandeur, which attracts thousands of tourists each summer.

The plans include erection of a shaft, the improvement of theg rave and the immediate surroundings by a landscape architect, and an improved highway to the Brown farm. Mrs. William S. Augsbury, historian general of the Daughters of the American Revolution, disagrees with the residents of North Elba and vicinity over the question of a shaft. In a letter to Mr. Brewster she said the boulder which now marks theg rave is symbolical of John Brown

# STILL A KING!

## What?

## CO-ORDINATION OF INTERESTS!

Once upon a time a venerable old owl was the chairman of the Bird Congress, as a fable runs, and there was a great commotion and much chattering.

At last a long-legged crane got up and offered a resolution, in effect, that the bird which could fly the highest should be made the King. Then all the birds flashed up into the sky, but one by one they tired and dropped down, except the eagle, who flew up higher than the others, and said: "I am King!"

But his reckoning was wrong, as a little wren popped up from the back of the eagle's head, where he had slipped in among the feathers for a free passage into the blue atmosphere, just like a regular little dead-head and he said "Not a bit of it, Sir Eagle; I am above you and I am still King."

## CHAMBER OF COMMERCE

*"Fulton First, Last and All the Time"*

It is much easier to destroy than to build up. Perhaps this fact accounts for the human tendency toward destructiveness rather than constructiveness. A building that it has required months to construct may be destroyed in a few hours by fire; within a few minutes an earthquake will transform a city into a pile of ruins. A passing storm lays waste the results of months of tillage; the hurricane uproots the centuries-old oak. The breath of scandal casts its blight on a reputation acquired by a lifetime of right living, while a single bad act may ruin a good name that has been years in building.

In an instant death snuffs out the life that has been the growth of years. Within a few months war has devastated Europe and destroyed many valuable monuments of antiquity upon which the utmost exertions of human genius were employed; works of art and architecture that never can be replaced have been annihilated. Civilization has been retarded in a year more than it has advanced in a hundred, while the evil effects of the war will be felt through generations yet unborn. Since, then, the work of years may be so quickly undone, we should carefully ponder all our thoughts words and actions, bearing in mind that if building up is a slow and tedious process the reward is always commensurate with the effort.

* * *

Over in Akron, Ohio, 20,000 school children are to be made familiar with street traffic rules and instructed in ways of protecting themselves from accident while traversing the streets. This is a "safety first" move which may, if it spreads, be of great benefit.

Within a generation the "jaywalker" might be obliterated were the Akron plan generally adopted in United States schools.

The reckless pedestrian, intent on his ancient rights, might give way to the careful walker, thoughtful of the rights and presence of others afoot and awheel.

It ought by this time to be self-evident that if street accidents are to be reduced to a negligible factor, a long persistent educational campaign reinforced by rigid enforcement of rules and the use of physical barriers to recklessness, must be maintained.

The reckless grown-up cannot be reached except by the undertaker. But just as the child may be taught the fire drill in school so might he and she be taught safety without serious interruption to statutory educational exercises.

* * *

On February 8, 9, and 10, 1916, there will be held in the city of Washington, D. C., the fourth annual meeting of the Chamber of Commerce of the United States of America.

This is going to be one of the most important meetings ever held in the history of the world of commercial affairs in this country. Not only are we facing a crisis in world's trade in the near future, not only are some of the most difficult commercial and financial problems facing us, but we shall have to make plans for the immediate future and therefore the discussions that are going to be held at this fourth annual meeting are of the greatest importance. The President of the United States himself will be present and numerous other men, experts in different lines will speak. FULTON should be represented and we sincerely hope that anyone who feels like going will call on the officials of the Chamber of Commerce to see, if we can't fix a deal.

* * *

There are several items of importance going to be discussed at some future meetings of the Chamber and you certainly will make am istake, if you don't attend these meetings.

* * *

Fulton is going ahead in spite of all the knocking they do and in spite of the fellows who wished that there was not a Chamber of Commerce.

---

The efforts of the Chamber of Commerce to promote the establishment here of a City Market have at last been successful, the Common Council at an adjourned meeting last night favoring the proposition. A resolution was at once passed authorizing the immediate purchase of the land from the State.

Routine business in the form of authorizing the payment of bills which have been audited, an address by City Attorney Hillick in connection with the finances of the city, a payment of $200 to Commander Stewart of the G. A. R., and the confirmation of the appointment of Miss Helen Kirby as stenographer, formed the principal events of the meeting.

Prior to passing the resolution in connection with the market site purchase, Mayor Lewis called for a report from Alderman Quirk, who acted as chairman of the committee representing the city. This committee, together with a committee of three from the Chamber of Commerce, and three manufacturers whose factories adjoin the abandoned canal lands, met yesterday afternoon. The men talked the situation over with interested property owners, with the result that a vote favorable to the purchase of the site was cast.

Secretary Hollenga of the Chamber of Commerce and a dozen business men were present. Mayor Lewis asked the men to state their objection, if there were any to the proposed transaction. No one responded to the mayor's request and the Board passed upon the resolution. Secretary Hollenga, in response to a request, said that he believed the sentiment of the citizens of Fulton was expressed in the decision of the committee. Mr. Robert L. McCully gave an instance of the crying need of a public market by telling of meeting a farmer several days ago who was driving to Syracuse with a load of produce. "That a farmer residing in this section should have to go all the way to Syracuse to dispose of his produce is a shame," Mr. McCully exclaimed. "We need the farmers in this city and every inducement should be made to have them come here. The city market will be ag reat thing."

### All Administrations Look Alike

As soon as the transfer of the land is made to the city, the Chamber of Commerce which is to finance the construction of the market as well as the building of a large auditorium overhead, will immediately prepare to have the work started. The site covers .213 acres, is central, being located at the intersection of practically every highway which enters Fulton, and is without a doubt the best spot which could be found for the purpose. The Massaro Macaroni company will not have its plans for the extension of its factory interfered with, as the site chosen for the market terminates at the southern extermity of the company's property; nor will the Gage mill be inconvinced as a result, as the railroad switch leading to the factory will remain intact.

"While I am not as yet in a position to furnish this board with a definite summary of the financial situation of the city," Mr. Hillick stated to the council, "I desire to acquaint you with some facts in connection with the report City Chamberlain Adkins has submitted. Mr. Hillick proceeded to say that on December 31st, 1915, practically every appropriation had been overdrawn; that the last administration could not be blamed for this, especially since the fault rested equally with preceeding administrations. It is apparent to Mr. Hillick that city officials upon entering office have paid bills incurred by their predecessors, which they were not in a position to do. "This administration will draw the line." he stated.

(Continued on Page Four)

## BRITAIN UNITED IN CRY TO STRANGLE GERMANY; DEBATE OCCURS TODAY

London.—Both the Premier, Mr. Asquith, and Sir Edward Grey will speak today in the House of Commons in the debate on the British blockade, which is certain to be tightened as a result of the general belief that only through starving the German stomach can the Allies affect the German conscience.

The stricter contraband policy will be based on the doctrine of continuous voyage, and, though every effort will be made to cater to the sensibilities of the United States and other neutrals, the unblinking fact that the press, backed by the unanimous sentiment of the public in Great Britain, demands that playing at war must cease, means that the blockade must take the regular form and that full power of the British fleet must be employed to force Germany to sue for peace.

In anticipation of today's important debate in the House of Commons on the blockade question the British government yesterday issued a four column statement challenging and refuting statistics recently published in the Daily Mail and the Morning Post concerning what those newspapers have declared the hugely increased imports into the neutral countries of Holland and Scandinavia since the beginning of the war.

The statement is confined to minute and detailed figures, covering all the ground dealt with by the Daily Mail and the Morning Post, for the puroose of showing numerous cases in which errors have crept into the figures or certain circumstances ignored, all of which tend to the great inflation of the figures as given by these journals.

Beyond this no attempt has been made to draw any conclusions from the figures given, neither is there a hint of any change in the government policy. In fact, despite very decided expressions of opinion heard on many sides that the government may decide to declare an actual blockade, nothing official is known, and it is regarded still possible that the government may determine only to tighten the existing system of controlling cargoes likely to reach countries at war with the Entente Powers.

## FRENCH CENSORS LIMITED TO MATTERS UNOFFICIAL

Paris.—The Chamber of Deputies yesterday by a vote of 394 to 138 sent the Censorship bill to committee.

This bill provides that all publications must be communicated to the government before being offered to the public, but that the censor shall have the right to suppress only such unofficial matter as refers to military operations and diplomatic negotiations, the disclosure of which would be harmful to the national defence.

Mr. Briand, the Premier, speaking in defence of the censorship, encountered interruptions and at one time lively protests: "As chief of the government I will never permit a new censorship law to demoralize the combatants by regrettable articles which could reach the trenches. That would be an act of disarmament, and liberty and victory would be dead."

The entire Chamber and gallaries applauded the Premier.

Mr. Paul Deschanel, President of the Chamber, was obliged to request the Deputies to respect freedom of speech before the Premier could resume his address.

Mr. Briand's assertion that the Press Bureau, which was ridiculed and scoffed at, was composed of men who had been wounded in war brought forth objections from all parts of the Chamber, interspersed with the exclamations "Since when!"

Mr. Briand said it must not be forgotten that France was at war. The government he told them embers of the Chamber, wanted explanations so as to know what policy to pursue regarding the censorship during the war.

### CARING FOR SOLDIERS' TEETH

Stories that reached this country early in the war as to the condition of the teeth of British soldiers are now confirmed by Prof. William H. Potter of the Harvard Dental School, who has been making a special study of war-time dentistry in the hospitals of Europe. He contrasts conditions in Germany, where the state has been looking after the teeth of the school children for the past 15 years, with those in England, where even after the war began the dental service was so poorly organized that the Government was unable to utilize the services of expert dentists when they were proffered.

Defective teeth were the rule among the British volunteers whom Dr. Potter examined. When these men reach the front and begin to chew the hard food included in military rations their teeth break or become loosened and at once their efficiency is impaired. Neuralgia, diseased gums, ulcers and various diseases result. Dr. Potter says that dentistry is an important factor in producing the relative efficiency of the German soldier. No other nation takes such good care of the soldier's teeth.

There is al esson in this for our own army, in the opinion of the Brooklyn Eagle. The paper says: "We are paying out millions of dollars each year in pensions to men who would not be entitled to them if they had entered the service with good teeth. During the Spanish War the dental examination to which candidates for enlistment were subjected was o joke. But the cost of caring for the men with defective teeth who were rendered unfit for service by the first spell of neuralgia weather was not a joke. And while we are talking about preparedness, let us not forget that part of it which concerns the dentist."—Utica Dispatch.

### SOCIALIST CRITICS DEFIED

Reference was recently made in these columns to the tyrannous political methods of the Socialist Party as exemplified in the case of Mayor Lunn of Schenectady, who is likely to be read out of the organization because in filling some municipal offices he selected persons who were not Socialists. First the local bosses objected to this ignoring of the faithful, and when he proved obdurate his heresy was carried up to the State Committee. That body has expressed its displeasure in a pronunciamento in which it says:

"The committee desires to go on record as disapproving in its entirety the spirit displayed by Comrade Lunn in the matter of appointments. While it holds that his slogan, "efficiency first," was a commendable one, at the same time he could have secured all the efficiency he needed right in the organization and all his appointments would have been approved."

This is the same narrow provincial spirit that was displayed by the Philadelphia Republican organization when it expressed its disapproval because Mayor Blankenburg appointed to office some expert engineers who did not live within the city limits. It is a petty way of viewing public office, and one would suppose that Socialists would be especially free from it. Apparently, however, their hunger for jobs is even greater than that of Republicans and Democrats, and their party rule is more oppressive. It is interesting to know that Mayor Lunn has defied his party's State Committee, whose right to act he denies. "I would rather," he says, "be read out of the party than to have my official appointments dictated by a minority group." The general public will be inclined to think that he is right in this stand.—Philadelphia Record.

## A GREAT CITIZEN

It has been plainly said that there are none so blind as those who won't see. All the world's troubles, great and small, are due to the fact that people refuse to use their eyes. Whole communities may fall in a heap simply because of ignorance, stupidity, or a false sense of pride. Perhaps the greatest venial sin is that of contended ignorance, for so well pleased is it with its fool paradise that it would not change its estate for any remoter blessing.

There are men and women in every community who, because of reasons unexplainable, even to themselves, refuse to see that white is white. They will insist white is black even when it is to their advantage to see it as white. Then as an extra handicap to prevent one from getting at them mentally, they refuse to ask questions. What teacher has not experienced the travail of the soul that comes from a loutish unwillingness to ask questions on the pupil's part. The teacher's enthusiasm breaks upon the stony unresponsiveness like surf hammering a sea wall—and when it recoils, shattered and spent it leaves no impress.

It is because of indifference that half the world's battles are lost. General O-what's-the use arrives on the scene and, lo, the ranks thin. But there is some use in doing things aside from personal gain. History bears record that this is true. The measure of the great person consists not in what he did for himself and not merely what he did for others, but in what he intended to do for others and worked earnestly to do for others.

The truly worthy citizen it is who looks for compensation, not in himself, but in the coming better day for the city in which he lives.

## A MAN'S TRUEST FRIEND

*Former Senator George G. Vest*

"Gentlemen of the Jury—The best friend a man has in the world may turn against him and become his enemy. His son or daughter that he has reared with loving care may prove ungrateful. Those who are nearest and dearest to us, those whom we trust with our happiness and our good name, may become traitors to their faith. The money a man has, he may lose. It flies away from him, perhaps when he needs it most. A man's reputation may be sacrificed in a moment of ill-considered action. The people who are prone to fall on their knees to do us honor when success is with us, may be the first to throw the stone of malice when failure settles its cloud upon our heads. The one absolutely unselfish friend that a man can have in this selfish world, the one that never deserts him, the one that never proves ungrateful or treacherous is his dog. A man's dog stands by him in prosperity and in poverty, in health and in sickness. He will sleep on the cold ground, where the wintry winds blow and the snow drives fiercely, if only he may be near his master's side. He will kiss the hand that has no food to offer; he will lick the wounds and sores that come in encounter with the roughness of the world. He guards the sleep of his pauper master as if he were a prince. When all other friends desert, he remains. When riches take wings, and reputation falls to pieces, he is as constant in his love as the sun in its journey through the heavens. If fortune drives the master forth an outcast in the world, friendless and homeless, the faithful dog asks no higher privilege than that of accompanying him to guard him against danger, to fight against his enemies. And when the last scene of all comes, and death takes his master in its embrace and his body is laid away in the cold ground, no matter if all other friends pursue their way, there by the graveside will the noble dog be found, his head between his paws, his eyes sad, but open in alert watchfulness, faithful and true even in death."

### How to be Happy

Happiness is not only a condition of the mind but more often a condition of the body. You may learn something from the experience of Mrs. William Troute, Ilion, N. Y., who was sick for a long time from a badly disordered stomach. "I felt miserable all of the time," she writes. "I was tired and had no appetite. A friend advised me to take Chamberlain's Tablets. I did so and my appetite improved and I gained rapidly in health. Two bottles of them restored me to my former health."
For sale by all dealers.

### GETS HIS RURAL MAIL BY PULLEY TO DOORWAY

Whitesville, Mo.—C. R. Thompson, has originated a new method of having his mail brought directly to his door. Some time ago Thompson decided it was a waste of time and shoe leather to make the daily trip from the house to his mail box down on the road so he set his mind and hands to work on a devive to make the trip unnecessary.

Now, by means of wires and a pulley the trick is accomplished and it's fine in deep-snow weather. After the carrier's visit Thompson has only to step to his door and draw in his mail, box and all. In the same manner the box is sent to its post by the roadside.

## EDITORIAL COMMENT

The people have been impressed by the arguments for a larger military force. The figures are very liberal, probably the idea being that they may be reduced. On second thought many will conclude that it is wisest to develop and maintain what has already been organized and perfected. For instance, the militia and national guard. This body is supposed to number upward of 125,000 men in the active ranks. It would be simpler to double this number of the militia than to organise and train separately 125,000 men. It would also be simpler to reenlist the discharged militiamen and, with new recruits added, form a reserve equal in strength to the active force, the two services thus providing a half million men. The militia stands for preparedness in normal times. Its efficiency for abnormal times could easily be extended.

Admiral Dewey has been put upon record as advocating a United States navy strong enough to whip the strongest possible adversary. The admiral didn't say whip, but must mean that. His thesis will be found fault with. Critics will be heard to say that it really means that this country must be ready to fight the whole world. That could only follow when the whole world should be bent upon our destruction, a dilemma unthinkable. What the admiral and his class probably have in mind is a navy that will size up to any occasion likely to confront the United States.

A considerable number of national representatives favor a retirement scheme for the civil service. That the faithful servant who becomes incapacitated by age should be provided for is a natural and ever growing conviction. However, laws in such cases work arbitrarily, and it will happen that efficiency is often laid on the shelf to give stupidity, or something like that, a chance for promotion. Age limits should not be too arbitrary either in the matter of dismissal or retirement, for it is solely a question of efficiency and the public good.

The axiom, "In peace prepare for war," may be balanced by the reverse proposition "in war prepare for peace." War is abnormal and all its creations abnormal. It starts industries and business booms that must collapse. Hard times are sure to follow, and all the gain of prosperity may be swept away. It is good sense, then, for the people of this country to give staple trade and normal industry a fair share of attention.

Hartmannsweilerkopf, which is, as its name indicates, a mountain, is in Alsace, a few miles northwest of Mulhausen. It commands a range of a road in a valley between the mountains and the river Rhine and is fully 3,000 feet above the valley. It has changed hands many times as a result of alternate efforts by the kaiser's army and the allies to control it.

Recently a couple set out on their married journey sharing the cost on the fifty-fifty plan. They started in by splitting the license fee and met the minister who tied the knot with installments duly parceled out and produced a bridal ring owned in common.

If any converted anti-preparedness folks are inclined to apologize now to Richmond Pearson Hobson there would be plenty of innocent bystanders ready with applause.

It might pay the belligerents to wait for the different nationalities composing the armies to brush up on Esperanto so as to fight in the same language.

We may say that we prefer the German Modlin to the Russian Nowogeorgiewsk for that Polish town without violating strict neutrality.

Lloyd-George is a clever adapter when he says "nobody can haggle with an earthquake" instead of "don't monkey with the buzz saw."

If Henry Ford wants to tackle another forlorn hope he might try to bring harmony into the ranks of preparedness planners.

Patrick Henry also had a far ahead look when he said, "Gentlemen may cry peace, peace, but there is no peace."

Go west, young man, or maybe northwest, and eat reindeer steak. New York is already down to horse meat.

Tut, tut, tut on this growling at the weather! Old Sol scores a notch or two every day on the road to June.

The year "1915" so impressed itself upon the mind that it was difficult to drop it offhand and write "1916."

No natural law to prevent diplomatic relations from breaking under the strain of their own weight.

Railway regulation by the government is put to a severe test in the confusion due to car shortage. That regulation is a good thing sometimes has been proved to the satisfaction of all who are not captious. The question that remains is how much regulation there should be for the good of both the roads and the public. The railways claim by way of excusing shortage of cars and engines and terminals that regulation has denied them the chance to win profits in good years and that losses in bad years have put the average on the wrong side of the ledger. So they stood a combined loss for 1914 of $120,000,000. A prolonged trade blockade might cost th , country even more than that and be taken as proof that too much and too drastic regulation is simply "penny wise and pound foolish."

Former President Taft is speaking very frankly upon the everyday problems of this country. Among other institutions held in high regard by the people which he criticises is the present system of education. This he thinks could be improved by founding a national university and having inspection and criticism by federal authorities. In comparison with the educational system of some countries in Europe—Germany, for instance—ours falls short. Perhaps good results would follow the standardizing of methods in schools of all degrees. However, the essential thing is to build up a higher standard of citizenship, and, once this is attained, the good work will spread without undue pushing.

The first notable death recorded in 1916 was that of the great tragedian Salvini, who died in his native Italy on New Year's day. In his prime Salvini held rank among the foremost actors of the world. Thirty years ago he played in this country with Edwin Booth, taking the part of Othello. In a visit fifteen years before that he played in the leading cities, speaking in a tongue foreign to his auditors. But the language of his parts was so familiar that his dramatic gestures and tragic tones carried their full force home to his English speaking hearers.

The record of exports from this country continues to make history. The classes of exports are more diversified than formerly. Of course foodstuffs and war material form a large part of the export trade. Those which go to Europe may be considered of a temporary character, but nations now at war will have to look to the United States for goods of various kinds during the years of reconstruction which are to follow.

There is hope for China in the fact that the people have not rebelled against government and order, but against the rapacity and cruelty of outsiders—that is, the Manchus of the deposed dynasty. Except for the natural jealousy of factions, good native rulers will find the people loyal and devoted.

Among other things, "they say" that the European war will make this country a center of medical study and science. Not having been voted "undesirables," we can safely greet these worthies on the strength of their very respectable looking names.

Certain it is that the United States is rich enough to maintain adequate fleets on both oceans. At the same time there must be other good ways of investing good money.

Some men put too much effort in keeping up the poise and appearance of gentlemen and all too little in being honest, industrious and dependable as mere men.

In the absence of fresh air cars there's no bar on open air homes and offices, with the lungs storing enough of the commodity to last over the trip.

Changing the seat of war gives a welcome relief from spelling out those outlandish Russian, Hungarian and Polish names in the news dispatches.

All of this talk of what indemnity will be demanded when there is no whipping in sight belongs in the class "too previous."

A tax on automobile speed instead of on the machine's horsepower would win the applause of the wights who must walk.

About now the efficiency of the water wagons which went into commission New Year's is under the supreme strain.

So every year for some time to come Uncle Sam may find a bunch of new dreadnaughts in his Christmas stocking.

There will be no protests, diplomatic or otherwise, against any one submarining his own bad habits.

### New Honors Thrust on Charley

### POLITICAL COMMENT

In helping New York city out of the slough of financial despond and cleansing the first district public service commission, the special investigations set on foot by the Legislature of 1915 have earned the gratitude of the people of that city.

* * *

Deputy Attorney General Merton E. Lewis, counsel for the Thompson investigating committee, after pointing out that seven years was required to secure a decision in a rate case before the first district public service commission and that five and six years respectively have failed to secure decisions in two other cases, declares that the public service commission law has broken down completely and that if the people are to be protected against extortionate charges by public service companies, some important amendments to the law are absolutely necessary.

State of Ohio, City of Toledo, ss.
Lucas County,

Frank J. Cheney makes oath that he is senior partner of the firm of F. J. Cheney & Co., doing business in the City of Toledo, County and State aforesaid, and that said firm will pay the sum of ONE HUNDRED DOLLARS for each and every case of Catarrh that cannot be cured by the use of HALL'S CATARRH CURE.
FRANK J. CHENEY.

Sworn to before me the subscribed in my presence, this 6th day of December, A. D. 1886.

Notary Public.

Hall's Catarrh Cure is taken internally and acts directly upon the blood and muscous surfaces of the system.
Sold by all Druggists, 75c.
Send for testimonials, free.
F. J. CHENEY & CO., Toledo, O.
Take Hall's Family Pills for constipation.

### LENGTHY BED SHEETS AT LAST VINDICATED

Madison, Wis.—The long bed sheet law, long merely a topic of jest, has come into its own. State hotel inspectors report that 95 per cent of the commercial hotels and 50 per cent of the others now comply with it. When the old linen supply of the other 50 per cent is worn out it must be replaced by sheets of the full length. The State hotel rules say that worn-out bedding should be discarded entirely.

The top sheets, according to the State law, must be at least 96 inches long, after being laundered. This allows the end to fold over the edges of the covers, preventing the covers which are not changed for each guest from coming in contact with the mouth of the sleeper. The top sheet is to be folded back so as to cover all top coverings at least twelve inches.

### "TOO MUCH FAIR" CAUSE OF STUDENTS' FAILURE

Berkeley, Cal.—Over-indulgence in the joys of the Panama-Pacific Exposition was given as the reason for the unusual number of students refused admission to the University of California, on the ground of defective scholarship.

Out of a registration of 5,997, 194 students have been notified that their scholastic standing during the exposition year fell below the minimum requirements, and that they would be excluded from college for six months.

### Indigestion and Constipation

"When I began using Chamberlain's Tablets for stomach and liver about three months ago I was suffering a great deal from indigestion and constipation." writes Mrs. Rachel Watson, Ilion, N. Y., "One dose of this medicine greatly benefitted me, and since taking two bottles of it all symptoms of stomach trouble have disappeared and my bowels have become regular."

## Health Officers Call Attention to Requirements---Bottles Must Be Properly Labelled ---What the Grades Mean.

Health officers in towns throughout the State are calling attention to the fact that on February 1st all milk deal ers must have proper labels on their milk bottles whereby the consumer will know just what kind of milk he is getting.

Following are excerpts taken from the law applying to milk venders:

No dealer or peddler will be allowed to sell milk without the bottles being properly labelled and the milk properly graded. The consumer of milk should take pains to see that all bottles are properly capped and the caps stamped with the grade of milk contained in the bottles. The State has endeavored to throw every protection around the consumer in its efforts to secure only pure milk. The milk is graded according to quality, A, B, and C, both raw and pasteurized.

Grade C is the lowest grade of milk.

All milk sold or offered for sale at retail shall bear one of the designations provided in this regulation, which constitutes the minimum requirements permitted in this State.

No term other than "certified" shall be used to designate the grade or quality of milk or cream which is sold or offered for sale, except "Grade A raw," "Grade A pasteurized," "Grade B raw," "Grade B pasteurized," "Grade C raw" and "Grade C pasteurized."

No milk shall be sold or offered for sale as certified milk which does not conform to the regulations prescribed by and bear the certification of a milk commission appointed by a county medical society organized under and chartered by the medical society of the State of New York and which has not been pronounced by such authority to be free from antiseptics, added preservatives and pathogenic bacteria, or bacteria in excessive numbers. All milk sold as certified milk shall be conspicuously marked with the name of the commission certifying it.

No county medical society shall give such certification unless all cows producing such milk have been tested at least once during the previous year with tuberculin, and any cow reacting thereto has been promptly excluded from the herd.

No milk or cream shall be sold or offered for sale as "Grade A raw" unless it conforms to the following requirements:

The dealer selling or delivering such milk or cream must hold a permit from the local health officer.

All cows producing such milk ,or cream must have been tested at least once during the previous year with tuberculosis, and any cow reacting thereto must have been promptly excluded from the herd.

### Time Specified for Delivery

Such milk must not at any time previous to delivery to the consumer contain more than 60,000 bacteria per cubic centimeter, and such cream not more than 300,000 bacteria per cubic centimeter.

Such milk and cream must be produced on farms which the unduly scored on the scorecard prescribed by the State Commissioner of Health not less than 25 per cen., for equipment, and not les sthan 50 per cent. for methods.

Such milk and cream must be delivered within 36 hours from the time shall be prescribed by the local health authorities.

Such milk of cream must be delivered to consumers only in containers sealed at the dairy. The caps or tags must be white and contain the term "Grade A raw" in large black type, and the name and address of the dealer.

No milk or cream shall be sold or offered for sale as "Grade A pasteurized" unless it conforms to the followin grequirements:

The dealer selling or delivering such milk or cream must hold a permit from thel ocal health officer.

All cows producing such milk or cream must be healthy as disclosed by an annual physical examination.

Such milk or cream before pasteurization must not contain more than 200,000 bacteria per cubic centimeter.

Such milk must not at any time after pasteurization and previous to the delivery to the customer contain more than 30,000 bacteria per cubic centimeter and such mream not more than 150,000 bacteria per cubic centimeter.

Such milk and cream must be produced on farms which are duly scored on the score card prescribed by the State commissioner of health, not less than 25 per cent. for equipment and not less than 43 per cent. for methods.

Such milk and cream must be delivered within 36 hours after pasteurization, unless a shorter time shall be prescribed by thel ocal health authoriauthorities.

Such milk and cream must be delivered to consumers only in containers sealed at the dairy. The caps or tags must be white and contain the term "Grade A Pasteurized," in large black type.

### Physical Examination for Cows

No milk shall be sold or offered for sale as "Grade B raw" unless it conforms to the following requirements:

The dealer selling or delivering such milk or cream must hold a permit from the local heal th officer.

All cows producing such milk or cream must be healthy as disclosed by an annual physical examination.

Such milk must not at any time previous to delivery to the consumer contain more than 200,000 bacteria per cubic centimeter, and such cream not more than 750,000 bacteria per cubic centimeter.

Such milk and cream must be produced on farms which are duly scored on the score card prescribed by the Setat Commissioner of Health not less than 23 per cent. for equipment and not less than 37 per cent. for methods.

Such milk and cream must be delivered within 36 hours from the time of milking, unless a shorter time shall be prescribed by the local authorities.

The caps or tags on the containers must be white and contain the term "Grade B raw" in large, bright green type, and the name of the dealer.

Nom ilk or cream shall be sold or offered for sale as "Grade B pasteurized" unless it conforms to the following requirements:

The dealer selling or delivering such milk or cream must hold a permit from the local health officer.

All cows producing such milk or cream must be healthy as disclosed by an annual physical examination.

Such milk or cream before pasteurization must not contain more than 300,000 bacteria per cubic centimeter.

Such milk must not at any time after pasteurization and previous to delivery to the consumer contain more than 100,000 bacteria per cubic centimeter, and such cream not more than 500,000 bacteria per cubic centimeter.

Such milk and cream must be produced on farms which are duly scored on score card prescribed by the State Commissioner of Health not less than 20 per cent. for equipment and not less than 35 per cent. for methods.

Such milk must be delivered within 36 hours, and such cream within 48 hours after pasteurization, unless a shorter time is prescribed by the local health authorities.

The caps or tags on the containers must be white and contain the term "Grade B pasteurized" in large ,bright green type, and the name of the dealer.

No milk or cream shall be sold or offered for sale as "Grade C raw" unless it conforms to the following requirements:

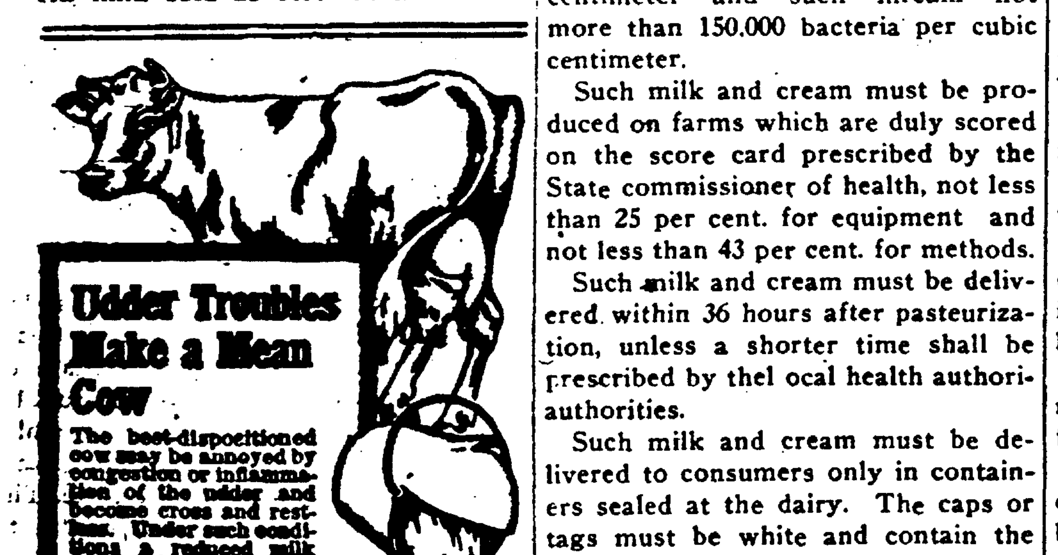
Such milk or cream must be produced on farms which are duly scored on the score card prescribed by the State commissioner of health not less than 40 per cent.

Such milk and cream must be delivered within 48 hours from the time of milking, unless a shorter time shall be prescribed by thel ocal health authorities.

The caps or tags affixed to the containers must be white and contain the term "Grade C raw" in large red type .

The same requirements as in "Grade C ra" are demanded by the State health authorities for "Grade C pasteurized" with the caps containing the term "Grade C pasteurized" in large red type.

The bacteria count herein required shall b made only at county or municipal laboratories or such other laboratories as may be approved by the State commissioner of health



Udder Troubles Make a Mean Cow

The best-dispositioned cow may be annoyed by congestion or inflammation of the udder and become cross and restless. Under such conditions a reduced milk flow is inevitable and often permanent injury can result from a small beginning. Use

BAG BALM

50¢

at the first sign of caked bag, inflammation, chafing, sore, chapped or injured teats. This pure ointment has a cooling, healing effect on the inner tissues and protects the surface. Splendid for any cut or bruise, and a valuable aid in relieving bunches and stricture. No dairy should be without Bag Balm.

Generous 50 cent packages sold by feed dealers and druggists.

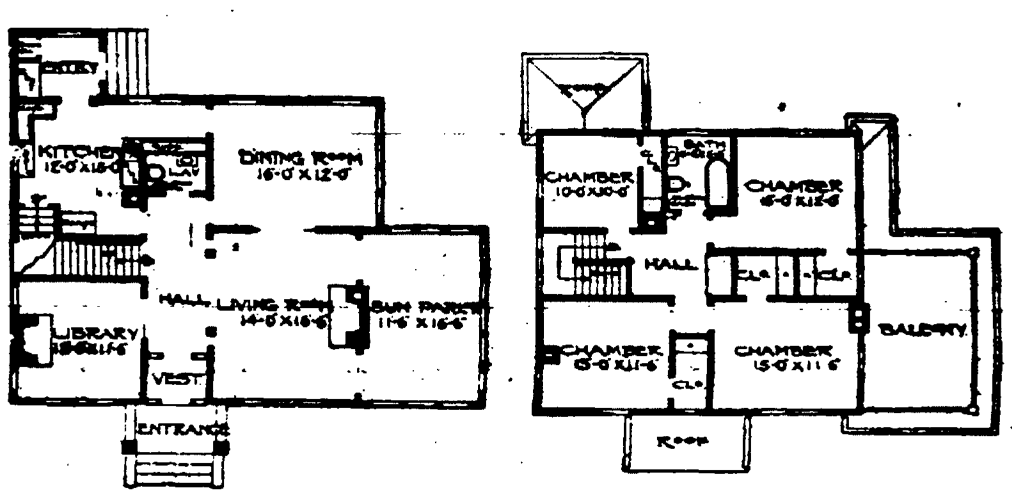
SEND FOR FREE BOOKLET, "THE HOME COW DOCTOR."

DAIRY ASSOCIATION, NORWICH, N. Y.

# A STATELY COLONIAL TYPE.

**Design 1007, by Glenn L. Saxton, Architect, Minneapolis, Minn**

PERSPECTIVE VIEW. FROM A PHOTOGRAPH.



FIRST FLOOR PLAN. SECOND FLOOR PLAN.

This design makes a home complete in every appointment if built on a lot that is three or four feet above the sidewalk level. The broad projection of eaves, substantial details of the construction and brick entrance porch make a very attractive exterior. The hall opens into every room on the first floor without going into any of the other rooms. Size thirty-four feet wide, exclusive of the sun parlor, and thirty feet deep. Full basement seven feet in the clear. First story nine feet. Second story eight feet.

The finish of all rooms except the kitchen is clear quality red oak, with the same floors. The second story and kitchen to be finished in birch, with natural finish or white enamel. Cost to build about $5,600.

Upon receipt of $1 the publisher of this paper will furnish a copy of Saxton's book of plans, "American Dwellings." It contains over 300 designs costing from $1,000 to $6,000· also a book of interiors, $1 per copy.

# LABOR MUST BE GIVEN A VOICE

## Demands Right to Participate In Matters Affecting Welfare.

## PREPAREDNESS PROBLEMS.

**Workers Can Give Valuable Advice and Service to the Nation In This Capacity — Statesmen Must Recognize the Significance and the Power of the Organized Labor Movement.**

[By SAMUEL GOMPERS, president of American Federation of Labor.]

Before the outbreak of the war we had talked much of the ideals of peace, fraternity and national interdependence, but we made no provision for the establishment of agencies to perform the function of war—which is organized force. War came. Democracy with its free institutions and its humanitarian ideals was confronted with a fight for existence. War is a test of physical fitness and of the organization of material resources. The nation that has failed in these will pay dearly in the perils of war. But these qualities whose value is demonstrated by the inexorable demands of war are equally essential to most effectual progress and best development during times of peace.

In the affairs of the nations there stands out one dominating fact—the existence and the power of organizations of wage earners. Long ignored, persecuted, and outlawed, these organizations have proved themselves an essential constructive factor in human affairs. Private industry and commerce have generally remained outside governmental jurisdiction. They constitute the domain of voluntary activity and voluntary institutions. For the protection and the betterment of human beings engaged in industry or commerce labor organizations were developed. The workers have made labor organizations a constituent element in the organization of production and therefore a part of organized society.

Labor organizations are the channel for the expression of the desires and purposes of the wage earners. They are the instrumentalities for making effective their demands for justice.

Whether in peace or war the wage earners are a constituent element in the nation, numerically strong and creatively essential. Therefore a national policy, whether industrial or political, that does not take into account the welfare of the wage earners will fall short of concepts of broadest statesmanship. Not only must the wage earners be considered in determining policies, but in the council that determines policies they must be given representation and voice equal to their importance in national life.

The wage earners will not longer be denied their right to participation in determining those things which affect their welfare. Their demand is in accord with the principles upon which our republic is founded. They are unwilling to delegate to others the determination of their lives.

Now that our nation is giving thought to the problems of preparedness the wage earners present their claim to consultation and participation. No true plan for preparedness can fail to include service for them. Therefore they demand that the plans shall be democratized.

Not only is this demand just, but that wage earners can give valuable advice and service to the nation in this capacity is evident from their achievements. And their experience and opinions are needed in considering national preparedness. No part of our citizenship is more unalterably opposed to ideals of militarism and compulsion than are the members of the trade union movement. If provisions for national preparedness are to be constructive they must escape the perils of militarism and autocracy; they must be based upon voluntary and democratic principles.

Essential to any plan for human and national conservation are physical fitness, power and ability for self protection and the attitude of mind insistent upon rights and justice. The trade union movement has done more for the maintenance of these qualities than any other force. Trade unionists will carry these qualities into places of formal responsibility to the nation.

If our nation is to keep its place among the leaders of the world its statesmen must recognize the significance and the power of the labor movement, which represents the ideals of the masses of men, women and children. Wherever it has established itself it has brought with it ideals of humanity—ideals that make a strong appeal to heart and mind. There is a human side to every relation of society. The trade union movement is the one institution that represents distinctively the human element and human welfare. Therefore spokesmen for labor ought to be in every commission, committee or representative body that is intrusted with consideration of problems and determination of policies.

The workers are quite willing to bear the full share of their responsibility in any issue. They are ready to give service, whatever might betide, but in this day of the workers' realization of their citizenship and sovereignty they are insistent in the demand that they have the fullest opportunity of advice and consent in the councils of all the affairs of our nation.

### Many People Don't Know

A sluggish liver can cause a person an awful lot of misery Spells of dizziness, headaches, constipation and biliousness are sure signs that your liver needs help. Take Dr. King's New Life Pills and see how they help tone up the whole system. Fine for the stomach too. Aids digestion. Purifies the blood and clears the complexion. Only 25c, at your Druggist.

### Her Little Girl Cured of Croup

About three years ago the little daughter of Mrs. J. W. Dale, Ilion, N. Y., then two years of age, had frequent attacks of croup. Mrs. Dale says, "I got a bottle of Chamberlain's Cough Remedy for her and it relieved her immediately. It certainly is a wonder."

**50-52 SOUTH FIRST STREET, FULTON**

# RECOMMENDS BOND ISSUE TO COVER DEFICIT

(Continued from Page One)

"None of these back bills will be paid from current moneys, else we would only repeat former performances." Mr. Hillick stated that he did not mean to accuse former officials of wrong-doing, but it was evident that they had not conducted their work in a business-like and careful manner.

Continuing, Mr. Hillick called the board's attention to the balance of $2,300 which is due on the new pump. At the time of the purchase, it was intended to pay for the same out of the savings which would result from the pump's use, but this has not been done. At the last meeting of the Board of Public Works, it was asked what disposition was to be made of the matter. It was also suggested that the firm to whom the money is due shall be asked if it will be agreeable to await part payments which would be made from the earnings of the water department. It was the opinion of the board that every dollar earned by the water department above its regular expense would have to be used.

This $2,300, together with the other city obligations incurred in the past makes it necessary to raise about $17,000, according to Mr. Hillick. He recommended to the board that the amount be raised by a bond issue, which would have to be authorized by an act of the legislature.

## Bond Issue Recommended

It developed from the investigation made by Mrs. Hannis, who acted in the capacity of accountant during the last administration, that the Water Department had overdrawn $6,700 from its fund. "This was due to the fact that the books showed that much money in the fund, while in reality it was not there," Mr. Hillick stated, "and a certain chamberlain in the past, in adding up a column of figures on one page of his ledger, made an error of $1,000. This amount was also used. Such items as these will have to be taken care of by the board, and I recommend, providing you deem is advisable to raise the $17,000 needed to straighten out the tangle, that each item be the subject of a thorough investigation before any money is paid out. A regreetable feature of the accumulated indebtedness is the fact that considerable of this money is due to city employes as salary."

Water bonds, principal and interest, will come due on June 1st The Council has already set aside $5,000 to meet the same, while the remainder, estimated at a like amount, will be deducted from the water department receipts.

Commander J. H. Stewart requested the yearly appropriation which helps to sustain the G. A. R. Post. The board passed a resolution authorizing the payment of $200. The yearly appropriation for this purpose is $400, which is paid in semi-annual installments.

A resolution was passed authorizing the payment of the following bills:

R. B. Carhart, $8.00; S. Mastalerz, $3.00; Oswego County Independent Telephone company, $4.32; W. G. Ingrahan, $15; Mrs. Mae Woods, $12; O. Henderson & Co., $2.25; Edson Lamphere, $8; A. L. Warner, $8; B. B. Ingamells, $4.27; Mary McGeickey, $3.27; Mrs. Nettie Ferguson, $30; Wilson & Scott, $4.29; E. E. Hart $13.70; B. E. Holly, $8.48; F. A. Culkin, $12; J. A. Murphy, $8.54.

A resolution was also passed authorizing the payment of fees to physicians for the filing of birth and death certificates.

### MILTON CRANDALL'S WORK PRAISED IN OSWEGO

The Oswego Times says some nice words relative to the work of Milton Crandall, of this city, in connection with the Y. M. C. A. minstrel show given Monday evening. The Times says in part:

"Milton Crandall, who staged the show, deserves mention first of all. The odd conceit of working in the railroad train idea as a prologue was very effective. The splendor of the stage setting in the first part was dazzling. The arrangement of the chorus and orchestra was very effective."

See the Willys-Knight car. Van Wagenen, Inc. adv342

Leave orders for Miss Cryler's Baking with Mrs. J. K. Steele. Phone 378. adv

### STATE SEEKS METHOD OF RESEARCH WORK

Were Fulton to have an official bacteriologist that dignitary would be in receipt of a copy of an agreement pertaining to new methods and conditions of cultures for diphtheria, typhoid fever, tuberculosis and other infectious and communicable diseases. Similar copies of the agreement have been sent out by the State Board to all city and county bacteriologists in the state, in an endeacor to standardize the methods for examining the cultures. It is the aim of Dr. Augustus B. Wadsworth, director of the State Laboratories to bring all of the laboratories in the state up to a certain standard of efficiency by co-operation.

It was also announced in the circulars that for the purpose of determining standards of efficieney, preparations studied at the state laboratories are to be sent to the various county and city bacteriologists for examination. This is virtually a system for periodic examinations, started for the first time by the State Board of Health. It is also required that all persons applying for positions as assistants to bacteriologists shall have at least one year's experience in a laboratory before being qualified for these positions.

### BILL TO PROVIDE FOR ONE COMMISSIONER

Albany—Assemblyman Louis M. Martin of Clinton is preparing a bill to substitute one election commissioner for the present board of two in Oneida country, Speaking of the matter he expressed the opinion that the present board is cumbersome and that the change would expedite work and effect a saving to the taxpayers. The measure when drafted will also provide that political parties shall submit to the commissioner names of men to serve as election inspectors and he shall examine them as to their qualifications.

Call and see the new $615.00 Overland. Van Wagenen, Inc. adv342

### MOTOR LAW PENALTIES MUST GO TO THE STATE

According to a decision handed down by Supreme Court Justice Chester in the test case of the State of New York against the City of Buffalo, all fines collected by cities for violations of the State Motor Vehicle Law must be turned over to the state. The decision of Justice Chester relates to fines collected for violation of state laws, the judge holding that fines collected for the violation of city ordinances relating to motor vehicles may be retained by the city.

In rendering his decision Justice Chester stated that it would be necessary to change the present laws if the cities were to collect from the "fruits of their labors in enforcing the State Motor Vehicle Laws."

**Faith Well Founded**

Mrs. J. Dyer, Little Falls, N. Y., has great confidence in the curative properties of Chamberlain's Cough Remedy. She says: "A few years ago I used two bottles of Chamberlain's Cough Remedy which cured me of a bad cold on the lungs and cough. I have no hesitancy in recommending it to all, and have great faith in its curative qualities."

**How to Cure Colds**

Avoid exposure and drafts. Eat right. Take Dr. King's New Discovery. It is prepared from Pine Tar, healing balsams and mild laxatives. Dr. King's New Discovery kills and expels the cold germs, soothes the irritated throat and allays inflammation. Search as you will, you cannot find a better cough and cold remedy. Its use over 45 years is a guarantee of satisfaction.

# AUBURN WANTS SAVINGS ASS'N

Auburn, according to The Citizen of that city, is being aroused by the Chamber of Commerce to the necessity of establishing a savings and loan association.

The Citizen says:

The matter of establishing a Building and Loan Association, which was considered at the last meeting, was taken up and it was the opinion of the board that such an institution if it could be properly financed would be a benefit to the city. It will take $25,000 to start the proposition under the present law. It will be recalled that Clay W. Homes of Elmira, the state President, was here at the last meeting of the Board of Directors, and discussed the feasibility of such an institution with the members and some others, and the details were then gone over. The Building Loan Associations are now under the State Banking Laws and are much more carefully guarded than they were heretofore and there are many features about it that would prove an advantage to people who desire to build homes.

**Philanthropy to Start**

At the start it is a philanthropic proposition, however, and public-spirited men must invest at first until it becomes a paying institution. The investments paying 4½ per cent. and are practically safe as they are protected by the banking laws that protect other savings institutions. They cannot be carried on in a loose manner or in an extravagant manner, and only 2½ per cent. of the assets can be used for the expenses, and they must be conducted very economically. If the institution can be started it can be established in the rooms of the Chamber of Commerce with some extra clerical force, until it becomes strong enough to occupy its own quarters. One difficulty is to find a man like Mr. Holmes, who is willing to devote his time to such work without salary. This is what Mr. Holmes does for Elmira. Whether Auburn has such a man of means or not remains to be seen. The matter was finally referred to the president and the secretary to investigate with the banks and capitalists and ascertain what their advice in the matter is and report back to the board. If a man can be found to back the thing up, Mr. Holmes will be again invited to come here and will thoroughly explain the matter to the directors.

**GEORGE L. PRATT GETS AWARD OF $102,000**

The affirmation by the Apellate Division of the award made to Mr. George L. Pratt by the Court of Claims is received in this city with a lot of satisfaction.

Mr. Pratt's claim originally was for more than $1,000,000, which represents losses suffered by the construction of the barge canal in the neighborhood of Battle Island.

Any horse is liable to nail in the foot. Open the wound and thoroughly inject Hanford's Balsam to the bottom to prevent blood poison and heal the wound. adv.

# SCHEME FOR SCIENTIFIC ADJUSTMENT OF TARIFF OUTLINED BY PRESIDENT

Washington.—Promotion of the prosperity of American industries through the scientific adjustment of the tariff on the recommendation of an "unpartisan" tariff board.

This is the policy of President Wilson, outlined today for the consideration of Congress to Representative Claude Kitchin, chairman of the Ways and Means Committee.

Mr. Wilson urged the creation of a tariff board by the present Congress. In advocating thisv astly important step he took the leadership in asking the democratic party to turn a flip-flop with regard to its stand for a tariff for revenue only. The scheme unquestionably is for protection, without the use of the word protection.

Southern democrats in Congress received Mr. Wilson's scheme with general satisfaction. These democrats have stood all along for a protective tariff on their products, and they see in the scheme of a tariff board an opportunity of getting what they want without being put in the position of abandoning their long standing tariff principles.

Congress in the opinion of the President, should give such a Board authority to investigate:

The administration and fiscal effects of the customs laws now in force or enacted hereafter.

The relations between the rates of duty on raw materials and half finished or finished products.

The effects of ad valorem and specific duties and those which are compound specific and ad valorem duties.

The arrangement of the articles and the several schedules, with regard to the classification of the various items.

Thep rovisions of the law and the rules and the regulations of the Treasury Department regarding invoices, appraisement, collections, etc.

The working of the tariff laws on general economic conditions.

The volume of imports at home and abroad.

The tariff relations between the United States and foreign countries, the rates of duty imposed on American products in foreign countries and thei industrial effects of proposed or existing duties on products competing with American goods.

Thep ossibility of extending in the United States present industries and the establishment of new industries.

It is the belief of the President that the Board would be able to furnish to the State Department much valuable information regarding commercial treaties between various foreign countries. This could beu sed in the consideration of new treaties and might lead to the termination of existing treaties found to be injurious to American industries.

**WEATHER FORECAST**

Cloudy and probably rain Thursday, somewhat cooler; shifting winds becoming north to northeast.

**KNIGHTS OF COLUMBUS TO INCORPORATE**

Negotiations have been completed by the Knights of Columbus whereby the property at 173 South st. st., for many years occupied by the Hon. Willard Johnson as a home, and later by Mr. Thomas Hunter, will become the home of that society.

Application papers for incorporation have been filed by the Knights with the state department, as under the laws of New York state no society can legally hold title to real estate unless incorporated.

Plans are being made by a committee for the remodeling of the interior of the new home. Partitions will be removed from some of the rooms, and the walls throughout will be redecorated.

**For Rheumatism**

As soon as an attack of Rheumatism begins apply Sloan's Liniment. Don't waste time and suffer unnecessary agony. A few drops of Sloan's Liniment on the affected parts is all you need. The pain goes at once.

A grateful sufferer writes:—"I was suffering for three weeks with Chronic Rheumatism and Stiff Neck, although I tried many medicines, they failed. Fortunately I heard of Sloan's Liniment and after using it three or four days am up and well. I am employed at the biggest department store in S. F. where they employ from six to eight hundred hands, and they surely will hear all about Sloan's Liniment.—H. B. Smith, San Francisco, Cal.—Jan. 1915. 25c at all Druggists.

**OSWEGO KNIGHTS TO PRESENT AN OPERA**

The Knights of Columbus of Oswego are rehearsing "The Burgomaster," to be presented in that city during Easter week.

Our readers never risk a cent when they buy Hanford's Balsam of Myrrh because every dealer in this liniment is authorized to refund the money if the Balsam is not satisfactory. adv.

# AN ARMY CANNOT BE RAISED HIGHER IN QUALITY

## THAN ITS GENERAL AND COMMANDING OFFICERS

Neither can a city rise higher than its leaders, constantly on the field, directing each day's plans and work.

Every hour has its duty for the leader who needs to see for himself that the steering gear is working right.

We cannot have proxies---they are unequal to it, and the people have to be safeguarded, and to hold the leaders of a government to strict accountability for everything done.

# Bowser Buys Coal

### And He Meets With a Dishonest Honest Dealer.

By M. QUAD

Copyright, 1916, by the McClure Newspaper Syndicate.

The Bowsers had eaten dinner. A cheerful fire burned in the grate, and the cat licked her paws as she lay upon the rug.

Outside the house there was a cold north wind and a squall of snow now and then.

Mr. Bowser was half nodding in his sleep when a voice crying out interrupted his contentment. It was Mrs. Bowser's voice, and it was exclaiming loudly:

"There, there; I have forgotten that coal again!"

"Hey! What! Why don't you scare a fellow to death and be done with it?" demanded Mr. Bowser.

"I only said I had forgotten to telephone for some new coal. I suppose it is too late now? All the dealers will have gone home by this time."

"Yes, they must have gone home. Is the coal for the furnace all gone?"

"There may be enough to last tomorrow. I ought to have telephoned early this morning, but I had a hundred different things on my mind."

"Mrs. Bowser, it seems to me that the last two tons of coal went very fast," said Mr. Bowser, as he jabbed at the fire with the poker.

"I know it did, and yet I tried my best to be saving. I don't believe there

"A CHEERFUL FIRE BURNED IN THE GRATE."

were two tons of it. I believe you were cheated of at least a quarter of a ton of coal."

"More likely it was half a ton."

"And can't you do anything about it? Other husbands tend to such things. Why don't you, instead of leaving it to me? The coal men will cheat a woman quicker than a man. They know that she won't come to the office to complain about short weight. We are being cheated becaause you won't see about it."

"Well, I will tell you what I will do," said Mr. Bowser as he suddenly made up his mind. "I will start out in the morning to buy two more tons of coal. I will visit five or six coal offices and let them know I am up to snuff and can't be imposed upon, and we will get the biggest two tons of coal we have had in three years. It will be a little trip that I have often thought of making, but haven't got around to it yet. Yes, by George, we will put a foot down on this short weight business!"

Nothing more was said that evening, although Mrs. Bowser could have added that he had better stop at the grocer's and the butcher's before his trip was over. After breakfast, with the light of a scrap shining in his eyes, Mr. Bowser started out among the dealers in coal. At the first office he entered he said:

"I have come for two tons of coal—furnace coal."

"Certainly, certainly," replied the man. "This weather burns up the coal very fast."

"I want to ask a few questions before you take my order."

"Oh, to be sure," smiled the dealer. "You can ask a dozen questions."

"Can I depend on you sending me 2,000 pounds full weight for a ton?"

"Why, of course. You don't think I would send you less, do you?"

"And it will be clear of slag and slate?"

"As clear as noonday, sir. No one can find fault with our coal in any direction. Full weight, prompt delivery and no slag or slate. What is your address, sir?"

"Didn't I read in the papers a short time ago that you had a contract with the city to supply one of the public schoolhouses and that you were short in tons in the contract and had to make it good?" asked Mr. Bowser.

"Oh, as to that," laughed the dealer, "my weigher of coal, who has been with me for the last fifteen years, got drunk one day and made a mistake about weights. When my attention was called to the shortage I was only too glad to correct it at once. Shall I send the two tons of coal to your house at once?"

"I am going up the street," replied Mr. Bowser, "and I will stop when I come back and leave the order."

At the next coal office they were weighing a load on the scales as Mr. Bowser came along. He cast a look a the weight, and as near as he coul figure they were giving 1,850 pounds for a ton. Nevertheless, he went in.

"Good morning, sir," saluted the dealer. "How much coal did you wish to order this morning?"

"That depends somewhat on circumstances," was the reply. "Will you assure me of full weight?"

"Oh, most surely. That is one of the things I pride myself on."

"And clean coal?"

"That is another of the things."

"I just noticed a ton load on your scale, and I saw that it was 150 pounds short, and there was a heap of slag and slate in sight."

The dealer turned very red in the face and rushed out into the yard and was absent three or four minutes. When he returned to tell Mr. Bowser that it was a ton of coal ordered for the house of one of his employees and was sold almost at half price he found his customer was gone. He ran out again and berated the weigher, but it was too late.

Mr. Bowser found the next three dealers courteous, honest men. They gave full weight and sometimes a little more; they sold only clean coal; their aim was to satisfy all customers; they had never had a complaint. The grocer and butcher might give short weight, but never the coal man; his conscience forbade that.

Mr. Bowser extended his trip for two miles without placing his order and finally entered the sixth office.

"How many tons and where to?" asked the dealer as he wet the point of his pencil with his tongue.

"I want two tons of coal, but"—

"But you want to do a little kicking first. Kick away."

"Will you deliver me a full 4,000 pounds?"

"No, sir," was the emphatic reply. "If I deliver 3,700 pounds you might thank your stars!"

"But will it be free burning coal?"

"No, sir! There will be the usual amount of slag and slate mixed in."

"But—but"— stammered Mr. Bowser, in his surprise.

"Oh, don't take me for a fool!" said the dealer. "You have doubtless been to other dealers, and they claimed to be honest men and filled you up with promises of full weight and free coal. I am not an honest coal dealer myself, nor am I a liar. No man is in the coal business for his health. We are all driven into dishonesty. I have just received a consignment of 200 tons of coal. It is at least ten tons short. Am I going to make up for the loss, or have my customers got to do it?"

Mr. Bowser did not reply.

"Look here, old man," continued the dealer. "The mine owner cheats his railroad. The railroad cheats the wholesale dealer. The wholesale dealer cheats the retailer. The retailer cheats the consumer. I have six drivers, and every one of them cheats me by selling from his load three or four buckets of coal on every trip he makes. Besides that, there is stealing from a yard, and my watchman sells a barrel or two of coal every night. It is an endless chain of cheating, and they who won't cheat are out of the business after one year."

"But who will I cheat?" asked Mr. Bowser.

"You may cheat the man who shovels the snow off the sidewalk—if you can," was the sobered reply. "At least you will have to cheat somebody or suffer the loss. I am sorry it is so, for I would like to be an honest man, but I can't be, the way things are run. Will you give me your order, sir, and let me cheat you? It might as well be me as any of the others."

"I—I think I will," replied Mr. Bowser. "I have tried honest men long enough. I will make a change and try a dishonest one."

And Mr. Bowser gave his address, paid for the coal and walked out. He was at home when the wagon drove up, and as there was a public scale within two blocks of his house he said to the coal wagon driver:

"Had you just as soon drive over and weigh this coal?"

The driver said he would be delighted, and the load was weighed and the extra weight for the vehicle figured out. There were just 4,150 pounds.

"How does this come?" was asked of the driver.

"Oh, my boss is one of those dishonest coal dealers," was the laughing reply.

And when Mrs. Bowser was told of the strange occurrence she replied:

"Mr. Bowser, you go out and look for a dishonest grocer and butcher, and we will solve the problem of the high cost of living. I knew there was a way to do it if we could only strike it."

**Preserving a Memento.**

"So this is the house where General George Washington made his headquarters!" said the stranger as he gazed at the inscription.

"No, boss," replied Erastus Pinkly. "Tain' exackly de place. De house where de sign used to be was tore down, so we had to move it."—Pittsburgh Press.

**The Stranger.**

"Who's that stranger, mother, dear?
Look! He knows us. * * * Ain't he queer?"

"Hush, my own. Don't talk so wild.
He's your father, dearest child."

"He's my father? No such thing!
Father died away last spring!"

"Father didn't die, you dub.
Father joined a golfing club.

"But they've closed the club, so he
Has no place to go, you see—

"No place left for him to roam—
That is why he's coming home.

"Kiss him; * * * he won't bite you, child.
All them golfing guys look wild."

—Chicago Herald.

**WHAT THE UNION MEANS.**

To the union man the union means something more than a machine to maintain fair wages and working conditions. It means an agency for securing employment if employment is to be had in his particular craft. The union man pays dues into his union for protection. He expects his union to protect him against the competition of the nonunion man. If a union man is out of work while a nonunion man in his craft is working, then the union man feels he is not receiving the protection for which he is paying. At the bottom of the whole problem lie the dread of unemployment and the competition for jobs.—Luke Grant.

## AID DANBURY HATTERS.

### Workers Sacrificed Themselves For Cause of Industrial Freedom.

The plight in which the hatters of Danbury, Conn., find themselves arouses the concern and sympathy of all liberty loving citizens of America. The Danbury hatters have performed a service of historic importance in the struggle for industrial freedom, says the executive committee of the American Federation of Labor.

Efforts of employers in America to keep their workers in subjection have been particularly heartless and unrelenting. They have used all their power and influence, economic, political and particularly in the courts. The legal theory that has enabled the employers to restrict the industrial freedom of their employees was based upon a concept that labor power was a commodity and that employers possessed certain vested rights and a kind of ownership of their labor. This principle was the basis for flagrant abuse of the injunction writ and for interpretation of the anti-trust law.

In the case of the hatters' union the suit was brought against members who had reached old age, those between sixty and eighty years. They were selected simply because they had some little savings, an ownership in modest homes. It is a matter of common information that the framers of the Sherman anti-trust act did not intend that law to apply to the normal activities of the wageworkers. The decision was a great injustice to the hatters, who were innocent victims of the government.

The Danbury hatters did not falter in that which they did for the benefit of all organized labor. They did their duty and made the test, and upon them has fallen the burden of injustice. If they are left to bear the full burden it will mean great suffering and privation to them. Every member of organized labor is urged to do his duty in the matter and bear his share in the common struggle to establish industrial justice.

## COMPENSATION UPHELD.

### Chief Justice of New Jersey Reverses Supreme Court Decision.

In an opinion filed with the New Jersey court of errors and appeals Chief Justice Gummere upheld the workings of the compensation act of the state in the case of Mrs. Amy L. Winfield, whose husband was killed while working for the Erie railroad. The opinion reverses one handed down by the supreme court and upholds an original award to the widow by the Hudson county court.

The company set up the claim that Winfield was engaged in interstate commerce and that his rights should be determined under the federal statutes relating to common carriers. The Hudson county court held that the man was not so employed and gave an award to the widow under the compensation law. The supreme court then reversed the lower court.

Justice Gummere holds that what Mrs. Winfield seeks to enforce against the company is not liability arising out of negligence as treated by the federal statutes, but a "contractual obligation" created by the workmen's compensation act with the consent of the employer and employee and which the court holds still exists. The court stated that no proof of negligence was offered by either side.

**Railway Strike Averted.**

Settlement of the threatened strike of 4,000 switchmen emloyed by the railroads entering Chicago was announced when word came that the railroad general management committee had agreed to the employees' contention that transfer trains should include cabooses for the accommodation of the trainmen. The dispute between the trainmen and the railroads was largely based on this point, the railroads having ruled against cabooses.

## LABOR NOTES.

The National Print Cutters' Association of America will meet at Philadelphia April 29-30.

It is estimated that more than 3,000,000 workers will contribute to the Danbury hatters' fund.

The recent riot at Youngstown, O., caused the deaths of two persons and a property loss of $1,000,000.

The Journeymen Tailors' organization is composed of 303 local unions, with a total membership of 12,000.

The convention of the Amalgamated Association of Iron, Steel and Tin Workers will be held at Cleveland May 2 to 16.

# The Woman of Today

It is only hearsay that we have to go on today, for we have no notion of who it was that pointed out the value of learning to "part with things as they go." But lest you, gentle reader, be one of these to whom the idea is new we frankly borrow the phrase and pass it along.

Now, we all know that many a fine sermon has been preached on the text of "Taking things as they come." How diligently have we been admonished in this respect and how often. Our friendly advisers love to say to us, "Oh, do not worry; just learn to take things as they come." Exactly so, and a sane method of procedure it is since we cannot affect their coming and cannot tell what fortunes or misfortunes the morrow may hold.

But if this be wise why then must we not also learn the lesson of "parting with things as they go," as gracefully and as easily as we strive to accept their coming? For things do go in this world, often just when we want them to stay.

An excellently trained man once lost an excellent position unjustly. It was not a light matter, but when it went he parted with it and let it go, as much as to say: "So much for that; that's done with. Now, what next?" And of course eventually he found the next thing, just as we all are bound to do.

It doesn't make any difference what it is, when things go let's learn to part with them, not to hang on to them and prolong the agony of their going.

"Men die and worms do eat them, but not for love," we often hear. But, alas, it is for love that women do, indeed, almost die—or, in fact, over love's going.

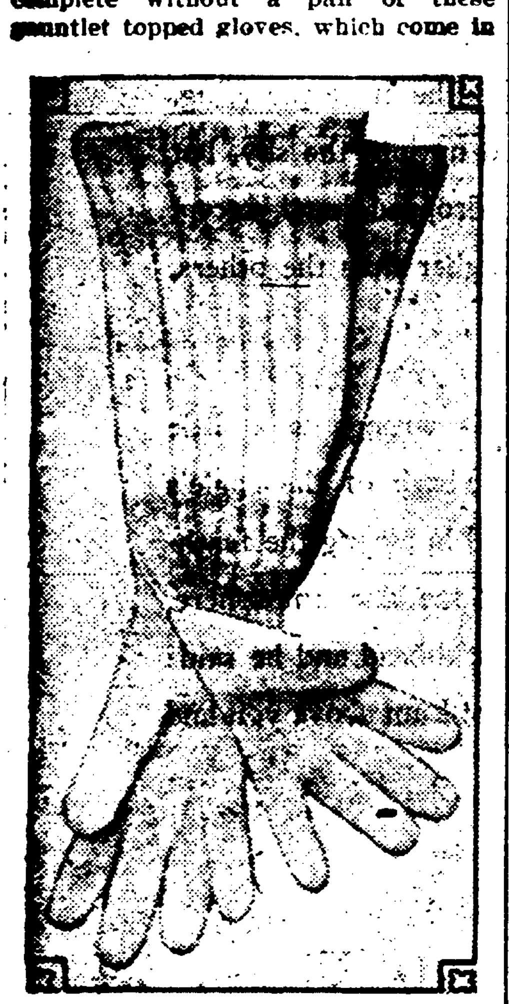
And over how many things do women allow grief to eat out their very hearts when the art of learning to part with things as they go would have saved the day. If it's gone, why, let it go, whether it's a lost love or an heirloom, a lost position or a week's pay.

Let's learn to say, "Well, that's gone, done for, over with"—and so with a wave of the hand, "Farewell. What's next?"

## THE NEW GAUNTLETS.

**These Popular Gloves Are Even Being Worn at Afternoon Functions.**

The skating sets of 1916 are hardly complete without a pair of these gauntlet topped gloves, which come in



ALSO FOR COMFORT.

attractive combinations of Angora wool. Women who knit them use white, so that when new bands need to be attached to the wrists the bother of matching shades is obviated.

### Baked Apple Dumplings.

Select tart apples, pare and core them and cut in quarters. Three large apples should make six dumplings. The dough is made as follows: Two and a half cupfuls of flour, one heaping teaspoonful of baking powder and one teaspoonful of salt. Sift these ingredients together. Rub two-thirds cupful of lard into the flour and mix with enough cold water to make a dough which can be easily handled. Divide the dough in six parts and roll each part out large enough to hold the apples. When the dough is rolled put the apples in the center and fold the dough over it, pinching the ends together. Bake in a shallow buttered dish in a moderate oven and serve with cream and sugar.

### Devil's Food Cake.

Yolk of egg, one-quarter bar of chocolate or four teaspoonfuls of cocoa, one-half cupful of sweet milk. Cook this until smooth; cool. Add four tablespoonfuls of melted butter, one cupful of sugar, one-half cupful of sweet milk, in which dissolve one teaspoonful of soda, one and one-half or two cupfuls of flour.

Filling: One-fourth of a bar of chocolate or four teaspoonfuls of cocoa, dissolved in one cupful of boiling water; one cupful of light brown sugar, one tablespoonful of butter and one heaping tablespoonful of cornstarch. Cook this until it thickens. Let cool. Add vanilla and nut meats.

## HYGIENE NOTES.

**A Scientific Chat About the Daily Vital Needs of Our Bodies.**

To be trite, every one has a body in the health of which he or she is more or less interested. "Tell me what you eat and I will tell you what you are" has in it more significance than most people appreciate.

That the body needs proteins and energy metabolism has long been recognized, but not every one is aware of the importance of the body's need for mineral substance.

Mineral foods are as necessary to physical well being as are those furnishing nitrogen or energy.

Contractility and irritability of muscle tissue are dependent in some way upon certain inorganic salts. The rhythmical beating of the heart, according to the most modern medical science, is controlled by calcium, sodium and possibly potassium present in the blood in the tissues, and it is known that the retention of sulphur and phosphorus within the body run parallel to the retention of protein; also that the regulation of the alkalinity of the blood is accomplished, in part at least, through the phosphates. The blood and other fluids must be kept alkaline through a balance between acid and base decomposition products in metabolism.

Vegetables are sources of mineral foods. They furnish iron plentifully and in far larger proportion than do most animal foods. Remember that the pleasantest way to incorporate minerals is through the daily use of fresh salads.

### Banana Custard.

Place slices of bananas in the bottom of a serving dish, sprinkle with lemon juice and cover with soft custard made by scalding two cupfuls of milk in a double boiler; mix two eggs, one-third cupful of sugar and one-quarter teaspoonful of salt; add the scalded milk, return to double boiler and cook until the mixture thickens and is smooth and creamy. Strain into a cold dish and flavor when cold with one-half teaspoonful of vanilla. If the custard begins to curdle set at once into a dish of cold water and beat briskly with an egg beater.

### Liver and Rice.

Materials: Lamb's liver, well boiled rice, salt, cayenne, chopped parsley and butter.

Utensils: Chopping tray, knife, cup, spoon and buttered baking dish.

Directions: Boil the liver until tender and chop. Put in the baking dish alternate layers of rice and liver, season well with salt, pepper and parsley. Have the top layer rice and moisten the whole with melted butter. Brown in the oven.

### A Wholesome Salad.

Two cupfuls Tokay grapes or white grapes halved and seeded, one cupful of chopped walnuts, one cupful chopped celery. Beat the yoke of one egg, add one tablespoonful vinegar and one tablespoonful of boiling water. Cook until thick. Stir in one tablespoonful of creamed butter and season to taste. When cold add an equal quantity of whipped cream.

## The Kitchen Cupboard

### WINTER PUDDINGS.

MARSHMALLOW PUDDING.—Prepare a lemon jelly; pour a very little into a plain mold or dish; add a layer of baked marshmallow. Cut the marshmallows with scissors. When this layer sets add more jelly, add more marshmallows and proceed until jelly is all used. The lemon jelly can be kept in a warm room, so that it will not jelly before ready to be used. Serve with whipped cream.

Caramel Pudding.—Make a cornstarch pudding, omitting sugar. When milk and cornstarch are cooking in the double boiler melt one cupful of sugar over the direct fire. When entirely melted add one-half cupful of boiling water. Allow this mixture to cook until thick and sirupy; then combine with the cornstarch mixture. Pour into a mold which has been wet with cold water. When cold serve with cream.

Baked India Pudding.—One quart of milk, one-half cupful of yellow cornmeal, one-half cupful of molasses and one-half teaspoonful of salt. Put one pint of the milk into an earthen baking dish and the other pint into a double boiler. When scalded stir the meal into the hot milk, a little at a time, until it thickens. Remove from stove and add molasses. Pour this mixture into the cold milk. Bake four hours in a slow oven. Serve warm with cream. A fireless cooker is excellent for this dish. When done the pudding will be red and full of whey.

Sago Pudding.—One cupful of sago. Soak two hours in one quart of water; then add a few grains of salt, four tablespoonfuls of sugar and eight large apples quartered. Bake two hours.

Indian Pudding.—Take two cupfuls of Indian meal, half a cupful of butter, one of sugar, two cupfuls of milk, half a cupful of molasses and a cupful of seeded raisins. Wet the meal with boiling water, just enough to scald it. Then beat in the butter. Stir in the sugar thoroughly and add salt and milk, stirring well, and then add the molasses and raisins. Add a teaspoonful of extract of cinnamon and a quarter of a grated nutmeg. Mix well and bake two and a half hours. Serve with cream when cold.

Anna Thompson.

## A Quaint Design From London

© by American Press Association.

THIS costume, so entirely English in contour, is fashioned of black satin lavishly braided. The style is markedly mid-Victorian, and the Russian cross of its corsage shows what a pretty compliment the English can pay their ally. Even the turban takes a Russian tilt, and its deep fur band matches the muff, which is built on more spacious lines than are muffs this side of the pond.

ANNA MAY.

## Easy & Practical Home Dress Making Lessons

*Prepared Especially For This Newspaper by Pictorial Review*

### Simple, but Interesting.

An informal frock of Havana brown faille trimmed with very dark brown silk. The four-piece skirt is attached to the waist under a narrow belt of self-material.

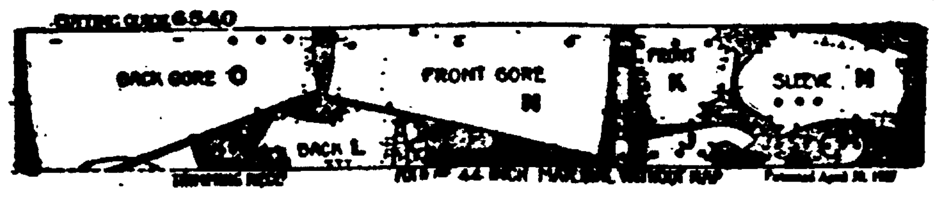
Easily the most interesting feature of this frock is its simplicity, which is most delightful. Combined with this are comfort and style and the possibility of reproducing the frock at exceedingly small cost. In medium size the dress requires 4½ yards 44-inch material, with ⅝ yard contrasting silk 27 inches wide for the trimming and ⅝ yard belting 2 inches wide for stay.

After folding the material, place the back gore of the skirt into positon first, on a lengthwise thread of the material. Next comes the piecing and to the right of this the back, which is laid on the fold. The front gore of the skirt is laid on a lengthwise thread of the goods, with the belt next, on a lengthwise fold. The last four sections to be placed are the shield, front, sleeve and pocket section, all on a lengthwise thread. The skirt and the sleeves may be shortened, if desired, by cutting off on the line of small "o" perforations.

The collar may be of black or some dark silk, and the trimming is repeated on the upper edge of the pocket. The intrusion of self bands on the black strikes an effective note in decoration. The back of the waist extends over the shoulders on front in yoke effect, giving a smart finish to the shoulders.

There is no more popular model for a skirt than the new four-piece designs and this one is attached to the waist under a narrow belt of its own material.

Informal frocks of faille sound very imposing, but they are not so very expensive when one thinks of the service they give and their smart effect.



Pictorial Review Costume No. 6540. Sizes 34, 36, 38, 40, 42, 44, 46, 48 and 50 inches. Price, 15 cents.

## THOSE FRENCH FANGLES.

**Aristocratic Names For Quite Everyday Things.**

Aspic is a savory jelly. Usually it is made with meat stock, and vegetables or meat is prepared with it while it is hot and liquid and inserted before it has cooled and hardened.

Au gratin is a term applied to a dish baked with crumbs or cheese and a sauce and served in the dish in which it is baked.

Bain marie is the French name for a double boiler—a dish kept hot over boiling water.

Braise means to smother or cook closely covered with vegetables and herbs.

Canapes are appetizers composed of some dainty spread or set on a small piece of toast.

Cannelon is a piece of meat stuffed and rolled.

Croustades are forms of fried bread in which minced or stewed meat is served.

Croutons are dice of dried bread browned in fat or in the oven and served usually with cream soups.

Glaze is stock reduced by boiling to a stiff jelly.

Maigre means meager or made without meat, so a soupe maigre is a soup made without meat.

Marinate means to steep in a seasoning, as oil or oil and vinegar.

Petits fours are little cakes.

Piece de resistance is the main dish of the meal.

Potage is a thick soup.

Puree is a pulp pressed through a sieve.

Ragout is a highly seasoned and rich stew or hash.

Ramekins are cheese souffles served in china or paper cases; hence the china dishes in which souffles are cooked.

Rissoles are bits of pastry containing a mince of fish or meat rolled and fried.

Roux is a mixture of butter and flour, cooked, for thickening soups and sauces.

Saute means fried brown in shallow fat.

### Woman's Position In Tibet.

The influence of women in family and society has been declining in Tibet as a result of frequent warfare. As in other parts of the world and at various epochs in human history, men back from victorious battlefields in Tibet were wont to monopolize feminine admiration; hence it came that polygamy has been steadily encroaching upon the old undisputed sway of the Tibetan woman in the family. This is an excerpt from the story told by the Rev. Ekai Kawaguchi, the Buddhist explorer, who has just returned to Japan from his second Tibetan journey.—East and West News.

### A Century of Savings Banks.

This year brings the centenary of the savings bank. Boston, New York and Philadelphia all established their first savings banks in 1816. From that beginning has grown the present great number of savings banks, in which more than 11,000,000 persons in this country have deposits that average nearly $500 each. The banks were sixty-seven years in accumulating their first billion of deposits, fifteen years in accumulating the second billion, eight years the third, five years the fourth and four years the fifth.

### Pretty Ancient Splinters.

Redwood splinters millions of years old have been discovered imbedded in the sandy base of a rock formation near San Francisco. Despite the fact that at some remote geological age the stratum containing the splinters was sunk under the sea, being afterward raised, the wood is neither decayed nor petrified, but has retained its original grain and distinctive markings.

### Sunday After Church.

Mabel—I don't think much of the close of that sermon, father. Father—No? You were probably thinking more of the clothes of the congregation, my dear.—Judge.

### The Trouble.

"Have you explained the germ system to your children? Everything should be on a practical basis these days."

"No," replied the old fashioned citizen. "It seems inconsistent to tell 'em not to believe in fairies and then try to get 'em to believe in microbes."—Pittsburgh Post.

## LABOR GOSSIP.

Regina (Canada) labor men will enter labor candidates at the next municipal elections.

There are 1,174 locals of international labor organizations throughout the Dominion of Canada.

The hours of labor in the metal trades range from forty-four to sixty per week, fifty-four being the predominant hours.

Joliet (Ill.) trade unionists have called on Warden Zimmer of the state penitentiary to cease the manufacture of brooms at that place.

Seattle (Wash.) Central Labor council is opposing an effort of a majority of the civil service commission to establish a forty year age limit for city laborers.

Inside wiremen, lathers, marble setters, fresco painters, sign painters, structural iron workers and the granite and stone trades all have an eight hour day in the larger cities and nearly all have a Saturday half holiday the year round.

## TODAY'S FASHION NOTE

Here is the apron for which the housewife looks when she comes in hurriedly from shopping and has not time to change her frock. It completely covers skirt and waist. Checked gingham or percale may be used to make it, 3 3-4 yards being required.

Pictorial Review Apron No. 6504. Sizes, small, medium and large. Price 10 cents.

Pictorial Review Patterns may be procured at the J. R. Sullivan and M. Katz & Co. Department store, Fulton.

## SMART OUTLINES.

**A Trim Suit For the Young Lady's Afternoon Wear.**

This girlish costume is developed in black velvet, rather lavishly trimmed with gold braid. The short coat has a white corduroy vestee, while the

A DASHING EFFECT.

skirt gives the effect of drapery in the way the braid runs. The black velvet turban is trimmed with a band of fur and topped by the dashing helmet wing of a Roman warrior.

### The Poet Again.

He had long hair and a pensive look. He wrote a poem entitled "Why Do I Live?" He signed it Augustus and sent it to a magazine.

The editor wrote him as follows: "My dear Augustus—The reason why you live is because you sent the poem by mail instead of bringing it personally."—Paris Journal.

FIRST NATIONAL BANK

HAD HE KNOWN THAT BURGLARS WOULD COME

and enter his home, a man who was robbed of $1,000 in jewelry would have taken greater precaution.

Our Fire and Burglar Proof Vault is the right place for your valuables.

SAFE DEPOSIT BOXES FOR RENT $3.00 AND UP PER YEAR

# STEEL CORPORATION HAS RECORD YEAR; RESTORES DIVIDEND

New York—The multi-millionaire directors of the billion-dollar United States Steel Corporation yesterday demonstrated their faith in continued prosperity.

They resumed payment of the full 5 per cent annual dividend on the half-billion common stock.

Their action, eagerly awaited was justified by the submission to them of the greatest quarter's earnings in the fifteen years' history of the corporation, $51,232,788.

The actual figures for the final three months of 1915 exceeded the most optimistic expectations.

As usual, the statement was not complied until early afternoon. After Judge Gary had finished this important task—which he does personally—the figures were immediately laid before the Finance Committee, at 2:30.

All the members were present, J. P. Morgan and H. C. Frick have returned from vacations to attend. The personnel of the Committee follows: Messrs. E. H. Gary, chairman; James A. Farrell, George F. Baker, Henry C. Frick, J. P. Morgan, George M. Perkins and Percival Roberts, Jr.

At 3 o'clock the Finance Committee prooceeded to the board room, where there was a very large attendance of directors, including D. G. Reid, Thomas Morrison, E. C. Converse and Robert Bacon.

Great excitement prevailed in the corridors. Scores of newspaper men had gathered to catch the first intimation of the news which Wall Street had been speculating on with an interest never paralleled.

No dividend announcement has ever been awaited with such intense interest.

The rival "ticker" agencies each had a corps of alert reporters stationed at every vantage point so as to flash the rate the instant Judge Gary should open his mouth.

The stock market, of course, was closed, but commission houses were crowded with customers awaiting the news.

It was not until 3:30 that Judge Gary appeared. The announcement of ernings wasd elayed longer than usual in order to prepare a brief supplementary statement concerning the record-breaking showing made by the quarter's earnings.

## ADULTERATED COLORS IN POSTAGE STAMPS

Washington, D. C.—The Bureau of Printing and Engraving prints a billion of postage stamps every month. Up to eight months ago German dyes were used, but since then the bureau has been unable to obtain them. It has been forced to use, what might be called adulterated colors, either imported or domestic. These cost more and are not so good. Director Ralph of the bureau recently paid $1 a pound for red dye, whereas this color could be purchased a year ago for 24 cents. The new dyes have only about one-fourth the coloring strength of the old. There has therefore been a slight change in the color of stamps. The red two-cent ones are lighter. The eight-cent stamp, which used to be olive green is yellowish green. Slight color variations may be noted in other stamps. The bureau expects to get in a shipment of German dyes within the next few weeks. Both England and Germany have agreed to let this shipment come through on the understanding that it is strictly for Government use. When this is received the postage stamps will brighten up in appearance.

## UTICA WOULD EMPLOY ADDITIONAL TERRITORY

Utica.—The proposition to annex to Utica a considerable quantity of contiguous territory was very favorably considered last evening at the meeting of the Utica Chamber of Commerce membership. There were representatives of New Hartford, Deerfield, Whitesboro, New York Mills and Yorkville present and the discussion of thep roject was very favorable. At the conclusion of the discussion the assemblage went on record as favoring the general idea of annexation and leaving it with the Chamber of Commerce to proceed in the matter as it thought best. It was suggested that it might be a good plan to hold public meetings in New Hartford and Whitesboro, with the idea of getting a more decided expression of sentiment of the residents of the two villages.

One remedy with many uses—Hanford's Balsam of Myrrh. adv.

## GRANBY CENTER

Miss Ethel Vandelinder is ill.

• • •

Anna Murphy and Frederick Smith have completed their elementary subjects in Regents and will attend Fulton High school.

• • •

The Ladies' Aid society was entertained at the home of Mrs. Clarence Upcraft on Friday.

• • •

Mr. and Mrs. C. Davis and Mr. and Mrs. H. Caswell spent Sunday with friends at Bowens Corners.

• • •

Mr. Jacob Potter's house was damaged by fire which started in a defective chimney.

• • •

Mr. Merchant of Syracuse occupied the pulpit of our church Sunday evening in the absence of our pastor, Rev. J. J. Johnson.

• • •

Mr. Arthur Ensworth met with an accident Sunday while driving to church. His horse became frightened at a car, overturning the wagon and throwing Mr. Ensworth out. No one was seriously hurt, but the wagon was badly broken.

# TRAINMEN VOTE FOR HIGHER WAGE

New York—The New York members of the great railroad brotherhoods are virtually unanimous in their demand for an eight-hour working day and "time-and-half-time" for all work in excess of eight hours.

The New York vote will be completed within a fortnight. Local officials of theb rotherhoods scoff at the fears of "ruin" that railroad officials express. They declare that not since 1913 have the roads enjoyed such large revenues.

An official of the New York Central Railroad admitted yesterday that since November the railroads have handled more freight than they could have accommodated at the outbreak of the European war.

Val Fitzpatrick, vice-president of the Brotherhood of Railroad Trainmen, declared yesterday:

"The claims of the railroads that an eight-hour instead of a ten-hour day and a wage increase would mean ruin, is absurd. A more equal distribution of wealth will mean poverty for no one.

"The railroad owners were never more prosperous. In a wage increase movement in 1910 the employes on a certain railroad asked for higher pay. The demand amounted to an annual total of $1,500,000. The president of the company—a broadminded, liberal man—was quite willing to grant the increase. But he was rather doubtful whether the road could stand the added burden.

"The men persisted. They asured him that the gross earnings of the road would increase $5,000,000 annually. The president agreed, then, to the demands of the men. The next annual report of thed irectors showed that the road had increased its gross earnings several million dollars."

## COUNTY POPULATIION DECLARED OFFICIALLY

County Clerk Z. D. Stanton has received from Secretary of State Hugo a certified copy of the census of Oswego county, as of June, 1915. The figures do not vary materially from those already printed. The population of Oswego county was then 75,579, divided as follows: citizens, 71,195 and aliens, 4,374.

The population of Oswego city was 22,909 citizens and 2,517 aliens. The figures by wards follow: First, 4,404; second, 2,204; third, 3,952; fourth, 3,482; fifth, 3,400 sixth, 2,505; seventh, 2,332; eighth, 3,517. The population of Fulton was 11,138, of which 9,759 are citizens and 1,379 aliens.

## COLONEL REFUSES TO RUN, SAYS CHAIRMAN

Chicago.—Charles D. Hilles, chairman of the Republican National candidacies of Colonel Roosevelt and Justice Hughes for the Republican nomination of President. He said:

"All the information I have on the subject is to the effect that Colonel Roosevelt is not a candidate for the Republican nomination. I think we will be able to nominate a man who will be satisfactory to all elements of the party.

"In regard to Justice Hughes, no one knows just what his attitude is today toward the Presidency. But there is no man big enough to refuse the Presidency, in my opinion."

## GOOD ROADS BILL PASSED BY THE HOUSE

Washington—The Shackleford Good Roads Bill, carrying an appropriation of $250,000,000 was passed by the House late today, 281 to 81. Three members voted "present."

Thes tates would share in the appropriation on the basis of their population and the number of their post roads. Them oney would be disbursed through the various State Highway Commissions.

It was freely predicted strong opposition would be encountered in the Senate.

## LAST WEEK TO SETTLE WITH UNCLE SAM

Business men and others who are compelled to pay a special internal revenue tax and who have failed thus far to do so, should sit up and take notice for this is the last week in which they can be paid without the addition of a penalty for delays. January 31 is the last day for payments and after that a penalty may be added for each day the delinquents procrastinate.

Among the various branches of business that are compelled to pay the special tax are; Brokers of all classes, proprietors of theatres and motion picture houses, museums, concert halls, proprietors of bowling alleys and pool and billard rooms, Commission merchants and dealers in and manufacturers of tobacco, cigars and cigarettes.

Mabel Trunnelle and Marc McDermott in "The Destroying Angel" at The Quirk Today.

## TOMORROW WILL BE JEWISH RELIEF DAY

Preparations are being made here and elsewhere by the Jews to observe tomorrow as Jewish Relief Day, all in response to the proclamation issued by President Wilson setting aside January 27 when donations of cash and needful articles may be sent to the heads of local committees and then forwarded to headquarters in New York.

Mr. Harris Amdursky is chairman of the local committee for the relief of Jewish soldiers who are fighting the great war, for their families and and for the sufferers in the war stricken countries.

## VICTIMS OF RAILROAD CRASH RECOVERING

The physicians at the Oswego hospital express confidence in the ability of the Lawton family to recover from the injuries they sustained when a New York Central train crashed into their rig at Scriba Sunday evening.

## MISSOURI MINES TO BE SOLD FEB. 12

Mr. L. W. Emerick, of this city, as trustee of the estate of Mr. John Hunter, bankrupt, has been given authority to sell mining property at Jasper, Mo., owned by Mr. Hunter's estate. The property is said to be worth $20,000. The date of sale is Feb. 12.

## DANIEL P. RICHARDS

The funeral of Mr. Daniel P. Richards occurred this afternoon from the home of his son in Oswego, burial being made in Granby.

Mr. Richards was born in the town of Granby seventy-two years ago and had been a successful farmer in the Lewis Corners district. Some time ago his wife died and he has made his hom ein Oswego ever since. Beside his son, he is survived by a sister, Mrs. Mary Mustard, of Granby.

STILL A KING!

What?

CO-ORDINATION OF INTERESTS!

Once upon a time a venerable old owl was the chairman of the Bird Congress, as a fable runs, and there was a great commotion and much chattering.

At last a long-legged crane got up and offered a resolution, in effect, that the bird which could fly the highest should be made the King. Then all the birds flashed up into the sky, but one by one they tired and dropped down, except the eagle, who flew up higher than the others, and said: "I am King!"

But his reckoning was wrong, as a little wren popped up from the back of the eagle's head, where he had slipped in among the feathers for a free passage into the blue atmosphere, just like a regular little dead-head and he said: "Not a bit of it, Sir Eagle; I am above you and I am still King."

## CHAMBER OF COMMERCE

*"Fulton First, Last and All the Time"*

It is often the case that after a man is dead and gone the world finds out what a useful man he was and how much he must have been appreciated. Too little attention is given to the man who does the real good things in this world every day he lives. Too little appreciation is shown at the right time, which if shown, much more good might have been done for the world. After all the real man who does the real things does not care much for the flattery of the world. They do the things because they enjoy doing them, and with the hope that they might leave something for the world to think about after they are gone.

* * *

We are peering into the future with uncertain eyes. We look for the best. We expect more. We should not think so much ourselves at this particular season, but think of others, Above all things we should educate ourselves to appreciate the value of silence. It is a question whether speech should not have been denied to man when the human race, with all of its imperfections and weaknesses, was set moving over the face of the earth. If we could have had action without words this world might be a better and more peaceful abiding place. It is not possible to say how man could get along without talking, but if there had only been a method by which he could have done so it is pretty certain there would be less discord than now disturbs communities and individuals. In public life it is talk that deters reform and brings ridicule on religion itself. In private life it disintegrates families and creates war on every street corner. The madness of speech is tenfold more terrible than the curse of liquor. We are talking all the time. We talk in the pulpit, in the street cars, in our doorways and in our homes. We should realize that true silence is the rest of the mind. It means to our mental faculties what sleep means to the body. It is a great virtue. It covers folly. It keeps secrets and avoids disputes. It also prevents sin.

"The silence often of pure innocence persuades where speaking fails." To the man who has not much of the world's knowledge silence is sincerely golden, for silence in such an instance is wisdom to the fool. If we could only appreciate the fact that a still tongue means the eloquence of discretion we would indeed be wise. Speech is often barren and silence does not necessarily brood over a full nest. but the unspoken word never does harm. The spoken word too frequently results in tragedy. Sometimes we know things that it is wise to forget. Sometimes we think things that it is wise to keep to ourselves. Learn to hold your tongue. Five words cost Zacharias 40 weeks of silence. It is the element in which great things fashion themselves. A judicious silence should be cultivated by us all.

* * *

Fulton people should by all means take this silence lesson at heart.

* * *

The Chamber of Commerce is always working for the good of all the people, even if certain individuals do not know any better.

* * *

We hope that a few good spirited citizens will decide to go with us to Washington to represent the City of Fulton at the Fourth Annual Meeting of the Chamber of Commerce of the United States of America, February 8, 9 and 10. Men of expert knowledge in different lines of work will deliver addresses and discussions will be held for the good of the entire country. Wake up, don't forget, that our country is, tomorrow after the war is over and today, facing the most difficult problems it has ever faced and it needs the intelligent discussion of men of intelligence to settle such matters satisfactorily for the good of all. There should be found in our good city a number of men who are deeply interested in the welfare of our city and country and who should be willing to spend the time and money to help us represent FULTON, the GREAT. REMEMBER THAT ALL OTHER CITIES ARE GOING TO BE THERE. YOU WOULD NOT LIKE TO SEE FULTON TAKE A BACK SEAT, WOULD YOU?

* * *

We may be able to do some considerable good for Fulton while we are there in Washington meeting all the big men in the country.

---

That the optimistic attitude of the men of business and the people of this city generally is not without foundation, is borne out by the announcement made this morning by N. L. Whitaker, President of the Chamber of Commerce, in effect that soon the Battle Island Sulphite mill will be in the hands of a corporation whose purpose is to make over that plant and provide for Fulton one of its greatest industries.

Mr. Whitaker is apparently assured of the ultimate result of the negotiations in hand, predicting that when the mill is in operation additional benefits will accrue to this city and Oswego from the fact that barge canal and lake going boats will carry pulp wood from Canadian forests directly up to the docks of local mills.

Mr. Whitaker authorized this morning the publication of the following statement:

"I have completed the purchase of the Battle Island plant and in addition have secured an option in 1,000 horsepower water power and a parcel of land adjacent to the Granby Pulp & Paper company's plant from that company upon which it is the plan to erect a hydro-electric power development, the power produced to be transmitted to the old Battle Island Sulphite Mill to replace the water power of which the property has been dispossessed by the State through the removal of the Battle Island dam. If this plan can be successfully evolved the property in its entirety, including the new power supply to be purchased, will be turned over to a newly formed corporation which will in future operate the aBttle Island plant on a far more extensive scale than heretofore. This corporation will not only operate the plant but will operate a line of lake-going boats for the transportation of its pulpwood and will establish to the community an industry of vast import. The re-establishment of this greatly increased industry is still dependent, however, upon certain details to be worked out in which I hope to have the support of the community. These details are of a minor nature and I anticipate no difficulties there from. The Oswego Chamber of Commerce has loaned its co-operation to the Fulton Chamber of Commerce in the efforts put forth by the latter organization, realizing the immense value to their port of the greatly increased shipping resultant from these proposed operations.

"There is absolutely no connection between the activities as to the resale of the Battle Island property and the purchase by F. A. Emerick, of Oswego, of about 200 acres of land on the west side of the Oswego River from the Reynolds and Hill properties so far as an industrial development is concerned. Furthermore, I do not believe that Mr. Emerick contemplates the erection of a paper mill on that property as has been intimated in newspaper reports.

"This plant will be put in operation just as soon as the preliminary details as pertaining to power and equipment can be worked out. If insurmountable difficulties in these respects are met the plant will not be started in its present location."

## ORGANIZED LABOR VOTES TO SUPPORT THE WAR

Bristol—British organized labor on the first day of a conference which has attracted worldwide attention, outvoted the extreme socialist anti-war section and adopted two resolutions expressing the patriotic resolve to carry the war through.

James Ramsey Macdonald, socialist and labor member of Parliament for Leicester, and Philip Snowden, socialist member for Blackburn, by the power of their eloquence tried to persuade the delegates to vote against the motions, but when requested to define their position clearly made evasions and were unable to convince the conference.

One representative of the socialist section when asked to state the terms on which the socialists would have participated in a voluntary recruiting campaign declared, "On no terms." He immediately lost his hold on the delegates, who were overwhelmingly in the opposing camp.

The conference was a most representative one. A large section of labor and commerce attended, whoile seated on the platform were two French socialist Deputies and Robert Applegarth, one of the three founders of trades unionism in Great Britain.

Many of the addresses were patriotic in tone, and Mr. Macdonald was criticised in unmeasured terms by his fellow Scotsmen for speaking roundabout the resolutions without making his own party's position clear.

## ALERTNESS AT PUMPING STATION MADE FUTILE BY BAD SERVICE PIPES

Lack of water pressure is a common complaint when this city is visited by fire, so common in fact that many citizens have come to look upon the trouble as one of the bug-bears of town life. Occosionally there occurs exceptions to the near-rule, and one of the exceptions was noted in the story of thefi re which visited the Dix Millinery store early Monday morning. In that story Superintendent of Public Works Rumsey was quoted as saying that sufficient water pressure probably prevented a heavy loss; that the excessive pressure was the result of a full standpipe, adding that the operation of the water works pump was suspended at the time of the fire. That this statement is in error is evidenced by charts available at the pumping station. These charts record the workings of the big meter and they show that when the fire alarm was sounded, or to be exact, at 2:35 a. m., the pump was set in motion and a pressure of nearly ninety pounds recorded. Higher pressure could of course be obtained, and at times is obtained, for instance at the time of the West Side garage fire, when 110 pounds pressure was at the service of the fire department, and yet effective work was prevented, because of certain pipe lines are either too small or too weak to permit of carrying the maximum capacity of the water works pump.

As a matter of fact, persons in a position to know, authorize the information that the troubles incidental to low water pressure at the time of fires are the result of deficient and defective mains, and never to the inability of the pumping station to meet the demands of the hour.

## GREAT BRITAIN AFRAID TO INSTITUTE BLOCKADE OF GERMANY'S PORTS

London—"Hands off" was the notice served on the United States and other neutral Powers by Sir Edward Grey in a speech in the House of Commons yesterday afternoon, when amid tumultuous cheering and such an enthusiastic outbreak as never before was seen in Parliament, he insisted that Great Britain is entitled to, and would enforce the principles of blockade according to the methods applied by President incoln during the war between the North and the South The cheers increased in volumne when he solemnly declared that if the neutral nations interferred with the Allies' pressure on Germany they would be guilty of a violation of neutrality.

The enthusiasm reached a climax when, plainly intimating that fresh demands in the new American note would not be conceded because a compliance with these demands would make it impossible to prevent even contraband goods being forwarded in wholesale through neutral lands to Germany, he insisted that the fleets of Baitain and her Allies use every effort to destroy German trade.

Mr. Walter Hines Page, American Ambassador, listened intently to every word uttered by Britain's great Foreign Secretary, and the Ministers of Holland, Denmark, Norway and Sweden, sitting nearby, craned their necks over the diplomatic gallery as they drank in each sentence of the momentous speech.

Lord Fisher, Lord Beresford, Field Marshal Lord Grenfell and scores of England's ennobled commercial magnates were in the peers' gallery and it was noticed when Sir Edward dramatically declared "we will never give up our right to interfere with enemy trade," these men led the demonstration which followed the utterance of these words pregnant with meaning for neutrals.

It is true, Sir Edward softened the effect of his epoch-making

## REPUBLICANS TO AID DENFENSE—WADSWORTH

Washington—Senator James W. Wadsworth, of New York, in an interview here today, declared the defense programme of the President would have the support of Republicans in both houses of Congress.

Senator Wadsworth urges that instead of the five-year navy building programme proposed by Secretary Daniels, it should be carried out at once, as rapidly as private and Government yards and increased facilities would make possible. He continued:

"I am in favor of the proposal for a regular army of not less than 210,000 men with a maximum of not more than two years with the colors and four years in the reserve subject to call."

## GOOD ROADS AND GOOD MARKETS

Something new in marketing originated in Boston, and has been practiced there. It is something to be considered by the people of this city and the people in the country around about us. It is in connection with the improvement of roads leading from town to country. Boston and nearby suburbs has a population of about one million. It became the practice last year for Boston people to run out into the country, in their automobiles. and buy butter, eggs fruit and vegetables directly from the producers.

In that way the city people had assurance that what they bought was fresh, and the middleman was cut out, which may have reduced the expense of articles purchased, probably to a sufficient extent to pay the expense of running the auto.

With good roads, the family with an auto may run out to the farms and get back with purchases with but little more loss of time than it takes to go to the city market and return. This is a feature result of securing good roads, and must be reckoned with by any town not having a public market. Good roads shorten distances, and the city people want them and the produce growers have a right to them—and; they are getting them. It is therefore up to the people of the town to provide a place in the town where the products of the farm may be offered for sale to the early birds, no matter whether the early arrivals are consumers or middlemen, rather than to leave it to the producers to offer their goods at the roadside to be seen and taken by purchasers who might come along for what they want for family use.

This is a progressive age, and it will not be the happening of the unexpected if in the course of not so very many years, the roadsides leading into Fulton will be the market places for a good many of the men and women of this community who are making of every farm a factory. This is, of course, assuming that the people who make up the urban portion of this community do not awaken to the necessity of establishing a public market within the city boundaries.

## THE TARIFF PROBLEM

The tariff problem continues to be the biggest and most important problem related to politics. It ought to be divorced from politics, and it will be. The best statesmen favor the right kind of a non-partisan business commission, and such a commission is coming,. It is as much needed as business management in a city is needed.

Some one quotes the old story attributed to Lincoln, alleging that he said: "When an American pays $20 for steel rails to a British manufacturer, America has the rails and England the $20, but when he buys of an American, America has both the money and the rails."

We used to hear it quoted "a suit of clothes," which seems more apropos and fitting, especially since we believe American steel rails did not appear until 1865.

But we have ample evidence that Mr. Lincoln was in favor of a protective tariff. He was a Clay man in 1832, and declared himself in favor of a national bank, internal improvements and a protective tariff. He was elected president on a protective tariff platform; and that tariff was not a war measure. The war amendments were added later.

The need for a tariff at the time was patent to all sincere students of economics who were at the same time patriotic citizens of the country. The need of a tariff at an earlier date was obvious. Our internal affairs, famine and wars in Europe, the output of gold in California and many other things contributed to stimulate in this country a mushroom prosperity. Later Europe threw down her arms and again resorted diligently to a development of industries and commerce. Soon a flood of imports flowed to our shores, and our gold went out on the European tides. Then came depression, a depression which has become historically conspicuous; and we had to have a protective tariff, which Buchannan signed a few days before his retirement.

Once more we need nicely adjusted and profoundly studied protection, for this great war is not going to last forever. This business of the tariff should be placed in the hands of business men, and soon. The problem will never be properly settled while it is a matter of political difference. The business success of the country is the big and important thing for consideration. The country wants the tariff administration made stable, wisely, patriotically and sensibly guided. The commission plan seems feasible and sensible. It will relieve us of fluctuations, injustices, flagrant evils, and give to us the assurance that theb usiness of the nation will not be disturbed every time there is a change in the political administration of the country.—Dayton (O.) Journal.

## THE RAILROADS SHOULD GRANT DEMANDS

The railroad managers say they have decided to resist the demand of their employes and sustain a strike.

A strike now would paralyze the business of the whole nation just when business is beginning to get firmly upon its feet.

And there need be no strike if the railroad managers will do the right thing.

The men are entirely right.

They are demanding only an eight-hour day, and they ought to have an eight-hour day.

They have now a ten-hour day, which is too long a day.

The enght-hour day is a legitimate demand and should be conceded by the railroads.

The railroads have received all sorts of concessions and aid from the government.

They have within these few months, been permitted to increase freight rates.

They are given the mails to carry at rates which virtually amount to subsidies.

They are now in prosperous times and making a great deal of money.

They make this money out of the people of the country and through Government concessions which come from the people.

It is only right that they should divide a part of these benefits with the people—with their employes, who are so large a part of the nation's workers.

The least the railroads can do in fairness is to give their employes an eight-hour day.

It is a reasonable demand and should be cheerfully and immediately conceded.—N. Y. American.

# Opinions

## BEWARE OF THE "RED HERRING"

The opinion of every New York newspaper that has a reputation for standing generally in favor of the public interest appears to be that the public service corporation have drawn the herring across the trail to kill off the Thompson investigating commission. The opinion of a few New York papers that are generally to be found with special interests appears to be that Senator Thompson and his probers should be called off because they spent state money extravagantly in some cases while conducting their recent investigations.

The revelations made thus far show that some of the members of Mr. Thompson's committee have been guilty of living pretty high at the state expense, but that, in comparison with the indulgences of all other similar committees and commissions of the past 10 years, they have really exercised restraint in a few directions. Thus, the Thompson committee did not burden the state with the cost of highly paid counsel, the committee members for the most part examining the witnesses themselves. The expenses for hotel bills and for playing the good fellow for the subordinates employed by the committee were high, but no higher than any private commission would have to pay for similar service of the first class. That there has been petty grafting seems evident, but that it has been based upon anything other than Legislative custom and courtesy is not true.

The important thing that citizens of the state should keep in mind is that the relatively trivial shortcomings of the Legislative committee in the matter of expenditures carries its own remedy in the publication of the bills of expenditures, and should not influence in any way the continuance of the work of investigation of the Public Service Commissions.

Enough has been revealed in New York to warrant the district attorney of that city in proceeding keenly to the chase. Actual bribery has been charged and evidence of unlawful conduct on the part of past commissioners has been abundant. Instead of following them he creates a great stir about petty graft among the investigating committee. If the Thompson committee is deemed unqualified to continue the work which has been honestly done in all respects but that of spending part of the expense money, the Legislature should name a new committee or it should continue the same committee with added restrictions. The political motives that dictate many of the moves and the comfort that is coming to evil doers by the plan to stop the investigation should be exposed as nakedly as the tendency of the investigators to spend state money. —Auburn Citizen.

## THE PROPOSAL FOR FEDERAL CENSORSHIP OF THE MOVIES

Those busy guardians of public morals whose idea of first aid is legislative action are clamoring for federal censorship of the "movies." Their demands are embodied in the Hughes-Smith Bill before the Committee of Education of the House.

Under present conditions the film producers are restrained and their patrons' morals guarded by public sentiment, a censorship established by three states and a National Board of Censorship. Against one or more of the state boards, in Kansas, Ohio and Pennsylvania, there have been made accusations of political influence, of self-interest. or of unfairness. Against the Board of National Censorship there have been no sound charges of unfairness, and so far as is known no charges of political influence or self-interest.

The National Board of Censorship is made up of committees representing eighteen charitable. religious or educational organizations of this city. and all the members, with the exception of a small office force, give their services free. This board has inspected practically all the pictures shown in this country. In four months of the past year. the last for which a statement is at hand, it inspected 3,115 reels. It condemned forty reels entirely and the presentation of the subjects of twenty-two others, thus eliminating 19,640 feet of film, entailing a cost to the manufacturers by keeping the pictures off the market of $98,985.60.

In considering the reels the board judged them from their educational value, art and skill of production, entertainment value and moral effect. Regarding the moral effect it endeavored to determine "what kind of impetus to action, thought and feeling will be given to the average spectator as a net result of witnessing the film." And it would seem that with this broad minded standard before them the members of this disinterested board would be fully as capable to judge fairly and honestly as the holders of paid political jobs.

Public sentiment has been hard at work as regards "movies." Anyone who has compared the present pictures with those shown a few years ago will recognize this fact. It has been shown, too, in the refusal of almost every city in the country to permit pictures of recent prize fights to be exhibited, even in cases to which the federal inhibition does not apply.

There appears no really good reason for the federal government furnishing a lot of good fat jobs at the expense of the "movies."—N. Y. Sun.

## THE PRICE OF DISHONOR

"That eternal vigilance is the price of liberty is such a truism that it has lost its meaning, but it is an eternal truth, and the principles of American liberty today stand in need of a renewed devotion on the part of the American people. We have forgotten that in our vast material prosperity. We have grown so rich, we have lived in ease and comfort and peace so long, that we have forgotten to what we owe those agreeable incidents of life. We must be prepared to defend our individual liberty in two ways. We must be prepared to do it first by force of arms against all external aggression. God knows I love peace and despise all foolish and wicked wars; but I do not wish for my country the peace of slavery or dishonor or injustice or poltroonery. I want to see in my country the spirit that beat in the breasts of the men at Concord bridge, who were just and God fearing men but who were ready to fight for their liberty. And if the hundred million people of America have that spirit and it is made manifest they won't have to fight."

These are the words of Elihu Root, addressed to the State Bar Association. They will strike an answering chord in the breasts of thousands of citizens. The great tendency to indolence and luxury—the quest for "easy money," unquestionably has weakened those manly qualities which furnish the heart of national strength. Decay at the heart means ultimate dissolution, how long postponed will depend to some extent on circumstances. A showy exterior may for a time conceal the weakness of a nation; but concealment is ephemeral. In the long run the true inwardness of sodden materialism must be revealed.

Are Mr. Root's words prophetic, or are they to be heeded as one of the danger signals along the way? Prosperity is not everything. Profits may not permanently displace true courage and sobriety—those qualities of the heart and mind inevitably essential to the perpetuity of the republic. —Auburn Adv.-Journal.

**Alaskan Ocean Rocks.**

The almost complete absence of life in the Alaskan oceans during the period of deposition of many thousands of feet of sediments has left the rocks practically devoid of fossils, which are so valuable in determining rock ages.

# Our Washington Letter

SPECIAL CORRESPONDENCE

Washington—The report of the General Board of the Navy was made public in two chapters. The first to appear was a report written to order. The other, prepared much earlier, contained the real opinion of Admiral Dewey and his associates—and Josephus Daniels tried to suppress it.

The difference between the two reports is that the earliest—in date—outlined a programme of naval contruction which the patriotic naval experts in the Board deemed necessary for the proper protection of the country. The other report contains a building programme limited by the amount of money which Josephus Daniels is willing to spend. Admiral Dewey wants to protect the United States. Josephus Daniels wants to protect the Democratic party. That is the essential difference between the two programmes; and Mr. Daniels thought to accomplish his purpose by the simple expedient of smothering the first and geniune Dewey programme.

He failed in this purpose, mainly because knowing people here in Washington insisted that all of the General Board's recommendations—spontaneous and forced—should be made public. Josephus Daniels was at first inclined to resort to bluster, to assume a sort of public-be-dammed attitude, the attitude, in fact, which is most often taken by this administration—and it was only when he perceived that a Congressional inquiry would bring out the facts that he reluctantly produced the document and enabled the public to see the difference between a real and a spurious programme for naval preparedness.

Admiral Dewey's plan is patriotic. Josephus Daniel's plan is political. Admiral Dewey's plan would produce a navy within a reasonable time. Josephus Daniel's plan would produce a navy in the sweet by-and-by.

The episode is regarded here as helpful. It shows that the administration can no longer fool many of the people for much of the time. Maybe it is only theb eginning of a series of revelations. Maybe there are other documents withheld by other Cabinet officers which will now be forced into publicity and which will further show the tendencies and purposes of an administration which has only a little more than a year to live, which has already done so much harm, and which would like to do even more.

* * *

A report on industrial conditions in Vermont credits war orders with the present prosperity in that State. The Windsor Machine Co. paid dividends aggregating 125 per cent in July and October. The Robin Hood Powder Co. secured large orders, and the machine companies in Springfield and Rutland are working on shrapnel. Another machine company that had an offer of a $200,000 order for shrapnel last summer declined it because women are the principal owners of the stock and opposed the manufacture of war munitions. But as business grew dull in regular lines and there appeared a necessity for reducing the force another contract that was offered was quickly accepted and the works are now running overtime. Numerous small shops throughout the State are working on munition contracts which have been parceled out to them by the regular contractors and the newspapers seldom hear of it, but the machine shops of the State, big and little are, practically all of them, working on contracts for some sort of supplies for the allies. The woolen mills on the Winooski river and in the valley of the Ottaquechee are "full up" with orders and advertising for additional help. The canning factories are going full tilt and sending their products abroad as fast as made. The hydro-electric concerns are pushed to the limit to supply the extra power demanded. Secretary Redfield please take notice that Vermont is being enriched by the European war, not by Democratic policies.

PRINCE GEORGE.

# EYES OF SAXONY ON CROWN PRINCE

## Rumor Says King Frederick May Abdicate.

## FEAR MOTHER'S INFLUENCE.

**Comparative Poverty Has Kept Divorced Wife of Ruler Quiet In Recent Years, but People Are Worried That She Will Become Active Again if Son Takes Throne.**

Paris.—A rumor that King Frederick of Saxony was considering the abdication of his throne in favor of his son, Prince George, probably owes its inspiration to the festivities arranged in Dresden for the young man's twenty-third birthday anniversary on Jan. 15, coupled with the fact that for the past three years, since he became twenty, he has been gradually initiated into state affairs, more and more taking his father's place in the reception of minor committees from the council of ministers and parliament. This has been in accordance with the policy of state to take every precautionary measure possible to protect the heir to the Saxon throne and the Saxon people from the influence of Prince George's mother, the notorious ex-Crown Princess Louise, in the event of the sudden death of King Frederick and the accession of Prince George.

The Saxon government fears ex-Crown Princess Louise's baneful influence upon her son almost as much as the Prussians of a century ago feared Napoleon. She is their nightmare, and as long as Prince George remains young and without experience in the grave responsibilities of state the government is in dread of possible complications. Everything is being done to give him a full appreciation of his duty as king.

Prince George has not seen his mother for several years, since her so called "memoirs" were published. She elopped from the royal palace some years ago with his tutor, Giron, and was divorced by King Frederick, being compelled to renounce her title as crown princess, her husband conferrring upon her the title of Countess of Montignoso. The king took charge of the girl baby born to Louise after her elopement, the child being christened as the king's and given the name of Princess Anne Monique Pie, being included in the royal family and kept away from the mother entirely. Louise's later escapade in marrying an Italian pianist, Toselli, the publicity of a divorce from him and a fight for the child born of this union, with the publication of her memoirs ridiculing her husband's family, had the effect of completely alienating King Frederick and his government from her. Comparative poverty has kept her quiet in recent years.

Prince George's marriage has already received a good deal of attention by his father and the Dresden court, since it is obviously wise to see him settled down early with a prudent wife, whose influence would counteract any which his mother would attempt to exert. A few months before the war it was said that informal negotiations had been opened with the czar for an alliance between the heir to the Saxon throne and the Grand Duchess Tatiana, the czar's second daughter, who will be nineteen next May, a beautiful girl, vivacious and intelligent. This match is, of course, quite impossible now, and the prospective bride generally spoken of at this time is Princess Stephanie of Hohenzollern Sigmaringen, the daughter of Prince Karl of Hohenzollern, who is two years younger than Prince George.

## DRANK WINE FOR 117 YEARS.

**Italian Lady Who Never Tasted Water Outlived Twelve Children Who Did.**

Rome.—Mrs. Paolina Pelligrini, who never tasted water, but always drank wine, died at San Michele recently, aged 117 years.

Her twelve children, who, according to the old lady, "were addicted to the pernicious habit of drinking water," have been dead many years.

## THOUSANDS AWAITING GIRL.

**Child Was Lost When Her Grandparents Willed Money to Her.**

Spokane, Wash.—Somewhere in the inland empire is a little girl between eleven and twelve years of age for whom thousands of dollars are waiting. A widespread search is now being made by Mrs. Lena Johnson of Elmia, Ida., a distant relative, who has the fortune in trust.

Disowned by her own parents, the mother took the girl when a baby to Mrs. Johnson, who was a relative, and asked her to find a home for the child. Mrs. Johnson brought the baby to Spokane in 1904. A few weeks later a home was found by Dr. Mary Latham, who was then head of the Spokane Children's Home society. The home was that of a farmer living somewhere near Spokane. A year later all of the records of the society were destroyed by fire.

In their old age the parents of the mother of the little girl repented of their attitude against their daughter, and when they died some time ago their will showed that all of their money had been left to the granddaughter.

### Expressive.

Little Elsie entered the parlor one morning, and her quick eye discovered that the slip coverings had been removed from the furniture.

"Look, mamma!" she exclaimed. "Some one has taken the nighties off the chairs."—New York Globe.

## FORTY-NINTH STATE URGED.

**Upper Peninsula of Michigan Seeks Entrance as Superior.**

Calumet, Mich.—Plans for a campaign to carve the forty-ninth state of the Union out of the "upper peninsula" of Michigan, under the name "Superior," were discussed here by Roger M. Andrews, proprietor of the Menominee Herald-Leader, at the annual banquet of the Calumet Business Men's association.

He asserted that the assessed valuation of the district exceeds that of any one of seventeen states which he named and laid stress upon the fact that it is isolated from the rest of the state.

## LEG BONE PATCHES SPINE.

**Altoona Boy Is Now Jubilant After Unusual Operation.**

Altoona, Pa.—Kenneth Geist, aged four, is perhaps the happiest child in the United States, for recently he received his discharge from the hospital here.

He was admitted to the hospital on Christmas, 1913, suffering from tuberculosis of the spine. He could neither talk nor walk, and the case was thought hopeless.

The surgeons took a piece of bone from his right leg and inserted it in the place where they removed the diseased vertebra. The operation was successful, and Kenneth can run, talk and play like other boys.

## LABOR DISTRIBUTION.

**Secretary of Labor Wilson Plans an Extension of the Present System.**

Only within the last year has the government seriously undertaken the work of labor distribution, says the New York World. The first real test came when the grain growers of the wheat belt, through the labor commissioners of western states, issued appeals for harvest help. Never before was this annual problem so effectively met. As soon as telegrams were received the department of labor caused bulletins to be displayed in postoffices and published in newspapers and stationed representatives at points where they could direct applicants for employment to sections in need of harvest hands.

In his annual report Secretary of Labor Wilson proposes to develop this service into a nation wide co-operative federal-state-city system of public employment exchanges. The first labor exchange may be the local postmaster who brings employer and worker together. Otherwise the applications are forwarded to the nearest station of the department of labor, where they are matched up or sent on promptly to the division of information at Washington, where comparisons can be made between the needs of the country at large.

Out of such a system of federal labor exchange branches should come a helpful control of the supply of labor, which otherwise would be left to drift largely at random.

### Love Tokens In Spain.

Spanish lovers present their fiancees with fans on which they have written the most impassioned poetry, embroidered garters with love mottoes woven in silk and innumerable boxes of sweets. Engagement rings are not given, the bride elect receiving instead a gold medal, which she wears suspended from a chain around her neck.

## WIRELESS LINKS TWO OCEANS

**Battleship In the Atlantic Talks to Another In Pacific.**

Washington.—Secretary of the Navy Daniels announced that for the first time a wireless message had been successfully transmitted from a naval vessel in the Atlantic to one in the Pacific.

The experiment was successfully tried when the battleship Wyoming, off Cape Henry, Va., exchanged messages with Admiral Cameron McR. Winslow, commander in chief of the Pacific fleet, on board the cruiser San Diego in Guaymas harbor, west coast of Mexico. The messages were easily deciphered. By air line Guaymas is approximately 2,000 miles from Cape Henry.

# FEW DIE IN KANSAS BECAUSE IT'S "DRY"

## Lowest Death Rate of Any State Explained by Statistician.

Topeka, Kan.—"Kansas, with a rate of 9.8 in each 1,000 population, has the lowest death rate of any state in the Union, because the people do not drink liquor, because they have money enough to live right and because they have the intelligence to read of the conditions that make for short lives and know how to dodge them."

That is the answer of W. J. V. Deacon, registrar of the Kansas vital statistics bureau, to Samuel L. Rogers, director of the United States bureau of the census. The government official wrote to Mr. Deacon to get an explanation of why the Kansas death rate is so low. In reply Mr. Deacon wrote:

"Kansas is almost wholly an agricultural state; there are only twelve cities in the state of more than 100,000 population, and there is a gratifying absence of slum districts in the cities. Aside from the southeast corner of the state there is no mining.

"The density of the population in the state is only 20.7 persons to the square mile, and 70.8 per cent of the population reside outside of towns of 2,500 population or more. The climate, while showing extremes of temperature, is usually mild enough to permit much outdoor work and open windows.

"But it is to the people themselves that we must look for those minor and subtle qualities that make for better and longer living. Kansas is rich, her per capita wealth is great and the people are enabled to live well, to clothe themselves properly, to have comfortable homes and to load their tables with nourishing foods.

"Kansas is a prohibition state, and in Kansas prohibition really prohibits. I do not mean by this that there is no alcohol consumed in the state, but the absence of the saloon means much to our growing young men, who in the absence of the barroom find more healthful pastimes than loafing in an alcohol laden atmosphere."

## TWELVE MEALS EACH DAY.

**Surgeons Made a Stomach For Arnold Smaller Than a Tennis Ball.**

Baltimore.—Surgeons connected with the University hospital are much interested in an operation performed several days ago when a large portion of the stomach of Harold B. Arnold was removed and a new digestive organ formed from the unaffected tissues, slightly smaller than the ordinary tennis ball, was put in its place.

His condition is now greatly improved, and he receives predigested food through a glass tube.

In the event of the complete recovery of Arnold he will have to receive nourishment at least a dozen times a day because of the minuteness of his stomach. It is so small now that it will only contain the amount of liquid held by an ordinary teacup.

### Men Knit Shawls In Jail.

Evansville, Ind.—Hand knitted woolen shawls, the "kind that grandmother wore," are being made by men prisoners in the county jail here. Two of the shawls have been completed and are valued at $10 each. Four of the prisoners are working on the shawls, and they have become experts. Exactly 6,405 knots are made in each shawl.

### SLANDER.

The many persons who are always quick to spread evil reports about other persons should ponder these words of Henry van Dyke: "Never believe anything bad about anybody unless you positively know it is true and never tell even that unless you feel that it is absolutely necessary."

# STELLAR LIGHTS TO SHINE

The Brotherhood of the State st. M. E. church will hold a spaghetti supper and Royal Entertainment tomorrow night at 8 o'clock in the church parlors.

A cordial invitation is extended to the ladies and their friends as well. In the entertainment, several new stars will make their debut, it is announced. A number of the people participating in the musical and speaking program will be attired in costumes, the nature of which being kept a secret.

The program will be as follows:

Orchestra Selection
Solo .............. Mildred Kellogg
Song ......... Athletic Club quartet
Address ............ Irving Galusha
Instrumental Solo .. Mrs. C. Wilson
Recitation—Artemus Ward's London Address ........ Manley Brackett
Solo .............................. Miss Beebe
Recitation—Tomorrow ..Mr.Stewart
Recitation .............. Miss Beebe
Finale .................. Orchestra

### WEATHER FORECAST

**Rain tonight. Friday rain or snow and colder; strong south and southwest winds.**

### FULTON HIHG SCHOOL RHETORICALS FRIDAY

Public rhetoricals by members of the senior class will be held in the auditorium of the high school building tomorrow afternoon, commencing at 1:30. Music by F. H. S. Orchestra. Program for the afternoon follows:

Booker T. Washington .... Original
Esther Aylesworth
Against Capital Punishment ...... .................... Robespierre
Wallace Russell
The German People ....... Original
Frances Allen
The Miracle ............. Galbraith
Lillian Waldhorn
Little Brothers ........... Original
Elizabeth Royce
Old Soapy .................. Anon.
Helen Balch
Indian Stone Implements...Original
Lenora Eames
The Rivals ................... Smith
Merle Bartlett

### PRIVATE ENTERPRISE CLEANED PAVEMENT

It is with feelings of repugnance that the persons who would have the city's paved streets look clean, looks with envious eyes today upon West 1st st., in the neighborhood of the American Woolen company's plant. The street in that vicinity is clean, very clean, but the city did hot take the trouble to accomplish the act and therefore did not bear the expense of making the bricks bright and clean. It was all done by the employes of the big plant. They turned on the hose and the water pressure did the rest.

East 1st st. is not within reach of the forces that worked wonders on the West Side, therefore its sickening appearance.

### WHIRLWIND SPEAKER TO ADDRESS CITIZENS CLUB

A meeting for the members of the Citizens Club is announced for Tuesday evening, February 1st. at 8 o'clock, in the club rooms at which time the secretary of the Chamber of Commerce, Mr. D. S. Hollenga, will be the principal speaker. He will present a subject of much importance to all who may be at liberty to hear him.

Leave orders for Miss Cryler's Baking with Mrs. J. K. Steele. Phone 378. adv

# FORESTRY MAN COMING HERE

## To Address High School Students and Grange Members Upon Necessity of Utilizing Woodlots.

Through an arrangement between several Granges and high schools in Oswego county and the New York State College of Forestry, a representative of the latter institution will visit this county during the week beginning January 31.

Professor W. A. McDonald, the forester who is assigned to this trip, will visit Central Square high school January 31 and will probably talk to the local Grange in the evening. On February 1 he expects to speak before the people of Altmar under the auspices of the local Union school. On February 2 he will spend the day at Sandy Creek high school, giving an illustrated public lecture in the evening. On the 3rd he will speak before the Grange and their friends at Hannibal and will end the series of talks on Friday the 4th at Fulton, N. Y., probably talking during the day time before the high school and speaking to the Grange in the evening. He will discuss woodlot conditions in the county and the possibilities of using idle land for forestry purposes and will have several sets of colored lantern slides for the purpose of illustrating his lecture. "Oswego county," says Professor McDonald, "has done some very important work along forest planting lines; the Blount Lumber company at Lacona, the Great Bear Springs company at Phoenix and the New York Central at Richland having the most notable examples. There are several other similar projects, prominent among which are the planatation of Mr. M.N. Wadsworth, six miles west of Oswego, and the work of Mr. Louis Will on his farm and game preserve near Constantia."

There are a good many hundred acres of poor, sandy land in the county which will never produce any other profitable crop except forest. Another problem which is important to the people of the county is the proper handling of the farm woods and profitable marketing of dead and down material which is invariably found in farm woodlots. There is considerable revenue producing power in the farm woods which is seldom taken into account by the owner. If attention to marketing, comparable to that given to other products of the farm, is given to the products of the farm, more wood will be grown and a good dal of revenue will result.

The foresters from Syracuse are in the midst of a busy winter of extension work in forestry. This includes, besides lectures and demonstrations, the preparation of exhibits along various lines of forestry and shade tree activity, the outlining of reading and study courses for Clubs throughout the state of New York and answering the numerous inquiries concerning forestry which are coming in continually from New York State people.

### SUIT INVOLVED A STORED CUTTER

A verdict for the defendant in the case of Fred Ingersoll vs. Clayton Bishop was handed down today by Judge Wilson who presided over the action which the plaintiff brought to recover thep rice of a topcutter which had been stored in the barn of the defendant and subsequently loaned out.

A number of witnesses testified for both sides. Evidence was produced to show that the plaintiff had stored the cutter in Mr. Bishop's barn; that the cutter was placed there without the knowledge of Mr. Bishop; had remained in the place for a period of three years, and then had been loaned out by Mr. Bishop who claimed to have had no knowledge of the ownership of the cutter. The cutter is now in Mr. Bishop's barn.

Attorney Claude Guile represented the defendant, while Attorney Pendergast brought the action for the plaintiff.

### REVIVAL CAMPAIGN COMMITTEE MEETING

The executive committee of the Peacock evangelistic campaign met in the Grand Central block this afternoon at 5 o'clock.

The headquarters established in the Grand Central block is by virtue of the kindness of theo wners of the building, Messrs. N. L. Whitaker and W. A. Butts. The quarters will be used for all purposes incidental to coming revival meetings.

Call and see the new $615.00 Overland. Van Wagenen, Inc. adv342

# EXPERTS HANDLE REGENTS' PAPERS

## Staff of Skilled Men Mark Students' Work---Specialists in Charge of the Various Subjects.

Throughout the state there exists only a vague conception as to who rates the regents examination answer papers of the students of all of the High schools. Some have the opinion that the rating for the regents is done by students just fresh from the High school, but this idea is dispelled by Harlon H. Horner, chief of the division of examination, in a statement answering a letter written by a High school girl, who believed that such was the practice.

Mr. Horner's statement follows:

"Nearly all of the permanent and temporary examiners in this department are High school graduates. Your correspondent stated only part of the truth, however. The examiners in nearly every case are also college or normal school graduates. On the permanent staff of this division there are nine men, seven of whom are college graduates, and all of whom, have had professional training and wide teaching experience, who serve as specialists in a limited field and who supervise the rating of the regents examination papers at Albany in the following groups of subjects: English, ancient foreign languages, modern foreign languages, physical science, biologic science, history, mathematics, commercial subjects and drawing. Under the immediate supervision of these specialists there are permanently employed 18 examiners, who are actively engaged in the rating of papers. Of this number 12 are college graduates with degrees of B. A., Ph. B., B. S.; four are graduates of normal schools and one is a graduate of the New York State College for Teachers. Two have master degrees in addition to B. A. degrees. No member of the permanent staff has had less than three years' experince in tching. Five have had from eight to ten and five from 16 to 20 years' teaching experience.

"Owing to the large number of papers written in the June examination each year, which must be examined and reported upon to the schools before the opening of the fall term, it is necessary to employ temporarily from to six weeks during the summer, teachers, who have proven their eligibility for the position of examiner by the passing of civil service examination. In the rating of the answer papers written in the June, 1915, regents examination, there were 177 temporary examiners employed. Of this number 125 were college graduates, 24 were normal school graduates, eight were graduates of special art schools, seven were graduates of commercial courses and all of the 13 remaining had had special preparation in the subjects assigned to them. Among the number were several High school principals and heads of departments in large high schools. In no case are papers put into the hands of a person who is not qualified both by pedagogical training and teaching experience to rate them.

"All of the papers written in the regents academic examinations are rated by the schools before being sent to Albany. Many of the papers sent to Albany are accepted at school ratings, although the department reserves the right to rate all of the papers from all of the schools."

### MR. and MRS. W. H. BURRITT GIVEN WELCOME PARTY

Mr. and Mrs. W. H. Burritt were pleasantly surprised last night by a party of forty friends at their home in West 3rd st. Refreshments were served and good cheer abounded.

Mr. and Mrs. Burritt were given so royal a welcome to our little city that they must think this is indeed a "real town."

### NOTICE OF SALE

Sealed bids will ber eceived at the office of the G. J. Emeny company up to 10 o'clock, a. m., Wednesday, February 2, for the property including the 3-story brick factory building and site, water-power and water-power rights and all claims against the State that it may have for abandoned canal land or otherwise; also all machinery and fixtures.

A certified check for $100 payable to the G. J. Emeny company to accompany each bid, the same to be returned if bids are not accepted. We reserve the right to reject any or all bids.

### LATE COMPLAINANTS HAVE THEIR REGRETS

No grievances, aside from a trio of sprinkling assessment complaints, were presented before the Grievance Committee of the Common Council, which met last night in the City Hall.

Former Chief of Police Ross requested that as prinkling assessment fixed on his property in Park st. be declared erroneousf rom thef act that he had made application before the Board of Public Works in 1913 that the street in front of his property should not bes prinkled.

Mr. Ross's claim will not be granted, City Attorney Hillick stated, because of thef act that subsequent to 1913 sprinkling contracts in Park st. have been advertised, and as no opposition was forthcoming, the city had the street sprinkled.

Another property owner objected to sprinkling assessment on account of an error in stipulating the frontage of the property taxed, there being a difference of two feet.

### MRS. MINER'S FUNERAL TO BE HELD SATURDAY

Thef uneral of Mrs. Virginia Miner, 74, who died at the home of her daughter, Mrs. Josie Maynard, 111 W. 3rd st., yesterday morning, will be held Saturday morning at the house at 8:15 and at the Church of the Immaculate Conception at 9 o'clock. The Rev. John L. Lindsman will officiate and burial will be made in St. Mary's.

### WILLIAM SIMMONS

Mr. William Simmons, one of the oldest residents of Oswego town died suddenly yesterday morning at the home of his daughter, Mrs. Norman Farr, of Oswego.

Mr. Simmons was born in Dutchess county, N. Y., and was in his eightieth year. He was a member of Company C, Twenty-fourth New York Infantry, in the Civil War. He was a member of Post John Stevenson, G. A. R., of Southwest Oswego, and a member of Hope Grange.

He is survived by his daughter, Mrs. Norman Farr; one son, Willis D. Simmons of Southwest Oswego; two granddaughters, Miss Ethel Simmons of Southwest Oswego and Miss Aurel Farr of Oswego, one sister, Mrs. Alfred Jarvis of Chicago, and one brother, George Simmons of Southwest Oswego.

### JOHN TOBIN IS DEAD

John Tobin, 83, died at the Lee Memorial hospital yesterday afternoon. Two relatives survive him: a nephew, Patrick Tobin of W. 4th st., and a niece, Mrs. Thomas Goss of Kellogg st.

Mr. Tobin was born in Kilkenny, Ireland. He has resided in this city and vicinity for more than forty years.

The funeral arrangements have not been made.

### RAISE FOR STEEL MEN.

**Unskilled Workers Get an Increase of 10 Per Cent.**

The United States Steel corporation has decided to share its prosperity with the wage earners by granting an increase of 10 per cent, to unskilled laborers and proportionate advances in other departments, including the mining properties. It is estimated that the total increase will reach close to $16,000,000 a year, affecting 240,000 men, the largest number ever in the employ of the company.

In announcing that the wage increases would become effective Feb. 1, Mr. Gary said:

"In view of the prosperous conditions now existing it was unanimously voted at a meeting of presidents of our iron and steel companies, held recently, to recommend that there should be made adjustments of the wage rates to take effect Feb. 1, and at a subsequent meeting of the finance committee it was unanimously decided to adopt the recommendation of the presidents.

"It is proposed to increase the rate of common labor about 10 per cent. As to other departments, increases will be equitably proportioned. Adjustments in wage rates in our mining companies are under consideration."

Of the 240,000 men in the employ of the steel corporation about 150,000 are the so called common laborers who will benefit by the 10 per cent wage advance. Their daily wage now amounts to about $2 for a ten hour day, which will be increased 2 cents an hour, or $60 a year. This means that about $9,000,000 of the total proposed increase will go to the unskilled workers.

The men in the plate and rolling mills are among the best paid in the country. They work on a tonnage basis, and many of them make anywhere from $5,000 to $7,000 a year. In view of the fact that many of the mills are now working overtime, even the water boys are now making on an average of $2 a day.

It is just as good business for a state to live within its means as for an individual.

# GOOD ROADS BILL DOOMED IN SENATE, SAYS N. Y. HERALD

The New York Herald today predicts the defeat of the Shackleford good roads bill. The predicition is the result of a canvass of the Senate to discover sentiment toward the "pork barrell" bill which would appropriate $25,000,000 for improved nation-wide highways.

Here is the results:

The Shackleford "pork barrell" will be defeated, a fair majority of the Senate being opposed to grabbing $25,000,000 from the public treasury under the present circumstanses for this purpose.

An overwhelming majority of the Senate, however, is in favor of some sort of legislation to further the cause of good roads, provided it does not take money from the treasury needed for more immediate purposes.

Indications are that the Senate Committee on Post Offices and Post Roads will propose a substitute for the Shackleford bill, providing for a federal bond issue to be guaranteed by those States which avail themselves of the loan for the improvement of their roads. This would place the cost of improvement on future generations and would not be ad rain upon the revenues of the nation.

With the ever increasing pressure from the people for an improved army and navy there is a possibility that all good roads legislation may be lost in the shuffle through a disagreement between the two branches of Congress concerning the best way to handle the question.

A bill identical with the substitute which the Senate committee agreed to in thel ast Congress and reported has been introduced by Senator Bryan, democrat, of Florida, and is now pending before the committee. This measure is being favorably considered by the committee members now. This provides for a $500,000,000 bond issue for good roads at three perc ent interest. The money thus raised, it is proposed, shall be turned over to the States which desire to avail themselves of the opportunity of obtaining money with which to construct good roads. Before this is done, however, each State is required to bond itself for the amount of funds desired; its issue to bear interest at the rate of four per cent interest. These bonds would indemnify the United States. The money for roads would all be paid by the States in which the roads were constructed, and there would be no expense upon the federal Treasury.

It is further provided in the bill that the difference between the interest rate on the government and the State bonds would be employed as a sinking fund, which compounding and running over a period of fifty years—the life of the bonds—would be used to repay the principal.

## MISCELLANEOUS WANTS

Newspapers—Bundles of 25; clean and folded; handy to have in the home. Get a bundle for 5 cents. Times office. tf

Wanted—A girl to wrap spark plugs; must be steady and quick worker. Apply at office. John Mac Gregor Co., Inc. 341c

Small House Wanted— Must have conveniences;not over 6 or 7 rooms; central location. Address W., Times office. tf.

Wanted—By High school boy work for board and lodging. IInquire Wilfred Allen, R. D. 8, Fulton 241c

For Sale—Parlor stove, folding bed, sette and chair, carpets, 2 pair lace curtains. 218 East 2nd st. 343c

Dog Lost—Brindle Bull, white breast left eye disfigured. 324 Utica st. 343c

To Rent—Furnished rooms, by day or week; light housekeeping. 205 Cayuga. 342c

# FRUIT GROWING IS PROGRESSIVE

## New Phase of Industry Must Be Met With Firmness to Win Success, Says Expert

Rochester—Dean Beverly T. Galloway of the state college of agriculture at Cornell, speaking here today before the western New York horticultural society, said that fruit growers now face an entirely new set of conditions, and that success depends upon how these conditions shall be met.

He pointed out that for the past two years the stable products like wheat, corn, and oats, and even cotton, are finding ready markets, demanding good prices, while such crops as fruit, certain types of vegetables, and flowers are moving with extreme slowness and, in some instances at least, are virtually stagnant.

Flowers, the more specialized vegetable crops, and fancy fruits being in the nature of luxuries, are naturally the first crops to feel the effect of war. Property values are being destroyed in Europe at the rate of 30 to 40 million dollars a day and, according to Dr. Galloway, the whole world must share in this loss.
world must share in thisl oss.

### Constructive Program

Dean Galloway offers three definite suggestions: first a state supported organization, one of whose functions would be to aid the fruit growers in the following program of work; that small groups of men be brought together with common motive and common purpose; that through these groups better production, standardization, branding, packing, and marketing be secured; that the small groups be correlated into larger work ing units; that market surveys be or-consumers' selling agencies, and the joining of these to the fruit packing units be investigated; that a market news service be developed; that methods in financing cooperative organizations be improved; and that legal questions be solved to the end that organization may be effected and conducted in accordance with the best interests of public policy.

As the second part of this constructive program he advocates systematic work by the state college of agriculture to develop social preparedness and social consciousness and the spirit of working and living together, in addition to special courses designed for the training of leaders capable of constructive work in the field of marketingand distribution.

As a third feature he proposes a concerted movement on the part of all interested in the more perishable products, toward broadening the vision of both producers and consumers. He thinks that this may be done through conference, preferably under the direction of the state department of agriculture.

### The Pinch Already Felt

We are already beginning to feel the pinch of the situation, acording to Dean Galloway, in the products enumerated above. The war, coupled with a previous lack of thought for them arketing and distribution of fruit products, makes it necessary for those engaged in the fruit industry to receive, weigh and act upon all suggestions for meeting new and changed economic conditions. For the next ten years, and perhaps for the next twenty years, the commodities in demand will be those which the world most seriously needs for the commonest foods and textiles.

Dr. Galloway points out, however, that no specific panacea can be offered, and that for a good many years every effort will have to be bent toward creating a new state of mind, and he holds up the citrus growers as an example for New York fruit growers. "Compared with other fruit industries, the production, distribution, and marketing of citrus fruits is as the well drilled coordinated army corps is to the undrilled inefficient raw militia. The secret of success of this organization is its aggressive attitude that it is out to dispose of its product. Other points in its success are its standard and guaranteed brands, its unified system of harvesting, packing, storing, and marketing, its crops of advertising, investigative, and informational agencies. The activities of this organization have particular significance to New York fruit growers especially New York apple growers."

## MAP FOR ASSESSORS' GUIIDANCE NEEDED

Watertown—Dwight C. Howard, a local civil engineer and surveyor, has communoicated to the members of the common council a proposition to make maps of each lot in the city, showing its eize, together with the size ,and location of theb uildings and all information concerning them, for use by the assessors in assessing property valuation. Mr. Howard has offered to do the work, under the supervision of the city engineer, for $3,500 and complete it within a year and the matter will be taken up at the next meeting of thec ommon council.

Under the system put into operation throughout the state, a few years ago, of assessing lots and builtings separately, instead of together, the assessors felt the need of district maps showing the streets, each lot on a street, with thed imensions plainly marked together with the size and location of any buildings that might be on it. The matter of making such maps was taken up with the city engineer, who estimated the cost at about $12,000, a prohibitive figure, and the work was not done.

## SPORTSMEN WANT COMBINATION LICENSES

Watertown—A movement to have a combined hunting and fishing licenses which will cost the same as a hunting license has been started among the members of the Jefferson County Sportsmen's Association and it is proposed to introduce another bill to get this measure through. The same matter was proposed some time ago but failed to go through. The principal argument for the licensing of fishermen is that the 11 fish hatcheries of the state have been maintained at annual expenditure of $70,000 and nothing has been contributed by the fishermen.

## WHEN WAS THE MERRICK MILL DESTROYED?

The Oswego Palladium says that F. E. Cullen, attorney for the Columbia Mills, Inc., is interested in finding the date upon which the Major Merrick mill that stood at the East end of the old Minetto bridge burned. The property belongs to the company and data regarding the old mill is being gathered. When the mill was in its prime it is said that 1,200 barrels of flour a day were manufactured there. The date of the burning is between 1860 and 1863, it is said.

## WINDOW CARDS AND FLAGS SIGNS OF PRAYER MEETINGS

Window cards and church flags have been supplied to the hostesses entertaining the neighborhood prayer meetings, the first of which will be held this evening, in preparation for the evangelistic campaign in Batavia next month.

Flags on houses will indicate to all that meetings will be held at them and the cards will state the time of the meetings. People are expected to attend the meeting nearest thir own home.

## OSWEGO CITIZENS OPPOSE CENSORSHIP BILL

Oswego—A petition bearing the rames of fifty prominent citizens of this city has been prepared and forwarded to Congressman Mott and each of the Senators as an outgrowth of the Smith-Hughes bill, providing for national censorship of motion picturefilms, introduced several weeks ago. The signers favor the adoption of the measure.

Hearings have been held before the Committee on Education and it is expected that a report will be maoe this week. The producers and playhouse magnates are in apposition to the measure. Petitions have also been filed from many of the other cities throughout this vicinity.

# AN ARMY CANNOT BE RAISED HIGHER IN QUALITY

## THAN ITS GENERAL AND COMMANDING OFFICERS

Neither can a city rise higher than its leaders, constantly on the field, directing each day's plans and work.

Every hour has its duty for the leader who needs to see for himself that the steering gear is working right.

We cannot have proxies---they are unequal to it, and the people have to be safeguarded, and to hold the leaders of a government to strict accountability for everything done.

## The Trade of a City Rises in Proportion to the Amount of Civic Pride We Take in All Our Institutions

*"FULTON--First, Last and All the Time"*

**Newspapers Printed and Published in Fulton Are Home Institutions.**

# For the Children

**F. C. Bradman, Jr., Youngest United States Marine.**

Although his parents didn't raise him to be a soldier, Frederic C. Bradman, Jr., of Mare Island, Cal., aged seven years, has twice formally enlisted in the United States marine corps and is a corporal in his second "hitch," to use the sea soldier vernacular.

Corporal Bradman wears a service stripe and a good conduct medal as a reward for excellent service during his first enlistment and also sports a sharpshooter's badge that was won by proxy. The youngest marine has had two years' foreign service in Cuba, which will count as four years toward the thirty years necessary for retirement. And Corporal Bradman says he will re-enlist until he shall have served thirty years.

Major Frederic L. Bradman, U. S. M. C., father of the boy, is proud of the fact that the regularly enlisted marines have accepted his son as a comrade and obey his orders as corporal.

### "French Roll."

A good many children can play in this game. One player is called the buyer. The rest form a line in front of him and take hold of each other. The first in the line is called the baker, the last the French roll. Those between are supposed to be the oven.

When they are in place the buyer says to the baker, "Give me my French roll." The baker replies, "It is at the back of the oven." The buyer goes to fetch it, when the French roll begins running from the back of the oven and comes up to the baker, calling all the while, "Who runs? Who runs?"

The buyer must run after him, but if the French roll gets first to the top of the line he becomes baker, and the last in the line is French roll. If, however, the buyer catches the French roll the French roll becomes buyer, and the buyer takes the place of the baker.

### An Alphabet Game.

The best place to play this game is at the table. Somebody begins by saying, "I had for dinner an apple;" the next person says, "I had for dinner an apple and a beet;" the third declares he "had for dinner an apple, a beet and some celery." Each player contributes the name of something to eat beginning with the next letter of the alphabet in order, and he must repeat everything that has been mentioned up to that point in the game. By the time the company has reached "z" there are, of course, twenty-six names to remember, and it is quite likely that most of the players will have missed and have fallen out of the game.

### A New Year's Jumble.

The words have been jumbled to form other words. For example, No. 1 is New Year's day.

1. The next holiday after Christmas—Yes wade yarn.
2. The time when Mr. New Year arrives—Dim thing.
3. An old man with a scythe—He trim fate.
4. What takes place when the new year comes—Ben gil grin.
5. The name of our century—Cute wiry tenth ten.

Answer.—1. New Year's day; 2. midnight; 3. Father Time; 4. bell ringing; 5. twentieth century.

### New Year's Long Ago.

Way back in the days of the Romans the New Year celebration was a gala one. They decorated their houses and temples with wreaths of evergreen and presented each other with branches of trees as omens of good luck for the coming year. Also they feasted and made merry in the dance and in the masquerades, visited each other and exchanged gifts much as we now do on Christmas day.

### New Year's Eve.

New Year eve's the time for fun,
'Fore the New Year has begun,
When it's everybody's plan
To make all the noise they can.
An' you take most anything—
Horn to blow or bell to ring,
Whirl a rattle hard an' quick,
Pound a dishpan with a stick.
Any nonsense is allowed,
An' you join in with the crowd
An' parade around the square,
Makin' racket everywhere.
An' as you go 'long the street
You must cry to all you meet,
"Happy New Year!" If you do
They will say, "The same to you!"

# THE CHINESE WAY

## Taking a Street Car Ride In the City of Shanghai.

## A PUZZLE FOR A WHITE MAN.

**Experience of an American Tourist Who Made a Bluff at Appearing to Know All the Ropes—A Patient Conductor and an Interested Cargo.**

Writing of his adventures in the Chinese city of Shanghai, Homer Croy, in Leslie's Weekly, tells of the experience he had there in taking a ride on a street car:

The car was full of Chinamen, with not another white soul aboard, all sitting there in their skirts, their faces as expressionless as the heads of drums, but as soon as I came in their faces began to fill with interest, one nudging another until the whole car was looking at me.

I felt that something was wrong, but I could not figure out just what. I knew that it shouldn't create that much of a sensation for a white person to get on a car in Shanghai, but still they were looking at me as if I could be signed by a circus. I struggled to look unconcerned, but I knew that my cheeks were backfiring.

The conductor, in his suit of blue jeans, with a satchel over his shoulder, came up and said something to me, while I nodded with earnest carelessness and handed him a twenty cent piece, knowing that he could get enough out of it to satisfy his wants.

"Mun stau chong du?" he asked.

I nodded again and held out my hand for the change, plainly showing that I made the trip on the line twice a day.

"Mun stau chong du t'aing kaing shon da?" he asked with more feeling, pointing down the street with one hand.

"I didn't catch the drift of his remarks, but I wasn't going to show him that I wasn't an old citizen and taxpayer, so I shook my head this time and nestled back in the seat as if it were all settled. But the conductor became more excited than ever, drafted the other hand and gurgled:

"Mun stau chong du t'aing kaing shon da feah da tsu ss whoo peh quong?"

So I waved in the other direction and tried to nestle again, but the conductor came back with another round of monosyllabic re-enforcements. With that his fellow men in the car came to his help with an artesian of words, each one thinking that he could make it plain by raising his voice just a bit higher than any one else.

Reaching in his satchel, the conductor offered me a slip of paper spoiled with Chinese writing. I took it and started to stuff it nonchalantly into my pocket, but he became more excited than ever and came back with another string of empties, while I put the slip back into his hand as if it made not the slightest bit of difference in the world to me whether I kept it or whether he had it—I would leave the details of the trip to him.

The conductor used his hands some more and then turned and signaled for somebody from the car ahead. Another man in blue jeans with a satchel over his shoulder came and listened for a few blocks while my conductor explained. A Chinaman can never explain anything in a sentence or two; he has to go into details and go through his whole selling talk before he feels that the other has grasped the general drift of thought.

The other man bent over. He was evidently a master of English. "How muchee far you goee, mister? You payee how far you lidee."

Then I understood. When you get on you have to tell the conductor how far you are going, and he charges you for just that distance. But even after my fare was settled the natives on the car kept looking at me and pointing with their chins, as is their custom.

When I went to get off I saw several other white people piling off, but they were all from the front end of the first car. Then I looked at the markings on the car and saw what was the matter—I had been riding in the third class section with the coolies!

All the Shanghai street cars are divided up into classes—first, second and third. The white people all ride first class, the better to do Chinese second, while no one ever ventures third except the coolies.

### Nature and Poetry.

Environment aids poetry, but does not create it. Nature is the grand agent in making poetry, and poetry is present wherever nature is. It sparkles on the sea, glows in the rainbow, flashes from the lightning and the star, peals in thunder, roars in the cataract and sings in the winds. Poetry is God's image reflected in nature, as in a mirror, and nature is present wherever man is.—Selected.

### His Weak Point.

A man who takes a business view of things when recently asked his opinion of a person of quite a poetic temperament replied:

"Oh, he's one of those men who have soarings after the infinite and divings after the unfathomable, but who never pay cash!"

### Something Else.

"Is loving a verb?"

"No; it's just plain nonsense."

Having made this reply to his daughter's question, Mr Grouch looked a few daggers.—St. Louis Post-Dispatch.

Laughing cheerfulness throws sun light on all the paths of life.—Richter.

# A Double Secret

By EUNICE BLAKE

Mr. George Smith at fifty looked forward to a lonely old age. He wished to marry, but there was an impediment in the way of his marrying. At thirty he had married a girl of seventeen against her parents' wishes. Seventeen is a tender age for a woman to be placed in antagonism with her mother, and a husband who under such circumstances attempts to contend with a mother-in-law is quite likely to get the worst of it. One day, but a month after his wedding—at the end of the honeymoon—Mr. Smith went home from business to find the newly built nest deserted. His wife's mother had swooped down on her and carried off her chick.

It was six months before the bereaved husband could discover where his wife had been taken. Then he also learned that she was dead. At any rate, his mother-in-law wrote him to that effect. But whether the lady did so that she might cause him to cease to pursue her daughter or whether she wrote the truth he was not quite certain.

But now, twenty years from the date of his marriage, he met a maiden lady verging on to forty with whom he was very companionable. He never told her about his marriage, for he made up his mind to win her if possible and feared that if he admitted any doubt as to his being free to marry she would not take the risk. When he proposed to her she surprised him with a confession. She informed him that the name she bore was not hers legally. There was a long story to tell in connection with the matter of her passing under an assumed name that she would tell him if he cared to hear it, after which he might judge for himself if he wished to marry her.

Smith after a few moments of thought replied that there was a matrimonial hitch in his own case. If he told her what it was it would always worry her; if he knew what hers was it would worry him. Would it not be well for him to keep his secret and vice versa? In his own case there was not one chance in a thousand of there being any trouble. She said that the same was true in her own case. She would take the risk if he would. After awhile they concluded that what had been proposed was the sensible thing to do, and they were married.

Things don't always turn out as expected. Instead of there now being two causes for worry there were four. Mr. Smith in addition to having his own affair to trouble him had that of his wife. Mrs. Smith also had two cares of worry where she had had one. Then, too, curiosity came in to make matters worse.

The prime difficulty in their now unburdening themselves to each other was that fearing they would not adhere to their resolution of keeping their secret they had each registered a vow to maintain it inviolate. Mr. Smith, who was engrossed in business, did not find it difficult to keep his vow, but Mrs. Smith, who had little to occupy her mind, dwelt upon her husband's secret continually. One day she said to him:

"Dear, I have concluded that I must know your secret. True, you have made a vow not to reveal it, but that vow was made to me, and I release you."

"Why cannot you dismiss this matter from your mind?" he asked. "If I tell you my secret I am entitled to know yours. I don't wish to know it. Possibly if I did I might feel something, do something, say something to spoil our happiness. As it is, we are passing on without anything to mar it. Why not let the matter rest as it is? Remember Pandora and the box of troubles she opened."

This was all very well, but the curious bee had been buzzing in Mrs. Smith's bonnet so long that she could endure it no longer. However, something occurred to bring about a revelation of both mysteries. One morning the postman delivered the mail while the Smiths were at breakfast. Mrs. Smith opened a letter addressed to her and turned pale. Seeing that she was about to faint, her husband ran to her and caught her in his arms. She came to herself in a few moments.

"What is it, darling?" cried her husband.

"Read it."

Taking up the letter, he read:

When your mother died she left it discretionary with me to make a confession for her. I have not long to live and have concluded to make it before I die. Your mother spoke falsely when she told you your husband was dead. She also wrote him that you were dead.

Something glimmered upon George Smith. An idea was trying to permeate his brain.

"What was your maiden name?" he gasped.

"Stacey—Arietta Stacey."

Throwing his arms about her, he squeezed her till she cried out.

"Thank heaven!" he cried.

"What for?"

"I am your first as well as your second husband. You are my first and second wife."

"How do you know?"

"I married Arietta Stacey when she was seventeen years old. Why did you change your name?"

"Mother forced me to do so to keep you from finding me."

"But you have known my name since our marriage."

"Yes, but Smith is not an uncommon name."

# FOR YOUNG FOLKS.

## Winter Snow Brings Joy to Many Boys and Girls.

## BUILDING A FORT OF SNOW.

**Little New Yorkers Make the Most of Their Opportunities—Things to Guess That Keep Little People Busy. Stories and Games.**

Children of the rich had a great time during the New Year holiday. Ordinarily these little folk do not live in the big city, although that is supposed to be their home.

In the summer they spend most of their days in the country, but when

MASTER HOAGLAND VAN NORDEN.

cold winds blow New York city receives them, and there are splendid opportunities for good times in Central park. The boy in the picture is Master Hoagland Van Norden, son of O. H Van Norden. When a big snowstorm came to New York a short time ago the snow shovelers got busy. Hoagland also got busy. With his little shovel he went to Central park and began the interesting task of building a snow fort. Then along came the camera man and caught him on the film.

### Age of Boy Scouts.

One of the misunderstandings about the boy scout movement is that it is open only to boys between the ages of twelve and eighteen. Twelve years is the minimum age, but eighteen is not the maximum. There is no maximum age at which a boy ceases to be a scout. We have scores of men registered as scouts who are eighteen, nineteen, twenty and even twenty-one years of age.

It is from the ranks of these older boys that our assistant scoutmasters are largely recruited. Within a few years they will develop into a splendid group of trained scoutmasters.

Once a scout, always a scout!—Scouting.

### Music Box—A Game.

In order to play this game each player is given a slip of paper and pencil. Some one sits at the piano and goes briskly through snatches of one air after another, each of the players writing on his slip the name of the air or leaving a blank if he is unable to name it. The one who names the largest number of airs correctly wins.

This is a very good game to use for old songs, such as "Annie Laurie." "Blue Bells of Scotland." as well as the popular airs of the day.

### Boy Scouts, Rescue Companion.

Boy scouts after a long and difficult search of the thick forests in the Shawangunk mountains near Port Jervis, N. Y., rescued Harry Taylor, twelve years old, from freezing to death. He was found in the woods with both feet frozen, but recovered under the care of a physician. The snow was very deep, and Taylor, on a hike with companions, became separated from them and lost his way.

### A Riddle.

Whole I am a house for beasts; behead me and I am found in the dining room. Again, I am skillful; transpose me and I am a person found in the old testament; again and I am a bundle of goods.

Answer. — Stable, table; able. Abel, bale.

### Jack's Discovery.

Jack was looking over the dictionary, and once he laughed aloud.

"Why are you laughing?" asked Dot. "Is your book interesting?"

"No, not interesting," answered Jack, "but amusing. It spells words so different from the way I spell them."

### Decapitation.

One is to mix and two to loan;
To lose 1 sometimes fear.
There's as a termination known
And wears that meaning here.
Answer—Blend, lend, end.

# That Week End Trip

Really it is a troublesome thing to pack up one's clothes for a short visit, perhaps more troublesome than to pack them for a long trip. A year or two ago, when skirts were scant and bodices flimy, one could get a week end wardrobe into a suit case without trouble. But now, when skirts are full and collars are high, sleeves are long and the fashionable fabrics are rather clumsy, the getting of enough clothes into the kind of luggage one is supposed to carry on a week end-visit is something of a problem.

Week end trunks, which are large enough to hold a good many clothes and yet small enough for a porter to carry, small enough, too, to be stowed in an automobile, are useful for the short visit. But, lacking one of these, a big suit case and a small leather bag will do.

The woman who travels with little luggage must beware too many convenient cases. Attractive they may be, but they take up room that is often needed for clothes. Tissue paper answers the purpose of protecting one's frocks and takes less room than many of the rather cumbersome cases.

Take a thin negligee, a pair of the lightest sort of bedroom slippers—heelless cretonne or silk mules are a good choice—and lingerie that takes up little room. Really in this way a good deal of space may be saved. It is too bad, so far as the week end visitor is concerned, that petticoats have returned to style, for space must be left for a petticoat to wear with one's evening frock. However, this need not be bulky. The taffeta petticoat may be worn under the street frock or suit.

Lingerie, stockings, necessary toilet articles and nightwear need not take up much room. The only shoes needed are a pair of evening slippers in addition to the street boots worn, unless sport shoes of some sort are needed.

It is quite possible to wear a serge frock under a big coat—a serge frock that will serve for morning and luncheon, for walking and motoring. Or a three piece suit may take the place of the frock and coat. One's hostess can always provide an extra coat for motoring, if necessary.

If carefully packed, lingerie, night things and toilet articles can all be stowed in the small bag. This leaves the suit case for shoes and frocks.

Use plenty of tissue paper in packing the evening frock. Stuff out the sleeves and bodice with it and place a roll of paper under the folds necessary to get the garment into the suit case. And don't pack the frock down with many things on top of it, especially if it is taffeta. A satin evening frock is a far wiser choice for the week end traveler.

A sweater, blouse and sport skirt can be placed first in the suit case, with the evening frock on top. Even in these days of full skirts a frock of satin and georgette crepe can be packed in small compass. And neither the crepe nor the satin wrinkles readily.

Most week end visits are made at short distances, and if one's bags are packed at the last moment before starting forth and unpacked at the first moment after arriving at one's destination the clothes need not be long confined. They should be immediately shaken out and placed on hangers.

### Rice Pancakes.

Two cupfuls of boiled rice, two eggs, a cupful of milk, half a cupful of flour, a teaspoonful of baking powder. Cook as any griddlecake. Potato pancakes may be made the same, using mashed potato, seasoned with salt, pepper and butter.

Naturally the War college asks for everything in sight in the way of army increase. Probably, however, it is itself prepared to be satisfied with a half or even quarter loaf.

Others who make a hit by early shopping are the ones who buy the right stocks at the right time and know the right moment to unload upon late comers.

The choice of Carranza as the boss of Mexico was followed by weeks of peace, anyway. For this let us give thanks.

A bigger output of locomotives and cars in place of all that war ammunition would also boost home prosperity.

Maybe December was simply handing out last winter's "hang over."

Uncle Sam may yet be loved for "the adenies he has made."

**EXPERIENCE.**

You can give other people your advice, but you cannot give them your experience. You can give them your remedy, but you can by no means give them its effect upon yourself. Perhaps this is just as well, since each is to live his individual life and make his own best achievement out of it.

# Arother Triumph by Mme. Cheruit

Copyright, 1915, by Philippe Ortiz, New York

THIS adorable child was garbed by Mme. Cheruit for the recent fashion fete. La Grande Couture Francaise, under the auspices of Vogue, New York. The material is white charmeuse, as is the matching bonnet, quilted along all borders and fastened with innumerable ball buttons, all of which envelop a quite satisfactory "Cupidon."

• • •

The fact that small turbans have come into fashion suddenly and have been accepted by the smartest of young women has caused a good deal of perplexity among those who have put their money in the high crowned hat. They were inaugurated by two young brides, who appeared simultaneously with them as an evidence that they were quite the correct thing. They were flat, simply trimmed and were not tilted over one eye. They showed a good deal of the rippling hair. One was so small it looked like a skullcap.

• • •

Again pompadour taffeta or satin over net or lace conjures up Dresden china court ladies. The modish rainbow effect carried out in fine net, principally silk, tulle and chiffon, is adapted for pannier styles, especially where support is given by a hoop.

ANNA MAY.

# Easy & Practical Home Dress Making Lessons

*Prepared Especially For This Newspaper by Pictorial Review*

## This Frock Costs Very Little.

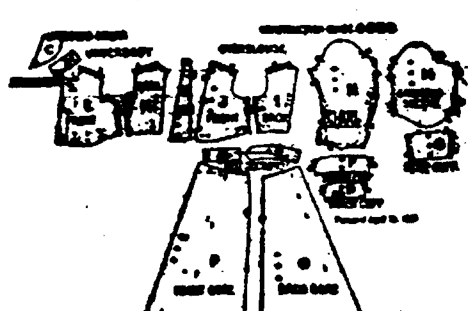
Costume of silk and wool mixture with underblouse of soft silk.

Here is a dress that might perhaps be called a "pin money" frock, for it easily can be eked from the weekly allowance if taken in small installments. Average size requires only 4¾ yards 44-inch material, and there are excellent silk and wool mixtures to be found between 40 and 50 cents a yard. The inset vest is of contrasting silk, while sheer gauze is used for the collar and vestee, cut in one. If an underbody of silk is used the vestee will not be necessary.

The underbody is made first, the front being faced to double "oo" perforations and around armhole of front and back to small "o" perforations. Pleat lower edges, bringing "T" to corresponding small "o" perforations. Close under-arm and shoulder seams as notched. Turn hem in front at notches. Center-front indicated by large "O" perforations. Stitch 2 inch belting under lower edge of underbody for a stay.

If underbody is made high neck sew standing collar to neck edge, notches even; large "O" perforation in collar indicates center-front. If underbody is desired with open neck cut out front on small "o" perforations; face round collar, sew to neck edge, large "O" perforations and center-backs even.

Close sleeve seam as notched, gather entire lower edge. Close cuff seam as notched line and sew to sleeve, notches



and seams even. Sew sleeve in armhole as notched, small "o" perforation at shoulder seam, easing any fulness.

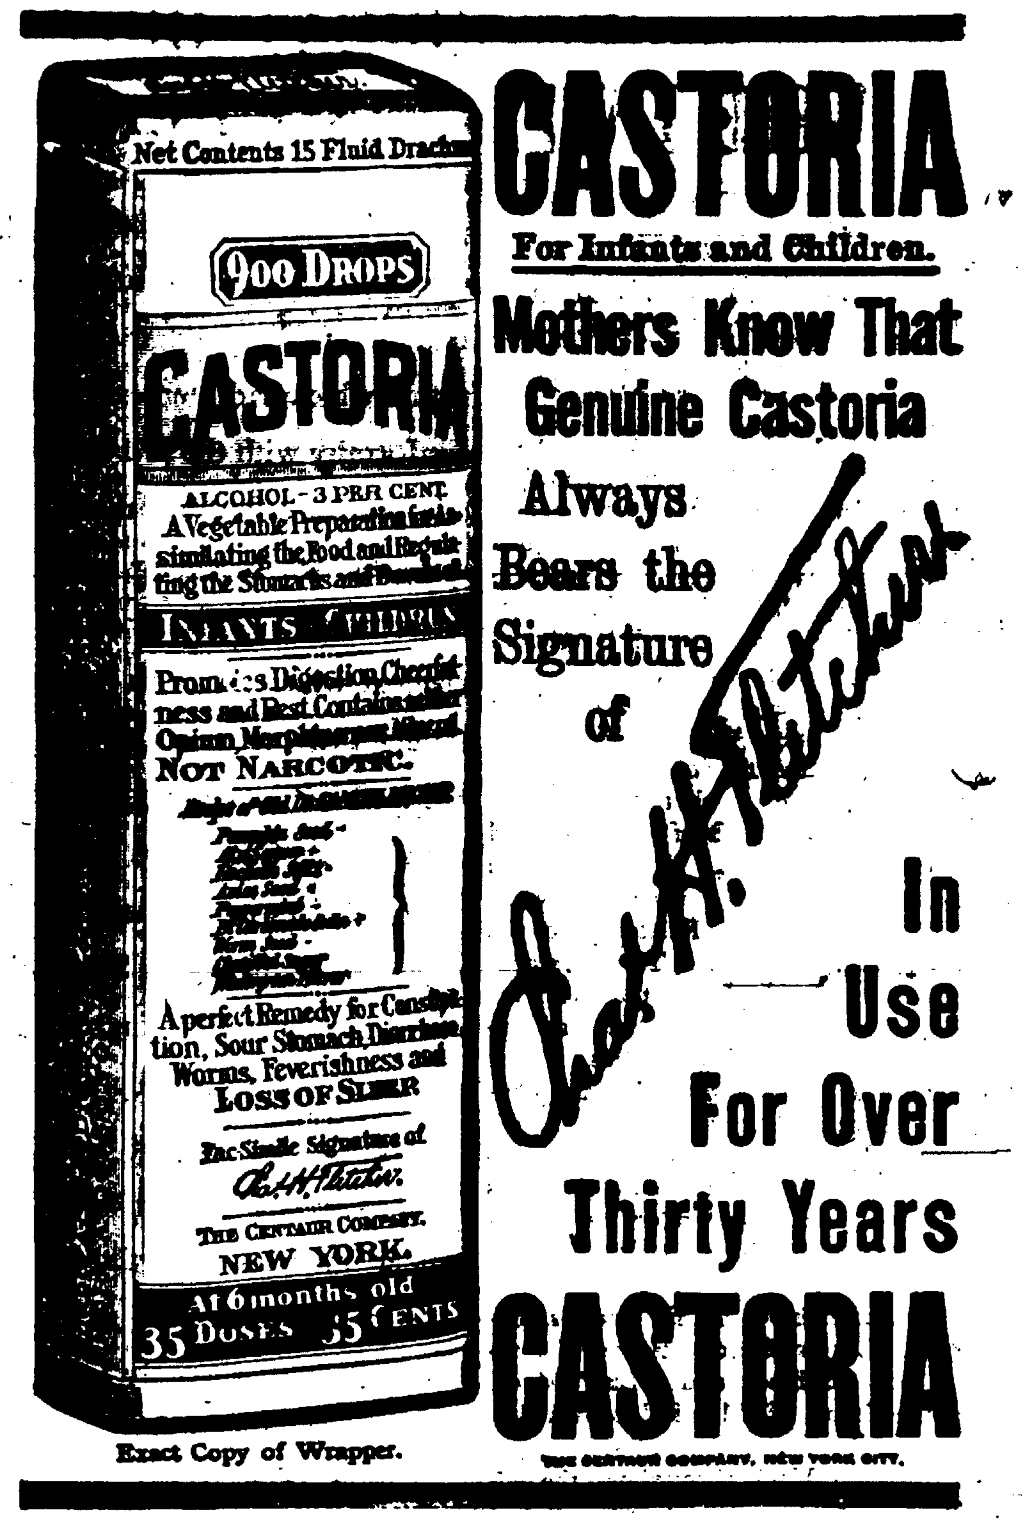
Turn under front edge of front of overblouse on slot perforations, lap folded edge to line of small "o" perforations in vest, notches even. Stitch 1 inch from folded edge. Close under-arm and shoulder seams as notched. Gather lower edge of front and back between double "TT" perforations and 2 inches above. Arrange on underbody, center-fronts, center-backs and under-arm seams even; stitch gathers to position, lower edges even.

Slash left front gore of skirt on line of double "oo" perforation; finish edges for a placket. Close the center-front and center-back seams. Form pleats, creasing on lines of slot perforations, bring folded edges near center-front and center-back to the seams, and bring remaining folded edges in front gore to line of single small "o" perforations: stitch to position as illustrated and press. Join gores as notched. Adjust skirt to position, stitching upper edge over upper row of gathers in waist, center-fronts and center-backs even.

Lap the back belt section on the front section, matching large and small "o" perforations. Tack on right side and finish the left side for closing. Work a buttonhole near the pointed edge of back section and sew a button on skirt to correspond; adjust to position, center-backs even, upper edge of belt along upper edge of skirt.

Frocks must flare at the bottom, but all fulness is limited about the hips in designs for informal use.

Pictorial Review Costume No. 6535. Sizes 34, 36, 38, 40 42 44 46 and 48 inches. Price, 15 cents.



## SIGNAL TO KNOW HUSBAND.

**Brother of Bridegroom, His Counterpart, Best Man at Wedding.**

Brockton, Mass.—A secret identification signal was adopted by Evangelist Lacouture at his marriage to Miss Delina Harpin in order that his bride should be able to distinguish him from his twin brother, Narcisse Lacouture.

Narcisse was his brother's best man. The brothers were dressed alike, as they always have been, and their closest friends have been unable to tell them apart. At the reception Narcisse enjoyed himself thoroughly, receiving many of the osculatory congratulations from fair guests intended for his brother.

### Brazil Nut Trees.

The Brazil nut tree does not begin to bear fruit until it attains the age of fifty years or thereabouts and continues to produce crops intermittently. Trees known to be hundreds of years old have produced crops.

# The KITCHEN CUPBOARD

### FOR BEEF EATERS.

MOST DELICIOUS BEEFSTEAK. —Select a good thick slice of top of the round, rub both sides with two teaspoonfuls of olive oil blended with two teaspoonfuls of vinegar. Allow this to stand an hour. Place a large sized iron spider over hot fire and when smoking lay in the steak, turning often. Season well with salt and pepper and when cooked to liking lay on a hot platter in which a good sized piece of butter has been melting. Make a gravy of browned butter and flour seasoned with salt, pepper, kitchen bouquet, dash of ground cloves and enough water to make the desired quantity. Pour this over the steak on the hot platter. This will give you a puffy, tender steak unlike that prepared in the ordinary way.

Beef a la Mode.—Three pounds of round steak chopped fine, two well beaten eggs, four soda crackers rolled fine, a teaspoonful salt and a teaspoonful sage, one-half teaspoonful pepper, two tablespoonfuls milk. Roll into a loaf, mixing well, and bake two hours.

Mock Hamburg Steak.—Boil one-half cupful of lentils until they are soft, then drain and mash. Add four tablespoonfuls of strained tomatoes, a well beaten egg, two tablespoonfuls of peanut butter rubbed smooth with a little hot water, one-half cupful of bread and cracker crumbs, a little chopped onion, with salt, pepper and sage to season. Mold into patties and fry. The amount will serve five persons. A tomato gravy to serve with the above is made as follows: A teacupful of canned tomatoes, two teaspoonfuls of flour to thicken; season with salt, pepper and sage. Strain over meat.

Steak With Macaroni.—Use a small flank steak, a can tomatoes, two small onions, chopped; a green pepper, chopped, one-third package macaroni, cooked; a level teaspoonful salt, one-fourth teaspoonful pepper, a teaspoonful kitchen bouquet, two level teaspoonfuls butter.

Trim and score the steak. Lay it flat on a board, sprinkle with salt, pepper and the chopped vegetables; roll and tie.

Put butter into a pot, melt; brown the meat in this, add a cupful boiling water and the tomatoes and cook slowly until the meat is tender.

*Anna Thompson.*

# TODAY'S FASHION NOTE

A draped skirt is a very smart acquisition to the spring wardrobe and when fashioned of supple material looks handsome. The model shown for instance, is in satin, bound with braid and trimmed with buttons. The simple waist is in washable satin crepe, 2½ yards 36-inch wide being required to make it. The skirt calls for 4 yards 44-inch material.

Pictorial Review Waist No. 6490 Sizes, 34 to 46 inches bust. Price 15 cents. Skirt No. 6484. Sizes, 22 to 32 inches waist. Price 15 cents.

Pictorial Review Patterns may be procured at the J. R. Sullivan and M. Katz & Co. Department store, Fulton.

### Cute Little Girl.

One day while Katherine's mother was ill a cup of beef tea was prepared for her, but Katherine fancied it and drank almost all of it. Her father was about to scold her when her mother said:

"Never mind; it does me just as much good to see her drink it."

Shortly after this a dose of castor oil was prepared for Katherine, and she poured it into her doll's mouth.

"Why, Katherine," said her astonished mother, "what did you do that for?"

"That's all right," Katherine replied, "it will do me just as much good if she drinks it."—Boston Herald.

# BOXING BOUTS WERE LIVELY

### Local Men Win Honors in Their Class—Woodmen Gave Good Show—Prepare for Big Time in Syracuse.

The Modern Woodmen of America held an unusually interesting meeting last night. A smoker and three good boxing bouts followed the business session, and the event proved a success, as the two hundred Neighbors and their friends will testify.

The preliminary four-round bout between Young Abb and "Frenchy" LaBeef was evenly fought, the formerman earning a shade on points. Nevertheless, La Beef gave a good account of himself. Next came the main four-round bout between "Buck" Green of Fulton and E. Coughlin of Syracuse. The boys convinced the audience that they bear the ear marks necessary to become entries in the lightweight class. What they need most of all is a little more experience and training. The match was fought evenly, no decision being given. J. J. Buckley, Coughlin's manager, stated last night that a return bout will be held in Syracuse soon.

The after-bout of six rounds, between Lester Read, colored champion of Indiana and "Bud" Mack, "white hope of Illinois," provided a lot of fun for the audience. Read toyed with Mack throughout the entire six rounds. "Hank" Mott, of this city was referee in the bouts and he aoquited himself in a satisfactory manner.

J. J. Buckley, District Deputy, A. Huntley, who sang many comical songs and parodies, together with M. Carries, Counsel of North Side Camp, H. Tillenpaugh and J. Mackey were Coughlin's escorts from Syracuse.

The M. W. A. lodge will go to Syracuse by special N. Y. C. train to attend the adoption of a large class of candidates, which will be held under the auspices of the North Side Camp. Many high officials of the order will speak at the meeting. Governor Whitman has accepted an invitation to make an address and Mr. Talbot, Head Counsel, will also speak A smoker and a banquet are planned for the evening, and it is anticipated that nearly three hundred members from this city will attend.

Lillian Lorraine, the star of "Should a Wife Forgive?" and of "Neal of the Navy" the next release Quirk today, has developed in this wonderful screen production an entirely different phase of her dramatic ability from that which brought her stage fame as a star in several New York productions. The story is full of tense situations, and has a plot in which love, intrigue, recklessness, disaster, remorse, and the righteous indignation of aw ronged wife, follow each other in a series of wonderfully beautiful scenes, full of the thrilling action. Thes tage settings are fare beyond those of the ordinary screen play in realism, and the absorbing story is presented in amanner which will fasten a grip on both the heart and mind of every one who sees it.

### NAVY HAS FIRST SEAPLANE IN SOUTH

Marblehead, Mass.—The first war seaplane purchased by the United States Navy, claimed by the builders to be the fastest yet constructed for aero-marine service here or abroad, was shipped today to the trial grounds, at Pensacola, Fla.

Them achine, which makes eighty miles an hour, must carry a 1,000-pound load four hours.

BUSINESS—Particularly the most desirable business—is very much like the sport of fishing. You can catch it if you use good bait. The Evening Times offers you the correct bait.

# GREAT BRITAIN AFRAID TO INSTITUTE BLOCKADE

(Continued from Page One)

utterances, by the declaration that he did not believe it was the intention of Washington challenge the exercise by Great Britain of rights which had been exercised by the United States government, in conformity with the principles set forth in President Lincoln's blockade proclamation, but there is no use hiding the fact that English statesmen are becoming convinced that the drastic demands in the latest note to Great Britain are inspired by a desire to placate the element which, through its plots to cripple American industries, entailing thel oss of many American lives, has continuously violated the laws of the United States. This feeling has been intensified by reports that Count von Bernstorff, conceding some demands of the United States in the case of the Uusitania, is engineering the movement, led by the cotton States Senators and the pro-Germans in Congress, to induce Washington to become the catspaw of Berlin by recognizing the legitimacy of Germany's submarine warfare, and insisting that submarines have ar ight to sink liners and destroy the lives of thep assengers and crew of any vessel which does not surrender immediately to the demands of the undersea pirates.

In this connection it would be well to warn Washington that Great Britain is grimly united in the determination to support the government in the policy of reaping every advantage accruing from command of the sea.

# MACCABEES WON OVER MEXICANS

### Local Players Outplayed the Villagers to the Tune of 37-28.

The Maccabee quintet fell a victim to the inferior Mexico High school organization to the tune of 37-28 in a rough but interesting game played in Washington Hall in that place last night.

Outplaying their opponents throughout the entire session. and scoring more points in the final period than the highs chool boys, the Maccabees at different periods throughout the fray tied up the score and sometimes went into the lead.

Notwithstanding the superior passwork of the Maccabee team, their playing was a disappointment. The absence of O'Brien and Crockett manifested itself in the inability to form compact team work. Merrill, who occupied the centerp osition in Crockett's place played a remarkably good game considering the fact that this was his first appearance in the lineup of the lodge team. Ward, who replaced Rohrball, in the second half, was the star of the local team, his guarding being close and of fine calible. The fact that the school boys only made five baskets in the last period was due principally to Ward's vigilance.

Mowry, captain of the Mexico High was the individual star of his team. He madeg ood each attempt from the foul line, netting his side three points in this way. Only seven fouls were called throughout the whole game.On this account rough and tumble scrimmages resulted. Time was taken out in thefi rst half when one of the Fulton players was fouled, and knocked heavily to the floor.

| Maccebees | | Mexico High school |
|---|---|---|
| Snow | Right Forward | Mowry (Capt) |
| Ives | Left Forward | Gaines |
| Merrill | Center | Orvs |
| Freedman | Left Guard | Jones |
| Rohrbaugh | Right Guard | Stevens |

Substitutions,Ward for Rohrbaugh; Parmeter for Orvis.

### COACH MERRILL TO TAKE SQUAD TO PHOENIX

Coach Merrill will take his first string squad to Phoenix tomorrow night fora g ame with the high school of that place. The men who will take the trip in all probability are Captain Martin, Manager Hopkins, Prof. Berril, Reynolds, Wallace, Frawley, Don O'Brien and Johnson. A large following of rooters will accompany the team.

Due to the splendid showing of his quintet against the Solvay High school, inw hich the players showed the best evidences of team work that has been shown at any time this season, a victory for the local outfit is anticipated.

Although the Phoenix court is one of small dimensions, it is hardly probable that thisw ill inconvenience the visiting team. Close guarding will be carried out, at the direction of the coach, and if the players carry out these instructions, a victory by a wide margin should result.

The Phoenix team is not rated high in the scholastic world. The St. John's team from Manlius rolled up more than 100 points against the neighboring high school. The height of Wallace, the tall center, of thel ocal quintet, should prove of considerable advantage in scoring a victory. All the players are reported ing ood condition with the exception of Reynolds, who last week was injured in a collision with another player. Reynolds may appear in the game in case of an injury to a teammate.

### EXPLOSIVES MAY BE MADE IN OSWEGO

Oswego—The Corn Products Refining company, owners of the Oswego Starch company, has for some time been experimenting with a new explosive for commercial purposes, according to a New York dispatch.

The product will be nitro-starch. The experiments so far have been successful, and further experiments will be conducted. If the company finally decides to go into the business, it will be in a small way at first, and it will be possibly six months hence before it will be turning out the product.

It is estimate dthat it will take at least two years before the company can be turning out the product in a big way.

### ODD FELLOWS INITIATED CLASS OF CANDIDATES

At the regular weekly meeting of the Odd Fellows held last night, a class of candidates was given the second degree. A social session followed the regular routine business.

The entertainment committee was requested to arrange for a Ladies' Night for the near future, in which the program will include card playing, recitations, musical numbers and refreshments.

### 'TWAS A NIGHT OF MUSIC AT MINETTO

A number of musicians from Oswego, Minetto and Fulton last night at the home of Mr. and Mrs. Curtis Dubois at Minetto.

Musical selections were productive of an enjoyable evening. The guests from this city were Mr. and Mrs. Arthur Guernsey and Mr. and Mrs. Merton E. Reynolds.

### NO PENALTIES IF TAXES ARE PAID BEFORE FEB. 17

Property owners who remain delinquent for taxes on thel ast date upon which net payments are allowed by law, are advised by City Chamberlain Adkins that on and after February 17 the usual fine will be exacted.

An auction advertisement in The Evening Times for six days prior to the sale is the cheapest way to advertise a sale. adv.

# FULTON TEAM PLAYED ONEIDA

### Bowlers of the All-Fulton Team Lost Last Night to All-Oneida Team in 5-Man Event But Won 2-Man.

The All-Fulton bowling team, prised of Painter, Feeley, Seymour, Powella nd Rear, although defeated by the All-Oneida outfit in the five-man event, won out handlly in the two men affair through the superior bowling of Rear. Them atch was bowled in Oneida last night on what the Fulton bowlers say, were ideal alleys.

The individual star of the evening was Feeley of the local outfit, whose record of 248 forh igh game and 646 for high total was not equalled by any of theb owlers participating in either event. In thefi rst set, Feeley made the high run of the evening with 248 pins, resulting in a higher total for his team than was accumulated by the Oneida bowlers. Next to Feeley, Rear's consistent bowling in both matches was commenable. In not one of the sets did he fall below the 20 mark, which is considered an A-1 performance.

### STEEL STOCK DISTRIBUTED AS PRIZES AT WHIST PARTY

**Mrs. E. H. Gary Awards One Share to Each of Six Persons.**

Mrs. Elbert H. Gary, wife of the chairman of the United States Steel corporation, entertained with a bridge party at her New York home the other day, the guests including many well known members of society. The prize at each table was one share of United States Steel preferred stock.

Bridge parties are of ordinary occurrence in society, and handsome prizes are given as a rule, but Mrs. Gary's party will go down in social history as something entirely new. in this respect at least. The first intimation that the stock had been awarded as prizes was heard in Wall street, and it was not long before it was being talked about on the Stock Exchange.

The stock given out in prizes, in the aggregate, was worth about $702, as it is quoted at $117 a share. Prizes of much greater value have been awarded at society bridge parties, but it was the novelty that gave significance to Mrs. Gary's awards.

There were six tables and twenty-four players. At the end of the game there was considerable speculation as to the nature of the prizes, as is always the case at any spirited game of bridge. If the women winners expected to receive silver bonbon dishes, powder puff boxes or vanity cases they were no doubt agreeably surprised when they received the stock, indorsed in blank. The stock draws dividends of 7 per cent. The names of the winners are not known.

Mr. Gary confirmed the report of the nature of the prizes at Mrs. Gary's bridge party, but declined to comment on it in any way, saying that it was a private affair.

Mrs. Gary entertains frequently in the winter season at her home, and she gives a bridge party once a year.

### "CYCLONE" WEARS A COLLAR.

**Heeds Wife's Plea and Violates Half His Pledge to Constituents.**

"Cyclone" Davis, representative from Texas, has succmbed to the whims of civilization. He startled his colleagues by appearing on the floor of the house the other day wearing a linen collar and a calico shirt decorated with pink flowers.

When "Cyclone" first came to Washington his only neck adornment was a gray woolen muffler. While campaigning among the farmers of his state he had taken a solemn oath never to wear a collar or necktie. He violated half of his promise to his constituents, because he was minus the necktie.

Davis explained his "change of front" as follows:

"Ever since I came to Washington my wife wept daily because I was dubbed the 'collarless congressman.' This morning when I had finished dressing with my muffler buttoned in place she began to cry. I inquired the reason, and she explained to me. I purchased a collar and a shirt.'

"I don't know what my constituents will say when they hear about this, but anyhow I am going to keep peace in the family, even if I have to break my vow. This is the first collar I have worn in more than twenty years."

### Wisconsin.

Wisconsin has from time to time been an annex of various states. After Ohio was admitted to the union, Wisconsin from 1805 to 1809 formed a part of Indiana territory. From 1809 to 1818 Wisconsin was embraced in the territory of Illinois. When Illinois became a state all the country north of it, including Wisconsin, was joined to Michigan. After more than forty years of shifting, Wisconsin was admitted into the Union with her present boundaries in 1848—St. Louis Post-Dispatch.

STILL A KING!

What?

CO-ORDINATION OF INTERESTS!

Once upon a time a venerable old owl was the chairman of the Bird Congress, as a table runs, and there was a great commotion and much chattering.

At last a long-legged crane got up and offered a resolution, in effect, that the bird which could fly the highest should be made the King. Then all the birds flashed up into the sky, but one by one they tired and dropped down, except the eagle, who flew up higher than the others, and said: "I am King!"

But his reckoning was wrong, as a little wren popped up from the back of the eagle's head, where he had slipped in among the feathers for a free passage into the blue atmosphere, just like a regular little dead-head and he said: "Not a bit of it, Sir Eagle; I am above you and I am still King."

## CHAMBER OF COMMERCE

*"Fulton First, Last and All the Time"*

While a great municipal awakening has been going on in America, with the object of quickening an appreciation of municipal obligation, of making known existing conditions, of familarizing citizens with municipal government, of securing efficiency and encouraging the social forces for betterment, there has been at the same time a tendency everywhere to minimize city functions. The law has determined the powers which a municipality may exercise and laid these down in express words, so that the object of municipal government must be clearly declared for any acts beyond the scope of the powers conferred, and any doubts as to them must be determined by the courts. Exactly the opposite attitude exists in Europe, where the freedom of the city to carry on such functions as it thinks necessary is undenied. Primarily a town is an agency for carrying on local government. As such it is the agent of the people. Secondarily, it acts as the agent of the state. These two functions include all that a city may do or may be called upon to do. In its organization a city exists for the sole purpose of promoting the general welfare, and in order to accomplish such results it must necessarily engage in various enterprises to care efficiently for the welfare of the population. Because it is responsive to the public will, it should be kept clearly in mind that a city cannot respond to the business motive of making profits, and the science of governing a city becomes really a method of doing. As an agent engaged in satisfying local needs the municipality, large or small, must maintain some public utilities, such as means of communication, transportation, thep roviding of light and water, the maintenance of markets, the disposal of wastes, the protection of life, health and property, the direction of charities and corrections, the conduct of education, the providing of recreation in playgrounds and parks, and even the construction and management of municipal housing for a part of the population; all of these fall within the scope of what a municipal body may be expected to do. To do all this however very large amounts of money are needed and for that reason men have been engaged to determine what the property owned by the different citizens is worth and accordingly they areb eing assessed Naturally a city needs new improvements, just as a machine needs repairs sometimes. Especially when the city grows larger, more improvements are needed in the form of paving, lighting, etc., and all that costs money and that is the reason why cities borrow money to defray these expenses. However it is not necessary for a city to improve, all the time; that means that we should look into the future a little bit and not order certain work done for the present, when we know that a few years afterwards we need again to renew this work and that naturally becomes then a burden upon the citizens and our taxes grow higher and higher.

No one however has a kick coming, because it has been proven on many occasions and it will be proven still more that citizens do not take the necessary interest in the running of the affairs of the city and therefor they should not kick when they have to pay, because they can vote the other way or may run for office themselves and do away with all these so called bad things. We admit that the average man has not the time to look after detail work in that particular line and leaves it to the fellows he has voted for, but this does not take away the fact that we are all human and so we are all making mistakes. However we can feel a better movement coming over the country and people seemingly are a little more curious where their money has been spent and how it has been spent.

* * *

It would be a fine thing, if the men in the city of FULTON would not be so everlastingly indifferent and lookafter the affairs of the city a little more. It pays to look out once in a while.

* * *

Women can do sometimes a whole lot to wake the men up. Let's try this in FULTON. Come Ladies what do you say?

* * *

Fulton COULD be one of the best cities in the State; prosperity is all around us. THERE IS A REASON.

# Seneca River Power Co. Fighting to Bolster Up Assumed Rights

A hearing will be given by the Up-State Division of the Public Service Commission to the Fulton Light, Heat and Power company, in Syracuse, on Monday morning, at 10:15 o'clock, upon the result of which hinges the expenditure of a large sum of money.

The hearing takes place before Commissioner James O. Carr, its purpose being to determine the lighting company's right to exercise a franchise granted to the local company by the town of Lysander. The lighting company's plans in the direction of Lysander are extensive, with Phoenix as the objective point. The power line, as proposed, would be extended from the Smith farm at Granby Center, the terminus of the company's line at present, and from that point on to Phoenix, touching at Bowen's Corners, Lysander, Jacksonville, Little Utica and Lamson, giving to the farmers enroute the benefit of electric service, by which many of the duties of the farmer may be lessened.

### No Authority to Erect Poles

It is apparent judging by the way the farmers in the vicinity of the places to be affected by the power line, that virtually no opposition is to be offered at Monday's hearing; with the possible exception of the Fulton company's old rival—the Seneca River Power & Transmission company, whose opposition will be based upon the latter company's right to retain poles set up and still standing in the town of Lysander. These poles are of course the property of the Seneca River company and were erected without going through the legal formality of securing a Lysander franchise. No wires have ever been strung on the poles and, in the opinion of Manager Jordan there is little probability of them being strung.

The hearing will be attended by Attorney R. J. Pendergast, Mr. G. C. Warnen and Manager Jordan, and by the Fulton company's attorney, William P. Gannon. Warners, Costello & Cooney, of Syracuse, will appear in behalf of the Seneca River Power company.

### Farmers Want the Service

The attorneys for the Fulton Light, Heat & Power company, it is stated by Manager Jordan, will demonstrate to the Commissioner the advantages that will accrue to the farmers in the district to be traversed by the proposed line, many of whom "clamored for the extension," says Manager Jordan.

Continuing Mr. Jordan says: "We are particularly anxious to serve the Phoenix Gas & Electric company, who have requested us to furnish them power. Mr. Pendergast, who is connected with our firm, is attorney for the Phoenix company.

"It is well known that the Seneca River Power company whose logical territory is in towns in the vicinity of Baldwinsville and Phoenix, has inconvenienced our company to a great extent by making efforts to enter this city and surrounding towns. We have been unable, for certain reasons, to interfere with certain of the company's operations in this vicinity. Now that we see our way clear to conduct business in the town of Lysander and places farther south, we mean to put forth every effort to do so. We are simply pursuing a course which any house of business would follow if placed in a similar position. The inducements to string wires to the different places are such as will impel us to make haste to furnish the farmers' and manufacturers' needs, as soon as the proper authority is granted."

### NINETY-MILES-AN-HOUR TO BE HIT BY SPEAKER

Secretary Hollenga is credited with being a whirlwind speaker, a man with dash enough to satisfy the most exacting speed demon, etc., etc., and it is said also that he has not yet struck his pace limit. He is going to try for his maximum speed at the smoker to be given by Hiram Lodge, F & A. M., which is to be held in the Masonic Club rooms tomorrow evening. His subject is not announced, but the members need not be afraid of hearing something injurious to their best interests, as "the whirlwind" is for "Fulton, First, Last and All the Time."

### WEATHER FORECAST

**Cloudy tonight and Saturday. Probably snow or sleet. Colder tonight. Moderate to fresh west to northwest wind.**

**An auction advertisement in The Evening Times for six days prior to the sale is the cheapest way to advertise a sale. adv.**

# Mayor Lewis Would Have City's Streets Made Clean in 1917

"When the city budget is prepared for the year 1917, an appropriation will be made for the removal of snow from the downtown streets", Mayor Lewis stated today. While commenting upon an iten printed in The Evening Times concerning the cleaning of West 1st st. by the American Woolen company's employes.

"The matter certainly deserves the utmost consideration," the Mayor continued, "and I would favor any move devised for the elimination of this nuisance. Very little can be done this year owing to the lack of available funds. It will take moret han a few dollars to remove snow and ice from the streets, and I might say, that we cannot pursue the same method as that followed by the woolen company, in their method of flushing the street.

"In the first place, in that neighborhood there is a storm sewer which empties into the river. This sewer will carry off all water which enters into the system but in the downtown section you must understand we have the catch basin system. It does not take much additional water to choke up the sewer and cause it to back up into the cellars of certain business places. This year we will have to settle claims with several merchants for damage done to their stock by the backing up of water in the sewer."

Mr. Lewis discussed the proposition informally with some of the executives yesterday. Today a scraper was placed in service and removed some of the slush remaining after the recent thaw.

# Country Must Change Its Course to Meet Changing Conditions

—PRESIDENT WILSON

New York—Sounding a solemn warning that the world of today is not the world of yesterday, and that no man knows what the world willbe tomorrok, Woodrow Wilson, President of the United States, opened his country wide campaign for preparedness in this city yesterday.

The President had a stirring day, during which he made four speeches, three of them absolutely non-political in their character, but the fourth a straight out plea to the people of the country to support him in thep rogramme of preparedness on which he has embarked.

The President was received with marked enthusiasm everywhere, he appeared. Not only in the halls in which he spoke, but on the streets, as he rode by in his automobile, he was greeted with applause.

To a large meeting of clergymen, made up of representatives of all faiths, the President made a strong plea for peace, but gave a warning in the midst of a most pacific discourse that the American sense of independence was something that other nations had better not drop fire on.

Insistent suffragists during the morning "smoked out" President, in spite of his protests, but all the satisfaction they got was to hear from his own lips that he had not changed in the least in his attitude on a federal suffrage amendment, in spite of the letters, telegrams and petitions with which they have deluged him.

In the evening the President spoke to the members of the Motion Picture Board of Trade at the Biltmore Hotel, but there he eschewed politics religiously, giving instead to the men who make pictures a verbal picture of what it is like to be a President sitting in the White House looking out at the great panorama of events as they pass.

But whatever he lacked of forceful utterance on the subject uppermost in the minds of the American people in those speeches he made up in his address to the members of the Railway Business Association at the Waldorf-Astoria. There the president was in deadly earnest, and the fifteen hundred business men who crowded the flag bedecked ballroom listened as one man and applauded as one man.

In no uncertain tone the President war .ed his listeners that the world is moving fast, and that the American people cannot tell twenty-four hours ahead what crisis they may have to face. Reluctant as our people are and always will be to be the aggressor, he said, there was a point beyond which they could not be molested.

## Odd Happenings In The Day's News

Old kid gloves donated by Montclair (N. J.) women to be used as lining for soldiers' vests.

By fiddling on one string Columbus (Ind.) man hopes to play his way into office of sheriff.

Only meteor known to hit a human being is reported from Japan, where one struck a twelve-year-old boy on the head.

Eel, caught two years ago at Port Jervis, N. Y., that knocked over lamp and escaped with body partly in chimney, has been recaptured still incased in the lamp chimney.

A man's home is where his wife is, White Plains (N. Y.) court decides in case of man who spent six days in Manhattan at business and the other day with wife at White Plains.

Complaint that pet cats and dogs were missing in Bridgeport, Conn., led to discovery of six cat skins back of restaurant in which rabbit stew has been favorite dish of police patrons.

## COMMISSION GOVERNMENT.

### Now in Use in Eighty-one Cities of the Country.

The commission form of government is in effect in eighty-one of the 204 cities of the country of over 30,000 inhabitants. Civil service regulations are applied to the appointment of policemen in 122 such cities, including all those of more than 300,000 inhabitants.

Policewomen are employed in twenty-six cities. Municipal prohibition prevails in fifteen cities, state prohibition in seventeen and county and parish prohibition in three. In fifteen cities certain saloons are licensed to sell malt liquors only.

These are a few of the facts in a report issued by the bureau of the census.

The commission cities are scattered throughout twenty-six states, in addition to the District of Columbia. Five of them are in New England, twenty-seven in other northern states east of the Mississippi, sixteen in northern states between the Mississippi and the Pacific coast states; nine in the Pacific coast states and twenty-four in the south.

The largest city operating under the commission form has been New Orleans, whose population is estimated at about 365,000, but Buffalo, with a population of about 460,000, inaugurated this system with the beginning of the new year. Next in order are Washington, D. C., with nearly 350,000 inhabitants; Portland, Ore., with about 260,000, and Denver, with about 250,000.

The salaries paid municipal commissioners range from $500 a year in Jackson, Mich., and Springfield, O., to $7,000 a year in Birmingham, Ala., and their terms of office vary from one to four years.

## U. BOATS MAY CARRY MILK.

### Submarine For Blockade Running a New but Practical Idea.

Lieutenant Commander Ralph Craft, U. S. N., received a delegation of the citizens' committee for food shipments, who went to the Brooklyn navy yard seeking expert advice on their plan to send condensed milk to Germany by submarine.

"If the submarine were constructed for the purpose," said Craft, "there is no scientific reason why it could not make the voyage across the Atlantic with a cargo. The idea of a commercial submarine for blockade running is new, but practicable."

Dr. Edmund von Mach, chairman of the committee, said he and his associates were determined to get milk to the babies, but had not given up hope of humane concessions on the part of the allies.

## DR. PEACOCK A SUCCESS

The coming of Evangelist Peacock in April will undoubtedly create a wholesome enthusiasm in the church circles of this city. The Mohawk Valley Register of Wednesday reported that 375 people hit the trial when the Reverend Peacock issued his first call on Sunday morning. Following the newspaper's story of the program for that day the following was added:

"Last night again saw a packed house. Enthusiasm ran rampant. In addition to the working girls, delegations were present from the Odd Fellows, the Rebekahs, and from Frey's Bush. The singing was the best yet. Warth and Rev. Watkins sang a duet and got a big "hand" for it. Peacock gave a fine talk in which he didn't mince matters at all but hit out straight from the shoulder. His audience was with him every minute and he was frequently interrupted by prolonged applause.

"You have to like what Peacock says, because of the way he says it. Sometimes it's bitter medicine but most everybody comes back for more."

The local campaign committee is to be congratulated upon securing the services of so capable a man as the Rev. Mr. Peacock and the big tabernacle will no doubt serve as a magnet to hundreds of people in and about the rural districts of this city.

## A TARIFF COMMISSION AT LAST

President Wilson, trailing his party behind him, has now completed another grand circle in policy. Three years ago, when the Democratic leaders were preparing to frame a new tariff law, they were all against a tariff commission. In the preceding Congress they had starved to death the Taft Tariff Board—that poor simulacrum of a commission; with its uncertain and precarious status, created by the Payne-Aldrich tariff act.

The Democratic party stood firm until after the Underwood bill had passed for absolute control by Congress of tariff rates and tariff policy. When the mistakes made in the Underwood revision began to tell on business many Democrats became uneasy. They began to see that a tariff framed by scientific methods and responding to actual industrial conditions would have been safer for the country and safer for the party sponsoring it than a crude piece of guesswork like the Underwood law. Many of them bitterly regretted that they had not cast an anchor to windward by sharing their responsibility as tariff makers with a body of officially recognized experts. President Wilson and Secretary Redfield set up the claim that Congress had really created a tariff board by conferring some of the investigating powers appropriate to such a board on the new Federal Trade Commission and on the Bureau of Foreign and Domestic Commerce of the Department of Commerce. Next the President admitted, in a letter written last year to ex-Governor Cox of Ohio, that it might be better to consolidate these powers in a new and separate body. Now he is out for a simon-pure tariff commission, a commission acting under its own name and in its own right.

The Tribune has fought for years for a real tariff commission. It has criticised Republican failure to create such a body as freely as it has criticised Democratic failure. One of the greatest blunders of the Republican Payne-Aldrich tariff law was its refusal to see that the time had come to put aside forever the old darklantern, logrolling method of tariff legislation. We have argued season after season in favor of treating the tariff as a problem in scientific national administration, instead of ap roblem in placating, without regard to national interest, the selfish demands of individuals, groups, localities and sections. We are glad to see the fight for a tariff commission nearing a successful conclusion. We shall withhold no proper credit from the Wilson administration for recognizing the error of its earlier views and yielding to what has clearly become the settled opinion of the country.

But if this congress is to give us a commission, let it give us a real commission! The country doesn't want a mere advisory board which is to report conclusions to Congress. It ought to have something better—a commission empowered to raise and lower rates within certain limits fixed by Congress. We admire the courage of Senator Robert J. Owen, who, when asked by a fellow Senator whether he favored such a commission, answered bluntly, "Yes." We need a commission with a power and with the prestige which comes with power, if we expect to get tariff-making started along new lines of economic forethought and national efficiency. The tariff cannot be taken entirely out of politics. But it can be taken for good and all out of the mire of merely local and sectional politics.—N. Y. Tribune.

## AN EXPENSIVE LUXURY

The specter of the high cost of living is again prowling round o' nights. The advocates of preparedness in all its forms say that this time something must be done to put the pest out of business for good and all. In New York they have suggested horse meat—not as bait to catch the prowler, but as food for the long-suffering but highly resistant consumer. The health authorities are reported to be favorably inclined toward colt cutlets and Percheron porterhouse, reminding us that Europeans have long found them palatable.

To be sure, we don't want to squirt cold water on this scheme, but we feel it is our solemn duty to call the attention of those who have their salivary glands already primed, to the condition of the horse market. A recent article in a Chicago livestock market paper is headed: "Draft Horse Future Bright; Demand Exceeds Supply. Wayne Dinsmore, Secretary of the Percheron Society of America, also Speaks Optimistically of the Prospect for a Big Business in the Next Few Years."

New Yorkers can have colt cutlets if they want them, but if ecomony is the watchword they should call for something cheap, like canvasback or terrapin. We suggest Percheron porterhouse for the annual banquet of the munitions makers.—Country Gentleman.

## Opinions

### POPULARITY OF CITY PLAYGROUNDS

In the Year Book just issued by the Playground and Recreation Association of America is assembled an extensive body of information pointing to the continued growth of systematized recreation for children in the big population centers of the United States.

During the twelvemonth from November 1, 1914, to November 1, 1915, 432 American cities maintained neighborhood playgrounds under the direction of play leaders. Within the last two years 116 cities have established playgrounds. The number of new playgrounds secured is nearly 1,000, bringing the total number of playgrounds now in operation up to 3,294.

When the Playground and Recreation Association of America was organized less than ten years ago, only a few of the largest cities ever had summer playgrounds, and many of these were supported by private funds.

Now 111 cities employ 1,053 play leaders throughout the year. Reports from 97 cities where the neighborhood playgrounds are open all through the year show 573 year-round playgrounds.

In 250 cities playgrounds, like parks and schools, are administered by the municipality itself. Everywhere city governments are recognizing that the maintenance of neighborhood playgrounds is a true administrative obligation.

Seventy cities maintain classes for training recreation workers. Two thousand one hundred and sixty-four students are reported in 55 of these municipalities. A new profession has grown up. In two years the number of play leaders has increased by 1,189 so that there are now 7,507 workers employed in addition to 1,929 caretakers.—BuffaloTimes.

### THE GRATEFUL IMMIGRANT

A correspondent in Ann Arbor asks a question so far reaching in its implications as to lead to a suspicion that it is to form the subject of one of those college debates which right the wrongs of an afflicted world in the only way in which they are ever likely completely to be redressed. It is: "Does the immigrant owe a debt to this country?"

There will be those who will think that a more propitious time could have been chosen for such a query. But there was never a better time to make clearer a simple fact which is the only possible answer.

Whether or not the immigrant owes a debt to this country can be decided by the immigrant alone. If he feels no obligation, none exists. If he chooses to dwell here, prosper, go and come, it is no concern of the American people as embodied in the Government they have set up. Conformity to the laws they have laid upon themselves is all they will expect. Against this stranger they will put up no bar, if they are of their fathers' faith, for it is of the essence of America that this country is free.

But there are immigrants who feels and manifest gratitude to the country which received them with no special favors or rights but with a kindly openness and a hand that offered them the chance to better themselves. There are immigrants who believe that they received here an opportunity bounded only by the limitations of capacity and the measure of industry and the quality of brains they brought with them. To these, who feel grateful, and to whom the people of these United States acknowledge a debt, this country offers its citizenship, a share in its government and its protection.

The little evil is endured for the greater good. Can the faithless few betray the faithful many?—N. Y. Sun.

### CHARACTERISTIC HUNGER

The Socialists of Schenectady are threatening to remove Mayor Lunn from the party because the Mayor appointed several to office who are not Socialists. The Mayor says that he did this because he couldn't find Socialists as competent as the men he appointed.

But that doesn't make any difference to the Socialist organization. It is as hungry as any other political organization that ever had a taste of power. One can see that favoritism, political loot, spoils and plums would figure in a Socialist State quite as much as politics figure in the common garden variety of parties. The country is receiving an illustration of how far from ideal government Socialists would be.—Utica Observer.

### OUTLOOK FOR LARGER INCOME TAX

Now that the Supreme Court has unanimously affirmed the constitutionality of the Income Tax law Congress is free to go ahead and consider the many suggestions for increasing the revenue from this source.

The proposals for lowering the amount of exemption and increasing the rate upon higher incomes contemplate the raising of anywhere from one hundred million dollars to three hundred millions more than the eighty millions now derived from this source.

There will probably be drastic action, because the constituencies of so many legislators believe that the weight of the income tax should be made to fall mainly upon the rich—as they phrase it, "upon those best able to pay." This method of raising revenue is so "easy" that there is a temptation for Congress to go too far.

At best the tax is objectionable because of its inquisitorial features and the inevitable resort to evasions. To impose an unfair proportion of the burden upon the rich would be to check enterprise and industry and drive capital out of the country —results which react upon wage earners and the poor.

That Congress has the power to impose any taxation short of confiscation is not to be denied, but it is a power that must be exercised justly and in the interests of all. Anything savoring of class legislation would be fatal. Fortunately the intelligence of the mass of the American people can be trusted to hold in check legislators who may advocate in excessive and injudicious exercise of the power to tax.—N. Y. Herald.

## HE WANTS MILK DEALERS IMMUNE

Syracuse —Among the recommendations for 1916 made of Health Officer Sears is that men engaged in the production and distribution of milk for and in Syracuse be required to submit to vaccination as against the possibility of an attack of typhoid fever. And as district sanitary supervisor, representative of the State Department of Health, Dr. Sears has recommended the adoption of such a course throughout the state to the State Health Council.

The municipal health authorities at Rochester are not only requiring typhoid fever vaccination of retail milk dealers, but they are not taking their word for it as to whether they ever had typhoid fever. The health officer of that city is exacting one drop of blood from each one of them. Examination of the blood discloses whether or not they ever had the disease About 60 milkmen, or about 25 per cent. of them, have submitted to inoculation. They were disposed to fight against it at first, but they cannot secure a milk venders' license without submitting and are beginning to admit that vaccination is an insurance, since it makes them immune and guards against a loss of business.

## THE HONOR OF THE ROAD.

SERGEANT CAMERON was undressing for bed when he first heard the voices through the weatherboard walls. In less than a minute there was a knock at his door.

"Here's Mr. Hardcastle from Rosanna, sir. He says he must see you at once."

"The deuce he does! What about?"

"He says he'll only tell you, but he's ridden over in three hours, and he looks like the dead."

"Give him some whisky, Tyler, and tell him I'll be down in two ticks."

So saying, the gray bearded sergeant of the New South Wales mounted police tucked his nightgown into his cord breeches, slipped into his tunic and hastened to the parlor which served as courtroom on occasion, buttoning as he went. Mr. Hardcastle had a glass to his lips as the sergeant entered. He was a very fine man of forty, and his massive frame was crowned with a countenance as handsome as it was open and bold, but at a glance it was plain that he was both shaken and exhausted and in no mood to hide either his fatigue or his distress. Sergeant Cameron sat down on the other side of the oval table with the faded cloth; the younger constable had left the room when Hardcastle called him back.

"Don't go, Tyler," said he. "You may as well both hear what I've got to say. It's—it's Stingaree!"

The name was echoed in incredulous undertones.

"But he's down in Vic," urged the sergeant. "He's been giving our chaps a devil of a time down there!"

"He's come back. I've seen him with my own eyes. But I'm beginning at the wrong end first," said the squatter, taking another sip and then sitting back to survey his hearers. "You know old Duncan, my overseer?"

The sergeant nodded.

"Of course you know him," the other continued, "and so does the whole back country and did even before he won this fortune in the Melbourne Cup sweep. I suppose you've heard how he took the news? He was fuddling himself from his own bottle on Sunday afternoon when the mail came. The first I knew of it was when I saw him sitting with his letter in one hand and throwing out the rest of his grog with the other. Then he told us he had won the first prize of £30,000 and that he had made up his mind to have his next drink at his own place in Scotland. He left us that afternoon to catch the coach and go down to Sydney for his money. He ought to have been back this evening before sundown."

The sergeant put in his word:

"That he ought, for I saw him come off the coach and start for the station as soon as they'd run up the horse he left behind him at the pub. I wondered what had brought him if he was so set on getting back to the old country."

"I could tell you," said Hardcastle after some little hesitation, "and I may as well. Poor old Duncan was the most generous of men, and nothing would serve him but that every soul on Rosanna should share more or less in his good fortune. I am ashamed to tell you how much he spoke of pressing on myself. You have probably heard that one of his peculiarities was that he would never take payment by check, like other people? I believe it was because he had knocked down too many checks in his day. In any case, we used to call him Hard Cash Duncan in Rosanna, and I am very much afraid that when you saw him he must have had the whole of his £30,000 upon him in the hardest form of cash."

"But what has happened, Mr. Hardcastle?"

"The very worst," said Hardcastle, stooping to sip. The three heads came closer together across the faded tablecloth. "There was no sign of him at 7; he ought to have been with us before 6. We had done our best to make it an occasion, and it seemed that the dinner would be spoiled. So at 7 young Evans, my store keeper, went off at a gallop to meet him, and at twenty-five past he came galloping back leading a riderless horse. It was the one you saw Duncan riding this afternoon. There was blood upon the saddle. I found it. And within another hour we had found the poor old boy himself dead and cold in the middle of the track with a bullet through his heart."

The squatter's voice trembled with an emotion that did him honor in his hearers' eyes, and the gray bearded sergeant waited a little before asking questions.

"What makes you think it is Stingaree?" he inquired at length.

"I tell you I saw him on the run, with my own eyes, this morning. I passed him in one of my paddocks, as close as I am to you, and asked him if he was looking for the homestead. He answered that he was only riding through, and we neither of us stopped."

"We'll ride back with you at once," said the sergeant, "and find you a fresh horse if your own has had enough. Run up the lot, Tyler, and Mr. Hardcastle can take his choice. It seems clear enough," continued Cameron, as the trooper disappeared. "But this is a new departure for Stingaree. It's the very thing that everybody said he would never do."

"And yet it's the logical climax of his career. It might have happened long ago, but it's not his first blood, as it is," argued Hardcastle, when he had drained his glass. "Didn't he wing one of you down in Victoria the other day? Your bushranger is bound to come to it sooner or later. He may much prefer not to shoot, but he has only to get up against a man of his own caliber, as resolute and as well armed as himself, to have no choice in the matter. Poor old Duncan was the very type. He would never have given way. In fact, we found him with his own revolver fast in his hand and a finger frozen to the trigger, but not a chamber discharged."

"Yes? Then that settles it, and it must have been foul play," cried Cameron, owning a doubt in its dismissal. "And we mustn't lose a single minute in getting on this blackguard's tracks."

Yet it was midnight before the little cavalcade set out upon a ride of over thirty miles, for arrangements had to be made for a telegram to be sent to the Glenranald coroner first thing in the morning, and to insure this it was necessary to disturb the postmaster, who occupied one of the three weather board dwellings which constituted the roadside hamlet of Clear Corner. A round moon topped the sand hills as the trio rode away; it was near its almost dazzling zenith when they reined up at the scene of the murder. This was at a point where the sandy track ran through a belt of scrub, and the sergeant got off to examine the ground with Hardcastle, while Tyler mounted guard in the saddle. But nothing of importance was discovered by the pair on foot, and nothing seen or heard by their mounted comrade.

They found the station still astir and faintly aglow in the veiled daylight of the moon. A cluster of the men stood in a glare at the door of their hut; the travelers' hut betrayed the like symptoms of excitement; at the kitchen door were more men with pannikins, and odd glimpses of a firelit, white capped face within. But on the broad veranda sat two young men with their backs to a closed and darkened window. And behind the window lay all that remained of an elderly man, whose brown, gnarled face was

They Examined the Ground While Tyler Mounted Guard In the Saddle.

scarcely recognizable by the new comers in its strange smooth pallor, but his grizzled beard weirdly familiar and still crisp with lingering life.

The coroner arrived in some thirty hours, which had brought forth nothing new. His jury was drawn from the men's hut and rabbiters' tents, and after a prolonged but inconclusive investigation the inquest was adjourned for a week. But the seven days were as barren as the first and a verdict against some person unknown a foregone result. This did not satisfy the many who were positive that they knew the person, for Stingaree had been seen a hundred miles lower down doubtless on his way back to Victoria and with his appearance altered in a telltale manner. But the coroner thought he knew better than anybody else and had his way notwithstanding the manifest feeling on the long veranda where he held his court.

As a coach came by on the main road the passengers clambered down and pointed to the spot where they declared Stingaree, the outlaw, committed his first murder.

So jurors and spectators drifted back to hut and tent and neighboring station, the coroner started in his buggy for Glenranald, and last of all the police departed, leading the horse which Hardcastle had ridden home from their barracks and leaving him at peace once more with his two young men. But on the squatter time had told. His table had been full to overflowing through it all, and he sank into a long chair, a trifle grayer at the temples, a thought looser in his dress, as the pugarees of Cameron and Tyler finally fluttered out of sight.

"I think we might have a drink," he said, with a wry smile, to Evans, who fetched the decanter from the store. The jackeroo was called from a stable which had become Augean during the week, and the three were still mildly tippling when the storekeeper came to his feet.

"Good Lord," he cried. "I thought we'd seen the last of the plucky police!"

"You don't mean to say they're coming back?"

"I do, worse luck! Cameron, Tyler and some new joker in plain clothes."

Hardcastle finished his drink with a resigned smile and stood on the veranda to receive the intruders.

"After all, it will stave off the reaction I began to feel the moment they

The Passengers Climbed Down and Pointed to the Spot of the Murder.

had turned their backs," said he. "Well, well, well! I thought I'd just got rid of you fellows, and back you come like base coin."

"You mustn't blame us," said the sergeant, first to dismount. "We couldn't know that Superintendent Cairns had been sent up from Sydney, much less that we should ride right into him in your horse paddock!"

The squatter had stepped down from the veranda with polite alacrity.

"Glad to see you, Mr. Cairns," said he. "I only wish you had come before."

The creature in the plain clothes looked about him with a dry smile and a sharp eye upon the younger men and the empty glasses, as he and the sergeant accompanied Hardcastle to the veranda, while Tyler took charge of the three horses. The fame of Cairns had traveled before him to Rosanna, but none had been prepared for a figure so weird or for a countenance so forbidding and malign. His manners were equally uncouth. He shook his bent head to decline refreshment. He pointedly ignored a generalization of Hardcastle's about the crime, and when he spoke it was in a gratuitously satirical style of his own.

"May I ask, Mr. Hardcastle, if you are the owner or the manager of this lodge in a howling wilderness?"

"I'm sorry to say I am both."

"I am sorry to be one of so many intruders in such a season, Mr. Hardcastle, but I shall not trouble you long. I hope to take the murderer tonight."

"Stingaree?"

"Not quite so loud, please. Who else should you suppose? You may be interested to hear that he has been in hiding on your run for several days, and so have I, within fairly easy reach of him. But he is not a man to be taken single handed without further loss of life; so I intercepted you, sergeant, and now you are both enlightened. Tonight, with your assistance and that of your young colleague, I count upon a bloodless victory. But I should prefer you, Mr. Hardcastle, not to mention the matter to the very young men whom I noticed in your company on my arrival."

Hardcastle had given his word before the request was rounded to that pedantic neatness which characterized the crabbed utterances of the round shouldered dictator.

"That is well," he went on, "for now I can admit you both into my plan of campaign. Suppose we sit down here on the veranda, at the end farthest from any door. Be good enough to draw your chairs nearer mine, gentlemen. It might be dangerous if a fourth person heard me say that I had discovered the murderer's ill gotten hoard!"

"Not you, sir!" cried Cameron.

"Good God!" exclaimed the squatter.

"The discoverer was not divine and indeed no human being but myself," the bent man averred, turning, with mischievous humor from one to the other of his astonished hearers. "Yes there was more gold than I would have credited a sane Scotchman with carrying through the wilds, but the bulk was in small notes, and the whole has been buried in the scrub close to the scene of the murder doubtless to avoid at once the detection and the division of such unusual spoil."

"You are thinking of his mate?"

It was Cameron who had asked the question, but Mr. Hardcastle followed immediately with another.

"Did you remove the spoil?"

"My dear Mr. Hardcastle, how you must lack the detective instinct! Of course I left everything as nearly as possible as I found it. The man camps on the spot or very near it. He lights so fires and is careful to leave no marks, but I am more or less convinced of it. And that is where I shall take him tonight, or, rather, early tomorrow morning."

"I wish you could make it tonight," said Hardcastle, with a yawn that put a period to a pause of some duration.

"Why?" demanded the detective, raising open eyes for once.

"Because I've had a desperate week of it," replied Hardcastle, "and am dead with sleep."

The other carried his growing geniality to the length of an almost hearty laugh.

"My dear sir, do you suppose that I thought of taking you with us? No, Mr. Hardcastle, the risks of this sort of enterprise are for those who are paid to run them. And there is a risk. If we timed our attack too early or too late there would be bloodshed to a certainty. But at 2 o'clock the average man is fast asleep. At a quarter after 1 therefore I start with Sergeant Cameron and Constable Tyler."

Hardcastle yawned again.

"I should like to have been with you, but there are compensations," said he. "I doubt if I shall even stay up to see you off."

"If you did you would sit up alone," returned the superintendent. "I intend to turn in myself for three or four hours, and it will be in the face of all my wishes, sergeant, if you and Tyler do not do the same. No reason to tell him what a short night it's to be; it might prevent a young fellow like that from getting any sleep at all."

They had their simple dinner at half past 7, when the detective took it on himself to entertain the party and succeeded so well that the entertainment was continued on the veranda for the better part of another hour. Doubled up in his chair, abnormal, weird, he recounted in particular the exploits of Stingaree (included a garbled version of the recent fiasco across the Murray) with a zest only equaled by his confident undertaking to avenge the death of Robert Duncan before another day was out. All listened in a rapt silence, and the younger men were duly disappointed when the party broke up prematurely between 9 and 10. But they also had played their part in a fatiguing week. By the later hour all were in their rooms, and before very long Rosanna Station lay lighted only by the full white moon.

Cameron wondered if it could possibly be 2 o'clock, while Tyler sat up insensate with the full weight of his first sleep, when their chief crept into the double bedded room in which the two policemen had been put. He owned himself before his time by an hour and more, but explained that he had an idea which had only struck him as he was about to fall asleep.

"If we hunt for the fellow in the dark," said he, "we may give him the alarm before we come on him. But if we go now there is at least a chance that we may find his fire to guide us. I am aware I said he wouldn't light one there, but everybody knows that Stingaree uses a spirit lamp. In any case, it's a chance."

The sergeant dressed without more ado, as did his subordinates on learning the nature of their midnight errand. Meanwhile the disturber of slumbers was gone to the horse yard to start saddling. The others followed in a few minutes. And there was the horse yard overflowing with moonshine, but empty alike of man and beast.

"I wonder what's got him?" murmured the bewildered sergeant uneasily.

"Old Harry, for all I care!" muttered the other. "I'm no such nuts on him, if you ask me. There's a bit too much of him for my taste."

In his secret breast the sergeant entertained a similar sentiment, but he

And the New Day Found Them at the Farther Gate.

was too old an officer to breathe disaffection in the ear of his subaltern. He contented himself with a mild expression of surprise at the conduct of the Sydney authorities in putting a "towny" over his head without so much as a word of notice.

"And such a 'towny!'" echoed Tyler. "One you never heard of in your life before and never will again!"

"Speak for yourself!" rejoined Cameron, irritated at the exaggeration of their case. "I have heard of him ever since I joined the force."

"Well, he's a funny joker to have shoved over us, a blooming little hunchback like that."

"I always heard that he was none the worse for what he couldn't help, and now I can understand it," said the sergeant, "for he's not such a hunch"—

The men looked at each other in the moonlight, and the ugly word was never finished. A dozen hoofs were galloping upon them, their thunder muffled by the sandy road, and into the tank of moonshine came two horses, hounded by the detective bareback on the third.

"Some one left the slip rails down, and they were all over the horse paddock," he panted. "But I took a bridle and managed to catch one, and it was easy enough to run up the other two."

And even Constable Tyler thought the more of their misshapen leader for the feat.

There was now no time to be lost, for it approached midnight, but the trio were soon cantering through the horse paddock neck and neck, and the new day found them at the farther gate. The moon still poured unbroken brilliance upon that desert world of sandy stretches tufted with salt bush and erratically overgrown with scrub. The shadow of the gate was as another gate lying ready to be hung; for each particular wire in the fence there was a thin black stripe upon the ground. The three passed through and came in quick time upon the edge of that scrub in which the crime had been committed. And here the chief called a halt.

"The two to nail him must be on foot," said he. "You can creep upon him on foot as you never could with a horse. But I will remain mounted in the road and ride him down if he shows fight."

So the pair in the pugarees walked one at either stirrup of their crooked chief, leaving the two horses tethered to a tree, until of a sudden the whole party halted as one. They had rounded a bend in the road with great caution, for they all knew where they were. But only one of them was prepared for the position of the light which flashed into their eyes from the heart of the scrub.

It was a tiny light, set low upon the ground, and yet it flashed through the forest like a diamond in a bundle of hay. It burnt at no little distance from the track, for at a moment it was lost, but it was some hundreds of yards nearer the station than the scene of the murder. The chief whispered that this was where he had found the buried booty, and over half the distance he led the way, winding in and out among the trees, now throwing a leg across his horse's withers to avoid a bole, anon embracing its neck to escape contact with the branches. It was long before they could discern anything but the light itself amid the trunks and branches of the scrub.

Suddenly the horseman stopped, beckoning with his free hand to the pair afoot, pointing at the fire with the one that held the reins, and as they crept up to him he stooped in the stirrups till his mouth was close to the sergeant's ear.

"He's sitting on the far side of the light, but you can't see his face. I thought he was a log, and I still believe he's asleep. Creep on him like cats till he looks up, then rush him with your revolvers before he can draw his, and I'll support you with mine!"

Nearer and nearer stole Cameron and Tyler. The rider managed to coax a few more noiseless steps from his clever mount, but dropped the reins and squared his elbows some twenty paces from the light—a hurricane lamp now in the sharpest focus. The policemen crawled some yards ahead. All three carried revolver in hand. But still the unsuspecting figure sat motionless, his chin upon his chest, the brim of his widewake hiding his face, a little heap of gold and notes before him on the ground. Then the superintendent's horse flung up its head. Its teeth champed upon the bit; the man sat bolt upright, and the light of the hurricane lamp fell full upon the face of Hardcastle the squatter.

"Rush him, rush him! That's the man we want!"

But the momentary stupefaction of the police had given Hardcastle his opportunity. The hurricane lamp flew between them, going out where it fell, and for a minute the revolvers spat harmlessly in the remaining patchwork of moonshine and shadow.

"Get behind trees! Shoot low! Don't kill him!" shouted the chief from his saddle. "Now on to him before he can load again! That's it! Pin him! Throw your revolvers away, or he'll snatch one before you know where you are! Ah, I thought he was too strong for you! Mr. Hardcastle, I'll put a bullet through you myself if you don't instantly surrender!"

And the fight ended with the bent man leaning in his stirrups over the locked and swaying group as he brandished his revolver to suit deed to word. It was a heavy blow with the long barrel that finally turned the scale. In a few seconds Hardcastle stood a prisoner, the handcuffs fitting his large wrists like gloves, his great frame panting from the fray and yet a marvel of monstrous manhood in its stoical and defiant carriage.

"For God's sake, Cairns, do what you say!" he cried. "Put three bullets through me and divide what's on the ground between you!"

"I half wish we could for your sake," was the reply. "But it's idle to speak of it, and I'm afraid you've committed a crime that places you beyond the reach of sympathy."

"That he has!" cried the sergeant, wiping blood from his gray beard. "It's plain as a pikestaff now. And to think that be was the one to come and fetch us the very night he'd done it! But what licks me more than anything is how in the world you found him out, sir."

The hunchback looked down upon the stalwart prisoner standing up to his last inch between his two captors. There was an impersonal interest in the man's bold eyes that invited a statement more eloquently than the sergeant's tongue.

"I will tell you," said the horseman, smiling down upon the three on foot. "In the first place, I had my own reasons for knowing that Stingaree was nowhere near this place on the night of the murder, for I happen to have been on his tracks for some time. Who knew all about the dead man's stroke of luck, his insane preference for hard cash, the time of his return? Mr. Hardcastle for one. Who swore that he had met Stingaree face to face upon the run? Mr. Hardcastle alone. There was not a soul to corroborate or contradict him. Who was in need of many thousand pounds? Mr. Hardcastle, as I suspected, and as he practically admitted to me when we discussed the bad season on my arrival. I was pretty sure of my man before I crossed the boundary fence, but I was absolutely convinced before I had spent twenty minutes on his veranda."

The prisoner smiled sardonically in the moonlight. The policemen gazed

The Crooked Superintendent From Sydney Was Sitting Strangely Upright In His Saddle.

with awe upon the man who had solved a nine days' mystery in fewer hours.

"You must remember," he continued, "that I have spent some days and nights upon the run. During the days I have camped in the thickest scrub I could find, but by night I have been very busy, and last night I had a stroke of luck. I stumbled by accident on a track that led me to the place I had been looking for all along. You see, I had put myself in Hardcastle's skin, and I was quite clear that I should have buried a lapful of gold and notes somewhere in the bush until the hue and cry had blown over. Not that I expected to find it so near the scene of the crime—I should certainly have gone farther afield myself."

"But I can't make out why that wasn't enough for you, sir," ventured the sergeant deferentially. "Why didn't you come in and arrest him on that?"

"You shall see in three minutes. Wasn't it far better to catch him red-handed, as we have? You will at least admit that it was far neater. I say I have the place. I say we are all going to it at 2 in the morning. I say let us sleep till a little after 1. Was it not obvious what would happen? The only thing I did not expect was to find him asleep with the swag under his nose."

Then Hardcastle spoke up.

"I was not asleep," said he. "I thought I was safe for an hour or two, and I began to think. I was wondering what to do—whether to cut my throat at once"—

And his dreadful voice died away like a single chord struck in an empty room.

"But Stingaree," put in Tyler, in the end. "What's happened to him?"

"He also has been here. But he was many a mile away at the time."

"What brought him here?"

The crooked superintendent from Sydney was sitting strangely upright in his saddle. His face was not to be seen, for his back was to the moon, but he seemed to rub one of his eyes.

"He may have wished to clear his character. He may have itched to uphold the honor of that road of which he consider himself a not imperfect knight. He may have found it so jolly easy to play policeman down in Victoria that he couldn't resist another shot in a better cause up here. At his worst, he never killed a man in all his life. And you will be good enough to take his own word for it that he never will!"

He had backed his horse while he spoke. He turned a little to the light, and the eyeglass gleamed in his eye.

The young constable sprang forward.

"Stingaree!" he screamed.

But the gray sergeant flung his arms round their prisoner.

"That's right!" cried the bush ranger as he trotted off. "Your horses and even your pistols are out of reach, thanks to a discipline for which I love you dearly. You hang on to your bird in the hand, my friends, and never again misjudge the one in the bush!"

And as the trees swallowed the cantering horse and man, followed by a futile shot from the first revolver which the young constable had picked up, an embittered admiration kindled in the captive murderer's eyes.

"LITTLE SERVANTS IN THE HOUSE"

These modern and efficient household helps, including ELECTRIC GRILLS, WASHING MACHINES, VACUUM CLEANERS, FLAT IRONS, PERCOLATORS, Etc., Etc., are being shown at our office and salesroom, 103 Oneida street.

Demonstrations may be had at any time, in the office or in your home by appointment.

### HIGH SCHOOL GRAD. ENTERS MARINE CORPS

The many friends of Eugene A. Cushman of this city, will be pleased to learn of his application and acceptance for service in the United States Marine Corps. The applicant passed perfect in both physical and mental examinations. He left Syracuse Wednesday, bound for the training station at Port Royal, S. C.

Mr. Cushman is a graduate of Fulton High, 1913, and very popular with the younger people. Since graduating he has been engaged in contracting work in various parts of the State.

His many friends here wish him the best of success in his new undertaking.—[Contributed.]

### BUFFALO SUNDAY FUND RAISED IN 5 MINUTES

Buffalo—It took five minutes to raise $11,560 for the Billy Sunday campaign which will be held here April-May, 1917, when 60 members of the guarantee-fund committee met at a dinner last night at the Central branch Y. M. C. A. It is expected to raise $35,000 which will underwrite all the expenses of the campaign and yesterday's showing was a good start toward the desired amount.

# CHANCE TO LEARN ABOUT POULTRY

**Cornell Gives New Poultry Association Opportunity to See Practical Work—Many Lectures Included.**

A brief but inclusive course in poultry husbandry has been provided for farmers' week visitors at Ithaca this year, from February 7 to 12, according to an announcement from Cornell. The poultry authorities at the college of agriculture announce that more than thirty lectures will be given during the week, and that practical demonstratioons, educational exhibits, laboratory practice courses, educational guessing contests and other instructive and entertaining features have been arranged. It is also stated that the federation of New York state poultry associations will hold a convention in connection with the exercises on Wednesday, February 9.

The subjects to be treated cover a wide field of poultry raising, and include lectures on the standardization of poultry products, brooding systems feeding for fattening for egg production and for rearing; also, poultry anatomy, selecting breeders, killing, picking and packing poultry, testing, grading and packing eggs, development of the embryo chick, poultry diseases, cost accounting records, crop rotations on a poultry farm and many more subjects of a similar character.

Practical demonstrations will be given in the selection of birds for egg production and breeding and in the preparation of birds for market. The opportunity for visitors to obtain direct experience in laboratory work is said to be one of the important features of thep rogram. This work will include practice courses in the more important subjects treated in the lectures. A number of contests for prizes are to be conducted in the killing and picking of poultry, judging eggs and judging birds, and will follow the laboratory courses.

There will be a breed exhibit, contributed by many of the best known fanciers of the state, displaying one pair each of many standard, non-standard and some rare varieties of poultry. An exhibit of pure-bred commercial poultry, consisting of ten females and one male of any variety and strain which has been bred for productive as well as standard qualities, will be judged and ribbons awarded thep rize winners. A show of market eggs representing a number of different breeds and which have been ntered in competition by prominent poultrymen of the state will also be judged during the week and cash prizes given.

Special displays of student and departmental work, mounted specimens showing the development of the chick during incubation, a new Cornell tropnest, many types of brooders, the Cornell wind bffler, a new automatic device for ventilating poultry houses, a breeding labyrinth, and other appliances of interest to poultrymen will be on view throughout the week.

# JENO CASE TRIED TODAY

A hearing which occupied the entire morning fook place in the law offices of Piper & Pendergast today evolving from the filing of the suit of Frank Jeno, an infant by his guardian ad item, vs. the D. L. & W. Railroad through injuries received in the disastrous railroad wreck which occurred two years ago south of this city and which resulted in the death of several people including the engineer of the train and injuries to a number of the passengers.

The case is being tried in the Southern District of New York. Attorney R. J. Pendergast was appointed as referee by a judge of that court to hear the evidence of witnesses who testified today in the presence of Charles B. Byrne, attorney for the railroad company, and Attorney Thomas Woods, of Syracuse, who is representing the plaintiff. Among the witnesses sworn were Ward Southard, Dr. Kennedy, M. Hall, a photographer from Syracuse, John J. Stevenson, and others.

There were seven witnesses in all and the testimony offered by Mr. Stevenson was considered of the most importance.

The reference was called by the railroad company to show that green lights were displayed at the switch where the accident occurred. Photographers and the lock which had been tampered with were also produced.

### FULTON BREEZES BLOW PROSPERITY

Even the little breezes whisking about out city have caught the idea of helping Fulton.

This morning some of these little zephyrs balancing themselves on the street overheard a remark that because of the "beastly weather" trade was slow. So they hied themselves away for consultation and later stationed themselves on Upper Broadway bridge and waited.

About 2 p. m. an embroidery salesman of neat attire tripped across the bridge, but when midway over the little watchful, helpful, zephyrs lifted the lid from the salesman's dome and the majestic Oswego river did the rest.

Yes, Ignatz, them an bought a hat in Fulton. Mr. Lipsky, Clothier, he of the genial countenance, supplied the man with his newest need.

Hurray for Fulton zephyrs! adv

### STEEL TRAPS MAN'S MOST CRUEL DEVICES

Societies for the Prevention of Cruelty to Animals are waging a campaign against trapping cruelties.

There is a law that covers all such cases, also, and it is well for the small boy and the grown-ups in the country and arount the city who set traps along the country brooks to have a care.

The Massachusetts Society for the Prevention of Cruelty to Animals sends out a circular containing the most compelling argument for a greater regard for the suffering of the lower animals. Numerous illustrations from photographs taken of trappers who have caught the fur-bearing animals in the "steep trap—man's cruelest device," are shown in the circular. Animals are shown with a wail of agony, standing in the snow with a crushed foot in the trap.

Other actual photographs show the stump of the leg gnawed off by the wild creature in order that it might escape from its torture and captor. And others demonstrate the cruelty fully killing the trapped animal at first opportunity is holding the trap by the chain while the animal suffers, not only from the pain of the mained foot but from the terror of being unable to get away from his worst enemy—the trapper.

### GRANGE TO PRODUCE DRAMA, "WOMAN'S HONOR"

On Friday evening, February 4, and Saturday evening, the members of Mt. Pleasant Grange will give a drama, entitled: "A Woman's Honor." There will be four acts. The following are thec ast of characters:

Gen. Mark Lester, Frank Fairbanks; Pedro Mendez, George A. Parker; Dr. Garcia, Isaac L. Haleffi Gilbert Hall, M. D., Charles Parker; Robert Glenn, Charles Potter; Gregory Grimes, George Peckham; Ebenezer, B. L. Howard; Olive, Mrs. Myrtis Hill; Sally, Mrs. Richard Vant; Martha, Mrs. George Peckham.

# Planning Demonstration Schools For Farm Homes

The New York state college of agriculture has just issued a publication which tells what a farm home demonstration school is, and how ac community may secure one if it so desires.

These schools are held by the college in cooperation with the United States Department of Agriculture under the Smith-Lever Act. At present it is stated, it is impossible to grant all the requests for schools, and those communities are served first which show the keenest interest in the work, and which have not already received the special benefits of the institutions.

The reading course states that farm home demonstration schools are held between October first and June first. If a demonstration school in agriculture is to be held in the community and a school in home economics is desired, it is a good plan to arrange for them to be held at the same time. A school may be obtained, it is said, if twenty-five women of the community pledge themselves to attend. They should then apply to the department of home economics of the New York state college of agriculture at Ithaca for material to organize the school. On receipt of the application, it is stated that the department will send pledge cards to the local committee. These cards should be filled out by persons who are planning to attend the school. The payment of seventy-five cents, to help defray expenses, with the return of the pledge card to the local committee entitles the signer to membership in the school, which begins on Monday and lasts through Friday. The session opens at 1:30 or 2, and lasts about two and one-half hours.

For the community where a demonstration school has never been held before, the college offers, as a sample outline of the work, the following program: Monday, the needs of the body and how these are met by the food materials; water, sugars, and starches in the diet; cereals. Demonstration: rice cookery. Tuesday: Fats and fatty foods in the diet. Milk as a food. Demonstration: Some things one cup of milk will make. Wednesday: Nitrogen in the diet. The cooking of meats. Demonstration: Pork chops; how tom ake and use a simple fireless cooker. Thursday: Why we need to supply material matter in the diet. Demonstration: Salads. Friday: Planning meals. Demonstration: Desserts.

If the community has had a demonstration school before, the college states that the work is devoted to more detailed instruction along similar lines.

A copy of the reading course, farm home demonstration schools may be obtained by any resident of New York upon application to the New York state college of agriculture at Ithaca.

**Horse for Sale**—511 State st., Fulton, N. Y. 344c

## FINNEGAN SAYS BILL DOESN'T ADD POWER

Buffalo—"This bill doesn't give to the State any more power over schools than it ever possessed," Dr. Thomas E. Finnegan of the State Department of Education, said concerning thep roposed general school bill, last evening just before returning to Albany. "What it does is to give power to the school boards in respective cities and towns to maintain and manage their schools without running down to Albany time after time to obtain legislation to allow them to manage their own acairs."

He declared that if any person could show him where the bill conferred additional powers upon the State, he was ready to modify or abandan the bill. Dr. Finnegan left here confident that the bill will pass. It will be transmitted to the Legislature within ten days.

## PAPER COMPANY PROTEST HEARD

Albany—A frank admission of the difficulty of exact science in railroad rate making marks an opinion of Commissioner Frank Irvine upon which the up-state Public Service company against a switching charge of 30 cents a ton proposed by the Boston & Maine Railroad for pulpwood and other materials received over the Delaware & Hudson lines at Mechanicville, N. Y., for delivery to the large paper plant located on the B. & M. line tracks in the same village. The Commission permits a rate ot 15 cents per ton, $3 per car minimum. Commissioner Irvine finds that while this rate cannot be determined by the exact cost of the service. it is just to both sides and should not be objectionable to the railroad as rejecting items of cost which the road was unable to prove to his satisfaction, the rate will be ten per cent above the estimated cost.

While finding that the old rates for the service are undoubtedly too low, Commissioner Irvine makes a careful analysis of the cost figures submitted by the railroad to justify its 30 cent rate and rejects certain items which the road has not proven as chargeable against this switching service. He allows the railroad such items of cost as can be definitely determined, such as the wages of the switching crew, the cost of their engine, etc. But on the items for "overhead" in which the company included six per cent on the entire cost of its large Mechanicville switching yard—used to classify through frieght and only incidentally for switching the cars of pulp—he finds that the respondent should not be charged with a proportion of this whole overhead expense.

## Community Notes

Miss Florence Stevens of West 11st st., left today for Utica where she will be the guest of friends for a week.

* * *

Circle No. 7 of the First Methodist church will hold a food sale tomorrow afternoon at Druse's hardware store.

* * *

Mrs. R. Hill entertained the newly formed P. B. C. club yesterday. Mrs. Lay Palmer was elected president and Mrs. Irving Galusha, secretary.

* * *

Mrs. W. L. Forsyth is ill at her home in Park street.

* * *

Tonight the Citizens Club will observe ladies' night Dancing, music, and refreshments will constitute the evening's program.

## FINES TURNED OVER TO STATE

"It is true the state needs money for them aking and repair of highways, but the expense of state highways is no more in proportion than the expense which falls upon municipalities for maintaining their streets. They have to bear the expense of opening, paving and maintaining their streets and public places and also of a police force for the purpose of regulating traffic thereon. They also pay their proportion of thes tate taxes."

Justice Chester, presiding in Supreme Court at Albany, thus held in the case prosecuted for the state against the City of Buffalo, which not only claimed, but withheld from the state the fines collected in Buffalo City Court for violation of the motor vehicle law and municipal ordinance regulating motor vehicles.

The city conceded it was liable for $3,350.50, collected for violations of the state highway law and Justice Chester directed judgment for that amount in favor of the state.

The court sustained, however, the city in claiming the $17,832 collected since August 1, 1910, in fines from violators of ordinances which relate to and regulate motor vehicles. Justice Chester's decision affects every city in the state, it is admitted, since he holds that: "I am clearly of the opinion that if the Legislature desired to reach out and bring into its treasury the fines collected for violation of these local ordinances in the faces of theu sual measure of home rule in that respect which has heretofore obtained, it should do so by language that is free from any doubt."

Justice Chester also wrote that "if the public policy which has heretofore obtained of permitting the municipalities of the state to have the fruits of their efforts to enforce local laws and ordinances is to be changed by the Legislature, language should be employed in its enactments which clearly expresses that purpose. That has not been done in this case."

# AN ARMY CANNOT BE RAISED HIGHER IN QUALITY

## THAN ITS GENERAL AND COMMANDING OFFICERS

Neither can a city rise higher than its leaders, constantly on the field, directing each day's plans and work.

Every hour has its duty for the leader who needs to see for himself that the steering gear is working right.

We cannot have proxies---they are unequal to it, and the people have to be safeguarded, and to hold the leaders of a government to strict accountability for everything done.

# FOR YOUNG FOLKS

### A Youthful Horse Lover at the New York Show.

### EXPERT DRIVER AND RIDER.

**Miss Frances Ottley Is Skilled With the Reins and In the Saddle—Puzzles, Games and Other Things of Interest to Small People.**

Children of the rich play a prominent part in the annual horse show held in New York. Most of the boys and girls of society are skilled drivers and equestrians and enter their drivers and saddlers in the competitions. Ponies are always an interesting feature of the show, but many of the little people are not satisfied with the smaller mem-

© by American Press Association.

MISS FRANCES OTTLEY.

bers of the equine world and drive and ride full sized horses. Miss Frances Ottley, daughter of Mr. J. H. Ottley, drove her fine mare Netty in one of the competitions and came out with a ribbon as a prize for her pet and her skill in handling the ribbons. She is also very much at home in the saddle, and when she adds a few years to her age she will probably be heard from as a follower of the hounds. It is a good thing for children to know horses and to love them, but most young people do not have the opportunities for this that come to the boys and girls of rich people.

**Game of Elements.**

A very interesting game to play is "the elements." The players sit in a circle, and the game is begun by one of them throwing a rolled up handkerchief to another and at the same time calling out the name of one of the four elements—air, water, earth or fire.

If "air" is called the player to whom the handkerchief is thrown must at once mention some creature that flies. Having done so, she throws the handkerchief to some one else, calling perhaps "earth," whereupon that player must mention an animal that inhabits the earth, and so on. The same animal must not be mentioned twice, and when "fire" is called the player to whom the handkerchief is thrown must keep silent until she throws it again. Each player after throwing the handkerchief and calling the element counts ten as the limit of time in which the answer must be given. If it is longer in coming or if something is mentioned which has been mentioned before then a forfeit follows.

**Kling, Klang, Kaloosh.**

This game is lots of fun, and it is better to play it in the open. One player is "it." He gives the boundary lines—for instance, one side of the street and the other side of the street. He himself stands in the middle. The other players stand over on one side, and he calls "Kling, klang, kaloosh!" The players must run over to the other side without being caught by "it."

If any one is caught he must help "it" to catch the others. The players keep on running across until all are caught, and then the first one caught is "it" for next time.

**Cover Up.**

Late one night, when all was still,
Creeping o'er a window sill,
Came some brownies wee—
Just exactly three.
They hopped inside and looked around,
And sleeping on a bed they found
A little boy asleep—
Asleep in slumber deep.
They jumped right in upon his bed
And pinched his feet and pinched his head.
Then to this boy they said:
"Cover up from head to toe,
For the wintry winds will blow,
Blow you out of bed.
Now, don't you kick the covers off.
If you do you'll sneeze and cough.
So snuggle down away from harm,
Beneath your blankets soft and warm."
—Philadelphia Record.

**Transpositions.**

1. Transpose a color and find a poet.
2. Transpose the action of the tide and find a wild animal.
3. Transpose to be competent and find where Napoleon was once held prisoner.
4. Transpose swiftness and find ocean depths.
5. Transpose a portion and find a snare.

Answers.—1. drab-bard; 2. flow-wolf; 3. able-Elba; 4. speed-deeps; 5. part-trap.

# FOREST KING FALLS.

**Oregon Loses Giant Spruce Said to Have Been 4,000 Years Old.**

Nehalem, Ore.—The Nehalem forests have lost a king. A giant spruce tree that is estimated to be nearly 4,000 years old has fallen a victim to the havoc of a storm.

This representative of the earliest of Oregon trees measured some nineteen feet at the point where it was broken. Throngs continue to visit this fallen wonder of wonders, and not a few in awe have attempted to count the numberless rings by which its age is computed by scientists.

At Watseco a huge cedar tree holds a place of honor among the attractions. It is seventeen feet in diameter and is said to be about 2,000 years old.

The Nehalem country claims some unequaled records for the age of Oregon native trees. The violence of the gales sweeping up into the God's valley district have laid low many woodland lords.

# BY WAGON 1,700 MILES.

**Two Families Travel From Ohio to Southern Texas.**

Austin, Tex.—Traveling in a "pioneer" wagon, such as were used many years ago, two families passed through Austin recently en route to San Antonio. Three horses were used to pull the vehicle. These two families have thus far traveled 1,700 miles in this wagon, coming from Washington Court House, Fayette county, O.

The travelers left Ohio on July 27, 1915, and have been on the road ever since. They consist of Jacob D. Dane, his wife and their son, Walter, and Ralph Wolf and wife and their two children. In reaching Texas the party traveled through Kentucky, Tennessee, Georgia, Mississippi, Arkansas, Oklahoma and Texas. They expect to settle at San Antonio. Three horses pulled the wagon the entire distance.

# ON 25 CENTS A DAY HE GOES TO COLLEGE

## Georgia Youth Lives Alone In Self Made Shack.

Savannah, Ga.—A youth eighteen years old is living at the Georgia School of Technology and acquiring an education on 25 cents a day. On the school register he is marked as "H. S. Cole, Co-op," and he has built a shack on a nearby lot, where he sleeps and eats and cooks his own food. He pursues his studies during his spare minutes.

Cole works two weeks a month for the Atlanta Steel company, and on what he earns during this period he goes to school for two weeks at the school. His pay check at the steel factory is $12 every thirty days. That suffices to pay for his food, his tuition and his books. He doesn't have any incidentals. When he feels the need of a little recreation he indulges in an hour or so of trigonometry. He is a son of D. C. Cole, formerly assistant postmaster at Atlanta, now living at Marietta.

"It was just a few days before school opened that I found there was to be no more college for me," said the student. "I knew about the 'co-op' student, and the idea occurred to me that I might put up a shack and live in it and be independent. I came down from Marietta and went to see Mr. Peters and asked him if I might build some sort of place on his land that I could live in, and he said I could."

The shop instructors helped him, and the school gave him a door and a window. Otherwise the house was built by Cole alone. As far as essentials go, it was finished in three days.

Cole sits over an oil lamp and studies while the winds beat a tattoo on his homemade house and apparently tries at times to blow both house and owner away. He gets up at 6 o'clock in the morning to cook his breakfast and wash his dishes, and he reaches his classes as fresh and smiling as students from dormitory or home.

During the two weeks he works at the steel mill Cole's rising hour is 5 o'clock. Then he gets breakfast and walks to the mill. He works ten hours a day and studies at night.

"What are you going to do with yourself?" he was asked.

"I haven't decided yet," he answered. "Maybe I'll be an electrical or mechanical engineer, perhaps a farmer. All I've decided just now is that I want a college education."

# OSAGE INDIANS CITIZENS.

**2,229 Added to Oklahoma's Population by Court's Decision.**

Pawhuska, Okla.—Oklahoma received a gift of 2,229 citizens, each of whom is worth about $30,000, when Federal Judge Henry Hudson handed down a decision holding that all Osage Indians were full citizens of the United States and as such were entitled to all rights granted in the Fourteenth amendment.

The decision gives the members of the tribe complete control over their personal property, but does not affect their real estate holdings.

**Red Heads Good Citizens.**

Evansville, Ind.—Neal Kerney, coroner, has added to the weight of testimony as to the good citizenship of red headed persons. None of them is in jail here or in the divorce courts, and the coroner says he does not recall that any red headed person has ever committed suicide here.

# COLLEGE MEN FAIL IN QUIZ ON WAR

## Test Shows Students Are Ignorant of Current Events.

## MANY LUDICROUS ANSWERS

**Exabinations In Three Institutions Result In College Authorities Seeking Corrective Measures to Overcome Deficiency—Believe Students Are Indifferent to European Affairs.**

New York.—Whether the ignorance of the college student of today is representative of a growing indifference on the part of the American public toward events, persons and places intimately associated with the European war is a question which college and university authorities are investigating as a result of examinations recently held under the auspices of three representative institutions. As an immediate result of the recent quiz on contemporaneous events conducted at New York university, where an average grade of 58 per cent was the rating shown by fifty-nine students, several members of the faculty are looking for corrective measures to overcome this deficiency.

It was stated by a member of the department of history at the New York university that he believed the apparent indifference of students toward the present war was indicative of a general tendency on the part of the public to neglect a close study of affairs in Europe. That the surprising lack of information of affairs immediately connected with the war was not peculiar to students at any university was further expressed as the opinion of Professor A. H. Nason, assistant professor of English at New York university. Professor Nason, who submitted twenty-one questions to students in his various classes, pointed out that the questions used have also been submitted to students of two other institutions—a middle western state university and Bowdoin college—where the results were about the same.

Dean Kenneth C. M. Sills of Bowdoin college is quoted as saying, "I do not think college men of New England colleges are very steady newspaper readers," and referred to the matter as "lamentable, but not surprising."

Some of the questions asked by authorities at both Bowdoin college and New York university received answers which in many cases were ludicrous. At Bowdoin out of a class of fifty-three students twenty were ignorant as to the location of Gallipoli, which in many cases was put variously in Italy, France, Bulgaria, Greece and Berlin. New York university students answered the same question with apparently as little accuracy.

The French General Joffre was variously designated by students at both institutions as "Joffree," "Joffery," "Geoffrey" and "Jeofrey," indicating a general unfamiliarity with even newspaper headlines. The question, "Who is Venizelos?" resulted in similarly ridiculous answers. Some recollected the ex-premier of Greece as a Spanish artist, another said that he was a Mexican rebel, while still another designated him as the premier of Italy. When asked "Who is the present ruler of England?" several students replied variously King Edward, George III., IV, or VI. as the correct information.

In the department of history at New York university Assistant Professor Theodore F. Jones submitted current questions to a class of students in European history, among which was the query, "Where is Christiania?" Only two students knew its location, in spite of the fact that the daily papers of the day before all contained long accounts of the landing of the Ford party at that city. One student of the same class half seriously answered the question, "Who is Sir Douglas Hague?" by stating that he would answer the question correctly if told where the other "Haig" was.

Of the fifty-nine students taking the examination at New York university none answered all of the inquiries correctly, while only three obtained a grade above 90 per cent. Of a class of twenty-three freshmen nine failed, while the average rank was 63 per cent. Another class of the same number of freshmen averaged only 52 per cent, and thirteen failed to pass, while a class made up of upper class men did as poorly and averaged a grade of only 61 per cent.

# ADVERTISING GETS WIFE.

**Virginia Man Courts by Mail and Marries Indiana Woman.**

Hymera, Ind.—Thomas Bond Buchanan, aged forty-five, a wealthy farmer of Petersburg, Va., advertised for a wife, and he found one.

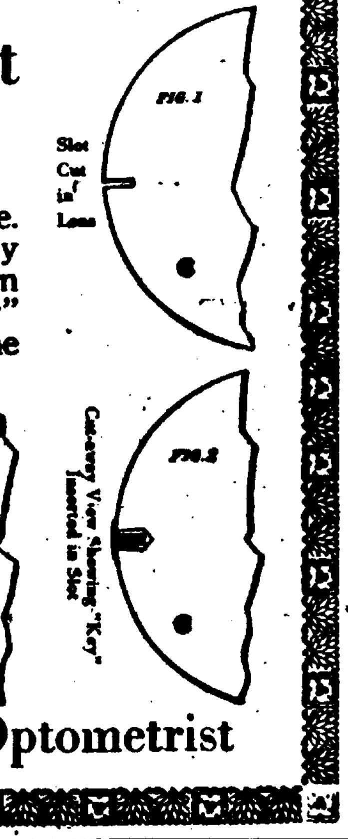
After a few months of courtship by mail he came here to see his sweetheart. Each was pleased with the other's manner and appearance, and they were married. The bride was Jennie Stewart, aged forty-three.

**Banker Sees Play Sixty-ninth Time.**

Appleton, Wis.—Herman Erb, president of the First National bank, saw "Uncle Tom's Cabin" for the sixty-ninth time lately. He has not missed the play in over thirty-five years, and although seventy-two years of age he says it grows on him each time he sees it.

Don't Worry About Broken Lenses

Most lenses break at the screw hole. The screw cannot be made perfectly tight—the glass won't stand it—so when the glasses are dropped this small "play" cramps the lens and breaks it. The Kee-lock fastening fits perfectly and is heat cemented—lens is just as strong at the fastening as at any other part.



May we show you the Kee-lock?

Children Cry FOR FLETCHER'S CASTORIA

## MR. VICTOR HERBERT'S LIFE A STRING OF SUCCESSES

The career of Victor Herbert, composer, is a most enviable one. Born in Dublin and educated in Germany, he first become prominent as a cello player with the court orchestra. Stutigart.

In 1886 he was cello player in the Metropolitan orchestra, New York, and in 1894, become bandmaster of the 22nd Regiment band, New York, and subsequently conducted the Pittsburgh orchestra.

In 1904 Mr. Herbert formed his own orchestra, with which he toured all over the United States. He is composer of the following operas and musical pieces: "The Captive;" Prince Anadias," "The Wizard of the Nile," "The Gold Bug," "The Serenade," "The Idols Eyes," "The Fortune Teller," "Cyrano de Bergerac," "The Singing Girl," "The Ameer," "The Viceroy," "Babes in Toyland," "Babette," "It Happened in Nordland," "Alice and Eight Princesses," afterwards renamed Wonderland. "Miss Dolly Dollars,""The Red Mill," "Mlle. Modiste," "The Tattooed Man," "The Song Birds," "Algeria," "The Prima Donna," "Little Nemo," "The Only Girl," and "The Princess Pat."

His latest work, "The Princess Pat," is said to be a veritable triumph. It will soon be heard in this city at the Quirk. Date and full particulars will be announced later in these columns.

## TO LECTURE ON LIFE OF OF ABRAHAM LINCOLN

Schenck Post, G. A. R., and William J. Pentelow Camp, S. of V., have accepted an invitation extended by the Rev. J. W. Barrett, pastor of th First M. E. church, to attend an illustrated lecture bearing upon the life of Abraham Lincoln, Sunday evening, February 13, at 7 o'clock. Members of the Post and Camp are expected to meet at headquarters promptly at 6:30 o'clock, and from there march in a body to the First M. E. church.

## Those You Know

Mrs. Ottman, of 312 Utica st., entertained the Bethany class of State Street church this afternoon.

• • •

If it were not for having the poor with us at all times it might be well to have a poor day.

• • •

Mr. C. Hobbie, of Cayuga st., left today on a trip of business, making Oneonta his first stop. Delawara county points will also be included in the trip.

• • •

Mrs. William Loughrey, of Highland st., is ill.

• • •

The Y. P. S. C. E. members of the Baptist church will have charge of the services tonight

• • •

The What-so-ever Society met with Mrs. Cooper, corner Fourth and Utica this afternoon.

• • •

Mr. and Mrs. Charles E. Stevens, of Worth st., entertained a number of iintimate friends last evening.

• • •

Mr. Roy Cates, of Edward, Montana, is visiting his mother, Mrs. Adelbert Cates, of the West River Road, near Battle Island.

• • •

Dr. and Mrs. H. S. Orchard have written Fulton friends of their safe arrival at Tucumcari, N. M.

• • •

Mrs. William McCormick has been called to Oswego by the illness of her mother.

• • •

Mrs. Joseph Dingle is ill at her home in West 5th st.

• • •

Mr. Orin Henderson has as his guest his granddaughter, Miss Henderson of Seattle, Washington.

# OLD COUPLE SEEK A DISSOLUTION

## Marital Bliss Was of Short Duration, Ending Shortly After Second Marriage; Damage Liens Filed.

The event of greatest importance coming before Justice De Angelis, in Special Term, yesterday, was that of an aged couple, Mr. and Mrs. Almon Fuller of West Monroe. The couple separated fifteen months after their marriage. Both were formerly married and over 70 years old. Judging from Mrs. Fuller's statement part of the trouble between Mr. Fuller and herself arose from the fact that Mrs. Fuller's daughter and Mr. Fuller did not get on well together. On June 22, 1910, the trouble reached a crisis and Mr. Fuller said that the girl must leave the house. Mrs. Fuller said that she would go, too, and she did. Mrs. Fuller also testified to other acts of her husband which in her opinion constituted cruel treatment.

The defendant was unable to be present at the trial, but his testimony, taken in the form of a deposition, in which he denies the charges of cruelty will be read. John W. Shea of Syracuse is attorney for the plantiff and Judge Harry D. Coville for the defendant.

### Many Liens Dismissed

The suit for the foreclosure of the lien of William T. Field against the Salmon River Power company was ended at the morning session yesterday.

Justice DeAngelis dismissed all the Justice DeAngelis dismissed all the other liens against the company except that of Mr. Field on the ground that all were against the dam contract in which there was a loss of about $100,000. Mr. Field's lien is against the power house contract, in which there was a surplus of $6,600.

It was determined that the amount due Mr. Field under his lien is $7,922.66. He will receive his pro rata share with other lienors, if any, against the power house contract. Justice De Angelis directed the attorneys to prepare the findings in the case.

There are about 20 other lienors on the Salmon River power contract, growing out of the failure of the John F. Stevens company, contractors. The amounts range from $10 to $1,000. The dismissal of the liens means that The owners will not be able to recover the amounts claimed.

In the case of Charles Henry Hyde vs. Frances E. Hyde, both of New Haven, for absolute divorce, there was no appearance by the defendant. Three witnesses were sworn and the Court directed that findings be prepared. Ross L. Simons appeared for the plaintiff.

County Judge Henry D. Coville has rendered a decision in the case of Daniel O'Brien against John Smith of Amboy and in which the judgement of the lower court is modified and affirmed with costs.

John Jackson and his three sons, Teddy, Walter and Court Jackson, were arrested east of Orwell, by Deputy Sheriff Giles Stevens and assistants. They were arraigned before Herbert J. West, justice of the peace, at Orwell and held for the grand jury. Bail was fixed at $1 000 for the father and $500 each for the sons. Deputy Sheriff Stevens went to the Jackson home with a search warrant on complaint of Robert Potter of Orwell, and had to call Deputy Sheriff W. K. Lamb of Richland, with assistants, before making his search.

## CHARLES W. BARNES

Mr. Charles W. Barnes, an Oswego lawyer, 55 years old, died in that city last night at 5 o'clock.

Mr. Barnes was born in the Barnes homestead, where he died. His mother, the late Martha Barnes, who died several years ago, was one of the most influential women of the city. Mr. Barnes was educated in the public schools and was a graduate of Oswego High school.

When a boy of 18 he began the study of law in the office of the late Judge Newton W. Nutting, and also studied with the late John J. Lamoree. He was admitted to the bar in 1880.

Mr. Barnes did not practice his profession extensively, but devoted most of his time to real estate matters. At one time he maintained an office in the Guimares Block, in West First street. Mr. Barnes inherited a vast estate from his mother, and he is reputed to have been worth upward to $500,000. He was a member of Christ church and also of Oswego Lodge No. 271, B. P. O. E.

Besides the widow, he is survived by three daughters, Mabel, Margaret and Martha Barnes, al lof this city, and a half-brother, Chancellor Barnes of Syracuse.

## SURPRISE PARTY GIVEN LEADER OF ELKS ORCHESTRA

Mr. Merton E. Reynolds upon his arrival last night from Boston, where he had been in the interest of local horsemen, was pleasantly surprised by a party of twenty-five friends.

The guests were: Mr. and Mrs. H. Zuck, Mr. and Mrs. Arthur Guernsey, Mr. and Mrs. L. Pollock, Mr. and Mrs. Fred Taylor, Mr. and Mrs. Harry Guyer, Mr. and Mrs. Ross Eaton, Mr. and Mrs. Julius Prowda, Mr. and Mrs. Bayne Stevens, Mr. and Mrs. Fred Guile, and the Messrs. Frederick Radder, Myron Freedman, George Drake and Thomas Farrell, and Miss Madge Benze.

The principal entertainment was accorded by Thomas Farrell and Miss Benze who amused the guests with a playlet. Mr. Farrell, who acted as end man in the recent Elks Minstrels, told in a humorous manner of incidents about town in which some of the people present were involved.

In the early part of the evening cards were played and dancing enjoyed. A victrola furnished the music for the dancingon the top floor of the Reynolds home. Mrs. Reynolds and Mrs. Pollock gave an exhibition of fancy dancing. Mrs. Pollock is a former musical comedy actress and her part in the entertainment was well received.

Refreshments consisting of salads, sandwiches, coffee and ice cream were served.

## FULTON'S POPULATION GAINED NEARLY 26 P. C.

Francis M. Hugo, Secretary of State, has issued a bulletin of the census of the cities o fthe State, showing the gain or loss of each during the last ten years. According to the report Fulton's population in 1915 was 11,138, or a gain of 2.29', or 25.89 per cent. Oswego in the same period gained 12.6 per cent, or 2,854 making a total population of 25,426.

The highest per centage recorded is that of Beacon, 82.04; the lowest, Plattsburgh, .5. Auburn with a population of 32,462, gained 3.33 per cent. Syracuse is recorded as having a population of 145,293 and a gain of 23.65 per cent.

## OSWEGO'S RED MEN TO HOLD A "BOOM" MEETIING

The Improved Order of Red Men in this district are active every minute. Nothing is left undone that will call attention to the truly American principles underlying the workings of the order. In accordance with the desires of one of Oswego's Tribes the local Red Men will visit Oswego Monday, February 21. Utoka Tribe will be led by Mr. F. E. Bache, deputy, on the journey and a good time is in store for every brave who can make it a point to follow the delegation.

## ENJOYABLE DANCE HELD AT K. OF C. ROOMS

Sixty couples enjoyed a dancing party given last night by the Knights of Columbus in their lodge rooms. The floor committee, which consisted of John Sullivan, Richard Murphy James Carroll and William Chapman, were responsible for the event being accorded the most successful ever held in the hall

Refreshments were served during the evening.

## ODD FELLOWS PLAN SMOKER FOR FEB. 21

At the weekly meeting of the Odd Fellows held last night, plans were discussed for the smoker which the lodge is to hold on Monday, February 21st. Invitations will be extended to friends of the members to attend.

In addition to the business session, the third degree was conferred on several members and refreshments were served.

## CITY CLERKS REPORT GIVEN FOR JANUARY

City Clerk Allen's report for the month of January shows that there were ten marriage licenses issued, 30 births and 19 deaths reported. Nine marriage licenses have been issued so far this month.

### Loses $150 In Ice Hole.

Waukesha, Wis.—While looking at Robert Hine cut holes in the ice on Pewaukee lake Carl Zinn of Milwaukee, who, with friends, was spending the day at the Zinn summer home, jerked a handkerchief from his pocket. A pocketbook containing $150 in bills and other valuable papers, which were in the pocket, fell into the hole.

# BUSINESS FORUM IN FAVOR OF PEOPLE

(Continued from Page One)

have their delegates numbered among the 1700 men here.

At the banquet Thursday evening President Wilson by means of the transcontinental telephone will send a message of business interest to the people of the Pacific coast by communicating with Hiram W. Johnson, Governor of California. Following this there will be a similar message to John H. Morehead, Governor of Nebraska.

An exhibit is prepared in connection with the meeting to depict as graphically as possible the growth and changes in the nation's business since the last annual meeting. This consists of charts and diagrams prepared by various bureaus of the department of commerce. There is also shown samples of hardware sold by Germany in England and also samples sold in Latin America. The department of commerce has a motion picture exhibit illustrating the work of its bureaus. The Pan American Union is displaying large maps, graphically depicting the population, area, and value of exports and imports of the Latin American countries.

# TAFT PRAISES NATIONAL GAME

New York.—That baseball, the American pastime, is a civilizing institution more powerful than the armies and navies of the world combined was the statement of William Howard Taft, formerly President of the United States, at the fortieth anniversary banquet of the National League at the Waldorf-Astoria last night. In proof of this statement Mr. Taft recited some of his Philippine experiences with the Iggorrate tribes, whose pastime before the advent of the Americans was head hunting among enemies.

Mr. Taft was the leading guest at an assemblage which numbered some 325 enthusiasts, owners, managers, umpires and writers of basball, and although his speech came late it was filled with so much tribute to "our great American pastime." as he so aptly expressed it, he was applauded to the scho.

Mr. Taft began his speech by reniniscing about his favorite Cincinnati Red Stockings, the team which for two years was undefeated. He named most of the men who played on that historic team and told of their deeds on the diamond that he saw. He expressed his happiness of the final settlement of theb aseball war.

# Tim says:

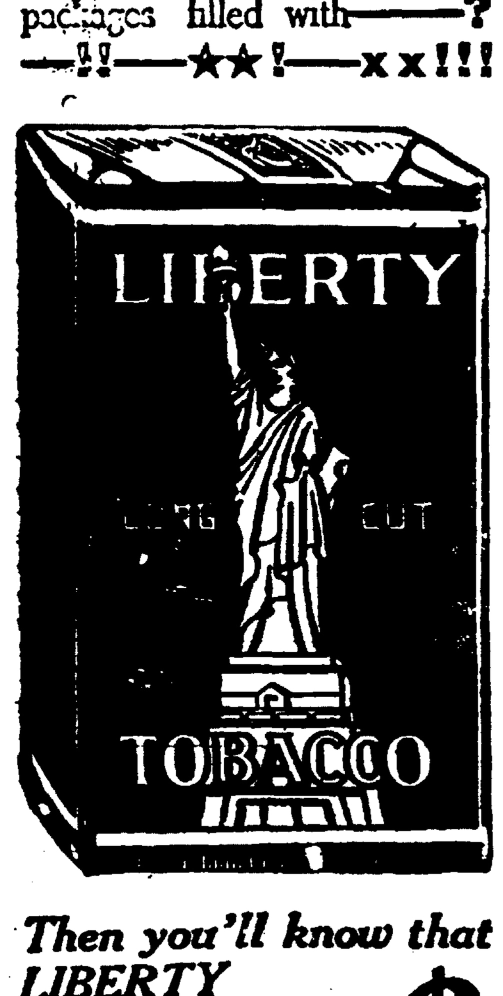
"T'other morning I left my LIBERTY Long Cut at home, and before noon I thought it was a week from Thursday.

"To save me from starvation I borrowed a chew of Bonehead's Joy from the foreman, but I might as well have chewed the rag with the corner cop for all the good I got out of it."

The job that pulls hard on the muscles calls for a snappy, zippy man's-size tobacco. LIBERTY gives the big all-day brace to the husky lads who make the world go round.

There's nothing in LIBERTY but clean pure honest Kentucky tobacco. No short, broken leaves—no hard loose stems. And it's aged from three to five years to bring out the sweet mellow flavor of the leaf.

LIBERTY makes a long, free-burning, fragrant smoke and a lasting, juicy chew. Try it for both. Compare LIBERTY with bigger-looking packages filled with——? —!!—★★!—xx!!!



Then you'll know that LIBERTY is the biggest nickel's worth of real tobacco. 5¢

THE AMERICAN TOBACCO COMPANY

# OSWEGO NORMAL DEFEATED LOCALS

## By a Score of 38-26 the Maccabees Lost Last Night In a Swift Game With the Boys From the Windy City

For the third consecutive time this season the Maccabees last night were defeated by the Oswego Normal quintet in a brilliant game of basketball of rapid fire order. The final score was 38 to 26.

The Maccabee team in the last five minutes of play were obliged to play with but four men, Captain Ives having been disqualified by Referee Morin for becoming involved in a mixup with Carroll of the Oswego outfit, who was also obliged to leave the floor. On this account, the Maccabees chances of winning the fray, which appeared excellent prior to Ives' disqualification, were lost and the Oswegonians caged the ball in frequent succession before the final whistle blew.

In an endeavor to prevent Landers, the star Oswego center, from breaking into the scoring column, a general shift was made in the local team, Merrill going in as center in place of Crockett. Crockett was placed at forward. The combination did not seem to work to good advantage, so that another shakeup was made in the second half. Crockett resumed his position at center. Merrill and Rohrball were placed in the guard positions, while Freedman was put in at forward in place of Snow, who was obliged to leave the game between the halves.

The last combination worked to good advantage and the local team was able to diminish the lead which the visiting team had accumulated in the first half. The score at the end of the first period was 20-13 in the visitors' favor.

Landers, as usual, was the individual star of the game, his shooting in the first half being of a sensational order. Crockett, however, made up for Landers' counts by scoring four baskets himself in the first period. Landers accumulated a total of eight baskets and four fouls, thus according 20 of the 38 points which his team rolled up. As was the case in the game played last week at the Normal gym, Landers figured in practically every play in which a basket was scored by his team, although in a number of cases on account of the close guarding he was obliged to pass the ball to a teammate.

In the preliminary game, the Maccabee Feds, who have not been defeated since the organization of the team several weeks ago, defeated the Y. M. A. A. team by a score of 19-14. Baskets from the foul line made the victory possible as seven points were gotten by the lodge boys in this manner, while the Y. M. A. A. outfit scored but two points frrom fouls.

The lineup of the teams:

| Maccabee | | Oswego N. |
|---|---|---|
| Ives | Right forward | Frawley |
| Crockett | Left forward | Hopkins |
| Merrill | Center | Landers |
| Freedman | Left guard | Myers |
| Snow | Right Guard | Carroll |

Substitutions, Rohrball for Snow. Park for Carroll. Field Baskets, Frawley (6), Hopkins (1), Landers (8), Park, Ives (3), Crockett (5), Merrill, Rohrbaugh (2), Freedman.

Referee, Morin.

| Maccabee Feds | | Y. M. A. A. |
|---|---|---|
| Hutchins | Left forward | Pickett |
| Seymour | Right forward | Allen |
| Sylvester | Center | Taylor |
| Smith | Right guard | Thompson |
| Yandoh | Left guard | Richardson |

Baskets from field, Hutchine (2), Seymour, Sylvester, Yandoh (2), Taylor, Pickett (5).

## OSWEGO NORMAL GETS TWO FULTON ENTRIES

Miss Mabel Grant and Mr. Leonard Roy are the ne wentries recorded at the Oswego Normal school. The remaining new students are: Erma Baker, Sherrill, N. Y.; Leon Bottin, Oswego; Ruth Brunswick, Syracuse; Elizabeth Carlin, Malone; Kathleen Cheney, Oswego; Grace Cole, Syracuse; Genevieve Cosgrove, Middletown; Anna Cronan, Oswego; Dorothy Daley, Oswego; Louise M. Driscoll, Oswego; Teresa Handley, Oswego; Mildred Hilbert, Oswego; Virginia Hunt, Oswego; Fred Lavenburg, Oswego; Elizabeth Lockart, Utica; Blanche Lyons, Bennington, Vt.; Harold Mahoney, Elizabeth, N. J.; Mildred Marian, Patchogue, L. I.; Florence McCarthy, Corning, N. Y.; Bessie L. Miller, Norwich; Edith Mottram, Yonkers; Richard Noyes, Oswego; Helen Oates, Norwich; Lysle Padden, Oswego; Phyllis Payne Oswego; Ada Seelinger, Sodue; Ella Stewart, Oswego.

# OSWEGO VICTORS ARE COMING

The high school basketball team's supporters arep romised a treat tomorrow night, when the locals line up against the Victors of Oswego.

The same lineup which appeared in the last game will be seen. If a high score is rolled up by the locals, Kraus or Calkins of the second string may replace one of the first string men in the last few minutes of the game. These boys have been doing good work in scrimmages the past week. In a practiee game with the Maccabee quintet Calkins netted six baskets. Kraus's agressiveness is one of his chief assets.

One of the surprises of the season is Reynolds. At the beginning he was kept on the side lines. He now occupies one of the regular berths. In the Phoenix game last week he scored 15 baskets from the field. In Monday's practice game with the Maccabees he scored a like number from every possible angle. He is a hard and aggressive player and difficult to guard, as one of the Phoenix high school boys found who endeavored to follow in the local boy's wake.

A dance at the Library will follow the game.

## M. W. A. NOTES

At last night's meeting of the Modern Woodmen of America, action was taken that positively assures the trip to the class adoption by special train on the N. Y. C. Monday, February 14, at 7 p. m. sharp.

One of the largest meetings of the year was held and enthusiasm ran high. Every member will wear a special badge on this occasion. Neighbor Harry Waugh was unanimously elected to represent Fulton Camp as the speaker of the evening.

A special meeting will be held Sunday at 2 p. m. to close up the final arrangements, and to rehearse the Woodman's song, composed by Leonard Roy.

Twenty-four new members were adopted last night.

Tonight's dance in Mechanic's hall is espected to surpass the last one, which was a fine success.

# RACE PREJUDICE IS NO BARRIER

## New York Evening Post Warns Against Allowing Racial Feelings to Enter Judiciary.

The Brandeis nomination serves to remind us of some of the fundamental considerations which should be kept in mind regarding the Supreme Court and its members. The first that we will mention is race prejudice. That ought to be as jealously excluded from the serene air of the Supreme Court as would be corruption. The fact that Mr. Brandeis is a Jew should not be allowed to weigh either for or against him. Aotually, it seems to be working in his favor. Several senators who would be disposed to vote against his confirmation, on legal and public grounds, are saying that they cannot afford to expose themselves to the charge of race discrimination. This may be broad mindedness, on their part, or it may be political apprehension, but it is a visibly operative motive with some in Washington. Now, this whole aspect of the Brandeis nomination sincere Americans will dismiss as quickly as possible. We cannot be false to our own principles. The career for talent must be kept open, even when it leads to our highest tribunal. Some day there will be a member of the United States Supreme Court of Italian descent. One of Slavis race may yet sit there. We have definitely set out on the democratic road which runs to equality and opportunity and cannot turn back. We may not like al lthe things and persons we meet on the way, but we have got to put up with them. Race prejudice is as much our of place in the personnel of the Supreme Court as it would be in one of its decisions. President Lowell said some time ago, half jokingly, that the next president of Harvard University would probably be foreign-born. So he ought to be, if the best man in sight. We Americans have got to take what comes out of our melting pot.

With the plea that it is well to infuse an element of radicalism into the Supreme Court, we haves little patience. A man of violent prepossessions either way—radical or reactionary—should not be made a judge. What is wanted is a man who knows the law and who will declare it without fear or favor. A judge has to forget his own likes and dislikes: sometimes to make decisions personally distasteful to himself, simply because it is duty to do so. And in actual fact, there is at present no just ground of complaint that the Supreme Court is unduly conservative. For some years past its decisions have broadly inclined to progressive and humane views. In the matter of workmen's compensation, the right to regulate the hours of labor for women, the proper employment of the police powe rof the states for social ends—and only the other day, the sweeping decisions in the income tax cases—the court has moved abreast of popular feeling and demand.

### No Place for Reactionaries

And this fact suggests the real way in which changes of judicial attitude and interpretation are brought about. It is not by "packing" the court. Forcing a radical judge upon the bench will do little except to rouse opposition. His presence there will make his colleagues all the stiffer in their own attitude. Judge Harlan, for example, in his later years was disposed to take pretty sharp issue with the rest of the court on the ground that they were not radical enough. We know how bitter he made his dissent in the Standard Oil case. But what he accomplished by this, unless it were to make himself unpleasant, it would be difficult to say. No, it is not by changes in the Supreme Court itself that we get changes in the interpretation of the law. That result comes from the slow and accumulated pressure of a number of causes. New statutes are adopted. The Constitution is amended. Insensibly a different atmosphere about certain questions is created throughout the country. All these things finally reach the minds of the judges. They are not Olympian dwellers apart. Even a judge rubs elbows with his fellows; reads the newspapers; observes the debates in the Legislatures and in Congress; notes the ebb tide and the flowing tide in politics. And when he comes to go to the armory of great legal principles he instinctively draws out those which enable him to do justice while acceding to the matured demands of the people, in reference to certain provisions of legislation. The function of the radical and the agitator is not to be fulfilled on the bench; he is to fling himself into those political movements and social reforms whic hin the end get themselves written into the laws. After that, it is only a matter of time when the courts will follow. Judges do not sit under glass cases, making decisions in rarefied air. They are of their day, and respond to its peculiar appeals.

### No Change of Principle

If from all this the conclusion is inevitable that political or eccentric appointments to the Supreme Court are a mistake, even as to their professed objects, the duty to keep the personal quality of the judges high and to insist that their records be pure remains the same. It rests heavily upon both the appointing power and the confirming power. And no friend of Mr. Brandeis can complain if the Judiciary Committee of the Senate makes searching inquiry into ihto his past. This, in fact, ought to be welcomed by Mr. Brandeis as at last giving him full opportunity to dispel disquieting reports and what his friends have described as calumnies. As with John Jay, so with all his successors, the ermine of the Supreme Court must touch nothing less spotless than itself.

## SOUTHERN FARMERS FORM CREDIT UNION

Raleigh, N. C.—Lowe's Grove Credit Union, is the name of the first rural credit union, under legislative sanction, established in the South. The North Carolina General Assembly of 1915 made provision for the cooperative farmers' society. One year loans to farmers at 6 per cent. interest upon good character and earning capacity as collateral are the salient features of the institution.

W. R. Camp, head of the Department of Marketing, State Department of Agriculture, is supervisor of the union. John Sprunt Hill, member of the American Commission on Rural Credits that toured Europe, outlined the working details of the society. The union began business January 20. The interests of about 100 farmers in a prosperous rural district are pooled. Some of the farmers own land; others possess personal property, and still others, tenants, claim proprietorship to nothing save good character. This credit union lends money to the individual member at 6 per cent., without commission, on property as security. Other money lending institutions charge from 8 to 70 per cent. interest.

The farmer who owns only a mule and a cow can obtain money from the union by having his landlord indorse his note and by giving a lien to the society on his crop. The crop lien bears 6 per cent. interest, whereas the supply merchant usually charges from 40 to 50 per cent. The farmer buys his supplies for cash under the plans of the cooperative society. The year's transactions net a saving to the tenant farmer from 40 to 50 per cent.

The union is to receive the savings of its members in payment for shares or on deposit. The membership fee is only 25 cnts. Prof. E. C. Branson, a Southern rural sociologist, says that this is the first cooperative credit society formed among the farmers in the United States offering short term credit, personal loans, upon charracter as collateral.

QUIRK THEATRE FULTON Friday, FEB. 11

# WE WANT READERS TO KNOW IT

## The Evening Times Has Been Issued More Than 350 Consecutive Days

From the very beginning it was said this could not be done---in Fulton. The city was described to us as a "Ten-,Fifteen-,Twenty-,Twenty-five-,and Thirty-Cent-Town—Nothing Over Thirty Cents."

It has been proven that the *informant was wrong. His estimate was a guesstimate.*

Knowledge of the Daily Newspaper Business is the backing for the foundation of Fulton's First and Only Daily Newspaper—which is destined to become a successful business.

# THE EVENING TIMES

### OF FULTON, N. Y.

Will become sufficiently broad in its scope to meet every need of the people of this vicinity. Why? Because its underlying principle is right. There's no Guesstimating in the assertion. THE FULTON EVENING TIMES is for

*FULTON-- First, Last and All the Time*

# Mr. Bowser Wins

## Or at Least He Thinks He Does

By M. QUAD

Copyright, 1915, by the McClure Newspaper Syndicate.

Two or three weeks since Mr. and Mrs. Bowser had a talk on natural history, and Mr. Bowser got the worst of it and a bump from the family druggist besides. He admitted to himself that he did, and, though he is not a revengeful man, he felt that he must get even. He therefore planned a little plan, and for a week he spent an hour or so in the library every evening.

Mrs. Bowser did not ask what was up, and he was conceited enough to think because he did not tell her that she would not find out. She did find out, and she was all ready for him when he laid down his newspaper the other evening and in a voice he tried to make careless asked:

"Mrs. Bowser, what is a quid nunc?"

"It is an animal a good deal like an alligator," she answered promptly. "It has six legs and six claws on each foot. Instead of having the hide of an alligator it has soft, long fur, and it is sometimes used for muffs. Its principal food is fish, and it has a throat and gullet large enough to take in a shark five feet long. When provoked it will attack a man, and unless he is prepared for it he may lose his life."

Mr. Bowser flushed up, and his mouth twitched, and he was about to slap his leg when he stayed his hand. He had gone to the dictionary to find out what the word signified, and he had led Mrs. Bowser into his trap.

WALKS ABOUT ON HIS FOREFEET.

He wanted to shout with laughter, but there was more to come. Presently he quietly asked:

"I should like to see a quid nunc, but I suppose I never shall. Did you ever hear of a similia similibus curantur?"

"Of course," she glibly answered. "It is an animal about as large as a kangaroo and walks about on his fore feet with its hind ones in the air. At intervals it calls out in a plaintive way, like a child lost in the forest. It is found mostly in the wooded mountains of Brazil. It has such a fierce temper that when the natives hear one call out they rush into their cabins and lock and bolt their doors. It will carry off and devour men, women, children, dogs, goats and cats. No zoological garden has ever succeeded in taming one. It is well for us, Mr. Bowser, that the similia curantur does not live among us."

Mr. Bowser was red clear around his neck, and his eyes twinkled. The conceited Mrs. Bowser was preparing a great fall for herself. It would be something that he could throw at her for years and years to come. With a suppressed chuckle he asked:

"There is the e pluribus unum. I don't remember to have ever seen one. Perhaps you have?"

"Three or four of them, Mr. Bowser, but not in zoos. They are a rare animal and part bird, and their backs are covered with spines as long as a tenpenny nail. Besides this, they have a stinger a foot long for attack. Whatever that stinger reaches dies. They feed on what is called skunk's cabbage, and their breath can be scented half a mile away. It is a native of Borneo, and such is its fierceness that it has been known to attack fifty men at once. Mr. Bowser, if we had the e pluribus unum there would be fewer men running out of nights."

Mr. Bowser had to laugh in spite of himself, but turned it off by saying that he was amused by something he had witnessed on the street car that afternoon and that he would tell about it later on. Meanwhile what was a jucherie?

"Why, I only know from what I have read," was the answer. The jucherie is any native of the cannibal islands. It is a large birdlike animal—that is, it has feet like an alligator, wings like a bird and eyes and beak like an owl. It has a tail ringed around like a coon's. When the cannibals catch a missionary and roast him the jucherie can smell the banquet a mile off. He hastens to the feast, and unless the savages flee and leave him to eat at his leisure he kills five or six of them. The United States is no place for the jucherie. We never roast our missionaries, and the animal will dine on nothing else."

Mr. Bowser rose up and went to a back window to look out. He never was so tickled in his life before, but he must keep it to himself. After a minute he came back and sat down and asked:

"I heard some men talking about the 'S O S' the other day, but I couldn't make out what it was or is. Is it a bird or animal, Mrs. Bowser?"

"Why, a bird, of course," she answered. "It is some such bird as the condor of Peru, but curiously enough it has one long wing and one short one. Thus when it flies it flies in a circle, and to get anywhere it must descend to the ground and make use of its legs to get over the ground. Its legs are weak and tottering, and as it walks it utters cries of 'S O S.' Although the strange bird is a native of Java, I think I have heard its cries several times right here. They are mournful beyond description. They make you think of a poor orphan child wandering in the dark and expecting to be devoured by a panther at any moment. What is the matter with you, Mr. Bowser?"

"I—I feel too full," was the hesitating reply. "Mebbe it's a case of indigestion."

It was a case of wanting to laugh and holding back on it like a man holding to the reins of a runaway team, but Mr. Bowser stopped the team by great effort and humbly asked:

"There is the mon ami, Mrs. Bowser. I don't remember that I ever saw one."

"But I have. It was when I was a little girl, however. There has not been one seen in this country in a great many years, and I believe the thing is extinct. I was out in the woods gathering wild flowers, and suddenly I heard a gruff voice speaking to me. I thought it was a man and looked up with a start of alarm. It was no man, Mr. Bowser, but it was a mon ami. After I got home and told my father about it he said it was and my Sunday school teacher said it was, and the preacher said it was, and all agreed that I had had a narrow escape, for the thing did not attack me."

"But how did it look?" asked Mr Bowser.

"It had the general appearance of a monkey. But it had six legs, two tails and four eyes. Its two front legs were like human arms and were armed with six claws on each foot. Its eyes shone like coals of fire, and its teeth were as long as a finger. It was a dreadful looking animal, Mr. Bowser, and no wonder that little girl, only ten years old, was almost frozen with terror. I screamed. I shrieked. I called upon my father and my mother and my brother Ben to save me. I should have called upon you, but I had not met you then. The thing screamed when I screamed. It shrieked when I shrieked. Then it began to run backward in a circle around me. I saw that three of the legs were so constructed that it could run backward as well as it could run forward with the other three. It kept up its running backward for several minutes, and then uttered a whoop and began to run forward. It was horrible, Mr. Bowser, to hear its teeth clicking together and to see those four eyes emitting sparks of fire."

"But get along to the end," said Mr Bowser, who half believed the story in spite of himself.

"The end is very near, my dear," replied Mrs. Bowser. "The thing came closer and closer and was preparing to spring upon me when I fainted away. What else could a poor girl do? When I recovered consciousness the terror had departed, and I was unharmed. He had simply untied my sunbonnet and made off with it. He probably wanted it for his Santa Claus gift to his own little girl. That's all, Mr Bowser. I notice that you are getting uneasy."

"Y-e-s," he answered as he rose up. "I think I will go over to the drug store and get a few troches for my throat. It feels rather stuffed up."

When Mr. Bowser got out to the gate he leaned on it and laughed until the tears came to his eyes. He had caught Mrs. Bowser at last, and he must tell the druggist about it. He laughed all the way over to the store, and when he entered he had such a broad grin on his face that the man of drugs exclaimed:

"Why, Bowser, what has happened?"

And when Mr. Bowser told him all they laughed and chuckled and pounded on the counter in unison, and the druggist said:

"Bowser, you are great! You are simply immense! By George, by George, you have done nobly!"

And about the same time Mrs. Bowser was wiping the tears from her eyes caused by laughter and saying to herself:

"Poor Mr. Bowser! If a wife didn't let the husband get the advantage once in awhile it would get to be monotonous."

### Prescribing a Cure.

"Mr. Jones, you will either have to marry at once or leave our employ."

"But why are you so anxious that I marry?"

"While you are in love you do not half attend to your duties, and you must either be cured or fired."—Houston Post.

### The Bachelor's Decision.

I'll not get married on Monday,
For that's the day they wash;
I'll not get married on Tuesday,
For that day I play squash.

I'll not get married on Wednesday
For fear that it might rain;
I'll not get married on Thursday
So long as I am sane.

I'll not get married on Friday—
Bad luck might then befall;
I'll not get married on Saturday—
I'll not get married at all.

—Yonkers Statesman.

JOSE COLLINS

PATHE PRODUCER CAPTURES BRIDGEPORT.

### Edward Jose Uses City Island for "Light That Failed."

Edward Jose, who produced for Pathe the first Kipling book to be filmed, "The Light That Failed," discovered in his search for locations that Fayerweather's Island off the city of Bridgeport, Conn., offered remarkable opportunities for "real desert stuff."

Furthermore, the winter quarters of Barnum and Bailey's circus are in Bridgeport, so a big supply of camels, Arabian horses, etc., were right at hand. Therefore, Mr. Jose took his company, headed by Robert Edeson and Jose Collins, up to Connecticut a few weeks ago and made a pronounced dent in the ordinarily tranquil life of that enterprising community.

He needed "extras," many of them, and so announced the fact in local newspapers. Many Bridgeporters could not resist the temptation to work before the camera, so rich and poor, a multitude of them, enrolled with eagerness under his banner, ready to work for "from $2.50 per day up." As Fayerweather's Island is no winter resort and biting gales were blowing in from the broad Atlantic, the camels must have had their own opinions about the Sahara desert they were supposed to be working in.

### PATHE'S "HAZEL KIRKE," A PLAY WITH WONDERFUL RECORD; HAS BEEN PLAYED FOR OVER THIRTY YEARS.

Ask anyone to mention the most famous American plays and he will give without hesitation the names of three or four, two of which will inevitably be "Uncle Tom's Cabin," and "Hazel Kirke." It is significant that all the plays mentioned will be found to be based upon American rural life—that they preach a uniform lesson of the beauty of parental love, the importance of living a clean life and the unhappiness and ruin that result from doing evil. Those who preach the decadence of the taste of the time would do well to consider that the suggestive in plays condemns them to a short life and that the plays that live are of the type mentioned above containing strong heart interest and an evident moral.

"Hazel Kirke" has shown a phenomenal vitality which has endured for over thirty years. It was written by the late Steele MacKaye, the well known actor and playwright. In the original production were featured Charles W. Couldock and Effie Ellsler, who, as the old miller and his daughter, took the country by storm and played their parts for years.

The story deals with an old Kentucky miller, Dunstan Kirke, whose daughter Hazel has been educated by a wealthy neighbor, Squire Rodney, to whom she has been promised in marriage by her father. She, however, falls in love with a rich young man from the city, Arthur Carringford. When her father learns of this, he curses her for her lack of compliance with his wishes and drives her from his house. She goes with Carringford and is married to him at a country hotel. The minister has been secured by Carringford's butler, who knowing that the young man's mother is opposed to the marriage for purely selfish reasons, has hired, as he thought, a bar-room loafer to perform the marriage. The terrible grief of Hazel when she is informed by her mother-in-law that the marriage was not legal, drives her from her husband's house to seek refuge with her father. Denied shelter there, she seeks to kill herself, to be rescued in the nick of time by her husband, who has vainly sought her everywhere. The marriage is found to be legal, and the play ends happily.

Pearl White, in the title role, finds an opportunity for serious expression denied her in the past. As Hazel she is always convincing and does perhaps the best work of her career. Bruce McRae, whose art has been ripened by years of starring on the legitimate stage, is an ideal Squire Rodney and draws to his character all the sympathy and admiration due that lovable character.

## A COAT FOR JANUARY.

**Built on Good Lines and Slightly Dressier Than a Topcoat.**

AGAIN NAVY BLUE

Fashioned of navy broadcloth, fastened with novelty buttons, [illegible] cuffed and collared with [illegible] and belted in a tier [illegible] so warmly lined with heavy [illegible] makes serviceable wherever [illegible] for walking. The [illegible] so suitable for this kind of coat, has a background of osprey feathers.

## FIRST AID ESSENTIALS.

**What Mothers Should Keep In the Bathroom Medicine Closet.**

Accidents will happen as long as we are human, and particularly so while we are children. But the irritating part about accidents is that we do not expect them and that they all have one thing in common—they happen at the wrong time. When you have no peroxide you cut your finger. When Charlie burned his hand at the bonfire you were without olive oil or ointment to soothe the pain. So, the wisest thing to do is to be prepared for war in time of peace, to talk in the language of the day. A good many serious results have been avoided by having a wound dressed properly in the nick of time. Every household, and that means every mother, ought to have a little box, cabinet or other safe place always filled with a few essentials which will prevent unfortunate consequences.

Antiseptics for small wounds should be the first essential.

A small bottle of linseed oil and lime water oil comes next. And you know that it is the open blister which sometimes causes tetanus.

Boracic acid to wash out sores before putting the dressing on is not to be dispensed with. Turpentine is also a splendid thing against infection of sores from rusty nails.

Do not let us forget the almost inevitable bottle of castor oil or milk of magnesia in case of fever and indigestion. A small quantity of essence of peppermint and spirits of ammonia should also be added, because sick stomach is a frequent occurrence with the little ones. A box of bicarbonate of soda and one filled with epsom salts are indispensable.

### French Coffee.

One quart of water to one cupful of very finely ground coffee. Put coffee grounds in bowl, pour over about half a pint of cold water and let stand for fifteen minutes. Bring remaining water to a boil, take coffee in bowl and strain through a fine sieve; then take French coffee pot, put coffee grounds in strainer at top of French pot, leaving water in bowl; then take boiling water and pour over coffee very slowly; then set coffeepot on stove for five minutes; must not boil; take off and pour in cold water from bowl that coffee was first cooled in to settle. Serve in another pot. The French who have the reputation of making the best coffee, use three parts Java to one part Mocha.

### Skating Corset.

The skating vogue has been responsible for all manner of dress accessories from shoes to caps, with the inclusion of jackets and suits between. And now comes the skating corset, designed especially for the devotees of that exhilarating sport. This particular type of corset has silk webbing over the hips, and the fact that there is no steel down the front makes every movement exceedingly easy and graceful. The corset comes in pink, delicately trimmed. Its price is a little over $5.

## Why Baby Doesn't :: Walk ::

Many parents believe that the reason a baby does not walk sooner is because his legs are not yet strong enough. The truth of the matter is that the bones and muscles in a baby's limbs are often developed sufficiently to permit walking long before he takes his first step. The reason he does not walk as soon as he has the necessary physical strength is because there is no thinking brain to tell his muscles what to do.

At birth a baby's brain is far from being in as complete working order as the rest of his body. From a year to eighteen months, and in some cases an even longer time, must elapse before his brain is capable of directing conscious, voluntary movements, such as walking.

Yawning when bored, moving the foot when tickled, coughing, sneezing, laughing, crying, squirming and other things a baby does are what are known as reflex actions. They are the responses to some [illegible] irritation of nerves ending in the spinal cord and are no indication of intelligence or a lack of it.

Walking and other voluntary movements can be accomplished only when a path of communication is established between the spinal cord where the reflexes are controlled and the upper or thinking part of the brain. This path is known as the "pyramid path." It extends from the medulla oblongata at the top of the spinal cord to the cerebrum way up inside the skull.

When a baby is born this important little pathway is not yet open for traffic. The little nerve fibers which compose it are all in place, but they are unable to transmit any messages between the upper and lower parts of the brain because they have not yet developed their nerve sheaths. The latter bear the same relation to the nerve fibers as insulators do to electric wires.

Not until the beginning of a child's fifth year is the line of communication with his thinking brain in full operation. Before that time it is not only foolish but cruel to expect of a child anything involving will power.

## SO PIQUANT!

**A Chic Little Model For the Graceful Juvenile.**

Bolling green broadcloth is used for this fetching topcoat. The back and front hang full, but fullness has been

GOING TO WALK.

exaggerated by side plaits over the hips, held by six ball buttons on the box yoke. A seal chinchilla finishes the neck. This is one of the most picturesque designs for youth.

### Novelty Potatoes.

Chop very fine a quart of cold boiled potatoes; put them into a saucepan with a cupful of cream, two tablespoonfuls of butter, salt and pepper; set on fire, stir until hot, then turn into a baking dish. Cover with bread or cracker crumbs and bake brown in a brick oven.

## Mme. Cheruit Designed This Wrap

GOLDEN brown velvet, fox fur and gold braid along seams are the materials from which this charming opera wrap was fashioned. The way the gold braid has been used under the arm suggests Roman style of old, and the Portia sleeves are graceful. The garment is lined with brocaded white and creamy satin and gives sufficient warmth without cumbersomeness.

• • •

Some of the new hats, with their soft velvet crowns, have a distinct reminiscence of the beefeater and the fam. ANNA MAY.

## Easy & Practical Home Dress Making Lessons

*Prepared Especially For This Newspaper by Pictorial Review*

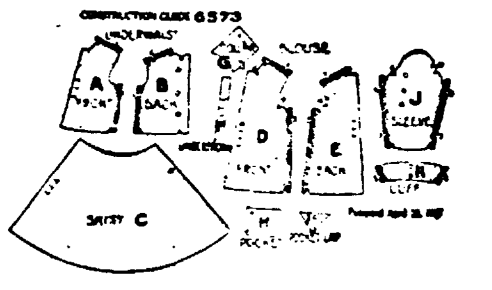
### Serge Dress With Sleeveless Underwaist.

Spring costume of green and white checked plaid with white serge blouse trimmed with green braid.

The coolest and most springlike of green and white checks is used for the skirt of this dress, while the blouse is fashioned of white serge trimmed with green silk braid. In medium size the design requires 2 yards 44-inch material for the skirt and 2½ yards serge for the blouse.

If the work is uninterrupted, the dress can be made in a day. The underwaist comes first and is quickly disposed of, if rules are carefully followed. First, take up dart in front as perforated. Close under-arm and shoulder seams as notched. Turn hem in back at notches; large "O" perforations indicate center-back.

Close center-back seam of skirt from large "O" perforation to lower edge, finish edges above for an opening.



Turn a hem at lower edge on small "o" perforations. Sew to lower edge of under-waist, center-fronts and center-backs even.

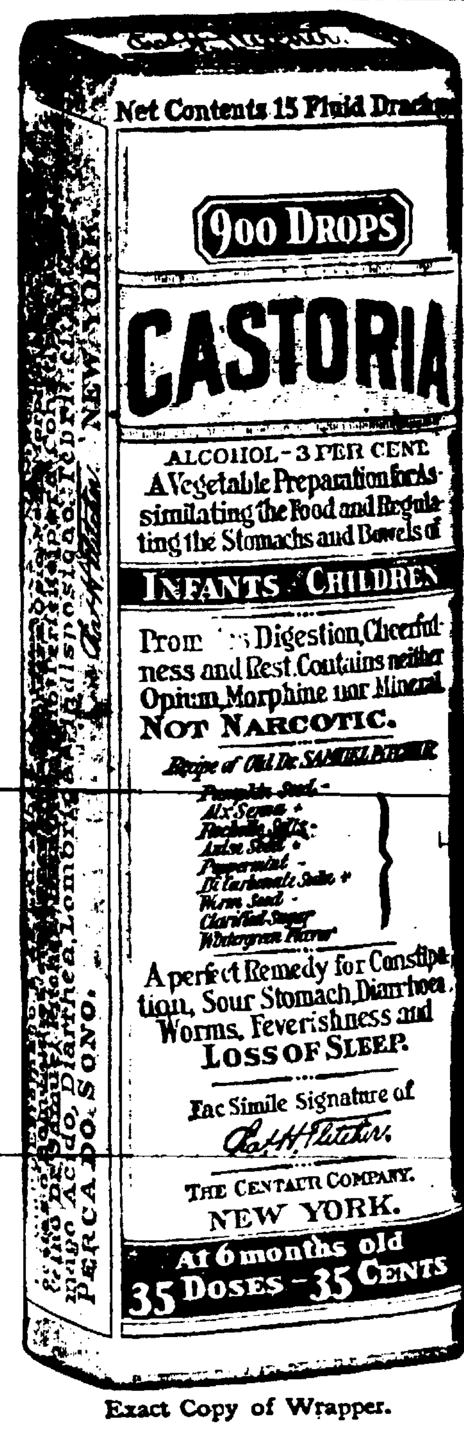
To make the blouse, adjust the underfacing to position underneath the front, center-fronts and upper edges even; slash down the fold at center-front and through the underfacing, from upper edge to large "O" perforation, and finish for a closing, as illustrated. Close under-arm and shoulder seams as notched leaving under-arm seam free below large "O" perforation in back; work eyelets and lace to position. Turn hem at lower edge on small "o" perforations. Face collar and sew to neck edge, notches and center-backs even.

Next, sew upper edge of pocket lap along small "o" perforations. Form box-pleat in pocket. Adjust pocket to position, upper edge along small "o" perforations.

The sleeve comes last. Close seam as notched, then close cuff seam and sew to lower edge of sleeves, seams even. Sew sleeve in armhole as notched, easing in any fulness; small "o" perforation in sleeve at shoulder seam.

Bands of taffeta may be used in place of braid, binding the collar and cuffs.

Pictorial Review Dress No. 6572. Sizes 8, 10, 12, 14 and 16 years. Price 15 cents.



Exact Copy of Wrapper.

Cream of Corn Soup.
Sandwiches.
Stewed Fruit. Tarts. Tea.
DINNER.
Anchovy Canapes.
Broiled Halibut, Maitre d'Hotel Sauce. Boiled Potatoes. String Beans. Deep Dish Apple Pie
Coffee.

### For Breakfasts.

NUT BREAD.—Three cupfuls sifted flour, two level teaspoonfuls baking powder, one scant cupful sugar, one scant cupful milk, one egg, one-half teaspoonful of salt and one cupful chopped nuts. Put into a baking tin and let rise fifteen minutes. Bake forty-five minutes in moderate oven.

Fig Popovers. Sift one cupful of flour with one-half teaspoonful of salt. Beat the yolk of one egg slightly, add one cupful of milk, pour the mixture slowly into the flour, beat until very smooth and finally fold in the stiffly beaten white. Butter hot gem pans, half fill them with the batter, drop a small steamed fig in each and bake in a hot oven. Serve with maple sirup.

French Rolls.—One pint milk, two eggs, one teaspoonful salt, three pints flour, three tablespoonfuls butter, one yeast cake and two teaspoonfuls sugar. Have the milk lukewarm; add to it the well beaten eggs and salt. Sift the flour and rub the butter into it. Mix the yeast and sugar together, working them with the back of a teaspoon until the yeast liquefies, then pour it into the milk and egg and add all these to the flour. Knead to a dough as for bread. Let it rise three hours, having the dough covered, that a crust may not form on the top, and keep it in a warm room free from drafts. Form into rolls and let these rise again about half an hour or until they are very light. The length of time will depend somewhat on the temperature of the room. Bake the rolls in a quick oven, brushing over with butter before baking to brown them more.

Raisin Bread.—Scald a pint of milk and beat into it a teaspoonful of melted butter and one of salt. When the mixture is lukewarm add half a yeast cake, dissolved in a half cupful of warm water, and beat in enough flour to make a good batter. Set in a warm room to rise for eight hours. Beat hard, add a cupful of flour and work in a cupful of halved raisins plentifully dredged with flour. Set to rise until light, then bake.

### Sufficient Proof.

A citizen was standing on a street corner looking a bit depressed when a friend sauntered along.

"What seems to be the trouble, old man?" solicitously queried the latter.

"I have just had something of a jolt," answered the sad one. "I was bequeathed a silver service as the solid thing a few weeks ago, and now I know that it is only plated ware."

"Sorry to hear that, old fellow," returned the friend. "But you may be mistaken."

"Oh, no, I'm not!" was the mournful rejoinder of the sad one. "The service was on the sideboard the other night when burglars broke in, but they never [touched] it."—Philadelphia Telegraph.

# YES, CARRIE'S SWEETHEART MADE A HIT WITH THE BABY

# KEEPING THE CITY CLEAN

## Settling the Loose Paper and Rubbish Problem.

## CHILDREN AS CIVIC GUARDS

**Public School Pupils Should Be Taught to Guard the Trees and Flowers of Park and Street and Should Form Habit of Keeping Surroundings Neat and Clean.**

By CLINTON ROGERS WOODRUFF, Secretary National Municipal league.

"Please pick up that newspaper you have just thrown away," said one man to another at Jackson and Biddle streets, in Milwaukee, one morning.

"Why?"

"If you don't pick it up I will."

The man who had tossed his morning paper into the gutter near the courthouse thought a moment and then retrieved the tightly twisted paper from the street. He thought a moment and then put it in his pocket.

"Again I ask why you made this request," he said.

"I ask it of you as one citizen has a right to ask of another citizen of our city," was the response. "Have you not seen the articles in the newspapers about this being the first of three cleaning days?"

The man who had tossed his paper in the street admitted that he had, but declared that he thought one more newspaper added to the thousands blowing around the streets would make but little difference. Then the man who had requested that the paper be picked up introduced himself as the health commissioner of the city. The two men shook hands, and the commissioner obtained a warm ally in the "clean city" movement.

"Wednesday is to be children's day," said he, according to the report in a local paper. "With the aid of the children we will attack the loose paper problem and make that a special issue on Wednesday. Through the pupils of the schools we hope to gather up every bit of loose paper flying around the streets and end its power of doing damage to the health and beauty of our city.

"When we have the city thoroughly cleaned we must all assist constantly in keeping it clean. Papers and rubbish must not be tossed into the air to be blown into our neighbor's yard, because the next change of wind may not only give back to us all the old stuff we have thrown away, but much more for good measure."

If, however, the health commissioner had stopped with his plans for a "clean up day" he would have done a piece of work of only moderate, very moderate, importance, for spasmodic efforts at cleanliness are soon over and soon forgotten. It is the habit of cleanliness that counts, and it is this which farseeing social workers are trying to inculcate. Carol Aronovici, formerly director of the bureau of social research of Rhode Island and now secretary of the Philadelphia Suburban Housing association, with the co-operation of the state department of education, has sought to accomplish this end through the organization of the school children as "civic guards."

It is the legal duty of the teacher to instruct pupils in moral conduct. This is the idea at the basis of the effort, as described by the Philadelphia commissioner of public schools, Walter E. Ranger, and in his judgment to no other instruction are they more responsive. As a practical example of such training, children may well be taught to help guard the trees and flowers of park and street and keep places clean for the sake of public health and beauty. It is in such service that the school may be accounted a civic guard. In all activities of the school it should be remembered that the school is already organized for public service. Each school is a unit of a town or city system and a part of a civic institution. It cannot be made a subordinate part of any private organization, however beneficent. It owes its first allegiance to city, state and nation. As every resident is a citizen of his town or city, so every pupil, as citizen of his school, is entitled to an equality of opportunity in the life of the school. For these reasons the formation of clubs and societies among pupils, not directly by the school and tending to disorganize the school itself, seems unnecessary.

Let the school, as a whole, assume its civic duties, co-operate with other public agencies and let every pupil share in its civic aims. For special ends the school will properly have its groups or committees of pupils, but they will serve in the name of the school.

Boys and girls are not always careful about the schoolyard, nor are they careful about the streets which lead from their homes to school. Perhaps they would not be so careless if they realized that the street is the hallway which connects the school and the home, and that the careless throwing of papers and rubbish into the street means dirty streets, papers flying all about and dust that gets into the eyes and noses and throats of people, often causing sickness and even death in the community.

Children Cry

"I hope you were not cross to her. Husbands and wives should never quarrel, you know."

"Oh, we didn't fight. Bessie was our maid, and she quit without giving us notice."—Minneapolis Journal.

# STUDY MARS NEXT WEDNESDAY

Next to the recent solar eclipse the most interesting event of the present month is the opposition of Mars, which occurs next Wednesday.

The ruddy planet is at the time in the constellation Leo, about 18 degrees north of the celestial equator and, so far as his position in the heavens goes, very favorably placed for observation. As regards his distance from us, however, the present opposition is far from favorable; the closest approach of the two planets, on the day preceding the opposition is, according to the Scientific American, 62,500,000 miles. The orbit of Mars is decidedly elliptical, so that, though his mean distance from the sun is 141,000,000 miles, his greatest distance is 154,000,000 miles, and his least only 128,000,000. The earth's orbit is much more nearly circular, the greatest distance from the sun being 94,500,000 miles, and the least 91,500,000, and the two orbits are so disposed in space that the aphelion of the earth—its remotest point from the sun and the perihelion of Mars—its nearest point to the sun—are nearly opposite to one another. If, therefore, the earth passes between the sun and Mars at the time when Mars is in perihelion, the distance of the two planets is only 34,500,000 miles—the smallest possible value. Such a "favorable opposition" always occurs in the latter part of August, for it is at this time every year that the earth reaches the appropriate point in her orbit.

**Opportunity Favorable**

At a February opposition, on the contrary, Mars is near his aphelion, and more than 60,000,000 miles outside the earth's orbit—the present month furnishing an almost perfect example. Since it takes the earth a little more than two years to catch up with Mars, each successive opposition comes some 50 degrees farther east in longitude than the last, and the point of opposition works slowly around the sun, taking about 16 years to complete a circuit. Favorable oppositions therefore come at intervals of 15 or 17 years. The last one was in 1909, and the next—an unusually good one—will happen in 1924. After one of these dates the oppositions are successively less favorable for some eight years, and then gradually improve again.

At the present time Mars shows a telescopic disk a little less than 15 inches in diameter and appears to the eye like a star of magnitude—1.0—that is, three times as bright as Capella, and about 60 per cent as bright as Sirus. At a favorable opposition his diameter is fully 25 inches, and his magnitude is 2.7, making him nearly three times as bright as Sirius, and nearly five times his present brightness. There are, however, certain observations for which the present opposition is valuable, for it is now summer in the Northern hemisphere of Mars, and his Northern temperate and polar regions are turned toward the sun, and are therefore visible, while the South pole is turned away and is invisible. At the favorable oppositions the reverse is the case. The south polar regions, and indeed the southern hemisphere generally, can then be well studied but the Northern regions must wait for occasions like the present.

The passessor of a small telescope, though he may be disappointed in the small apparent size which Mars presents, can nevertheless see things of real interest, the darker areas which spot the generally ruddy surfac, and the conspicuous white polar cap, shrinking as the Martian summer advances. The finer details, and notably the much discussed "canals," can, of course, only be seen with instruments of very high power. The present Martian season is about half way from the vernal equinox toward the summer solstice, corresponding to the beginning of May on the earth. The polar cap is large, and shrinking rapidly, while according to Dr. Lowell's latest bulletin, the Northern canals are prominent and the Southern faint.

# 50,000 WORKERS GO ON STRIKE

New York—More than fifty thousand waist and dress makers determined to fight until their demands for shorter hours, more moneyl better sanitary conditions and fire escape facilities are grantedi stopped work yesterday afternoon at two o'clock in a general strike. The strike came after the failure of the Managers' Association which employs more than twenty thousand of the strikers, to live up to the promise made last Monday that they would grant the demands of their employes.

As the situation now stands the garment industry is practically at a stand stilli and at no time during the last six months has it been so prosperous. Arrangements have been made by the New York unions to cal la sympathy strike of the employes in Newark, Boston and Philadelphia if the demands of the New York workers, are not met and the New York employers tr yto send goods to those cities to be finished.

# 7 FEDERALS ARE BOUGHT BY PAT.

New York—Seven Federal League ball playersr were sold yesterday to thrree clubs in organized baseball through the efforts of aPtrick T. Powers, representative of Harry F. Sinclair, the Oklahoma "angel" of the defunct organization. To the Braves went Edward Kometchy, first baseman "Baron" Knetzer, right hand pitcher and Frank Allen, left hand pitcher; the Reds obtained "Heinie" Cchulz, a left hand pitcher; "Jimmy" Esmond, shortstop, and Emil Huhn, a catcher, and the other man, Grover Gilmore, an outfielderr, was sold to St. Paul, of the American Association.

Boston is said to have paid $18,000 for the services of the trio who were taken from the Pittsburg Federal ash-heap. Konetchy, Allen and Knetzer all have had experience in the National League and are rated among the stars of the game. Konetchy for years played first base for the Cardinals, but was traded to the Pirates in 1914. He could not agree on salary with the Pirates and jumped to the Federals,playing with the Pittsfeds all of last season and astonishing his friends by his brilliant work. He will be a welcome addition to the Braves, since Charles Schmidt has retired from baseball.

## SING SING ALUMNI WANT PROTECTION

New York—Adequate police protection for the sixty alumni of the Mutual Welfare League of Sing Sing Prison, who will meet at Carnegie Hall next Monday night, has been promised, upon the plea of Daniel Howard and Phillip Friedman.

On that evening man yof those sixty "graduates" of the reform system begun by Thomas Mott Osborne at Carnegie Hall anw will tel lthe audience which already has purchased all of the boxes and seats, how good life in Sing Sing is now since reform entered it

# SILKS GETTING SCARCER; FAMINE IS SEEN HERE.

**Shortage of Dye and Cost of Labor Given as Causes.**

The silkworm has turned.

And the whole world of styles and textiles is on its knees before the royal cocoon. The silk loom worker, once so humble, is demanding the wages of a baseball star or a prima donna. Dyestuffs of all colors are getting as rare as the rainbow. A worldwide silk famine is threatened. At the present time silk which once retailed at 75 cents a yard now sells for $1, and goods once ticketed at $1.25 now command from $1.50 to $1.75 a yard. Wholesalers see a rise of 30 per cent in silk prices next fall.

Prosperity is at a high mark, and millions of women are financially entitled to revel in silk, and nothing but silk, for gowns, underwear, stockings and nightgowns, it was asserted. With the heaviest demand for silk in years, stocks are dwindling to such an extent that even the greatest wholesalers predict a "hand to mouth" era in supplying the market. The dyestuff shortage comes on top of a dearth in textiles in all corners of the globe.

And then there is a paucity of loom workers, who, it seems, can earn better wages lifting shrapnel shells on flat cars than performing the delicate and skillful operations required on the loom.

"It is most essential that the dye shortage be relieved before we can hope for anything approaching normal in the silk industry," said a dealer who has worked "in silks" for more than forty-eight years. "The public does not realise how serious the dye problem is. Germany has not only quit sending dyes, but has practically quit making them. Its chemists have found that the same elements may be useful in munitions. Imitation rubber for motor trucks is one of the products practically produced from dye materials.

"And in this country dye materials are soaring so high that recently in New York a barrel of red coloring matter which a firm had bought before the war for $100 was taken for $7,000. One manufacturer recently informed a customer that no more orders would be taken for navy blue and Russian green in silks. Other hues are diminishing rapidly."

**Many Kinds of Monkeys.**

The ordinary reader hardly realizes how many varieties of monkeys exist. We hear of monkeys in the Indies with reddish brown bodies, black heads and faces of a sky blue. There are monkeys with white eyelids and green monkeys to be found on the African continent and Cape de Verde islands. The howlers, which inhabit South America, are large and fierce, and travelers describe their yells as absolutely appalling. So dreadful is the sound of their roarings that one would imagine that all the beasts of the forest had gathered together for a battle. These creatures are so fierce that even the most skillful and adventurous trainer is unwilling to teach them tricks.

## Adkins' Accounting and Cost System to Bear Inspection

City Chamberlain Adkins is in receipt of a notice which tells of the intended visit here of Deputy Comptroller Sock, of the State Accounting Department, whose arrival is expected next Monday. The purpose of the call will be to inspect Mr. Adkins' method of municipal accounting, news of which has been received by the Albany officials who are at present compiling a new and standard system of work for cities of the third class.

It so happens that Mr. Adkins' work has come under the eyes of the Accounting Department officials at the right time, or just when they are looking for tips on the big subject they have in hand. This is the result of the officials receiving a copy of Mr. Adkins' financial report which reached Albany at the hands of City Attorney Hillick.

In praise of the accounting system devised and now used by the City Chamberlain it is claimed his method departs from thep practices of other city officials, and further that it is founded upon strictly mercantile principles, embracing a thorough cost-finding system. This latter item is not yet worked out and in use, but it is accomplished the Chamberlain hopes to give clear and concise statements of the cost of operating the city's public schools, thus placing the officials in a position to curtail expenses where there appears to be an undue amount of money spent. The system will not stop with the schools, but will reach every one of the city's departments.

There is no doubt but what the chart maintained in Mr. Adkins' office showing the condition of his books from day to day will receive particular scrutiny from the State official. In consecutive columns on the chart appear items of taxes receivable, cash, appropriation funds, school funds, sewer fund, public works fund, improvement fund, light fund, poor fund, police, fire, general and excise funds, appropriations payable on demand, water taxes receivable, cash, and water fund, which columns are totalled each day before the close of business so that ony may see at a glance the exact financial standing of the city. In this way, Mr. Adkin states, the possiiblty of overdrawing a fund as has occurred in the past, will be entirely eliminated. It will also be possible to tell by the chart the rate at which the various tax assessments are being paid, and if the Common Council desires on a certain date to know what per centage of het assessments have been received, this information can be furnished at a moment's notice.

## WOMEN LEARN DEFENSE IS IN THEIR KEEPING

New York.—"If disaster comes upon this nation through lack of military preparedness, the women will be to a great extent responsible."

That is what Major John W. Loveland, National Guard, New Jersey, told one hundred enthusiastic women who heard him yesterday at the headquarters of the National Special Aid Society, . .o. 597 Fifth avenue.

Major Loveland spoke on "Woman's Influence in Preparednsss." In illustrating the influence of women which the society will have to oppose, the speaker read several anti- enlistment and anti-preparedness circulars. The circulars were roundly hissed.

"The woman whod oes not raise her boy to do his share as a soldier," said Major Loveland, "if the call comes, has no right to ask or expect protection for herself from some other mother's son.

"Women should be the foremost advocates of preparation, if only from selfish motives. We want peace, but not peace at some price which might be charged. We want peace, but not with dishonor. We want peace, but unless the women of America have greatly changed, thye would not have us too proud to fight for it.

"Universal, compulsory, military training and service for a limited and reasonable period is the only safe and sound solution to our problem of national defense."

## CHAMBER OF COMMERCE

*"Fulton First, Last and All the Time"*

There are two kinds of people on earth today,
Just two kinds of people, no more I say.
Not the sinner and saint, for 'tis well understood
The good are half bad, and the bad are half good.
Not the rich and the poor, for to count a man's wealth
You must first know the state of his conscience and health
Not the humble and proud, for in life's little span
Who puts on vain airs is not counted a man.
Not the happy and sad, for the swift-flying years
Bring each man his laughter and each man his tears.

No; the two kinds of people on earth I mean
Are the people who Boost and the people who lean.
Wherever you go you will find the world's masses
Always divided in just these two classes.
And oddly enough you will find, too, I ween,
There is only one booster to twenty who lean.
In which class are you? Are you easing the load
Of overtaxed boosters who toil down the road?
Or are you a leaner, who lets others bear
Your portion of labor and worry and care?

* * *

"Trade at Home" is a correct community maxim. Where it is loyally adhered to it invariably produces community prosperity. Keeking the money at home creates thrift. There is every business reason why people should trade at home as much as possible. While there is every business reason why they should, there is no legal reason why they should, and they are not compelled by law to do so. It is not a crime to buy outside one's community, but it is a patriotic duty to buy at home.

So much for the buyer. The story of home trade loyalty, however, would be one sided if it stopped with the buyer. The seller has duties of the community. He must sell it at a price that will keep the fair minded buyer at home. Trade is taken away from home communities largely by foreign advertising. Foreign sellers cannot go into every community. They rely entirely on foreign mediums in the way of foreign papers, circulars and catalogs. None of these as advertising mediums equal the local papers. So, after the home seller, who wants the home trade, has on his shelves the wares which the home people need and want, he should do as the foreign seller does, go after the business by advertising. He should patronize the home papers, which have the very best advertising mediums of all the advertising mediums. The home buying is a great and vital business question, but more depends upon the home seller than anyone else. He must be the most active. He must make the fight that retains business at home. He has many advantages, but they will not avail him unless he is active. He can't buy the wares he needs individually, away from home, and expect the home people to buy at home. He must wear and use home wares if he wuold have others to wear and use them. Then he must meet foreign advertising by home advertising. Home trade is a sure source of home prosperity and home thrift.

* * *

### LIMITED LONGED FOR A SIGHT OF BROADWAY

As a southbound Empire United Railways limited car crossed Broadway, yesterday, it came "within an ace" of overturning. The front and rear trucks took separate courses, the front wheels remaining on the First st. tracks, while the rear truck swung into Broadway.

The motorman's alertness brought the car to a sudden stop. The trolley pole had remained in contact with the wire in 1st st., which prevented the car from losing its friendly feeling for Broadway. A large audience watched the crew return the car to the course it was meant to pursue.

### DISTRICT ELDER JOINS THE SHELDON FORCES

Rev. G. L. Skinner, district elder, has arrived at the home of Rev. C. A. Balch. He will preach at the Free Methodist church tonight at 7:30. This will be the first service of the quarterly meeting which lasts over the Sabbath. He will also preach tomorrow at 2:30 and 7:30 p. m. He will be followed by the Sheldon evangelistic party which will stay four weeks.

## Tariff Commission Favored by Morse at C. of C. Meeting

BY D. S. HOLLENGA
*Secretary Chamber of Commerce*

Washington—The establishment of a proper tariff policy for the United States, was the subject of an address at yesterday's session of the National Convention of Chambers of Commerce. The speaker, Mr. D. P. Morse, made it very clear that a tariff commission is the only desirable way of giving the people good importing laws. In this way only can the tariff question be taken from politics. He said that heretofore the tariff question has made an issue during the national political campaigns, with the result that in the meantime the people of America are made to suffer. He welcomed the gradual awakening of the nation—an awakening that will soon prevent the politicians of the country from overriding the will of the people, making the latter subservient to the desires of the unscrupulous manipulators of the voters.

The necessity of establishing an American merchant marine was the subject of Mr. William H. Douglas's address, a striking point being the present, and from all indications the future, dependency, of the United States, upon a foreign power, for ships which would be needed to carry coal to our vessels at sea. He said that at present we are at the mercy of the foreign ship owner to supply Europe with the commodities and commerce of our country, and that the time is surely here when the American people realize that this condition of affairs should not last forever; that now is the time to start a merchant marine of our own.

Labor exchanges occupied the attention of Mr. Charles P. Neil, who called attention to the practice of many employment agencies whose system is to place a set of men at work, sending another set of men on their way to the same job, and holding a third set in abeyance and ready to leave headquarters for the positions held by the first lot of men.

The arbitration treaty existing between the United States and Argentine, by which all commercial disputies arising between the Chamber of Commerce of Buenos Aires and similar institutions in this country are settled amicably.

Never before has Washingtön witnessed a meeting like that of Wednesday evening. Hundreds of beautifully gowned women were present to assist in giving to Secretary Redfield a rousing reception. His speech was one more indication and one more proof that those persons who were at one time vitally interested in politics are changing their views. His remarks dwelt at length upon the fearful conditions existing in our country among the masses of people, because of not having secured sufficient educational advantages. "Too many good girls and boys enter life at an early age, knowing nothing at all and positively unable to view the world as they should. These young people are as a result unequipped to fight against the many storms which we all have to encounter," said Mr. Redfield, who also deplored the conditions which compel sweet womanhood to enter into employment at starvation wages; and that boys should be thrown into the world to fight minus proper educational advantages, or at least training for some kind of work.

At a future date I shall comment upon the address made by Mr. Howard Elliott, president of the N. Y., N. H. and H. railroad. His speech was illuminating, making clear the "railroad malady."

D. S. HOLLENGA.

## COLONEL HOUSE STEERED CLEAR OF ALL PEACE TALK

London.—As a psychological study, the reception which Colonel E. M. House, President Wilson's confidential emissary to European capitals, gave newspaper men at the Ritz Hotel today was interesting. As regards news it was sadly lacking in essentials.

The Colonel preserved his characteristic sphinx-like attitude throughout. His colorless replies to questions shot at him by a battery of Anglo-American reporters fell from his lips like stalacitites. Yet he was courtesy itself.

After the English newspaper men had withdrawn, the Solonel thawed somewhat and explained to the American reporters the difficulty of his position in connection with a mission which is probably without parallel.

He gave a characteristic answer when asked if, living on the top floor of the hotel as he is, he did not fear Zeppelins.

"I don't worry about them at all," he said. "I knew what it was to have shells and bullets flying around during the Civil War."

Asked regarding possible peace negotiations, Colonel House replied that he had heard no peace discussion anywhere, as he had purposely avoided them.

## 45—PHONE NEWS ITEMS—45

Friday, February 11, 1916.

"To know a little bit is dangerous," quotes the sage. Why not know enough and be on the safe side? It is wonderfully simple to acquire sufficient knowledge, we are told by those who should know. Didn't Dr. Charles Eliot tell us we could get a liberal education from a number of selected books? We are again reminded that it is easy to obtain a foundation of knowledge in a remarkably short space of time. A speaker before an advertising club recently named six books with which one should spend a half hour each night for six months and automatically become an educated man. It seems easy to tell a man he should read a certain set of books to gain knowledge, but it usually takes some training before a man can be sufficiently fit to read these books and get all the good out of them. And when he does reach that stage it is unfortunate that he in all likelihood requires a different guide to knowledge than the ones named.

The present isn't the first time a president has chosen a widow for his bride. Woodrow Wilson, it seems, is only a follower of a well established precedent. Washington, Jefferson, Madison, Fillmore and Benjamin Harrison selected widows for wives, while Tyler and Roosevelt took unto themselves two wives apiece, but none of these latter brides had been led to the altar before. As for Andrew Jackson, he established his own precedent and married a divorcee. This would lead you to believe that when the darts of Cupid strike home in our highest official circle they strike with exceptional force. Even the opportunities for comparisons have no terrors for the principals.

Time is divided into two periods by Professor Steinmetz, the electrical expert. The discovery of electricity is the dividing line. It is probable that Marconi counts the new era from the time he perfected the use of wireless, while Lake cuts his notch when the first submarine was launched, and Whitehead the torpedo, Maxim the silencer, and so on down the line, including Ford and his peace ship. They all have a claim. We can't very well discredit any one of them, so why not roll over and wake up in the morning to hail a new era on your own account?

Short skirts, which are now the fashion, could be easily understood if they were brought about in order to save wool for overcoats and blankets for the soldiers in the trenches. It is reasonable to suppose that the fighters at the front would pass a rather comfortable winter if this were the case.

Although the teachers complain that children have to learn too much, it is noticed that the overworked little ones do not learn enough grammar to make their speech painfully precise.

Japan gets one more step nearer to being modernized. The mikado rides in an open carriage at the conclusion of his coronation ceremonies, and the people insist on cheering him.

If you told most congressmen that Demosthenes was the most gifted orator of his day he would evidently say that that was 2,300 years ago.

Women of Georgia are wearing overalls for housecleaning. This may help to popularize the home.

The man without a pull often fares badly. Villa is certainly not proving an exception.

Did you know that 1910 is a leap year? Well, it is. Don't tell the girls.

## SMALL INDUSTRIES

It is the small industries that are now gaining notice in communities of wise ones, seeking truly to build securely.

It has been attested that numerous small and diversified industries are essential factors in the upbuilding of communities most certainly wherever such industries have been established.

Some of the big industrial localities of the country are handicapped because all of their eggs are in one basket; some large operating company has established a great plant and employs thousands of people. All goes well so long as the wheels of that one industry are going around, but when there comes a slackening up in the particular line in which the big plant is engaged there is stagnation. Fortunate is the community which has added along with the giant industry a number of small ones, employing from five to a hundred men, for their pay rolls keep the community ball rolling when the plant shuts down for "repairs and to await orders," as they invariably do from time to time.

The Kinston Free Press in a recent article says:

"Winston-Salem, the Twin City of the West, is a splendid example of progress and growth where diversified industry has had a part. The recent census statistics show that Winston-Salem has 73 manufacturing plants, which employ 10,964 persons—more than a third of the city's population is thus engaged in manufacturing pursuits, and consequently Winston-Salem is setting a pretty warm pace in community growth and progress."

## FARM WORK OF LINCOLN

Any little personal incident about Abraham Lincoln is eagerly read. After a generation, the interest in this wonderful man is wider and keener than ever. Recently, in printing a forgotten letter written by Lincoln touching a question of value to farmers, we mentioned that he once kept store. It called forth a letter from a native of Sangamon County, Illinois, who knew William G. Green, who bought the store. He says Lincoln never owned it and that he was therefore never sold out under execution. This flatly contradicts many biographers. One of the most important of them—Miss Ida M. Tarbell—relates with much detail how Lincoln was part owner of several stores. The main importance of all this is that in his dealings he bought an old barrel for a song—and at the bottom of the barrel found a complete edition of Blackstone's Commentaries, after which he does not seem to have had much time for storekeeping. Whether or not Lincoln was a genuine merchant we leave to the biographers.

What we were and are interested in is his connection with farm life. His forbears owned farms, first in New Jersey, then in Virginia, then in Kentucky. His father inherited nothing, but secured a farm by the time he was twenty-five. Abraham was born in "a one-roomed cabin with a huge outside chimney, a single window, and a rude door." The Lincolns had "a cow and calf, milk and butter, a good feather bed. They had home-woven 'kiverlids,' big and little pots, a loom and a wheel." As a boy Lincoln carried water, picked berries and dropped seeds. The farm included three fields with high hills and deep gorges.

As a man Lincoln told how when a boy he spent Saturday afternoon dropping pumpkin seeds over the big field, only to have a storm Sunday morning wash them all out. The family moved to Indiana, and there the land had to be cleared. It was primitive work. Abraham slept in the loft on leaves and climbed to his rest on pegs driven into the logs. For food there were corndodgers and potatoes. Abraham cut much with the ax, handled the plow, wielded the sickle, threshed wheat with a flail and drove the team. He was farm hand at twenty-five cents a day—and his father got the money. "Every lull in his daily labor he used for reading, rarely going to his work without a book," says one account.

Then came the removal to Illinois; here Abraham worked for his father until he reached his majority. There he did his famous rail-splitting. After he struck out for himself he made his way as rail-splitter and farm hand for a year. Then followed his other occupations—boatman, ferryman, clerk, surveyor. And whenever he could he was reading good books. Afterward came all the other things leading to fame.

Lincoln got the basis on the farm, but the rest of it belongs to the world. Neither farm nor store nor any occupation could contain all that genius, any more than a chicken coop could hold an eagle forever.—Country Gentleman.

## DAYTON'S GOVERNMENTAL EXPERIMENT

Dayton is elated over the fact that her experiment in municipal government has made good. To all appearances the commission form of government as carried on in Dayton is a success.

The city government of Dayton was not fortunate in the distribution of the tax money by the budget commission of Montgomery county, and as a consequence the revenues of the city are to be cut the present year to the amount of $187,000.

But the city management is able to announce that the city will borrow no money, will levy no assessments against property owners, nor will it do away with any portion of the city work. The feat of living within the city's means notwithstanding the cut will be accomplished by the exercise of rigid economy, both in advance of and during 1916, and by refraining from extensions of municipal activities—a thing to be regretted, but one which under the circumstances cannot be helped.

Dayton enjoys and deserves to enjoy the reputation of a well-governed city. The good management and good government are easily to be noted by the passing stranger in the vigilance of her police officers, in the brilliancy of her street lights, and in the cleanliness of her streets. We wish her example in these particulars were catching.

Dayton compares favorably with, if it does not excel, any city of her own class in the United States in the excellence of her municipal work. This is not all due to the commission form of government; for notwithstanding bad governmental conditions prior to the adoption of the commission form Dayton even then was well up in the scale. But the commission is governing Dayton very much as a great factory would be governed by a progressive and successful management.

We congratulate our wide-awake neighbor upon its successful pioneering in a difficult field, and we only wish that Xenia could find a way to do likewise.—Xeina (O.) Gazette.

## Opinions

### GIVE HER THE MONEY

A Pennsylvania judge has decided that if you lend your wife money it is hers. Of course it is. You might as well give it to her and get thanks for it. Besides that, a New Jersey court has decided that if you give your wife money it is half hers and half yours. So you save half of it when you give it to her and lose it all when you lend it to her. The moral is to give it to her.—Watertown Times.

### BY ITS FRUITS

Good for the souls of the American people as well as for his own is the perfect frankness with which Mr. W. H. Taft is able to discuss politics and affairs appertaining thereto. In pronouncing the primary system a failure Mr. Taft gives expression to a conclusion reached by every intelligent and unbiased observer of its workings. The primary is ideal machinery for "bosses" in communities dominated by these gentlemen of more or less disrepute who are able to use it to work their will and who welcome it because it has shown them of their old responsibility in selecting party candidates of respectability and strength.

General adoption of the primary system has brought coincident deterioration in the quality of the material for public service. It has placed a premium upon demagogy.—N. Y. Herald.

### ROUND AND ROUND

Theb uilding of the Panama Canal by the United States was advocated on the ground that it would double the strength of the navy.

The canal was only about half built when the experts found that it must be heavily fortified to protect the navy in protecting it.

The canal has now been fortified with what General Edwards, military governor of the Canal Zone calls the biggest guns and finest gun emplacements in the world. But these might be seized by an enemy operating from the land side, and therefore need the protection of an army of 25,000 men on the spot all the time.

Where is this claim of successive and "essential" dependencies to reach an end? If the canal must have a strong navy to protect it, and if the strong navy must have big canal fortifications to protect the navy in protecting the canal, and if the big fortifications must have a sizable army to protect the fortifications in protecting the navy in protecting the canal, who or what is to protect the suitable army in protecting the fortifications in protecting the navy in protecting the canal?—N. Y. World.

### TWO JOKES WITH A MORAL

All the country has been chuckling at the expense of the Cleveland school board, which, having somehow been enticed into trying the examinations wherein the children are expected to make good, failed to qualify.

Now Cleveland is again to the front with another hilarious story. Under the Binet test, it being disclosed that sixteen hundred Cleveland boys and girls were "feeble-minded," the school board decided to see how the test would work when applied to the directors. Six directors were shown to have a mentality which, allegedly, would class them with "defectives."

In the examination affair the joke was exclusively on the school board. In the Binet matter it may be divided up between the test and the directors. The charitable common-sense, which however much it may smile inwardly, is loth to assume that several of Cleveland's paragons of pedagogy are, to put it bluntly, under-witted, may also be preperly extended to the sixteen hundred Cleveland children, whom an arbitrary decree of science, so-called, has stigmatized as not quite so bright as their fellow pupils. It is far from pleasant to be characterized as below the average "smartness" of mortals, whether one is a child or a director.

But the moral of it all is that school ordeals, be they mental or physical, sometimes bear pretty hard upon the children. The board which couldn't get past its examinations, and the directors who didn't measure up to the Binet standard, can afford to laugh at themselves and probably will.

But it isn't a laughing matter for a child to fail in its studies and it is a serious thing for a kind to be officially placarded as idiotic.

A tragic and reiterated reminder of the heavy responsibility of modern education to the child under its charge, is the account, which keeps recurring with distressing frequency, of some girl not old enough eo wear long skirts, or some boy, yet in knee-trousers, who commits suicide because of failure at school examinations.

Be easier with the children.—Buffalo Times.

**An auction advertisement in The Evening Times for six days prior to the sale is the cheapest way to advertise a sale. adv.**

## This Was Pretty Soft For Charley

### NEW APPORTIONMENT WOULD AFFECT CITY

Albany.—Manhattan will lose eight Assemblymen in the new apportionment of Assembly districts of the State under the scheme now under consideration. New York city will lose one representative in the lower house of the Legislature, the delegation numbering sixty-two instead of sixty-three.

New York city will gain one Senator, the new member going to Queens For the rest of the city the representation will stand as it is. The number of citizens in New York, which is the basis of the apportionment, is 3,842,419. If the city gets sixty-two Assemblymen and twenty-three Senators, its representation in the Legislature will be smaller than for the proportionate citizenship up-State.

### STATE TEACHERS' FUND GETS DECISION

Albany.—Supreme Court Justice Rudd today signed an order directing the city Comptroller of Yonkers to turn over $53,000 of the local Teachers' Retirement Fund to the State Teachers' Fund, and thereby upheld the constitutionality of the law creating the State fund. The Yonkers Board resisted the transfer on the ground that the law authorizing such transfer on the petition of two-thirds of the teachers of any municipality was not constitutional.

The effect of the decision will be to facilitate the transfer of the local funds of many municipalities. Hundreds of teachers in New York have been urging such transfer, and movements are on foot in Albany, Troy and other cities to bring the local funds under State control.

### OATH OF A MOTHER MAY BE LIMITED

An opinion has been given by Attorney General Woodbury regarding a technical question in the Child Welfare Law which has been puzzling the local board as well as other boards about the state. The opinion relates to an oath that the law requires a widow to give in applying for aid from the Child Welfare fund in counties. In his opinion Attorney General Woodbury sets forth that a mother is not required in order to receive aid, to take oath that without it she will be compelled to send the children to a charitable institution.

The question referred to is in subdivision 3 of Section No. 153 of the law. The attorney general states that the law should receive a reasonable construction.

"There certainly would be no alternative so far as the question of whether the Board of Child Welfare should require and direct that a child should be cared for at an institution if they did not see fit to grant an allowance, as the law does not give them the authority for asking such determination or carrying the same into effect," the opinion says.

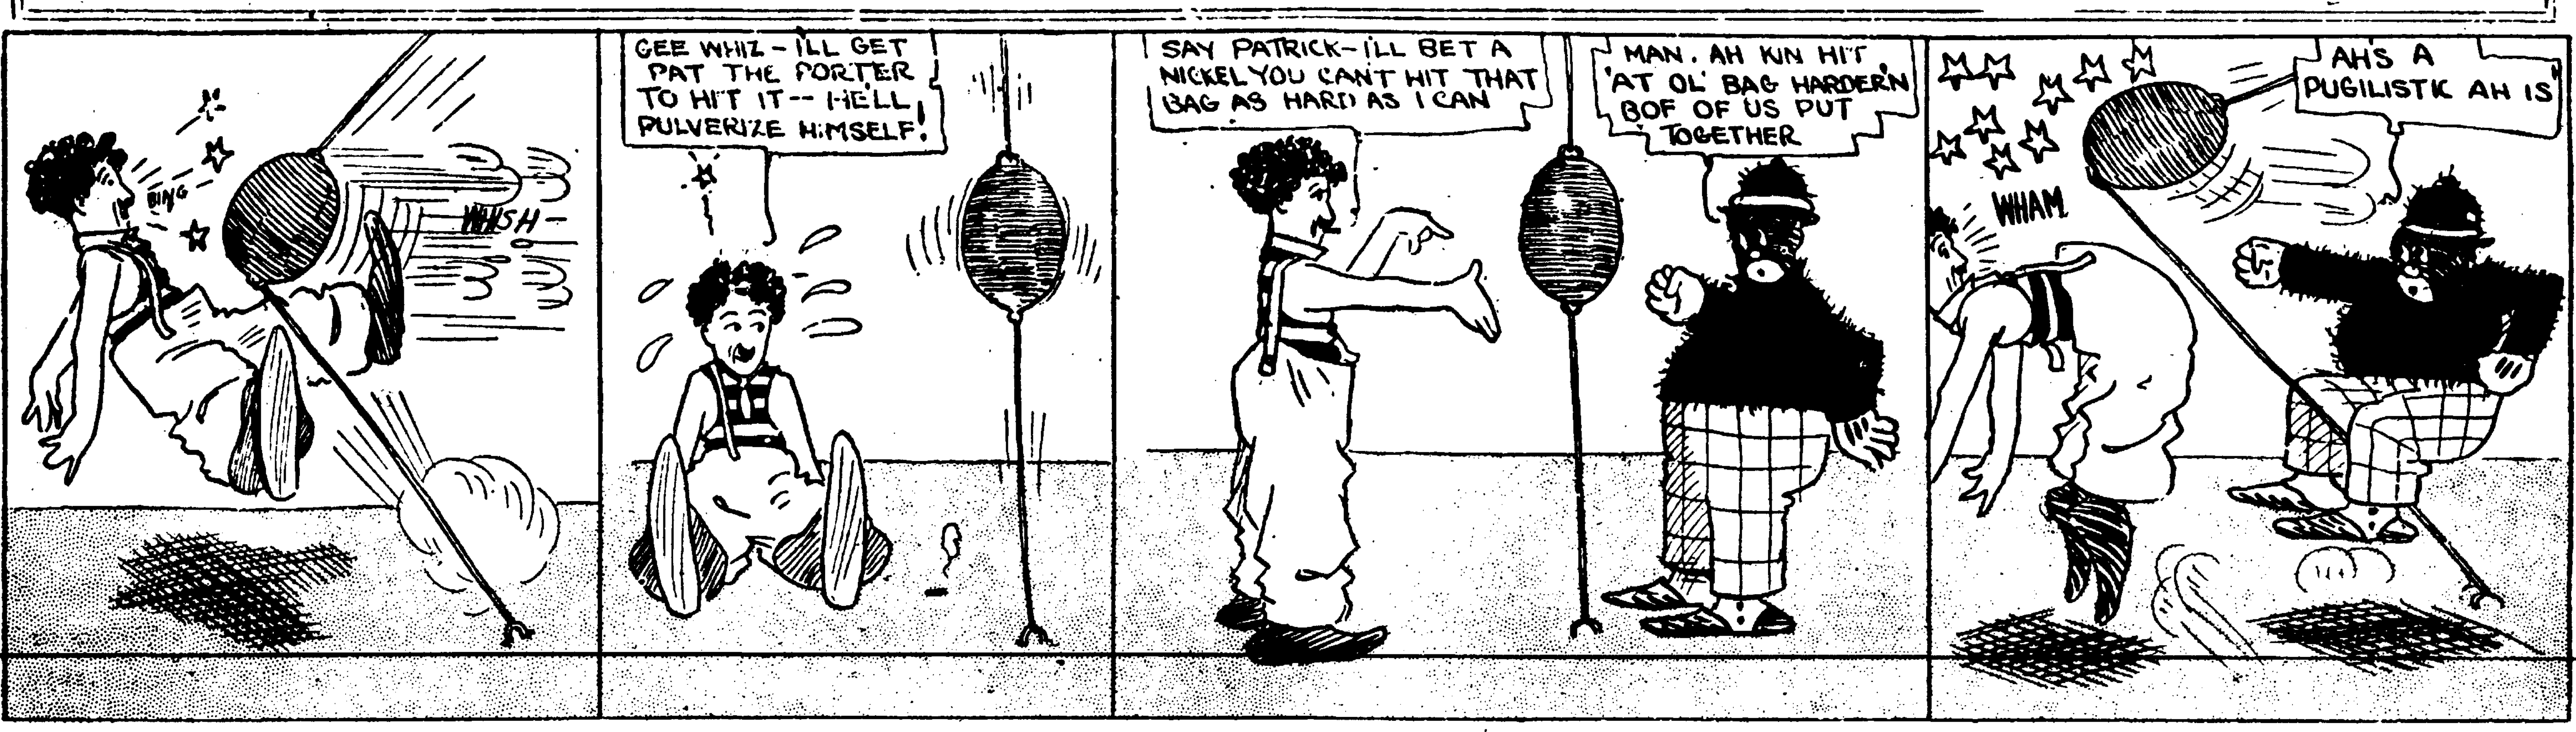
"We think that the clause, 'If such aid is not granted the child or childrren must be cared for at an institution or home,' means that the board must be of the opinion that it would be a proper case for commitment to such an institution under the circumstances of the case, if there were no other alternative.

"I think the whole matter is left to discretion of the board," the attorney general says, "to determine what is proper to do in each individual case, and the words in the clause referred to are placed in the law so that there will be no granting of aid where parents are able to take care of their children."

# Charley Chaplin's Comic Capers

## A Drama With a Punch

Copyright, 1916, by J. Keeley.



# Our Washington Letter

SPECIAL CORRESPONDENCE

Washington.—From the West and the Northwest comes the interesting rumor that large numbers of Democrats refuse to follow Mr. Wilson's sudden change from pacifism to militarism and that they are planning to join with the few Republicans who favor peace at any price in an independent political movement which will nominate Bryan and Ford as a presdential ticket.

The originators of the plan admit that the larger portion of whatever support the ticket may secure will come from the Bryan element of the Democratic party, but they are hopeful that enough Republicans will join them to enable the Bryan-Ford ticket to carry several States in that part of the country. The territory in which this movement is springing up is naturally Republican and. with the reunion of Republican strength which has taken place, has been counted sure for the nominee of the Chicago convention. If a Bryan-Ford party should gain any considerable number of electoral votes eitherr there or elsewhere, it might result that no candidate would gain a majority of the electoral college and that the choice of a President would again be thrown into the House of Representatives—the first time that such a thing has happened. it is recalled, since the election of John Quincy Adams.

In such an event each State would cast one vote—to be determined by the majority vote of its representation in the lower branch of Congress. This would produce a Republican President.

Twenty-four States have a Republican majority in their Congressional delegations. They are Connecticut, Delaware, Idaho, Illinois, Iowa, Maine, Massachusetts, Michigan, Minnesota, Nevada, New Jersey, New York, New Hampshire, New Mexico, North Dakota, Ohio, Oregon, Pennsylvania, Rhode Island, South Dakota, Vermont, Washington, Wisconsin and Wyoming.

Twenty States are Democratic in their Congressional delegations. They are Alabama, Arizona, Arkansas, Colorado, Florida, Georgia, Indiana, Kansas, Kentucky, Louisiana, Maryland, Mississippi, Missouri, Montana, North Carolina, Oklahoma, South Carolina, Tennessee, Texas and Virginia.

Three States are tied. They are Nebraska, Utah and West Virginia. And one State, California, has a delegation in Congress comprising three Republicans, three Democrats, two Progressives, one Progressive-Republican, one Independent and one Prohobitionist. Consequently, the report of a Bryan and Ford movement arouses only a academic interest among Republicans here—while the Democrats are already so despondento ver their prospects at the next election that nothing can add to their gloom.

## KILLED FOR SPILLING SALT.

**Stabs Follow Convict For Act Committed In Dining Hall.**

Leavenworth, Kan.—Henry Schmidt, a prisoner at the United States penitentiary here, was killed recently by J. S. Jones, another convict, as the result of a quarrel which started the night before when Schmidt spilled salt on Jones' bread in the dining hall. Jones stabbed Schmidt in the breast with a piece of steel when the prisoners were forming in line for dinner.

Schmidt was serving a three year sentence for army desertion and larceny. He was received June 7, 1915, from Governors island, New York.

## AVIATION COMPANIES MERGE FOR BUSINESS

New York.—Official announcement was made yesterday by the Curtiss Aeroplane and Motor company that it had acquired the stock of the Burgess Aeroplane company and that W. Starling Burgess would at once become a director of the Curtiss company. Thus the capacity of the Curtiss concern in the output of aeroplines becomes the greatest of any single aeroplane manufacturing company in the world, it is said by authorities in aeronautics

### GOOD DEED IN NAUGHTY WORLD.

There was a man in our town, and
he was wondrous rich;
He gave away his millions to the
colleges and sich,
And people cried: "The hypocrite!
He ought to understand
The ones who really need him are
the children of this land."
When Andrew Croesus built a home
for children who were sick
The people said they rather thought
he did it as a trick,
And writers said, "He thinks about
the drooping girls and boys,
But what about conditions with the
men whom he employs?"

There was a man in our town who
said that he would share
His profits with his laborers, for
that was only fair,
And people said: "Oh, isn't he the
shrewd and foxy gent?
It cost him next to nothing for that
free advertisement."
There was a man in our town who
had the perfect plan
To do away with poverty and other
ills of man.
But he feared the public jeering and
the folks who would defame
him,
So he never told the plan he had,
and I can hardly blame him.
—New York Tribune.

## WILSON'S IDEA OF A HERO.

**Men Who Risk Lives to Better Conditions Are the Brave Men.**

Here is President Wilson's idea of a hero, expressed in a letter from him to Secretary Lane:

"The rescuer of the bureau of mines who braves the poisonous gases and saves a miner from death, the coast guard who at the peril of his own life saves passengers of a helpless vessel from death, the surgeon of the public health service who stops a dreaded scourge in its incipiency, the engineer who succeeds in reducing the hazards of industry to its men and the man who brings about better conditions of living among people I consider all types of the hero who will be best regarded in the near future."

## PRISONERS OFFER CANES.

**Want to Sell Product to University Students.**

Hearing that the law students at the University of Washington were planning to "wear" canes this year, No. 7795, an inmate of the penitentiary at Walla Walla, has sent two samples of his craftsmanship in the hope of opening a market for the spare time product of the prisoners.

The canes are of leather with a steel foundation, and the handles are of German silver with inlaid bits of abalone shell.

The manufacturer has set no price upon his art, preferring to leave that to the "good judgment" of his customers.

**Seventeen Varieties of Congratulations.**

Salutations in seventeen languages were given to Judge Sulzberger of Philadelphia at a special reception tendered to him. The occasion signalized Judge Sulzberger's retirement from the bench.

**Bread Leavened With Snow.**

The use of fresh dry snow as a leavening agent is not new, but the way in which it acts seems to be misunderstood to some extent. The popular explanation is that the raising of the dough is due to ammonia in the snow. As a matter of fact, snow contains but a very slight amount of free ammonia, probably not more than one part in a million. This quantity is, of course, by far too small to cause any expansion of the dough. The leavening action is due to the entangled air in the snow. The air expands on heating to several times its original volume, thus expanding the dough. Steam is formed at the same time and aids in the rising process.—Exchange.

**OPPORTUNITIES.**

Opportunities are very sensitive things. If you slight them on their first visit you seldom see them again.—Ruskin.

# RELIEF FOR NEW YORK CITY

## Brown Committee Will Make Important Recommendations to Legislature.

## TO SHARE CERTAIN TAXES.

**Unbusinesslike Methods to Be Discontinued — Committee's Attitude Throughout Has Been Helpful Bankers and Business Men Co-operate With It.**

New York.—Four-fifths of all the mandatory legislation complained of by the New York city administration as responsible for the administration's present financial difficulties was enacted in 1911 and 1913, when the legislature was Democratic in both branches and the majorities in both houses dominated by city members.

New York city has gone on taxing real estate until some relief is absolutely necessary.

New York city has not shared in the distribution of the highway funds.

New York city has been paying the entire cost of the First division public service commission.

Mayor Mitchel strenuously objects to having the pay of schoolteachers in the city schools fixed by law instead of being left to the board of estimate and apportionment. President Churchill of the school board is just as strongly opposed to having teachers' salaries fixed by the board of estimate.

The city administration urges that the city should be relieved of a direct state tax. (The direct state tax paid by the city this year amounts to 6 per cent of the city's budget.)

These points have been brought out at the hearings given by the joint legislative committee that has been investigating the financial condition of the New York city administration with a view to giving relief.

**Relief Measures to Be Recommended.**

The committee has closed its hearings, and its report is expected to reach the legislature within a week.

A number of relief measures will be recommended.

The committee will recommend that one-half of the automobile tax will be given to all counties to be used for the maintenance of roads. This will permit New York city through its five counties to share in this tax, which at present goes entirely to the state. All other counties will also share.

The mortgage tax and the excise tax are shared by the state with the counties, but the temporary addition of 25 per cent to the excise tax under the law goes entirely to the state. The committee is likely to recommend that this be shared like the rest of the excise tax.

The committee also is likely to recommend the abolition of the direct state tax and the payment of the regulatory cost of the First division public service commission by the state.

The committee is in favor of having the state take over Hunter college and run it as a state normal college, thereby relieving the city of the cost.

The question of teachers' salaries probably will be left to the determination of New York city voters.

Members of the committee are of the opinion that the city administration can find a large measure of relief through the exercise of its right of license in the matter of signs, street encroachment and many other privileges. It is estimated the city's revenues can thus be increased $6,500,000.

**Reduce the Tax Levy $30,000,000.**

A summing up of the various relief measures now under consideration by the committee shows a total relief to the taxpayers of New York city, through the reduction of the tax levy, of $30,000,000.

The members of the committee are not at all sure that all has been done by the New York city administration in the way of economy that can be done, but it has undertaken to remedy every legitimate complaint that the city appears to have against the rest of the state. Bankers and business men who appeared before the committee have co-operated heartily, and their assistance has been of the greatest value. The city's practice of borrowing money in anticipation of the tax levy which added an interest burden of between $3,500,000 and $4,000,000 a year was objected to by Chairman Brown as unbusinesslike, and this objection was supported by leading bankers, who also said that the city was carrying too large a floating indebtedness. This practice will be stopped, and the city's floating indebtedness reduced.

**No Issue Between City and State.**

The testimony taken by the committee showed wider differences of opinion within the city than between the city and up state. The committee's attitude throughout has been helpful and conciliatory, and the disposition was plainly manifested by the up state legislators that the legislature should and would relieve any irritation between the state and its greatest city. The testimony shows partisan claims to be without foundation.

To make up any loss in revenue which the state will sustain through the division of certain taxes the committee will recommend the re-enactment of the law taxing nonresident inheritances, as was done prior to 1911, which will yield about $5,000,000 a year.

## The Silent Company

If once the dead could speak! * * * If
they who went
Gurgling beneath the brine and moved no
more,
If they who through the vapors born of
hell
Battled for breath and sank in tumbled
heaps;
If they who knew the sudden stab like
fire
And screamed aloud and into silence
passed,
If they who through the ache of thunderous hours
Moaned thinly for the end, yet in the dust
And smoke of engines vomiting black
death
Still lay neglected by their very God;
If they who in the glad line suddenly saw
Their goodly bodies stricken and the gush
Of widening red that brought the message
home;
If they who in the ghostly aisles of white
Went out like lamps beneath the balm of
sleep;
If they who writhed on trench floors black
with blood,
Or whimpered in the tents of cotted woe,
Or raved thirst harried in the falling rain;
If they who gave abruptly all the surge
Of warmth and singing hope that made
them men
And now sleep still as sand beneath the
flow
Of rivers, not of water, but of blood—
If they could speak I wonder then if war,
Confronted by the legions of the dead,
Could dare to answer when God questioned, Why?
—Arthur Stringer in McClure's Magazine.

**Did They "Hock" Them?**

"In the olden days they had no watches, you know," said the father.

"And how did they tell the time?" asked the son.

"By sundials."

"Well, father," said the young man, feeling of his watchless chain, "how much could a fellow get on a sundial, do you suppose?"—Exchange.

**BEAUTIFYING THE CITY.**

A report of the city plan commission of Newark, N. J., says: "In regard to improving the appearance of the city streets and public places the practical plan appeals to the reason, the beautiful plan to the heart. The former makes a man passively contented and comfortable; the latter makes him actively proud of his city. It arouses an ardent patriotism that must express itself in deeds. The charming city is loved by the man who lives there. Practicalness without beauty leaves him cold. The complete city must be beautiful. Our better natures demand beauty. Unconsciously we want pleasing things for the eye to rest upon all about us."

**BELL-ANS**
Absolutely Removes Indigestion. One package proves it. 25c at all druggists.

LOIS MEREDITH

YOUNGEST STAR ON STAGE.

**Lois Meredith Featured in "The Precious Packet," a Donald Mackenzie Pathe Production.**

When Donald Mackenzie secured Lois Meredith for his Pathe production "The Precious Packet," he got the youngest star on the stage today, for Miss Meredith is only eighteen years old. Look at her, and you'll wonder that so much genuine talent is to be found in so girlish a little lady. Yet she followed Laurette Taylor in the leading role of "Peg o' My Heart," was featured in "Help Wanted," and played "Modesty" in "Everywoman." She has not yet reached the age where women, and especially those on the stage, choose to forget their birthdays, so her eighteen years are not fancied, but real.

Little Miss Meredith can dance and sing more than ordinarily well, and hopes for a part in the spring in which she can utilize those talents. Despite her tender years she studies French, music and literature from choice and not compulsion (therein differing from most girls of her age) and works hard at her chosen profession, for she has a number of younger brothers and sisters to look after, and when she travels she takes the whole brood with her.

Miss Meredith was born in the United States, but spent her earlier years in Ireland, which explains her delightful accent when she forgets herself. In the Paris Salon was exhibited a statue which was much admired, for which she posed for arms and hands, for hers are considered by sculptors to be perfect.

"The Precious Packet," in which Miss Meredith is featured, was written by Fred Jackson, and is on the Pathe Gold Rooster program. It is the universal verdict that it fully measures up to the high standard of this series.

## A LA MODE.

**An Ultra Skating Suit For Her of the Fad.**

"WANT TO GO?"

Beige colored uncut corduroy develops this smart costume, a short, full skirt and a three-quarter coat, with muff, scarf, cuffs and border of seal. The loose belt and novelty buttons give a girlish finish, while the top of the button boots are "cuffed" with seal.

## SO FEMININE!

**How Women May Powder Their Noses Without Giving It Away.**

Women are acquiring more and more the habit of pulling a powder puff from every imaginable hiding place and powdering their faces in public. It makes one conspicuous, and the average woman does not approve, but she answers that one must powder, and in this day of rush and distances she cannot always take time to freshen up in the proper way.

It is surprising, considering that the handkerchief is very often a hiding place for the powder puff, that some ingenious woman did not think of this new contrivance before. Stitched flat on the center of the handkerchief is a neat pocket-like arrangement, which acts as a receptacle for the puff. The puff may be taken out when the handkerchief is ready to be laundered. The puff in itself is odd in that it opens wide enough at the top to permit a generous supply of powder to be emptied in and fastens again with a snapper.

When one feels the need of powder the center of the handkerchief, in which reposes the puff, may be gently patted against the face, while to all outward appearances the owner has only been using her handkerchief, and likewise if only the handkerchief is desired one need not apply the center. And to add to the attractiveness of this contrivance they are to be made in many different designs, plain and embroidered, the same as handkerchiefs, and the carrier may also exercise her individual taste by replenishing the puff with her favorite face powder.

**Tulle Much Used.**

Great quantities of tulle are being used on evening gowns this season not only for fashioning the gown, but for trimming purposes, in wisps of draperies, scarfs and in one gown as a train. A black and gold evening frock shows a wide piece of tulle caught across the back of the frock and held with jet bracelets to the wrists.

Queer freaks are to be seen among some of the latest importations. A midnight blue taffeta coat is lined with blue serge, reversing the order of things generally. In a rose and black velvet evening coat, where the waist portion is of the lighter shade and the skirt portion of the other, the lining of satin reverses the color, the rose velvet being lined with black and the black with rose. A venetian purple evening coat is lined for a depth of eight or nine inches with a flowered and brocaded velvet ribbon, another proof of the ribbon craze.

**Coffee Charlotte Russe.**

Materials.—One-quarter box of gelatin, one-fourth cupful of cold black coffee, three-fourths cupful of hot coffee, one cupful of heavy cream, three-fourths cupful of sugar, yolks of three eggs, two tablespoonfuls of sugar, ladyfingers.

Utensils.—Bowls, saucepan, eggbeater, cup, spoon.

Directions.—Soak gelatin in cold coffee ten minutes. Caramelize three-fourths cupful of sugar, add three-fourths cupful of hot coffee and let stand to dissolve. Beat the yolks of eggs, add two tablespoonfuls of sugar and cook in hot coffee mixture until egg thickens. Add the soaked gelatin when dissolved; chill until mixture begins to thicken, then fold in cream whipped stiff. Put in a mold lined with ladyfingers and chill thoroughly.

## 1916 Is Baby Year

The facts about American babies, the needs of American babies and America's responsibility to her babies will this year be known as never before, because the first week in March will be baby week throughout the country.

More than 400 communities, representing every state in the Union, are already laying their plans for baby week, according to the children's bureau of the United States department of labor, in order that during those seven days the needs of the babies may be so presented that all the parents in those communities will learn a little better how to care for their babies and all the citizens will realize that they have a special obligation to safeguard the conditions surrounding babies. It is confidently believed by those who are interested in this nation wide baby week that the remainder of the year will be marked by a strengthening of all community activities for saving babies' lives and giving them a better chance to grow to a healthy maturity.

The baby week idea originated in Chicago not quite two years ago. Then New York had a baby week and Pittsburgh and other cities. Such practical benefit has in each case resulted that the General Federation of Women's Clubs has undertaken to promote this nation wide observance. State health officials and national organizations interested in public health and child welfare have taken up the plan and in various ways are giving it not only their sanction, but their active cooperation. The extension divisions of the state universities have promised special assistance in interesting and helping baby week in rural communities.

Baby week will give more parents a chance to learn the accepted principles of infant care and will awaken every American to his responsibility for the deaths of the 300,000 babies who, according to the census estimates, die every year before they are twelve months old.

## FOR THE TODDLER.

**With Its Bolero, This Small Gown Is Smart as Anything.**

Cut of white broadcloth on boxy lines, this small gown for the small girl is modish with hand embroidery

A 1916 MODEL.

done in pale blue worsteds. The belt, cuffs and bolero are of pale blue broadcloth, and ruches finish the flat collar and cuffs.

**For Contagions.**

It is important that the mother or nurse who is attending a child ill with a contagious disease should take a walk in the fresh air every day. The best way to arrange this is for her to keep a change of clothing in the next room. She should also bathe before leaving the quarantined room. If a bathroom has been set aside for quarantine she can use this; if not, a screen and a basin in the sickroom will have to answer. Then she can slip into the next room and put on fresh clothing.

She should leave the house by the back way preferably or, at any rate, avoid coming in contact with any of the occupants of the house. Once in the street she should not use the street cars nor enter any other house and avoid as much as possible touching any one.

The fumigation of a sickroom after a contagious disease is done by the board of health upon request in most cities, or it can be done by the family under directions of the physician.

**Eskimo Sets.**

For the littlest boy on his wintry rambles there come the comfiest brushed wool and knit sets that incase him from head to toe in frostproof armor. They consist of a little round cap topped with a pompon of wool or a woolen tassel or even a bit of fur, a close buttoned sweater, long tights and leggings combined and a pair of mittens or woolen gloves. The young hopeful rigged up in these garments looks like a very small cinnamon bear or a snow man, according to the color chosen.

**Chestnut Dressing.**

Boil a quart of shelled chestnuts in salted water until tender. While warm mash to a paste, adding a teaspoonful of salt, a dash of paprika and half the quantity of breadcrumbs, two tablespoonfuls of melted butter and a teaspoonful of poultry dressing. Blend the ingredients thoroughly, and if a moist dressing is required add a cupful of boiling milk.

## A Subtle Hint of the Orient

IS this design Chinese or Russian? The skirt surely suggests a pagoda. The three tiers of it with the narrow bands of skunk give a distinct effect, helped out by touches of hand embroidery around the peplum, blouse and sleeves. The Russian blouse closes on one side with oddly shaped buttons and fastens as high as a chin-chin. This costume instead of the brave bowed turban appropriately takes the close hat with its Chinese pompon atop.

• • •

The smartest kerchiefs for thrusting into the breast pockets of tailored coats are of sheer, fine linen with very narrow hemstitched hems in color. The one color woman will have a dozen of these dainty kerchiefs bordered with her favorite shade, but most women prefer a variety of shades, so delicate and desirable are the colors. One may purchase a box of these handkerchiefs with hems in flesh pink, pastel blue, buff, spring green and lilac.

• • •

You may make up grandmother's gay plaid shawl into a fashionable separate skirt with fringe around the bottom. Such a skirt is good with an odd sports coat.

ANNA MAY.

## *Easy & Practical Home Dress Making Lessons*

*Prepared Especially For This Newspaper by Pictorial Review*

**For the Spring Wardrobe.**

Both interesting and chic is this simple frock of embroidered voile trimmed only with its own material.

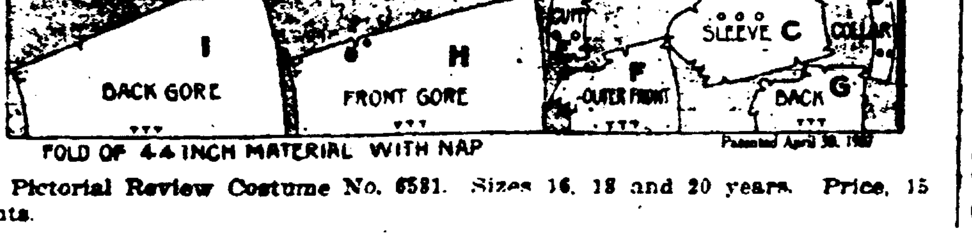
Whether one flit south to avoid the rigors of a northern winter or remain at home, this frock of polka dotted voile is charming to have in the wardrobe. The bodice is finished with a round neck and is sleeveless, allowing for a guimpe of contrasting material, if desired. Shirring takes up the fulness about the waist and usurps the function of the usual girdle, while the waist closes on the left shoulder and under the arm. The skirt is also shirred and is a two-piece effect, closing at the left side in accommodation to the waist to which it is attached.

In medium size the dress requires 4 yards 44-inch material, and as voile comes in charming designs at very reasonable cost it is possible to reproduce this model for less than $2.

Nothing could be simpler than the cutting of the frock. The material is first folded in half, then the cutting guide, as illustrated below, is carefully studied. The back gore of the skirt is placed into position first, resting on the lengthwise fold of the voile, and next to this comes the front gore. To the right come, in turn, the outer front and back of the waist, also placed on the lengthwise fold of the goods. Only the cuff, the sleeve and collar are placed on a lengthwise thread of the voile.

For the round neck it will be necessary to cut out the neck edges of underbody and outer front and back on small "o" perforations. For a skirt shorter than illustrated, cut off lower parts of gores on small "o" perforations.

Most home dressmakers will prefer to finish the sleeve with a simple ruffle, in keeping with the general lines of the model, instead of using a cuff.



Pictorial Review Costume No. 6581. Sizes 16, 18 and 20 years. Price, 15 cents.

## Don't Be a Drudge

Housework with its ceaseless, humdrum duties often causes a woman to "go to seed," to become listless and indifferent to both her personal appearance and what is going on around her. She fails to make her work agreeable, to keep her mind freshened and alert. The successful girl or woman in the business world realizes the importance of keeping her mind brightened and of doing her work in such a way that it will come easier. The result is each day is met with the right thought, the work is done systematically, and the worker herself becomes more capable, better fitted to meet the unexpected demands that every little while come up.

"We are not all fitted for housework," we say apologetically. That is why so many of us are failures at it. There is of course some truth in this. Indeed, we are not all fitted for housework, but every woman knows that when she assumes the management of a home she, and she alone, is responsible for the success or failure of the work in that home.

We hear a lot about the "drudgery" of housework, but if women would only study up on it housework would not seem as distasteful as many women seem to think it is. In these days of labor saving devices it seems incredible that women will worry along in the old way of doing things. Tell a woman whose shoulders have become bent from broom sweeping that a carpet sweeper will do the work better and easier and you will not be thanked for your trouble. She will cling to the broom, meanwhile bemoaning the fact that her work is "never done." The old fashioned cook and her coal stove have been landed sky high, but the delicious meals prepared these days in the fireless cooker have the old time cook and her coal fire beaten a dozen different ways.

The woman who has become a household drudge has only herself to blame. No man likes to see his wife in that role. Any woman who can read can make her housework easier and do it better. Take, for instance, the splendid household articles published each day in many papers. Cooking, sewing, caring for babies, the general work of the house, are handled so that every one may learn.

The banker, lawyer—in fact, every professional and business man—reads up on his particular work. Why cannot women see the logic of reading up on their household needs? The wife, the mother in her home, has been intrusted with a greater work than the most successful lawyer or banker.

Don't go to seed. Fill your mind with happy thoughts. Stop being a drudge. Even if silver threads are showing in the gold or the darkness of your hair, do it up as prettily as possible. Go out and lose yourself in the gay crowds occasionally. Forget all about yourself. The walk will bring roses into your cheeks, and when you reach home you'll have a fine appetite for supper. Just try it and see!

## KNITTED SMARTNESS.

**This Is One of the Sweaters Without Frills or Fur.**

This two piece skating outfit, knit with such stunning ribs, has a roll

FOR THE SKATER.

collar that may be buttoned up snugly if need be. Big white pearl buttons and patch pockets relieve the plainness of the rib, just as two pompons do the cap.

**Ginger Cookies.**

Two cupfuls of molasses, a cupful of sugar, a cupful of shortening, a cupful of water, two teaspoonfuls of soda, salt, a teaspoonful of ginger, two cup-

## TODAY'S FASHION NOTE

The embroidery on the border of this natural color pongee frock is done in Chinese colors and expresses the last word in border decorations. The skirt is made with a pointed tunic, the sleeves cut in raglan effect and the front arranged to show the trimming to the best possible advantage. Five yards 40-inch bordered pongee make this dress.

## The KITCHEN CUPBOARD

**A RUN ON RAISINS.**

ESCALOPED RAISINS WITH APPLES.—One cupful seeded raisins, one-quarter cupful brown sugar, one quart apples, pared and quartered; one-quarter teaspoonful salt, one-quarter cupful water, one-quarter cupful bread, cracker or cake crumbs, one teaspoonful butter. Brush bake dish or casserole with butter, put in half the raisins, cover with half the apples, dust with salt. Add the balance of raisins, then apples; sprinkle with a little salt, cover with sugar, the water and the crumbs over top and cover. Place in moderate oven on top rack and bake one-half hour, then remove cover and bake fifteen minutes or until brown. This is best served cold. Can be helped from dish in which it has been baked or served in ice cream glasses with whipped cream.

The New Raisin Cooky.—Two cupfuls of seeded raisins, one-half cupful shortening, one cupful sugar, one-quarter cupful milk, one level teaspoonful salt, two eggs, four cupfuls flour or enough flour to roll thin; four teaspoonfuls baking powder. Cream the shortening and sugar together until light, add salt, well beaten eggs, stir until smooth, add milk slowly. Wash and dry the raisins, put through food chopper, add to mixture, sift two cupfuls of flour and baking powder together and add to mixture; add the rest of flour; more may be needed to roll out. Roll about one-eighth of an inch thick and cut with sharp cutter or cut in bars with sharp knife (a sharp cutter is best). Bake eight to ten minutes in hot oven. These are exceptionally good cookies and will keep a long time under lock and key. The chopped raisins make a moist, soft cooky.

New Raisin Cooky Without Eggs.—Two cupfuls seeded raisins, one cupful brown sugar, one-half cupful shortening, one cupful baking molasses, one teaspoonful salt, one-half cupful boiling water or sour milk, one teaspoonful baking soda; five cupfuls flour. Put sugar, shortening and molasses into bowl, rub until smooth; add salt, baking soda which has been dissolved in water. Add raisins which have been washed, dried and put through food chopper, sift flour and work into a dough so it can be rolled out a quarter of an inch thick. More flour may be added if needed. Cut with floured cooky cutter and bake in hot oven eight to ten minutes. Ginger or cinnamon may be added if desired.

# KING PLEDGES ADHESION UNTIL VICTORY COMES

London—Great Britain's resolve to carry on the war with every resource at its command until Germany is brought to its knees and the future of civilization made secure was the keynote of the speech of King George yesterday in proroguing Parliament until February 15. The day saw royal assent given to two notable acts which will aid the empire in carrying this resolve to success. These are the Military Service bill, whose enactment is one of the most conspicuous victories for Mr. Asquith and the government since the war began. and the Trading with the Enemy bill.

With the declaration that "We shall not law down our arms until we have vindicated the cause which carries with it the future of civilization," the King expressed the determination which is n the heart of every loyal Brton. In these words Germany was notified that the whole power of Great Britain, cooperating with her allies, is to be thrown into the war to force a decisive victory at the earliest possible date.

The speech of the King probably was one of the briefest on record on such an occasion, but what it lacked in length it more than made up in its expression of unalterable resolve to put an end for all time to the Teutonic menace om militarism.

"For eighteen months my navy and army have been engaged, in concert with brave andsteadfast allies, in defending our common liberties and the publi claw of Europe against unprovoged encroachments by the enemy," he said. "I am sustained by the determination of my people at home and overseas to carry our flag to a final decisive victory. In this struggle, forced upon us by those who hold in light esteem the liberties and convenants which we regard as sacred, we shall not lay down our arms until we have vindicated the cause which carries with it the future of civilization.

"I rely with confidence upon the loyal and united efforts of all my subjects, which have never failed me, and I pray that Almighty God may give us His blessing.

The King thanked the House of Commons for the ungrudging liberality with which it has provided for the heavy demands of the war. The speech was read by Lord Buckmaster of Cheddington, the Uord High Chancellor.

At the reassembling next month, after an unusually short recess, the House of Commons, owing to the necessity for financing the war, will be engaged almost exclusively for some weeks in financial business. A new war credit vote will be necessary, as the sums already voted will be exhausted before the end of February.

It is understood the budget will be submitted at the earliest possible date and it is likely to contain drastic new taxation proposals, including probably a scheme for compulsory investment in the war loan of a proportion of the earnings of the community, the aim being to reach the greatly enhanced earnings of workers engaged in the manufacture of munitions and other government necessities.

**Many Sided Kicks of the Camel.**

A camel's hind legs will reach anywhere—over his head, round his chest and to his hump. Even when lying down an evil disposed animal will shoot out his legs and bring you to a sitting posture if he wants to. Compared with a camel a mule is really a most considerate kicker, so beware when the camel looks as if he is going to kick.—New York World.

# BAPTIST STARS LOST GAME

## Yondo Star in Victor's Team. Hinsdale and Holly Made Good Plays—Seymour a Live Man.

The Maccabee second basketball team staged its first public performance last night in Church's Hall before a small sized crowd and came out victors in a thirty minute fray with the Baptist Stars. The final score was 31-8.

The Maccabee team completely outclassed their opponents and with guarding of a high order prevented the other team from caging the ball from the field thoughout the first half. It appeared at the beginning of the second half that a complete shut out of the Baptist team would result, in so far as scoring field baskets was concerned, but by two sensational shots, Hinsdale and Holly were able to net baskets. These four counts, with four obtained through fouls accounted for the total points secured by the Baptist team.

Yondo was easily the star of the game, as the low score of the opposing team was due to his interception of passes. Yondo, himself, scored four baskets from the field one of them of a sensational order, which he made by jumping up and "batting" the ball into the basket after one of his teammates had made an unsuccessful throw. R. Seymour, did most of the scoring in the first period, making 5 field basket and one point from the foul line.

The lineup of the teams was as follows:

| Baptist Stars | | Maccabees |
|---|---|---|
| Sylvester | Right Forward | R. Seymour |
| Hinsdale | Left Forward | L. Hutchins |
| Petrie | Center | E. Seymour |
| Singleton | Right Guard | Yondo |
| Holly | Left Guard | Smith |

Referee—Snow.

## BASKETBALL ON CITY COURT TONIGHT

With the absence of the High school basketball team from the city, the City Hall court will be occupied tonight by two teams, evenly matched and anxious to score a victory. The match will be between the B. S. A. quintet of this city and the speedy Oswego Nationals, with McKinstry, the brilliant starch city forward in the visitor's lineup, and it will commence promptly at 8 o'clock.

In the home team's lineup will be the two Foster brothers playing the forward positions, Privost at center, and Church and Fitch occupying the guard positions. A large crowd is expected to be present as tickets have been on sale for the past week and a large number have been disposed of.

## SEVEN FULTONIANS TO SERVE ON JURY

The following were drawn yesterday to serve as trial jurors at the County Court term at Oswego, February 14:

Oswego—George Lamb, J. C. Tonkin, John J. Freeston, George C. Robbinson, Frank Longley, David Cliff, John Carroll, James A. Wallace, Frank Donahue, Jeremiah Collins, William Clooman, Eheodore Millis, William A. Porter, Frank Elkins, Joseph Rickey, Ora Hutley, Arthur Owens, Hudson J. Quigg, William E. Clark, Louis Lower, Oliver Robarge, Michael Higgins, William Curtis.

Oswego, R. D.—Charles Bellinger, Stephen Manwaring, Ira Crowell.

Fulton City—Peter Pringle, Charles Peavey, Fred Morrison, John J. Little, Charles George, Clarence Sharp.

Fulton R. D.—William Buchanan.

## SALVATIONISM AT THE QUIRK THEATER TODAY

'Twas bound to come and here it is at the behest of World Film which shortly releases "Salvation Nell", in which Beatriz Michelena impersonates Edward Sheldon's heroine.

The Salvation Army, is a world force. William Booth, forty odd years ago, started them ovement in Whitechapel, London. Whitechapel is the nucleus of the Great East End of London—once, and still in parts, the very toughest spot on the Globe. Charles Dickens laid the scenes of "Oliver Twist" there, and we all remember what a humane personage, the brutal burglar, Mr. William Sikes was. The slummiest slums on earth once disgraced Whitechapel.

William Booth set out to rescue the submerged tenth of poverty and crime and he chose the Great East End of London as the scene of his initial attempts. He and his army saved the bodies and souls of many Salvation Nells.

"Salvation Nell' is a powerfully-acted fillm play on a powerful theme —the final triumph of the Army in balking Perdition of some of its near victims.

## PLANS PROGRESS FOR ELK'S BALL

At the regular weekly meeting of the Elks last night, in addition to arranging for thec oming minstrel performance for the benefit of the hospital fund, a number of candidates were initiated and other routine business transacted.

A supper served by Max Hafter, followed. Thomas Farrell, chairman of the committee which has in charge the arrangements for theb all which is to be held in the Elks Hall on February 21st, announced that final arrangements for the affair would be completed at a meeting of the committee on next Sunday afternoon. The dance committee consists of the following in addition to Mr. Farrell: the Messrs. Hargrave, Rader, Hare, Hafter and Guile.

## MINSTRELS FOR HOSPITAL RECEIVE LAST TOUCHES

The final rehearsal of the Elks Minstrels will be held Sunday afternoon. In preparation for the performance which is to be given for the benefit of the hospital fund on Wednesday, February 2nd, the members of the original cast have made a number of changes. Additional numbers have been added to the program.

The orchestra of 12 pieces will remain intact but several of the musical numbers will be changed for newer pieces. More dancing is promised for the coming performance. Two exponents of modern dancing will give an exhibition of thel atest steps, it is announced.

## JOHN TOBIN

The funeral of John Tobin, 83, who died at the Lee Memorial Hospital Wednesday afternoon, will be held from the home of his neice, Mrs. Thomas Goss, 416 Kellogg st., on Saturday morning at 11 o'clock from the house, and 11:30 from the Church of the Immaculate Conception. Burial will be made in St. Mary's Cemetery.

## VALENTINE CHARITY BALL TO AID THE WOUNDED

The Red Cross Helpers will give a valentine charity ball in Davis's hall, Tuesday, February 15, for the benefit of the wounded soldiers in Europe. Admission, $1. Apply to Mrs. Barbara Rogers, phone 3474, for tickets.

## WILD—ALNUTT

City Clerk Allen yesterday issued a marriage license to Harriett F. Alnutt and Arthur Wild, both of 506 Pratt st. The Rev. Charles Olmstead performed the marriage ceremony.

## GLOVE MAKERS TRADED WITH BRITISH ENEMY

London—Three partners of Fownes Brothers & Co., glove manufacturers, were today committed for trial in criminal court on the charge of obtaining goods from Germany through their New York branch and trading in such goods in contravention of the "Trading with the Enemy Act."

The prosecution alleges that between the end of September and the end of Decembr, 1914, th difendants obtained goods worth $30,000 from Saxony through the New York branch, payment to be made after the war. The firm has factories in New York. The defendants were admitted to bail.

## PUBLIC NOTICE

State of New York—Public Service Commission, Second District—Albany.

Case 5289—Jan. 14, 1916.

A petition, under chapter 667 of the laws of 1915, having been filed with this commission by Theodore J. Wilson and Wesley J. Scott, for a certificate of convenience and necessity for the operation of a stage route by auto busses, in the city of Fulton.

From the intersection of South Second and Cayuga streets in the city of Fulton, westerly along Cayuga street to South First street; northerly along South First street to Oneida street; westerly along Oneida street and the Oneida street river bridge to Schenck street; westerly along Schenck street on West First street; northerly along West First street to Hannibal street; westerly along Hannibal street to the city line.

(It being proposed that the route shall also be operaed from Fulton to the incorporated village of Hannibal, Oswego county), notice is hereby given that a public hearing on said petition will be held by Commissioner Hodson of this commission at the court house, in the city of Syracuse, on Monday, February 7, 1916, at 12:30 p. m.

For the Commission

Francis X. Disney

Secretary.

## WILL TRY AGAIN TO BREAK AGAIN LESLIE

New York—A second attempt will be made this morning in the Surrogates Court to break the will of Mrs. Frank Leslie. Arthur Leslie, a nephew, failed last December in his effort to have Mrs. Leslie, who left the bulk of her $1,700,000 estate to the cause of woman suffrage, declared incompetent to make a will.

The new application is to be made by Loretta L. Hollander, of No. 161 Madison avenue; Florence Drive, and Frank Leslie, nephew and nieces. They will follow, in them ain details, the cointentions of Arthur Leslie to the effect that the decedent was not the daughter of Charles Follin and Susan Danforth, as alleged, but the daughter of Follin and another woman to whom he was not married.

## NEW YORK'S HOTTEST JANUARY SINCE 1880

New York—The mercury in New York City thermometers rose to 64 yesterday—a mark which breaks all records for January 27. The previous record for 55 in 1880. While New York sweltered, Havre, Mont., was enjoying a temperature of 54 below zero.

# THE FULTON EVENING TIMES

"A Herald of Progress"

Volume 2, No. 343. SATURDAY, JANUARY 29, 1916. *Price, One Cent*

## CHAMBER OF COMMERCE

*"Fulton First, Last, and All the Time"*

We shall do much in the year to come,
But what have we done to-day?
We shall give our gold in a princely sum,
But what did we give to-day?
We shall life the hearts and dry the tear,
We shall plant a hope in the place of fear,
We shall speak with words of love and cheer,
But what have we done to-day?
We shall be so kind in the after while,
But what have we been to-day?
We shall bring to each lonely life a smile,
But what have we brought to-day?
We shall give to truth a grander birth,
And to steadfast faith a deeper worth,
We shall feed the hungering soul of earth,
But what have we fed to-day?

* * *

Health is the greatest gift we can possibly receive. No matter, if a million churches were built in a city! no matter if we could take a bath in gold; no matter, if we had all the human power in the world, we would be NOTHING, if we did not have health. Therefor we may state that a HOSPITAL is the very most IMPORTANT institution in any city. Wise men and women always take care firstof the hospital in a city; because there it is where the sick are being cured and there it is, where you can enter no matter, if you are rich or poor. Very few people seem to see and are willing to admit that a HOSPITAL is the best institution in a city and deserves the help of all the people. Whenever a city cannot pay all the expenses to maintain a HOSPITAL and some good-hearted individual is good enough to donate a building for the purpose, then it is up to the citizens to keep the hospital up-to-date and supply it with money at almost every turn of the road. Three cheers therefor for the Elks who are going to repeat the Minstrels on February 2. 1916, for the benefit of the Lee Memorial Hospital. Everybody should buy a ticket and everybody who can pay for it should buy a ticket. There are people in the city, who are going out from the standpoint that first of all the churches should be helped. How ridiculous an argument is that; it shows supreme ignorance of the most vital things for the good of all the people. CHURCHES ARE FOR HEALTHY People, for the fortunate ones; HOSPITALS ARE FOR THE SICK PEOPLE, the ones that need help. The Elks are setting an example that should be followed by all classes of people. We should prefer the company of an ELK, if they do things of this kind. Those who are so wrapped up in their church business,as for example the women the other day who said not to go to the Minstrels because they would rather help the church and give a benefit therefor, could learn quite a lesson from the Elks when it comes to the point of catering to the needy. The Church does not need help all the time; but when a condition exists as we have here where the city can only give 1,500 dollars for the most important institution in FULTON, then it is about time that we should forget that EVERLASTING SELFISH IDEA and give and give and give for the sake of all the people. Hurrah for the Elks; may the example set by this organization be followed by many others. Your HOSPITAL first and then . . . . . a whole lot of other things.

* * *

The poor are being cared for in a HOSPITAL just as well as the ones who can pay for services rendered.

* * *

FULTON people should be proud of the Lee Memorial Hospital. FULTON people should do all they can to assist the management of the Hospital to make that institution first class in every respect.

* * *

You may know a city by its HOSPITAL. If it's up-to-date and well kept, it goes to show that the citizens are THINKING of others as well as of themselves, with other words there is cooperation.

* * *

Get that habit to boost for ALL THE GOOD THINGS and NOT FOR ONE, IN WHICH YOU ARE PARTICULARLY INTERESTED.

* * *

FULTON, a city where they take care of the sick.

## "Dad" Mead's Trial Takes Place Tuesday; Under Heavy Bail

Is "Dad" Mead a victim of political intrigue? that is the question to be decided at his trial when he will be charge with committing a breach of the peace. The trial is set for next Tuesday evening, and sensational developments are promised. Efforts to keep the affair secret until the day of the trial have been futile. The Times has been "tipped off" to the arrest by a friend in close touch with Mr. Mead's personal affairs.

Notwithstanding the importance of the case, which involves the prominent ward leader who is at liberty under a $50,000 bail bond, Judge Wilson will not preside at the trial.

It is expected that I. O. O. F. temple, where the trial is to take place will be crowded to the doors. W. H. Spanswick will prosecute the case, a position made difficult by reason of his life-long friendship for the prisoner.

Fred Vogelsang, representing the defendent, will make an emphatic denial of the charge. Counter charges of a sensational nature, wherein family skeletons may be bared are likely to result, says thep risoner. Ray E. Crandall, complainant, does not fear the ultimate result of the case, he denying that the charge is other than a true one.

Editor A. P. Bradt has been appointed especially as a court judge. The jury will be as follows: A. E. Worden, G. B. Deuel, B. J. Ingersoll, J. S. Naughton, George Owens, Calvin Dines, Dr. L. F. Joy, F. P. Keeler, Frank Sears, E. H. Church, John Knapp, W. J. Carl, Walter Bradley, Wirt Barker, Harold Richardson, George A. Rappole, Jas. A. Merton, Fred Wolcott and Charles Morris.

## LATEST OFFICIAL WAR BULLETINS

Paris, via London.—The following official communication was issued by the War Office tonight:

"During the course of the day there was considerable activity by our artillery on the whole front. In Belgium a destructive fire directed against the German trenches situated in front of Boesinghe andbetwee n Steenstraete and Het Sas caused serious damage to our adversary.

"In Artois, to the east of NeuVille-St. Vaast, the enemy attempted by a counter attack to retake the craters from which we drove him in the course of the night, but was completely repulsed To the north of the Aisne our trench guns shattered the enemy organizations at La Ville-au-Bois.

"In the Argonne mine fighting continued to our advantage. Between hill No. 285 and Haute Chevauchee we exploded two mines. The enemy suffered serious losss in the struggle which followed for the capture of the crater, one of the rims of which we hold.

"One of our long range guns took under its fire an enemy convoy which had entered Mangiennes, to the northwest of Etain."

Thef ollowing statement was given out in the afternoon.

"In the Artois district last night there was spirited cannonading in the sector of Neuville St. Vasst. In the vicinity of the road from Neuville to LaFolle we continued to reoccupy progressively the listening posts and craters in which the enemy had obtained a footing. We found there numerous bodies of Germans and one machine gun. We also took several prisoners.

"In the Argonne district we caused the explosion successfully of two mines, one near Haute Chevauchee and the other in the vicinity of Vauquois."

* * *

London.—Thef ollowing official communication was issued tonight:

"Early this morning we exploded a mine opposite Givenchy. Organized bombardments have been carried out on several portions of the hostile line. The hostile artillery has been active today east and northeast of Loos, south of the Bois grenier, northeast of Armentieres and northeast of Ypres. Our artillery retaliated successfully on the hostile batteries and trenches."

* * *

Petrograd.—The following official communication was issued from General Headquarters today:

"On the western (Russian) front German aeroplanes continued to make frequent flights over the Riga and Dvinsk regions where they dropped bombs. Southwest of Lake Narotche our scouting parties encountered the enemy successfully. They made surprise bayonet attack on a German detachment and put it to flight, inflicting heavy losses and taking prisoners.

"Southeast of Kolki our scouts got through the enemy entanglement and destroyed it with grenades.

"In Galicia, on the middle Stripa, the enemy continued his artillery fire. On the Dniester, in the region of Uscieczko, near the bridgehead, we attacked the enemy with grenades. North of the Boyana River the enemy, after exploding three mines in front of our lines, made several attempts to attack, but were repulsed by our fire.

(Continued on Eighth Page)

## SOUNDS FROM A PENCIL

*By I. E. Hyde*

Ive been takingl ife easy, I've been playing at shirk,
But the day is so fine I feel I must work.
Ah! my brain feels quite numb, my muscles are soft,
this resting from labor I fear, happens too off.

I'll throw on my birdle and stand on my feet,
At last I am started, Ah, me! this is sweet.
Hey! clear the track, will you? You old stub point pen,
And I'll jot down a verse for you, while you count ten.

The Chamber of Commerce seems getting quite wise,
They're asking the common to season their pies
While we know that this circle embrasses the snobs
We'll voice no objections to jumping their bobs.

We'll all trade at home when prices are right
But where we scent graft, we'll flunk or show fight
We know Fulton is good, and her people are better
If we didn't think so, we would write you a letter.

I see no sane reason for a kick, cuff or groan,
It's the fellow who pinches himself we hear moan.
I'm only a pencil but I say—"this fine weather"
Let's all pull the bell cord and shout—"F-U-L-T-O-N"—
together.

## HEAVY FIGHTING REPORTED BY GERMANS AND ALLIES

Although considerable fighting has taken place along the various war fronts there have been no notable changes in the positions of any of the combatants.

In the region of Neuville St. Vaast the French have attacked with hands grenades the positions taken from them by the Germans but according to Berlin they were repulsed with heavy losses, although a mine crater was captured by the French. Paris says two attacks by the Germans on the road between Arras and Lens were put down and that a German munitions depot was blown up near Puisaleine by the French artillery.

All along the line from Riga to Bukowina there has been artillery bombardments and here and there infantry attacks by the Russians and the Germans and Austro-Hungarians. Petrograd reports a surprise attack near Buczacz, Galicia, by the Russians in which a large party of Teutons was put to flight after having suffered heavy losses, and also the capture of three mine craters by the Russians north of Boyan.

Dispatches from Kiev says the Austrians and Germans are making great preparations to stem any attempt at a further advance by the Russians in Galicia. Large quantities of artillery of all calbers areb eing rushed to the front.

The Italians have reoccupied on the heights to the west of Gorizia ground they had previously been forced to retire from in the face of an Austrian attack, and also have put down with heavy casualties a strong attempt by the Austrians to advance in the upper Isonzo region.

In the Caucasus the Russians claim further successes for their arms and the capture of large quantities of arms and ammunition. Between Erzerum and Mush they have occupied the town of Khynysskala. In addition, south of Lake Hrumiah in Persia, the defeat of large Turkish forces is reported by Petrograd, together with the capture of prisoners and supplies.

**265 North 6th St.—7 rooms,** bath, hall, electricity, gas, new furnace, best of plumbing. Extra good barn, 19 x 27. All buildings newly painted and in fine condition. Abundance of fruit, lot 66x132 . **$2800**

**For an Investment—3 houses on** North 4th St., renting for $6.50 a week. Better than 15% on $2100.00.

## Opinions

### REJECTED FOR SIZE

Where is Jack Johnson? On the Continent of Europe his memory is freshly disinterred each day with the explosion of those 16-inch shells which the Germans howitzers fire and which send up a dense black smoke. But on this sid,e where peace and Jess Willard reign, he seems to be fading fast into the category of

Old, unhappy, far-off things
And battles long ago.

Our interest in the former chapion is simply the desire to extend to him a word of encouragement in his retirement. It involves the rejection of Michael Tuholski, a steel mill puddler, who wished to become a marine, but was found to be "too big and husky.' Michael stands 6 feet 5 inches in his stocking feet, weighs 257 pounds, and might have blossomed intoa white hope in a palmier day, but now he can't even become a soldier.

Jack Johnson, it will be recalled having proclaimed himself a Frenchman just before the war began, found himself when hostilities opened under serious pressure to enlist. And ever since then, however the jackjohnsons of the west front may have thundered like the crack of doom and torn craters in Mother Earth, their human namesake has felt strangely inclined to a quiet and inconspicuous life; only briefly interrupted by the match at Havana.

But the rejection of Michael should cheer him. If one can be too big, and strong as well as too pround to fight, it may even prove safer hereafter for the heavyweight champions to increase their public swagger with the call to arms.—N. Y. Tribune.

### HOW THE STEEL TRUST FORESEES "RUIN"

Net earnings for the past quarter of $51,232,788, or $5,729,080 larger than for any previous quarter and over $40,000,000 larger than for the same quarter last year; dividends resumed on the common stock at the former annual rate of five per cent.; a surplus of $23,300,692, above all charges and dividends; $105,000,000 cash in bank —such is the extraordinary story of prosperity reported for the country's greatest industrial corporation from yesterday's meeting of the United States Steel Corporation directors.

Three weeks ago Chairman Gary gave out a statement which conceded great present prosperity but which sounded high notes of alarm for the future. The situation was "inflated," American industry faced after the war "the most persistent and difficult competition ever experienced," and everybody must now prepare for calamitous consequences then unless "adequate (tariff) protection" is meantime provided.

The practical sense of that view must have been that the Steel Corporation itself should go slow in any dividend action on the present prosperity and Wall Street so interpreted it, as in a belief that no dividend or only a small one would be declared.

It is apparent that the other directors did not share these views of disastrous competition from nations bled white and industrially crippled by war. Even Mr. Gary himself seems to have revised them, as he also voted for the five per cent. rate.—N. Y. World.

### A PREACHMENT AGAINST "UPLIFTERS"

In saying that he sometimes gets tired of hearing the word "uplift" uttered in his presence, ex-President Roosevelt expresses the feelings of thousands of his fellow countrymen who are attracted to the higher planes of thought and endeavor, but would like to reach them in their own individual ways and without the prodding of fanatics.

The radical trouble with too many "uplifters" is that they are merely rainbow chasers, endeavoring vainly to bring on the millennium before its ordained time. Like their enemy the Devil they go about seeking whom they may devour, in the name of Progress. Their aims may be highly praiseworthy, but their tempo, to use a musical phrase, is all wrong. They are endeavoring to stampede the community toward the paths of righteousness, and by the methods they pursue they make of themselves a cross between crusaders and nuisances, to the great detriment of the causes to which they, sometimes, unselfishly devote their energies.

Colonel Roosevelt frankly admits that after prolonged study of "Macbeth' he finds relief in going to the movies. To every "uplifter," whatever may be his or her reforimng specialty, there should be food for thought in the ex-president's confession. All society cannot be reformed while you wait. The evils that afflict humanity are of remote origin and are deeply ingrained in the very fibres of the race. They cannot be eradicated by the efforts of a single generation. —N. Y. Sun.

## DO YOU KNOW A BLUFFER?

Who has not seen a Bluffer? Everybody has seen him, because he is never hard to pick out. He is always in evidence—at all times overdoing it. Sometimes he talks loud and a lot too much. He has other assets, too, but never the air of sincerity with which real ability impresses you. He is always anxious to let you know what a wonderful fellow he is, and he doesn't wait long to have it proved; he admits it at once and with little urging.

Have you ever been impressed in favor of a Bluffer? Did it take you long to find him out? If it did, then you are an exception to the rule of men. How did you find him out? Did you find that he could not make good? More than likely, for if he could, he wouldn't be a Bluffer. Tests always come to us.

Mr. Bluffer is usally a person of energy and resourcefulness. He has to be, but he seldom, if ever, applies these qualities to making good with the talents that are really his. If he did he could make a success of life. He is always trying to "get by" with credit for ability that he does not possess. The lesson comes some day. Mr. Bluffer learns that his struggles and his labor have been harder than if he had been satisfied with doing things "on the square"—in making a real effort to accomplish something without injuring his neighbor. At the end of his career he is rewarded by having oceans of regrets.

The Bluffer can build only for a day. He can lay no solid foundation for the future. He must each day build, as today's efforts cannot serve as a foundation for future achievements.

When he stops building his house of cards topples over.

The Bluffer seemingly makes good for a while, but some day his cards must be spread upon the table and we shall find that he held a very poor hand.

Now that the weather man has fallen from his neutrality perch, let us refrain from saying what else he may do.

Now that the mild days of January are over, it is well to prepare for the newspaper correspondents' indulgences in mathematics as relating to men catching fish through the ice on river and lake. We need not worry about anything else they write up.

## WORRYING

Most men who think, who take the trouble to compare the present with the past, know that things usually get righted around, if we give them time. Most men whof ail to think get all excited over we give them time. Most men who fail to think get all excited over the blockboarded future—over the hobgoblins that they feel are

A lot of men are worrying over the coal supply of this country. Others are fretting and foaming over a statement that churches are dying out, and that these houses of worship will be eventually converted into garages. A lot of alarmists are proclaiming from the tops of soap boxes that the money of this country will all be in the hands of three of four men in a very short time.

Bosh! We have several thousand years to prove that this is bosh.

Figures won't lie, but they are not always to be relied upon.

According to our present rate of births, there will be no children born in the year 2000.

Rot! Other tables show that in time there will be no water on earth, and that everyone on earth will be insane—madly insane.

A lot of unscientific men worry over science, and they let their wives worry through a big wash, without once helping with the pounder or tunring the wringer. Stop worrying, you hope-to-be scientific dubs, and go to work.—The Silent Partner.

### WITH THE SUFFRAGISTS

The town of Cocoa, Florida, has become another possible haven to the suffragists who announced after the November election that they would take up their residence in equal suffrage territory. Cocoa has followed the example of its neighbor, the town of Fellsmere, and given municipal suf frage to its women.

* * *

In Reading, Pa., the Medical Society has departed from the custom of similar organizations—which is to encourage women to be nurses and discourage men from being doctors—and has elected a woman physician as president.

* * *

The Woman's Journal of Boston, the dean of suffrage papers, has analyzed the election expenses and list of contributors that the law of Massachusetts required the anti-suffrage organizations to file with the Secretary of State. It was discovered that the anti-suffragists, who claim to speak for eighty per cent of all women, received eighty per cent of their campaign contributions from men. It also announces that a large part of the money came from a comparatively small number of men representing money interests of Boston.

* * *

One would have to look far and wide in New York state to find on election day married couples "arm in arm even before breakfast" but according to the press report it is a common sight in Denmark and listed as one of the results of the recent granting of equal suffrage to the women of that country.

* * *

There were eight men running for the office of auditor of St. Clair county in Illinois on January 8, according to a dispatch from East St. Louis, but they had to take off their hats, politically speaking, to a young girl, Miss Geneva Moeser, 21 years old, for she it was who was elected.

* * *

Florence Kelly, the noted social worker, was in the gallery when the suffrage amendment was favorably reported in the United States Senate on January 8. In an interview she said:

"The federal amendment for woman suffrage seems this year for the first time to be sure to be referred to the states. The first federal amendment for woman suffrage was introduced by Senator Sargent of California in 1875 and by my father in the House of Representatives in 1877. This year for the first time the President voted for suffrage; next November four million women will vote for President. For the first time I am filled with hope."

### OREGON PREPARES FOR ENFORCEMENT OF LAW

Oregon officials upon whom rests the responsibility for enforcing prohibition are ready for the new order of things which began at midnight December 31. With one accord they agree that the state is to have prohibition in fact, as well as in name, and they are taking the necessary steps to make the law effective.

Governor James Withycombe has promised the support of his office for law enforcement. As quoted in the Portland Oregonian, he says:

"As governor I am pledged to see the new law enforced to the best of my ability, just as is every other official of state, county or city. But it is not the officials alone who will be responsible for whether or not the prohibition law is really effective both in letter and spirit. Public sentiment will be in a very great measure the most potent factor. Almost any law is about as effective or inefficient as the people living under its provisions desire to see it. Oregon is fortunate in having a citizenship which believes in law enforcement. However one may have voted at the polls on this question, now that it is a law, through the will of the majority, I am confident that the overwhelming prepondernace of Oregonians means to assist in seeing its provisions lived up to. Such may count upon my sympathy and utmost help.

"So far as this office is concerned all possible assistance will be given toward the strict enforcement of the law."

For Portland, which has the distinction of being the second largest dry city in the United States, law-enforcement may be a somewhat difficult task, but it bodes well for the city that Mayor H. R. Albee is an unrelenting foe of the liquor traffic and promises rigid enforcement.

"The statute declaring prohibition of the liquor traffic in Oregon will be enforced in Portland just as rigidly as possible," says them ayor.

"Orders have been issued to the bureau of police to take up at the outset the rigid enforcement of the law and preparations have been under way for some time, looking to that end. The men have been instructed in their duties concerning the new conditions, and I am confident will fulfill their trust and give a good account of themselves."

Chief of Police Clark of Portland is also fully prepared to make the new law a success. He says:

"The police bureau is all ready. We have made our preparations to detect and prosecute offenders and to maintain order. A special prohibition squad, similar to the present 'morals' squad, will be detailed later to enforce the prohibition law. We shall make examples of the first violators we catch."

Other state and county officials are also publicly pledged to enforce the prohibition law.

**BUSINESS—Particularly the most desirable business—is very much like the sport of fishing. You can catch it if you use good bait. The Evening Times offers you the correct bait.**

## LITTLE TALKS ON THRIFT

By S. W. STRAUS
*President American Society for Thrift*

The best way to find out the true meaning of the word thrift and the results of thrift when diligently practiced is to consider the lives of successful men. Almost without exception, they preached and practiced thrift in every form. It is worth while listening to what they have to say and follow their examples. And it is quite surprising what small beginnings these men made and how extremely thrifty and saving they were. Nothing was too insignificant to be carefully laid aside for future use, such as string from bundles that John Wanamaker, the Philadelphia merchant saved to be used again and the old newspapers which he carefully smoothed out to wrap around packages that required no better wrappings. Most young business men of today would regard the saving of such items as beneath them—yet John Wanamaker has amassed a great fortune, has done a great amount of good in the world and one reason that he is so much extolled and quoted today is that he practiced just such habits of thrift.

Sir Thomas Lipton, who now has approximately 10,000 employes all over the world, started with scarcely a cent. His father set him up in business. He was wide awake, industrious, "a hustler," and, he says, "Every dollar that I earned I saved, not that I really loved money. I have often been asked to define the true secret of success. It is thrift in all its phases, and principally, thrift as applied to saving. A young man may have many friends, but he will find none so steadfast, so constant, so ready to respond to his wants, so capable of pushing him ahead, as a little leather-covered book, with the name of a bank on its cover."

Let those young men bent upon spending every cent consider the principles that guided Sir Thomas Lipton up the pathway of success, who because of his thrift in the beginning of his business career was enabled to indulge his passion for yacht-racing, something the thriftless young man, no matter how much he desires to cultivate a "hobby" will never be able to succeed.

Some of the pupils in the Public Schools of Cook County, Illinois, no doubt will some day be able to gratify expensive hobbies, for during the last year, field and garden schoolhome projects were made a part of the school course of study. Two thousand five hundred pupils took this course, renting land from their parents for cultivation purposes. The total amount earned by the pupils was more than $15,000, one boy making $370 from an acre of pickles. Practical lessons in gardening and valuable lessons in earning money were learned in this way at the same time.

## THE PURIFICATION OF MULFERA.

MULFERA STATION, N. S. W., was not only an uttermost end of the earth, but an exceedingly loose end, and that again in more senses than one. There were no ladies on Mulfera, and this wrought inevitable deterioration in the young men who made a bachelors' barracks of the homestead. Not that they ever turned it into the perfect pandemonium you might suppose, but it was unnecessary either to wear a collar or to repress an oath at table, and this sort of disregard does not usually stop at the elementary decencies. It is true that on Mulfera the bark of the bachelor was something worse than his bite and his tongue no fair criterion to the rest of him. Nevertheless the place became a byword, even in the back blocks, and when at last the good Bishop Methuen had the hardihood to include it in an episcopal itinerary there were admirers of that dear divine who roundly condemned his folly and enemies who no longer denied his heroism.

The lord bishop of the back blocks had at that time been a twelvemonth or more in charge of what he himself described playfully as his "oceanic see." But his long neglect of Mulfera was due less to its remoteness than to the notorious fact that they wanted no adjectival and alliterative bishops there. An obvious way of repulse happened to be open to the blaspheming squatter, though there is no other instance of its employment. On these up country visitations the bishop was dependent for his mobility upon the horseflesh of his hospitable hosts. Thus it became the custom to send to fetch him from one station to another, and as a rule the owner or the manager came himself, with four horses and the big trap. The manager of Mulfera said his horses had something else to do, and his neighbors backed him up with some discreet encouragement on their own account. It was felt that a slur would be left upon the whole district if his lordship actually met with the only sort of reception which was predicted for him on Mulfera. Bishop Methuen, however, was one of the last men on earth to shirk a plague spot, and on this one warning was eventually received that the bishop and his chaplain would arrive on horseback the following Sunday morning to conduct divine service if quite convenient at 11 o'clock.

The language of the manager was something inconceivable upon receipt of this cool advice. He was a man named Carmichael, and quite a different type from the neighbors who held up horny hands when the bishop decided on his raid. Carmichael was not "a native of this colony" or of the next, but he was that distressing spectacle, the public school man who is no credit to his public school. Worse than this, he was a man of brains. Worst of all, he had promised very differently as a boy. A younger man who had been at school with him, having come out for his health, traveled some hundreds of miles to see Carmichael, whose conversation struck him absolutely dumb. "He was captain of our house," the visitor explained to Carmichael's subordinates, "and you daren't say dash in dormitory—not even dash!"

In appearance this redoubtable person was chiefly remarkable for the intellectual cast of his still occasionally clean shaven countenance, and for his double eyeglasses, or, rather, the way he wore them. They were very strong and very common, without any rims, and Carmichael bought them by the box. He would not wear them with a cord, and in the heat they were continually slipping off his nose. When they did not slip right off they hung at such an angle that Carmichael had to throw his whole body and head backward in order to see anything through them except the ground. And when they fell some one else had to find them while Carmichael cursed, for his naked eye was as blind as a bat's.

"Let's go mustering on Sunday," suggested the overseer, "every blessed man. Let him find the whole place deserted, homestead and hut."

"Or let's get blind for the occasion," was the bookkeeper's idea, "every mother's son."

"That would do," agreed the overseer, "if we got just blind enough. And we might get the blacks from Poonee Creek to come and join the dance."

The overseer was a dapper Victorian with a golden mustache twisted rakishly up and down at either end respectively, like an overturned letter S. He lived up to the name of Smart. The bookkeeper was a servile echo with a character and a face of putty. He had once perpetrated an opprobrious ode to the overseer and had answered to the name of Chaucer ever since.

Carmichael leaned back to look from one of these worthies to the other, and his spectacled eyes flamed with mordant scorn.

"I suppose you think you're funny, you fellows," said he, and without the oath which was a sign of his good will except when he lost his temper with the sheep. "If so, I wish you'd get outside to entertain each other. Since the fellow's coming we shall have to let him come, and the thing is how to choke him off ever coming again without open insult, which I won't allow. A service of some sort we shall have to have this once."

"I'm on to guy it," declared the indiscreet Chaucer.

"If you do I'll rebearse the men," the overseer promised.

"You idiots!" thundered Carmichael, whose temper was as short as his sight. "Can't you see I weaken on the prospect as much as the two of you stuck together? But the beggar's certain to be a public school and varsity man, and I won't have him treated as though he's been dragged up in one of these God forsaken colonies!"

Now—most properly—you cannot talk like this in the bush unless you are also capable of confirming the insult with your fists. But Carmichael could, and he was much too blind to fight without his glasses. He was, in fact, the same strenuous character who had set his dogmatic face against the most harmless expletives in dormitory at school, and set it successfully, because Carmichael was a mighty man, whose influence was not to be withstood. His standard alone was changed. Or he was playing on the other side. Yet he had brought a prayer book with him to the back blocks. And he was seen studying it on the eve of the episcopal descent.

"He may have his say," observed Carmichael darkly, "and then I'll have mine."

"Going to heckle him?" inquired Smart, in a nasal voice full of hope and of encouragement.

"Not at the function, you fool!" replied Carmichael sweetly. "But when it's all over I should like to take him on about the Athanasian creed and the Thirty-nine articles." Only both substantives were qualified by the epithet of the country, for Carmichael had put himself in excellent temper for the day of battle.

That day dawned blood red and beautiful, but in a little it was a blinding blue from pole to pole, and the thermometer in the veranda reached three figures before breakfast. It was a hot wind day, and even Carmichael's subordinates pitied Dr. Methuen and his chaplain, who were riding from the south in the teeth of that Promethean blast.

Not long after breakfast the two horsemen jogged into view, ambling over the sand hills whose red hot edge met a shimmering sky some little distance beyond the station pines. Both wore pith helmets and fluttering buff dust coats, but both had hot black legs, the pair in gaiters being remarkable for their length.

"They can ride a bit, too; I'm bothered if they can't!" exclaimed the overseer in considerable astonishment.

"And do you suppose, my good fool," inquired Carmichael, with the usual

The Men Tramped In and Filled the Chairs, Forms, Tin Trunks and Packing Cases.

unregenerate embroidery—"do you in your innocence suppose that's an accomplishment confined to these precious provinces?"

"They're as brown as my sugar," said the keeper of books and stores.

"The bishop looks as though he'd been out here all his life."

Carmichael did not quarrel with this observation of his overseer, but colorless eyebrows were raised above the cheap glasses as he stepped into the yard to shake hands with the visitors. The bearded bishop returned his greeting in a grave silence. The chaplain, on the other hand, seemed the victim of a nervous volubility.

"His lordship feels the heat so much more than I do, who have had so many years of it, and, to tell you the truth, he is still a little hurt at not being met for the first time since he has been out here."

"Then why did he come?" demanded Carmichael bluntly. "I never asked him, did I?"

"No, no. But—ah, well! We won't go into it," said the chaplain. "I am glad to see your preparations, Mr. Carmichael. That I consider very magnanimous in you, under the circumstances, and so will his lordship when he has had a rest. You won't mind his retiring until it's time for the little service, Mr. Carmichael?"

"Not I," returned Carmichael promptly. But the worst paddock on Mulfera in its worst season was not more dry than the manager's tone.

Shortly before 11 the bell was rung which roused the men on week day mornings, and they began trooping over from their hut, while the trio foregathered on the veranda as before. The open end was the one looking east, but the sun was too near the zenith to enter many inches, and with equal thoroughness and tact Carmichael had placed the table, the water bag and the tumbler at the open end. They were all that he could do in the way of pulpit, desk and lectern.

The men trampled in and filled the chairs, forms, tin trunks, and packing cases which had been pressed into the service of this makeshift sanctuary. The trio sat in front. The bell ceased, the ringer entering and taking his place. There was some delay, if not some hitch. Then came the chaplain with an anxious face.

"His lordship wishes to know if all hands are here," he whispered across the desk.

Carmichael looked behind him for several seconds. "Every man Jack," he replied. "And damn his lordship's cheek!" he added for his equals' benefit as the chaplain disappeared.

"Rum cove, that chaplain," whispered Chaucer, in the guarded manner of one whose frequent portion is the snub brutal.

"How so?" inquired Carmichael, with a duly withering glance.

Chaucer told in whispers of a word which he had overheard through the weatherboard wall of the room in which the bishop had sought repose. It was, in fact, the monosyllable of which Carmichael had just made use. He, however, was the first to heap discredit on the bookkeeper's story, which he laughed to scorn with as much of his usual arrogance as could be assumed below the breath.

"If you heard it at all," said Carmichael, "which I don't for a moment believe, you heard it in the strictly Biblical sense. You can't be expected to know what that is, Chaucer, but as a matter of fact, it means lost and done for, like our noble selves. And it was probably applied to us, if there's the least truth in what you say."

"Truth!" he began, but was not suffered to add another word.

"Shut up!" snarled Carmichael. "Can't you hear them coming?"

And the tramp of the shooting boots, which Dr. Methuen was still new chum enough to wear, followed by the chaplain's lighter step, drew noisily nearer upon the unseen part of the veranda that encircled the whole house.

"Stand up, you cripples!" cried Carmichael over his shoulder in a stage whisper. And they all came to their feet as the two ecclesiastics appeared behind the table at the open end of the tabernacle.

Carmichael felt inclined to disperse the congregation on the spot.

There was the bishop still in his gaiters and his yellow dust coat. Even the chaplain had not taken the trouble to don his surplice. So anything was good enough for Mulfera. Carmichael had lunged forward with a jutting jaw when an authoritative voice rang out across the table:

"Sit down!"

The bishop had not opened his hairy mouth. It was the smart young chaplain who spoke. And all obeyed except Carmichael.

"I beg your lordship's pardon," he was beginning, with sarcastic emphasis, when the manager of Mulfera was cut as short as he was himself in the habit of cutting his inferiors.

"If you will kindly sit down," cried the chaplain, "like everybody else I shall at once explain the apparent irregularity upon which you were doubtless about to comment."

Carmichael glowered through his glasses for a few seconds and then resumed his seat with a shrug and a murmur, happily inaudible to all but his two immediate neighbors.

"On his way here this morning," the chaplain went on, "his lordship met with a misadventure from which he has not yet recovered sufficiently to address you as he fully hoped and intended to do today." At this all eyes sped to the bishop, who stood certainly in a drooping attitude at the chaplain's side, his espiscopal hands behind his back. "Something happened," the glib spokesman continued, with stern eyes, "something that you do not often hear of in these days. His lordship was accosted, beset and, like the poor man in the Scriptures, despicably treated, not many miles beyond your own boundary, by a pair of armed ruffians."

"Stuck up!" cried one or two, and "Bushrangers!" one or two more.

"I thank you for both words," said the chaplain, bowing. "He was stuck up by the bushranger who is once more abroad in the land. Really, Mr. Carmichael"—

But the manager of Mulfera rose to his full height and, leaning back to get the speaker into focus, stuck his arms akimbo in a way that he had in his most aggressive moments.

"And what were you doing?" he demanded fiercely of the chaplain.

"It was I who stuck him up," answered the soi disant chaplain, whipping a single glass into his eye to meet the double ones. "My name is Stingaree!"

And in the instant's hush which followed he plucked a revolver from his breast, while the hands of the sham bishop shot out from behind his back, with one in each.

The scene of the instant after that defies ordinary description. It was made the more hideous by the frightful imprecations of Carmichael and the short, sharp threats of Stingaree to shoot him dead unless he instantly sat down. Carmichael bade him do so, with a gallant oath, at which the men immediately behind him joined with his two companions in pulling him back into his chair and there holding him by main force. Thereafter the

"His lordship was accosted, beset and, like the poor man in the Scriptures, despicably treated."

manager appeared to realize the futility of resistance and was unhanded on his undertaking to sit quiet, which he did, with the exception of one speech to those behind.

"If any of you happen to be armed," he shouted over his shoulder, "shoot him down like a dog. But if you're all as fairly had as I am let's hear what the beggar's got to say."

"Thank you, Mr. Carmichael," said the bushranger, still from the far side of the table, as a comparative silence fell at last. "You are a man after my own heart, sir, and I would as lief have you on my side as the simple ruffian on my right. Not a bad bishop to look at," continued Stingaree, with a jerk of the head toward his mate with the two revolvers. "But if I had let him open his mouth! Now, if I'd had you, Mr. Carmichael—but I have my doubts about your vocabulary too!"

The point appealed to all present, and there was a laugh, in which, however, Carmichael did not join.

"I suppose you didn't come here simply to give us a funny entertainment," said he. "I happen to be the boss or have been hitherto, and if you will condescend to tell me what you want I shall consider whether it is worth while to supply you or to be shot by you. I shall be sorry to meet my death at the hands of a thieving blackguard, but one can't pick and choose in that matter. Before it comes to choosing, however, is it any good asking what you've done with the real bishop and the real chaplain? If you've murdered them, as I"—

Stingaree had listened thus far with more than patience—in fact, with something akin to approval—to the captive who was still his master with the tongue. With all his villainy the bushranger was man enough to appreciate another man when he met him, but Carmichael's last words flicked him on a bare nerve.

"Don't you dare to talk to me about murder," he rapped out. "I've never committed one yet, but you're going the right way to make me begin. As for Bishop Methuen, I have more respect for him than for any man in Australia, but his horse was worth two of my mate's, and that's all I troubled him for. I didn't even tie him up as I would any other man. We just relieved the two of them of their boots and clothes, which was quite as good as tying up, with your roads as red hot as they are, though my mate here doesn't agree with me."

The man with the beard very emphatically shook a matted head, now relieved of the stolen helmet, and observed that the quicker they were the better it would be. He was as taciturn a bushranger as he had been a bishop, but Stingaree was perfectly right. Even these few words would have destroyed all chance of illusion in the case of his mate.

"Their very clothes, which become us so well," continued the prince of personators, who happened to be without hair upon his face at this period and who looked every inch his part; "their very boots, we have only borrowed. I will tell you presently where we dropped the rest of their kit. We left them a suit of pajamas apiece and not another stitch, and we blindfolded and drove them into the scrub as a last precaution. But before we go I shall also tell you where a search party is likely to pick up their tracks. Meanwhile you will all stay exactly where you are, with the exception of the storekeeper, who will kindly accompany me to the store. I shall naturally require to see the inside of the safe, but otherwise our wants are very simple."

The outlaw ceased. There was no word in answer. A curious hush had fallen on the captive congregation.

"If there is a storekeeper," suggested Stingaree, "he'd better stand up."

But the accomplished Chaucer sat stark and staring.

"Up with you," whispered Carmichael in terrible tones, "or we're done!"

And even as the bookkeeper rose tremulously to his feet a strange and stealthy figure, the cynosure of all eyes but the bushrangers' for a long minute, reached the open end of the veranda, and with a final spring a tall man in silk pajamas, his gray beard flying over either shoulder, hurled himself upon both bushrangers at once. With outspread fingers he clutched the scruff of each neck at the selfsame second. Crash came the two heads together, and over went the table with the three men over it.

Shots were fired in the struggle on the ground, happily without effect. Stingaree had his shooting hand mangled by one blow with a chair whirled from a height. Carmichael got his heel with a venomous stamp upon the neck of Howie, and in a fewer seconds than it would take to write their names the rascals were defeated and disarmed. Howie had his neck half broken, and his face was darkening before Carmichael could be induced to lift his foot.

"The cockroach!" bawled the manager, drunk with battle. "I'd hoof his soul out for two pins!"

A moment later he was groping for his glasses, which had slipped and fallen from his perspiring nose, and making use of such expressions withal as to compel a panting protest from the tall man in the silken stripes.

"My name is Methuen," said he. "I know it's a special moment, but—do you mind?"

Carmichael found his glasses at that instant, adjusted them, stood up and leaned back to view the bishop, and his next words were the apology of the gentleman he should have been.

"My dear fellow," cried the other, "I quite understand. What are they doing with the ruffians? Have you any handcuffs? Is it far to the nearest police barracks?"

But the next act of this moving melodrama was not the least characteristic of the chief performance, for when Stingaree and partner had been not only handcuffed but lashed hand and foot and incarcerated in separate log huts, with a guard apiece, and when a mounted messenger had been dispatched to the barracks at Clare Corner and the remnant raised a cheer for Bishop Methuen it was then that that fine fellow showed them the still finer stuff of which he was also made. He invited all present to step back for a few minutes into the place of worship which had been so charmingly prepared, so scandalously misused and where he hoped to see them all yet again in the evening if it would not bore them to give him a further and more formal hearing then.

"I won't keep them five minutes now," he whispered to Carmichael, as the men went ahead to pick up the chairs and take their places, while the bishop hobbled after, still in his pajamas, and with terribly inflamed and swollen feet. "And then," he added, "I must ask you to send a buggy at

Stingaree and Partner Had Been Not Only Handcuffed, but Lashed Hand and Foot and Incarcerated In Separate Log Huts, With a Guard Apiece.

once for my poor chaplain. He did his gallant best, poor fellow, but I had to leave him fallen by the way. I am an old miler, you know. It came easier to me, but the cinder path and running shoes are a different story from hot sand and naked feet. And now, if you please, I will strike one little blow while our hearts are still warm."

But how shrewdly he struck it, how straight from the shoulder, how simply, how honestly, there is perhaps no need to tell even those who have no previous knowledge of back block Bishop Methuen and his manly ways.

Stingaree took his incarceration philosophically, but Howie was a most woebegone individual.

What afterward happened to Stingaree is another matter, to be set forth faithfully in the sequel. This is the story of the purification of Mulfera station, N. S. W., in which the bushrangers played but an indirect and a most inglorious part.

The bishop and his chaplain (a good man of no present account) stayed to see the police arrive that night and the romantic ruffians taken thence next morning in unromantic bonds. Comparatively little attention was paid to their departure—partly on account of the truculent attitude of the police, partly because the Episcopal pair were making an equally early start in another direction. No one accompanied the armed men and the bound. But every man on the place, from homestead, men's hut, rabbiter's tent and boundary rider's camp—every single man who could be mustered for the nonce and a horse run up for him—escorted Dr. Methuen in close cavalcade to the Mulfera boundary, where the final cheering took place, led by Carmichael, who, of course, was font and origin of the display. And Carmichael rode by himself on the way back. He had been much with the bishop during his lordship's stay, and he was too morose for profanity during the remainder of that day.

But it was no better when the manager's mood lifted, and the life on Mulfera slipped back into the old blinding and perspiring groove.

Then one night, a night of the very week thus sensationally begum, the ingenious Chaucer began one of the old,

Stingaree Took His Incarceration Philosophically, but Howie Was a Most Woebegone Individual.

old stories on the moonlit veranda, and Carmichael stopped him while that particular old story was still quite young in the telling. There was an awkward pause until Carmichael laughed.

"I don't care twopence what you fellows think of me," said he, "and never did. I saw a lot of the bishop," he went on, less aggressivley, after a pause.

"So we saw," assented Smart.

"You bet!" added Chaucer.

For they were two to one.

"He ran the mile for Oxford," continued Carmichael. "Two years he ran it and won both times. You may not appreciate quite what that means."

And, with a patience foreign to his character as they knew it, Carmichael proceeded to explain.

"But," he added, "that was nothing to his performance last Sunday, in getting here from beyond the boundary in the time he did it in—barefoot! It would have been good enough in shoes. But don't you forget his feet. I can see them—and feel them—still."

"Oh, he's a grand chap," the overseer allowed.

"We never said he wasn't," his ally chimed in.

Carmichael took no notice of a tone which the youth with the putty face had never employed toward him before.

"He was also in his school eleven," continued Carmichael, still in a reflective fashion.

"Was it a public school?" inquired Smart.

"Yes."

"The public school?" added Chaucer.

"Not mine, if that's what you mean," returned Carmichael, with just a touch of his earlier manner. "But—he knew my old head master—he was quite a pal of the dear old man! We had such lots in common," added the manager more to himself than to the other two.

The overseer's comment is of no consequence. What the bookkeeper was emboldened to add matters even less. Suffice it that between them they brought the old Carmichael to his feet, his glasses flaming in the moonshine, his body thrown pugilistically backward, his jaw jutting like a crag—the old Carmichael in deed, but not in word.

"I told you just now I didn't care twopence what either of you thought of me," he roared, "though there wasn't the least necessity to tell you, because you knew. So I needn't repeat myself. But just listen a moment and try not to be greater fools than God made you. You saw a real man last Sunday, and so did I. I had almost forgotten what they were like, that quality. Well, we had a lot of talk, and he told me what they are doing on some of the other stations. They are holding services something like what he held here every Sunday night for themselves. Now, it isn't in human nature to fly from one extreme to the other, but we are going to have a try to keep up our Sunday end with the other stations—at least I am, and you are going to back me up."

He paused. Not a syllable from the pair.

"Do you hear me?" thundered Carmichael as he had thundered in the dormitory at school, now after twenty years in the same good cause once more. "Whether you like it or not, you fellows are going to back me up!"

And Carmichael was a mighty man, whose influence was not to be withstood.

### SYMPHONY ORCHESTRA LOSES ITS HARPIST

Mr. Herman H. Randall left this morning for Oberlin college, at Oberlin, Ohio. He will complete his musical education at the Ohio institution, which makes a specialty of harp insrruction.

Mr. Randall's place as a member of the Symphony Orchestra will remain vacant for some time to come. His work in the orchestra has been recognized as an important factor in its strength and future development, the loss of a harpist of his ability being a serious one.

### TO GIVE MUSICAL LATE IN FEBRUARY

The Brotherhood class of the State St. M. E. church, assisted by the orchestra, is preparing for a musicale to be held in the church parlors during the last week in February.

### LEGAL NOTICES

**Notice to Creditors**

In Pursuance of an Order of Clayton I. Miller, Surrogate of the County of Oswego, New York, notice is hereby given according to law, to all persons having claims against Faustina H. Langdon, late of the city of Fulton, in said County, deceased, that they are required to exhibit the same, with the vouchers therefor, to the subscriber at the law office of A. T. Jennings, No. 9 So. First street, in the city of Fulton, in the County of Oswego, New York, on or before the 26th day of April, 1916.

Dated this 18th day of October, A. D., 1915.

HAROLD H. BRISTOL,
Administrator with the Will Annexed.

STATE OF NEW YORK— SUPREME COURT, Oswego County.
THE DIME BUILDING AND LOAN ASSOCIATION vs. EARL POOLER, BERNARD H. SHARP, MERRITT W. MILKS AND LOUISE POOLER.

To the above named Defendants:

YOU ARE HEREBY SUMMONED to answer the complaint in this action and to serve a copy of your answer upon the plaintiff's attorney within twenty days after the service of this summons, exclusive of the day of service, and, in case of your failure to appear or answer, judgment will be taken against you by default for the relief demanded in the complaint.

Trial to be held at the County of Oswego.

Dated this 6th day of January, 1916.

LOUIS C. ROWE,
Plaintiff's Attorney,
Office and Postoffice Address,
Oswego, N. Y.

To Earl Pooler, Defendant:

The foregoing summons is served upon you by publication, pursuant to an order of Hon. Irving G. Hubbs, Justice of the Supreme Court of the State of New York, dated the 14th day of January, 1916, and filed with the complaint in the office of the Clerk of Oswego County, at Oswego, N. Y.

LOUIS C. ROWE,
Plaintiff's Attorney,
1 and 2 Grant Block,
Oswego, N. Y.

### RHETORICALS DREW AN APPRECIATIVE AUDIENCE

The public rhetoricals, together with the music furnished by the High school orchestra, resulted in a large attendance of the student body yesterday. The exercises were held in the auditorium of the high school and they met with hearty approval.

The following members of the class participated: Esther Aylesworth, Wallace Russell, Frances Allen, Lillian Waldhorn, Elizabeth Royce, Helen Balch, Lenora Eames, and Merle Bartlett.

### SPAGHETTI SUPPER SERVED BROTHERHOOD

The Brotherhood class of the State Street church last night enjoyed a spaghetti supper in their rooms. The supper was prepared by an expert, and real fun was experienced by the partakers in combating with the elusive food.

A program in which the church orchestra and quartet and Miss Mildred Kellogg, Mr. Irving Galusha, Mrs. C. Wilson, Mr. Manley Brackett, Miss Beebe and Mr. Stewart participated preceded the supper.

### CHRISTIAN SCIENCE

Christian Science services held on Sunday at 10:45 a. m. and at 8 p. m. Wednesday. in the Van Wagenen block. Miss Ada Thayer, first reader, Mrs. Frank Wooley, second reader. You will be welcome and interested t attend one or both services. The subject for next Sunday is: "Love." Golden Text: I John 4: 7. Responsive reading, Psalms 17: 1, 3-7, 63: 1-5, 7.

### PRESBYTERIAN CHURCH

Rev. Charles S. Robertson, Pastor

The sermon theme at the morning service will be, "The Full Life." The Prohibition Referendum bill, which is engaging the attention of temperance people, will be discussed at the morning service.

Sunday school will be held as usual at noon. Junior League at 3:30. C. E. Society at 6 o'clock.

"Balance" will be the sermon topic at the Vesper service at 5 o'clock.

### FREE METHODIST CHURCH

State and South 3rd Streets
Rev. C. A. Balch, Pastor

Sunday morning at 10:15 the pastor will preach. Subject, "The Spirit Filled Life."

12, Sunday school.

6:15, Evening conference meeting.

7, preaching by the pastor; subject "The Sufferings of the Damned."

Tuesday evening, class meeting.

Thursday eveining, prayer meeting.

### FIRST METHODIST CHURCH

Rev. J. W. Barrett, Pastor

Sunday services as follows:

Morning worship with sermon at 10:30, "Stewardship." Object sermon to Juniors at 11.

Bible school at noon; Classes for all ages; Brotherhood for men and Bethany for women.

Junior League service at 3 o'clock.

Prayer and Class meeting at 6.

At 7— Happy Sunday Nighters' hour with illustrated music and men's chorus; whistling song and solo by Dr. Knapp. Address, "A Convenient Season."

If you have no church home it will pay you to come to this service. Your welcome always warm.

### ALL SAINTS' CHURCH

Rev. Minor J. Peters, Rector

Sunday, Jan. 30th., 1916. Fourth Sunday after Epiphany.

Services as follows:

Holy Communion, 8 a. m.

Matins and sermon, 10:30 a. m.

Sunday School, 12 m.

Evensong and sermon, 5 p. m.

All the seatings are free, and strangers are cordially welcomed at all the services.

### CONGREGATIONAL CHURCH

Charles Olmstead, Pastor

The topic of the Sunday morning sermon will be, "An Unexpected Source of Delight."

Sunday school at noon. At 6 o'clock the C. E. Society will hold a missionary meeting, with a special program. The society is represented by 5 delegates at the District C. E. convention held at Utica January 28-30.

The subject of the Sunday evening sermon will be, "The Spoiled Ointment."

Prayer meeting Thursday evening at 7:30; topic, "The Ideal Christian, in his neighborly relations."

### STATE STREET CHURCH

Rev. H. D. Holmes, Pastor

Preaching services will be held both morning and evening. Subject for the 10:30 a. m. service, "A Man with a Desire"; at 7 o'clock , "A Note of Warning." Bible school at 12 m. with classes for all ages. Boys and Girls meeting at 3:30 p. m. Epworth League service 6 o'clock, subject, "Meaning of Discipleship." Leader, Pearl Jacobs.

If you enjoy music you and your friends will enjoy the 7 o'clock service. Theo rchestra is a wonderful help to the song service and the sacred concert at the close is a treat. A feature will be a musical number entitled Rock of Ages. Free seats. A cordial welcome. If you are without church home will be glad to share ours with you.

The Tuesday evening service will be addressed by J. O. Whitcomb, printer; F. R. Bentley, real estate dealer; Mr. Pohl, auto supplies, all of Syracuse. This will be a great service. Everybody invited.

# CITY MAY HAVE HOME OF CURES

Unless the plans in the mind of Dr. W. W. Micks, who has established in the Quirk theatre building, the Clemans Institute of Osteopathy, go astray the institution is destined to grow until it becomes a sanitarium with a capacity for housing at least 40 patients, and added to that a nurses' training school. When this idea is realized, and a proper location secured, the institute will be equipped to take care of patients living in this city, and whose homes are in distant places.

Dr. Micks has equipped the present quarters in a neat and tasteful manner, and with instruments, etc., necessary to treat all cases coming under a physician's or surgeon's attention. In doing this he realizes there is but one way to attract the notice of the public, and that is by educating the people to have a clear idea of osteopathic method, and the way to reach an understanding of the system is to have an intelligent explanation made of it. This can be secured at any time by calling at the institute.

The Clemans Institute is one of the three schools recognized by the law, its physicians are licensed by the University of the State of New York and are registered in the County Clerk's office and with the city physicians.

### NOTICE OF SALE

Sealed bids will be received at the office of the G. J. Emeny company up to 10 o'clock, a. m., Wednesday, February 2, for the property including the 3-story brick factory building and site, water-power and water-power rights and all claims against the State that it may have for abandoned canal land or otherwise; also all machinery and fixtures.

A certified check for $100 payable to the G. J. Emeny company to accompany each bid, the same to be returned if bids are not accepted. We reserve the right to reject any or all bids.

G. J. EMENY CO.

### WEATHER FORECAST

**Rain or snow and warmer tonight and Sunday with moderate fresh east winds.**

### POOL PLAYERS WIN FOURTH MATCH IN SERIES

The fourth pool match in the 1,000-point series which is being played between Oswego and Fulton teams occurred in the Alhambra at Oswego, lastn ight, resulting in the two players who represented this city scoring a victory over their opponents. Westover defeated Case 50 to 31, while, Welch disposed of Morse to the tune of 50 to 30.

The next match will be played in this city Monday night at the Welch pool parlors. Welch will also play Guzzo, who is admitted to be the best pool player in Oswego county, for as ide bet. This additional match is the development of a defeat administered by Welch during the past week, getting the required 50 points while the starch city boy accumulated only 17. Guzzo states that it was an off night, hence the Monday night night with side stakes.

The Fulton team is learding with 369 points, the Oswego men having 344. A purse of $100 goes to the winner of the series. Guzzo and Wateman will represent Oswego in the Monday night game, while Welch and Simoneau will represent this city.

### EUNICE KELSEY

Eunice Kelsey, the two weeks old daughter of Mr. and Mrs. Ira Kelsey of 414 Worth street died yesterday afternoon.

The funeral will be held Sunday afternoon at 2 o'clock from the family residence. The Rev. J. W. Barrett will officiate, and burial will be made at Mt. Adnah.

### MRS. MINER'S FUNERAL

The funeral of Mrs. Virginir Miner, was held this morning from the family home in West 3rd st., and later from the Church of the Immaculate Conception. The Rev. Father Lindsman officiated, and six grandsons acted as pall bearers.

## Those You Know

Mrs. A. T. Barless has returned from Sandy Creek where she visited her daughter, Mrs. W. R. Hughes.

* * *

Current Events Club will meet on Monday evening at the home of Mr. and Mrs. L. W. Emerick. The leader of the program will be Mr. Thomas Hunter and the other speakers are Prof. J. E. Lannigan and Mrs. G. W. Braun.

* * *

Rev. and Mrs. Charles Olmstead were in Syracuse last night to attend the annual banquet at Good Will Congregational church. Mr. Olmstead was one of the after-dinner speakers.

* * *

Mr. and Mrs. Walter E. Warren, of Jordan, N. Y., arrived in the city today, to spend Sunday with friends.

* * *

Assistant Fire Chief Rude is reported as making rapid improvement. His many friends are requested to refrain from calling upon him until complete recovery is effected, as the consequent excitement is not conducive to rapid convalescence.

* * *

Mr. N. L. Whitaker has taken deed to property located in Granby, from Wells Lovewell, of Orleans county.

* * *

Mrs. Ellen Anderson, of Oneida st. will entertain the Daughters of Liberty, next Friday night.

* * *

Miss Floy Norton, daughter of Capt. and Mrs. Lafayette Norton, entertained a number of her friends, last evening, at her home in Hannibal st. Music and games entertained the guests and a delightful luncheon was served.

* * *

Mr. and Mrs. T. D. Lewis are in New York city.

* * *

The Rev. R. G. Thompson, association missionary for the Northern New York district will occupy the pulpit at the First Baptist church on Sunday.

* * *

The Modern Woodman of America will hold a special meeting tomorrow at 2 oclock. All members interested in the success of the Syracuse trip on February 14, are requested to be present.

* * *

Mrs. Wm. Loughrey of Highland street has returned from Oswego.

* * *

Mrs. Fred Mungeer, North 6th st., has returned after spending several weeks with her daughter, Mrs. Lawrence Perkins, in Pittsburgh.

### WILD—ALNUTT

Mr. Arthur Wild and Miss Harriet F. Alnutt were married Thursday afternoon at the Congregational parsonage, by Rev. Charles Olmstead. The couple were unattended. After a brief wedding trip they will reside with the bride's parents, Patrolman and Mrs. Thomas Alnutt, 506 Pratt st.

### ANNOYING KIDNEY ILLS

**Make Life Miserable for Many Fulton People**

There's nothing more annoying than kidney weakness or inability to properly control the kidney secretions. Night and day alike, the sufferer is tormented and what with the burning and scalding, the attendant backache, headache and dizziness, life is indeed, a burden. Doan's Kidney Pills have given peace and comfort to many Fulton people. Profit by this Fulton resident's experience.

Mrs. Mary A. Knapp, 207 Buffalo st., Fulton, says: "I suffered from kidney trouble. My body bloated and my feet swelled so badly that I could not get on my shoes. My kidneys did not act properly and my back was lame. I doctored and tried several medicines, but nothing helped me until I used Doan's Kidney Pills. They regulated the action of my kidneys and made me feel better in every way.

Price 50c, at all dealers. Don't simply ask for a kidney remedy—get Doan's Kidney Pills—the same that Mrs. Knapp had. Foster-Milburn Co., Props., Buffalo, N. Y. adv

### HELD TEN MILLIONS JUST TWO SECONDS

E. M. Hastings of Lacona, editor of the Black and White Record, a publication of the Holstein breeders' and P. G. Hydorn, postmaster of Lacona, were in Washington this week to confer with the postmaster general on having the publication entered as second class matter. When they left they reported that their trip had been successful.

Mr. Hastings was a multimillionaire for ten seconds. He was shown through the treasury building by John Gill of Oswego, secretary to Congressman Luther W. Mott and was permitted to hold one thousand ten thousand dollar bills for ten seconds. While he grasped the bills Mr. Hastings said, "Hello, Rockefeller, how are you?"

### MINNETTO SCHOOL HOCSE CHANGES IT NUMBER

Minetto's one schoolhouse, formerly No. 3, will be known soon as Union school, No. 1, town of Minetto. The action is made necessary by the recent divisiono f Oswego Town, by the vote of the Board of Supervisors Warren S. Gardner, District Superintendent, will take steps to file the papers with the Minetto and County Clerks.

## FINAL PAPERS FILED IN DIVORCE SUIT

The final decree of divorce in the action of Pearl Mahar vs. William Mahar was filed in the County Clerk's office yesterday. The interlocutory decree was entered October 16, 1915, although the statutory time for filing had passed by more than a year. The delay was alleged to be due to the failure of the plaintiff's attorney to take the necessary steps in the matter.

The final decree permits Mrs. Mahar to resume her maiden name of Pearl Shurr and to marry if she wishes, but forbids the defendant from marrying. Clifford J. Mahar, a child of the marriage, is awarded to the mother.

## COMMITTEE LOOKING FOR TABERNACLE SITE

A sub-committe, consisting of Almon Bristol, C. H. Dockstader and G. B. Fairman, which was appointed by the Executive Committee of the Evangelistic Campaign, has during the past week looked over several sites available for the construction of a tabernacle.

The Pratt property at 1st and State sts., the Paddock land, located just north of the Post Office, and the south end of the East Side park were some of the places visited.

Providing vestibules can be constructed on the tabernacle and thus making the place similar to the Sunday tabernacle in Syracuse, where outside noises were not able to penetrate the structure, the site near the post office will receive favorable recommendation from thes ub-committee. It is not thought that passing trolley cars will disturb meetings if the building is properly constructed.

## RECEPTION GIVEN BY CLUB LAST NIGHT

More than two hundred people, attended the reception and dance at the Citizens Club last night. The event marked the official opening of the house following repairs annd alterations.

The new room made on the south side of the first floor by the removal of partitions was used for dancing. Cards and pool were engaged in and refreshments were served.

The Misses Ruth Allen, and Gertrude and Marion Lake and Mr. Lawrence Ranger were heard in vocal selections. Piano and violin selections were alsa given.

The reception committee was composed of the following: O. Henderson, W. L. Forsyth, T. H. Webb, H. L. Paddock, I. Achilli, H. H. Bristol, G. M. Ansermet and G. S. Piper.

# PHOENIX LOST TO FULTON

## Local High School Team Won Over Phonicians by a Score of 16-7 Last Night

The Fulton High School basketball team scored its second straight victory last night by administering a defeat to the Phoenix High school quintet at Phoenix. The final score was 16-7.

Due to the referee failing to call fouls, the game, which was played on a small court, was roughly played, the Phoenix boys being the worst offenders. A number of rooters accompanied the local team and they returned to this city very much pleased with the victory.

Martin started the ball a-rolling by scoring the first basket from the field. L. Regan made good a goal from the foul line. The foul was called on Wallace. Martin failed to make good a shot from the foul line. The foul was called on M. Regan, who immediately after scored the first field basket for the Phoenix outfit. Another foul was called on M. Regan for holding, which Martin again failed to count. The little forward of the locals made good, however in the next minute of play when he scored another basket from the field, placing his team in the lead by a margin of one point. The half ended with the score 4-3 in favor of the Fulton team. The low score for the period was due principally to the fact that close guarding was resorted to, the local guards excelling in this particular.

The second half started with a rush. Reynolds, after emerging from a scrimmage scorced a basket, and in attempting to shoot again was injured and he had to be taken out of the game. Wallace, the tall, lanky center of the Fulton quintet missed a series of shots from the field. Don O'Brien scored a basket from a different angle followed by Roberts of Phoenix who made similar throw. L. Regan followed this up with two more points. Wallace, by a strategetic manoeuvre, was responsible for two points being added to his team's total. Don O'Brien, in the last minute of play, made ab asket.

The lineup of the teams was as follows:

| Fulton | | Phoenix |
|---|---|---|
| H. Martin | Right Forward | L. Regan |
| Reynolds | Left Forward | M. Regan |
| Wallace | Center | R. Regan |
| Frawley | Right Guard | Roberts |
| Johnston | Left Guard | Muzzreal |

Substitutions: Carney for Muzzreal; D. O'Brien for Reynolds; LePoint for Johnston. Time of halves—15 minutes. Timekeeper—Calkins.

# PLANT BLACK WALNUT TREES

Because of the very high lasting qualities of its wood and the moderately rapid rate of growth of the tree in good locations, black walnut is one of the few most desirable trees to plant on the farm. Small patches of rough, gullied, or unused land about the farm and narrow strips along fence rows and highways or corners of barnyards and stock lots make ideal places for planting this valuable tree. The method is simple, and the present heavy crop of nuts makes this year a most favorable time to begin work along this line. The region where walnut growing is practicable extends from southern New England west to the Central States and south to South Carolina and along the northern portions of the Gulf States to Oklahoma. The finest growth takes place in the rich coves of the lower Appalachians and over the Ohio and central Mississippi basins.

Theb lack walnut tree is comparatively free from insect attack, particularly the wood. The price of black walnut lumber in recent years has been consistently high. Another factor to be considered is the rapidly diminishing supply of walnut trees over practically its entire range in the United States, due to recent cutting in order to meet the demand for gunstock material. The tree yields durable wood which may be used for posts and for a wide variety of purposes about the farm, in case it is not sold in the lumber market.

In order to succeed well, walnut requires a rather good grade of soil, hence no attempt should be made to plant it on poor, thin soil or on hot, dry exposures. Favorable situations for rapid development are on strong limestone soils, deep alluvial soil, and stony loam soils along the margins of highlands. Since the walnut tree requires a large amount of light, it may successfully be planted on open tracts recently cleared of old growth and on recently abandoned fields. In this respect it resembles black locust, which, however, grows faster, but in many localities is more or less subject to serious attack by a wood-boring beetle.

The walnut crop was particularly heavy this year, affording a splendid opportunity to gather or buy seed for planting. Nuts should be stored over winter and planted the following spring. They are best stored in pits dug in theg round, the bottom of the pit being covered with leaf litter or straw, on which a 3-inch layer of nuts is placed, then a layer of litter, and so on, covering the whole with soil so as to leave the surface a few inches higher than the general level. Planting should be done about the time gtrmination begins. In eastern United States north of the Gulf States, this is during the month of Marchand early April. Squirrels, chipmunks, and hogs are serious pests if present in numbers and would more than likely succeed in making away with a majority of the nuts if they are planted in the fall. Small tracts, however, surrounded by cultivated fields and other places where these animals are known to be scarce might safely be planted in the early or late winter when labor is more accessible than in the Spring.

To plant the nuts, make a small hole with a mattock or hoe, drop one or two nuts in each hole and cover them with about 2 inches of fresh, firmly packed soil. For the larger areas, a good spacing in forest plantations is to dig the holes 8 feet apart each way or 8 by 10 feet, which amounts to 680 and 545 holes per acre for the two spacings. For small areas, or along fence rows and highways, the spacing should be about 8 feet in the row, unless permanent shade is desired, in which case the distance should be 20 feet during the early period of growth and subsequently incerased to 40 feet by removing the alternate trees. For purposes of nut production the trees should be spaced at distances of from 40 to 50 feet apart, and should be given a due amount of cultivation. Requests for information along this line should be addressed to the Bureau of Plant Industry of the Department of Agriculture at Washington. The number of nuts required can easily be found by knowing approximately their quality, the area of ground to be treated, and the spacing. Care should be taken not to plant under shade. Where the trees in the old wood lot are to be cut during the next year planting might begin now, so as to get a start in advance of the removal later of the overhead protection against early frosts and excessive drying of the soil in midsummer.

While the best results are usually obtained by completely preparing the soil and cultivating it for a few years after planting, farm owners should be aware of thep ossibility of starting hundreds of young walnuts in their wood lots and elsewhere at the expense of only a little labor. This will be a good step in the process of securing useful and moneymaking trees on parts of the farm which would perhaps otherwise be waste land, making no return at all to its owner for its cost in care and taxes. Further information in regard to methods of storing and planting the nuts and caring for the wood lot can be obtained from the State foresters of the various States or from the Forest Service, Department of Agriculture at Washington.

## MINE OWNERS EXAMINED YESTERDAY

Samuel and John Hunter, bankrupts, were examined yesterday regarding their porcupine gold mine, by Nelson P. Bonney of Norwich, one of the attorneys for the trustees. The examination was held before Claude E. Guile in his law offices in this city.

The testimony disclosed that the mine was flooded last year and has not been operated since. The financial conditions of the company were reviewed in detail.

## THE QUIRK TONIGHT

If you have not seen the 4 acts of vaudeville that are at the Quirk today you have missed something especially the last act with Walter Stanton & Co., with the Giant Rooster, one big novelty act. The Ritchison Dog circus presents something new in dog dom that is marvellous while Coyne Harris and Morton & Fairfield furnish the singing-talking and dancing portion of the one splendid bill.

**BUSINESS—Particularly the most desirable business—is very much like the sport of fishing. You can catch it if you use good bait. The Evening Times offers you the correct bait.**

SHOW THIS TO YOUR HUSBAND!

Any woman whoc an earn $1 a day at other work is wasting time doing her own washing and ironing, because we will do it for less than she could earn in the same length of time.

If your washing and ironing take two days of your time, it costs you $2 to do it, to say nothing of the expense of fuel, soap, starch, bluing, wear and tear on wringer, tub and boiler. You actually lose 50 cents to $1 every time you do your own washing. This is not taking into consideration the effect upon your health and necessary neglect of meals and other family duties on these days.

# ILLITERATE FOLKS ARE BEING TAUGHT

## Work Being Carried on Into Dark Corners of America.

## KENTUCKY TREATED FIRST

**Moonlight Schools Established In That State In 1911 and New Work Is Being Copied In Other States—Founder Tells What Work Means To Backward Thousands.**

Lexington, Ky.—"Amusing indeed have been the various impressions that have prevailed throughout the country in regard to moonlight schools," writes Cora Wilson Stewart, founder of the famous moonlight schools of Kentucky. "Some have imagined them to be schools where children studied and played and scampered on the green like fairies in the moonlight. Others have believed them to be ideal courting schools."

It was in the obscure position of county superintendent of Rowan county that Mrs. Stewart began four years ago the work that has carried the alphabet and spelling book into the darkest corners of her state. Today she is president of the Kentucky illiteracy commission, author of "Country Life Readers" and has the satisfaction of seeing her work copied in many other states. How that work began and what it has meant to the backward thousands of her state she herself tells:

"When I was superintendent of Rowan county schools I served as secretary to a number of illiterate folk—a mistaken kindness. I ought to have been teaching them to read and write. Among these folk was a woman whose children had grown up without education, except one daughter, who had had limited schooling. She had gone to Chicago and there had profited by that one advantage at least which the city possesses over the rural district, the night school. Her letters were the only source of joy that came into that aged mother's life, and the drafts which they contained were the only means of relieving her necessities.

"Often she brought the daughter's letters over the hill, seven miles, to the county seat, for me to read and answer for her. After an absence of some six weeks she came in one morning fondling a letter. I anticipated her mission and said: 'A letter from your daughter? Shall I read and answer it for you?'

"With dignity and pride, she replied, 'I kin answer it fer myself—I've larned to read and write.'

"In amazement I questioned her, and this is the story she told: 'Sometimes I couldn't get over here to see you, and the "cricks" would be up between me and the neighbors or the neighbors would be away from home, and I would not get a letter read and answered for three or four days, and anyway it jist seemed like thar wuz a wall 'twixt Jane and me all the time, and I wanted to read with my own eyes what she had writ with her own hand. So I went to a store, and I bought a speller, and I sot up at night till midnight and sometimes till daylight, and I learned to read and write.'

"Incidents like this led directly to the establishment of the moonlight schools. The public school teachers of the county were called together. The fact that there were 1,152 men and women whom the schools of the past had left behind was dwelt upon. The teachers were asked to volunteer for night school service, to open their schools on moonlit evenings—to give these people a chance. This they cheerfully agreed to do, and on Labor day Sept. 4, 1911, these teachers celebrated by visiting every farmhouse and every hovel, inviting people of all classes to attend the moonlight schools."

## CONGRESSMAN MOTT ADVOCATES CADET CORPS

School superintendents in different towns in this Congressional district are in receipt of a letter from Congressman Mott in which he advocates the formation of cadet corps in high schools. Representative Mott refers to the fact that his son is a member of a volunteer cadet corps in a Washington school, and of the good which is derived from it. He quotes the opinion of a well known army officer on the good of the military training in the public schools. Representative Mott assures each school superintendent that he will lend him any aid possible in the formation of such a corps.

# AN ARMY CANNOT BE RAISED HIGHER IN QUALITY

## THAN ITS GENERAL AND COMMANDING OFFICERS

Neither can a city rise higher than its leaders, constantly on the field, directing each day's plans and work.

Every hour has its duty for the leader who needs to see for himself that the steering gear is working right.

We cannot have proxies---they are unequal to it, and the people have to be safeguarded, and to hold the leaders of a government to strict accountability for everything done.

# Mr. Bowser Wins

## Or at Least He Thinks He Does

**By M. QUAD**

Copyright, 1915, by the McClure Newspaper Syndicate.

Two or three weeks since Mr. and Mrs. Bowser had a talk on natural history, and Mr. Bowser got the worst of it and a bump from the family druggist besides. He admitted to himself that he did, and, though he is not a revengeful man, he felt that he must get even. He therefore planned a little plan, and for a week he spent an hour or so in the library every evening.

Mrs. Bowser did not ask what was up, and he was conceited enough to think because he did not tell her that she would not find out. She did find out, and she was all ready for him when he laid down his newspaper the other evening and in a voice he tried to make careless asked:

"Mrs. Bowser, what is a quid nunc?"

"It is an animal a good deal like an alligator," she answered promptly. "It has six legs and six claws on each foot. Instead of having the hide of an alligator it has soft, long fur, and it is sometimes used for muffs. Its principal food is fish, and it has a throat and gullet large enough to take in a shark five feet long. When provoked it will attack a man, and unless he is prepared for it he may lose his life."

Mr. Bowser flushed up, and his mouth twitched, and he was about to slap his leg when he stayed his hand. He had gone to the dictionary to find out what the word signified, and he had led Mrs. Bowser into his trap.

WALKS ABOUT ON HIS FOREFEET.

He wanted to shout with laughter, but there was more to come. Presently he quietly asked:

"I should like to see a quid nunc, but I suppose I never shall. Did you ever hear of a similia similibus curantur?"

"Of course," she glibly answered. "It is an animal about as large as a kangaroo and walks about on his forefeet with its hind ones in the air. At intervals it calls out in a plaintive way, like a child lost in the forest. It is found mostly in the wooded mountains of Brazil. It has such a fierce temper that when the natives hear one call out they rush into their cabins and lock and bolt their doors. It will carry off and devour men, women, children, dogs, goats and cats. No zoological garden has ever succeeded in taming one. It is well for us, Mr. Bowser, that the similia curantur does not live among us."

Mr. Bowser was red clear around his neck, and his eyes twinkled. The conceited Mrs. Bowser was preparing a great fall for herself. It would be something that he could throw at her for years and years to come. With a suppressed chuckle he asked:

"There is the e pluribus unum. I don't remember to have ever seen one. Perhaps you have?"

"Three or four of them, Mr. Bowser, but not in zoos. They are a rare animal and part bird, and their backs are covered with spines as long as a tenpenny nail. Besides this, they have a stinger a foot long for attack. Whatever that stinger reaches dies. They feed on what is called skunk's cabbage, and their breath can be scented half a mile away. It is a native of Borneo, and such is its fierceness that it has been known to attack fifty men at once. Mr. Bowser, if we had the e pluribus unum there would be fewer men running out of nights."

Mr. Bowser had to laugh in spite of himself, but turned it off by saying that he was amused by something he had witnessed on the street car that afternoon and that he would tell about it later on. Meanwhile what was a jucherie?

"Why, I only know from what I have read," was the answer. The jucherie is any native of the cannibal islands. It is a large birdlike animal—that is, it has feet like an alligator, wings like a bird and eyes and beak like an owl. It has a tail ringed around like a coon's. When the cannibals catch a missionary and roast him the jucherie can smell the banquet a mile off. He hastens to the feast, and unless the savages flee and leave him to eat at his leisure he kills five or six of them. The United States is no place for the jucherie. We never roast our missionaries, and the animal will dine on nothing else."

Mr. Bowser rose up and went to a back window to look out. He never was so tickled in his life before, but he must keep it to himself. After a minute he came back and sat down and asked:

"I heard some men talking about the 'S O S' the other day, but I couldn't make out what it was or is. Is it a bird or animal, Mrs. Bowser?"

"Why, a bird, of course," she answered. "It is some such bird as the condor of Peru, but curiously enough it has one long wing and one short one. Thus when it flies it flies in a circle, and to get anywhere it must descend to the ground and make use of its legs to get over the ground. Its legs are weak and tottering, and as it walks it utters cries of 'S O S.' Although the strange bird is a native of Java, I think I have heard its cries several times right here. They are mournful beyond description. They make you think of a poor orphan child wandering in the dark and expecting to be devoured by a panther at any moment. What is the matter with you, Mr. Bowser?"

"I—I feel too full," was the hesitating reply. "Mebbe it's a case of indigestion."

It was a case of wanting to laugh and holding back on it like a man holding to the reins of a runaway team, but Mr. Bowser stopped the team by great effort and humbly asked:

"There is the mon ami, Mrs. Bowser. I don't remember that I ever saw one."

"But I have. It was when I was a little girl, however. There has not been one seen in this country in a great many years, and I believe the thing is extinct. I was out in the woods gathering wild flowers, and suddenly I heard a gruff voice speaking to me. I thought it was a man and looked up with a start of alarm. It was no man, Mr. Bowser, but it was a mon ami. After I got home and told my father about it he said it was, and my Sunday school teacher said it was, and the preacher said it was, and all agreed that I had had a narrow escape, for the thing did not attack me."

"But how did it look?" asked Mr Bowser.

"It had the general appearance of a monkey. But it had six legs, two tails and four eyes. Its two front legs were like human arms and were armed with six claws on each foot. Its eyes shone like coals of fire, and its teeth were as long as a finger. It was a dreadful looking animal, Mr. Bowser, and no wonder that little girl, only ten years old, was almost frozen with terror. I screamed. I shrieked. I called upon my father and my mother and my brother Ben to save me. I should have called upon you, but I had not met you then. The thing screamed when I screamed. It shrieked when I shrieked. Then it began to run backward in a circle around me. I saw that three of the legs were so constructed that it could run backward as well as it could run forward with the other three. It kept up its running backward for several minutes, and then uttered a whoop and began to run forward. It was horrible, Mr. Bowser, to hear its teeth clicking together and to see those four eyes emitting sparks of fire."

"But get along to the end," said Mr Bowser, who half believed the story in spite of himself.

"The end is very near, my dear," replied Mrs. Bowser. "The thing came closer and closer and was preparing to spring upon me when I fainted away. What else could a poor girl do? When I recovered consciousness the terror had departed, and I was unharmed. He had simply untied my sunbonnet and made off with it. He probably wanted it for his Santa Claus gift to his own little girl. That's all, Mr Bowser. I notice that you are getting uneasy."

"Y-e-s," he answered as he rose up. "I think I will go over to the drug store and get a few troches for my throat. It feels rather stuffed up."

When Mr. Bowser got out to the gate he leaned on it and laughed until the tears came to his eyes. He had caught Mrs. Bowser at last, and he must tell the druggist about it. He laughed all the way over to the store, and when he entered he had such a broad grin on his face that the man of drugs exclaimed:

"Why, Bowser, what has happened?"

And when Mr. Bowser told him all they laughed and chuckled and pounded on the counter in unison, and the druggist said:

"Bowser, you are great! You are simply immense! By George, by George, you have done nobly!"

And about the same time Mrs. Bowser was wiping the tears from her eyes caused by laughter and saying to herself:

"Poor Mr. Bowser! If a wife didn't let the husband get the advantage once in awhile it would get to be monotonous."

### Prescribing a Cure.

"Mr. Jones, you will either have to marry at once or leave our employ."

"But why are you so anxious that I marry?"

"While you are in love you do not half attend to your duties, and you must either be cured or fired."—Houston Post.

### The Bachelor's Decision.

I'll not get married on Monday,
For that's the day they wash;
I'll not get married on Tuesday,
For that day I play squash.

I'll not get married on Wednesday
For fear that it might rain;
I'll not get married on Thursday
So long as I am sane.

I'll not get married on Friday—
Bad luck might then befall;
I'll not get married on Saturday—
I'll not get married at all
—Yonkers Statesman.

# A Close Call

**By DONALD CHAMBERLIN**

During the administration of President Huerta of Mexico I was employed by the United States government to do certain service for the state department. I went by land, crossing the Rio Grande at Laredo and entering Coahuila. I soon fell in with a prominent leader of the rebel forces, who, after I had satisfied him that my mission was not detrimental to his interests, expressed a willingness that I should go to my destination, the City of Mexico.

"How would you like to earn some money?" asked the general.

"I would gladly earn money if I can do so without compromising my employers at Washington."

"What I have in mind would not interfere with that at all. I desire to get a message through to a certain person in the City of Mexico. As a messenger of the United States you would not be suspected. Your government has not taken sides in this matter, and there is nothing to prevent your being the bearer of a letter from me to a friend."

"But supposing I am caught with such a letter on my person?" I asked.

"In that case you would be shot."

"And what would I receive for taking this risk?"

He named a sum that tempted me. It seemed to me that, being in the employ of the United States government, there would be little or no risk in my bearing the general's message. I needed the sum he offered for a certain purpose and concluded to stake being shot against it.

He wrote his message on a bit of thin paper about three inches square. I was to take it to a man high in favor with President Huerta. His name and address were given me, but were not written on the message, though it was signed by a fictitious name. I decided to carry it in the upper vest pocket on the left side, my object being to have it where I could easily get it to destroy it in case I was cornered. The general paid me the money for the service I was about to render, for I was to receive it whether I succeeded in delivering the message or not.

Going southward on the general's pass I struck the Federal lines not far from the City of Mexico. I informed the commanding officer of my mission and was received by him with the courtesy due one in the United States service. Indeed, being stationed at a point where he saw no one except his officers and men he seemed pleased to see me, and since I reached his quarters in the evening he insisted on entertaining me overnight.

He proved to be an inveterate gambler, and nothing would do but that I must play cards with him. I dared not antagonize him by refusing and after the evening meal sat down with him in his tent to play. He soon won all the cash I had provided for my journey, and I proposed to quit. He seemed inclined to play on, and I feared to refuse him. I had the money the general had given me, a roll of bills, in my pocket and was obliged to produce it.

My opponent looked at this large quantity of Mexican money with interest. He said nothing about it, but from that moment he began to talk about the difficulty of my getting on in the morning and expressed the opinion that I would be delayed. His prophecy came true, for he gave orders that no conveyance was to be furnished me.

The next morning I asked my entertainer to cash a draft on the American consul at the capital. He promised to do so, but made no move to produce the funds. His actions were so suspicious that I began to think I had better seize upon any opportunity to destroy the general's message. But I was given no opportunity. My host never left me for a moment unless there was some one else in the room. All the while he was telling me that he was endeavoring to secure conveyance for me, that he expected a team very soon, and when it came he would furnish me with money for the journey.

About 10 o'clock in the morning I saw a sergeant posting a guard about the house. My heart stood still. I was suspected, would be searched, and the message would be found on me. That meant death. The officer was looking over some military papers at a table, with an unlighted cigarette between his lips. Taking a cigar from my pocket, and with a show of coolness I did not feel, I deliberately cut off the end with my penknife and asked him if he had a match. He produced one, struck it and was about to light his cigarette when, remembering politeness, he extended the match to me.

"After you," I said.

He touched it to the end of his cigarette and handed it to me. I put the flame to the end of my cigar, but purposely failed to close my lips tight in order to prevent suction. When the match had burned near my fingers I took the message from my vest pocket, put one end to the flame and lit my cigar with it, taking sufficient time for it to be entirely consumed.

I saw the officer look up at me quickly, but he said nothing. Dropping the ash of the paper on the floor, I put my foot on it, rubbing it with the sole of my shoe so that it could not betray me.

I think he saw by my expression that I experienced a great relief and had made myself safe, for he permitted me to depart without further delay.

# For the Children

A Small Lady and a Big Set of Real Furs.

Photo by American Press Association.

The smiling little lady in the picture is very happy, as her expression indicates. She has good reason for her joy, because now she has a set of real furs for her own. Formerly this young lady used to wear mamma's on occasion, usually in the house. Not long ago, however, she had a mysterious visitor at night—he probably came down the chimney—and the next morning there was a beautiful set of furs bearing her name. Wasn't that a splendid surprise? The little girl thinks it was the finest thing that ever happened in her short lifetime.

### Queer Bird Islands.

The most curious bird "islands" are to be found among the islands of Santa Barbara and in the California seas. These resting places for the birds are very small indeed, and often you can see the "island" disappear from sight, while the bird flutters hastily away to another.

They are simply fish that are perhaps the laziest in the whole world of ours. The natives call them the mola-mola, and the white folks know them as mole, or moon fish. They bask in the sun and seldom leave the surface of the water except when chased by an enemy. They vary in size up to ten feet across their backs. As for tails, they are satisfied with very rudimentary ones, a mere fringe of finlike growth serving as such. They are not afraid of the gulls and cormorants, for these birds settle down on their backs and rest there, preening and oiling their feathers and having a fine time. These fish are not good to eat, being of about the tenderness of india rubber.

### Shrewd Boy Horse Tamer.

Out in Oklahoma there is a boy who has turned his attention to gentling colts on his father's ranch, where a great many horses are raised for the general market. Heretofore they were sold as they came from the pasture, bad and good, tame and wild, gentle and vicious, with prices set accordingly. The boy saw the absurdity of this. If good horses brought double and treble the money that bad ones did, why have any bad ones to sell? And so he studied out and followed a set principle of gentling, to the effect that, after holding each animal until its education was complete, there were received fully three times the prices as formerly. Now this youngster has been made by his father a member of the ranch company and regularly draws down a fixed income and a bonus on his added work.—Philadelphia Ledger.

### Peanut Butter Fudge.

Two cupfuls of light brown sugar, a half cupful of milk and a scant two-thirds cupful of peanut butter. After boiling the sugar and milk to the soft ball stage, remove it from the fire and gradually beat in the peanut butter. Replace on the fire a moment, then spread on a buttered pan, and when partly cool cut into squares.

### Waiting.

The first little cat said, "Meow-ow-ow!"
The next little cat said, "Spit-t!"
The third little cat looked very wise,
And the fourth one near had a fit.

The first little cat reached out a paw,
The next little cat sang a note,
The third little cat twitched its whiskers,
And the fourth one stroked down its coat.

The first little cat said, "Oh, hurry!"
The next little cat said, "Oh, wait!"
The third little cat said not a word,
And the fourth one cried, "Don't be late!"

Then four little kittycats scurried
Way off to an old apple tree,
Where four little birds, safe in their nest,
Were cozy and sweet as could be.

And the four little cats, they waited,
And four little birds waited, too,
Until, with song and flurry of wings,
Mother came—and waiting was through.

Then four little cats scampered homeward,
And four little birds in the tree
Just warbled and chirruped and twittered
As happy as small birds could be.

—Philadelphia Record.

## BYRON'S UNHAPPINESS.

### His Icy, Frozen Mannered Wife and His Cruel Parents.

Marie Corelli, the English novelist, says poets do not really love. If they did they could not write about it. They imagine they love. And their imagination embraces many fair objects.

"Byron," she says, "was an unhappy man. But he was not as unhappy as he imagined himself to be. He found pleasure, even inspiration, in dwelling on his own troubles. Many poets do."

She tells us that Byron's mother had been a Miss Gordon before she married the shiftless and dissolute Captain Byron, the poet's father, and that amid constant quarrelings, thrashings and unjust abuse and the most coarse and intemperate language poor Byron began his career.

"With such a father and such a mother," says Miss Corelli, "the wonder is that he managed to store his mind with so many impressions of beauty and grandeur and that he was able to lift his soul above his surroundings to such a height of intellectual power. His mother's furious temper and her cruel mockeries stung him, not into a reply, but into silent and lonely brooding on his wrongs.

"He himself describes the sense of horror and humiliation which came over him when, in a fit of passion, she called him 'a lame brat.' When Sir Walter Scott met him he said he should scarcely have noticed it. In fact, the great novelist was as lame as the great poet, only Byron's brilliant personality made him, more than Scott, an object of comment. His marriage was a failure. It was a fortunate thing for literature that his wife left him after one year of matrimony.

"Had she remained with him his genius might have perished under the freezing influence of such a paragon of propriety and dullness. William Howitt tells us that Lady Byron had 'frozen moments.'

"'I have seen her,' he says, 'come down in the morning as if she had lain all night on a glacier, frozen, as it were, to the very soul, and no efforts on the part of those around her could restore her for the day to any genial social warmth.'"

### "The Wind Is In the Palm Trees."

But the glory of palm trees! No pictures or description in books had ever made me realize that before. "The wind is in the palm trees" had been for me but a haunting phrase in Mr. Kipling's most famous ballad, but when the bellboy threw open the door of my room (in Nassau of the Bahamas) looking into the hotel gardens I cried, "What is that sound?" for my ears had been instantly filled with a delicious rippling, as though the room was alive with invisible rivers of running water. I ran to the window. It was the wind in the palm trees—the freshest, purest, gladdest sound to be heard in the world.—Richard le Gallienne in Harper's Magazine.

### A Delicate, Tasteful Breakfast.

Apropos of monotonous unimaginative breakfasts, Thomas Love Peacock once drew up the menu for breakfast "for a man of taste." "Coffee, tea, cream, eggs, ham, tongue, cold fowl," he wrote, "all these are good and bespeak good knowledge in him who sets them forth. But the touchstone is fish. Anchovy is the first step, prawns and shrimps the second, potted char and lamprey the third, but lobster is, indeed, matter for a May morning and demands a rare combination of virtue and knowledge in him who sets it forth."—London Standard.

### Scotch Judges' Frugality.

Scotland might safely be backed at least to rival England in the matter of frugality among her judges. There is Dean Ramsay's story of the dinner party given by Lord Polkemmet. When the covers were removed the guests were surprised to find that the dinner consisted of veal broth, a roast fillet of veal, veal cutlets, a florentine (an old Scottish dish composed of veal), a calf's head and calf's foot jelly. Observing the sensation, Lord Polkemmet explained: "Ou ay, it's a' cauf. When we kill a beast we just eat up ae side and down the tither."—London Chronicle.

### Mammoth Cave.

"To me the Mammoth cave of Kentucky is simply a portion of the Grand Canyon of Colorado underground," says George Wharton James, the traveler and author, in "Our American Wonderlands." "Almost all the phenomena of the great cave are revealed in the Grand canyon region, and, given time enough, it is not inconceivable that the Mammoth cave might develop into a Grand canyon region of its own."

### Kept Them Quiet.

"I went to a symphony concert yesterday afternoon."

"Did you enjoy it?"

"It was the most wonderful experience I ever had. Just think of sitting in the same room with 2,000 women and not one of them saying a word."—Melbourne Age.

### Disappearing Cannon.

"Some of our cannon are disappearing," remarked the lieutenant.

"Well, things will disappear when you have careless help," responded the lady who was going over the fort. "I find that a great trouble about keeping house."—Louisville Courier-Journal

### Saving.

Governess—Why don't you use your brains, Douglass?

"Because I want them to last."

Try this: When telling a piece of scandal, don't say "they say;" just say "I say."

# All Modish For the Ball

CORAL colored panne velvet gives this voluminous wrap, which is lined with a creamy satin. The unusual sleeves take their fullness from a mass of shirrs around a shoulder gusset, while the whole volume is richly banded with skunk fur. Two beautiful jet cabochons fasten the wrap at the throat and shirred waist line, and the chin-chin turns up to the ears if need be.

• • •

The toque altogether of soft plumage, with upstanding wings at the sides, is one of the prettiest of millinery fashions.

# Easy & Practical Home Dress Making Lessons

Prepared Especially For This Newspaper by Pictorial Review

## For a Smart Trousseau.

Suitable for afternoon or evening wear is this frock of silk crepe de Chine and crepe Georgette, trimmed with silver braid and net.

This gown announces itself for smart wear with a flare of gold braid and a flare of net, the net being tricked into flaring at the elbows, where the sleeves are finished with tiny wired frills. It is fashioned of field mouse crepe Georgette, the foundation skirt being of silk crepe de Chine and the underblouse of net. The neck is finished with a standing collar of silver braid and the applied front is pleated into a deep belt. It closes at the left side and at the center-back of the belt.

Because the waist is charming for separate wear, cutting of it forms the basis of today's dressmaking lesson. In medium size the frock requires 3 yards 44-inch crepe de Chine and 3¾ yards crepe Georgette, with 1½ yards 30-inch net. The back, collar and applied front are laid on a lengthwise fold of the crepe, and although the sleeve is made of contrasting material, it is laid on the net in the same way as illustrated on the cutting guide.

The front, underfacing and belt of the waist are placed on a lengthwise thread of material. For the V-shaped neck without revers, cut out neck-edge of front on small "o" perforations. For the shorter sleeve cut off the lower part of plain sleeve on small "o" perforations.

The skirt is a graceful companion to the bodice and on many of the spring frocks facings of bright satin are used for draped tunics, the facings showing slightly as bodily motion ripples the tunic.

Do not cut the skirt of your new frock short without allowing something for lengthening. There is a rumor that the very short skirts are going out.

Black and white tulle combined with gold or silver lace continues to be popular for evening gowns.

CUTTING GUIDE 6230

FOLD OF 44 INCH MATERIAL WITHOUT NAP

Patented April 30, 1907

### The Candy Corner.

PEPPERMINT.—One and one half cupfuls sugar, one half cupful boiling water, six drops oil of peppermint. Put sugar and water into granite saucepan and stir until dissolved. Boil ten minutes; be sure it really boils; remove from fire, add peppermint, and beat till smooth enough to drop from tip of spoon on wax paper. Get some of the vegetable colors sold in grocery stores and color some of these a light green; flavor some others with rose and color pink.

The small jars of coloring are harmless and will make your candies look quite professional.

Molasses Candy.—Two cupfuls Porto Rico molasses, two-thirds cupful sugar, three tablespoonfuls butter, one tablespoonful vinegar.

Put butter in kettle, place over fire, and when melted add molasses and sugar; boil and stir until, when tried in cold water, mixture becomes brittle; add vinegar just before taking from the fire. Pour into well buttered pans. Pull when cool enough to handle; cut into pieces with large shears and place on buttered plates till cool; then wrap each piece in paraffin paper.

Puffed Rice Brittle.—This is another wholesome candy relished by every one—crisp the rice in the oven before using: One cupful of granulated sugar, one half cupful of water. Boil together five minutes; add two tablespoonfuls of molasses, butter size of walnut, half a teaspoonful of salt. Boil until it hardens in cold water. Take from fire and stir in one half package puffed rice. Pour into buttered pans.

Another advantage of making these candies at home is the inexpensiveness of them as compared with the rich candies one buys, often made of inferior materials. The pleasure you will find in making the candy for your family, or in having some members of the family help you make it, will add to the satisfaction.

Malted Milk Fudge.—One-half can condensed milk, two-thirds cupful of water, one tablespoonful of butter, three heaping tablespoonfuls of malted milk, two cupfuls of granulated sugar, one teaspoonful of vanilla, two ounces of unsweetened chocolate.

Boil ten minutes, stirring continually while cooking. After removing from the fire stir until mixture begins to thicken. Pour in a shallow dish, previously buttered, to harden. Omit chocolate if you wish a plain vanilla fudge.

Anna Thompson.

### Sunday After Church.

Mabel—I don't think much of the close of that sermon, father. Father—No? You were probably thinking more of the clothes of the congregation, my dear.—Judge.

### Gypsies And Death.

The custom of placing the property of the dead in their graves has always been followed by the true Romany gypsies. It is due to some old tradition of ill luck attending the possession of an article whose former owner is gone, and much valuable property is buried in this belief. There is also a sentiment among gypsies against the possession of anything that has belonged to a dead person, because it serves to remind the living of the departed and inspire in them a dread of death. The custom of burying their property with gypsy dead dates from the earliest history of the Romany tribes.

### Cruelly Disappointed.

"Why is Mrs. Binks so angry with her husband?"

"Why, when he stayed out late the other night he told Mrs. Binks that he had been kept at the office by an important business engagement, and she found out subsequently that this was the exact truth."—Richmond Times-Dispatch.

### PLAY THE GAME.

Play the game! We are not here to whine and complain, to stay down because we are knocked down, to blame the inequalities of the ground or the unfairness of the umpire. Where there are no difficulties there can be no victories. We are here to win, if we can, in every condition that confronts us, to do our best in any case, and to do it to the end.

# TODAY'S FASHION NOTE

Sports costume consisting of coat of silk knit material and skirt of black and white striped serge. The coat is bound with heavy black silk braid and the cap and scarf match the skirt. In medium size the coat requires 2 yards 5-inch4 material, with 3 yards 4-inch braid, while the skirt requires 3 3-4 yards 44-inch serge.

Pictorial Review Coat No. 6515. Sizes, 36 to 42 inch bust. Price, 15c. Skirt No. 6294, Sizes, 22 to 32 inches waist. Price, 15 cents.

Pictorial Review Patterns may be procured at the J. R. Sullivan and M. Katz & Co. Department store, Fulton.

### THE ULTRA MOTORCOAT.

Made of Glazed Leather, as Practical as Smart.

THE NEWEST NOVELTY.

Plum colored glazed leather slit and inserted with white kid and banded with black fur gives this jaunty effect. The coat is popular for motoring, being quite as impervious to cold and lighter than a fur garment. Trig skating suits are being made of this new leather.

### Thrift.

"I've got to take exercise and quit eating so much," said the young man who calculates closely.

"Worried about your health?"

"No. I'm getting so stout my room mate's evening clothes won't fit me."—Washington Star.

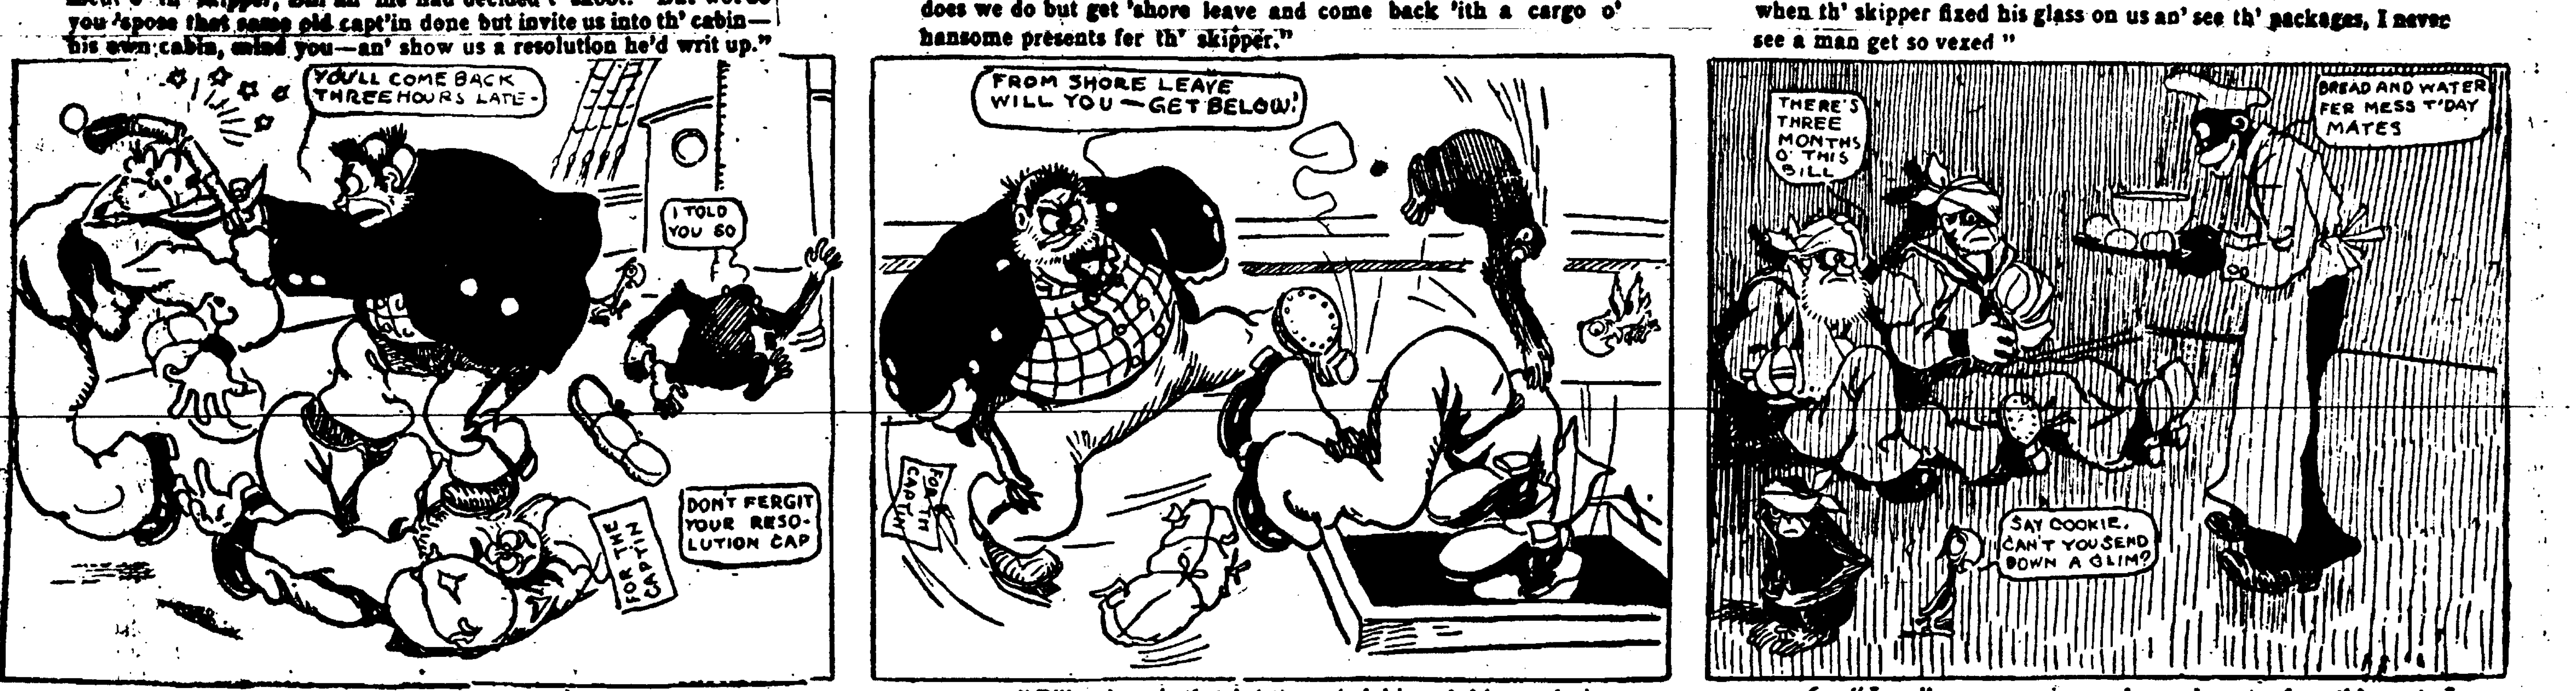
Judge by yourself and not by the opinion of others. Misfortunes and disorders arise from false judgments.—Marchioness de Lambert.

# BINNACLE JIM AND THE CAPTAIN'S NEW YEAR'S RESOLUTIONS.

1. "Speakin' o' swearin' off brings me back to Capt'in Soakum an' the good ship 'Dancin' Sally.' You see we ended our voyage on New Year's Day, an' owin' to th' shameful treatment o' th' skipper, Bill an' me had decided t' skoot. But wot do you 'spose that same old capt'in done but invite us into th' cabin—his own cabin, mind you—an' show us a resolution he'd writ up."

2. "Sink us for a pair o' fools 'f we didn't take him at his word an' sign papers there an' then fer another cruise. Me an' Bill felt so good an' the next day bein' New Year's an' in port, wot does we do but get 'shore leave and come back 'ith a cargo o' hansome presents fer th' skipper."

3. "You'd a thought same as me an' Bill that them presents 'ud a touched his heart, but some men 'at go to sea haven't got any, an' us bein' a short spell over due made matters worse when th' skipper fixed his glass on us an' see th' packages, I never see a man get so vexed."



4. "Bill an' me 'us so upset an' taken aback 'at we didn't stand th' ghost o' a show, besides th' skipper 'us a powerful man 'n riled up an' th' way he misused us an' hauled us about th' deck 'n jumpin' shameful an' terrific."

5. "Bill an' me both tried t' remind him o' his resolution, but thar warn't no chance to get a word in edge-ways with the capt'in, an' we felt actually relieved when he kicked us into th' hold an' clapped down th' hatch."

6. "In all my experience, boy an' man, afore th' mast, I don't reckolect any harsher treatment on shipboard than wot we got in them same three months, an' as Bill says, an' so do I, I never take no stock in these New Year's resolves, an' you can lay to that, my lad." International Cartoon Co., N. Y. 340

# RED TAPE IN JAPAN

## They Have as Fine a Brand There as We Have Ourselves.

## BUT IT IS NOT VERY COSTLY.

**An Experience With the Circumlocution Office That Would Have Been Amusing to the Innocent Victim but For the Dread of the Expense.**

There are many curious customs in Japan, and many things are done in that interesting empire according to methods that would be called topsy turvy when judged by the standards of civilization in western lands. But in one respect the Japanese are fully abreast of any of the occidental countries, and that is in their ability to manipulate official red tape. The following incident, recounted by a correspondent of the Youth's Companion, admirably illustrates the point. He writes:

"Although I have lived long in Japan, I have tried to keep pace with western ideas. A corner in my compound bears witness to the fact that I once tried to make practical application of the modern maxim 'Help the poor to help themselves.' It worked out in a rather surprising way. A beggar asked me for money one morning, and I saw a way to help him without, as the expression goes, 'pauperizing' him.

"There was a bad place just inside the compound gate that needed to be filled in with stones, of which there were plenty on the seashore near by. Here was a man who could transfer the stones to the compound for the 30 sen (15 cents) that he had asked of me. The man fell in with the plan cheerfully and set to work.

"The job was about completed to his satisfaction and mine when a policeman, who appeared on the scene, asked my man if he had received permission to remove the stones. The workman referred the officer to me, and I had to confess that I had not thought it necessary. Evidently the officer thought otherwise, for I was politely but firmly told that I might secure a permit by applying at the city hall.

"To the city hall I went, knowing that it is not wise to trifle with the regulations of the police department. From there I was referred to the provincial building. As I was personally known to the governor of the province, I sent my card into him, only to learn that he was absent. The lieutenant governor, however, said he would be glad to receive me. That courteous gentleman was going to pass the whole thing by, but thought it well first to speak of it to the department of public works.

"Now, the department of public works had an efficient head, who believed in letting nothing go at loose ends. He announced that I must fill in a certain form in duplicate, making formal application for the stones. Then two maps would have to be drawn, showing where the stones had been found and the place to which I wished to remove them.

"The board of public works stood ready to make the maps—at my expense. There was nothing to do except to agree to this arrangement, since I had already had the stones moved. I thanked the lieutenant governor for his assistance and withdrew.

"In a day or two a messenger came with the maps and forms requiring my signature. After that they were sent to the city hall. Then another messenger took them to the governor for his signature. One set was filed at the city hall and the other at the office of the executive.

"In due time notification came by special messenger that I was permitted to remove the stones—which every one knew I had done a week before. All that prevented me from thoroughly enjoying the whole affair was the thought of the bill that I should receive from the department of public works.

"After several weeks of suspense I was notified to appear before the treasurer, at city hall, to pay my indebtedness to the municipality. Armed with my bank book, I appeared at city hall. What was my surprise and relief to find that the bill for all this red tape and infinite trouble amounted to 11 sen, equal to about 5½ cents in good American money."

### How's Business?

"Business is poor," said the beggar.

"Falling off," said the riding school teacher.

"Oh, vial!" said the druggist.

"It's all write," said the author.

"Picking up," said the ragpicker.

"My business is sound," said the bandsman.

"I'm kept on the jump," said the athlete.

"I make both ends meet," said the butcher.

"It suits me," said the tailor.—Exchange.

### Value of an Inch of Rain.

Every inch of rainfall above four inches in the Dakotas, California, Washington, Kansas and Nebraska in May and June means an increase of $15,000,000 in the wheat crop. Every inch of rainfall above three inches in July in Indiana, Illinois, Kansas, Iowa, Ohio and Nebraska increases the value of the corn crop by $160,000,000. These figures are compiled by E. J. Cragoe for the Journal of Geography.

### Hollow Shafts.

By careful experiments it has been proved that a solid column subject to bending strains is no stronger than a hollow one. Consequently all iron shafts are made hollow, and the steel shafts which drive the screws of steamships have a hole bored down the center so that the weight may be reduced.

### Penny Weddings.

Until 1645 marriage feasts, known as "penny weddings," were held in Scotland. Each guest paid a penny or a small sum of money to defray the expenses of the feast. If any money was left over it went toward the furnishing of the new home.—Exchange.

Idleness wastes a fortune in half the time that industry makes it.—Samuel Smiles.

(Continued from Page One)

"Caucasus Front.—In the region of Erzerum we stopped attempts by the Turks to assume the offensive, capturing prisoners. In the region of Melazghert we successfully encountered Turkish detachments."

* * *

Berlin.—The German attack on the French positions near Neuville wasr esumed yesterday and, according to the War Office statement of today, between five hundred and six hundred yards of the French lines were captured. The statement follows:

"Western Front.—The enemy's artillery shelled German positions on the sand dunes along the seacoast. At the same time hostile monitors shelled the Westende (Belgium) district. Both attacks were without effect.

"After exploding mines the Germans made an attack on both sides of the road between Vimy and Neuville and stormed French positions between five hundred and six hundred yards long. They captured one officer, fifty-two men, one machine gun and three mine throwers. Counter attacks made by the enemy against the positions and other trenches taken by the Germans during thel ast fe wdays resulted in spirited fights with hand grenades, but were without success for the enemy.

"The city of Lens was shelled heavily by the enemy.

"Eastern Front.—Small detachments of Germans and Austrians from the army of General von Linsingen engaged in successful enterprises."

# "TIPPERARY" SUNG IN LATIN IN NEW YORK

## Night Pupils and Professor Collaborate on Songs.

New York.—You can't keep a good song down. When it has been translated into all the living languages it takes up the dead.

If whoever wrote "Tipperary" will visit the New York evening school in De Witt Clinton high school, Tenth avenue and Fifty-ninth street, he will hear there almost any night this lyric lilt—and wonder what has happened to the darling of his brain:

Longa via ad Tipperarium,
Longa via ibo;
Longa via ad Tipperarium,
Ad puellam quam cognosco.

Vale Picidilium,
Vale Leicester Forum
Longa via est ad Tipperarium
Ibi est cor meum.

Also, if he listens longer, he will hear "I Didn't Raise My Boy to Be a Soldier" and the other songs of the moment done into the purest Latin of Manhattan.

The explanation, if he asks one, is that Professor Horace C. Wait, teacher of Latin in both De Witt Clinton high and the evening school, has discovered the way to interest his pupils is to bring Latin up to date. Of course, Caesar's legions may have sung the same song as they realized how far it was from London town to Ireland, but even so, thinks Professor Wait, to put "Tipperary" into Horace's tongue brings the past more in line with the present.

For several sessions lately the boys and the professor have collaborated on the translations of popular songs and then have sung them to detect imperfections in the rhythm. They will continue to adapt Broadway's best singing songs to the Appian Way as long as the songs and the Latin verbs hold out.

As for "Tipperary," even the German lads in the class join in on the "Ad puellam quam cognosco."

# GIVES ADVICE IN WILL.

**Among Many Items Testator Admonishes Children to Be Upright.**

Winchester, Ind.—The will of James Tobin, a Union City resident, who died recently, has been filed here for probate in the circuit court. Among the many items the testator admonishes his children to walk uprightly and says:

"In making this last will and testament and in making this disposition of my property I beg to leave this advice and admonition to my children and to each of them:

"First.—Love, honor and obey your mother.

"Second.—Be faithful to your religion.

"Third.—Love one another.

"Fourth.—Be honest, upright and truthful."

### Eighty Chickens in Pie.

Pomona, Cal.—In order to feed 350 members of the Loyal Men's Bible class of the First Christian church at a banquet Rev. C. R. Hudson had a local restaurant bake eighty hens in a chicken pie four feet wide, one ben deep and eleven feet long.

# HOODOO SHIP MAKES MONEY

**The Old Algoa Has More Than Paid Her Purchase Price.**

San Francisco.—The old Algoa, formerly hoodoo freighter of the former Pacific Mail, has blossomed out as a real war baby.

This steamer, which in times of peace used to be tied up in the lower bay with cold boilers for long periods has earned $300,000 that was paid for her when she was rechristened the California. Also she has earned $90,000 more.

Furthermore, the California—nee Algoa—has now been chartered to a powder company at $1,700 a day, or $15,000 a month, or $612,000 a year, or more than twice as much as her owners paid for her.

It is stipulated in this last charter that she shall ply only between neutral ports, which is taken to mean that she will became a nitrate carrier between South America and the Du Pont powder mills in the United States.

# KISS FOR A JUDGE.

**Carpenter's Daughter Gave Him a Good Smack In Open Court.**

Pittsburgh.—Congratulations showered on Judge James McF. Carpenter when he took his place on the bench of the common pleas court recently did not make nearly so great an impression on the throng of well wishers as a resounding kiss implanted fairly and squarely on the jurist's lips.

Judge Carpenter, who was elected last November for a full term of ten years, had been sworn in and had stepped down to shake hands with the politicians in the courtroom. As he left the bench his daughter, Miss Alice Lazear Carpenter, stepped up, threw her arms around his neck and kissed him.

"Oh, I'm so proud!" Miss Carpenter exclaimed as the judge disentangled himself.

"Eh, umph! And so am I," her father replied, as he reached for a dozen hands stretched in his direction.

# PRIZES RING FROM FRONT.

**Made by German Soldier and In Possession of Los Angeles Girl.**

Los Angeles, Cal.—A ring fashioned from aluminum obtained from a projectile, which has for a setting a replica of the German iron cross, is the valued possession of a talented Los Angeles girl.

It was made by a German soldier while at the front in southern Poland. The possessor of the ring is Miss Mary Goodrich Read, who has spent several years abroad, in Belgium, Germany and other countries, studying.

Miss Read recently returned to this country, bringing with her the finger ornament.

### College Romance Revived.

Marysville, O.—A romance dating back to college days at Ohio Wesleyan university culminated recently when Miss Alice M. Goode, aged forty-three, of Cincinnati, was married to James W. Magruder, forty-five years old, of Mechanicsburg. They will take up their residence at Mechanicsburg.

# BREAKING RECORDS IN SALMON EGG TAKING

## Hope This Year's Fish Run in Puget Sound Will Increase.

Olympia, Wash.—All the salmon egg taking records of this state were smashed this year as the result of the enormous number of eggs obtained from the Columbia river and the Grays harbor districts, according to State Fish Commissioner L. H. Darwin.

Unprecedented November storms and high water were handicaps, but on the Columbia river the state procured more than 45,000,000 salmon eggs. On Grays harbor, where the Chehalis hatchery last year took 22,591,000 eggs, there have been procured this year to date 44,000,000 eggs, and all are now in the hatcheries. The three large salmon hatcheries on Puget sound are busy taking eggs, and it is expected the records will be broken in this district, or close to 50,000,000 eggs procured.

It is expected that the hatcheries this winter will have 150,000,000 salmon eggs to care for, and the number of young fry will be the largest ever nurtured in the state's history.

The entire product of the hatcheries this winter will be released in Puget sound next fall. By so doing it is hoped to increase the run of salmon there in spite of the heavy increase of salmon taken in recent years.

# TO TAP GILA'S UNDERFLOW.

**Dry River Bed Will Be Made to Yield Water For Irrigation.**

Palomas, Ariz.—S. H. Woodruff of Los Angeles and associates plan to utilize the underflow of the Gila river, near here, for the reclamation by irrigation of a big tract of land.

A number of caissons will be sunk in the dry bed of the river to the water level, and large pumps will be installed to lift the water to the surface and deliver it into the irrigation ditches. The pumps will be operated by electricity.

Formal application for the withdrawal from public entry of 14,000 acres that are embraced in the proposed irrigation scheme has been filed in the United States land office here by the state land commission, as required by the Carey act.

### Overtime Pay.

"Pa, what is meant by overtime pay?"

"Overtime pay, my boy, is the reward for doing a little extra labor, and there are two kinds."

"That so? What are they?"

"Well, some men insist on collecting their overtime weekly and at a specified rate, and others are willing to work overtime and take their reward in a successful future. I recommend the latter course for you."—Detroit Free Press.

# THE FULTON EVENING TIMES

"A Herald of Progress"

Volume 2, No. 344. MONDAY, JANUARY 31, 1916. Price, One Cent

## CHAMBER OF COMMERCE

*"Fulton First, Last and All the Time"*

Did you ever stop to consider the value of your home paper as a means of reaching your trade and telling them, in an interesting, and perchance instructive way, the values of the goods you have to offer? If you have not, you are missing a golden opportunity and are not a progressive, up to date business man. The average merchant looks upon the local weekly or daily publication as a necessary evil. While they may not express it in so many words, they feel the paper is a necessary adjunct in the community, and that they, as merchants, have it devolving upon them to give the local paper a given amount of advertising for public spirited purposes only. They feel the vistors to the town would think it inferior to their town if it could not boast of a publication, but as a means of getting results through its advertising pages they look upon it as of no consequence whatever. In face of these conditions, manufacturers who know how to buy space properly and to utilize it to the best advantage after being purchased, are using this self-same medium to the utmost advantage.

The dealer who will take the time and trouble to investigate the possibilities of the local daily or weekly publication will find a very efficient and inexpensive means of reaching his patrons. He will find the average editor very considerate in printing news which is only semi-newsy. Of the different methods of advertising, this is now looked upon as the most efficient. A story well told and with an indirect advertising effect touching the interest of the merchant is valuable, for the rason it makes an interesting news item and the editor of the paper will use it, with immense value to the merchant, with no disadvantage to the paper, and will perhaps cement the friendship and business relations between the editor and the merchant.

The average country editor is a pretty good fellow to court if you know how to utilize the power he may perhaps unconsciously possess. There are many things which might be said along these lines which would not only reflect upon the shortcomings of merchants who have always and do now fail to realize the prestige of the local paper, and perhaps these things would sound complimentary to the local publishers, but nevertheless the sphere of usefulness of the local paper is one well worthy of the serious consideration of the dealer and, better yet, if you do it before some of your competitors waken to its usefulness.

* * *

If some folks we know were to go to the dogs, the dogs would immediately change locations.

* * *

We are indebted to Hiram Lodge, F. & A. M., for the splendid turnout on Saturday evening and thank them for having given us a chance to address them. Let's hope that it may have done some good.

* * *

The marvelous growth of certain cities in this country was not due only to location or natural advantages, it was due mainly to the co-operation of the men and women who lived in these cities.

* * *

Now all together to the Elks Minstrels at the Quirk Theater on February 2d, 1916, for the Lee Memorial hospital. Get that ticket, don't be a piker.

* * *

Be a real sport and spend a dollar for a good couse once; we spend so many dollars foolishly that it should be a pleasure and a relief to spend one in a sane way, by buying that ticket for the Hospital benefit.

* * *

Are you going to help to make FULTON bigger and better, or are you belonging to the "I don't care association" of ignoramusses?

* * *

20,000 people by 1920. Let's work to that end. Wake up, get busy and we can do it.

* * *

From 12,000 to 20,000 in four years. Come you fellows and you women let's take the trumpet and blare it all over the country that 12,000 peaple are standing for one and the same thing. FULTON SPIRIT FOR FULTON PEOPLE.

* * *

The awakening of 12,000 people: "F-U-L-T-O-N, the Great.

* * *

A Greater FULTON for greater people; a city of civic righteousness; a city of principles; a city of people of moral courage. The battle cry of FULTON: 20,000 by 1920.

## "DAD" MEAD'S WELFARE RECEIVES ATTENTION OF THE PROHI. ELEMENT

Shall "Dad" Mead be convicted? is the question on the tongue of every man familiar with the charge brought against the tall Sixth Ward ex-alderman by a clique of men who propose to press their case for trial at the Odd Fellows' temple tomorrow evening. "Dad" is accused of a serious offence, one that is occassioning a lot of uneasiness in the minds of his most intimate associate, but in spite of this solicitude, the accused man is performing his usual daily duties ina manner quite unconcerned, just as if he feels that the outcome of the trial will be favorable to him.

An erroneous impression is broadcast, in effect that the trial of "Dad" will be witnessed only by his Odd Fellow brethren, whereas, the public in general may attend to the limit of the court room, or until the worthy Justice of the Court shall deem a sufficient number of persons have been admitted to the room. Judge Bradt has never been known to lock the doors upon an audience, he preferring to gain as much publicity for political purposes as such occasions will permit. While the Justice who will "sit on this case" is a just judge, he is known to be little bit prejudiced against the culprit. This trial should therefore enable him to settle up back scores.

A new entry has been made in the court force, that of the last Prohibitionist candidate for mayoralty honors, James H. Brooks, who will be court clerk. Mr. Brooks, it is believed has a message to deliver to the honorable Justice that may be the means of saving his enemies. In fact, it is said the Clerk of the Court is taking daily strolls down by the babbling brook, eagerly looking from left to right, hunting through the withered leaves on bush and tree for the lucky flower that will surely relieve the accused man of the sting that comes through defeat either at the polls or before the bar of justice or injustice.

The trial of "Dad" Mead is set for 8 o'clock and not at 8:30 as indicated in the reports coming from Berlin via Sayville. An unusual feature of court proceedings will be the introduction of music, which will be of such nature as to subdue the angry passions of the audience when any thing of an unfair nature is produced in the testimony. The real music will begin at 7:30 o'clock and the unreal when Judge Bradt begins his charge to the jury. Unearthly music will begin at the conclusion of the jurymen's deliberations. More music when wanted.

## DR. FLICK TO LECTURE ON OUTCOME OF WAR; PROCEEDS FOR CHARITY

The lecture to be given next Friday night at the Presbyterian church by Dr. Flick of the Syracuse University is of double attraction. In the first instance Dr. Flick is a capable speaker, and in the second the benefit derived from the sale of tickets will be used for the maintenance of the new lodging quarters at the Salvation Army.

The lecture is given under the auspices of the Christian Endeavor of the Presbyterian church and the young people are to be congratulated upon their interest and energy in so worthy a cause. The work of the little band of Salvationists under the direction of Ensign Fitzgerald is of great importance to our city. There never is a time when the doors of the barracks are closed. The wee, small hours have seen many a person let in, and in the morning refreshed in body and soul go out again to begin a new day.

Since October 3, 1915, according to Ensign Fitzgerald's report the number of garments given away total 511; the number of pairs of shoes, 142; persons given garments and shoes, 520; persons passed through lodging house, 83; number of lodging given, 201; number of meals given to lodgers, 200; amount of money collected from lodgers, $26.00. At Christmas time 150 kiddies were given clothing, and food was given for two weeks following the holiday season to 500 homes.

Everyone able to do so should spend twenty-five cents for Friday night's entertainment that the funds for the maintenance of the lodging quarters need not be discouragingly small.

## IT WOULD BE A GOOD IDEA

for everybody who feels that the Lee Memorial Hospital is not a good thing to put down on one side of a ledger account just what it has done for this community, remembering that it is a place where all may go when in distress; then put down on the other side what we have done for it except to confer upon it our acknowledgment of its usefulness.

## STRIKE A BALANCE

**And You Will Get Some Idea Why the B. P. O. E. Minstrels**

Are taking a hand in making up the deficit in the account. Whenever an institution such as the Lee Memorial Hospital is allowed to lag far behind there is a weakness somewhere — either in the management or in the community, or in both. The weakness, wherever it exists, should be overthrown, and at once. The struggle should be short and sharp, and every good citizen should bear a hand.

## THE ELKS' MINSTRELS

**Will give you an opportunity to reduce the burden of the struggle waged to Maintain the Local Hospital by attending their show**

**WEDNESDAY EVENING, FEB. 2**

**It Will Help You in Taking That Invoice of Yourself.**

**Purchasers of tickets in advance may exchange them at the Quirk Box Office tomorrow, Feb. 1, beginning at 1:30 p. m.**

# Opinions

## COMING OF THE MARTINS

About April 10, or soon after, there will be a flurry of birds. Their eight roomed, 12-roomed and larger houses, perched high in the air, will be scoured from front door to roof. All Winter long the houses have been empty. except as they have been sublet to the English sparrows. But April 10 will be moving day, and the owners of the houses will come back from a comfortable Winter in the South. They are the purple martins.

They are dressed in coats of shining blue-black. They live in colonies, and prefer boxes, with four rooms or more, for their homes. When they discover one of these homes and live in it for a season, they will return year after year.

They pay for all the trouble spent on building homes for them, too. The purple martin spends about 16 hours a day in search of food. One colony will eat hundreds of thousands of insects in a season. Like his cousins, the swallows, the martin is busy from dawn to twilight, always in search of food.

But they seldom establish a colony without the encouragement of a box home. The boxes should be built with rooms at least six inches each way, with an entrance to each room a little more than two inches square. The house should be placed on a perch 10 feet or more high; and covered with a sack during the Winter to keep out the sparrows. If you have one of these houses ready by April 10, the martin family may decide to spend a Summer with you. If not, they will pass on to some other nestling site. —Philadelphia Ledger.

## TWO VICTORIES

Organized labor is to be congratulated upon two recent victories. They are not victories over opponents or enemies. Indeed, it seems impossible that there should be enemies to organized labor, unless they might be found among those few who do not believe in organization of any kind and commendable in anything it is fair and commendable in labor.

These victories are victories over self.

The danger in most organizations is selfishness. Selfish churches, selfish societies, selfish capital, selfish industries and selfish labor all do more to hurt themselves than they do to build up either themselves or the country. Being too greedy of power, popularity, gain, success or advancement, never wins in the long run, and people are becoming more anr more ready to acknowledge this fact. So, when two big victories, thousands of miles apart, are won by organized labor over itself, it is a good thing to hear about it.

The first to mention is the one in which the delegates representing 400,000 coal miners in the United States voted by an overwhelming majority not to stop work when the existing contracts with the operators expire if it shall happen that they have not agreed upon a new wage schedule at that time. They are to remain at work as long as there is hope of drawing up new agreements.

This we regard as a very great victory indeed. The negotiations will continue and a peace settlement will follow, if it is not reached before the time that the contract expires, and there will be no disturbance the country over as to the mining and distribution of fuel. How vastly better this will be for the miners, the members of their families, the tradesmen in every mining district, the operators and above all for the people in city and town all over the country where coal must be used for domestic and industrial purposes, than it would be to call 400,000 men away from their work and turn them over for a season of idleness, violence, riot, bloodshed and troubles that always attend strikes and idleness.

The next victory may not be thought as so nearly affecting our country, though the truth is that it does. It is the action showing labor's attitude toward the British Government. There have been many questions raised as to whether labor in England would be loyal when the test came; and the question has been most interesting as in some way indicating what might be expected from labor in this country should the urgency arise.

When the vote came in the trades union conference at Bristol on Wednesday. at which delegates were present representing more than 2,000,000 workingmen, there was a tremendous majority against the Socialistic anti-war section. Not one of the delegates was in favor of war; but war being upon them, and the government threatened, would labor stand by the government, or would it skulk, and withhold its loyal support?

The answer sends a cheer around the earth. For loyalty and encouragement, 1,847,000 votes; against it, 206,000 votes! —Utica Press.

# BE AN ENGINEER

By employing a system of colored lights the great railroads of the country wisely provide warnings to the men who drive the engines, of dangers ahead and to intimate the line of safety. It is a wonderful system but to know it does not tell of all the dangers. There are things regarding which the engineers get instructions that are not within their view. In driving the engines through darkness it is not the red or green light that is dreaded; it is the thing that may be concealed beyond them.

The road bed of the railroad and its tracks go over the same ground as they did years ago, yet the conscientious engineer pays strict attention to the signals of the red, green and white lights every hour of every day and night.

The reputation enjoyed by a man in business, in the professional world, in politics, or in fact in any walk of life, is not in itself sufficient guarantee of the goodness and fitness of his present services. It is not a trade-mark that we are looking for in a man; it is what he is doing and is able to do to bring about good things in business, in politics and for the moral toning up of the community.

The citizen looking for these things should require strict attention to the signals. He should be the management of the old road bed. He should exercise daily vigilance to keep safe for the people who look to him and leave to him the work of watching the actions of men who do things in the darkness, things that are not done within the view of honest men. It is his duty to hound and find and exclude the imitation, the thing that lurks away beyond the red, the green and the white lights of the road. The concealed danger will bear closest inspection, and when it is found it should be tagged. Concealed things are robbed of power in proportion to the amount of light turned upon them.

# THE LOCAL NEWSPAPER

This is the way it looks to a writer who has traveled some, and watched for reasons why a town prospers. He says: "Stand by your town newspaper. If there is anything in your town worth talking about, ten chances to one your little town paper had a hand in putting it there, and if there exists any unsightly or unsavory nuisance, twenty chances to one it will stay there until your town editor sees it or smells it and wipes his pen on the town board's breeches. If any body beyond the walls of your little burg ever learns that there is such a place as peaceville, it will be through the town oracle.

"Every village gets it's money's worth in the village newspaper. It's the wagon that carries all your good things to market. It ought to be kept in good repair. In many cases it would pay to grease it, paint it, keep its running gear in shape and shelter it at the public expense.

"Stand by your local newspaper. It's the guardian and defender of every interest, the forerunner and pioneer of every advance movement and the sturdy advocate of law and order. Take it away, and it would not be six months before the town would look as if it had been doped. Business would drag, society would yawn and grass would grow between the cobbles."—Contributed.

## PREPARE FOR PEACE, NOT WAR

Those who are promoting the big plans for national preparedness are finding that the opposition to their efforts is more solid and forceful than they had contemplated. The American people do not want to be transformed into a military nation. The suggestion recently made that we should develop our navy till it was equal in strength to that of any two nations strikes the rank and file of the American people as preposterous.

General Isaac R. Sherwood, representative in Congress from Ohio, made a brave speech before the House the other day. He is now eighty-one years old, the only surviving Union general in the House of Representatives. He fought in forty-two battles of the Civil War and was rewarded by President Lincoln for conspicuous gallantry. General Sherwood said:

War is the greatest crime of the human race. It is not in my philosophy that if the murder of one man makes a villian, murder of thousands makes a hero. A standing army means waste, depression, moral decay. A nation cannot be moving toward peace while definitely preparing for war.

It is proposed to tax a patient and tolerant people that an overpowering army of idlers may be endowed to consume the savings of the industrial classes, increasing the already high cost of living and producing nothing but discontent and trouble. It is a crime against the republic, without sanity and without excuse.

How utterly idiotic is the idea that any European nation. exhausted in fighting men, with busines and industry paralyzed, loaded down with a debt that staggers belief and cannot be paid, with its land filled with millions of widows and five times as many fatherless children, with six million maimed and crippled soldiers —legless, armless. insane and sightless—who have escaped from the damp horror of the trenches and the lurid hell of battle, all dependent on the empire, is going to make an impossible crossing of 3.000 miles of ocean, with an army that is impossible to equip or transport, and attack 100,000,000 people of the United States between whom and them there is no quarrel.

But more than all else, we must remember that if this nation is to fulfill its destiny in the world, its reliance must be, not upon arms, but upon God. "Unless the Lord build the house, they labor in vain that build it; unless the Lord keep the city, the watchman waketh but in vain." "They that take the sword shall perish with the sword." Thank God, we have no enemies; but even if we are in danger of having them we may, if we are truly watchful and honest and worshipful, win the fulfillment of the promise that "when a man's ways please the Lord he maketh even his enemies to be at peace with him." —Christian Herald.

## STATE EDITORIAL COMMENT

Republicanism as the dominant organized force in American public affairs is now perfecting itself from the ground up. Therein is the substantial hope of enduring success. The country now observes the spectacle of Democracy divided from the top down, and Democracy's chief assistant, Mooseism, organized on the system of all top.—Brooklyn Standard-Union.

Manifestly it is a good idea, that of the Senate finance committee of which Senator Sage is chairman, to study those laws enacted within the last eight years which have added to the expenses of government, with a view to determination of the question whether any of them can be repealed, or so amended that the expenditure which they make necessary will be diminished. —Albany Journal.

* * *

There is no halting, no hesitating on the part of the Republicans as they approach the Presidential campaign of 1916, because there is no occasion for it. This is destined to be a Republican year in nation and State, and the party leaders are proceeding with their duties confident that, with proper effort to meet the popular will, a splendid victory for Republican principles and Republican candidates will be rendered at the polls in November.—White Plains Record.

* * *

The disposition of leading Progressives and most influential Republicans to bury personal differences and band together for the common end to defeat the enemy, is worthy of the highest commendation. The abandonment of selfish motives is always fraught with benefit to the common good. —Cohoes Republican.

In view of the serious condition of the National treasury it is amazing that the Roads Committee has actually reported favorably a House bill appropriating $25,000,000 for improving the highways. While this sum is big enough to make new taxes necessary, it is too small to accomplish the proposed purpose. In a forcible speech, Representative Edmund Platt of Poughkeepsie pointed out the fact that $25,000,000 comes to only $12 a mile for the roads which are to be improved, while "really good roads cost a thousands times that much, and even bad roads cost a hundred times as much." As Mr. Platt accurately stated, the bill of the "pork barrell" variety. It has no redeeming feature. We do not see how any honest Congressman can vote for it. —Kingston Freeman.

Health insurance is the latest thing in the uplift by legislation. People now insure against death, sickness, fire, cyclones, accidents to themselves and others, marine losses and pretty much everything else except taxes. No beneficient corporation has yet assumed that liability.— Jamestown Post.

# EDITORIAL COMMENT

A Chicago alderman has the frankness to avow publicly what has long been apparent to thoughtful observers as to the cause of congestion among the unemployed in cities. He says that it is due to cheap food and cheap rent, which attract all sorts of shiftless persons, vagrants and ne'er-do-wells. The presence of these classes in large numbers is a detriment to the honest workmen, who would be employed if they could find work. Cheap food and cheap rent are a boon to the struggling mass, and governments have no right arbitrarily to interfere with the matter. In the domain of sanitary food and housing, however, the authorities may interfere and insist upon a certain degree of decency in living. Neither hovels nor anything approaching them in the way of garrets and cellar rooms should be tolerated on the grounds of health and morals. In new construction the problem is comparatively easy, but the sanitary room is expensive, and life in the up to date tenement can be sustained only by the industrious and thrifty. Congestion is an evil of cities that cannot be too rigorously attacked for the good of all concerned.

With the Sixty-fourth congress in harness and facing a long and more or less stormy session; with an exciting presidential campaign looming large, promising distracting and vexatious political turmoil; with the convulsions of the most gigantic, destructive and costly war the world has ever witnessed shaking the very foundations of the thrones of the eastern hemisphere; with this same war, despite the rumors of peace proposals that come and go, apparently far from its finish, the outlook seems to be that the year 1916 will be a most strenuous and historic era. It may give birth to startling events that will add another chapter to the "staggering of humanity," or it may be that reason will resume its sway and the war madness pass away. Let us breathe the fervent hope that its closing may be more promising for the peace, happiness and prosperity of the world and its troubled peoples than its opening would seem to warrant.

It comes as a welcome relief to business men of the country that the department of justice intimates that it doesn't contemplate any ill advised prosecutions and would overlook the faults of a suspected concern if the latter were willing to change its ways. Without a doubt it is the duty of the law to prevent violations as well as punish the evildoers. Business is still in its infancy, and infants must be told when they go wrong and be set right. In the past the trouble has been that the officers of the government didn't give any real assistance to business.

It is worthy of note that the cost to shipping by the stoppage of the Panama canal by the dirt slides is much greater now than in normal times, because ocean bottoms are at a premium, and every day's delay represents a real loss to shipowners. The dirt sure must be flyin' some. So why should you and I be impatient? Let nature take its course.

Although the savage war in Europe is not two years old, it has done more to get the nationalities acquainted with each other than did anything, with perhaps the possible exception of printing.

Sciences rule in this war, not sentiments, as we may judge by the fact that not a patriotic melody of consequence has developed since "Tipperary."

Even in Germany the Paris fashions remain pre-eminent. People are apparently not as angry at one another as they were a year ago.

Give congress the glad hand. Isn't it giving us a chance to think of our domestic affairs as a welcome relief from the war news?

We are now being dignified by the visit of a Danish prince. Perhaps he has the deed for the Danish West Indies in his pocket.

We read that Sindbad the Sailor in his travels amassed wealth. Henry Ford travels to find a way to spend his.

Up goes bacon. But it must do some tall climbing before it can get on the same rung as congressional pork.

Hold up the war! The cubists and futurists from abroad are being driven to America.

"Safety first" has reached Mexico. Villa's ranks are decreasing in consequence.

We are no longer big brother to South America, but her older brother.

As powerful a fighting unit as the newly prescribed formation for the Atlantic fleet has hardly been thought a possibility by most Americans. With the newer superdreadnaughts Pennsylvania, Oklahoma and Nevada placed in commission this branch of our navy will surely have a formidable aspect. Composed of ten modern battleships ranging in size from 20,000 to 31,400 tons displacement, most of them carrying the heaviest guns, the fighting strength of this unit will certainly be enormous. Our hearts miss a beat every time we pause to sum up its—yes, terrible power. It must be the pride of all who make it a worthy fighting force. Yet it is far from what it is intended to strive for—a modern fighting machine. It is a long time before the necessary submarines will be added. Fuel ships, hospital ships, tenders, battle cruisers, have still to be built, and the aeroplanes needed are now being constructed, but competent aviators must first be trained to fly them. When these details are completed our navy will inspire even greater confidence. It seems to be merely a matter of modernizing the fleet—putting it up to scratch, as it were—utilizing lessons learned from the present war.

"To know a little bit is dangerous," quotes the sage. Why not know enough and be on the safe side? It is wonderfully simple to acquire sufficient knowledge, we are told by those who should know. Didn't Dr. Charles Eliot tell us we could get a liberal education from a number of selected books? We are again reminded that it is easy to obtain a foundation of knowledge in a remarkably short space of time. A speaker before an advertising club recently named six books with which one should spend a half hour each night for six months and automatically become an educated man. It seems easy to tell a man he should read a certain set of books to gain knowledge, but it usually takes some training before a man can be sufficiently fit to read these books and get all the good out of them. And when he does reach that stage it is unfortunate that he in all likelihood requires a different guide to knowledge than the ones named.

The present isn't the first time a president has chosen a widow for his bride. Woodrow Wilson, it seems, is only a follower of a well established precedent. Washington, Jefferson, Madison, Fillmore and Benjamin Harrison selected widows for wives, while Tyler and Roosevelt took unto themselves two wives apiece, but none of these latter brides had been led to the altar before. As for Andrew Jackson, he established his own precedent and married a divorcee. This would lead you to believe that when the darts of Cupid strike home in our highest official circle they strike with exceptional force. Even the opportunities for comparisons have no terrors for the principals.

Time is divided into two periods by Professor Steinmetz, the electrical expert. The discovery of electricity is the dividing line. It is probable that Marconi counts the new era from the time he perfected the use of wireless, while Lake cuts his notch when the first submarine was launched, and Whitehead the torpedo, Maxim the silencer, and so on down the line, including Ford and his peace ship. They all have a claim. We can't very well discredit any one of them, so why not roll over and wake up in the morning to hail a new era on your own account?

Short skirts, which are now the fashion, could be easily understood if they were brought about in order to save wool for overcoats and blankets for the soldiers in the trenches. It is reasonable to suppose that the fighters at the front would pass a rather comfortable winter if this were the case.

Although the teachers complain that children have to learn too much, it is noticed that the overworked little ones do not learn enough grammar to make their speech painfully precise.

Japan gets one more step nearer to being modernized. The mikado rides in an open carriage at the conclusion of his coronation ceremonies, and the people insist on cheering him.

If you told most congressmen that Demosthenes was the most gifted orator of his day he would evidently say that that was 2,300 years ago.

Women of Georgia are wearing overalls for housecleaning. This may help to popularize the home.

The man without a pull often fares badly. Villa is certainly not proving an exception.

Did you know that 1916 is a leap year? Well, it is. Don't tell the girls.

## A DUEL IN THE DESERT.

IT was 8 o'clock and Monday morning when the romantic rascals were led away in unromantic bonds. Their arms were bound to their bodies, their feet lashed to the stirrup irons. They sat like packs upon quiet station horses carefully chosen for the nonce. They were tethered to a mounted policeman apiece, each with leading rein buckled to his left wrist and government revolver in his right hand. Behind the quartet rode the officer in command, superbly mounted, watching ever all four with a third revolver ready cocked. It seemed a small and yet an ample escort for the two bound men.

But Stingaree was by no means in that state of Napoleonic despair which his bent back and lowering countenance were intended to convey. He had not uttered a word since the arrival of the police, whom he had suffered to lift him on horseback, as he now sat, without raising his morose eyes once. Howie, on the other hand, had offered a good deal of futile opposition, cursing his captors as the fit moved him and once struggling so insanely in his bonds as to earn a tap from the wrong end of a revolver and a bloody face for his pains. Stingaree glowered in deep delight. His mate's part was as well acted as his own, but it was he who had conceived them both and expounded them in countless camps against some such extremity as this. The result was in ideal accordance with his calculations. The man who gave the trouble was the man to watch. And Stingaree, chin on chest, was left in peace to evolve a way of escape.

The chances were all adverse; he had never been less sanguine in his life. Not that Stingaree had much opinion of the police—he had slipped through their hands too often—but it was an unfortunate circumstance that two of the present trio were among those whom he had eluded most recently and who therefore would be least likely to give him another chance. A lightning student of his kind, he based his only hope upon an accurate estimate of these men and applied his whole mind to the triple task. But it was a single task almost from the first, for the policeman in charge of him was none other than his credulous old friend, Sergeant Cameron from Clear Corner, and Howie's custodian a young trooper run from the same mold as Constable Tyler and many a hundred more, in whom a thick skull canceled a stout heart. Both were brave men; neither was really to be feared. But the man behind upon the thoroughbred, the man in front, the man now on this side and now on that, with his braying laugh and his vindictive voice—triumphant as though he had taken the bushrangers himself and a blatant bully in his triumph—was none other than the formidable superintendent whose undying animosity the bushrangers had earned by the two escapades associated with his name.

Yet the outlaw never flattered him with word or look, never lifted chin from chest, never raised an eye or opened his mouth until Howie's knock on the head caused him to curse his mate for a fool who deserved all he got. The thoroughbred was caracoling on his other side in an instant.

"You ain't one, are you?" cried the taunting tongue of Superintendent Cairns. "Not much fool about Stingaree!"

The time had come for a reply.

"So I thought until yesterday," sighed the bushranger. "But now I'm not so sure."

"Not so sure, eh You were sure enough the last time we met, my beauty!"

"Yes. I had some conceit of myself then," said Stingaree, with another of his convincing sighs.

"To say nothing of when you guyed me, blast you!" added the superintendent below his breath and through his teeth.

"Well," replied the outlaw, "you've got your revenge. I must expect you to rub it in."

"My fine friend," rejoined Cairns, "you may expect worse than that, and still you won't be disappointed."

By degrees Stingaree raised his chin a little, but still looked neither right nor left.

"Cheer up!" cried the chief, with soothing irony.

"I feel the heat," said the bound man uncomplainingly. "And it was just about here it happened."

"What happened?"

"We overtook the church militant here upon earth," rejoined the bushranger, with rueful irreverence.

"Well, you ran against a snag that time, Mr. Sanguinary Stingaree!"

"I couldn't resist turning Howie into the bishop and making myself his mouthpiece. I daren't let him open his lips! It wasn't the offertory that was worth having; it was the fun of rounding up that congregation on the homestead veranda and never letting them spot a thing till we showed our guns. There hadn't been a hitch, and there never would have been if that old bishop hadn't run all those miles barefoot over hot sand and taken us unawares."

Made with a wry humor and a philosophic candor, alike germane to his predicament, these remarks seemed natural enough to one knowing little of Stingaree. They seemed just the sort of things that Stingaree would say. The effect, however, was rather to glorify Bishop Methuen at the expense of Superintendent Cairns, who strove to reverse it with some dexterity.

"You certainly ran against a snag," he repeated, "and now your mate's run against another." He gave the butt of his ready pistol a significant tap. "But I'm the worst snag that ever either of you struck," he went on in his vainglory. "Make no mistake about that. And the worst day's work that ever you did in your life, Mr. Sanguinary Stingaree, was when you dared play at being little crooked Cairns."

Stingaree took a first good look at his man. After all he was not so crooked on horseback as he had seemed on foot at dusk in the Victorian bush; his hump was even less pronounced than Stingaree himself had made it on Rosanna; it looked more like a ridge of extra muscles across a pair of abnormally broad and powerful shoulders. There was the absence of neck which this deformity suggests; there was a great head lighted by flashing and indignant eyes, but mounted only on its mighty chin.

"The most poetic justice!" murmured Stingaree, and resumed in an instant his apathetic pose.

"It serves you jolly well right, if that's what you mean," the superintendent snarled. "You've yourself and your own mighty cheek to thank for taking me out of my shell and putting me on your tracks in earnest. But it was high time they knew the cut of my jib up here; the fools won't forget me again in a hurry. And you, you devil, shan't forget me till your dying day!"

On Stingaree's off side Sergeant Cameron was also hanging an insulted head. But the bushranger laughed softly in his chest.

"Some one has got to do your dirty work," said he. "I did it that time, and the bishop has done it now, but you shouldn't blame me for helping your fellows to bring a murderer to justice."

"You guyed me," said Cairns through his teeth. "I heard all about it. You guyed me, blast your soul!"

Stingaree felt that he was missing a strong face finely convulsed with passion—as indeed he was. But he had already committed the indiscretion of a repartee which was scarcely consistent with an attitude of extreme despair. A downcast silence seemed the safest policy after all.

"It used to be forty miles to the Corner," he murmured, after a time. "We can't have come more than ten."

"Not so much," snapped the superintendent.

"Going to stop for a feed at Mazeppa station?"

"That's my business."

"It's a long day for three of you, in this heat, with two of us."

"The time won't hang heavy on our hands."

"Not heavy enough, I should have thought. I wonder you didn't bring some of the boys from Mulfera along with you."

Superintendent Cairns brayed his high, harsh laugh.

"Yes, you wonder, and so did they," said he. "But I know a bit too much."

"You're too suspicious," said Stingaree mildly. "But I was thinking of the bishop and the boss."

"They've gone their own way," growled Cairns, "and it's just as well it

They Reined Up, Made Him Dismount and Lashed Him Tighter.

wasn't our way. I'd have stood no interference from them!"

That had been his attitude on the station. Stingaree had heard of his rudeness to those to whom the whole credit of the capture belonged. The man revealed his character as freely as an angry child.

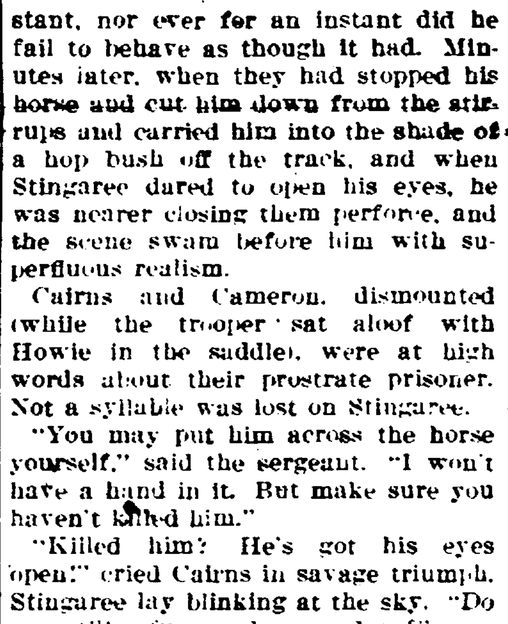
The party pushed on for another hour. The heat was terrible. The bound men endured torments in their bonds. But the nature of the superintendent, deformed, like his body, declared itself duly at every turn, and the more one prisoner groaned and the other blasphemed the greater the zest and obduracy of the driving force behind them.

Noon passed; the scanty shadows lengthened, and Howie gave more trouble of an insensate sort. They reined up, made him dismount and lashed him tighter. He had actually loosened his cords. But Stingaree seemed past remonstrance with friend or foe, and his bound body swayed from side to side as the little cavalcade went on at a canter to make up for lost time.

He was leading now with the kindly sergeant, and his mind had never been more alert. Behind them thundered the recalcitrant Howie, with constable and superintendent on either side. They were midway between Mazeppa and Clear Corner, or some fifteen miles from either haunt of men. Stingaree pulled himself upright in the saddle as by a superhuman effort and shook off the helping hand that held him by one elbow.

He was about to do a thing at which even his courage quailed, and he longed for the use of his right arm. It was not absolutely bound. The hand and wrist had been badly hurt in the Sunday's fray, so badly that it had been easy to sham a fracture and have hand and wrist in splints before the arrival of the police. They still hung before him in a sling, his good right hand and forearm, stiff and sore enough, yet strong and ready at a moment's notice when the moment came. It had not come and was not coming for a long time, when Stingaree set his teeth, lurched either way and toppled out of the saddle in the path of the cantering hoofs. His lashed feet held him in the stirrups, the off stirrup leather had come over with his weight, and there at his horse's hoofs, kicked and trampled and smothered with blood and dust, he dragged like an anchor, without sign of life.

And it was worse even than it looked, for the life never left him for an in-



"Send a cart back for him. It's the only way he's fit to travel."

stant, nor ever for an instant did he fail to behave as though it had. Minutes later, when they had stopped his horse and cut him down from the stirrups and carried him into the shade of a hop bush off the track, and when Stingaree dared to open his eyes, he was nearer closing them perforce, and the scene swam before him with superfluous realism.

Cairns and Cameron, dismounted (while the trooper sat aloof with Howie in the saddle), were at high words about their prostrate prisoner. Not a syllable was lost on Stingaree.

"You may put him across the horse yourself," said the sergeant. "I won't have a hand in it. But make sure you haven't killed him."

"Killed him? He's got his eyes open!" cried Cairns in savage triumph. Stingaree lay blinking at the sky. "Do you still refuse to do your duty?"

"Cruelty to animals is no duty of mine," declared the sergeant, "let alone my fellow men, bushrangers or no bushrangers."

"And you?" thundered Cairns at the mounted constable.

"I'm with the sergeant," said he. "He's had enough."

"Right!" cried the superintendent, producing a notebook and scribbling venomously. "You both refuse! You will hear more of this. Meanwhile, sergeant, I should like to know what your superior wisdom may be pleased to suggest."

"Send a cart back for him," said Cameron. "It's the only way he's fit to travel."

Stingaree sought to prop himself up on the elbow of the splintered wrist and hand.

"There are no more bones broken that I know of," said he faintly. "But I felt bad before, and now I feel worse."

"He looks it, too," observed the sergeant, as Stingaree, ghastly enough beneath his blood and dust, rolled over on his back once more and lay effectively with closed eyes. Even the superintendent was impressed.

"Then what's to be done with him?" he exclaimed, with an oath. "What's to be done?"

"If you ask me," returned Cameron, "I should make him comfortable where he is. After all, he's a human being and done no murder that we should run the risk of murdering him. Leave him to me while you two push on with his mate; then one of you can get back with the spring cart before sundown. But trust me to look after him till you do."

Stingaree held his breath where he lay. His excitement was not to be betrayed by the opening of an eye. And yet he knew that the superintendent was looking the sergeant up and down, and he guessed what was passing through that suspicious mind.

"Trust you!" rasped the dictatorial voice at last. "That's the very thing I'm not inclined to do, Sergeant Cameron."

"Sir!"

"Keep your temper, sergeant. I don't say you'd let him go. But I've got to remember that this man has twisted you round his finger before today, led you by the hand like a blessed old child and passed himself off for me! Look at the fellow, look at me and ask yourself candidly if you're the man for the job. But don't ask me unless you want my opinion of you a bit plainer still. No; you go on with the others. The two of you can manage Howie. If you can't, put a bullet through him! This is my man, and I'm his, by the hokey, as he'll know if he tries any of his tricks while you're gone!"

Stingaree did not move a muscle. He might have been dead, and in his disappointment it was the easier to lie as though he were. Really bruised, really battered, really faint and stiff and sore, to say nothing of his bonds, he felt himself physically no match for so young a man with the extra breadth of shoulder and the extra length of arm which were part and parcel of his deformity. With the elderly sergeant he might have had a chance, man to man, one arm to two, but with Superintendent Cairns his only weapons were his wits. He lay quite still and reviewed the situation, as it was and as it had been. In the very moment of his downfall by instinctive presence of mind he had preserved the use of his right hand, and that was a still unsuspected asset of incalculable worth. It had been the nucleus of all his plans. Without a hand he must have resigned himself to the inevitable from the first. Then he had split up the party. He heard the sergeant and the constable ride off with Howie, exactly as he had intended two of the three captors to do. His fall alone introduced the element of luck. It might have killed or maimed him, but the risk had been run with open eyes. Being alive and whole, he had reduced the odds from three against two to man and man, and the difference was enormous, even though one man held all the cards. Against Howie the odds were heavier than ever, but Howie was eliminated from present calculations. And as Stingaree made them with the upturned face of seeming insensibility he heard a nonchalant step come and go, but knew an eye was on him all the time and never opened his own till the striking of a match was followed by the smell of bush tobacco.

The shadow of the hop bush was spreading like spilt ink, and for the moment Stingaree thought he had it to himself. But a wreath of blue smoke hovered overhead, and when he got to his elbow and glanced behind there sat Cairns in his shirt sleeves, filling the niche his body made in the actual green bush, a swollen wet water bag at his feet, his revolver across his knees. There was an ominous click even as Stingaree screwed around where he lay.

"Give me a drink!" he cried at sight of the humid canvas bag.

"Why should I?" asked the superintendent, smoking on.

"Because I haven't had one since we started—because I'm parched with thirst."

"Parch away!" cried the creature of suspicion. "You can't help yourself, and I can't help you with this baby to nurse."

And he fondled the cocked revolver in his hands.

"Very well! Don't give me one!" exclaimed Stingaree and dealt the moist bag a kick that sent a jet of cold water spurting over his foot. He expected to be kicked himself for that. He was only cursed, the bag snatched out of his reach and deeply drained before his eyes.

"I was going to give you some," said Cairns, smacking his lips. "Now your tongue may hang out before I do."

Stingaree left the last word with the foe. It was part of his preconceived policy. He still regretted his solitary retort, but not for a moment the more petulant act which he had just committed. His boots had been removed after his fall; one of his socks was now wet through, and he spent the next few minutes in taking it off with the other foot. The lengthy process seemed to afford his mind a certain pensive entertainment. It was a shapely and delicate white foot that lay stripped at last—a foot that its owner, with nothing better to do, could contemplate with legitimate satisfaction. But Superintendent Cairns, noting his prisoner's every look and putting his own confident interpretation on them all, cursed him afresh for a conceited pig and filled another pipe, with the revolver for an instant by his side.

Stingaree took no interest in his proceedings; the revolver he especially ignored, and lay stretched before his captor, one sock off and one sock on, one arm in splints and sling and the other bound to his ribs, a model prisoner whose last thought was of escape. His legs, indeed, were free, but a man who could not sit on a horse was not the man to run away. And then there was the relentless superintendent sitting over him, pipe in mouth, but revolver again in hand and a crooked finger very near the trigger.

The fiery wilderness still lay breathless in the great heat, but the lengthening shadow of the hop bush was now a thing to be thankful for, and in it the broken captive f[illegible] into a fine semblance of natural slumber. Cairns watched with [illegible] envy and suspicion; for [illegible] could not be a while; but [illegible] the fellow was shamming [illegible] however, [illegible] the sham, which the [illegible] by breathing [illegible] and then stentorously, with one eye [illegible] on his man. Stingaree never opened one of his; there was [illegible] in the regular breathing [illegible] expression of the [illegible] face—asleep the man must be. The superintendent's own experiments had gone to show him that no extremity need necessarily keep one awake in such heat. He stifled a yawn that was no part of his performance. His pipe was out; he struck a match noisily on his boot, and Stingaree just stirred, as naturally as any infant. But Stingaree's senses were incredibly acute. He smelt every whiff of the rekindled pipe, knew to ten seconds when it went out once more and listened in an agony for another match. None was struck. Was the superintendent himself really asleep this time? He breathed as though he were, but so did Stingaree; and yet there was hope in the fact that his own greatest struggle all this time had been against the very thing he had feigned.

At last he opened one eye a little. It was met by no answering furtive glance. He opened the other, and there could be no more doubt. The terrible superintendent was dozing in his place, but it was the lightest sort of doze. The eyes were scarcely closed and all but watching Stingaree as the cocked revolver in the relaxed hand all but covered him. The prisoner felt that for the moment he was unseen,

The Eyes Were Scarcely Closed, and the Cocked Revolver In the Relaxed Hand All but Covered Him.

forgotten, but that the lightest movement of his body would open those terrible eyes once and for all. Be it remembered that he was lying under them lengthwise on the bound arm, with the arm in the sling uppermost and easily to be freed, but yet the most salient part of the recumbent figure and that on which the hidden eyes still seemed fixed for all their lids. To make the least movement there, to attempt the slowest withdrawal of hand and arm, was to court the last disaster of discovery in such an act. But to lie motionless down to the thighs and to execute a flank movement with the leg uppermost was a far less perilous exploit. It was the leg with the bare foot. Every detail had been foreseen. And now at last the bare foot hovered over the revolver and the hand it held, while the upper man yet lay like a log under those drowsy, dreadful eyes.

Stingaree took a last look at the barrel drooping from the slackened hand. The back of the hand lay on the ground, the muzzle of the barrel was filled with sand, and yet the angle was such that it was by no means sure whether a bullet would bury itself in the sand or in Stingaree. He took the risk, and with his bare toe he touched the trigger sharply. There was a horrible explosion. It brought the drowsy superintendent to his senses with such a jerk that it was as though the smoking pistol had leaped out of his hand a thing alive and so into the hand that flashed to meet it from the sling. And almost in the same second, while the double cloud of smoke and sand still hung between them, Stingaree sprang from the ground, an armed man once more.

"Sit where you are!" he thundered. "Up with those hands before I shoot them to shreds! Your life's in less danger than mine has been all day, but I'll wing you limb by limb if you offer to budge!"

With uplifted hands above his ears, the deformed officer sat with head and shoulders depressed into the semblance of one sphere. Not a syllable did he utter. Stingaree stood wriggling and fumbling at the coil which bound his left arm to his side. Suddenly the revolver went off as if by accident, but so much by design that there dangled two ends of rope, cut and burned asunder by lead and powder. In less than a minute the bushranger was unbound, and before the minute was up he had leaped upon the superintendent's thoroughbred. It had been tethered all this time to a tree, swishing tails with the station hack which Stingaree had ridden as a captive. He now rode the thoroughbred and led the hack to the very feet of the humiliated Cairns.

"I will thank you for that waterbag," said Stingaree. "I am much obliged. And now I'll trouble you for that nice wideawake. You really don't need it in the shade. Thank you so much!"

He received both bag and hat on the barrel of the government revolver, hooking the one to its proper saddle strap and clapping on the other at an angle inimitably imitative of the outwitted officer.

"I won't carry the rehearsal any further to your face," continued Stingaree, "but I can at least promise you a more flattering portrait than the last, and this excellent coat, which you have so considerately left strapped to your saddle, should contribute greatly to the verisimilitude. Dare I hope that you begin to appreciate some of the points of my performance, so far as it has gone? The pretext on which I bared my foot for its delicate job under your very eyes, eh? Not so vain as it looked in either sense, I fancy. Should you have said that your hand would recoil from a revolver the moment it went off? You see, I staked my life on it, and I've won. And what about that fall? It was the lottery! I was prepared to have my head cracked like an egg, and it's still pretty sore. The broken wrist wasn't your fault—it had passed into the accepted situation before you turned up. And you would certainly have seen that I was shamming sleep if we hadn't both been so genuinely sleepy at the time. I give you my word, I very nearly threw up the whole thing for forty winks! Any other point on which you could wish enlightenment? Then let me thank you with all my heart for one of the worst days and some of the greatest moments in my whole career."

But the crooked man answered never a word as he sat in a ball with uplifted palms and glaring, upturned, unconquerable eyes.

"Goodby, Superintendent Cairns," said Stingaree. "I'm afraid I've been rather cruel to you, but you were never very nice to me!"

* * * * * * * *

Sergeant Cameron was driving the spring cart, toward sundown, after a variety of unforeseen delays. Of a sudden out of the pink haze came a galloping figure, slightly humped, in the inspector's coat and wideawake, with a bare foot through one stirrup and only a sock on its fellow.

"Where's Stingaree?" screamed the sergeant, pulling up. And the galloper drew rein at the driven horse's head.

"Dead!" said he thickly. "He was worse than we thought. You fetch him while I"—

But this time the sergeant knew that voice too well, and his right hand had flown to the back of his belt. Stingaree's shot was only first by a fraction of a second, but it put a bullet through the brain of the horse between the shafts, so that horse and shafts came down together, and the sergeant fired into the earth as he fell across the splashboard.

Stingaree pressed soft heels into the thoroughbred's ribs and thundered on and on. Soon there was a gate open, and when he listened at that gate all was still behind him and before, but far ahead, the rolling plain was faintly luminous in the dusk, and as this deepened into night a cluster of terrestrial lights sprang out with the stars. Stingaree knew the handful of gaunt, unsheltered huts the lights stood for. They were an inn, a store and police barracks—Clear Corner on the map. The bushranger galloped straight up to the barracks, but skirted the knot of men in the light before the veranda and went jingling round into the yard. The young constable in charge ran through the building and met him dismounted at the back.

"What's the matter, sir?"

"He's gone!"

"Stingaree?"

"He was worse than we thought. Your man all right?"

"No trouble whatever, sir. Only sick and sorry and saying his prayers in a way you'd never credit. Come and hear him."

"I must come and see him at once. Got a fresh horse in?"

"I have so! In and saddled in the stall. I thought you might want one, sir, and ran up Barmaid, Stingaree's own mare, that was sent out here from the station when we had the news."

"That was very thoughtful of you. You'll get on, young man. Now lead the way with that lamp."

This time Stingaree had spoken in gasps, like a man who had ridden very far, and the young constable, unlike his sergeant, did not know his voice of old. Yet it struck him at the last moment as more unlike the voice of Superintend-

And Howie Dragged the Unconscious Constable Into the Cell.

ent Cairns than the hardest riding should have made it, and with the key in the door of the cell the young fellow wheeled round and held the lamp on high. That instant he was felled to the floor, the lamp went down and out with a separate yet simultaneous crash, and Stingaree turned the key.

"Howie! Not a word—out you come!"

The burly ruffian crept forth with outstretched hands apart.

"What! Not even handcuffed?"

"No. Turned over a new leaf the moment we left you and been praying like a parson for 'em all to hear."

"This chap can do the same when he comes to himself. Lies pretty still, doesn't he? In with him!" And Howie dragged the unconscious constable into the cell.

The door clanged. The key was turned. Stingaree popped it in his pocket.

"The later they let him out the better. Here's the best mount you ever had. And my sweetheart's waiting for me in the stable."

Outside, in front, before the barracks veranda, an inquisitive little group heard first the clang of the door within and presently the clatter of hoofs coming round from the yard. A fresh outcry from the cell and a mighty hammering against its locked door broke the truth to one and all.

# Who Needs a Friend More Than Brechon's Twins? They're Good

The harm that can result when one body plays with matches is accentuated upon by the time a box of matches comes into the possession of a pair of kiddies. This was emphasized this morning at the home of Mr. and Mrs. Emil Brechon, in East 4th st., near the Chocolate Works. The Brechons are owners of twins, three years old, and what they lack in years and stature they have made up in giving the fire department a long, muddy run.

The bodies got busy this morning as babies will when mother happens to be engaged in household duties. In a manner unknown to Mother Brechon her twins secured a whole box of matches, went into the yard and heaped a quantity of paper and refuse against the house, setting the mass afire, making necessary the services of the fire laddies. That the result of the escapade was not more serious may be due to the timely appearance of Mother Brechon on the scene. The flames had by this time spread through an open cellar window, igniting the ceiling and filling the house with smoke.

Mrs. Brechon was arousd to the critical situation. She smashed a neighboring cellar window and by using pails of water succeeded in making the fire laddies' call unnecessary.

## LITERARY HYPOCRITES.

**Here's a Writer Who Frankly Admits He's One of the Clan.**

How many of us if we were really honest could make a list of great books that we have tried to enjoy and couldn't rise to?

We have for our own part a greater sin than that on our conscience. There are a number of books that we habitually pretend we have read which we have never read at all. They are great books, we suppose. At least we've heard a lot about them and read a lot about them, and people who assume to know say they are great books. Some of them we have tried to read and couldn't read, but we have pretended at one time or another to have read all of them. Here is our list of shame:

"Tom Jones." We have tried to read it four times and could never get five pages into it.

"The Vicar of Wakefield." We have attempted it at least six times and taken the count in the first round every time.

"Dante's Divine Comedy." We have been going against the Cary translation, which we hear is a good one, at least once a year for twenty years, and we can't get interested in it. Yet up to the present moment we have always pretended that we had read all of it and liked it.

"Don Quixote." We have read a little of it, and we know all the usual things that are said about it, and we even wrote some stuff about it one time, saying all the things that are usually said about it, for which we got $25, but we don't really like it. It puts us to sleep; it seems long drawn out and clumsy to us.

"Boswell's Life of Johnson." We never read any of it. But we have pretended to and have pretended at times to quote incidents from it and have got away with the incidents.

We have always pretended that we were familiar with Walt Whitman's poetry, but as a matter of fact we never read anything through, excepting "When Lilacs Last In the Dooryard Bloomed."—Don Marquis in New York Sun.

## RUNNING THE BLOCKADE.

**It Was Successfully Done Ages Ago at the Siege of Syracuse.**

Blockading and blockade running is not a young war measure by any means. One of the earliest authentic instances of the practice dates back two centuries before the Christian era. Marcus Claudius Marcellus, commanding a powerful Roman army and an efficient fleet, laid siege to Syracuse, a rich city on the isle of Sicily. Carthage, Rome's great rival on the north shore of Africa, one of the great sea powers of that time, was not at all pleased with the idea of Rome capturing Syracuse, a free city and probably a source of great revenue through trade with Carthage.

Syracuse was a well fortified city, and there seemed to be no immediate prospect of Rome taking it by storm, so Marcellus decided to starve its inhabitants into submission. He put a cordon of ships across the entrance to the harbor and arrayed his army on the land side so that no succor could come from without. But he had underestimated the boldness of the Carthaginians. There was no question of contraband in those days—conditional or other.

In their swift oar driven galleys the sailors of the African city easily eluded the ships set to watch the port and carried provisions and war material into the beleaguered city. So successful were the Carthaginians in getting supplies into the city—running the blockade—that had it not fallen through treachery it would have been enabled to hold out indefinitely. While blockades probably had been established before on a small scale, the blockade of Syracuse is one of the earliest instances where the efficiency of a blockade by sea was of vital importance in determining the success of war on an important seaport.—Munsey's Magazine.

# E. P. Cole Tells Masons "the Right Man is In the Right Place" Here

"Billy" Sunday 2nd was in the city Saturday evening and used the Masonic Club as his tabernacle. About one hundred and twenty five Masons were present and listened with great attention to what he had to say. "Billy" was introduced by E. P. Cole of this city in well chosen words. Mr. Cole stated that about one year ago the Chamber of oCmmerce was reorganized and had now appointed a man who has shown in the short time that heh as been amongst usthat he is the right fellow in the right place and that he therefor was very glad to introduce Mr. D. S. Hollenga, Secretary of the Chamber of Commerce.

Mr. Hollenga in a whirlwind speech told the Masons some very plain things. He began by asking the audience, if any of the members present had ever given consideration to the quietness and restfulness of the evening and if it ever had happened that sitting in an easy chair and while smoking a pipe or cigar they had thought about the many things that had happened in the past in their own life.

Continuing his address the Secretary plead for the co-ordination of every institution, church and lodge in the city. In this way only can Fulton be made a city of homes, he said.

## Those You Know

Utoka Tribe of Red Men will be addressed by Secretary Hollenga at their rooms tomorrow evening. Every member of the order is expected to be present.

* * *

Mr. A. M. Druse has returned from a few days visit with his brother near Phoenix.

* * *

Mr. and Mrs. Clair Thorpe of N. 6th st. are parents of a ten-pound baby girl, born Saturday afternoon.

* * *

Miss Ada Thayer will return from New York tomorrow evening.

* * *

Mrs. F. C. Root and her son Leonard, of East Syracuse, spent the week-end with Mrs. Root's parents, Capt. and Mrs. Layette Norton, in Hannibal street.

* * *

Mr. J. G. Davis, of Buffalo st., has returned from Mexico, where he visited relatives and old-time friends.

* * *

Members of the Citizens Club will listen to Secretary Hollenga's address upon subjects of vital importance on civic affairs, tomorrow evening, at 8 o'clock sharp.

* * *

Mr. Harry Nichols, of West 2nd st., is ill.

* * *

Mr. James Ure and son Fred, of Palermo, spent the week-end with relatives in this city.

* * *

Miss Nettie Rogers of Bowens Corners, was the over-Sunday guests of her sister, Mrs. Bernie Sharp, Park street.

* * *

The Elks minstrels held a rehearsal at the Quirk yesterday afternoon.

## W. C. T. U. CELEBRATES ITS PRESIDENT'S BIRTHDAY

The president of the Union, Mrs. William Sylvester, was doubly honored last Friday, by the large attendance at the meeting held in the Presbyterian church, and by the fact that the women were there to honor her birthday. She was presented with a large bouquet of carnations by the chairman of the flower committee in the name of the Union.

"Co-operation with missionary societies" was the subject dwelt upon by the readers of clippings from newspapers and magazines, and a fine musical program interspersed the readings.

Mrs. Spencer, the new county president, sent a greeting to the Union which was read, the many valuable recommendations being greeted enthusiastically.

It is pleasing to the Union to note the number of new faces appearing at each meeting. It is earnestly hoped that more of the Fulton women may make it a point to attend the meetings.

The February meeting will be in celebration of Frances Willard Memorial Day, and will occur in the Baptist church. The same meeting will also be known as the Matron's Reading contest. Every woman in Fulton is invited to attend this meeting.

## FARM BUREAU TO MEET AT PULASKI FEB. 23

The Oswego county Farm Burean held an interesting session at Oswego on Sat., and decided to meet again in Pulaski February 23rd. This meeting will be addressed by prominent speakers, both morning and afternoon. Election of officers will also take place, then nominating committee being: Frank Barnes, Oswego; George Fuller, Fulton; Russel Quonce, Scriba.

Frank aBrnes of Oswego was selected by the committee to represent the Farm Bureau at Farmers' Week, to be observed in Ithaca on February 7-12, inclusive A number of local committeemen from throughout the county were appointed. The list will be announced later.

## THE TREE ON THE ROOF.

**An Old Building Custom to Propitiate the Pagan Gods.**

Did you ever stop to think why a bit of ornament in the form of conventionalized fruit, grain or flowers is almost invariably added to the gable of a Gothic building and very frequently to the gable of any other type of building? Do you know why the lightning rods of our grandfathers were branched at the ends like little trees and why the old fashioned Scandinavian, Danish and German contractors contrive to fasten a branch of a tree or an ear of corn to the topmost peak of a house that has progressed so far in the course of construction that the rafters are in place? Usually the contractor laughs sheepishly when he is asked about the matter, giving no other reason than that his father always provided the birds with some grain or offered them a green branch to rest in.

The fact is that the birds have nothing whatever to do with the custom. It is purely religious in its significance and entirely pagan. It had its beginning before Christianity was "inflicted on the barbarians of the north." The gable of a building was exposed to both wind and lightning, so the gods must be propitiated. For Wotan there was a small evergreen tree and for Thor there was a bunch of flowers. If the favor of the god had been invoked while the house was still incomplete, the ceremony must be finished the day the house was done by the burning of the little tree or the withered flowers. Then a bunch of grain was tied to the gable to feed the white horse of the death god, so that he would hasten on his journey without stopping at that particular house.—St. Louis Globe-Democrat.

### Homemade Gas.

Spanish peasants living in the cork oak region use homemade gas obtained from cork refuse. As described by one authority, the process consists in filling several large teakettles with the waste bark and placing each in turn over the fire during the evening, burning the volatile gas as it escapes from the spouts. The carbonized residue forms the fine black-brown pigment known to commerce as "Spanish brown."

### His Golf Prize.

When the Duke of York was living in Edinburgh in 1681 he was told that a certain shoemaker named Patersone was the best golf player in Scotland, and him, the duke, later James II., chose as partner in a foursome, winning a huge stake. He promptly turned over the money to Patersone, who forthwith built a house in which the duke placed a stone with a Patersone crest bearing the motto, "Far and Sure."

### Always Wrong.

Manager—I'm disgusted with the mistakes that new man makes! He gets everything balled up. Assistant Manager—Oh, well, some of the best ones are that way at the beginning. He may bring home the bacon yet. Manager—He won't unless we send him for ham.—Judge.

### His Motive.

Judge—Why did you commit a second theft after you had just been acquitted of the first one? Prisoner—I had to pay my lawyer, your honor.—Boston Transcript.

### Their Work.

"What a noisy clatter children do keep up at the table!"

"They certainly do put the din in dinner."—Baltimore American.

## LEGEND OF THE DONKEY.

**Showing Why the Arabs Beat the Brute With Impunity.**

In his article on his journey to Babylon, in Harper's, William Warfield tells a legend prevailing among the natives by which they justify beating of donkeys, but not horses.

"We stopped to change our mules. In the roadway before the khan sat a group of Arabs. A servant supplied them with little cups of tea from a rude samovar. We saluted them, and, taking our places in the circle, we were served in turn. Some one in the dark doorway was thumping away on a drum. A boy came out of the khan beating a poor lame donkey with fly infested sores. I turned to one of my neighbors:

"'Is it not cruel for that boy to beat a lame donkey in that way?'

"'Effendi, it is the will of God!'

"'But you do not allow horses or camels to be beaten thus.'

"'Effendi, the donkey is not like the horse, nor yet is he like the camel. The reason is this: Upon a certain day the donkeys went before Allah and complained that they were grievously beaten by men, so that life was a greater burden than they could bear. Then said Allah: "I cannot make men cease from beating you. It is no sin, neither does it cause them any great loss. But I will help you. I will give you so thick a hide that, however much you are beaten, you shall not suffer."

"'So,' said my informant, 'it is of no consequence if men beat a donkey. So thick a skin did Allah give him that after he dies men use it in the making of drums, and the donkey continues to be beaten after death.'"

### Effects of Frost.

An egg expands when it is frozen and breaks its shell. Apples contract so much that a full barrel will shrink until the top layer is a foot below the chine. When the frost is drawn out the apples assume their normal size and fill up the barrel again. Some varieties are not appreciably injured by being frozen if the frost is drawn out gradually. Apples will carry safely in a refrigerator car while the mercury is registering fully 20 degrees below zero. Potatoes, being so largely composed of water, are easily frozen. Once touched by frost they are ruined.—Northwest Trade.

### Devilfish.

In Japan devilfish weighing 200 pounds are sometimes caught. These fish are amphibious; they are often seen wabbling on their tentacles like giant spiders in search of patches of sweet potatoes. The natives kill them with clubs. In the water they are caught in jars lowered to the bottom, which the octopus enters, thinking them a good retreat from which to catch his food.

### Discouraging.

After a mother has taught her son not to keep his hands in his pockets, to turn his toes out and not to sniff his nose or smack his lips when he eats, it must be discouraging to hear people remark a month after his marriage that his wife made him.—Wichita Eagle.

### Sand In Holland.

In Holland sand is plentiful and inexpensive and is used instead of hay and straw as beds for cows. It keeps the animals perfectly clean, requiring only a slight raking in the morning to soften and freshen it.—London Telegraph.

### Perfectly Tame.

To say of a man that he will make a good husband is much the same sort of compliment as to say of a horse that he is perfectly safe for a woman to drive.—Puck.

## S. U. ALUMNAE PLAN DINNER

**Plans Laid to Raise Money for Women's Building Fund. Treasury Now Holds $1500**

Syracuse, January 31. — The largest progressive dinner ever held in this city and probably in the state is being planned by the Syracuse University Alumnae Club. It is expected that more than 1,000 men and women will be entertained.

The dinner will be given to raise money for the women's building fund. It has been the aim of the club for the last three years to obtain a sufficient sum of money for the erection of such a building at the University. There is now $1,500 in the treasury and thep romoters of the progressive dinner hope to add a large sum to this by the big enterttainment.

The Alumnae Club co-operates yearly with the Womens League of the University in presenting a large entertainment. At the January meeting Saturday, atw hich Miss Lola Lowther was hostess at the home of her sister, Mrs. Horace S. Wilkinson in University avenue, the members voted to give a progressive dinner to which the public will be invited.

**Event in April**

It is planned to have the dinner soon after the middle of April, when the weather will probably be mild enough to allow of comfortable walking from house to house for the five courses which will be served.

The Entertainment Committee will cooperate with the Womens Building Committee in outlining plans for the dinner, which will be served at five houses. Sorority houses and private homes will be used. Men students at the University will be invited to cooperate with the women.

The plan was suggested by Miss Grace Sawyer of Syracuse, who is passing the winter at Eugene, Ore., where is situated the Oregon University. Students there gave such a dinner this winter and collected a substantial sum. Miss Sawyer is one of the originators of the Womens Building idea for Syracuse University.

## SCHOOL PRINCIPAL WOULD PLACE BAN ON SMOKING

Principal Frederick Leighton of the Oswego High school Faculty is endeavoring to start a campaign against the cigarette smoking habit among students. He made an address Friday afternoon, saying that he is in receipt of a communication from an industrial corporation who want to employ students in the commercial department, but who decline to employ young men addicted to the cigarette habit.

## POMONA GRANGE OPPOSES ABOLITION OF TRUSTEES

The committee appointed by Oswego County Pomona Grange will recommend to the State Grange at Jamestown next week that there should be greater uniformity among the common schools of the towns, that a uniform system of textbooks should be adopted, that the cost price of the same should be lessened, that taxation should be more equitably divided, that the town system of taxation should not be more extended than the town system of highway taxation, which includes the incorporated villages within towns.

The committee claims that it is no more just to compel rural taxpayers to help maintain the schools within the incorporated villages than it would be to ask them to aid in the maintenance of streets in such villages.

In connection with the plan of creating a town board of education the committee is opposed to the abolishment of the office of trustee. The committee favors maintaining the present trustee and that the various trustees in the towns shall constitute the town board of education.

### Chinese Junks.

The Chinese junk is to most western eyes a curious not to say outlandish type of vessel. Yet a nautical authority in picturing and describing a famous craft of this kind which visited Europe and America as long ago as 1848 says that she proved herself an excellent sea boat, with powers of weathering a storm equal if not superior to vessels of western build. This junk, the Keying, is also declared to have made a run "equal to the time of the best packet ships of the period." Information of this kind about foreign methods is often truly educative to Americans inclined to be boastful.—Outlook.

## PUBLIC INTOXICATION CAUSE OF 14 ARRESTS

Sixteen arrests, resulting in the same number of convictions is the report of Chief of Police Dyer for the month of January. The report was submitted to the Board of Police and Fire Commissioners at Saturday night's meeting.

The fire department responded to five alarms during the month, according to the report of Chief Waugh, the Dix fire being the most serious. The board, in addition to accepting the reports from the two departments, audited a number of bills.

The police made fourteen arrests for public intoxication, one for assault in the third degree, and the remaining one for criminal assault. Fines to the amount of $47 were imposed.

# SALMON RIVER TO ISSUE NOTES

### Short Term Certificates Will Enable Company to Complete Power Development.

Albany—The up-state Public Service Commission has authorized an issue of $546,000 of 6 per cent three year gold notes, dated February 1, 1916, by the Salmon River Power Co., with which the company will complete the financing of its 30,000 horse-power hydro-electric plant on the Salmon River, Oswego county from which it proposes to supply current to the Solvay substation of the Niagara, Lockport & Ontario Power Co. The obligations for the construction and completion of this plant have amounted to $3,428,218.24, in partial payment of which there has been applied the proceeds of $3,315,000 first mortgage bonds and other moneys amounting to $2,856,526.51, and there is available the proceeds of $30,000 additional bonds which may be issued at 85, leaving a balance to be provided for by then otes of $546,063.73. Owing to the terms of the first mfortgage no further bonds can be issued, and a previous authorization of such bonds, never issued, is reduced by $190,000.

To care for this new financing the Commission has ordered a new suspense account to be set up, whereby this half million dollars additional will be amortized in twenty years' equal payments, or faster if the company so desires, by deductions yearly from income or corporate surplus.

The carrying out of this order is made dependent on the company's correction of its books in certain details in accord with a report of the Commission's division of capitalization, so that the company's finances will rest on a sound basis of amortization and other accounting features throughout.

# POWER COMPANY WINS DECISION

Almost every official and legal force of the Fulton Light, Heat & Power company appeared before the Public Service Commission James O. Carr, in Syracuse, this morning, in the case which was reviewed exclusively in last Friday's Evening Times, against the Seneca River Power company, to compel the latter corporation to vacate the premises of the town of Lysander. The Seneca River company, it is alleged by the local company, is guilty of erecting a line of poles without first going through the formality of securing a franchise.

Ther esult of this morning's hearing was favorable to the Fulton Light, Heat & Power company, but to what extent and the nature of the opinion of the commissioner isu nknown at press hour.

## BAPTIST STARS TO PLAY LODGE'S SECOND TEAM

Unless the unforseen happens the Maccabees second team will appear in the return game with the Baptist Stars, in spick and span uniforms, when the teams clash in Church's hall Wednesday evening.

In preparation for the Oswego Normal game, to be played in Oswego on Friday night, the Maccabee regulars will practice tonight against the second team on the court at Church's Hall. A complete re-organization of the first team may result from O'Brien's resignation. O'Brien has held down one of the forward positions in good style in nearly every game this season, and his absence will be felt. He leaves shortly for New York where he will enter school.

## AMERICAN MECHANICS TO HOLD RECEPTION

The Order of American Mechanics will hold a reception and entertain a number of friends of the members at tonight's meeting.

Card playing, dancing and the service of refreshments will make up the program arranged by a special committee of the oCuncil.

## ANIMAL NEARLY BROKE LEG FREEING ITSELF

By sheer good fortune, Fred Jewett, a farmer residing on the Volney road, narrowly escaped losing a valuable horse when the animal's hind hoof es-hoof became wedged in the railroad tracks at Oneida and 1st sts. early this afternoon.

The horse was thrown heavily to the pavement and it was necessary to pry the animal loose. While the search for an instrument with which to release the animal from its position was taking place, the horse struggled to realease itself from the men who were holding it to the ground. It was thought that the horse's leg would be broken in its efforts to rise.

The front of the wagon was broken in several places and the horse was cut about the body. At the time of the accident Mr. Jewett was driving his team at a slow pace down the Oneida st. incline. A large crowd was attracted to the scene, several of the men assisting in freeing the horse.

## CHARLES BROOKS INSTALLS OFFICERS IN OSWEGO LODGE

Mr. Charles H. Brooks, Worthy Patron of Elizabeth Chapter, O. E. S., installed officers in Lake City Chapter, Oswego, Friday night. He was assisted by Mrs. Edith Koberg and Mr E. S. Robinson, marshals.

The officers are as follows:

Mrs. Ethel J. Brooks, worthy mattron; Harry M. Stacy, worthy Patron; Mrs. Sadie B. Nickel, association matron; Mrs. Gussie Wallace, conductor; Mrs. Maude T. Halsey, association conductor; Mrs. Alice Esseltine, treasurer; Miss Mabel Schneider, secretary; Mrs. Blanche A. Hager, warder; Miss Margaret Sexsmith, Adah; Mrs. Amy B. Crandall, Ruth; Mrs. Hazel Boyce, Esther; Mrs. Irene L. Stacy, Martha; Mrs. Lulu A. Knauss, Electa; Mrs. Jennie M. Butterworth, chaplain; Mrs. Norma C. Stephens, marshal; Mrs. Elizabeth Armstrong, historian; Mrs. Bessie B. King, organist; Henry R. Eason, sentinel; George W. Butterworth, trustee.

## A WEEK'S BOARD FOR THE PRICE OF ONE MEAL

Nehasane Rebekah Lodge will serve a roast pork supper at I. O. O. F. temple, Saturday, February 5, from 5 to 8 p. m.

The committee in charge comprises Mrs. R. E. Crandall, Mrs. G. A. Rappole, Mrs. Horace Baggs, Mrs. Fred Wolcott and Mrs. Frank Sheldon.

Persons who have attended suppers in the past know they will get a whole week's board for the price of one meal

## REPRESENTING GRANGERS AT JANMESTOWN, N. Y.

Lower Oswego Falls has sent as delegate Mr. and Mrs. G. A. Rappole to the meeting of the State Grange in Jamestown, N. Y.

Mr. and Mrs. Rappole left this morning. Mr. Rappole will review the work of the Grange in this vicinity. he was a master of the Grange in this city for a number of years.

## THE QUIRK

Thomas A. Wise, internationally famousf or his characterizations in "Lights o' London," "Are You a Mason?" "The Last Chapter," and throughout America for "The Gentleman from Mississippi," "The Song of Songs," "A Chip of the Old Block," "The Prince Chap," and hosts of otherf amous successes will be seen at the Quirk Theatre today, in his most recent film creation, "Blue Grass," adapted from the play of the same name by Paul Armstrong.

"Blue Grass," produced in five acts and over three hundred scenes by the Equitable Motion Pictures Corporation, is a play of Southern atmosphere, in the days that the Southern gentleman spent a great part of his time at the race track, and possessing a lust for gambling, there occurred many a tragedy. In these races, many horses were entered and many a human story was hidden behind the bare name of an entry. "Blue Grass" is a story of surpassing interest.

FOR FLETCHER'S
CASTORIA

# KNIGHTS OF COLUMBUS TO LISTEN TO SECRETARY'S EARNEST PREACHMENTS

Matters of importance relative to the purchase of the new home in South 1st st. will be presented to the Knights of Columbus at the regular business session tomorrow evening.

On account of a number of preliminary alterations to be made, it is not expected that the Council will enter the home until two or three months later. The building is being inspected daily by the members of the order, and everybody is enthusiastic over the purchase.

The Board of Directors, who were appointed at the meeting last Tuesday evening are preparing the necessary incorporation papers, and it expected they will make a report tomorrow evening.

An invitation has been extended to D. S. Hollenga, Secretary of the Chamber of Commerce, to speak to the members tomorrow evening, and it is believed his remarks will be of much value and benefit.

At the conclusion of the meeting, an oyster supper will be served followed by a mixed program of entertainment.

A dancing party had been arranged for Wednesday evening of this week in the K. of C. hall, but owing to the Elks hospital benefit at the Quirk the same evening, the committee has postponed the affair until Wednesday evening, February 9th. The dancing will be private, and admission is limited to invitations. The committee is composed of Messrs. John T. Sullvan, Chairman; William F. Chapman, Richard Murphy and James K. Carroll.

# STEEL MISSILES DROP IN PARIS

### They Weighed 600 Pounds Each and Scattered Death Through City's Homes.

Paris—Twenty-four persons killed —most of them in their beds— and thirty-seven injured in the toll Paris paid to the Zeppelin marauder late on Saturday night. Of the injured ten are in hospitals in a serious condition.

The greatest and most destructive missiles yet released by an aircrafe caused havoc where they fell. These bombs weighed slightly more than six hundred pounds each and a total of three and one-half tons was thrown onto the city. One bomb crashed through a street into the subway before it exploded. Another struck a six story apartment building, sharing off one corner and leaving the rooms from top to bottom exposed to the weath. Miraculously only ten persons in the building were injured.

The raid lasted about one minute and a half, while in thefi rst call of Zeppelins, on March 21, 1915, four of these aircraft were over or in the neighborhood of the capital for nearly two hours. They came at that time under entirely different atmospheric conditions, being plainly visible in a clear sky. Last night the fog seriously interfered with the work of the Paris aerial guard.

The fact that only one German machine apeared leads to the belief that the Zeppelin was making a reconnoitring trip and the supposition is that the Germans have in view a similar operation on a larger scale.

Thirty French aeroplanes searched the remote air regions above the city after the warning of the Zeppelin's approach. Discussing the defence one of them en who participated said yesterday afternoon:

"It was not lack of foresight or lack of speed that the aeroplanes were unable to reach the hostile air craft. The fog was the real reason for the German success. Last night it covered Paris completely ,and the searchlights were unable to pierce this wall. As for the land artillery, it was confronted with absolute invisability, making it impossible to fire.

"All the aeroplanes were put into operation when the alarm of the presence of a Zeppelin was given, but only the aviators of the sector entered by the Zeppelin wede able to perceive it. Even most of these got only a glimpse, as the eppelin was not using searchlights. The aviators in the other sectors were able only to remain in the air and guard their districts, which they did for several hours.

Five French aeroplanes are said to have fired on the Zeppelin, one of them pursuing it toward thew est for more than fifty minutes.

The attack was confined to the northeast part of Paris. This is the poorest section of the capital, and, with the exception of the pretty park of the Buttes Chaumont, offers few attractions to tourists. It comprises the quarters of La Villette and Belleville.

**desirable business—is very much like the sport of fishing. You can catch it if you use good bait. The Evening Times offers you the correct bait.**

# Is Advertising Wisdom

IT IS APPARENT IN THE CASE OF THE MAN WHO FIGURES TO GET INTO HIS STORE 10 PER CENT OF THIS TOWN'S POPULATION BY PAYING OUT THREE TIMES AS MUCH MONEY FOR SPACE AS HE WOULD PAY WERE HE TO USE THE HOME PAPERS TO REACH THE BUYING PUBLIC. THE STING IS IN THE COMPARATIVE RATES FOR ADVERTISING PLUS THE COMPETITIVE BUSINESS BROUGHT INTO THIS CITY. THE MERCHANT WHO CANNOT SEE THIS LOGIC IS A SUBJECT FOR PITY. IF HE FAILS TO REALIZE THE TRUTH HIS DAY OF RECKONING IS ASSURED

## Realization of the Truth Will Be His Source of Fortune

Remember the old German proverb: "*As fortune is sought so is it found,*" and then seek to reach your 10 per cent by Advertising in the Home Papers, which cover your field of trade better than the out-of-town papers.

## "THE IRON CLAW," A NEW PATHE SERIAL

PEARL WHITE, CREIGHTON HALE, AND SHELDON LEWIS IN CAST—ARTHUR STRINGER, AUTHOR.

### TWELVE TWO-PART EPISODES

Over Six Hundred Newspapers Have Already Bought the Serial Rights of the Story.

Pathe has become known as "the house of serials." Certainly that enterprising organization has more successful serials to its credit than any other in the motion picture business, and it was one of the very first to make one, "The Perils of Pauline" having been begun about two years ago. The first episode of "The Red Circle" was released on December 18th. Now comes announcement from Mr. Ramirez-Torres, Assistant Managing Director of Pathe, to the effect that sometime in February will be released another serial, "The Iron Claw," by Arthur Stringer, the well-known novelist, and Geo. B. Seitz.

It is interesting to note that Mr. Stringer's work was selected on its merits from a large number of manuscripts submitted by some forty-seven different authors, among them many of national reputation. It is a strong story of mystery and love with the hero's identity kept in mystery until the last moment. Many of the scenes are laid on an island off the coast of South Carolina.

"The Iron Claw" will be in twelve episodes of two parts each. It will be produced by the Feature Film Corporation, and directed by Edward Jose, who has achieved fame as a producer of of Gold Rooster Plays. The principals of the cast have been determined by the numerous letters which have been received by Pathe from exhibitors and movie fans all over the country, requesting that Pearl White, Sheldon Lewis and Creighton Hale of "The Exploits of Elaine" fame be featured in another serial.

Over six hundred newspapers all over the country have already been lined up on this serial, among them the New York World, the Philadelphia North American, and the Chicago Herald.

Arthur Stringer will be well remembered as the author of "The Shadow," "The Secret Agent," "The Wire Tappers," "The Gun Runners," "The Hand of Peril," "The Occasional Offender," etc. His stories are all characterized with that vital quality known as "punch," and "The Iron Claw" displays plenty of that characteristic.

Creighton Hale, who is featured with Pearl White, acquired great fame as "Jameson," "Craig Kennedy's" assistant in the "Elaine" serials. He possesses a remarkably engaging personality, and his talent has been recognized by his being given important parts in a number of Pathe features.

FLORENCE REED

PATHE USES REPUBLIC THEATRE AS A SET—NEW STUNT IN FILMING "NEW YORK."

Recently Pathe got over a new stunt at the Republic Theatre, New York, with the assistance of A. H. Woods, the theatrical producer.

As soon as the curtain was rung down at 11 o'clock on "Common Clay," Producer Fitzmaurice with his star, Florence Reed and many extras, came in and took possession of the theatre. Special lights were installed and some twenty scenes taken in jig time. The use of a big theatre as a motion picture set is a new scheme and proved to be a very effective one. In order to carry out the realism the floor of the theatre was crowded with extras, and friends of various Pathe officials. Mr. Woods himself was present and gave many valuable hints as to detail. The picture is "New York," an adaptation of one of Mr. Woods' theatrical productions.

JOSE COLLINS

PATHE PRODUCER CAPTURES BRIDGEPORT.

Edward Jose Uses City Island for "Light That Failed."

Edward Jose, who produced for Pathe the first Kipling book to be filmed, "The Light That Failed," discovered in his search for locations that Fayerweather's Island off the city of Bridgeport, Conn., offered remarkable opportunities for "real desert stuff."

Furthermore, the winter quarters of Barnum and Bailey's circus are in Bridgeport, so a big supply of camels, Arabian horses, etc., were right at hand. Therefore, Mr. Jose took his company, headed by Robert Edeson and Jose Collins, up to Connecticut a few weeks ago and made a pronounced dent in the ordinarily tranquil life of that enterprising community.

He needed "extras," many of them, and so announced the fact in local newspapers. Many Bridgeporters could not resist the temptation to work before the camera, so rich and poor, a multitude of them, enrolled with eagerness under his banner, ready to work for "from $2.50 per day up." As Fayerweather's Island is no winter resort and biting gales were blowing in from the broad Atlantic, the camels must have had their own opinions about the Sahara desert they were supposed to be working in.

PATHE'S "HAZEL KIRKE," A PLAY WITH WONDERFUL RECORD; HAS BEEN PLAYED FOR OVER THIRTY YEARS.

Ask anyone to mention the most famous American plays and he will give without hesitation the names of three or four, two of which will inevitably be "Uncle Tom's Cabin," and "Hazel Kirke." It is significant that all the plays mentioned will be found to be based upon American rural life—that they preach a uniform lesson of the beauty of parental love, the importance of living a clean life and the unhappiness and ruin that result from doing evil. Those who preach the decadence of the taste of the time, would do well to consider that the suggestive in plays condemns them to a short life and that the plays that live are of the type mentioned above containing strong heart interest and an evident moral.

"Hazel Kirke" has shown a phenomenal vitality which has endured for over thirty years. It was written by the late Steele MacKaye, the well known actor and playwright. In the original production were featured Charles W. Couldock and Effie Ellsler, who, as the old miller and his daughter, took the country by storm and played their parts for years.

The story deals with an old Kentucky miller, Dunstan Kirke, whose daughter Hazel has been educated by a wealthy neighbor, Squire Rodney, to whom she has been promised in marriage by her father. She, however, falls in love with a rich young man from the city, Arthur Carringford. When her father learns of this, he curses her for her lack of compliance with his wishes and drives her from his house. She goes with Carringford and is married to him at a country hotel. The minister has been secured by Carringford's butler, who knowing that the young man's mother is opposed to the marriage for purely selfish reasons, has hired, as he thought, a bar-room loafer to perform the marriage. The terrible grief of Hazel when she is informed by her mother-in-law that the marriage was not legal, drives her from her husband's house to seek refuge with her father. Denied shelter there, she seeks to kill herself, to be rescued in the nick of time by her husband, who has vainly sought her everywhere. The marriage is found to be legal, and the play ends happily.

Pearl White, in the title role, finds an opportunity for serious expression denied her in the past. As Hazel she is always convincing and does perhaps the best work of her career. Bruce McRae, whose art has been ripened by years of starring on the legitimate stage, is an ideal Squire Rodney and draws to his character all the sympathy and admiration due that lovable character.

## FROM SOUTHERN PIES TO PATHE PICTURES

ARNOLD DALY DISCOVERS ENTRANCING FACE FOR FILMS BEHIND LUNCH COUNTER.

### NORA MOORE A LUCKY "FIND"

Ability and Beauty So Extraordinary That She Starts at the Top as "Lady Dardinilis" in "The King's Game."

Arnold Daly, whose fame is about equally divided between Broadway "legitimate" productions and Pathe motion pictures, was traveling through the south not long ago, and in a certain town of South Carolina stopped off between trains to get a hasty lunch in a railroad restaurant. His eye wandered from pile to pile of crullers, cakes and pies as he tried to make up his mind on which particular dainty he should take a chance. Thus engaged in this engrossing hunt for edibles he failed to notice at first the girl who with hands folded upon snow white apron waited patiently for his order. His decision made, he turned to her and then at once forgot what he had taken so long to decide upon. The girl before him was surely a waitress extraordinary. Oval face delicately tinted with old ivory and the flush of youth and health; brown hair combed with Quaker like simplicity, yet somehow looking better than if it had been worked over by a fashionable hairdresser; blue eyes that looked at him modestly and yet unafraid.

While Mr. Daly punished his stomach with the usual small town railroad station lunch counter delicacies, he questioned the lady of the apron. He asked her if she would like to work in pictures and told her if she would, he would give her a chance. The girl refused to commit herself. "You'll have to ask my mother, suh," was her reply.

Mr. Daly decided to miss his train and see her mother. He did. He called at the address given him by the girl and talked things over with the kindly old lady living in the weather-beaten house not far away. He found that like so many southern families the two had seen better days. The father, once a leading lawyer of a neighboring town, had died poor. The grandfather was an officer in the Confederate army, and was killed in the Wilderness. The one-time large estates had vanished, and now the girl was supporting her mother by working in a railroad restaurant.

Mr. Daly made an offer that caused the old lady to gasp with surprise. When the girl returned from work that evening it was talked over and decided that such a golden opportunity could not be neglected. So two days later Nora Moore and her mother took their soft southern accent and a few belongings to New York.

That was two months ago. Now Mr. Daly wagers his judgment as a producing manager that he has made a "find." "That girl is going to be great," he says. "I tried her out with a big part the very first thing—that of 'Lady Dardinilis,' in Seitz's play, 'The King's Game,' which I'm putting on for Pathe, and she has more than made good. I'm going to use her right along. She'll make a name for herself one of these days!"

RUTH ROLAND

Ruth Roland, the well-known photoplay star, won the hearts of almost countless screen enthusiasts by her consistent playing in the now famous "Who Pays?" series of stories. She bids fair to extend the conquest through "The Red Circle," the gripping romantic serial which Balboa has filmed for Pathe.

## OFF FOR PALM BEACH.

**One of the First Frocks For Her Going South.**

SO SPRINGLIKE.

White pussy willow taffeta simply set up gives this charming gown with its shoulder cape effect. A georgette crape guimpe is worn under the basque-like bodice, while a bouffant drape over one hip, the other side falling straight, gives a piquant skirt. The flyaway bow on the straw poke bonnet, with its rosebud, deserves especial notice.

## A BEAUTIFUL NECK.

**How to Improve Your Throat Without Slavery to Routine.**

We all know that the neck should not be too short; should be smaller at the top than where it joins the chest and shoulders; that the shoulders should be neither too broad and well developed nor too narrow; that the bones of the chest and back should not be buried with flesh.

It is not given to every woman to have a beautiful neck and shoulders and chest. But she can make the most of the trio, as nature gave them to her, by massage and exercise. And she can do more.

She can care for the skin so carefully, perfecting the texture and coloring, that the form of the neck and chest and shoulders becomes secondary.

Often the skin of the back and chest and shoulders will have small eruptions when the face of the person is clear and free from any such disorder. This is because the clothes cover the body so tightly that the air and sun have no chance to purify the skin beneath as they do the skin of the face.

Frequent baths of sea salt also tend to clear the skin of the neck and bring the blood to the surface, giving it the glow of health. Olive oil or some good cold cream applied to this part of the body keeps the pores open and helps the skin to throw off any secretions which are clogging the pores.

Exercises which stretch the muscles of the back, chest and neck will keep away any superfluous flesh and make the flesh hard and firm.

The neck sometimes gets dark from high and tight collars. For a bleach use the magic of lemon juice diluted one-third with water. Sponge with it and allow to dry on.

Oatmeal is splendid for whitening the skin and may be used freely.

### Consider the Stomach.

The evil habit of going too long without food is one from which many people suffer in this present age. Men sit in their offices, women rush about shopping, and both become so absorbed in their respective interests that the period of hunger is allowed to pass and that of fatigue and depression to set in. The worst feature of such cases is that once the second stage is reached the desire for food is gone, and after this treatment of oneself the stomach is too exhausted to digest a meal when taken. This extreme should be avoided. It is only necessary to take a light diet. A glass of milk, a biscuit, will do to prevent after loss of appetite. And yet those who call themselves sensible prefer to ruin their health rather than take the time and trouble to turn into a restaurant and drink a glass of milk.

"What fools these mortals be!"

### Southern Rice Bread.

Two cupfuls of white cornmeal, three eggs, one and one-quarter pints of milk, one cupful boiled rice, two tablespoonfuls of butter, four teaspoonfuls of baking powder and one-half teaspoonful of salt. Beat eggs. Add milk, meal, salt and butter. Beat. Add baking powder. Beat again. Bake in three greased pie dishes thirty minutes.

## ART IN BOOKBINDING.

**How Miss Lahey Won Mercier, the Master, For Her Tutor.**

A woman who spent ten years and all the money she had in the world to become a skilled bookbinder is Marguerite Duprez Lahey. After studying with the most skilled tooler in Paris, says the American Magazine, Miss Lahey went to the world's greatest craftsman, M. Mercier.

M. Mercier was a man of large wealth and broad culture. He tooled for the love of it in his beautiful Paris home. His only pupil was his only son. No one in the Latin quarter had dared to penetrate M. Mercier's atelier. Undaunted, this American girl, armed with the "Life of Fragonard, by Pierre de Nolac," the toil of years and which had earned M. Domont's praise, went to M. Mercier's home.

The master was at his country seat. "Is this your work?" cried his son, when Miss Lahey had disclosed the volume. "Leave it with me. I will show it to father. It will please him to see such strong work."

"And now what do you want of me?" asked the master, when tremulously she called later for the book and Mercier had sent his praise.

"To work with you."

"Good! I take you!"

Three times a week for two summers she worked under Mercier's supervision, the master tactfully refusing the pupil's proffered money.

"Perfect!" he said, when she had finished Prosper Merimee's "Chronicle of Charles IX."

Before this triumph her gold tooling on a volume of Frederic Masson's "Napoleon and Women" procured for her the work of the late J. P. Morgan's library. This was in 1908—the turning point of her unique career. Hers is the distinction of having designed, tooled and bound the cover of Mr. Morgan's personal copy of the catalogue of his world famous Chinese porcelain collection.

## BREAK YOUR MATCH IN TWO.

**A Suggestion That Became a Rule In Forest Fire Prevention.**

One day late in June a man in a room on the seventh floor of an old fashioned brick building in Washington, holding a sheaf of telegrams in his left hand, was busy with his right taking red headed pins out of his mouth and sticking them into little irregular blocks of green ink scattered over a large white wall map of the United States.

"The big problem," he said, taking a fresh pin out of his mouth and turning sidewise to his assistant, "is to get at the fellow who knows what conservation is but forgets to apply it when he lights up a cigar in the woods."

The assistant sat at a flat topped oak desk in the middle of the room, struggling through a mass of reports from field men in the endeavor to find suggestions for a set of fire prevention "rules."

"Well, what do you think of this?" he said, holding up a report from the Pacific northwest: " 'Break your match in two before you throw it away.' "

The other man stuck the last red pin into the map, reached for his pipe and lighted it.

"Let's see," he said. He snapped the burning match in his fingers. As the pieces dropped to the floor he uttered a sharp exclamation and tenderly licked the index finger of his left hand.

The assistant laughed. "That's the idea!" he said. "You've got to blow it out before you break it or get burned."

So this suggestion became No. 1 of a set of ten rules which the forest service sent to 6,000 newspapers at the beginning of the summer's fire season in the national forests.—Outlook.

### Sandwich's Wonderful Drum.

The eccentric Lord Sandwich had, according to his biographer, a strange passion for the thunder of big drums, for the gratification of which passion he had caused the entire side of one large music room in his mansion at Hinchinbrook to be covered with parchment, so that when it was struck with a massive stick it gave out a roar sufficient to terrorize any sensitive soul. Many who heard this drum once struck positively declined ever to enter the apartment again lest they should be given a second performance.—St. Louis Republic.

### Our Biggest Industry.

Measured by the number of persons employed, what is the country's biggest manufacturing industry? Lumbering, with its 48,000 sawmills, its $1,000,000,000 investment in these plants and its employment of 605,000 men to operate them. This does not include, says the Nation's Business, the standing timber, which brings up the total investment to $2,500,000,000.—Wall Street Journal.

### Good Start.

"I'm going to start a comedy company on the road in a couple of weeks," said the theatrical manager.

"What play?" asked the critic.

"Oh, I haven't that written yet, but I heard a good joke today that we can use in it."—Exchange.

### Beat Him.

"My ancestors came over in the Mayflower," announced the man who prides himself on his blue blood.

"Huh!" snorted the man of red corpuscles. "Mine sailed in the ark!"—Dallas News.

### Not Acquired.

N. Read—How you stutter! Did you ever go to a stammering school? J. Terry—N-n-no, sir. I d-d-do this n-naturally.—Brooklyn life.

To ease another's heartache is to forget one's own.—Abraham Lincoln.

## Easy & Practical Home Dress Making Lessons

*Prepared Especially For This Newspaper by Pictorial Review*

### A Model For Modish Materials.

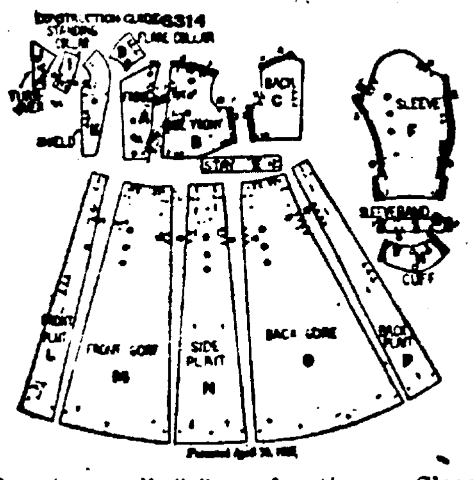
6314

Curtailing the expense for dress will not prevent an investment in this frock, which is made of figured cotton voile trimmed with embroidered organdy.

Graceful in its line, practical in its purposes and chic in style is this one-piece frock of figured cotton voile, trimmed revers and collar of organdy. In medium size the costume requires 6⅝ yards 36-inch material and ⅝ yard organdy for the trimming.

The waist is made first, and it is necessary to study the construction guide to avoid errors. First turn under the front edge of side front on slot perforations, lap on front to small "o" perforations, notches even, stitch 1 inch from folded edge. Center-front indicated by line of large "O" perforations. Gather shoulder edge of side front, and lower edges of side-front and back between double "TT" perforations. Close under-arm and shoulder seams as notched. Sew stay to lower edge of waist, center-backs even, small "o" perforation at under-arm seam, and bring front edge to center-front. Face flare collar and sew to neck edge, center-backs even, and underneath front, bringing large "O" perforations together.

Then, gather the sleeve between double "TT" perforations. Close seam as notched, leaving extensions free; turn under extensions on slot perforations,



lap to small "o" perforations. Close seam of sleeveband as notched, face sleeveband and cuff and join as notched. Adjust on short sleeve, double "oo" perforations and seams even. Sew sleeve in armhole as notched.

For the shield, standing and turn-over, face the collar and turn-over and join as notched. Sew collar to sleeve as notched.

Next, join the skirt gores and pleats as notched, leaving edges to left of center-front free above large "O" perforation in front pleat for opening. Pleat, creasing on slot perforations, bring folded edges to corresponding lines of small "o" perforations and press. Gather upper edge between double "TT" perforations. Sew to lower edge of waist over stay, centers even, and bring the center of the side box-pleat to under-arm seam.

Embroidery finishes the revers and collar.

Pictorial Review Costume No. 6314. Sizes 32, 34, 36, 38, 40, 42, 44, 46 and 48 inches bust. Price, 15 cents.

## Easy & Practical Home Dress Making Lessons

*Prepared Especially For This Newspaper by Pictorial Review*

### Jumper Frocks In Good Style.

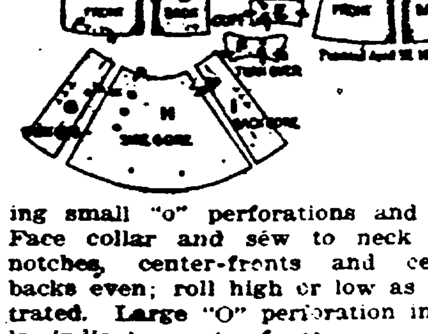
6563

A pleasing combination of plaid and plain linen fashioned into a jumper frock for girls and juniors.

For juniors and girls there are lovely jumper frocks shown for spring wear. This model shows an attractive combination of plaid and plain linen, the skirt and blouse requiring 3¼ yards of material and the jumper 2 yards 36-inch linen.

The jumper is an ideal model in almost any material to be worn separately with contrasting skirts and guimpes. To make it, first close the under-arm seam as notched. Lap the rounded shoulder edge of back on the front, matching single large and small "o" perforations and close with buttons and buttonholes; finish the edges for a closing.

To make the waist, first close under-arm and shoulder seams as notched. Turn under front edge of front on slot perforations for an underfacing. Center-front is indicated by large "O" perforations. Pleat lower edges of front and back, bringing "T" to correspond-



ing small "o" perforations and tack. Face collar and sew to neck edge, notches, center-fronts and center-backs even; roll high or low as illustrated. Large "O" perforation in collar indicates center-front.

For the sleeve, close seam as notched. Gather lower edge of long sleeve between double "TT" perforations. Close cuff seam as notched, sew to gathered edge of sleeve, notches and seams even. Close seam of turn-over as notched to small "o" perforation, line and sew to cuff as notched, small "o" perforation in turn-over at seam of cuff. Sew sleeve in armhole as notched, small "o" perforation at shoulder seam, easing any fulness.

Now, turn under the edges of the front and back gores of the skirt on slot perforations, lap on side gore to small "o" perforations, corresponding notches even; close seams underneath leaving edges to left of center-front free above large "O" perforation in front gores for an opening; press pleats. Sew to lower edge of blouse, center-fronts, center-backs and notches even.

Pictorial Review Dress No. 6563. Sizes 8, 10, 12, 13, 14 and 15 years. Price, 15 cents.

Braiding Design No. 11818. Three different borders in yellow. Transfer pattern, price 15 cents.

Children Cry for Fletcher's

## PARSON'S FAMILY TREE.

**Branches Out Considerably In Two Years—May Receive a Raise.**

Boonville, Ind.—Five children in two years is the record made by Mrs. Harry O. Simmons, wife of the pastor of the Yankeetown M. E. church of this county.

Twins were born a few weeks ago. Triplets were born two years ago, two boys and a girl, the latter surviving. The twins, a boy and a girl, are healthy youngsters. It is understood that the M. E. church congregation is planning to increase the Rev. Mr. Simmons' salary.

## The KITCHEN CUPBOARD

### WINTER VEGETABLES.

MACARONI, ITALIAN STYLE.—Break a cupful of macaroni in one inch pieces and cook in boiling salted water. Drain and reheat in sauce made of butter, flour, milk and a little cheese. As soon as cheese is melted season with salt and tabasco pepper sauce. Turn on to a serving dish. Sprinkle with ham and garnish with parsley.

Minced Lamb With Peppers.—Add one shredded sweet pepper to remnants of cold lamb which have been chopped fine. Put two tablespoonfuls of butter in a hot frying pan, add the lamb and peppers, season well and dredge thoroughly with flour. Then add enough stock to moisten. Serve on small squares of buttered toast.

Sweet Potatoes and Marshmallows.—Boil as many sweet potatoes as needed in unsalted water until tender. Remove the skins and mash. Stir into them a little sugar and butter and salt to taste. Place in a buttered baking dish, cover the top with marshmallows and put into the oven until the marshmallows swell and brown.

Escaloped Tomatoes.—One can of tomatoes, two cupfuls of diced bread, one tablespoonful of butter, one tablespoonful of sugar, one teaspoonful of salt and a little pepper. Take a shallow earthen dish, brush bottom with butter, cover with half the diced bread, half the tomatoes, sprinkle with sugar, salt and pepper, then the rest of the bread and tomatoes, sugar, salt and pepper and the butter over top. Put in oven thirty minutes. Serve in dish in which it has been baked either in nickel or silver holder or on asbestos mats.

Scalloped Cauliflower.—Cut cauliflower into small pieces, boil until tender, then put in baking dish and pour over sauce made of one tablespoonful of butter, a teaspoonful of flour, one pint of milk. Pour over cauliflower and bake one-half hour.

Anna Thompson

### Pretty Compliment.

In Princeton one day a girl was dashing stationward when a train pulled out.

"Oh, dear!" she cried to a passerby, who happened to be Woodrow Wilson. "Is that the 5 o'clock train?"

"Yes, I'm afraid it is," he answered.

"Then," she exclaimed in despair, "I've missed it!"

"No, no," said Mr. Wilson, bowing and smiling gallantly. "No, no. It would be much better to say that the train has missed you."—Detroit Free Press.

## TODAY'S FASHION NOTE

While primarily designed for skating, this frock of field mouse grey cloth trimmed with chinchilla is fetching for general outdoor wear. Later in the season fur may be replaced by bands of velvet and silk as the frock does service for morning wear. In medium size it requires 4½ yards of 54-inch material.

Pictorial Review Costume No. 6402. Sizes 32 to 44 inches bust. Price, 15c.

Pictorial Review Patterns may be procured at the J. R. Sullivan and M. Katz & Co. Department store, Fulton.

### Milk Drivers Plan Strike.

A general strike of 8,000 milk wagon drivers in New York was decided at a recent meeting of officials of the American Federation of Labor, the Retail Milk Drivers' union, the International Brotherhood of Teamsters and the United Hebrew Trades.

"The conditions under which the milk drivers work are abominable," said Mr. Feinstein of the Hebrew Trades. "They are compelled to work every day in the year and one of their chief demands will be for one day off every two weeks at least. Other demands will be the abolition of fines and an increase in wages of 10 per cent."

A series of meetings of milk drivers will soon be called, according to Mr. Feinstein, and the date of the strike will be decided at these meetings.

# WASHINGTON HAS PUZZLE IN WOMEN

## Officials' Wives Stand Reception Strain Better Than Men.

## MRS. WILSON NEVER EXCITED

**After Shaking Hands With 4,226 Persons She Appears as Fresh When Her Duties Are Completed as at Start. Mrs. Lansing Only One to Leave Line Early Because of Painful Shoulder.**

Washington.—"How can the women stand it?"

This was the question asked hundreds of times by the guests at the first really truly White House reception that has been given by the present administration, which recently took place.

How they did no one knows, but they did, and the new mistress of the White House, after shaking hands with 4,226 persons, appeared just as fresh and happy when her duties were completed as she had at the start. It was not a question of being buoyed up by the excitement of the occasion either, for the next morning Mrs. Wood-

© 1915 by Genthe.

MRS. WOODROW WILSON.

row Wilson was up bright and early and at 10 o'clock was paying a friendly visit to one of her older, but close personal friends in this city.

When it came to the men the matter was different. It is safe to say that the strain of the reception was harder on the president than days of the utmost worry over the various international questions that would cause the ordinary man to come close to the breaking point of nervous energy. The members of the cabinet, though not compelled to go through the handshaking which was inflicted on the chief executive, also showed the strain, and when the end of the long line was reached were each and all ready to take a long rest.

Only one of the ladies of the cabinet showed any effects from her exertions. Mrs. Lansing left the line early in the evening as the result of a shoulder which she recently strained while playing golf. This brought Mrs. McAdoo to the position of second in the reception line, and she showed herself to be completely at home in the gracious manner in which she greeted her father's guests. The petite Mrs. Burleson was one of the most attractive of the women who received. Sparkling and vivacious, she appeared at the end of the evening as though ready to go through a similar experience at a moment's notice.

There was just one disappointing feature—at least to some of the guests. They did not get anything to eat. A simple supper had been prepared, but when it came to midnight none remained. The waiters had done their best, but the appetites of those in the first ranks of the crowded rooms had been too hearty, and even the attempt to divide sandwiches in halves failed to bring the needed relief.

Washington society, however, was happy again. It was the first of the old time White House functions held for years. It will be by no means the last and will be followed by a revival of dinners, receptions and other entertainments which promise great joy to many, especially to the caterers and florists, who see a return of good times after a long term of lean months in their lines of business.

## SAW AND CHOP FOR CHURCH.

**Wood Enough to Heat the Place For the Winter in One Day.**

Columbus, Ind.—How to get wood to last the Garden City Christian church through the winter bothered some of the members of the church, which is situated two miles southwest of this city.

Then somebody suggested a "wood chopping and sawing." The members of the church turned out, cut down trees, sawed the logs into the proper lengths and then split the blocks into stove wood. Mrs. Mack Neptune, one of the members of the church, served dinner at noon. The Rev. W. H. Book, pastor of the Tabernacle Christian church of this city, used a crosscut saw a part of the day.

## WITHOUT FOOD SIX WEEKS.

**Farm Hands Discover Emaciated Man in Straw Stack in Michigan.**

Escanaba, Mich.—That he had remained more than six weeks in a straw stack without anything to eat was the story told by Charles Kowbowski, who is being nursed back to health at the Delta county almshouse.

Emaciated, the mere shadow of a man, Kowbowski was uncovered by men who were working on a farm near Gladstone.

Kowbowski, who is of German Polish birth, came to this country two years ago. He has worked in various cities of the upper peninsula, but he could not find steady employment. When he reached Isabella his shoes were worn out and his feet were sore. He was also weak from hunger when he came upon the straw stack, which he decided to make his home. He does not remember all the details of his long stay in the stack. He says he remembers going out three times to get a drink of water, but that he had nothing to eat.

He lost the power of swallowing, and liquid food had to be given to him by artificial means. The power to swallow has now returned and with it strength to tell of his suffering.

## GOOSEBONE PROPHECIES.

**Maine Prognosticator Issues Some Interesting Winter Weather Talk.**

Passadumkeag, Me.—Professor C. M. Anderson, Passadumkeag's famous goosebone meteorologist and prognosticator, has completed his investigations of this year's weather. He says:

"The winter will be cold and very windy. There will be frequent storms of wind and snow, frightful storms along both sea fronts and over many parts of the world. Snow will lie until late in the spring, which will be very late. The summer will be hot, with great electrical storms. There will be great earthquakes and volcanic eruptions.

"The disturbances now among the inhabitants of the earth are, as a matter of fact, only a small depression at present. The real music will be in full swing in 1918, when it will reach its climax."

## RAT BIG AS A CAT.

**Sexton Thinks a Large Rodent Ate Up Two Smaller Ones.**

Hazard, Ky.—John Sexton tells a rat story. He says he baited his rat trap one night, and the next morning he found that two of the rodents had become ensnared, so he thought he would just let them remain in the trap over the next night, and perhaps they would attract others.

On the second morning John again inspected his trap and found—only one rat, but he, as John described him, was as large as a tomcat! The two caught on the previous night were of ordinary size—"full grown," John said. There was a mystery. "What became of the first two rats you caught?" was asked, and John solemnly declared that "the big rat had eaten up the other two."

## BOY SKATERS IN PERIL.

**Fall Through Ice, but After Much Difficulty Succeed in Getting Out.**

Crosby, Minn.—Clinging to the edges of the ice, the freezing waters of Serpent lake chilling them to the bone, Trig Burud and Oscar Anderson, Crosby boys, recently battled for their lives for some time, until, realizing that no help was at hand, they used their pocketknives to gain a hold on the slippery ice and managed to pull themselves to safety.

Although badly chilled they suffered no severe consequences from the experience. The boys had been skating and ventured out where the ice was thin.

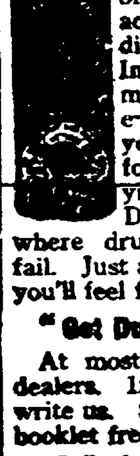
This is superb weather for oysters, taking the ultimate consumers' point of view.

An alarm clock is also one of the villains that persists in striking in the dark.

**Do You Know the Benefits of a Medicinal Whiskey?**

Not a beverage, mind you, but an absolutely pure distillation of thoroughly malted select grain. In fact, a predigested food in liquid form—for such is Duffy's Pure Malt Whiskey. During 56 years, it has been a recognized standard tonic and stimulant for the sick and ailing, the weak and run down; recommended by both physicians and the laity as a wonderful promotor of health.

**Duffy's Pure Malt Whiskey**



taken in tablespoonful doses before meals and on retiring, stimulates the mucous surfaces and little glands of the stomach to healthy action, thereby assisting digestion and assimilation. In this manner the body is made strong and fit for exercise and work. Don't say you're "Not feeling well," for many human ailments yield to the judicious use of Duffy's Pure Malt Whiskey where drugs and other medicines fail. Just as thousands of others do, you'll feel fit and fine if you,

**"Get Duffy's and Keep Well."**

At most druggists, grocers and dealers. If they can't supply you, write us. Send for useful household booklet free.

The Duffy Malt Whiskey Co., Rochester, N. Y.

# HONOR FOR NEW BRITISH OFFICIAL

## H. L. Samuel First Professing Jew to Be Home Secretary.

## NOT A STRANGER IN OFFICE

**Successor of Sir John Simon Spent Four Years in Home Department as Parliamentary Undersecretary of State—Is Not Only Member of His Creed in Cabinet.**

London.—For the first time in her history of nearly 2,000 years England has a professing Jew in the role of principal secretary of state to the crown.

True, Benjamin Disraeli attained the dignity of premier and died as the Earl of Beaconsfield. But he was a member of the Church of England, like his father before him, whereas Herbert Lewis Samuel, who recently succeeded Sir John Simon as secretary of state for the home department, has remained a strict adherent to the faith of his forefathers.

Nor is he the only member of his creed in the cabinet, for in the shuffle following the retirement of Sir John Simon owing to his objections to the

Photo by American Press Association.

HERBERT L. SAMUEL.

compulsory military service law for single men Herbert Samuel's first cousin, Edwin Montagu, has been advanced from the secretaryship of the treasury to the chancellorship of the duchy of Lancaster.

Edwin Montagu, it may be remembered, contracted a matrimonial alliance last summer with Lord Sheffield's youngest daughter, the Hon. Beatrice Venetia Stanley, who abjured Christianity for the sake of Judaism in order to wed her husband, who would by the terms of his father's will have been divested of his large fortune had he married a Christian.

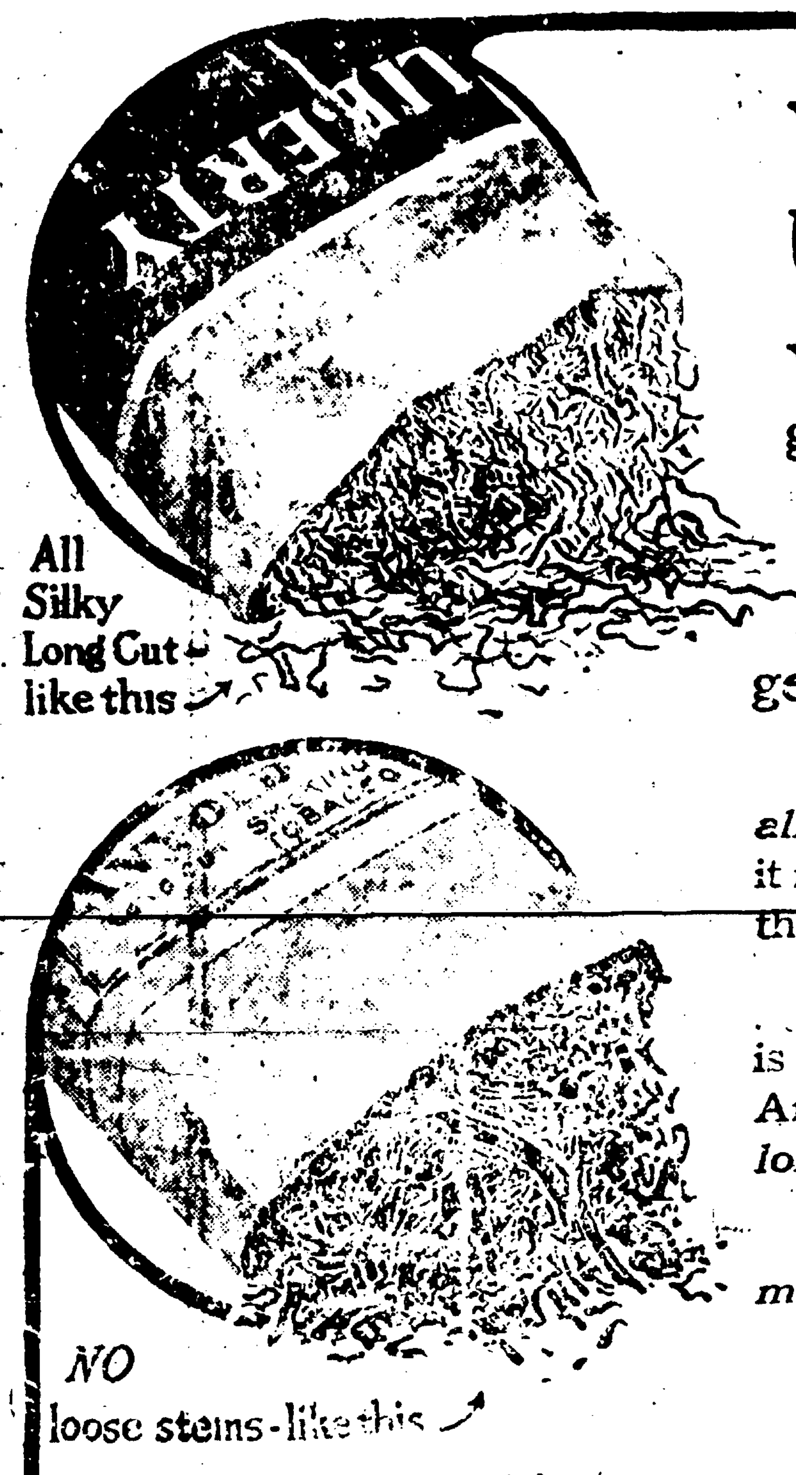
Herbert Samuel will be recalled by many in the United States as having paid a prolonged visit a little over two years ago while holding the office of postmaster general.

His family was founded by his grandfather, Louis Samuel, who kept a small watchmaker's shop in Liverpool. He had two sons, Moses and Edwin. Moses, marrying Ellen Cohen, whose father was on the London Stock Exchange, eventually established a banking house in Broad street, London, associating his brother Edwin in the business. In 1894, on being created a baronet, Moses Samuel obtained a license from the crown to change his name to Samuel Montagu and in 1907 was raised to the house of lords as Lord Swaythling.

The Right Hon. Edwin Montagu, the new chancellor of the duchy of Lancaster, is his second son. The late Lord Swaythling's brother Edwin declined to change his patronymic. He left two sons, the elder of whom is Sir Stuart Samuel, member of parliament for the Tower Hamlets division of London and who received a baronetcy in 1912. Sir Stewart's younger brother is Herbert Louis Samuel, the new secretary of state for the home department. He is married to his cousin, a daughter of the late Ellis Abraham Franklin.

Herbert Samuel, who was born at Liverpool in 1870 and who as a Balliol man graduated with first class honors from Oxford, does not come to the home department as a stranger. He spent four years there as parliamentary undersecretary of state, from the defeat of the Unionist administration in 1905 until 1909, under Lord Gladstone and thus is intimately acquainted with the workings of the office. It was during that period that he made his mark by the skill with which he piloted the so called children's act through the house of commons. Afterward, although he had come to be regarded as a specialist in the problem of child legislation, he showed by the clever manner in which he handled the liquor licensing measure in 1908 that he knew quite as much about beer as about babies.

He was rewarded in the following year with a seat in the cabinet as chancellor of the duchy of Lancaster and twelve months later became postmaster general.



**You Long Cut Users, Get This!**

You get more rattling good smokes and more tasty chews out of a package of LIBERTY than out of the bigger-*looking* packages.

That's because LIBERTY is *all* pure, clean, good *tobacco* — it is *not* full of loose, hard stems that you can't smoke or chew.

Every pipeful of LIBERTY is *cool, slow-burning, fragrant.* And every chew of LIBERTY is *long-lasting* and *full-flavored.*

LIBERTY is the tobacco for *men*—not mollycoddles.

**LIBERTY**

**Long Cut Tobacco**

All the richness, snap and satisfying quality of pure Kentucky leaf are blended evenly through LIBERTY by ageing and mellowing the tobacco from 3 to 5 years.

That's how LIBERTY goes to the right spot, and keeps a hearty man full of vim and good nature.

THE AMERICAN TOBACCO COMPANY

# ANCIENT SEED BRINGS UP A LARGE SQUASH

## Had Been Sealed Up in Room by Cliff Dwellers.

Los Angeles.—Rivaling the discovery of the Aztec bean nearly fifteen years ago, seed has been found in the prehistoric cliff dwellings of Arizona, along the Verde river, that has been planted and has grown into a huge green, extremely warty squash, which has been named the "Aztec." The squash was grown from a seed hundreds—perhaps a thousand—years old and in the Verde country is considered a wonder of the age.

The discovery was made by John G. Allen of Cherry, Ariz., and in a most novel manner. Allen was fishing along one of the tributary creeks of the Verde, and his skill with the rod seemingly failing him, he decided to see if he could not make his trip a profitable one by hunting the ruins for pottery left by some prehistoric tribe.

Making his way into one of the larger rooms of the cliff dwellings he noticed a portion of the wall that appeared as if some time or other it had been closed up. Further investigation proved that he was right, for he easily broke through the wall at this place and discovered a small room or recess which contained pottery, corncobs and about a dozen seeds that resembled ordinary squash seed. The room had been sealed so tightly that not even a mouse could make its way into it.

It was too late to plant the seeds at the time of their discovery last year, so they were not planted until early last spring. Of the twelve seeds but one came up, and the plant from it carried one large squash which weighs twenty-five founds.

## FLIES KNOW DINNER BELL.

**Drummer Told They Stop in Stable Until Summoned.**

Kansas City, Mo.—A salesman who had been working in a small midwestern town wished to catch a train which passed through it about half an hour before noon and asked the village landlord to serve him before the regular dinner hour.

Soon he was admitted to the dining room, where a fairly good meal was spread before him. But flies were so numerous that the landlord had to stand behind his chair and shoo them with a napkin.

"Great Scott," exclaimed the salesman, "I never saw so many flies!"

"Flies!" retorted the landlord scornfully. "Shucks! This ain't nothin'. If you want to see flies just wait till I ring the bell for dinner. They're all out in the stable now."

**Catches Fox With Bare Hands.**

Attica, Ind.—Ren Wood, a Richland township trapper, captured a full grown red fox with his bare hands a few days ago. The fox was feeding among a drove of hogs, where Wood could not shoot at it. Wood then creeped toward it. The noise of the feeding swine prevented the fox hearing his approach until he was near enough to catch it by his flowing brush.

**Children Cry FOR FLETCHER'S CASTORIA**

## SUICIDE CHANGED MIND.

**Taste of Carbolic Acid Showed Smith He Didn't Want to Die.**

Indianapolis.—Edward G. Smith, aged twenty-five, of 652 North Jefferson avenue, decided to commit suicide, but quickly changed his mind after he had tasted a small quantity of carbolic acid.

The customary fateful note, in which he attributed his despondency to a quarrel with his wife, was found in his pocket.

Smith staged his attempt at suicide in a drug store at Illinois and Washington streets. After the clerk had sold him the acid he turned around and held the upturned bottle to his lips. A moment later he gave out a shriek, threw the bottle and remaining bit of acid at the clerk and then fell against the counter. An ambulance took him to the city hospital.

Physicians at the hospital said that Smith's tongue was slightly burned, but that he had not swallowed any of the acid.

## ONE LOOK WAS ENOUGH.

**Farmer Flees When He Sees Bride by Mail Get Off Train.**

Kansas City.—When Timothy Riley, farmer, got one look at his bride to be the romance was "busted." Riley drove his brand new farm wagon up in front of the Union station, hitched the team and then stood guard at the exit door.

He wore a red carnation, by which sign the bride to be was to know him, all the love making having been done by mail. The bride, who was to have come from Nevada, was to wear a Palm Beach suit.

A few moments later a Palm Beach suit, garnished with numerous boxes and bundles, hove in sight. Riley took one look, snatched the carnation from his buttonhole and fled. The bride to be appeared to be fully twenty years older than he, which probably was the excuse for his hasty flight.

**What Held Her.**

Dinah Snow was a colored cook in the home of Smith. One morning on going to the kitchen Mrs. Smith noticed that Dinah looked as if she had been tangled up with a road roller.

"Why, Dinah," exclaimed she, "what in the world has happened to you?"

"Was me husban'," explained Dinah. "He done went an' beat me ag'in, an' jes' fo' nothin' too."

"Again!" cried Mrs. Smith, with increasing wonder. "Is he in the habit of beating you? Why don't you have him arrested?"

"Been thinkin' of it seberal times, missy," was the startling rejoinder of Dinah, "but I hain't nebah had no money to pay his fine."—Exchange.

**"Eating Crow."**

The term "eating crow" comes from an ante-Revolutionary story. A soldier of an English regiment stationed in Virginia shot a pet crow belonging to a farmer. The latter entered a complaint with the colonel, who sentenced the soldier to eat the crow. The farmer was left alone with the soldier to see that he did it. After the soldier had consumed a portion of the bird he took his gun, presented it at the farmer and told him to eat the remainder of the crow or he would shoot him. This was the origin of the eating crow story.

# What is to Become of the Difference Between the Emergency Need and Total Amount of Proposed Bond Issue? "Taxpayer" Wants Information

EDITOR TIMES:

THE PROPOSED NEW BOND ISSUE OF FIFTEEN THOUSAND DOLLARS, WOULD MEET WITH GREATER APPROVAL, PERHAPS, IF THE TAXPAYERS KNEW FOR JUST WHAT PURPOSE.

AS THE EMERGENCY NEED, AT PRESENT, IS ONLY A LITTLE MORE THAN HALF OF THIS, FOR WHAT PURPOSE IS THE REMAINDER TO BE USED?

AGAIN WE ARE TOLD THAT THERE IS A DEFICIT OF NINE OR TEN THOUSAND DOLLARS. THAT THIS DEFICIT, HAS BEEN HANDED FROM ONE ADMINISTRATION TO ANOTHER, IS NO GOOD REASON WHY THE PRESENT ONE, SHOULD NOT LET THE PATIENT TAXPAYER KNOW WHAT HAS BECOME OF THIS MONEY.

THE FACT THAT THE CITY, FROM TIME TO TIME, HAS SPENT HUNDREDS OF DOLLARS HIRING EXPERTS TO EXAMINE THE BOOKS, DOES NOT MEAN THAT IT CANNOT BE FOUND.

A BANK OR OTHER LARGE CORPORATION, WITH BOOKS IN THE SAME CONDITION, WOULD SOON FIND IT. SO CAN OUR NEW MAYOR AND COMMON COUNCIL AND NO DOUBT THEY WILL.

TAX-PAYER.

## Justice Hazel Dismissed Injunction Served Against Morris Plan of Banks

A case has ben decided in the Federal Court which is of interest to persons here who desire to have established a Morris Plan Bank. Thec ase came before Justice Hazel who dismissed the equity injunction and accounting suit brought by the Universal Savings Corporation against the Morris Plan Company of New York. The issue decided was whether the Morris Plan, by which indigent men and women could borrowed small sums of money on the strength of a good name, was the plan of the Universal Savings Corporation, and which claimed it owned the plan. David Stein is the president of the latter concern while Arthur J. Morris is the originator of the Morris plan. Mr. Stein alleged that Mr. Morris knew of the Stein plan back in 1904, and in 1910 started the system that he now claims as his own invention.

On the other hand Mr. Morris claims originality for his scheme and cites that Mr. Stein nor any one in his behalf made any objections when the Morris Plan was instituted and began no action to support their present contention. The two plans are similar in some respects, especially in their object to help borrowers of small sums of money.

In his decision Justice Hazel says:

"The principal question is whether the respective plans of banking under discussion are substantially similar. I think they are fundamentally different. There are of course similar elements embodied in each plan, but the feature of a fixed capital, subscribed by independent investors, present in the Morris Plan, but not in the Stein plan, is of vital importance and makes the former plan appeal more readily to investors than does the Stein plan. By the Stein plan the organizers, subscribe for capital stock and the fund so created is loaned out to the borrowers, the latter at the time of borrowing receiving investment stock convertible into capital stock. Under the Morris plan on the contrary, purchases certificates of investment, or obligations of the company, which are not convertible into capital stock."

The Morris Plan is under the general direction of the Industrial Finance Corporation of New York City, which was organized three years ago to takea minority interest in each of the Morris companies and in general to co-operate with them and help ind irecting their affairs. There are about 16 subsidiary companies. Clark Williams is president of the Industrial Finance Corporation. Arthur J. Morris is vice president and counsel. Among the directors are Charles H. Sabin, Herbert L. Satterlee, Raymond Dupuy, Willard D. Straight and oJseph B. Gilder

### CONTEST WINNER TO GET THE AXE TOMORROW

At Wednesday's meeting of the Modern Woodmen of America, District Superintendent of Schools W. S. Gardner, will make the presentation address to the winner of the prize contest.

The successful worker will receive a beautiful axe, an emblem of the Order.

The Syracuse class adoption thermometer is reported to have risen to 26 degrees in the last 36 hours, a promising indication of its success.

**January to April are the best months to hold an auction sale. Try an auction ad in The Evening Times.**

## Board of Works Hears Standpipe Holds Water; Flusher to Be Repaired

A more economical method of using the improvement and water department funds than has obtained in the past resulted in a lengthy discussion at last night's meeting of the Board of Public Works. Mayor Lewis, City Attorney Hillick, City Engineer Hill and F. H. Rumsey participated, each one offering suggestions. The condition of certain sidewalks, streets, crosswalks, etc., as well as the operation of the standpipe and pumping station were also objects. discussion.

Replying to an inquiry made by Commissioner Wiltsie, Superintendent Rumsey explained in detail the workings of the city's water works. He said that the standpipe is in fact a storage reservoir, whose purpose is to equalize the pressure in the street mains. He repuliated the assertions that the standpipe does notc ontain water, saying that the big tank contains water at all times. As if in defence of aform er statement relative to the absence of pump service when water is needed to subdue fires, the Superintendent told the Board that the sounding of the fire alarm results in the immediate starting up of the pumps, which are ordinarily shut down at midnight. He also stated that not more than three minutes elapse from the time the fire alarm bell is sounded until the pump is working under full head.

It is Mr. Rumsey's desire to have the street sprinkling equipment in good order for spring work. He says the motor on the flusher can not be used; that it has been in service for three years, and has outlived its usefulness. The offer of the Studebaker factory tot ake the machine to its factory, install an up-to-date, four-cylinder motor in place of the two-cylinder affair with which the machine is now equipped, repaint and otherwise place the wagon in first class condition was made known to the board and it was recommended that thep roposition be accepted. The matter was not put to vote, however, but the Board was informed that a new flushing machine would cost in the neighborhood of $1,350.

Inasmuch as one of the sprinkling wagons is in bad repair, and that a nearly new one can be bought for $100, the Board was inclined to listen to Mr. Rumsey's suggestion that a purchase be made. He was delegated to inspect the sprinkler in qestion and report his findings to the Board.

Streets which display deep gulleys and ruts are to receive treatment. The streets mentioned are needing early attention include So. 7th st., leading into the Whitaker road; South Third st., south of Broadway; the walk in Buffalo st., betfeen 2nd and 3rd; the holes made in 4th and other streets adjoining the crosswalks, and the lack of a sidewalk in upper Hannibal st. Crosswalks, it wass tated, serve in one way as nuisances. They are the means of causing holes to be worn in the paving, as automobiles and wagons after passing over them dig holes in the macadam surface of the street.

It cost the city just $23 to remove the dirt from the downtown

### CHARLES J. LINCOLN'S "LITTLE MISS SUSAN"

With the sole idea in mind that there should be no dull moments but plenty of surprises in a performance of "Little Miss Susan," booked for matinee and evening performances, Thursday, February 3, in the Quirk. Charles J. Lincoln staged the play in such a manner as to permit the introduction of several novel specialties. These added features include big time vaudeville acts of the kind which pleases both old and young. One is Loncoln's "Old Home Town Quartette," sweet voiced singers of the ever popular and ever pleasing melodies, brimful of harmony—the kind the old folks love so well and seldom hear in these days of rag time and so called "new songs." Of course, "The Old Home Town Quartette" includes in its reportoire the latest pieces from the leading publishing houses, but they are of secondary consideration.

There is more genuine fun, more enjoyment and more pleasure to be had by sitting through a performance of "Little Miss Susan" than you possibly could find for many times the price of admission. In fact, "Little Miss Susan" is theb ig city show at little prices.

### STATE EDITORIAL COMMENT

Of course, in the face of a tariff con ceived and executed under the identical auspices, and which is admittedly a failure, any proposed "scientific" revision of the tariff at this late day becomes a somewhat grotesque attempt to cover a political retreat. The most scientific revision of the tariff that has ever been made was conducted under the leadership of the late Sereno Elisha Payne, who himself was honest enough to acknowledge, as he did time and again to the writer of this article, that no tariff revision ever would be wholly equitable, whether by a commission instituted for that purpose or by a committee of Congress. But with all the flaws the Payne-Aldrich Tariff Law was the most constructive achievement in American protection that has ever been wrought, and is now widely so acknowledged. —Auburn Advertiser-Journal.

## THE NEW BATTLE CRY

Two men were walking in East First st. last evening immediately after the lights clustered at the tops of the new standards were dispelling the gloom. One of them, a former resident of this city but who is here renewing acquaintances, expressed astonishment at the many changes wrought here and there in spots familiar to him. Like a true son of Fulton he is an intense admirer of the city of his nativity. Said he to his companion: "I would like to come back fifty years after my death to see what a fine city Fulton will be." The companion, with a grim smile, replied: "I believe you would be glad of any excuse to come back."

To those who moved away to different states and who have come back after five or ten years' absence Fulton is an astonishment in its development and improvement. This, by the way, is written with due apologies to the one who reports and points to our slowness, which in the aggregate amounts to as much as twenty-five years, if we are to believe all that is said of us.

The Chamber of Commerce secretary is making a strong pull for a greater Fulton—a city of 20,000 in 1920. It is a good battle cry, but if we want to make worth while a man's return fifty years hence; if we want the strangers who have taken in other places in other states to continue to marvel at the changes here, every one of us must ask of himslf or herself this question: What shall I do to help the Chamber of Commerce in the next three years to make Fulton still greater?

Most of us know that something is holding our city back from taking its rightful place in the front ranks of small American cities. Yet we hesitate to plunge into the big fight. We watch a handful of gravel so closely that we fail to see the hill a quarter of a mile further on. We criticise the "watchful waiting" policy and the unpopularity of its advocates, depending upon the city's natural advantages which some people possess and which other people cannot share, to pull our proposition up above the low level of the old road bed.

The city's progress must be pleasing to the one who has been absent for a long period of time, but that does not offer an argument for taking on an air of complacency and wearing the cloak of indifference. If we are to advance we must dash from the trenches blowing them up as we leave them so that they may be forever inhabitable. Be a joiner today—join in the battle cry: 20,000 by 1920, and remember you may want to come back in fifty years. Give yourself an excuse for wanting to come back.

## THE CONTINENTAL ARMY AND THE FIRST LINE

At a hearing by the Military Committee of the Senate Major-General Hugh L. Scott, Chief of Staff, said, according to a report of the proceedings, that the continental army plan had been approved by the Army War College. General Scott, we are inclined to think, could not have made the assertion without qualifying it. Mr. Garrison's proposal was of "a force of 400,000 men, raised in increments of 133,000 a year, obligated to devote a specified time to training for a period of three years, and then to be on furlough for a period of three years without obligation except to return to the colors in the event of war or the imminence thereof." The training period for each of three years of enlistment Mr. Garrison fixed at two months, admitting in effect, however, that the experts might want to increase it. They certainly would require a longer period if they were permitted to have the last word.

Brigadier-General M. M. Macomb in the "Statement of a Proper Military Policy for the United States," prepared by order of Secretary Garrison, said: "Twelve months intensive training is the minimum that will prepare troops for war service." Secretary Garrison proposed half of that time for the continental army and in instalments of two months a year for three years. This body the Secretary would put into the first line of defence as a re-enforcement of the increased regular army of 141,843, including auxiliaries. "We should have in this country," he said in his annual report, "a force of at least 500,000 men ready for instant reponse to a call in the event of war or the imminence of war." Mr. Garrison had hazily in mind a regular army reserve made up of men who had served with the colors, but he does not seem to have included them in the first line of 500,000 troops ready for instant service in the field.

The "Statement" of the War College Division is very plain on

(Continued on next page,last column)

## Opinions

### ECONOMY THE NEW RAILROAD WATCHWORD

For the year just ended American railroads must be credited with one of the cost colossal feats of efficiency and economy ever recorded. During 1915 the total earnings of the roads are reported to have been $163,000,000 less than for 1914, yet by virtue of astute and careful management operating expenses were reduced by the enormous total of $186,000,000, resulting in an actual net gain in profits.

According to The Railway Age Gazette, more than half the year's extra savings were effected in transportation expenses, being due in part to the scientific loading of trains, using larger cars, putting more freight into each car and running more cars per train. This accomplishment cannot fail to recall the assertion of Louis D. Brandeis, made five years ago, that by scientific management the railroads of the United States might save $1,000,000 a day.—Phila. Telegraph.

### MUDDYING THE TARIFF WATERS

Unbiassed observers at Washington if there are any, will probably see in the democratic "flopping" now so popular at the nation's capital nothing more than an indication of the approach of the impending elections. Democratic leaders have come to realize that they have been on the politically weak side of some rather live issues and are rushing to cover. This explains in a measure the President's conversion to preparedness and his more frankly acknowledged change of mind with respect to a tariff commission.

The "about face" on the commission question is not so much a reversal of tariff belief as it is an effort to find cover for the admitted weaknesses of a much vaunted law. Something must be done to divert attention from tariff facts, so the waters are to be muddied by agitation for a commission. It is politics, nothing else.

Such tariff commission sentiment as there is among business men will not be drawn to the support of the President's proposal. No tariff commission will be acceptable to the American people unless its work is firmly grounded upon the principle of protection for American industry and protection of the American workman in his higher wage scale and his better standard of living.

A Wilson-made tariff commission would not meet these requirements, for the President and his party are opposed to the protective principle.—N. Y. Herald.

### ENTER EMMER

Soon we may be eating emmer for breakfast. Emmer is an ancient grain, supposed to be the ancestor of wheat. It is native to Palestine, where it grows in one of the dryest regions of earth. It has been used for years in Germany, where black bread is made from it.

Emmer is being grown in this country in the non-irrigated districts of the West. Its amazing ability to grow in arid ground, forty to seventy-five bushels to the acre, has won a warm welcome for it from Western farmers and ranchers. In irrigated soil, emmer is said to yield 100 to 110 bushels to the acre.

The original emmer had a shary, thorny beard, which clogged threshing machines and injured the mouths of cattle. But experiments were made and finally a beardless emmer was evolved. It is this variety which promises to become popular in the West, where more than 2,000 acres of it are planted.

Many farmers will not sell emmer, as it is said to be better fodder than oats, and a much heavier producer. Nevertheless, a factory has been erected for the purpose of establishing an emmer breakfast-food industry and before long the ancient grain will be introduced to the East in a modern form.

If emmer does all that is expected of it, it will add materially to the wealth of the country, as it will turn hundreds of acres of non-irrigated waste land into profitable farms. With the population of the country increasing rapidly, and the possibility being that the food problem will one day becomes serious, the introduction of a new grain that produces well on inferior soils is a fortunate thing. Perhaps emmer can be grown in the East on hilly lands which dry out quickly.— Rochester Chronicle and Democrat.

# Congress Should Pass This Agricultural Bill

The last three Administrations have promised a Rural Credits bill or an Agricultural Markets bill, or both. None of these Administrations has done anything.

The two great agricultural measures pending before this Congress are the Agricultural Markets bill and the Rural Credits bill.

Of these two there is more division of sentiment upon the Rural Credits bill, and there will necessarily be more delay in reaching a general conclusion speedily upon this measure.

But so far as sensible men can discover, there is no real fundamental difference anywhere upon the national marketing measure.

And since this is so, why should not the Senate and the House pass this bill and send it to the President for his signature without delay?

This action would mark one certain, definite, sensible step in the midst of a chaos of uncertain, indefinite things in Congress and before the country, and it would give new life and vitality to the farmer.

It would convey to the country the wholesome impression that at least one thing sound and helpful has been done, and it would make at least one sound and inspiring basis for prosperity upon which the country might begin to build.

The farmers' marketing bill is derived from the soundest established systems in other countries; it is a system of co-operation which would do for the farmers what the Chamber of Commerce and Boards of Trade are now doing for commerce and finance.

The farmers' marketing measure is derived from the German Landwirtschaftsrat, just as the soundest measure of rural credits now proposed is from the German Landschaftsrat system. Both of these systems have worked well in Germany and are the basis of that country's great prosperity.

The Landwirtschaftsrat, or German National Marketing system, is as perfectly adaptable to our country as it is to Germany. It should be adopted just as speedily as possible that the country may get to work upon it.

What the Germans call the Landwirtschaftsrat the American Congress would denominate the National Chamber of Agriculture. But the method, the system and the results would be the same.

The object of the National Chamber of Agriculture would be to bring the producer into more immediate contact with the consumer of his product without the absorbing part played by the middlemen.

Under this system it is possible to say definitely that the trust will be eliminated, because under its workings in other countries the trust is eliminated.

There are no agricultural trusts in Germany, however much they may exist in banking or finance.

They have been completely eliminated from agriculture by the body which is equivalent to our proposed National Chamber of Agriculture. The producer receives more for the product of his toil, and the consumer buys the agricultural products at less than he would pay for them otherwise, for the simple reason that the middleman is done away with. The goods are brought from the farmer to the kitchen.

The middlemen, under the proposed national commission, would be but employes of the co-operating farmers.

The National Chamber of Commerce at first would be a national commission appointed by the President, but as soon as it was organized it would automatically react to the thoroughly democratic plan of beginning and working from the bottom to the top.

Its foundations would be in the townships, and when a sufficient number of townships were organized the ywould form the county organization, and a sufficient number of delegates from the county organizations would form the State organization, and a sufficient number of representatives from the State organizations would form the national organization and become the National Chamber of Commerce.

Each individual in the townships would have the full benefit of the information and of the influence of the national chamber in the best and most favorable market for his products.

If he were simply a dealer or producer of prunes his fifty cents admission fee in his township organization would entitle him to

(Continued on Page 3.)

(Continued from Page 2.)

know all that the county and the State and the national organizations knew of the localities in and out of his own country in which prunes were most in demand and at which he could obtain for them the best possible market price.

This system, which is a working reality in a large part of the Old World, will mean very much to the American farmer. It will help to make his business more profitable, and himself better and happier.

Until this problem of profitably marketing farm products is solved, there will be waste, unprofitable labor and high living cost.

Not only does the tremendous sum of six thousand million dollars annually disappear or become absorbed between the farm and the consumer's kitchen, but products of the farmer often go to waste while hungry consumers would gladly pay for these products if there was a way of getting them.

No greater service could be rendered to all the people of this country than by the prompt establishment and effective putting into execution of this National Farmers' Marketing organization.

The American farmer, not nearly so patient as he is supposed to be, and not nearly so indifferent as silence would seem to infer, is asking the question:

"Why does not the Congress of the United States do something, and do it now, to start the revival of sound agricultural prosperity in the United States?"

We put the question to the Democratic majority in the Senate and in the House.

We put the question to the Republican minority in the Senate and in the House.

We appeal to Democrats and Republicans in the Senate and in the House to pass this measure, and to pass it NOW.

Every week of delay is a week of weakness and of distinct obstruction; is an unpatriotic act on the part of the Senate and of the House.

And here is one good thing that can be done—one great, sound, practical piece of statesmanship that ought to be passed within the week.—N. Y. American.

# VILLAGE STREET IMPROVEMENT

## New York State Follows Old Custom For Payments.

## EXPERTS ADVOCATE CHANGE

**Authorities on Taxes Are Against Making Street Improvements at the Expense of the Town and Maintain That the Cost Should Be Assessed Against Adjoining Property.**

Many tax experts have recently called attention to the venerable custom of making street improvements in the villages of New York state at the general expense of the whole village.

On this important question the Real Estate Record of Westchester county has this to say:

"This custom has been freshly assailed in a small folder. Cities charge such valuable property improvements against the parties who benefit thereby, inasmuch as the market value of the premises is immediately raised more than the cost. It is asked, 'Why should the property owner have a great deal of additional value added to his land at the general expense of the community and not pay for it?' It is characterized as taxing one set of village landholders for the benefit of another set. It also increases the general tax of each village so that the taxation looks high and is high compared with cities elsewhere, hurting the sale of real estate thereby.

"The argument also is very properly advanced that since the day of the macadam road is gone and "paved" roads (with brick, asphalt or stone) are the most economical, a village ought not to incur enormous debts for such increased marketability of his land.

"The proper and right way is for the village to assess the total cost against the adjoining property, add to it the interest on a necessary bond issue to cover the same for a period of ten years and then collect one-tenth of this total cost of the improvement from the property adjoining each year. The assessment is thus easily borne by the property owner, and he gets the immediate good from the improvement making his property a great deal more valuable, and he justly bears the expense.

"The village trustees of all villages of the first and second class should be given authority to make these improvements in this way. Now their authority is too great. It enables them to improve one set of persons' property at the expense of another. In other words, the whole village pays for sidewalks and pavements in front of those of the greatest wealth on the best streets and roads and those best able to pay for it."

The following resolution was passed at the fifth annual tax conference held in Albany, Jan. 21, 1915:

Resolved, That the provision of the present law which orders that the cost of street improvement and other special improvements shall be defrayed out of the general funds of the village is antiquated, unjust and tends to retard modern progress in villages. We believe that the law should be amended so as to conform to the practice of first and second class cities in assessing all such street and special improvements upon the abutting property or proximate areas directly benefited, except that when an improvement is of direct benefit to the entire village the cost may be borne in part by the village and in part by the abutting property.

## SAVING SCHOOL CHILDREN.

**Sanitary Measures Now Adopted Throughout the Country.**

Laws requiring sanitary conditions in public school buildings have been enforced in forty-four states of the Union, according to a bulletin on "School Sanitation," just issued by the bureau of education of the United States department of the interior. Progress in this phase of education has been made almost entirely within the last decade. That the change for the better was accomplished so rapidly was due for the most part to the readiness of each state to profit by the example of the others. A law passed in one extreme of the country today is copied within a month or a year by another state, perhaps 2,000 or 3,000 miles away.

In thirty-eight states legal provisions regarding the school site have been established. Nearly all these provisions are state wide in their application and are mandatory in character. Kansas was the first to revolt against the common drinking cup, and since that state started the crusade thirty others have followed. In the matter of cleansing and disinfecting, slightly more than one-fourth of the states have regulations which control the conditions.

The protection of one kind or another is required in thirty-six states. General or special construction designed for fire protection is dealt with in ten states. In ten the necessity for fire alarm systems and fire fighting apparatus is emphasized, and in eleven the law requires there shall be fire drills. Less than half the states, according to the bulletin, have any legal requirements on ventilation.

**Public Improvements at Dallas.**

The city of Dallas, Tex., has asked the federal government for an appropriation of $2,2[illegible],000 for the construction of a combined postoffice and federal building in the city and the erection of a sub-station at the Union Terminal station.

# WARTIME NURSES

## The Great Battle of Mercy Won by Florence Nightingale.

## WORK OF THE GREAT PIONEER.

**She Changed the Military Hospital From a Shambles Into a Life Saving Station and Became the Mother of Modern Nursing Methods.**

Florence Nightingale, whose death occurred in 1911 at the advanced age of ninety, was a revolutionist in the most splendid sense of that term. She it was who revolutionized nursing to that extent that she may be considered as the mother of that profession.

Previous to her entrance into the field the sick were the victims of callous ignorance and grasping indifference, but Florence Nightingale introduced the trained, skilled and gentle hospital nurse, district nurse and military nurse of today.

Certainly to few women—and to few men—has it been given to serve their fellows so splendidly and so effectively. Florence Nightingale found chaos in military hospitals; she created order and all that order implies.

After the battle of Alma, in the Crimean war, the military hospital at Scutari was like a dirty shambles. Wounded men died in hundreds in the midst of squalor and vermin. Crowds of poisonous flies buzzed ceaselessly above the sick; medical supplies were inadequate; proper food could not be had; there were no arrangements for washing or sanitation.

The plight of the wounded soldiers, herded together in this hotbed of pestilence, was worse than if they had been left upon the battlefield. "Are there no devoted women among you," wrote Russell, the famous war correspondent of the London Times, "able and willing to go forth and administer to the sick and suffering soldiers in the east in the hospitals at Scutari? Are none of the daughters of England at this hour of need ready for such a work of mercy?"

This appeal was answered almost instantly. Sidney Herbert was then at the head of the war office, and when the authorities began to be inundated by letters from women of all classes anxious to respond to the call Mr. Herbert's thoughts at once turned to the lady who was in his opinion the one woman capable of organizing and taking out to the Crimea a staff of nurses. The woman was Florence Nightingale.

Miss Nightingale was thirty-four at the time, and from her childhood she had devoted herself to the study of hospital nursing and hospital management. In 1849 she had enrolled herself as a volunteer nurse at the first training school for sick nurses established in modern times—the Deaconess Institution at Kaiserworth, on the Rhine. When the war broke out there was no woman in all England better fitted than Florence Nightingale to give to England's soldiers comfort and relief.

Mr. Herbert wrote to Miss Nightingale and asked her if she would go out and supervise the whole thing. His letter crossed one from her, for on the same day Florence Nightingale had written to the war office offering her services in the hospital at Scutari. The offer showed splendid courage.

Within a week of making her resolve Miss Nightingale had her first contingent of nurses in marching order. She had selected thirty-eight nurses to accompany her, and they arrived at Scutari on the day before the battle of Inkerman. And without a moment's loss of time that lady in chief and her staff set to work to cleanse the Augean stable which they found waiting for them at the great barrack hospital.

In a short time the place was entirely renovated. Everything was scrubbed, old clothes were burned, a kitchen and laundry were established, and the place became a comfortable, well organized hospital. Florence Nightingale superintended everything. She worked as hard at the routine and organizing as at the nursing itself. At all hours of the day and night she would walk silently, lamp in hand, through the wards, giving a word of comfort here or instruction there. She saved the lives literally of hundreds.

Wounded men, so horribly mangled that doctors gave them no hope, and other nurses could not bring themselves to touch them, were saved from death by the tireless care of this one wonderful woman. The men worshiped the very shadow of this "lady with the lamp."

The supreme womanliness of the work of Miss Nightingale made her the idol of the English people. Three monarchs paid their tribute to her. Remembered by royalty she was not forgotten by the people. On her return, shattered in health, from Scutari, $250,000 was presented to her by a grateful nation. She used it all for the founding of the Nightingale Training Home For Nurses at St. Thomas' hospital, England, which is practically the parent of modern training homes throughout the world, just as Florence Nightingale was the mother of all present day nurses.—Cleveland Plain Dealer.

**Spiritual Victory.**

If after victory on the field of battle we fail to win [illegible] to place ideals where they truly should be the heroism of our soldiers will have done no more than postpone our own catastrophe for a few years.—M. Paul Sabatier.

Duty makes us do things well, but love makes us do them beautifully.—Phillips Brooks.

# TO GIVE 6,000 ACRES FOR HOME FOR BOYS

## Kansas Ranchman Working Out a Scheme of Philanthropy.

Topeka, Kan.—John Marriage, owner of the Eagle Canyon ranch in Mullinville, is going to turn his 6,000 acre ranch over to a home for orphan and neglected boys as a training school in farming. Marriage told of his plans in a letter to Governor Capper. He wants the governor to help.

He would make the Kiowa county ranch a big home for boys, where they may go to school, learn to farm, live right and become honest and industrious farmers.

"I have a ranch of 6,000 acres, fully equipped with machinery and stocked with pure bred cattle," the letter said. "It is excellent land, 2,400 acres devoted to farming and 3,600 acres in pasture. For years I have been operating it with hired help, but I want to get different helpers and co-operate with them on a profit sharing plan so they can have a good living and comfortable home here so long as they do right and are satisfied to remain.

"This property never is to be sold, but is to be made into a training home for orphans and neglected boys. There will be three trustees to have the general management of the property and nine co-operators to do the work and live Christian examples. We are nonsectarian, but take the whole Bible as our creed. Each co-operator will be permitted to draw cash each month for his living, also be credited Jan. 1 of each year for a share of the ranch profits. We have good schools and Sunday schools on the ranch. No one who uses liquor, tobacco, vulgarity or profanity will be tolerated."

Just how many boys or what sort of boys are to be taken and under what conditions they are to be permitted to enter the ranch school has not been worked out. Mr. Marriage is consulting other philanthropists.

## CORFU SEIZED WHILE ASLEEP

**Troops, Animals and Supplies Landed From Warships In Night.**

Not a transport was used in the surprise landing of the French on the island of Corfu. Every man, gun, mule, horse, round of ammunition and pound of forage was embarked on French cruisers, which, convoyed by a flotilla of destroyers, left an unnamed port on Jan. 9.

Steaming at nineteen knots they sighted Corfu on the night of Jan. 10. With lights out they crept up the narrow channel between Corfu and the mainland, which had been infested by U boats, and entered Corfu harbor at 2 o'clock in the morning.

Such is the account from the Daily Chronicle's special correspondent at Corfu, who says that the troops were unloaded from four cruisers and rowed ashore while the town slept. The Italian and French consuls acted as guides to a hotel where an alleged German spy was arrested. Only just before the landing did the consuls officially inform the prefect of the disembarkation. The landing of the men and munitions took only five hours.

**Crocodile Hides.**

The demand for their hides in South Africa is met by hatching crocodiles in incubators.

(Continued from Page Two)

the point of the first line of defence: "As the United States should have a mobile force of 500,000 soldiers available at home at the outbreak of war, the army, with the regular reserve, should amount to this strength." Then the "Statement" goes on:

"In addition to the 500,000 fully trained mobile troops mentioned above, at least 500,000 more—a total of 1,000,000 men—should be prepared to take the field immediately on the outbreak of war, and should have had sufficient previous military training to enable them to meet a trained enemy within three months. Twelve months intensive training is the minimum that will prepare troops for war service."

Now it is evident that the War College Division does not consider Secretary Garrison's continental army to be first line troops; in fact, it rates them as partially trained volunteers who must be worked over after war begins to make them fit to face the enemy's regular troops. If Mr. Garrison will double the intensive training period of the continental army the War College Division may consider it eligible for the first line. Comparing his annual report with the "Statement" there is certainly not a meeting of minds as to the character and usefulness of the Federal volunteer forces which he calls the continental army.—N. Y. Sun.

**BELL-ANS**
**Absolutely Removes Indigestion. One package proves it. 25c at all druggists.**

**A White Flour Illusion.**

This is what the surgeon general of the United States public health service has to say about white flour:

"I want to warn you against the craze people in this country have for white flour. The whitest flour is not the best; it is not the purest; it is only the dearest, and when you buy it you buy looks and not nourishment. In order to make it white some of the most nourishing and essential components of the natural wheat have been taken away."—Osteopathic Magazine.

**Good Long Cut Means Good Long Smokes and Long Chews**

That's LIBERTY every time. Just note how *long* a pipeful or a chew of LIBERTY lasts you.

Why? 'Cause LIBERTY is *real* Long Cut tobacco. That makes it slow-burning in a pipe and gives it a chewable body that holds together in a chew.

LIBERTY is *all* pure, clean, good tobacco. *No* loose, hard stems in it—they're all picked out by hand.

**LIBERTY**
**Long Cut Tobacco**

is made from pure Kentucky Long Leaf—no short or broken leaf is used. Ageing up to 5 years puts full-bodied richness and snap into LIBERTY that give sturdy, two-fisted *men* the hearty satisfaction they want.

Stack LIBERTY up against bigger-looking packages—you'll always get *more* good smokes and chews out of a package of LIBERTY. Just try it.

### WANDERLUST NABBED THREE FULTON LADDIES

Because a teacher int he Erie st. school was not conducting the class room routine to suit the individual taste of one of its members. and with the inducing allurement of balmy weather to encourage a trip towards the "big city thef amous trio of juveniles, Ted McEwen, Tom Loudin and Harry Wilson left last Friday for a week-end trip, which as has been the case in the past, terminated with the return of the youngsters to their parents sadder and wiser (?) by their experience.

So far as could be learned from their tales, they underwent the same experience as on previous excursions with theo ne exception, that they voluntarily appeared at the Detention Home in Syracuse and applied for reinstatement in the home environment. Temporarily, the chapter closes with the return of the boys today via the usual route and stopping off place, namely, the private office of Chief of Police Dyer. McEwen wasl ast week taken off from a train at Richland. He was found by an employee of the railroad secreted behind the tender of the engine.

## BOARD OF WORKS HEARS STANDPIPE HOLDS WATER

(Continued from Page One)

streets last week by means of a scraper, the board was advised.

As usual a discussion arose relative to the lack of funds to carry on city work, City Enginer Hill making a suggestion that if the city were to make an appropriation of $20,000 yearly toward improvements much more could be gained than by making a lump appropriation of $10,000 in one year and little or practically no appropriation in subsequent years, during which time many of the improvements deteriorate because of a lack of funds to keep the places in proper condition.

## LEAGUERS WILL MEET IN MINETTO

### Bishop Burt Heads the Officers of Ontario District—Addresses and "Get Acquainted Hours" Important

Minetto's population is actively preparing for the district convention of the Epworth Leagues of Ontario district Northern New York M. E. Conference, which will be held there on February 11 and 12.

The district officers are the Rt. Rev. William Burt, D. D., LL. D., Buffalo, resident bishop; the Rev. C. E. Miller, D. D., Rome, district superintendent; the Rev. Spencer Bacon Owens, Sandy Creek, president; the Rev. Ernest C. Love of Central Square; and Leland T. Carner of Fulton, the Rev. T. J. Williams of Mount Pleasant and Miss S. Mildred Blount of Lacona, first, second, third and fourth vice-presidents, respectively; Miss Olive Richards, Pulaski; superintendent Junior League; Mattison W. Hollister of this city, secretary an dtreasurer; Leland T. Carner of Fulton, registrar of the institute.

#### A Crispy Program

The Friday afternoon session will open at 2 o'clock, with the Rev. Mr. Owens presiding. Devotions will be led by the Rev. G. J. McKnight of Mannsville, and will be followed by a symposium entitled. "The Epworth League—God's Force for Righteousness." The following subtopics will be discussed: In Child-Life—the Juniors, the Rev. C. F. Miller, Mexico; in the Life of the Youth, the Rev. Adelbert Warren, Verona; In the Life of the oCmmunity, the Rev. T. J. Wiliams, Mount Pleasant; In the Life of the World, the Rev. S. H. Stokes, Orwell A business sesion will follow, at which committees will be appointed. "Getting Acquainted" will be the next number of the program, with a half-hour of good fellowship, and then, luncheon will be served to the delegates.

The Friday evening session will open at 7:45 o'clock, with a praise service in charge of the Minetto choir and devotions led by thed istrict superintendent. The lecture by the Rev. Jabez Stallwood, pastor of First church, Oswego, wil conclude the evening program. The lecture is entitled, "If the Truth Were nKown." and will be very inspiring. A silver offering will be taken for the benefit of the institute fund.

Saturday morning's session will begin at 8:30 o'clock. The program follows: "The Morning Watch", a service featured by a clinic in league efficiency, led by the Rev. E. C. Love; business session will roll c ll of chapters, and one minute reports from each, reports of district officers, reports of committees and miscelalneous Folks—Epworth League uPblicity," the Rev. R. E. Thomas of Fernwood, "The Way to Do it—Solving the Devotional Meeting Problem," an ideal devotional meeting, conducted by the Oswego Trinity chapter; business session with election of officers, followed immediately by an installation service conducted by thed istrict superintendent, as follows: Hymn No. 399, Lord's Prayer in unison, responsive reading from page 9 of the Psalter, address by the district superintendent, charge to the officers, and hymn No. 388.

The installation service will be followed by an address, "Vision and Service—a Commencement Consecration," by the Rev. E. H. Scott of Rome,a nd a consecration and life-decision service conducted by the district president.

Friday night the delegates from a distance will be the guests of Leaguers in Oswego and Minetto. Over two hundred will be in attendance, Every Epworthian in Ontario district is an ex-officio member of the convention. Each chapter will name two delegates to attend and later render an official report.

### MRS. EMERICK HOSTESS AT CLUB MEETING

The Current Events Club met last night at the home of Mr. and Mrs. L. W. Emerick in Rochester street.

Mr. Thomas Hunter gave a most able talk on Currency, ancient and modern. He showed that currency in its infancy was symoblized by live stock. Later various implements such or grindstones, axes, knives, and even sticks with notches cut in them meant currency. The various pieces of money ofg old and silver -coined in the country's earliest days were shown and the designs commented on. Pieces of money from foreign countriesw ere also shown.

Mr. J. E. Lannigan discussed foreign current events and brought out some highly interesting points relative to conditions as developed in the countries at war. The financial situation of the countries involved and its possible evolution was discussed.

In thed omestic current events the main points cited involved the development of a purely American music and art thru thec ountry's present enforced dependence upon its own genious.

The country-wide movement being fostered by the American Dramatic Leagues for the celebration of the Shakespearean tercentenary anniversary in May also received comment.

The next meeting of the club will be held with Rev. and Mrs. H. D. Holmes.

### PARISH AID TO GIVE AN ENTERTAINMENT

A feast of music, to be accompanied by progressive card playing, will be presented for the entertainment of the public in general by the ladies of the Parish Aid Society of All Saints' Episcopal church, at Grange hall, Thursday evening, February 3, at 8 p. m. A large attendance is looked for as it is to swell the building fund as much as possible.

The program follows: Piano solo, Mrs. Schlappi; reading, Miss Dutcher of Phoenix; vocal solo, Mrs. Georgette Schaffer of Syracuse; violin solo, Mrs. L. R. Owens; reading, Miss Dutcher; vocal solo, Mrs. Schaffer.

### NEWSPAPER OF CARICATURE TO MAKE APPEARANCE

"The Lobster," a weekly newspaper of four pages, in style similar to"The Oyster," an Oswego publication with a circulation of 1,000, will make its appearance here on Saturday, Feb. 12th. Mr. C. F. McDonald, son of M. J. McDonald, of the "New York Shop" is the editor of the paper.

Mr. McDonald, will present in humorous fashion notes about people who figure prominently in this city's life; members of thep olice and fire departments, city officials and business men, will be included in the observations.

### BARBERS' UNION MAY RESULT FROM A SOCIETY

A get-together meting of all the city's barbers will be held in the Clark House after business hours on Saturday evening. Messrs. George Walker and H. A. Zuck are instrumental in the movement to consolidate the members of the craft. A dance will be held in the near future the receipts from which will be applied to a summer picnic excursion. It is one of the probabilities that a barbers' union will be organized from the nucleus afforded by the new society.

### MISSIONARY TEA TO BE HELD TOMORROW

The Women's Home Missionary society of the Presbyterian church will meet in the church parlors tomorrow afternoon. Tea will be served by Mrs. Gillespie's committee at 6:15 o'clock.

TOMORROW—*Sacrifice Sale of*

HOUSE DRESSES

In light and medium colors, attractive patterns and style. Of best grade ginghams, percales and velvet cloth. Sizes 16, 34, 36, 38, 40, 42, 44, 46, 48 and 50. Values to $1.00 and more. Your Choice Tomorrow morning at 9 o'clock, only ........ 59c

THURSDAY'S SALES

### WEATHER FORECAST

Fair tonight with the exception of probable snow fluries near the lake; colder withf reah winds.

### FULTON MILK PRODUCERS MET AT CHAMBER ROOMS

Seventy-five members of the Fulton Milk Producers' Association, representing the majority of the shares heldi n the organization, held an overflowing meeting in the Chamber of Commerce rooms this afternoon. Every available foot of space was occupied by them en some, of whom came many miles to vote for the officers who are elected today, as well as a number of milk producers from the outlying districts of the city who will decide whether or not the milk station, in the past operated by the Standard Milk company, is to be reopened.

Mr. Sturgis, of New York, for twenty years connected with the State Board of Health,a ddressed the assemblage on behalf of the milk com pany with which he is now located and who desire to purchase the milk which willb e brought to the station. W. J. Peach, of Pulaski, also talked to the gathering. Mr. Peach will operate thes tation here if it is decided to reopent the place.

### AMERICAN MECHANIICS ENJOYED THEMSELVES

The reception given by the Ader of United American Mechanics, in honor of thel adies, proved as uccessful event. In addition to thed ancing a fine musical program was offered. Card playing engaged the attention of non-dancers and those who perferred to forego tripping thel ight fantastic toe.

Congratulations are being extended the committeemen in charge, who were: Messrs. W. Tallman, Herbert Guyer, and A. H. Parke.

### FINISHING TOUCHES BY BURNT CORK ARTISTS

Thec ast in the Elks' Minstrel troupe held a final rehearsal of the first act last night in preparation for the benefit performance tomorrow. Tonight thefi nal rehearsal of the circus feature will take place.

The committee appointed to conduct the Charity ball which is to be given in the Elks' home the latter part of this month met last night and decided to place tickets for that event on sale immediately.

### LOCAL SPORTIING NOTES

Before a fair-sized crowd of friends twob asketball quintets,t he State st. and Baptist Scouts, staged an interesting fray on the City Hall Court last night. The State st. boys were victorious, winning theg ame by a score of 21-17.

• • •

The Onyx A. C. and Nondescript teams failed tom ake their appearance fora scheduled match at the Onyx alleys which was to be bowled last night and the future of the City Bowling league, which up until the past week was considered to be operating successfully, appear to have a gloomy aspect.

• • •

The Fulton pool team, which is playing a series of games with the All-Oswego experts, increased their lead to am argino f .4 points last night when Simineau and W. Walsh of this city were victorious and by remarkably good shooting reached the fifty mark, the objective point, with their opponents close on their hels. Morris, of Oswego had 48 points to his credit when Simineau secured the required 50, while Guzzo, admittedly the best pool player in Oswego countyw as able to secure only 40 points. The present standing is 468-426, with Fulton in the lead.

# RELIEF FOR NEW YORK CITY

## Brown Committee Will Make Important Recommendations to Legislature.

## TO SHARE CERTAIN TAXES.

**Unbusinesslike Methods to Be Discontinued — Committee's Attitude Throughout Has Been Helpful Bankers and Business Men Co-operate With It.**

New York.—Four-fifths of all the mandatory legislation complained of by the New York city administration as responsible for the administration's present financial difficulties was enacted in 1911 and 1913, when the legislature was Democratic in both branches and the majorities in both houses dominated by city members.

New York city has gone on taxing real estate until some relief is absolutely necessary.

New York city has not shared in the distribution of the highway funds.

New York city has been paying the entire cost of the First division public service commission.

Mayor Mitchel strenuously objects to having the pay of schoolteachers in the city schools fixed by law instead of being left to the board of estimate and apportionment. President Church ill of the school board is just as strongly opposed to having teachers' salaries fixed by the board of estimate.

The city administration urges that the city should be relieved of a direct state tax. (The direct state tax paid by the city this year amounts to 6 per cent of the city's budget.)

These points have been brought out at the hearings given by the joint legislative committee that has been investigating the financial condition of the New York city administration with a view to giving relief.

**Relief Measures to Be Recommended.**

The committee has closed its hearings, and its report is expected to reach the legislature within a week.

A number of relief measures will be recommended.

The committee will recommend that one-half of the automobile tax will be given to all counties to be used for the maintenance of roads. This will permit New York city through its five counties to share in this tax, which at present goes entirely to the state. All other counties will also share.

The mortgage tax and the excise tax are shared by the state with the counties, but the temporary addition of 25 per cent to the excise tax under the law goes entirely to the state. The committee is likely to recommend that this be shared like the rest of the excise tax.

The committee also is likely to recommend the abolition of the direct state tax and the payment of the regulatory cost of the First division public service commission by the state.

The committee is in favor of having the state take over Hunter college and run it as a state normal college, thereby relieving the city of the cost.

The question of teachers' salaries probably will be left to the determination of New York city voters.

Members of the committee are of the opinion that the city administration can find a large measure of relief through the exercise of its right of license in the matter of signs, street encroachment and many other privileges. It is estimated the city's revenues can thus be increased $6,500,000.

**Reduce the Tax Levy $30,000,000.**

A summing up of the various relief measures now under consideration by the committee shows a total relief to the taxpayers of New York city, through the reduction of the tax levy, of $30,000,000.

The members of the committee are not at all sure that all has been done by the New York city administration in the way of economy that can be done, but it has undertaken to remedy every legitimate complaint that the city appears to have against the rest of the state. Bankers and business men who appeared before the committee have co-operated heartily, and their assistance has beer of the greatest value. The city's practice of borrowing money in anticipation of the tax levy which added an interest burden of between $3,500,000 and $4,000,000 a year was objected to by Chairman Brown as unbusinesslike, and this objection was supported by leading bankers, who also said that the city was carrying too large a floating indebtedness. This practice will be stopped, and the city's floating indebtedness reduced.

**No Issue Between City and State.**

The testimony taken by the committee showed wider differences of opinion within the city than between the city and up state. The committee's attitude throughout has been helpful and conciliatory, and the disposition was plainly manifested by the up state legislators that the legislature should and would relieve any irritation between the state and its greatest city. The testimony shows partisan claims to be without foundation.

To make up any loss in revenue which the state will sustain through the division of certain taxes the committee will recommend the re-enactment of the law taxing nonresident inheritances, as was done prior to 1911, which will yield about $5,000,000 a year.

**PROGRESS.**

The only conceivable way in which there can be a permanent advance in civilization is by improvements in the condition of labor—greater rewards, shorter hours, better education and, in general, a healthier, happier life.

## NO NEED OF COMPULSION.

**American Workmen Will Aid Their Country Without Conscription.**

The European war has taught this one fact—that people will fight for their country, whether that country stands as the embodiment of militarism and domination or whether it typifies and is the standard bearer of justice and democracy, says Samuel Gompers.

In Germany, Russia, France, Austria and Italy compulsory military service obtains. Great Britain has thus far relied upon voluntary military service and now proposes to press through parliament a species of compulsory service.

I entertained the hope Britain might have avoided this step, that the appeal for volunteers would have satisfied all that the country might ask. Though I am quite removed from the direct sources of information, a still greater concentrated effort in that direction would, in my opinion, prove effective.

For us in the United States to attempt, however, to sit in judgment upon either the governmental proposition or the trade union meeting declaration against conscription is not only purely academic on our part, but of questionable propriety, as well as a lack of good judgment, particularly if we entertain the hope to be of service later in the interest of peace.

It is easy for us so far removed from the field of action to assume the position of critics of either the one or the other proposition. The working people of Great Britain will do their duty, and there are no better representatives of the great masses of the people of Britain than are the trade unionists.

As to what position American organized labor would take in the event of our country's need must remain unquestioned. Their history of patriotic devotion in the struggle for the maintenance of the union and for the abolition of human slavery and during the Spanish-American war attests the loyalty and self sacrifices of America's workers.

Should the time ever come—and I pray that it may not—the toilers in our republic will give a good and honorable account of themselves, and this, too, without conscription, without compulsory military service.

## FAVORS TRADE UNIONS.

**Low Calls Employers Who Don't Recognize A. F. of L. Shortsighted.**

Seth Low, who is chairman of President Wilson's coal commission, in a recent address at Denver said that the employer who failed to recognize the American Federation of Labor was shortsighted as to his own interests.

The tendency to combine is universal. It does not affect employers only nor employees only. It affects everybody, and each combines according to his own capacity and for his own aims. The combinations of labor are just as natural, just as inevitable, as the combinations of capital, and you will find that each kind of combination has been guilty of the same faults.

I want you to appreciate the difference in the aim between the American Federation of Labor, the Socialist party and the Industrial Workers of the World. The American Federation of Labor believes in the present organization of society. It accepts the institution of private property as the natural evolution of ages. The Socialists have a different aim. They do not believe in the right of private property, except as to personal belongings. They believe the state should own every instrumentality of production and transportation for the use of all. As a party they do not favor the use of violence.

I want you to understand that the great body of the American Federation of Labor is nonsocialistic, and I think that the manufacturer or business man who declines to treat with the American Federation of Labor in trying to develop working agreements is a very shortsighted man.

The Industrial Workers of the World proposition is that labor creates all values and therefore that no man, no capitalist, is entitled to anything be owns, and they wish to see labor take its property. They look forward to a time when labor will own everything, when there will be no capitalists whatever.

## LABOR BRIEFS.

The Brotherhood of Railway Clerks has a membership of 4,630.

Carpenter and Joiners paid death benefits amounting to $34,088 during December.

Strikers have been enjoined against interfering with the operation of the Wilkesbarre railway

There are 10,000 members of the Ladies' Garment Workers union in Philadelphia, 95 per cent being women and girls.

Through arbitration the girls in the Herzog factory, Chicago, have received an increase in wages on garments from 10 to 40 per cent.

The payroll of the United States Steel corporation last year approximated $200,000,000. In 1914 it was $162,000,000 and in 1913 $207,000,000.

Francis Golden and Jess Willingham in "SPRING MAID," to be sung at The Quirk Theatre next Tuesday.

## COMMISSION GOVERNMENT.

**Now In Use In Eighty-one Cities of the Country.**

The commission form of government is in effect in eighty-one of the 204 cities of the country of over 30,000 inhabitants. Civil service regulations are applied to the appointment of policemen in 122 such cities, including all those of more than 300,000 inhabitants.

Policewomen are employed in twenty-six cities. Municipal prohibition prevails in fifteen cities, state prohibition in seventeen and county and parish prohibition in three. In fifteen cities certain saloons are licensed to sell malt liquors only.

These are a few of the facts in a report issued by the bureau of the census.

The commission cities are scattered throughout twenty-six states, in addition to the District of Columbia. Five of them are in New England, twenty-seven in other northern states east of the Mississippi, sixteen in northern states between the Mississippi and the Pacific coast states, nine in the Pacific coast states and twenty-four in the south.

The largest city operating under the commission form has been New Orleans, whose population is estimated at about 365,000, but Buffalo, with a population of about 400,000, inaugurated this system with the beginning of the new year. Next in order are Washington, D. C., with nearly 350,000 inhabitants; Portland, Ore., with about 260,000, and Denver, with about 250,000.

The salaries paid municipal commissioners range from $500 a year in Jackson, Mich., and Springfield, O., to $7,660 a year in Birmingham, Ala., and their terms of office vary from one to four years.

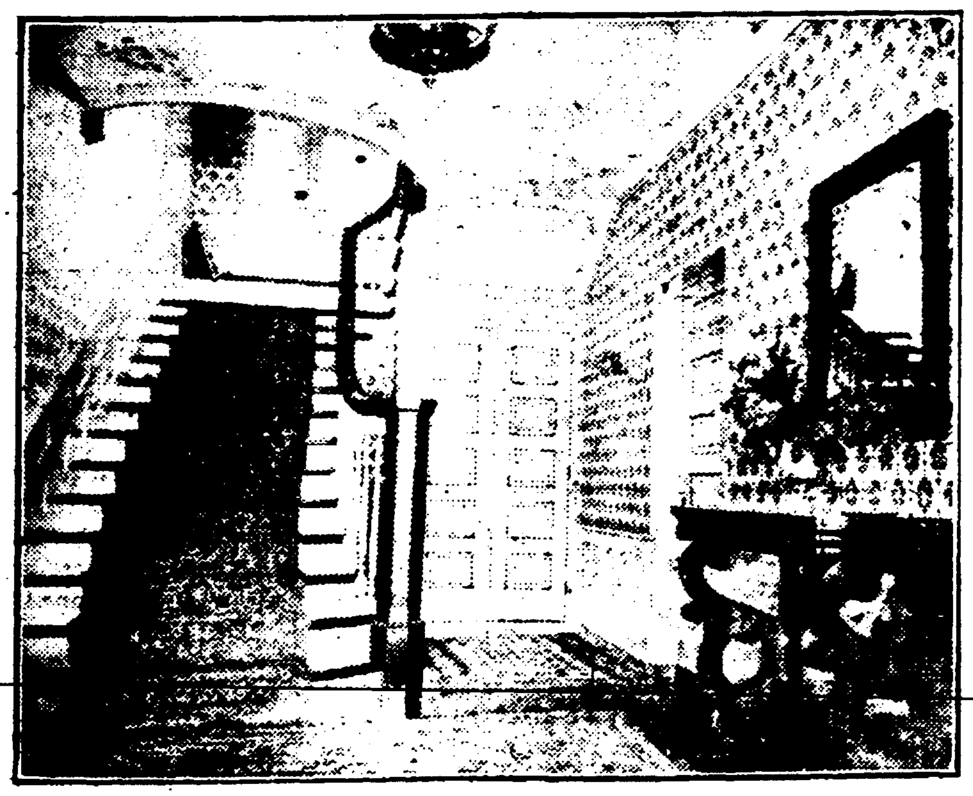
**The Ruling Passion.**

It is related of a certain German savant, to show how strong the ruling passion is in death, that as he was dying he exclaimed in French, in which language he was deeply learned, "Je meurs" (I die). Pretty soon he opened his eyes before passing away and added, "Man kann auch sagen, Je me meurs!" (One can also in French use the reflexive form of the verb "to die.") His last flicker of interest was in the word more than in the fact of death

# COLONIAL DOOR AND STAIRWAY.

**Design 33, by Glenn L. Saxton, Architect, Minneapolis, Minn.**

PERSPECTIVE VIEW. FROM A PHOTOGRAPH



INTERIOR VIEW, COLONIAL STAIRWAY.

This Colonial stairway can only be used in a Colonial design on the exterior. It can be made very attractive by using a combination of mahogany and ivory white. The newel hand rail and treads of mahogany. The risers and balusters of ivory white In the hall the architect advises antique mahogany furniture. This residence can either be of framework or brick veneer as shown on the exterior view Cost to build with brick veneer, according to the size, inside of $10,000.

Upon receipt of $1 the publisher of this paper will furnish a copy of Saxton's book of plans, "American Dwellings." It contains over 300 designs costing from $1,000 to $6,000; also a book of interiors, $1 per copy

## COLISEUM FOR NEW YORK.

**A Monster Building to Eclipse the Madison Square Garden.**

A new and greater Madison Square Garden, the second largest structure of its kind in the world, is to go up within a block of New York's theatrical district.

Chicago capitalists have obtained an option on the Eighth avenue block between Forty-ninth and Fiftieth streets now covered by a car barn. The building will be known as the Coliseum and will be constructed primarily for the accommodation of the huge Panama canal model which has been on exhibition on the Zone at the San Francisco fair.

When arranged for the accommodation of circuses and similar shows the seating capacity of the Coliseum will be about 15,000. This is about three times that of Madison Square Garden

With the Coliseum at its command New York will be able for the first time in its history to compete for national political conventions. When the arena or central floor space is used, as will be the case with large meetings, the capacity will be between 25,000 and 30,000.

It is intended to keep the canal model at the Coliseum for about two years At the end of that time the building will be remodeled and made the big show place of the city.—New York Tribune.

**A Picture of the Belgian King.**

The king of the Belgians is not at all what the public imagines him to be He is not in any sense a dashing soldier, nor does he ever look like one He is a quiet young man who might pass for an Oxford don or a student of science. He has very fair hair, which never responds to the brush, but is always untidy in a rather pleasing manner, and a light complexion which becomes entirely pink when he is hot or shy. He is nearsighted and generally wears glasses, which give a certain staring effect to his blue eyes. His jaw is heavy and suggests tenacity, but his face is lightened by the frank and boyish eyes and noble forehead. He is tall and rather heavily built.—Delineator.

**Astronomical Discoveries.**

The particular universe of stars in which we dwell is half again as large in scale as the world has been supposing. Our own sun is still youthful and keeps travelling northwardly through space at the comparatively leisurely pace of twelve miles per second, or only two-thirds the average speed of stars of its own class. The north star is not really a single star, but triple, consisting of three suns revolving about a common center. These are some of the recent discoveries of the Lick observatory, the famous graduate astronomical department of the University of California.

**Swat the Fly.**

"Now's the time to do a lot of your next summer's fly swatting," says Edward J. Hatch, chairman of the American fly fighting committee. "Don't think a fly is dead because he is lying around stiff with cold," says Mr. Hatch. "He is just playing 'possum and will revive and retire to his hiding place as soon as he is warm. Swat him, or, better still, if there are a number of them sweep them up and consign them to the furnace or kitchen stove. Make it hot for them now or they will turn the trick next summer."

**Two Busy Corners.**

A recent traffic count shows New York city's busiest corner to be Park row and Frankfort street, where for twenty-five days an average of 296,200 pedestrians and 6,700 vehicles passed daily between 8:20 a. m. and 6:30 p. m. Fifth avenue and Forty-second street averaged 113,780 pedestrians and 18,800 vehicles.—New York Sun.

**Too Cold For Icelanders.**

An Icelander visiting in Utah recently stated that probably a third of his countrymen had come to this country, most of them settling in Washington, and ended with the startling statement that "they seek a milder climate, more like Iceland—the east and central states are too cold for them."

**PRACTICAL HEALTH HINT.**

**Chilblains.**

With the advent of cold weather many persons complain of painful, burning, swelling and itching in the fingers and toes which had at some time, probably a year or more ago, been frostbitten. The annoying and painful trouble is frequently obstinate to treat. Simple measures often are effective, however. After the condition has appeared, practice keeping the parts warm, but not by directly applying heat (as from the fire), but by improving the circulation of the blood in the fingers or toes. This can be accomplished by plunging the parts in cold water for a few seconds and drying them and rubbing them thoroughly. Many persons are more troubled by the chilblains at night [illegible] kept awake by the discomfort [illegible] is a common complaint. [illegible] this affection at [illegible] grease well rubbed [illegible] feet or hands or whenever the burning and itching are [illegible] great relief. It is best to sit before the fire when rubbing in the goose grease. If this simple home treatment does not give permanent relief it is then time to go to a physician for electrical treatment.

**BELL-ANS**
Absolutely Removes Indigestion. One package proves it. 25c at all druggists.

# PURPOSES OF LABOR MOVEMENT

## Places Greatest Emphasis Upon Fundamental Things.

## SEEKS HUMAN BETTERMENT.

**Shorter Workday, Higher Wages and Improved Conditions of Toil All Problems That Confront the Wage Earner — A Voluntary Organization Based Upon Democratic Principles.**

The recent sessions of the American Federation of Labor convention at San Francisco were ample exemplification of the fact that the labor movement places the greatest emphasis upon fundamental things. The men of organized labor are not wanting in idealism, but they realize that ideals are useless without the means of making them effective. They know that conceptions of the higher development and the higher destiny of men and women are of no avail without the means and the opportunity to realize them. This explains the intenseness and the feeling that accompany discussions of the trade problems in America's labor congress.

These problems are intimately associated with daily life during seven days of the week and fifty-two weeks of the year. The shorter workday, better wages, better conditions of work, mean to the workers opportunities for better living and more living for themselves and their children and their children's children. The conditions that must be met in the industrial world are not of their own choosing, and often the methods that are used to meet and better these conditions are imposed by those in control in the industries.

Since the labor movement of America is a voluntary organization it must necessarily be based upon democratic principles. The voluntary element dominates the deliberations of the convention and the organization and policies of the movement.

In all the world there is nothing more democratic in conception and operation than the conventions of the A. F. of L. With the advantages and with the opportunities of democracy go also the mistakes incident to democracy. Democracy affords human nature the greatest opportunity for development—for development of selfish as well as altruistic characteristics. That the trade union movement, made up of men and women from every country of the world, who have brought here the traditions and the standards of other countries, has been able to weld out of this diverse cosmopolitan mass of workers an organization that expresses co-operation and unity, idealism and practical effectiveness, speaks volumes for the principles upon which the trade union movement is founded and for the practical effectiveness of the policies that it employs.

The representatives on the floor of this labor congress were a practical proof of what the movement has accomplished. They were men and women of ability and educated by the industrial life, trained by contact with human nature, and they were unerring in deciding all issues upon principles mindful of the voluntary nature of the organization and upon the welfare of the workers. With unfailing sagacity they rejected all proposals that would hamper the movement by compulsion or by division. They maintained the position of the unity of the interest of the workers and that loyalty to the cause of humanity demanded that all workers remain within the labor movement and endeavor to solve their difficulties and problems as members of the common organization.

The labor movement is engaged in a mass struggle. Incidentally there may be roughness, but the roughness is that of common humanity, and humanity is big enough to see beyond the roughness into the idealism that is the directing purpose.—American Federationist.

**Asks Propaganda Inquiry.**

An investigation by a select house committee of Labor's National Peace council and other organizations is demanded in a resolution introduced in congress by Representative Walter I. Hensley of Missouri, a "small navy" member of the committee on naval affairs. The council has been in the limelight recently because of indictments returned against certain persons connected with it by the federal grand jury in New York. Representative Buchanan, ex-president of the organization, which seeks an embargo on the shipment of war munitions to Europe, was among those indicted

**More Pay For Cotton Workers.**

New Year announcements of an increase in wages were received by the 20,000 employees of the Amoskeag and Stark cotton mills, Manchester, N. H., directors of the two corporations having voted for the increase in line with the action of various other New England mills. The amount of the advance was not stated, but will probably be about 5 per cent.

The Kline-Wood Drug Co.

## We Don't Sell---

as much Dental Floss, as we do any one of the well known Tooth Pastes. We carry it, too—

We dispose of a lot of Tooth Paste, powder and liquid, in the course of a year, but the sales of Dental Floss fall woefully short.

It is as essential to perfect teeth as a Tooth Brush. For cleaniness you use your Tooth Brush—for preservation of your teeth you should use Dental Floss after every meal. Ask your dentist about it.

We have Dental Floss in sizes from 10c up.

**Utica Convention Ends After Election of Officers---Sentiment For Temperance Strong on Both Sides.**

The Christian Endeavor convention, which was opened Friday evening, was brought to a close in the Tabernacle Baptist Church, Utica on Sunday. The sessions were fruitful of suggestions andn many excellent and inspiring speeches werem ade.

The meetings Sunday began with one at sunrise. It was led by Mrs. Florence P. Bussert of Kalida, O. In the forenoon John R. Clements of Binghamton, president of the State Christian Endeavor Union, spoke at the Tabernacle church service. R. A. Walker of Indianapolis, field secretary of the Indiana Christian Endeavor Union gave an address in Plymouth church and Mrs. Bussert spoke at the First Moravian church.

Delegates from eight counties were present at the convention. The convention included the societies in the fifth district, composed of Lewis, Jefferson, Oswego, Onondaga, Oneida, Herkimer, Madison and Chenango counties.

Wayne Wilmarth of Albany, director of the New York State Christian Endeavor Union president and the singing was led by the Rev. M. G. Buck of Fulton, The first address was by Mrs. Florence P. Bussert of Kalida, O., who [illegible] was "The Prayer Meeting and IIts Topic." Mrs. Bussert is missionary superintendent of the Ohio Christian Endeavor Union and speaks with a readiness that indicates wide experience in religious work.

Harold A. Waite of Syracuse, spok of "Committees and their activities," laying emphasis on the importance of keeping financial records in proper shaps. The endeavor must have knowledge, he said, if he is to be efficient and successful. The need of adapting personal fitness to certain tasks wasm entioned and it is said that many societies had suffered greatly becauce of blunders in placing members on the wrong committees. Mr. Waite is fieild secretary for New York State and speaks with speed and fluency. He declared that, if card playing and dancing are taken away from young people, something else must be given them to take the place of those amusements. Social affairs must be free, he said. Advantage never should be taken of the social desires of young people in order to raise money.

**Condemned Methods**

"Mr. Waite laid great stress upon the importance of mission study and condemned the haphazard style of endeavor meetings. The members were urged to enroll the last young man and woman in each community.' A yell for Mr. Waite was given by a number of young men from Syracuse at the close of the address and the congregation sang "Brighten the Corner."

"Miss Edith Armitage of Auburn, spoke of the 'Junior Workers' Conference.' She said the public schools do not furnish religious training. The children may learn about the lives of great men, but nothing about the life of Jesus Christ. The average boy or girl get not more than an hour a week of Bible study. Miss Armitage pleaded that boys and girls should be taught to play and take an interest in missions. Them ost important work of thec hurch is among the boys and girls, she said.

The next address was by Mrs. Florence P. Bussert, whose topic was "The Missionary Policy of the Christian Endeavor Society." She is a rapid speaker and poured out a flood of inspriiing suggestions. The work of Missionary committees was analyzed and their weak spots were pointed out. Definite aims are essential. Mrs. Bussert urged the members to obtain portraits and biographical sketches of missionaries as a means of gettingacqu ainted with them.

**Deplored Bad Examples**

The congregation sang "We'll Rout John Barleycorn," and Miss Mary E. Tozer of Brookton, was called to the platform. She represents the young people's branch of the W. C. T. U. of New York. She said the annual net earnings of the railroads would not pay our liquor bill for 60 days. Miss Tozer told of a manufacturing concern thath ad lately given notice to its men that one found drinking before working hours would be discharged instantly and that total abstainers would be given the preference.

"Alcohol is about as good as a food as gunpowder is as a fuel. The speaker expressed the opinion that it is not enough to teach boys in school the evil effects of liquor and tobacco. They see others smoke or drink with little apparent injury and it shakes their faith in the lessons taught them.

They the urged by their companions to smoke or dring and taunted if they refuse. Miss Tozer suggested that children should be taught that it requires courage of the highest type to resist tempation.

The manifold attractions of the saloon were mentioned and the speaker urged that the churches must complete with them on the same plane by offering attractive resorts."

She asserted that the vote in the hands of women would be a weapon against thes aloon and this remark was applauded.

# OBJECTIONS ARE FILED TO WILL

Miss Catherine O'Melia, neice of the late Bridget Gibbons, has filed objections to the will of her aunt. The contest will come before the March term of Supreme Court.

Miss Gibbons left an estate, variously estimated at from $30,000 to $40,000, the residue under her will going to her executor Edward L. Moore of Syracuse, for distribution to charities. About $7,000 was disposed of by specific bequests.

An order was entered yesterday transferring the case to the Supreme Court.

Similar actionwas taken last week when objections were filed by several other nieces and nephews. They were cut off with bequests of $100 each in the will. An order was also entered this morning directing the service of notice of contest to Mrs. George Baynes, Rome; Nora O'Connor, Syracuse; Rosanna Suen of Syracuse; Sister Albert Poseph, Binghamton; St. Mary's Maternity Hospital, Syracuse; St. Francis' Home, Oswego; the Rev. John L. Lindsman, Fulton.

Other cases before the Surrogate's Court yesterday were as follows:

A petition for the probate of the will of William E. Simmons, late of Oswego Town, was filed by his daughter, Martha L. Farr. The will was made January 21, 1916, and leaves a property, both real and personal, to Mrs. Farr. One son, William Simmons, lives in Oswego Town. The value is given as $1,000.

A petition was filed for the probate of the will of Tabitha Baker, who died in Volney, April 3, 1915, leaving an estate valued at $1,400 to her daughteds, Misses Gertrude and Clara J. Baker.

The transfer tax appraisal of the estate of Charles E. Leadley, late of Oswego Town, was filed. The property is valued at $5,785.91, and the debts and expenses, $453, making a net estate of $5,332.91. An order exempting the estate from the transfer tax was filed.

The following guardians' accounts were filed: Myrtle M. Priest, Lillian A. Baker, Frank G. Mahar.

A hearing was held in the settlement of thea ccount of Bridgette Dyette, as administrator of the estate of Frank McLaughlin, deceased. A claim is made by Patrick iGbbs for $400 forb oard and care of decedent in 1910-11.

**"Nobody Home," In Two Acts.**

Act 1.—Opportunity knocks. "Who's that?" asked the wife of her husband.

"Nobody. Maybe a beggar. Let him knock. Nobody home," replied the laggard husband.

Twenty years have elapsed.

Act 2.—"What's that noise?" asked the old man of his old wife.

The noise is repeated. "There it is again. Go to the window and see what it is," said the old husband.

Wife goes to window and peers through the tattered curtains. Comes back. "It is the wolf," she says. "It won't go, as did the other visitor we turned away."—Richmond Times-Dispatch.

**"Goodmen" and "Goodwomen."**

A pleasing form of address that was common in the seventeenth century has gone quite out of use, probably because of its restriction to "inferior persons." The "Mr." was then a prefix to which only gentlemen were entitled, and among the Puritan fathers of New England the deprivation of the right to be so addressed was inflicted as a punishment. "Goodman" or "Goodwoman," by contraction "Goody," was the address of those low in the social scale. The term is preserved in some old songs.

Final Clearance Sale

COATS AND SUITS

# MUSICIANS, KEEP CLOSE TO LEADER

Mr. F. Jess Newton, director of the Fulton Symphony Orchestra, is desirous of bringing the new musical organization down to the highest state of efficiency. He accordingly requests that every member appear at each and every rehearsal so that when the public's appetite becomes whetted to the point of irresistibility and a popular-priced concert is announced to take place, every player will be ready and equipped to respond to thew ave of the baton. In this connection it is well to add that a concert is one of the near events of the orchestra.

The schedule of rehearsals is as follows: Monday evenings, Elks' hall, at 8 o'clock; Saturday evenings, at the home of Dr. Haviland, 224 Oneida st., at 8 o'clock.

**Dreams As Omens.**

From the earliest times recorded in history men have believed in the prophetic character of dreams. So far as we know, the first to deliberately and systematically attempt the interpretations of dreams was Amphyctyon of Athens, who lived about the year 1490 B. C. The Bible mentions dreams in many places, and we are entitled to conclude from the Biblical references that there were professional interpreters of dreams who were not infrequently resorted to by the dreamers.—Exchange.

## KILLED ON THE RIGHT OF WAY

Of the 8,621 persons killed on steam railroads in this country last year, 5,084 were trespassers who had they obeyed the law and stayed where they belonged would have been out of harm's way. Nor were most of these vagrants. It has been shown that the great majority of those who enter the road's premises without authority are foolhardy citizens who risk their lives for convenience or to save steps.

The enforcement of the law against trespassing would end these tragedies, but that enforcement is difficult to obtain, because the offenders in most cases are arraigned in courts presided over by fellow townsmen who are reluctant to punish their friends for following what may be the common practice of the community. This lenity exacts a toll of death annually that arouses little thought simply because it is not brought dramatically to public attention.

Lately the railroads have endeavored to educate the public to the necessity of keeping off their right of way, and in some parts of this State they have succeeded in producing a marked improvement in conditions. But the records of the Interstate Commerce Commission show how much remains to be done before even the elementary rule of avoiding danger spots can compel obedience.—N. Y. Sun.

**The Great Philhellene.**

There is at least one Englishman for whom Greek affection has never wavered—Lord Byron. Not only is he commemorated in Greece by statues and street names, but his portrait is to be found everywhere, even in the most unlikely places. Mr. W. Miller in his "Greek Life In Town and Country" tells how he came upon a portrait of the poet in a provincial restaurant. The moment he took notice of it "the proprietor, a stout, prosaic looking man, whom no one would have suspected of sentiment, stepped toward the picture, clasped his hands in pathetic gesture and, with a faraway look in his eyes, stood for a time in rapt admiration of the great Philhellene."

**First Iron Skates.**

Skating does not appear always to have been as common an accomplishment as it is nowadays. Iron skates seem to have been introduced by the Dutch, but the art itself was known in London at an early period. The monk, Fitzstephen, who was secretary to Archbishop Becket, describes the bone skates used by Londoners in the twelfth century. But Pepys, writing in 1662, has a reference. "Over the parke," he says, "where I first in my life, it being a great frost, did see people sliding with their skeates, which is a very pretty art." From which it is reasonable to infer that skating was not as general then as later or Mr. Pepys would not have missed it.

WHAT APPEAR TO BE CALAMITIES ARE OFTEN THE SOURCES OF FORTUNE

# Is Advertising Wisdom

IT IS APPARENT IN THE CASE OF THE MAN WHO FIGURES TO GET INTO HIS STORE 10 PER CENT OF THIS TOWN'S POPULATION BY PAYING OUT THREE TIMES AS MUCH MONEY FOR SPACE AS HE WOULD PAY WERE HE TO USE THE HOME PAPERS TO REACH THE BUYING PUBLIC. THE STING IS IN THE COMPARATIVE RATES FOR ADVERTISING PLUS THE COMPETITIVE BUSINESS BROUGHT INTO THIS CITY. THE MERCHANT WHO CANNOT SEE THIS LOGIC IS A SUBJECT FOR PITY. IF HE FAILS TO REALIZE THE TRUTH HIS DAY OF RECKONING IS ASSURED.

## Realization of the Truth Will Be His Source of Fortune

Remember the old German proverb: *"As fortune is sought so is it found,"* and then seek to reach your 10 per cent by Advertising in the Home Papers, which cover your field of trade better than the out-of-town papers.

# ROMANTIC BIRTH OF PHOTO-PLAY BUSINESS

AMAZING NARRATIVE OF HOW THE FIRST ACTED STORY WAS FILMED FOR THE SCREEN.

## CHARLES PATHE THE PIONEER

**Behind It He Put His Dynamic Personality and Transformed Toy-Like Idea Into a Mammoth Industry.**

The romance of a great business often exceeds imagination and proves more interesting than fiction. The hesitating beginning, the slow and stumbling progress, the costly mistakes, the various ailments which so often prove fatal to an infant industry do not make an impression upon the mind of a casual observer. It is only when the process of evolution is complete and the great fabric has been woven that he notices and then, forgetful of the past, he is prone to believe that, like the dragon's teeth of mythology, a particular business has sprung into life fully equipped and formidable in the panoply of might.

Remembering how much the motion business, now ranking fifth in importance of all industries of the United States, owes to the House of Pathe, a representative of this paper

CHARLES PATHE

during a recent trip to France made a visit to several of the huge factories and studios of that great international organization.

Located on the Boulevard des Italiens, "the glory of Paris and wonderful centre where the five parts of the world meet together," are the head offices of Pathe Freres, sumptuously housed in a building which by its beauty and permanent character might well be a great art museum or government offices. Here alone in times of peace are housed some four hundred employes, a small portion of the army of nearly 10,000 scattered all over the world who draw their salaries in Pathe envelopes. In Vincennes, the birthplace of the motion picture industry, the city which saw the early struggles of the Brothers Pathe, are several of their huge factories and studios covering an area of 28,000 square meters and employing over seventeen hundred employes of both sexes. Here are colored by the Pathe process those beautiful pictures of which the "Beloved Vagabond" is such an excellent and recent example. In these factories is also produced raw film stock amounting to over 300,000 meters a day, a quantity which makes Pathe one of the principal sources of raw film material in the world. Other great studios are located in Montreuil-sur-Bois and Nice, and in them daily, before the war, met the greatest actors and actresses of France. At Joinville-le-Pont is another huge factory with a payroll of 1,100 persons, where films are developed, edited, printed, and then forwarded to all parts of the world. In Paris is still another, where are manufactured cameras and accessories, employing nearly a thousand persons. Remembering that other large factories are located in England, Russia, Italy, the United States and other countries, as are studios and selling organizations, one finds it difficult to believe that this great organization is only about twenty years old, and represents the growth of an idea in the minds of two men, poor of pocket but large of vision.

Harking back those twenty years, Drama, Comedy and Opera sat all powerful and apparently inviolate on the throne of the Speaking Stage, and he would have been a rash man, indeed, who would have prophesied that they must eventually yield supremacy to the long rolls of celluloid film and the flashing of myriads of tiny pictures upon a snowy screen. But Genius gives Vision and to Messrs. Charles and Emile P[illegible] w[illegible] must concede true Genius. W[illegible]th tw[illegible] other brothers they put all their savings into a business which then was but a mere Idea. The combined capital amounted to but $2000 and after only three weeks the other two brothers, horrified by their rashness, withdrew, taking their money with them. Messrs. Emile and Charles Pathe, who held true to their faith and stuck to their guns, today draw $100,000 per year apiece in salaries alone! Opportunity had called to them and they had heard her voice.

The original motion picture was imprisoned in a wooden cabinet where one was privileged by depositing a coin to see a succession of tiny photos tumbling over one another, and giving the semblance of life action. The original idea had been Edison's, and in it Charles Pathe had recognized the germ of great things. He rented a small store and placed within it two of those machines. The venture proved profitable, but was handicapped by the fact that there was but one picture to a machine. To make patrons return again and again, a change of program was a vital necessity. To secure his program Mr. Pathe purchased eighteen more machines and placed them in eighteen different cities. From week to week he switched his pictures in rotation, and then and there was born the modern film exchange idea.

With his profits he purchased a motion picture camera,—one of the very first to be made,—and started making his own pictures. His subjects were primitive,—a man running, chickens feeding, cattle grazing, and the like,—but he was developing his Idea and for that reason his work was important. These embryonic dramas were in short lengths, ten, twelve, fifteen feet at a time, but the idea of projecting them upon a screen instead of imprisoning them in a box helped tremendously. He took his films in his pockets and carried them (traveling third class, if you please) to London, Berlin and Rome and sold them there. By degrees his films lengthened and his market strengthened, but for weary months he was his own camera-man, shipping clerk, manufacturer, demonstrator and salesman. Man of many activities as he was, his brain could not be idle. The idea came to him that a story could be worked out upon the screen—and that that story would possess a far wider appeal than the simple little facts of everyday life which he had been filming. To think, with him, was to act. He employed Max Linder, a threadbare young actor, for $4 a day to act out a crude scenario, and Louis J. Gasnier, a stage manager and play producer of Paris, to direct the taking of the picture. That short picture was the first acted story ever to be put upon the screen, and from it the modern photoplay has developed. Max Linder jumped to fame and fortune and is still considered the best pantomime comedian in the world. At the outbreak of war his $4 per day had grown to $70,000 per year. L. J. Gasnier, the first director, is today one of America's prominent film men and still identified with the Pathe organization.

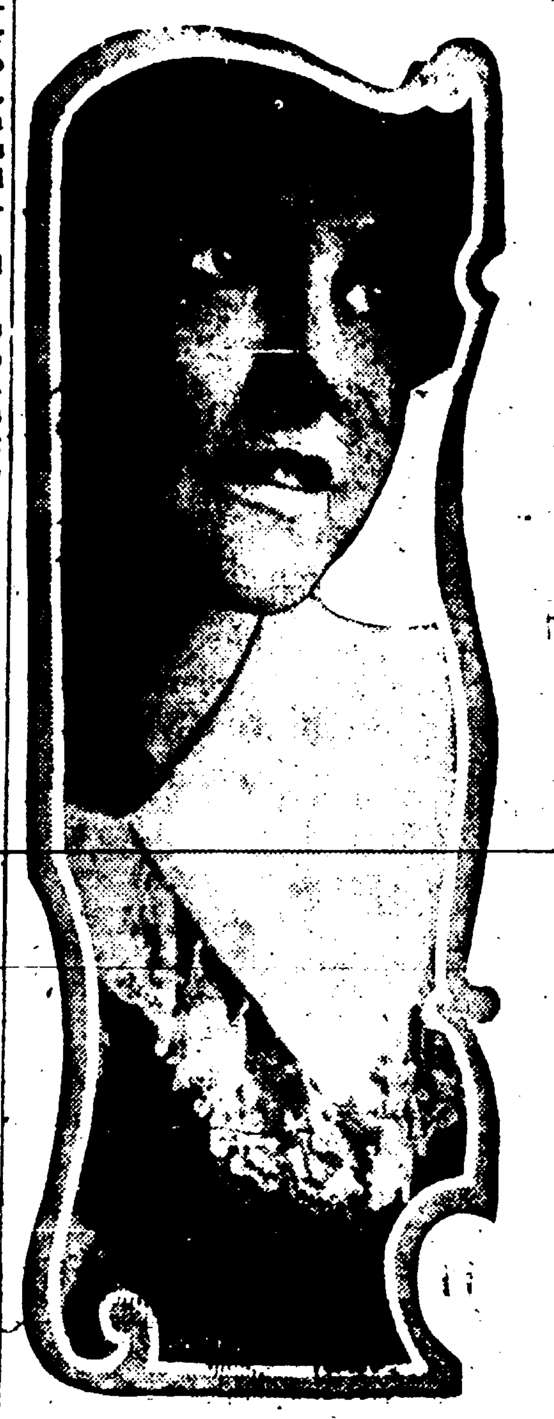
Still another great idea came to Mr. Pathe when he considered the possibility of putting news into motion pictures. The idea, like all of his ideas, proved practicable and successful, and the News Weekly came into being. Most persons, in spite of the competition which sprang up, still associate the news film in their minds with the old Pathe Weekly, the father of them all. Today there is the Pathe News in the United States, the Pathe Gazette in Great Britain, the Pathe Journal in France, the Pathe Giornale in Italy, and still another with a jaw-breaking name in Russia.

Thus are great businesses born; beginning with an Idea some strong man like Charles Pathe takes it, molds it, changes it, improves it, and makes it his own. Behind it he puts his own strong will and dynamic personality. He breathes upon it the breath of his genius and like Galatea it becomes alive, throbbing with beauty and energy, an entity and no longer an Idea!

PEARL WHITE

Pearl White, who will star in Pathe's next serial, "The Iron Claw," says the highest compliment of her career was paid by this serial being written for her. It was the result of multitudes of letters from all over the country asking for her to be starred in another serial.

## 'LOIS MEREDITH



YOUNGEST STAR ON STAGE.

**Lois Meredith Featured in "The Precious Packet," a Donald Mackenzie Pathe Production.**

When Donald Mackenzie secured Lois Meredith for his Pathe production "The Precious Packet," he got the youngest star on the stage today, for Miss Meredith is only eighteen years old. Look at her, and you'll wonder that so much genuine talent is to be found in so girlish a little lady. Yet she followed Laurette Taylor in the leading role of "Peg o' My Heart," was featured in "Help Wanted," and played "Modesty" in "Everywoman." She has not yet reached the age where women, and especially those on the stage, choose to forget their birthdays, so her eighteen years are not fancied, but real.

Little Miss Meredith can dance and sing more than ordinarily well, and hopes for a part in the spring in which she can utilize those talents. Despite her tender years she studies French, music and literature from choice and not compulsion (therein differing from most girls of her age) and works hard at her chosen profession, for she has a number of younger brothers and sisters to look after, and when she travels she takes the whole brood with her.

Miss Meredith was born in the United States, but spent her earlier years in Ireland, which explains her delightful accent when she forgets herself. In the Paris Salon was exhibited a statue which was much admired, for which she posed for arms and hands, for hers are considered by sculptors to be perfect.

"The Precious Packet," in which Miss Meredith is featured, was written by Fred Jackson, and is on the Pathe Gold Rooster program. It is the universal verdict that it fully measures up to the high standard of this series.

### HOLDS RECORD FOR SERIAL STARRING.

Pearl White, world famous as the heroine of the serials, "The Perils of Pauline" and "Elaine," will be featured, it is announced, in a new serial to be called "The Iron Claw." Miss White thus enjoys the distinction of having starred in more serials than any player before the public.

She has for several years been one of the three or four of the best known stars in the business, practically all of which time she has been identified with Pathe pictures. In fact, "The Perils of Pauline" may be said to have been her first great chance and the starting point of her fame.

She was born in Missouri, and broke into things theatrical, by the "Uncle Tom's Cabin" route, that great nursery of histrionic talent. For several years she was connected with various road shows, and then obtained an engagement with a circus. For two or three years she worked under "the big top" and then went back to the stage where she has been ever since, playing with some of the best and some of the worst companies in existence, as she expresses it.

Some three years ago she received an offer from Pathe to appear in pictures, and with Pathe she has been ever since with the exception of short intervals.

Miss White possesses a marked individuality upon the screen—she resembles no other player before the public. Her popularity is tremendous as is amply evidenced by the bewildering amount of her daily correspondence which comes from all parts of the civilized world. It is said that it was because of the number of letters received from admirers all over the country begging that she be placed in another serial that Pathe selected her for "The Iron Claw."

# Woman's World

**An American Novelist Founds a Paying Workroom In Paris.**

EDITH WHARTON.

Mrs. Wharton, author of "The House of Mirth," tells how a paying workroom for war sufferers is founded:

When the war broke out an immense number of benevolent and unoccupied women in Paris felt a violent but vague impulse to "help." This impulse found its chief expression in the traditional pursuits of making lint, hemming towels and crocheting baby jackets. Such activities are harmless in days of peace, but in wartime any unpaid industry encroaches on the rights of the unemployed, and this fact was so promptly understood in France that I can claim only by a few weeks' priority the honor of having founded the first paying workroom in Paris.

My ouvroir, which started tentatively and on a small scale, was at first meant only to supply work for a few seamstresses of my own quarter, but with the temporary paralysis of trade such a wave of misery swept over Paris that the most prudently circumscribed charities had to enlarge their borders and take their chance of finding the means to exist. It was impossible to confine my aid to seamstresses when typists and accountants, nursery governesses and dramatic artists, cooks and concert singers were all pleading for help, but I kept and have continued to keep to one of my original rules—that no one I employed should be in receipt of what is called the "military allowance." All over Paris in these early days workrooms were being opened to help the wives and mothers of soldiers. Wives, widows and young girls without near relatives in the army were not unnaturally overlooked, and it was for their benefit that my workroom was started.

My first step was to appeal for help to my compatriots in Paris. I collected over $2,000 within a week or two, and with that sum the foundations of the work were laid. I bought a large supply of materials, made arrangements to have my women fed in a neighboring restaurant and put over my door the sign of the Red Cross, under whose auspices the work was begun. The women receive 20 cents a day and a good midday meal in return for six hours' work. On Thursdays they have a half holiday with full pay, but whenever there is a sudden call for hospital supplies or any urgent order they cheerfully give up their Thursday afternoon.

When a woman applies for work she shows her papers, gives references and is asked to prove that she is not receiving either the "military allowance" or what is called the "assistance to the unemployed." Her statements are verified by inquiries at her mairie, and if the report is favorable she is engaged for two months.

The two months over, she has to leave, but if she chooses we give her piecework at home for a month. At the end of the month, if there is a vacancy, she can return to the workroom for another two months, and so on. This system of rotation was established as soon as it became evident that the war was to last a long time, and the result has been satisfactory.

### So Transparent!

The transparent hat has been such a welcome comer that its popularity has extended for more than the usual one season run. This is also true of the transparent hem which has had such a vogue during the fall and winter, while the transparent frock that reveals the silken trousers beneath is a creation of this season. Transparent scarfs, too, of white or flesh colored tulle, so wrapped that they cover the chin, are also receiving a great deal of attention by this year's debutante. So it will be understood that the advent of a coat which reveals the frock beneath and such a coat trimmed with fur to add to the luxurious effect will not be such a startling idea as it sounds on first hearing.

### O'Brien Potatoes.

Boil potatoes with the skins on till tender, then cool and cut into dice. Make a white sauce according to usual manner and add to it a teaspoonful of onion juice and a large tablespoonful of chopped green pepper. Pour over the potatoes and simmer for five minutes.

# CLEAN CARPETS.

## Hints For Those Who Prefer Carpets to Rugs

## HOW THE DIRT WILL VANISH.

**A Practical Housekeeper Tells How She Keeps Her Floors Looking Well In Spite of a Big Family—Also the Ingredients of a General Cleanser.**

A woman who always has clean, bright, fresh looking carpets, despite the wear and tear of a big family, tells how she keeps them so.

"To begin with," she states, "I buy good bristle carpet brooms, have them regularly washed and either hang them up or stand them bristles upward—never with the bristles on the floor.

"Any stains or marks on my carpets are attended to at once.

"In the case of a fall of soot you should cover thickly with salt and sweep up immediately. Should ink be spilled on a carpet waste no time, but sop up quickly with blotting paper, then wash out with warm, soft water and a clean flannel and dry with a soft duster. If the stains be obstinate put a teaspoonful of salt in a cupful of milk and rub well in.

"For dirty boot or sticky marks I use ammonia. If it should seem to fade the color this is easily restored by rubbing with chloroform. A cloth wrung out of salt and water brings up the colors after sweeping.

"If candle or other grease is spilled you can easily remove it by putting a sheet of clean blotting paper over the marks and ironing with a hot iron, shifting the paper to absorb.

"To clean and brighten dingy rugs and stair carpets I get a half pint of ox gall from my butcher and mix it with half a pail of cold soft water. Rub the mixture on with a soft scrubbing brush, then sponge the lather off with clean water, rubbing with a cloth.

"Thick carpets and Indian rugs should be swept the way of the nap, and, unlike other rugs, the Indian ones should only be swept, not shaken.

"Here is an infallible general cleaner: Take one pound of any pure white soap and shave it fine. Place this in one gallon of boiling water, stir over a moderate fire until the soap is dissolved; then remove from the fire, stir well and let it stand to cool for thirty minutes. At the end of that time add the following ingredients: One-half ounce sulphuric ether, one ounce alcohol, two ounces ammonia and one and one-half ounces pulverized borax. Let the fluid stand twenty-four hours before using. With the fluid and a brush scrub the carpet, then rinse with clean water and a sponge."

Coffee.

### The Soup Kettle.

CORN SOUP.—Put one can of corn first through the meat grinder and then through a coarse sieve; add two quarts of milk, one tablespoonful cornstarch wet with a little cold water or milk, salt and pepper to taste, butter size of egg. Boil until creamy.

Spinach Soup.—Pick over carefully, wash and boil enough spinach to measure a pint, when cooked; chop into a soft paste; put into a stewpan with four tablespoonfuls butter, salt and pepper to taste. Cook for five minutes; add two quarts of stock, or milk. Let this boil up, then rub through a strainer and serve with squares of toast.

Tomato Soup With Whipped Cream.—Strain one can of tomatoes through a sieve, scald thoroughly. Heat three large cupfuls milk; add two tablespoonfuls butter and two tablespoonfuls flour; mix well, season with salt and pepper; put one half teaspoonful soda into the tomatoes before mixing with the milk. Serve in soup plates with a spoonful of whipped cream.

Veal Soup.—Cover a knuckle of veal with cold water and simmer two hours. When it starts to boil skim well a few times, then your broth will be nice and clear; remove the veal when tender, add a half cupful well washed rice and some parsley; season to taste; cook until rice is tender.

Clam Soup.—Twenty-five large clams, one cupful boiled milk, one blade of mace, pepper to taste; scrub clams clean, put into deep kettle; add one cupful cold water, cover. When the clams have opened, skim out and drain off the liquor; to four cupfuls broth add two cupfuls hot water, mace and pepper; chop the clams fine; add to the hot liquor; then add hot milk.

*Anna Thompson*

### Queer Result.

"So she treated you in an icy manner?" "Yes. I tell you she made me hot."—Baltimore American.

## Costume In Old Green Broadcloth.

Whether she is thinking of winter or spring clothes, the miss of fashion will find this model attractive. It is smart with or without the pockets.

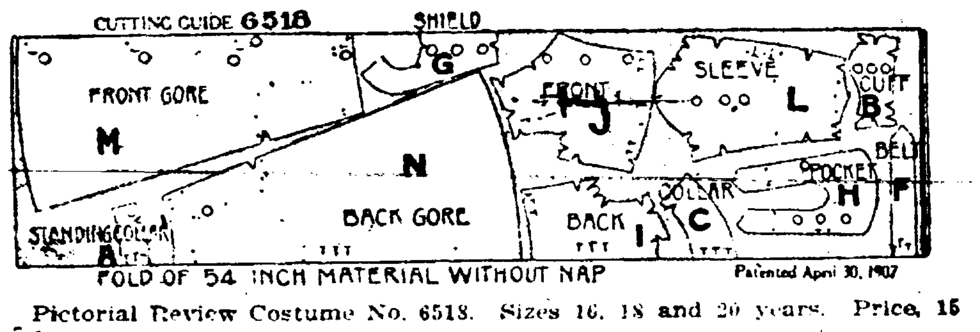
Although it does not launder as well as serge or some of the new flannels, broadcloth is so stylish in appearance that it is used for many smart one-piece dresses this season. The misses' costume shown here is carried out in old green cloth, although it is a splendid design for almost any material. The neck may be finished in high or low effect, while the belt makes friends with the pocket by the aid of a narrow connecting fold.

The material is folded, as shown on the cutting guide, being laid out on the table full length. First to be placed directly on the fold is the standing collar, if it is to be used. Otherwise, this part of the pattern may be laid aside to be used later. Next to be placed is the back gore, followed by the back of the waist and the collar. To the right of the collar, but placed on a lengthwise thread, is the pocket, the belt coming last.

Opposite the back gore, the front gore of the skirt is laid and the vest follows to the right of the front gore. Even if made of contrasting material the pattern is placed in the goods as shown in the cutting guide. The front, sleeve and cuff, placed on a lengthwise thread are the last sections to be arranged on the material, after which everything is ready for cutting.

For short sleeves, cut off lower part of either sleeve on small "o" perforations.

If fashioned of washable material the frock may combine two shades of one color or a very dark color and white. It is a practical as well as stylish model.



Pictorial Review Costume No. 6518. Sizes 16, 18 and 20 years. Price, 15 cents.

### Before and After.

Before marriage he has a duck fit if she sees him with a shave and massage that are more than two hours old or the perfect poise of his correct tie disturbed a hair's breadth, but afterward he comes to the table with his shoestrings untied, no collar on and a stubby growth of beard that would play a tune if you ran it through a music box.—Judge.

### The Trouble.

"Have you explained the germ system to your children? Everything should be on a practical basis these days."

"No," replied the old fashioned citizen. "It seems inconsistent to tell 'em not to believe in fairies and then try to get 'em to believe in microbes."—Pittsburgh Post.

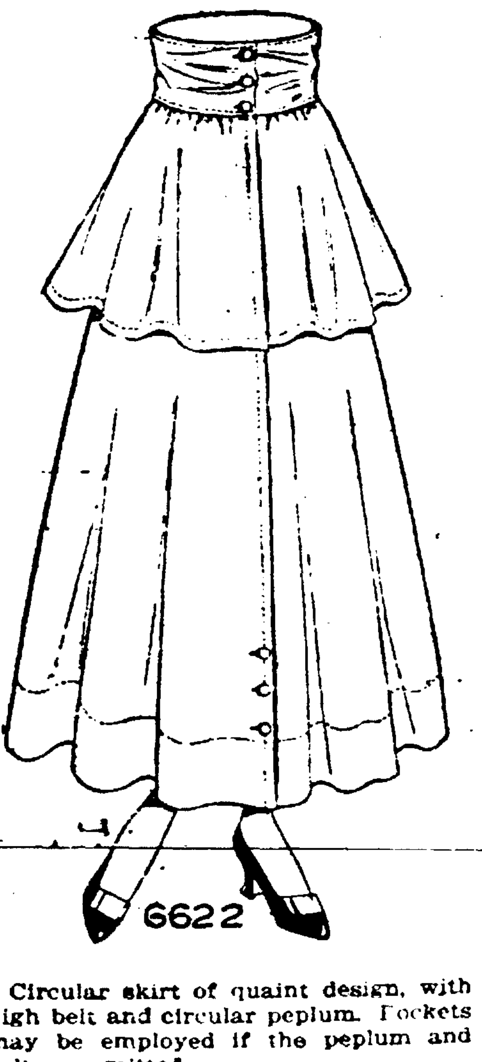
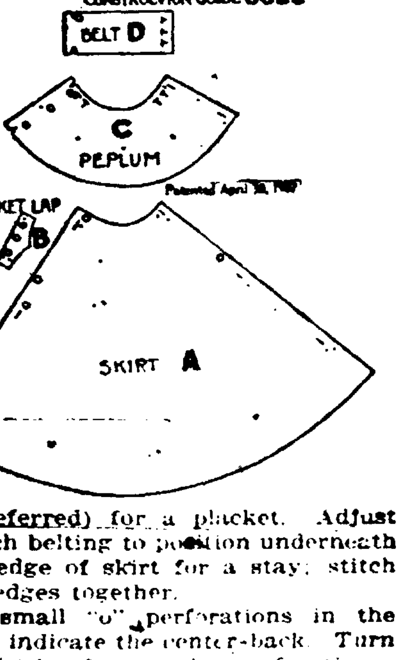
## Separate Silk Skirts In Vogue.



Circular skirt of quaint design, with high belt and circular peplum. Pockets may be employed if the peplum and belt are omitted.

The separate skirt of silk is destined to enjoy greater popularity this season than it has had in years. There is something quaint and fetching about this model, which may be cut in one of two pieces. It has a high waist-line and in trimming the skirt one has the choice of pockets or a removable peplum. In medium size the skirt requires 5¼ yards 36-inch material, made with peplum and belt, as illustrated.

Beginning with the skirt, which has the center-front indicated by large "O" perforations, and the center-back by line of small "o" perforations, turn under the right-front and left-back edges on slot perforations first; lap as shown, center-fronts and center-backs even and stitch ½ inch from folded edges, leaving the edges free above single large "O" perforations in front or back



(as preferred) for a placket. Adjust two inch belting to position underneath upper edge of skirt for a stay; stitch upper edges together.

The small "o" perforations in the peplum indicate the center-back. Turn under-back edge on slot perforations; lap left-back on right, center-backs even; stitch ½ inch from folded edge. Sew peplum to belt, center-fronts and center-backs even, large "O" perforations indicate center-front. Turn under front edge of belt and peplum at notches for a hem and finish for a closing. If belt and peplum be desired closing in back, reverse the belt, making large "O" perforations the center-back.

The skirt is very effective if made of taffeta or faille

Pictorial Review Skirt No. 6622. Sizes 22, 24, 26, 28, 30 and 32 inches waist. Price, 15 cents.

## HOUSEHOLD LINENS.

**Some Interesting Suggestions About the Proper Place to Mark Napkins.**

No housekeeper can ever have enough attractive linen for her table and her bedrooms. She may have enough for actual service, but it is wise to keep just a little ahead of the actual need in extra towels for guest room and bathroom. It is also advisable to keep just a little ahead in the supply of linen for the table.

Every set of napkins and each tablecloth should have the housewife's surname initial or her monogram embroidered upon it. There is a question as to the proper place to put the initial or monogram, but the majority prefer the letter on tablecloths to be in the corner, where they will come just off the rounded edge of the table.

Napkins should have the initials in the corner or in the middle on one side, where they will be on top when the napkins are folded. Tea napkins are the only ones on which a wreath can appropriately be placed. It is quite permissible to place an initial within the wreath or other decorative motif. Tea napkins can also be finished with hemstitched or scalloped edges.

Some women may argue that they haven't time to put fancy work on household linen. This is a poor argument, for almost every woman has a few moments during the day when she sits down to chat with a neighbor or when she is waiting for the homecoming of her husband to his evening meal. It is during these odd moments that a great deal can be accomplished, especially in the way of fancy work. Pick up work is good for the nerves.

## A YOUTHFUL BELLE.

**The Schoolgirl Needs a Dance Gown Pretty as Sister's.**

The base of this attractive dress is pale pink taffeta, over which falls a net drape, like a tunic. This is outlined across the bust with a little

HER PARTY FROCK.

wreath of French roses, while the four ruffles on the skirt, slightly wider, reach the bottom of the overdrape. This desgn is so simple that most mothers can reproduce it.

## SHUTTING OUT SUNSHINE.

**Various Ways to Brighten Up a Home In Winter.**

If the housewife wishes to keep cheerful and happy she must provide for herself surroundings calculated to cheer and uplift. This can never be done by shutting out the sunshine and darkening the rooms with heavy hangings and somber papers. Rather it is her part to furnish her home with sunny papers and bright draperies.

This need not mean that the home must look out of date or cheap. The interior decorators have used chintzes so lavishly in their work of late years that it is considered very smart. They have produced some startling effects with the futurist cretonnes and the elaborate black and white chintzes. Nor can this material by any means be considered cheap when the good cretonnes sell up to $4 and $5 a yard. It is fortunate, however, for women of moderate means that chintz also sells as low as 12 and 15 cents a yard.

With the aid of plain, light colored wall paper and expensive or inexpensive chintz a home can be made to look 10 degrees lighter than it did when filled with dark velvets and subdued wall papers. The effect this change will have on the dispositions of the inmates of the home will quite offset any extra expense incurred in bringing it about. Bright surroundings are essential to bright natures.

### Deviled Scallops.

Cream one-third cupful of butter, gradually beat in two teaspoonfuls of mustard, three-quarter teaspoonful of salt and one-quarter teaspoonful of cayenne; then add one quart of parboiled scallops finely chopped and one cupful of hot milk. Mix thoroughly, turn into a buttered baking dish, cover with one cupful of hot milk. Mix thoroughly, turn into a buttered baking dish, cover with one cupful of fine crumbs, dot with bits of butter and bake about twenty minutes.

# TODAY'S FASHION NOTE

Fulness everywhere is one of the desirable features of the general utility coat for spring. This model is carried out in basket weave cloth combining two shades of brown. Large pockets, large buttons and deep cuffs are the decorative features Four yards 56-inch cloth are required for its development in medium size.

# Zeppelin Raiders Drop Missiles on Sleeping Towns in England

London—Following the German air raids on Paris on Saturday and Sunday nights six or seven Zeppelins appeared over the eastern, northeastern and midland counties of England late last night. Bombs were dropped, but up to this hour the War Ojce has not received reports of serious damage. Aside fromt he general direction of the raid, th War Office has not particularized regarding the points attacked.

There is no indication so far that the Zeppelins penetrated inland as far as the London district, but that a resumption of the attacks on London and the east coast was expected by the British authorities is indicated by the fact that on January 26 a special warning was sent outb y the police, which, after referring to the increase in the offensive protection against hostile aircraft recently provided in the metropolitan district, advised thep ublic on the occasion of air raids to take cover.

The last raids on England occurred on January 23 and 24, when hostile aeroplanes dropped bombs along the east coast of Kent, killing or wounding a few persons, and an aeroplane attacked the sta tion, baracks and docks at Dover.

Only recently the defence of London from air attacks has been placed in the hands of the War Office. Previously the Admiralty had charge of this matter. Both these departments, however, have been co-operating harmoniously.

Prior to January 3 there was an interval of several months during which England was immune from air attacks. From June 15 until October 13 there were six Zeppelins raids on London and the east coast of England, in which 121 persons were reported killed and 313 injured.

After the raids on Paris on Saturday and Sunday nights the view was expressed by the French authorities that these attacks doubtless were a prelude to a more extensive movement by German aircraft, and the fact that six or seven machines reached England last night would indicate a well considered project by the Germans to increase the activity of their dirigibles and probably bring into play the new Fokker machines, which are reported to be very effective engines of war.

### PRACTICAL HEALTH HINT.

**Children's Ears.**

It is astonishing to learn what an apparently sensible woman will do by way of cleaning the inside of a child's ear and what preposterous instruments she will use. Healthy ears do not need syringing, and only persons who are expert in the operation should perform it on ears that are not in good condition. Hard instruments for cleaning out the ear should never be used. There are little spoons contrived for this purpose in the shops, but no one should buy them; neither should mothers or nurses think of twisting a towel into a spike, or wrapping it round a match and therewith exploring a child's ear. Earwax is a normal secretion. It is found in all healthy ears and is not something to be pursued as if it were a disgrace. You can always keep the ears properly clean by using a towel dipped in warm water and wrapped round a finger.

When a small child gets a foreign body into the ear, gently syringing with warm water will often remove it, and that should always be tried before any other method. The attempt to extract the object forcibly may do much injury. No one except an experienced physician or nurse should think of doing that.

**Whale Sausage.**

In Norway it has been found that whale meat, vast quantities of which have formerly been thrown away, makes a palatable and nutritious sausage. The meat has proved so successful for this purpose in Scandinavian countries that engineers are now working to develop machinery for cutting up the huge leviathans and working their carcasses into sausage.

**War and Art.**

The Metropolitan Museum of Art at New York has suffered three financial blows from the war, for the contributions of art patrons are smaller, there is no chance of the city's annual gift of $200.000 being increased, and the membership of the institution has fallen off by more than a thousand.

### AN ESSAY ON PANTS.

**Introducing One Pair That Made a Boy a Fearless Man.**

Pants are of two kinds, human and dog.

The human pants of commerce are worn mainly by males.

But equal rights prevail among dogs.

Human pants are worn thicker in winter and thinner in summer.

A dog's pants come thicker in the summer.

The dog's lungs are the seat of its pants. (Date 1875.)

White pants are not a garment. They are a business to themselves.

The man who wears them doesn't work at much else at the time.

When I was small and on a farm I wore pants that were not new.

So far as I could find out, they never had been new.

When they had been first worn out by the first tailless ancestor I had they had been patched at all the ventilated places.

When the original goods wore out between the patches the first patches were connected by other patches.

And sew on.

Where they overlapped—the patches—the goods became about an inch thick.

And when human legs made of any material less durable than vulcanized flint are incased in a set of inch and a quarter Deer island jeans trousers patched with every kind of heavy goods from horse blankets to remnants of rag carpet—when, I say, any human nether limbs are incarcerated in these bendless tubular garments in a wheatfield on a southwest hillside at 2 o'clock on a clear, still day when the temperature is 110 in the shade and there is no shade, the owner of said legs thinks longingly of the bastile, the stocks, the pincers, the guillotine, the pillory, the thumbscrew, the rack, the stake and other pleasantries.

I have gone long days in the wheatfield in a pair of such asbestos pants lined with sandpaper and barbed wire, and now death or public speaking or fashionable dinners—none of those things has any terror for me.

I playfully inquire of death as to the location of its stinger.—Strickland Gillilan in Farm Life.

A thousand and one tales are again coming out of Bagdad.

# A Complication Removed

By ESTHER VANDEVEER

"This John King," said Mrs. Haskins to her daughter Isabel, scanning a newspaper, "who is spending his money so lavishly must be the same man with whom you had that flirtation ten years ago when we were staying in Rome."

"Oh, mamma!"

"Why are you so moved, my dear? Surely there was nothing serious between you and him, and that was a long while ago."

"There was something between us, mamma."

"There was?" asked the mother in her turn, showing concern.

Isabel made no reply to the question, but after deep thought said:

"I wish to meet this Mr. King. If he is the same I met ten years ago I shall do all I can to win him."

"Why so—to secure his large fortune?"

"No; to remove a serious complication."

That was all the mother could get out of her daughter. The society news was scanned from day to day until Mr. King was mentioned as a guest at the house of one of Mrs. Haskins' friends. The lady was appealed to to bring about a meeting between Mr. King and Miss Haskins and did so at a dinner given by the mutual friend. After the dinner Isabel returned to her home with a red spot in each cheek and a spark in each eye.

"Well?" said Mrs. Haskins.

"Oh, mother, he has no remembrance of me whatever."

"Then he is the man we supposed him to be?"

"He is."

"And do you still desire to marry him?"

"Absolutely."

"Did he seem pleased with you?"

"I think so."

"Why is it not to his interest as much as yours that you and he should be married?"

"Perhaps it is."

"Then why do you not tell him of your meeting ten years ago, giving him the reasons, if he does not already know them, why he should marry you?"

"Because I loved him then. I love him now, and I wish him to marry me for love, not for any other reason whatever."

The mother was obliged to be satisfied with this statement, though curiosity was sharpened by her interest in her daughter. In time Mr. King was invited to the Haskins' to dinner. He came and set Isabel's heart wildly throbbing by saying some deliciously sweet words to her. But when later he met her at a social function she saw him chatting with another girl, and, judging from his expression, he was saying sweet words to her, causing Isabel's heart to sink as rapidly as it had risen.

A few days later Mr. King called, making as an excuse the offering of his box at the opera. Either he was the same skillful love maker he had been a decade before or he was much smitten with Miss Haskins. In his conduct were many of the indications of a sure affection.

And so the affair went on. At one time he would be devoted to her; at another she would hear that he was browsing among the prettiest girls in the social swim. What most troubled her was that he was passing into that age where a bachelor's admiration is bestowed upon girls much younger than himself.

However, as the weeks flew by his devotion to Isabel grew more constant. He had appeared to purposely display attentions to young girls when she was present to observe them. This he was gradually giving up. Indeed, the affair between them had gone so far that his attentions to other girls ceased to trouble her. Flowers had begun to come from him to her, a sure sign that a proposal is about to be made. One evening when King followed a box of them he had sent he called, and when Isabel came down to meet him he put his arms about her, kissed her warmly and said:

"My dear wife, it is time this play came to a climax."

"Wife?"

"Yes. I knew you the moment I saw you. Immediately after that wedding which was got up between us in a youthful frolic I went to a lawyer and asked him if it could be construed into a legal marriage. He replied that if we both intended it as such it was within the law of wedlock. It was intentional with me. If it was the same with you we were married ten years ago."

"In my heart it surely was intentional."

"I resolved," continued King, "that as soon as I had accumulated a sufficiency I would ask you the question that would, if answered in the affirmative, make us one. I have since been more than fortunate. I came here purposely to find you. When I saw that you did not remember me"—

"I did," interrupted Isabel. "I supposed, however, that you did not recognize me."

"I wished to win you."

"And I wished just as much to win you."

When Isabel joined her mother she gave evidence that something momentous had happened.

"You are engaged!" exclaimed Mrs. Haskins.

"No—married."

"Married!"

"Yes, we have been married ten years, but we didn't know it."

### A GERMAN ARMY CORPS.

**Just What It Means in Men, Animals, Vehicles and Food.**

Just how much space does an army corps require? According to a German writer, a German army corps consists of 41,000 men, 14,000 horses and 2,400 vehicles, including the cannon.

Such a body of men and their belongings, on a single road, make a procession about thirty miles long. Even when in fairly close touch with the enemy, the length of a corps is about fifteen miles, and when the front detachments become engaged in a battle it is five or six hours before the men in the rear get into action to assist them.

Before this war began it was generally supposed that a single army corps would occupy about two and one-half or three miles of the fighting line, but in actual experience it has been found that the average front of a corps is considerably broader—namely, from three and one-half to five miles. An army of ten corps is not very large as armies go in this war, but it would fight on a front about thirty-seven miles long, and a man who undertook to walk from one wing to the other would require twelve or fourteen hours to do it.

An army corps consumes nearly 300,000 pounds of food a day, about 100,000 pounds for the men and 200,000 pounds for the horses. Even under the most favorable conditions it requires a train of 150 wagons to bring up a day's food.

**To Identify Babies.**

Use of footprints to prevent confusion in the identification of babies has been adopted in Chicago's largest maternity hospital. The prints are obtained in the first hour of life, and the methods used are simple. The infant's feet are pressed against an ink pad, and then the inky foot is placed on a paper of moderate gloss, on which the impression of the tiny lines is made. This new method of identification is regarded as a permanent record of value from a scientific standpoint. Scientists say the lines will never change. There will be no chance, they contend, of a substitution of babies.

**Gold Mining in Alaska.**

The sequence of events so often observed in the history of gold mining camps has been repeated in the Willow creek district, Alaska. The earliest prospectors in 1897 were primarily interested in the search for placer gold and, having found it, were too busily engaged in mining to trace the stream gold to the veins from which it originally came. It was nearly ten years later that the first of the valuable quartz veins that now yield most of the gold mined in the district was discovered. Since 1906, however, quartz mining has progressed steadily and has rested upon a substantial basis.

**The Word "Movie."**

To a thousand editors the question was recently submitted as to whether the word "movie" is to be regarded as a legitimate English word to be used without quotation marks. Five hundred voted for the word's admission without adornment; 220 declared that the word is still on probation; 280 failed to express an opinion, but are probably to be counted with the majority

BUSINESS—Particularly the most desirable business—is very much like the sport of fishing. You can catch it if you use good bait. The Evening Times offers you the correct bait.

# GERMANY TO CLAIM $2,500,000 BULLION ON CAPTURED SHIP

London—It is understood here that the Appam carried $2,500,000 in bullion, which probably will be claimed as a prize, as bullion is contraband.

The sinking of the sevenother vessels by the German means a large loss to the underwriters. It probably will amount to about $3,000,000.

The marvellous exploit of Lieutenant Berg, whom some of the British newspapers dub a "German Captain Kettle" and others as a "second Captain Kidd," in piloting the captured Appam across the western ocean, has dwarfed interest in all the other news, including the great Zeppelin raid over the seacoast and midland counties.

## THE APPAM'S COMMANDER WOULD REMAIN IN PORT

Washington.—The State Department has definitely decided that the British steamer Appam, now anchored in Norfolk harbor, is a legal German prize of war. The decision was reached afte rthe Neutrality Board, created to advise the Department, had made an informal report.

The present intention of the State Department as announced semi-officially, is to disregard The Hague treaties altogether in disposing of the case, and to apply the existing Prussian-American treaty of 1828.

This will recognize the German ownership of the Appam and will permit it to be sequestered at Norfolk as a prize, pending court adjudication, which probably will not come until after the war.

Count von Bernstorff, the German Ambassador, informally suggested this course in a statement to Secretary Lansing. His statement was based on information contained in a telegram from Lieutenant Berge, Commander of the Appam. Lieutenant Berge declared that, according to Article 19 of the treaty with Prussia, he intended to remain in harbor, as the ship is ap rize. The ship, he said, was not armed and had captured no prizes, but had aboard the crews of seven enemy ships which were taken by S. M. S. Moewe before it captured theAppam.

The crew of the Appam resisted the attack and intended to fire with the gun the ship carried, directing the gu nat the boat, Berge reported.

He added that he has on board the Appam a "military transport" of the enemy. Couunt von Vernstorff is waiting for further information on this point from Prince von Hatzfeld, counsellor of the German Embassy, whoh as gone to Norfolk to represent him.

If it develops that the Appam has British troops aboard which were taken from a transport, Count von Bernstorff said he would probably ask the State Department to order their interment.

### SUFFRAGE LEADER SAYS ACCOUNTING IS EXCESSIVE

NewY ork—Mrs. Carrie hapman Cattfil edob jectionst ot he accountingo f the two executors of the estate of the Baroness de Bazus in the Surrogates' Court yesterday.M rs. Catt receivedt her esiduary estate under the will, approximately $1.700,000, to bed evoted to the cause of woman's suffrage. The executors are Louis H. Cramer and William Nelson Cromwell.

Maynard D. Folin, of Detroit, a nephew of the Baroness, who was Mrs. Frank Leslie, filed a petition showing that he has made an arrangement with Mrs. Catt under which he is to receive $1100,000. He asked that the executors be compelled to pay the amount.

Mrs. Catt objected to the claim of Mrs. Annie P. Frey for $25,000 for services as a nurse, which has been settled by the executors. She says it is exorbitant. Similar reasons are givenf oro bjecting to the claim of Dr. John E. Welch, who sought $12,350 for services and had his claim rejected. Althea aBroness d'Avernas Salvador's claim for $9,700 for services as ac ompanion to the Baroness is objected to by Mrs. Catt, as is the claim of $193,500 by Louis H. Cramer, as manager and attorney for the estate for nineteen years. Mrs. Catt says theg reater part of this claim is barred by the statute of limitations. Dr. John Russell Kelly's claim for $1,400 which the executors settled, is cause for another objeection, as are thosef or legal services entered by Sullivan & Cromwell for $5,000 and Edgar T. Brackettf or $25,000.

## CHAMBER OF COMMERCE

*"Fulton First, Last and All the Time"*

Every minute of the day we are learning new things; things that not only make us better, but the city as well. Like the old saying expresses it: "We are never too old to learn." We are all willing (with the proverbial few exceptions) to do the best we can; in fact we think all the time that we are doing the right thing; but is it not true, however, that sometimes we could have done better, if we had talked the matter over first with a few other interested ones and then made up our decision? Let's try the experiment and we will find out that it is beneficial for all of us.

* * *

Whatever you do; wherever you go, never forget that there is someone else living besides yourself and that by consulting the other party, you may be able to do a little better than the original plan.

* * *

Is it not true that, when we are ready to elect our representatives to judge the affairs of our nation, that we are voting different ways? Who-so-ever has the majority gets elected. Does that not prove that all matters should be discussed, so that we may be able to get a majority opinion on things? Why, there is nothing to it; let's get busy and talk things over with each other. One does not need to be ashamed of himself to sit next to the other fellow, in fact it may help us considerably to get another and better view on life, and its conditions.

* * *

FULTON, THE POWERFUL POWER CITY OF A POWERFUL NATION. LET'S SHOW THE OTHER FELLOW THAT WE ARE HERE TO DO B-U-S-I-N-E-S-S. LET'S BUY TRUMPETS AND ACT AS INDIVIDUAL HERALDS OF PROGRESS AND PROSPERITY. WE HAVE THE STUFF.

* * *

FULTON, THE CITY OF STAND-TOGETHER-CITIZENS; THE CITY OF MEN OF BRAINS AND ABILITY; THE CITY OF DEFENDERS OF THE RIGHT IDEALS.

* * *

If you know of a fellow who needs some assistance in business way, advise him to go and see DOCTOR CHAMBER OF COMMERCE, SPECIALIST IN CIVIC MATTERS, and tell him that we serve for NOTHING.

* * *

Come out in the open, you men of FULTON, talk it over with us and let's show you that we mean to do the right thing after all.

* * *

We hope to call a mass meeting some day in the near future of all men and women in FULTON; we hope to see hundreds and hundreds of them on that occasion and shall be glad to tell them in a clear way what we are willing to do and trying to accomplish. You are invited now. Get the other fellow to come; tell the other woman to come. Let's have ONE GIGANTIC GET-TOGETHER MEETING and any one who has something to say, will be as welcome as the flowers in springtime.

* * *

Talk MASS MEETING OF ALL THE PEOPLE IN FULTON. WE PROMISE YOU THE BEST TALK YOU EVER LISTENED TO, AND . . . . IT WILL NOT COST YOU ONE PENNY.

* * *

Don't forget that flowers everywhere look nice. Remember that the milder weather will come soon. Plan to get some seeds for that vacant spot NOW; it only costs a few cents and will help materially to make FULTON, THE CITY BEAUTIFUL.

* * *

The streamer, FULTON, FIRST, LAST AND ALL THE TIME, used by the KNIGHTS OF COLUMBUS the other evening was the herald of better feeling amongst the citizens of FULTON. Those men are interested in the welfare of the city, otherwise they would not have gone to the trouble to do things they did. Here is food for thought. Are you going to follow the example?

YOU BET WE WILL.

* * *

GET ON THAT FULTON WAGON; IT IS THE FINEST VEHICLE YOU EVER HAD A RIDE ON. And easy? Well, bless your dear heart, it is as if you were lying in eiderdown.

* * *

FREE TRANSPORTATION TO PROSPERITY, via FULTON WAGON COMPANY. Call for tickets at the only civic organization in the city: THE CHAMBER OF COMMERCE. Telephone 51. We put on special cars if necessary. The best and smoothest road bed in the entire country.

* * *

Say did you hear that . . . . . ! by the way, so and so . . . . . ; I've been told that . . . . . ; he is no . . . . . . ; I saw him . . . . . ; have you ever . . . . . ; let me warn you . . . . . ; are all sayings with which the gossippers start off with.

# Mayor Plays Safe in Fight to Permit Sunday Pool Games

The flood of complaints reaching the ears of Mayor Lewis, City Attorney Hillick and a number of alderman yesterday relative to the resolution which would permit pool rooms and bowling alleys to remain open at all hours excepting between 12 o'clock Saturday night and 11 p. m. Sunday, resulted in calling a special meeting of the Council at 5 o'clock of the same day, leaving the ordinance in abeyance until the March meeting of the aldermen occurs.

Alderman Distin was absent from yesterday's meeting, and therefore did not hear the pleadings of two of the city's preachers, the Rev. J. W. Barrett and Rev. H. D. Holmes, who faced the issue against pool room proprietors, also on hand. Mayor Lewis, in an effort to relieve himself of a certain amount of responsibility, in the matter of approving or disapproving the new law, sought the advice of the aldermen, Messrs. Baker, Malone, McKay, Van Valkenburg and Quirk. It was the sense of the Aldermen that nothing further should be done until the March meeting.

### Mayor Favors New Law

This action, of course, leaves the Mayor free to act during the next ten days. It is understood quite plainly by everybody that Mr. Lewis is favorable to the new law.

Rev. J. W. Barrett, replied at different times to the arguments advanced by the City Attorney, the aldermen, and the pool room proprietors. He stated that he represented the largest Protestant church in the city. "My name is Barrett, gentlemen," he said, "and I have learned to grin and bear it. I am not only representing this church voluntarity, but I am representing the moral sense of the people of Fulton, I can safely say that the resolution is against the purposes for which my church stands and the principles which it tries to enforce.

"The ordinance is against the proper preservation of the Sabbath day," Mr. Barrett stated, and it means really the commercialism of the Sabbath." Mr. Holmes requested the city attorney to inform him whether the new ordinance is not in opposition to the laws of the State of New York. Mr. Hillick replied that the matter came to an issue of whether the action of the Board conflicts with the State Law. "It is within the power of the board to contral the pool rooms," he declared. "The State of New York has certain Sunday laws and our right are subjected to and limited by the State law. Whatever action the council takes is still under the governing power of the laws of the State of New York." Mr. Hillick concluded.

### Pool Room Men Appear

Ray Westover, a pool room proprietor, said he could not see why the operation of a pool room on Sunday afternoon would affect the observance of the Sabbath. He is of the opinion that the pool room business is a straight business proposition, made so by reason of the license fee exacted from proprietors ever since June, 1915.

Daniel Walsh, who also operates a pool room, cited the fact that pool rooms in Syracuse and other cities are permitted to remain open on Sunday. He did not believe that pool playing should be classed as an amusement alone; that it is also a business proposition.

Alderman Malone's sentiments were summed up in these wordss That parents should exercise proper control over children by keeping them away from pool rooms if they think the places are objectionable; that a certain amount of recreation must be had by the young man and that too undue restriction of pleasures will drive young men behind closed doors.

Mr. Hillick said that theCouncilmen should exercise just judgment in the matter; that if there are laws of the State of New York which prohibit these things, it is not a question for the board to consider, but a question to be considered at another time and place. Mr. Walsh cited a provisio in the Penal Code of the State which leaves it optional for the council to permit pool rooms to remain open on Sunday.

Prior to June of last year, the pool rooms were open on Sunday, but at that time an ordinance was passed fixing a license fee and prohibiting their operation on the Sabbath.

# CHANCE TO LEARN ABOUT POTATOES

The program of the coming session of the New York State Vegetable Growers' Association, which is one of the many features of Farmers' Week at the New York State College of Ariculture at Ithaca, has just been announced. The schedule for these sessions covers four days, from Tuesday, February 8, to Friday, February 11. The program consists of lectures, round table discussions, and conferences on the many varied phases of vegetable production. Among the topics to be presented are marketing, muck land management, farm canning, practical plant breeding, intensive garden methods and good seed. One afternoon will be devoted to a round table on vegetable insects and diseases, and there will be papers and discussions on celery, onions, tomatoes, late cabbage, and greenhouse cucumbers.

In addition to members of the college staff, Mr. J. J. Dillon of the New York State bureau of foods and markets; Mr. R. W. Jordan, a prominent muck land operator of Ohio; Mr. W. F. Hallauer, a celery grower and dealer of New York State; Professor I. C. Jagger, plant disease specialist of the University of Rochester, and Professor W. B. Nissley, of the Long Island School of Agriculture will take part in the meeting.

It is stated that committees of the association are hard at work preparing reports on such subjects as the relation of the colleges and experiment stations to the grower, packages, and marketing, transportation problems, local organizations, legislation and crop reports. The association says there will be no formal and meaningless reports and that the sessions devoted to these special topics have always been full of ideas and plans for greater usefulness for the organization.

**Muck Soils to Receive Attention**

The muck soils, it is stated, are to receive special attention at the meeting of the Vegetable Growers' Association. Mr. Ralph W. Jordan is to lead discussions of the subject on February 8 and 9, Tuesday and Wednesday, and he will have many suggestions to offer growers from his wealth of experience. Mr. W. F. Hallauer will discuss celery at one of the Tuesday-morning periods. He is familiar with the crop both as a grower and a dealer.

These features, together with topics of a general character on plant diseases, insects, seed, and marketing, will make the meeting of special interest to muck land men.

## WHY LIFT THAT LID?

To the minds of a safe majority of the people of this city, the most far-reaching action, the incident having the most vital effect upon the morals of the young men, in the few weeks of the present administration, was the announcement made yesterday morning, that the Board of Aldermen had declared war upon the quietness that pervades the pool playing parlors during Sunday.

There was no mistaking the intent of the ordinance. It was plain enough to all who wanted to understand. It meant that, in the event of concurrence by the officials, the law would not interpose objections to playing the pockets in public places on the first day of the week.

In its consideration of what is necessary by way of amusement on Sunday, The Evening Times has always shown a liberal front, going so far as to sanction open movie houses. This approval is in consideration of what is deemed good for the greatest number of a mixed population such as we have in this city; but when it comes to permitting games of pool to be played upon the first day of the week, in places intended especially for that purpose, our responsibility ceases and we commend the action of persons who have intervened their objections to the ordinance.

In the opinion of The Evening Times, Sunday pool playing in public places is not only useless but dangerous to the community. In presenting an argument in favor of the Sunday movies, the discrimination comes from the fact that pool playing in public halls is bound to separate the members of a family upon the one day in the whole week when by all that is right and holy members of a family should not be seggregated. On the other hand, we do no believe that Sunday movies have the same effct. Viewed from any standpoint they do not necessarily exert an evil influence, but on the contrary, if properly managed, may be made of vast educational value—a fact acknowledged by almost everybody. In addition to the educational features which should obtain in the Sunday movie houses, there is another redeeming feature, viz: They give to the tired worker a safe means of relaxation and recreation which he cannot secure during the hours enjoyed by persons who have shorter hours of employment.

The Evening Times does not believe in insulating people from every form of relaxation upon the first day of the week, because, in most instances, prohibition fails to prohibit. It is necessary therefore to choose between two forms of Sunday amusement for the people. One decision is to put the lid down fast and hard upon pool playing.

## THE REMARKABLE CASE OF THE APPAM

The appearance of the missing liner Appam under the German flag at Norfolk is dramatic with a touch of comedy. There is also an element of mystery in it. Long overdue on her voyage from an African port to Plymouth and supposed to have foundered or to have been sunk by a submarine, the Appam was zigzagging across the Atlantic with a German prize crew on board when her British owners had given her up for lost.

The voyage was an adventure of the sea with no parallel for audacity in any war; and the interest of it is heightened by the manner of the capture of the lost ship and the mystery of her navigation across the Atlantic despite the patrolling British navy. It is the practical Germans who have furnished the sea romances of the most sordidly monotonous of all wars with resources the most meagre and forbidding.

It turns out that the Appam was not captured by a submarine, which is to be regretted, because neutrals would have welcomed an example of lawful conduct of submarine warfare by Germany after a long series of aggressions and transgressions that can never be palliated and have given her an odious reputation. It seems that the Appam was taken by a converted merchant ship, that is to say, an auxiliary wrshiap commanded by a German naval officer. For the first time in this amazing war, we believe, a prize crew was put on board a captured ship. There was not a great deal of mystery in this arrangement, as it will probably appear that the Appam did not have boats enough to carry her several hundred passengers and sailors, and even the German limit their right to sink merchant ships summarily to submarines after, in some cases, the crews and passengers have had time to take to open boats. Besides, the converted cruiser was overloaded with non-combatants of other captured ships. There was nothing to do, if the dictates of humanity were not to be ignored and the law of nations indefensibly disregarded, but to put a prize crew on the Appam.

A mystery begins to befog the incident when the German captors decide to navigate the Appam to a port of the neutral United States 3,000 miles away. They might have taken her to their base, which perhaps would have been even more romantic, or run into a Portugese or Spanish port. However, an American welcome would be warmer and politically more desirable; so the Appam, under British colors, no doubt, began her momentous run with a corporal's guard of armed Germans controlling several hundred unwilling prisoners, who with half an opportunity would have turned the tables on them. Surely a situation of intense dramatic interest! We bow in admiration to these brave and resourceful Germans. For England the case is one of poigant irony, although Englishmen might have carried the thing off just as successfully and with even more composure.

The German naval men having arrived with the Appam in a port of the neutral United States, what is their status and that of their prize? They have made their bed and must lie on it. Perhaps the choice of the United States as a destination was forced upon them by circumstances, but it will not be a happy choice in the view of the German Imperial Government. By Article 21 of the Thirteenth convention of the Second Hague Conference, to which the United States is a party by adhesion, with a reservation to be mentioned, "a prize may be brought into a nuetral port only on account of unseaworthiness, stress of weather or want of fuel or provisions," and it "must leave as soon as the circumstances which justified its entry are at an end." There can be no question of the Appam being sent to a prize court, because the United States made a reservation in the case of Article 23, which provided that "a neutral Power may allow prizes to enter its ports and roadsteads, whether under convoy or not, when they are brought there to be sequestrated pending the decision of a prize court." Great Britain and Japan joined the United States in objecting to this article.

An examination of the German Prize Code, published on July 1, 1915, shows that the Imperial Government recognizes and accepts the attitude of the United States. So the Appam whether her captors call her a prize or a cruiser converted at sea, that is to say, a naval auxiliary, will have to leave Norfolk when able to do so, or her German crew will be interned, while the British non-combatants on board will have to be released.—N. Y. Sun.

## TICKERITIS

Tickeritis is a virus that you cannot get out of your system after it once gets in your blood.

Buying stocks on margin can be cured by bleeding the patient, but this old idea of treatment usually leaves the patient too weak ever to recover his full power of purpose.

Tickeritis is a malady that causes a man to stand and look at a lot of ever-changing figures over which he cannot hope to have the least control. It is a reckless way to try to win, with all the odds against him. It is proof that he is trying to get rich in a quick way, and it has been who thinks he can acquire riches in this way— and hold these riches long.

And what a devilish disappointment it is to have money and be unable to hold it! I would rather be in the deepest shaft on earth, where the fires are near, and without a fan or a blower, than to be busted after once having had money. I know.

Put your money, my friend, into some reliable investment, and do it now.

There is a time and tide in the affairs of men, and you can bet your bottom dollar that this advice is good. You may not reach the top, but if you can cash in, for the love of Mike, get your money while the gettin's good.

Take this money and put it into some local industry, some savings bank, some enterprise that will help to build up your town and your own resources permanently.

During the last few months the war situation has added more than a billion dollars' value to forty securities, and it is no wonder that men are mad. There must be an end. It is better to take profits now, than to try to reach the staggering heights.

No man can watch the tape and at the same time look after his own best inerests well.—Silent Partner.

# Opinions

### CAST THE BREAD

A Herkimer family which invested in some lettuce grown in the south, found amidst it when it was washed a tiny frog which had made the long journey safely in the shelter of the soft, moist leaves. He was only about the size of one's thumb-end but it could be noted that his mouth was extra wide as if restoration to a smile, and there was such a cheerful and friendly expression about his goggle eyes that he was popped into a fish bowl and given regular meals. Hard experience hasn't stunted the creature and he threatens to outgrow the bowl and develop enough frog steak for a family on his hind legs. It is expected, however that he will be given a silver collar and tethered in the yard when bug time comes again. If he continues to grow equally on that diet, he will be brought around to the veranda and used to keep agents off. Thus the crumbs of charity have again justified themselves.—Herkimer Telegram.

### MACBETH AND THE MOVIES

It was discovered and generally recognized some few years ago, that the Colonel is the Great Human Enigma of the Twentieth Century, and yet he continues to amaze the expert observers of human phenomena. Perhaps that is the business of a genuine enigma, to serve as a perpetual puzzle and continually introduce a new element of surprise into the dull routine of life. In any event the colonel sa far has been successful in defending his title, he seems further removed from possible solution than he was 10 years ago.

He told the mayor of Philadelphia the other day: "I am an organization man and have always been. I realize that a public official must reckon and deal with his organization. He must always, however, be willing to disagree with his organization. They musn't dominate him. But on the other hand, when he disagrees he musn't be violent."

This self-characterization as an "organization man" will doubtless strike many students or recent history as unique. There is no question, however that he reckoned and dealt with his organization in 1912 and very likely a man is still an "organization man" even when he forms a new organization and proceeds to raise hob with the old one. Perhaps it may be concluded that the colonel is an organization man in the sense that he is for any organization that is for him, and the records show that he has never been "violent" with whatever might be his organization at the time. His declaration that "the organization must not indulge in too much burglary" seems reasonably ethical. Organized burglary beyond a certain limit is reprehensible.

As to the latest Oyster Bay ideas on "reform" and "uplift" there is a fresh ground for amazement. It has been the common impression that the colonel was never weary in well doing, that he is always on the field of Armageddon, strenuously alert to give battle to the errors of others and to lift the rest of the world to the idealistic plane in which he himself exists. But it seems that he is frequently obliged to relax. The rarefied air gets upon his nerves. This is his illuminating confession.

No nation can stand the strain of living always in the heroic. It is a good thing in its time and place, but when I hear a man perpetually calling for "uplift," I feel like getting up and yelling. I can't stand it all the time myself. You know, after a man has been reading Macbeth steadily he feels he must go out to the motion pictures—at least that's the way I fell about it—and I like the motion pictures.

The public likes the motion pictures, too, and perhaps for very much the same reason that it has always been inclined to like the colonel. For, more than any other man in history, he might be regarded as the human embodiment of the motion picture, lending a fresh and never-ending diversion to the drab monotony of existence and offering a daily change of films. But it is to be feared that his personal views of the movies and their functions is too frivolous. A magnate of the film industry in speaking before the House Committee on Education at Washington the other day asserted that "the great moral lessons of life can be taught more effectively through the medium of the motion picture than through the pulpit." And the colonel regards the movies as merely an antidote for "Macbeth" and uplift work! Here seems to be the basis for another bitter controversy, which might conceivably terminate in the official appointment of another new member of the Ananias Club.—Providence Journal.

# Life In Navy Not One Round of Unalloyed Joy, Says Yeoman

Yeoman Benjamin T. R. Balch, son of Rev. and Mrs. C. A. Balch, of this city, is the guest of his parents. Mr. Balch is twenty year sold and entered the Yeoman's Training school at Newport in June, 1915. The course covers a period of four years. His advancement has been rapid and his opportunities for promotion are greater in this department than in that of the service of seaman.

When Mr. Balch was questioned if he were so satisfied with his work that he would again reenter the service if he had it all to do over," he remarked possibly not as there had been a great deal of disillusioning after taking up the work. For instance, he said it was all very fine to put on a spick and span white suit every morning for practice drill; also to don daily freshly laundered underclothing, but when one daily had to scrub those clothes himself it made a big difference. The deck of the ship is scrubbed; dishes, chairs and tables are scrubbed, until there's nothing more to scrub. That's where the disillusioning comes in the yeoman stated.

The Constellation is the ship on which Yeoman Balch serves. This ship has the distinction of being the oldest vessel in the United States navy, being launched in 1797.

The Yeoman's School was organized in 1900 at the navy yard, New York. It was transferred to Norfolk in 1907, and later to the Training Station at Newport, where it has since been in operation. The applicant to the Yeoman branch of the service, after having passed a vigorous physical and mental examination at the recruiting office, goes to the Detention Barracks to be taught the preliminaries of sea life and, this accomplished, comes to the Yeoman School for instructions. He first receives a working knowledge of the duties of the different officers in the Navy departments; is taught to distinguish the various uniforms, both of the men and officers; is given an idea of the duties of officers aboard ship, and general information along this line which will be helpful to his way thru the various classes of the school. From the preliminary class he is detailed to the General Store Keepers Class, where he becomes familiar with the receipt, storage, issue and care of naval store. From this department he goes to the Executive officers class where accounting is studied. His next assignment is to the Pay Class where he performs pay work for a ship crew of eighty. This work includes opening and closing of a pay, provision and clothing room, and the making of all the necessary returns thereof to the Navy department. Commanding Officers Class, and Yeoman Third Class, or Yeoman Second Class, complete the steps on the remainder of the course. During the time he is passing through the various classes mentioned, the fact that the candidate must be a good man-of-warmans is not lost sight of, for physical exercise and military drills, with this end in view, are given to him daily.

### CONVENTION DELEGATES GET IMPORTANT NOTICE

The calendar for the Spring primary, April 4th, when party delegates to the national conventions will, be elected, has been prepared by the Election Bureau, as follows:

February 29th—Last day for filing party notices (Sec. 75).

March 4th—Last day for publication of primary notices and polling places (Sec. 75).

March 2d to 14th—Certificates of declinations (Sec. 50).

March 20th—Last day for filing declination (Sec. 50).

March 21st—Last day for filing designation after declination (Sec. 50). (Dates subject to change by Legislature).

In each year when a President of the United States is to be elected each party may elect at the Spring primary delegates and alternates to national party conventions. These delegates and alternates may be elected from Congressional districts or partly from the State at large and partly from Congressional districts as the rules and regulations of each party may prescribe.

Petitions designating candidates for the position of delegate and alternate shall be filed with the Secretary of State (Sec. 53).

Members of State and county committees shall also be elected at this primary.

The State committee shall be composed of one member fro meach Assembly district.

The election district shall be the unit of representation for members of the county committee, all petitions designating candidates for these two committees shall be filed with this board.

Souvenirs for the ladies at the Van Wagenen, Inc., sale next Saturday afternoon. adv348

### ODD FELLOWS PLAN TWO MORE FEATURES

The Odd Fellow's entertainment committee, having charge of the mock trial held Tuesday reported the entertainment a huge success.

The entertainment committee will arrange to hold a smoker soon when friends of the members will be invited to attend. A "rollcall,"aceremony is common in the west, is planned for next month.

### OSWEGO'S WATER DEPT. COSTS $6,000 MONTHLY

According to the books of the Oswego Water Department it costs $6,000 monthly to maintain the service. A member of the water board is quoted as saying that about $6,000 in debit accounts are outstanding, including wages to employes, etc.

Children Cry FOR FLETCHER'S CASTORIA

No More Loose Lenses

In keeping with our policy of "always the best—first" we announce the local agency for the new "Kee-Lock" Rimless Bows and Nose Pieces. The "Kee-Lock" has

No Screws in the Lens

Screw holes naturally weaken the lens. The "Kee-Lock" lens fastening fits into a slot cut in the lens. This is solidly cemented by a heat process, thus making the fastening an integral part of the lens. The "Kee-Lock" has no weak spots—neither can the lens possibly wobble or work loose.

Ask to see the "Kee-Lock"—you'll surely be convinced of its superiority.

Wm. C. Morgan - - Optometrist

Beautiful Bust and Shoulders are possible if you will wear a scientifically constructed Bien Jolie Brassiere.

The dragging weight of an unconfined bust so stretches the supporting muscles that the contour of the figure is spoiled.

BIEN JOLIE (BE-AN JO-LEE) BRASSIERES put the bust back where it belongs, prevent the full bust from having the appearance of flabbiness, eliminate the danger of dragging muscles and confine the flesh of the shoulder giving a graceful line to the entire upper body.

They are the daintiest and most serviceable garments imaginable—come in all materials and styles: Cross Back, Hook Front, Surplice, Bandeau, etc. Boned with "Walohn," the rustless boning—permitting washing without removal.

Have your dealer show you Bien Jolie Brassieres, if not stocked, we will gladly send him, prepaid, samples to show you.

BENJAMIN & JOHNES, 51 Warren Street, Newark, N. J.

# THE WALDHORN'S CELEBRATED

Sixty guests met at the home of Mr. and Mrs. Samuel Waldhorn, in Oneida st., last night, to celebrate their 20th wedding anniversary, a number of them coming from Oswego and Syracuse.

The reception was planned by Miss Helen Waldhorn, who had secretly invited the guests. Mr. and Mrs. Waldhorn were persuaded to accompanying friends to the theatre. Upon their return home they were recipients of hearty congratulations.

A number of handsome gifts were received as well as messages of felicition from out-of-town friends and relatives.

Rooms in the Waldhorn home had been cleared of furniture and the young people enjoyed dancing and games while their elders enjoyed whist and other card games. Miss Edith Brown and Miss Lillian Waldhorn entertained by playing selection of music on the piano.

Mrs. J. Cohen, Mrs. I. Cohen, Mrs. J. Weiner, Mrs. A. Shapiro, and Mrs. M. Arnosky were the out of town guest.

## Community Notes

The Queen Esther Society of the First M. E. church will meet with Mrs. Owen McCarthy, of 16 North 5th st., tomorrow evening. A large attendance is desired.

* * *

Mr. William Collins of Ilion visited his father on Sunday who is ill

* * *

The Rev. P. J. Thompson, who occupied the pulpit of the Baptist church last Sunday will again preach to that congregation on Sunday.

* * *

Mrs. Elmer McIntyre entertained Elizabeth Chapter, O. E. S., this afternoon.

* * *

The Fulton High school girls' basketball team will play the Mexico girls in Mexico, tomorrow evening.

* * *

The Rev. Jabez Stallwood, pastor of the First M. E. Church, of Oswego, is recovering from a severe illness.

* * *

Mr. E. O. Lollins, of Mexico, was a recent guest of his brother, Mr. Frederick Collins.

* * *

The Chinese New Year was not celebrated in this city yesterday. There's a reason, too.

* * *

Mr. and Mrs. Ray Westover entertained a party of friends at dinner last night.

* * *

Miss Ella Parsons of Hannibal has been the guest of Mrs. D. H. Denniston.

* * *

Dr. A. C. Flick will lecture on "Causes and Results of the War" tomorrow night at the Presbyterian church. Benefit for the lodging department of the Salvation Army.

# PUBLIC NOTICE

NOTIIE is hereby given that the undersigned intends to file with the Commissioners of the Land Office at the office of the Secretary of State, Albany, on the 24th day of February, 1916, an applicationfor grant of certain abandoned canal lands described as follows:

Situated at a point in the junction of First and Oneida streets "beginning at a point in the North line of Oneida street 35.17 feet westerly from the Southwest corner of block No. 20, thence N. 28 degrees 31 minutes East 154.12 feet, thence N. 64 degrees 28 minutes W. 46.52 feet; thence S. 28 degrees 45 minutes West 95.40 feet; thence N. 81 degrees 54 minutes West 95.40 feet; thence N. 81 degrees 54 minutes E. 72.78 feet to a beginning, containing 0.213 acres of land.

NOTICE is further given that it is the intention of the undersigned to appropriate these lands for the purpose of a Public Municipal Market and that a two (2) story brick and stone building of the dimensions as follows: Width front, 72.48; width rear 46.52; length Eastern side 154.12; length western side 194.18, will be erected thereon.

Dated, January, 1916.

Signed

City of Fulton by

Victor C. Lewis Mayor

### MAYOR AND ATTORNEY IN ALBANY TODAY

Mayor Lewis and City Attorney Hillick left this morning for Albany, to confer with Governor Whitman, the State Comptroller and committees of the Legislature relative to the proposed bonding of the city to secure funds for the payment of indebtednesses incurred by the city prior to January 1st, 1916.

We invite the ladies to inspect our stock of house paint that are being closed out at cost. While we have a nice assortment of colors. Souvenirs for the ladies next Saturday afternoon. Van Wagenen, Inc. adv348

An auction advertisement in The Evening Times for six days prior to the sale is the cheapest way to advertise a sale. adv.

# COMPANY D LOST TO LOCAL FIVE

**Maccabees Retrieve Former Effort to Triumph Over Soldier Boys, Winning by 24 to 12.**

Totally outclassed in the first half, the reorganized Maccabee quintet in their game with the fast Company D five at Church's hall, last night, staged a brilliant come-back and finally won out by a score of 36-34. The forty minute period ended in a tie score an an extra five minute session, during which Captain Ives of the Maccabees scored the only basket, had to be played.

At the end of the first half with the visitors in the lead by a score of 24-12, Captain Ives called his men together and instructed them in a different style of play which proved to be successful from the first. Taking a spurt at the beginning of the second period, the local team by long sensational shots from the floor on three different occasions came within two points of their opponents and at one time towards the close of the game tied up the score. Landers, the brilliant center of the Normal team, who was in the Oswegoian's lineup, made the most sensational shot of the game at this time from more than three-quarters the length of the floor. Crockett, who has opposed the Oswego center on three occasions this season, evened up matters by netting the ball. The score was 34-34 when the timekeeper's whistle blew.

Upon resuming play in the extra five minute period, close guarding was resorted to by both teams in which the Maccabees excelled. The Oswego team could not get within shooting distance of their basket while the rapid fire pass work of the Maccabees resulted in the one tally by Ives.

The hundred spectators who gathered to witness the match, upon noting the players who appeared in the visitor's lineup, predicted defeat for the locals. With Landers, McDonald, Mars and Donohue, conceded to be the best players in the City of Oswego, in the Company D lineup, there did not seem to be a chance for the Maccabees.

On account of O'Brien's resignation from the team, Captain Ives had to present a changed lineup in the game. As a result of the splendid showing, which the quintet made, the same line up will undoubtedly be maintained for the rest of the season.

In a preliminary game between the Maccabee Second team and the Baptist Stars, the former was victorious by a score of 15-9.

The lineup in the Maccabee-Company D game was:

| Maccabee | | Company D |
|---|---|---|
| Snow | Left forward | McDonald |
| Ives | Right forward | Frawley |
| Crockett | Center | Landers |
| Freedman | Left guard | Donohue |
| Merrill | Right guard | Mars |

Referee—Singleton. Substitutions—Leroyf or Donohue.

## SPORT NOTES

The High School team will present the same lineup against Phoenix High in the game at the City Hall tomorrow as appeared at Phoenix last week. Successful practice sessions have been held during the week in preparation of the game.

Coach Merril is well satisfied with the showing of his re-organized quintet and there is little probability of a change being made in any of the positions.

A number of friends of "Kid" Parker, a local pugilist who is slated to meet "Young" Unryan at the Bastable tonight will accompany Parker to Syracuse.

* * *

The Maccabee quintet will oppose the Oswego Normal five tomorrow night in Oswego. A number of rooters will accompany the squad.

## HIGH SCHOOL TO ENJOY STRAW RIDE

The senior class at the High school will hold a strawride to Volney Center tomorrow night. A supper and dance have been arranged.

**BUSINESS—Particularly the most desirable business—is very much like the sport of fishing. You can catch it if you use good bait. The Evening Times offers you the correct bait.**

## PALERMO VILLAGE

Mrs. Mary Vincent is spending the winter at the home of her son, Willis Hunnington in Syracuse.

* * *

Miss Alice Gale is the guests of friends in Syracuse.

* * *

Miss Katherine Sullivan of Fulton was the week-end guest of Miss Maizie Gorman.

* * *

Mr. and Mrs. Glenn D. Trimble with Mrs. Lillian McNeal of Chicago spent part of last week in Syracuse.

* * *

Mrs. Lulu Gilman has been the guest of her aunt, Mrs. Rachel Wood of Fulton.

* * *

Mrs. F. J. Marshall gave a dinner last week in honor of Mrs. Lillian McNeal.

* * *

Mr. and Mrs. Glenn D. Trimble entertained a party of friends at their home on Monday evening in honor of their aunt, Mrs. Lillian McNeal of Chicago, who is their houseguest.

* * *

The members of Palermo Grange are rehearsing a play to be given in Trimble's Hall in the future.

* * *

Miss Minnie Tooley, who graduated in January from the Pulaski Teacher's Training class has accepted a position as grade teacher at South Butler.

* * *

W. R. Attwater of Fulton spent Sunday with friends here.

* * *

Mrs. John Hollenbeck is spending a few weeks in Fulton.

# FARM CENSUS CONFIDENTIAL

Commissioner of Agriculture C. S. Wilson has issued a statement with regard to the farm census to be taken by the school children in which he makes it plain that any information given to the Department will be used only for census purposes and that it must be most emphatically understood that no advantage will be taken of it in the matter of taxation nor in any other way.

Commissioner Wilson said:

"The information obtained in the farm census to be taken by the school children will be used to build up Agriculture in different sections of the state and the Department gives its most positive assurance that no advantage will be taken of any information given nin the matter of taxation nor in any other way.

"It is our desire that all cooperate fully in the plan and furnis sired information, so that the census will be as complete and reliable as possible. This is desired since other states are watching to see how nearly accurate the census to be taken will be."

### Radium Too Dear For Soil.

Professors Hopkins and Sachs of the University of Illinois have been testing the effects of radium on the soil and find that any quantity that can do any possible good to the crops will cost so much as to make its use prohibitive. One milligram of radium costs $100. This distributed over an acre of ground did no appreciable good. Merely to double the quantity of radium emanation normally in the earth would, as the Scientific American points out, cost the farmer $7,500 an acre!

# 5,242 MEMBERS IN CO. GRANGE

**Jefferson County Leads; Chautauqua Second, With Oswego Third. Gain in Delegates Reaches 300.**

Jamestown,—When State Master Vary opened the 43d annuals eesion of the New York state grange yesterday in this city, at the completion of four years in the master's position, he had the satisfaction of closing his administration with a membership for the state of 18,000 more than when he took office.

About 1,000 delegates, associates and visitors are in attendance at the session. The biennial election of officers will take place at this session, and it seems likely that State Overseer S. J. Lowell, of Chautauqua, will be advanced to the master's chair.

The greater part of the opening day's program was devoted to reports of officers. A net growth of 5,000 members in New York state for the grange year ending Sept. 30, 1915, was shown by the annual report of Secretary W. N. Giles, the total membership being 118,609. Secretary Giles is particularly proud of the low percentage of members in arrears, but 833 in an aggregate of over 118,000.

The state grange met at Jamestown in 1888 with 60 delegates as against 333 at the present session. In that year Chautauqua led the counties in membership as she does today with 2,231 in 1888 and 8,343 in 1916.

Jefferson follows closely on the heels of Chautauqua with 8,112 The other leading grange counties are: Oswego, 5,789; Monroe, 5,322; St. Lawrence, 5,242; Wayne, 4,889; Steuben, 4,067. The latter county has made the largest gain of any county, its membership showing a gain for the year of 577. Antario stands second in increase with 384, and Oswego third with 327.

Treasurer W. L. Bean's annual report showed receipts for the year of $64,568.51, with disbursements of $30,377.68. The cost of the last annual session held at Oswego, was $11,058.21.

The executive committee showed in its report that the purchase made through the state grange purchasing committee totaled $515,179, a gain of $75,895.

## LAST NOTES OF ISSUE WERE FILED YESTERDAY

Yesterday was the last day for filing notes of issue for County Court, opening February 14th. The list of civil cases placed on the calendar follows

Felecia Demento vs. Aneglo Falvo, to recover a $220 loan; Jane Shay vs. Mary Loftus and George Loftus, assault; Walter A. Gannon vs. Robert McIvor, colored; Leon E. Sharrer vs. Walter M. Fry, et. al., foreclosure; Joseph Broder, by his guardian, vs. A. H. Smith, negligence; F. E. Sayer et al., plaintiff respondent, vs. J. F. Brosemer, defendant appellant, contract; George Premo vs. J. G. Wendell, negligence; Charles M. Higgins, respondent, vs. Ita W. Russell; Ward G. Fenster, respondent, vs. R. S. Cunningham, appellant.

## PLENTY OF WALTZES IN "THE SPRING MAID"

"The Spring Maid" which is booked for Fulton at The Quirk Tuesday, February 8, matinee and night, needs little boosting, for its wealth of delightful love scenes, swinging waltzsongs and melodious score has been enjoyed everywhere. Music lovers will be humming and whistling "... Dreams," "How I Love a Pretty Face," and "Two Little Love Bees" as soon as the pretty music is heard here. The splendid comedy of the piece has its own appeal. The quaint conceit of the Huntsman and the Rabbit, and all the other humorous scenes make "The Spring Maid" a great favorite.

## CARTHAGE ODD FELLOWS IN FINANCIAL TROUBLE

Carthage—The motion to vacate the order adjudicating Carthage lodge 365, I. O. O. F., to be a bankrupt and to set aside the petition has been adjourned by Federal Judge George W. Ray until February 15, at Albany. The financial difficulties of the Carthage lodge arose from obligations resulting from the construction of the Temple theatre in Carthage. About a year ago the lodge made an assignment for the benefit of creditors. This was followed by bankruptcy void prove successful the lodge would still owe its debts in full.

## NORTH VOLNEY

The social to be given Friday evening February 11 is to be postponed a week on account of the Valentine social on that date at O. D. Tooley's of Clifford.

* * *

There were 30 attended the L. A. S. which met last week Thursday with Mrs. Henry Broadwall.

* * *

F. C. Squires of Felts Mills is a guest of his sister, Mrs. B. C. Coe and family this week.

* * *

Mrs. H. L. Bowen is on the sick list.

* * *

Harold Coe is still confined to the house by illness.

* * *

F. A. Hall found his best horse dead in its stall Tuesday morning.

* * *

The L. A. S. is to meet at the church annex Thursday, February 10. Everyone invited.

* * *

Mr. and Mrs. Will Potter have been entertaining his mother, Mrs. Potter of Arthur.

* * *

Howard West is working at Split Rock near Syracuse.

* * *

Little Miss Lillie May Brown has returned from spending a week with her uncle, Bert Eastland and family of South New Haven.

* * *

Mrs. Addie Fuller of Mexico is staying with her sister, Mrs. Leavy Brown. Mrs. Fuller fell down stairs Monday this week cutting her head with her hair pins.

* * *

Miss Goldie Sikes of Fulton was an over Sunday guest of her parents, Mr. and Mrs. B. Sikes.

The Misses Helen and Florence Broadwell were over Sunday guests of Miss Alice Hall.

### Arabian Laughing Dove.

An extremely strange bird is the singing pigeon, or Arabian laughing dove. In color these pigeons are usually red, mottled or checkered, though they are sometimes found of a bluish color. Their voice baffles all description, being tremulous and broken, with gurgling notes, like the noise of water poured from a bottle. The utterance is varied, and, though there is a resemblance at times to the drumming of a true trumpeter, it is not so sonorous. It is frequently interrupted by one or more of the inspiratory "ahs," which no doubt gives them the name of laughers. Their cooing is soft and melodious, and both sexes take part in the song.

WHAT APPEAR TO BE CALAMITIES ARE OFTEN THE SOURCES OF FORTUNE

# Is Advertising Wisdom

IT IS APPARENT IN THE CASE OF THE MAN WHO FIGURES TO GET INTO HIS STORE 10 PER CENT OF THIS TOWN'S POPULATION BY PAYING OUT THREE TIMES AS MUCH MONEY FOR SPACE AS HE WOULD PAY WERE HE TO USE THE HOME PAPERS TO REACH THE BUYING PUBLIC. THE STING IS IN THE COMPARATIVE RATES FOR ADVERTISING PLUS THE COMPETITIVE BUSINESS BROUGHT INTO THIS CITY. THE MERCHANT WHO CANNOT SEE THIS LOGIC IS A SUBJECT FOR PITY. IF HE FAILS TO REALIZE THE TRUTH HIS DAY OF RECKONING IS ASSURED

## Realization of the Truth Will Be His Source of Fortune

Remember the old German proverb: *"As fortune is sought so is it found,"* and then seek to reach your 10 per cent by Advertising in the Home Papers, which cover your field of trade better than the out-of-town papers.

# SAVING NEW YORK CITY'S CREDIT.

## Banks Came to the Rescue and Insisted Upon the Adoption of the Pay-As-You-Go Policy.

## CITY LOANS EXPENSIVE.

**Interest Paid on Them Amounts to More Than the City Pays In State Taxes—City Officials Agree With Investigators.**

New York, Jan. .—New York city owed $100,000,000 at the outbreak of the war in Europe with no possible means of providing for it unless some bank came forward.

The bankers of the city got together and financed a loan of $100,000,000 to relieve the city and protect its credit.

As a condition in making the loan, the bankers required the city to adopt the plan of reducing its floating debt by paying as it went, which plan became known as the pay-as-you-go policy. Twice within seven years the city has found itself in a position where it had to call upon the banks for assistance.

Prominent bankers have testified that a floating debt of $100,000,000 is too large and that some plan should be devised for taking care of it.

The policy of borrowing money in anticipation of taxes, it has been stated by bankers, is not, in principle, sound finance.

The interest paid on such loans in the last ten years has amounted to more than the city has had to pay in state taxes.

These facts have been brought out at the hearings of the joint committee of the Legislature that is investigating the financial condition of New York city with a view to devising some plan of relief.

There has been no disagreement between the committee and the city officials as to any of them.

The attitude of the committee toward the city has at all times been helpful rather than hostile and the city officials have given evidence of their appreciation of this attitude by their frankness in laying their troubles before the committee and claiming its assistance.

The testimony of leading bankers that the city has been carrying too large a floating debt has been accepted by the city officials without demur.

Already the city has adopted the pay-as-you-go policy which was insisted upon by the bankers at the time the $100,000,000 loan was made. This policy is now being carried out under a resolution of the Board of Estimate. It is likely to be established more firmly by being written into the law.

Two of the most important witnesses called by the committee thus far are Francis L. Hine, president of the First National bank, and Henry P. Davison of J. P. Morgan & Co. Mr. Davison stated to Senator Brown, the chairman of the committee, that he did not want it to appear that J. P. Morgan & Co. were taking to themselves the credit of financing the city's loan of $100,000,000 in the summer of 1914 for the reason that all of the financial interests of the city of New York were associated in the interest of the city.

After he had described the financing of the loan, Mr. Davison was asked by Senator Brown to what he referred as wrong in financing the city. "Did you have in mind particularly," asked the senator, "the amount of short term paper on the market?"

Mr. Davison: "Not particularly except as it was brought to our minds by the crisis then presented. There was the city owing $100,000,000 with no possible means of providing for it unless some bank came forward. They were extended and were dependent upon the bankers for the solution of their problem. We thought that was unsound. It was a question of degree but that seemed to us to be serious; a floating debt of $100,000,000 we felt was much too large. Therefore we suggested that some plan be adopted and at the moment of our first suggestion we were met by the enthusiastic approval of the suggestion on the part of the city authorities. The Comptroller said that we could be no more concerned about that than he was."

Francis L. Hine, after testifying to the financing of the $100,000,000 loan, was asked by Chairman Brown:

"In your opinion, was it possible at that time for the city to have borrowed, of any small number of banks, the $100,000,000, including the $83,000,000 of gold?"

Mr. Hine: "In my judgment it would have been impossible."

Senator Brown: "You felt that it would be a great national catastrophe if the credit of the city of New York broke down at that time?"

Mr. Hine: "We did."

In relation to the pay-as-you-go policy, Mr. Hine said the making of the loan was conditioned upon an agreement to adopt such a policy.

Senator Brown: "And you regarded action by the Board of Estimate as a part of their agreement in good faith as a condition of the loan?"

Mr. Hine: "We do."

When asked if he regarded the practice of making loans in anticipation of the collection of taxes sound, Mr. Hine testified: "I consider it unsound exercised in the degree in which it has been exercised."

# A Song of the Sword

I am the sword,
Yea, babble of peace as ye will,
I am the master still.
For mine is the ultimate word.
When I speak naught else is heard.

Since ever the world began
I have been lord of man.
When the first anvil rang
'Twas of the sword it sang,
And the forge of Tubal roared
As he hammered the ruddy sword.

Scepter and orb and crown
At the flash of my wrath sing down,
While the bat spreads dusky wings
O'er the urns of mighty kings
That I broke and cast aside
And crushed in their pomp and pride.
For those I love I crown
And those I hate cast down.

Potent to slay or shield,
Lord of the stricken field,
Where flaunting pennons stream
And sparkling lances gleam,
Men come to be judged by me,
And I utter the last decree.
For I am the sword,
And, babble of peace as ye will,
I am the master still.
—D. B. Van Buren in New York Times.

# FARM TO TABLE PLAN GETS O. K. OF POSTOFFICE HEAD

**Parcel Post Will Bring Housewife and Producer Together.**

W. N. Collins, acting postmaster of Kansas City, Mo., has won recognition from Washington of his efforts to make the parcel post a farm to table servant. By special order of Postmaster General Burleson he has been given authority to become a clearing house between the farm and the city, bringing producer and consumer together.

In results it is perhaps the biggest thing the department has done since establishing the parcel post service, Mr. Collins believes.

Here is what it will do: The farmers, and especially those within the 150 mile zone of Kansas City, will write in giving a list of the produce they have to sell. This will be printed on a list issued at frequent intervals. The city housewife who asks for this list may have it mailed to her, and she may write direct to the producer to order. The carriers will distribute these lists to the homes if the voluntary demand does not prove sufficient.

Thus consumer and producer are introduced. If the producer wishes the product may be sent C. O. D. for an extra charge of 10 cents, and the postoffice department will collect and return the money.

"Few persons realize how cheaply they might have fresh vegetables, fruit butter, eggs, meat, lard, sorghum and many other farm products direct from the farm," Mr. Collins said. "The carriage charges are very light. The rule is that within 150 miles the package is carried for just 4 cents more than the number of pounds. Thus a ten pound ham would be carried for 14 cents. The C. O. D. charge, which insures the sender, would be the uniform one of 10 cents, thus bringing the total ten pound cost up to 24 cents."

Mr. Collins will get a list of the farmers by bulletins sent to the country postoffices.

# SUCCESS OF HOME GARDENS.

**International Child Welfare League Issues Statement on Its Work.**

The International Child Welfare league has issued a statement showing what success it was able to achieve in its home garden movement for children last summer with the proceeds of a flower ball which it held last spring. The statement reads in part:

The International Child Welfare league, in conjunction with the bureau of education of Washington, has been studying the introduction of Commissioner P. P. Claxton's plan of the home garden under school supervision as a substitute for child labor. The experiment was tried in Westchester county, N. Y., last summer and has been so successful that the Welfare league is co-operating with all educational leagues in pushing the work.

The school garden and the home garden are often confused. The former is a community affair, with a teacher to oversee the whole plot. This plan is an excellent one for collective instruction and is recommended for children who have no home garden. The value of the home garden lies in the fact that the parents take more pride in the work of the child and with its economic results, which are more readily seen in the home than when the garden is at some distant point.

Tarrytown, N. Y., raised privately sufficient money, coupled with an amount contributed by the International Child Welfare league, to start the work with a teacher in the Washington Irving high school and also in the North Tarrytown high school. In this town the work was systematically organized under the Claxton plan, and its success has led to its adoption by the board of education as a part of the regular school work in the coming year.

The fact that the work is done after school hours and continued into the summer vacation period makes it easy to fit into the curriculum of any school, and the happy results in its bearing on health and morals make it a most valuable adjunct to school education.

**CONTENTMENT.**

**Contentment is the true philosopher's stone. The poor are rich who have it; the rich are poor who possess it not.**

# Mr. Barnackel

By EDITH V. ROSS

"Enoch Barnackel! What a name! Any one would know that he was a crusty old man of the farmer type, uneducated and with no manners. But what can I do?"

These words were spoken to herself by a girl who had some sixteen years before been left at a foundlings' home and who had been given the name of Helen and had later chosen the additional name of Whitman. She had been retained at the home as an employee till she approached seventeen, then was informed that a farmer named Barnackel had written that he wanted a wife and asked whether one could be sent to him. Helen was informed of the opportunity.

After a long and tearful deliberation, feeling incompetent to go out into the world and make a living, she decided to go out to Mr. Barnackel. If he was very terrible she might commit suicide. The matron approved of her resolution, for she was comely, and the good woman feared that with her inexperience she might fall a victim to some designing person.

Mr. Barnackel was informed that there was a young woman ready to accept his proposition, and he sent money for her journey. The heart broken girl nerved herself to her fate and one afternoon alighted at a railway station at the village near which his farm was located. A young farmer with a whip in his hand approached her and asked if she was the young woman who was to marry Mr. Barnackel.

"I am," was the reply. "That is, if he isn't an ogre."

The young man smiled. His smile was very winning. "I have a team here," he said. "I'll drive you to the farm."

When seated in the wagon and he had said "get up" to the horses Helen expected that he would say something to her. He did not. He seemed to be thinking.

"What kind of a looking man is Mr. Barnackel?" she asked.

Now, the young man was George Barnackel, nephew of the man who had written for a wife. The uncle was fifty years old, his face looked like a ball of strings, his hair was red, and he was just too unlovely for anything. At any rate, that is the way the daughter of one of the neighboring farmers put it. In fact, he was exactly what Helen had conceived him to be, judging from his name. He must also have been a fool or he would never have sent his good looking nephew for a young girl he expected to make his wife. Upon Helen's inquiry George turned his face toward her, displaying a set of regular white teeth by smiling, and asked:

"Suppose I should tell you that he is a disagreeable old codger and always cross as a bear. What would you do?"

"I would jump into the river—that is, if there is one near by."

There was a prolonged silence, at the end of which the young man said:

"And what would you say if I told you that I am Mr. Barnackel?"

Helen's heart went up into her throat. She made no reply to the question, but she sidled nearer to her companion. Presently there came a subdued voice:

"Are you Mr. Barnackel?"

"I am."

Her face was bent low. He leaned lower himself and looked up into it. He saw what he took to be a look of pleasure. Perhaps it was relief. The reins were in his right hand. She was sitting at his left. He put his left arm about her waist. She looked up at him, her eyes wet, a suspicion of a smile on her lips. He kissed them.

"How far is it to the farm?" was the next thing said.

"About three miles."

George drove over six miles, which seemed like three to Helen, then stopped at a farmhouse.

"Wait in the wagon," he said, "while I go in to tell my mother and sister you're here. They don't know you're coming."

Leaving the reins in her hands, he went into the house. He was gone a long while. Helen saw the face of an elderly woman surveying her from a window, then a younger one doing the same.

"Oh, dear," she said, "I hope they're not going to make him send me back!"

Presently a door opened and the two women came out, the elder in advance. She welcomed Helen, though she seemed constrained. Leading her into the house, the younger woman showed her to a chamber upstairs and, shutting the door behind them, took her in her arms, exclaiming:

"You poor child!"

"Why am I to be so pitied?" asked Helen, surprised.

"You're not. It's all right. We'll make you very happy. My brother is not the Mr. Barnackel you came out here to marry. That one is my uncle, a crusty old man who would not do for you at all. Being rheumatic, he asked George to drive you from the station to his farm. George wants you himself. Mother has given her consent, and you are to be married—that is, if you wish to marry George—at once."

Helen asked if haste were necessary. George replied to this that his bride belonged to his uncle, was expected by his uncle and unless the knot were tied there was no knowing what he would do in the matter. The chance of being turned over to the old curmudgeon so terrified Helen that she was only too glad to be married at once. The wedding took place that evening.

# Woman's World

A Pioneer Civilizer of the Northland.

MISS JESSIE LUTHER.

Ten years ago there journeyed to the deep sea fishers of the northland, depressed, dulled ten months of the year by mists, snow and cold, Miss Jessie Luther, who stayed to found and later to direct the industrial department of the Grenfell missions along the coasts of Newfoundland and Labrador.

Recently in New York occurred a remarkable exhibit of the results of Miss Luther's long devotion, a vivid testimony of the relief and saving occupation given these snowbound fishermen and their families. Conspicuous were schoolbags of hair seal and gayly beaded for $4; varieties of seal moccasins squirrel topped and red tongued at $2; grass baskets, many woven by two blind men, the native grasses having been seized and dried during the short summers; hooked mats with quaint borders of creatures of the northland—seals, Eskimos, rabbits and reindeer—and delightful seal garbed Eskimo dolls at $1 apiece. The only distinguishing marks of the feminine garb as decreed by Dame Fashion of Labrador, are the chantecler tab, worn anteriorly, and the roomy hood, designed

COSTUMES OF LABRADOR.

with accommodations for a baby therein. The lower cut gives exact replicas of native costumes.

One of the most lucrative and interesting of the exhibits is that of wonderful homespun—gray, tan and soft blue suitings and a charmingly fluffy white weave, half angora, for small children's coats, at $1.75 a yard. Another interesting point of observation was that, while the northland bending is apt to be of rather set, prim patterns, the Eskimo embroideries, just as the director found them—native—along the Labrador coast and even north of Sandwich bay, remarkably resemble the Japanese both in design of flowers and in colors.

For lifetimes these fishermen habitually hunted rabbits for potpies and then discarded the skins. Miss Luther taught them to dress these skins, cut them in strips, twist them and then weave them with hand spun yarn of different soft, delightful shades into fascinating crib and carriage robes—veritable baby buntings. These rare blankets, so fringed and cozy, range from $7.50 to $10.

### Paris Sausage.

One pound of lean pork, half a pound of back fat, four ounces of breadcrumbs, one ounce of salt, a quarter of an ounce of pepper, one grated onion; mix up well, add the seasoning and the breadcrumbs, add half a pint of water, mix well, fill into skins, tie up in lengths of two and a half inches, weighing about twelve to the pound; then make a brine with one quart of water, one pound of salt, a quarter of an ounce of saltpeter, boil together and pour into a bowl; when cold, color with cochineal and put the sausages in for one hour; take out and dry them in the air, then cook in the usual way.

### Sugar Cookies.

One cupful butter, two eggs, two cupfuls sugar, two-thirds cupful milk, one teaspoonful cream of tartar, one-half teaspoonful soda and five cupfuls flour. Salt and flavor to suit taste, brush top of cookies with milk and sprinkle with sugar.

# Bininger's Tramp

By LOUISE B. CUMMINGS

Bininger was a great walker. He thought nothing of a five mile tramp before breakfast, and as to a day's walk, he could do forty miles. One day he was lounging in the Arlington Country club with Herbert Yorke, boasting as to what he could do on his legs, when Yorke offered to bet him a box of cigars that he couldn't walk twenty miles in three hours.

Bininger took the bet, and a course was laid out forming an ellipse, the starting and ending point being the Arlington clubhouse.

Bininger had no sooner started than Yorke telephoned to his sister Kate:

"I say, Kit, I've a bet with Charlie Bininger that he can't do a job of walking in a given time. I want to take you across to Hilton, you to waylay him there and keep him from winning the bet."

"How can I do that?"

"How can you do that? Why, by stuff and nonsense."

"What'll you give me if I succeed?"

"A five pound box of candy."

"When do you propose to leave?"

"I'll be with you in half an hour."

In thirty minutes Herbert Yorke was before the door of his home in his car. His sister got into it, and they proceeded along the minor axis of the ellipse that Bininger [illegible] toward Hilton. But Kit declared that she would prefer to tackle the pedestrian about three miles before he reached the goal, and the course was changed to Glendale, where Kit had friends. Arriving there her brother deposited her at the door of the Marklands, with whom she was intimate; then he returned to Arlington.

It was about 3 o'clock in the afternoon that Bininger [illegible] Kit was on the front porch in walking costume.

"Why, Mr. Bininger," she exclaimed, "what are you doing here?"

Beninger did not propose to tell her that he was walking to win a bet from her brother. He said that he was taking a twenty mile constitutional and was on his way to Arlington.

"How fortunate!" said Kit. "I am just setting out to walk home myself. You wouldn't mind my going with you, would you?"

"I would be delighted if it were not that I must be at Arlington at a given time. I fear I shall have to walk too fast for you."

"Never fear for that. I love tramping, and this is a fine, crisp morning for a walk."

Bininger looked at his watch and frowned, but he had not the heart to refuse a girl, and a pretty girl at that. He said that he would be very happy to have her company, only he must leave her behind if she couldn't keep up with him.

Kit did the first mile at a satisfactory pace, but on the second she began to lag. Bininger was always several yards ahead of her. Finally he turned and told her he must leave her or fail to do his tramp in the time set for its accomplishment. Kit said never a word, but the look she gave him said very plainly that she was hurt; that she had expected Mr. Bininger would prefer her to completing a walk on time. He had admired her, but it had never occurred to him that he was any more to her than any other friend. What was a box of cigars compared to that look? He went back to where she was dragging herself along and offered her his arm to lean upon. Presently, coming to a log beside the road, she sank down on it and told her escort to go on, since he preferred a pedestrian feat to her. She would get home somehow or other.

Instead of going on Bininger sat down on the log very close to her and, since she seemed exhausted, formed a back for her to lean against with his arm.

When time was up for the accomplishment of the walk Yorke sat on the clubhouse veranda with his watch in his hand, looking up the road for Bininger. At 3 o'clock, there being no sign of the pedestrian, he put his watch back in his pocket, asked a company of young men into the clubhouse and opened champagne.

"I don't care for the cigars I have won," he said gleefully, "but I rejoice at having got ahead of that boaster."

The conviviality was at its height when in walked Bininger, looking as if he had been doused with joy instead of having made a twenty mile walk. He directed the steward to produce a box of Yorke's favorite brand of cigars and called for more champagne.

"You seem very happy over your defeat," said Yorke somewhat uneasily.

"I am. Here's that you may be pleased when you hear why I am happy!"

Yorke said no more, but when the party dispersed went home and asked his sister why Bininger was so pleased at losing his bet.

"Why, because by losing a box of cigars he won me."

"You! You don't mean that you had to promise to marry him to make him lose his bet."

"I had to make him lose his bet in order to get a proposal from him. I couldn't do it very well walking at five miles an hour, could I?"

"I think you could."

"Well, we're engaged, and, what's more, we're engaged for good. I've had serious intentions with regard to him for some time."

# Easy & Practical Home Dress Making Lessons

Prepared Especially For This Newspaper by Pictorial Review

## On the List of Boudoir Clothes.

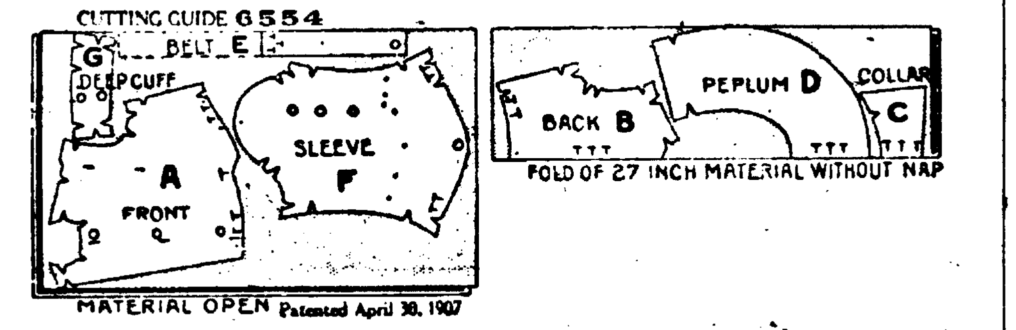
A dainty dressing sacque trimmed with hand embroidery, lace and ribbon, finished in a perky bow at the front.

This is an excellent time of the year to replenish one's supply of boudoir clothes, for the dressing sacques and negligees are charming. Here, too, simplicity is the keynote of smartness and one finds among the most interesting of the new offerings the dressing sacque illustrated. It is fashioned of dainty china silk trimmed with hand embroidery and lace. A choice of finishes is provided for the sleeves, which may be short, with flare cuffs, or long with deep, semifitting cuffs. The attached one-piece circular peplum is edged with a ruffle of self-material, put on with a heading of lace insertion. In medium size the sacque requires 3¾ yards 27-inch material, 9 yards of edging, if lace is used for the ruffles instead of silk, ¾ yard beading and 6 yards insertion.

To cut the design, first measure off enough material to accommodate the back, peplum and collar. Fold it carefully in half and place these sections on a lengthwise fold. Now, take the remaining silk and double it in half, two reverse or two right sides together, so that there will be a double layer of open material. On this place the front, the deep cuff, the belt and sleeve, all on a lengthwise thread of the silk.

For the shorter sleeve with flare cuff cut off lower part of sleeve on small "o" perforations.

The embroidery design is simple to make and is pretty in the same shade of the sacque or a contrasting color.



Pictorial Review Dressing Sacque No. 6554 Sizes 34, 36, 38, 40, 42, 44, 46 and 48 inches bust. Price, 15 cents.

# For the Children

Master John T. Lambert Rollicking in the Snow.

© by American Press Association.

The early fall of snow was greatly enjoyed by the children of New York city. During the time it remained the city parks were crowded with youngsters, who fought snow battles, built forts and coasted on the hills. Snow does not stay very long in the big city, so the little folks make the best of their opportunities. Central park is always a center of great activity after a snowfall, and the children of the rich who live on Fifth avenue and adjacent streets gather in numbers to enjoy the fleeting joys that Old Boreas provides. The young lad in the picture is Master John Trumbull Lambert, son of the famous surgeon, Dr. A. Lambert. He was engaged in a snow fight with his brother, Adrian, when the camera man caught him.

### "Steal the Flag."

"Steal the flag" is a game that will interest the girls as well as the boys. This game is played as follows:

A gathering of boys is divided into two groups, or armies, called blue and gray, each army consisting of an even number of boys. There are two flags between the two armies, and a boy is placed on each side to guard the flag. The object of this game is to try to seize the enemy's flag. The flag must be placed so that the enemy can easily seize the flag.

A line is made to divide the two armies. If one of the boys from the blue army crosses the line and a boy of the gray army tags him before he has time to seize the flag he is taken prisoner.

Then the blue decide as to which of the boys should rescue the prisoner, and if the boy succeeds in rescuing the prisoner and the enemy's flag his side wins. In order to rescue a prisoner the boy has to touch him.

### Camp For Boy Scouts.

Charles T. Coutant of New York city has donated the use of seventy-five acres of land in the Catskills for the use of the Boy Scouts of America of the city. The tract combines excellent trout streams, open glades, cascades, beautiful dry camping sites at an elevation of 2,000 feet and pure spring water in abundance. The mountain scenery on every hand is beautiful beyond description. There are no buildings. It is just such a place as would make the heart of the average boy leap for joy, and if there are some among the boy scouts with weak lungs they will find health here in every breeze that blows.

### "The Cobbler."

A game that is very enjoyable is called "the cobbler."

The cobbler sits in the middle on a stool or hassock, and the others join hands and dance around him. "Now, then, customers," says the cobbler, "let me try on your shoes," and at the same time, but without leaving his seat, makes a dash for some one's feet. The aim of the others is to avoid being caught. Whoever is caught becomes cobbler.

### Beheadings.

I am a cereal of five letters; behead me and I become what summer is noted for; behead me again and I am to devour; behead me again and I am a much used preposition; behead me again and I stand for a beverage.

Answer: Wheat, heat, eat, at, t.

### The Wind.

I saw you toss the kites on high
And blow the birds about the sky;
And all around I heard you pass
Like ladies' skirts across the grass.
O wind, a-blowing all day long,
O wind, that sings so loud a song!

I saw the different things you did,
But always you yourself you hid.
I felt you push, I heard you call,
I could not see yourself at all.
O wind, a-blowing all day long,
O wind, that sings so loud a song!

O you that are so strong and cold,
O blower, are you young or old?
Are you a beast of field and tree
Or just a stronger child than me?
O wind, a-blowing all day long,
O wind, that sings so loud a song!

—Robert Louis Stevenson.

### SLANDER.

The many persons who are always quick to spread evil reports about other persons should ponder these words of Henry van Dyke: "Never believe anything bad about anybody unless you positively know it is true and never tell even that unless you feel that it is absolutely necessary."

Children Cry for Fletcher's

CASTORIA

The Kind You Have Always Bought, and which has been in use for over 30 years, has borne the signature of Chas. H. Fletcher and has been made under his personal supervision since its infancy. Allow no one to deceive you in this. All Counterfeits, Imitations and "Just-as-good" are but Experiments that trifle with and endanger the health of Infants and Children—Experience against Experiment.

What is CASTORIA

Castoria is a harmless substitute for Castor Oil, Paregoric, Drops and Soothing Syrups. It is pleasant. It contains neither Opium, Morphine nor other Narcotic substance. Its age is its guarantee. It destroys Worms and allays Feverishness. For more than thirty years it has been in constant use for the relief of Constipation, Flatulency, Wind Colic, all Teething Troubles and Diarrhœa. It regulates the Stomach and Bowels, assimilates the Food, giving healthy and natural sleep. The Children's Panacea—The Mother's Friend.

GENUINE CASTORIA ALWAYS

Bears the Signature of

Chas. H. Fletcher.

THE CENTAUR COMPANY, NEW YORK CITY.

# The Kitchen Cupboard

## FOR WINTER DINNERS.

ROAST SPARERIB.—Trim rough ends neatly, crack the ribs across the middle, rub with salt and sprinkle with pepper, fold over and stuff with the following: Beat the yolk of an egg thoroughly and mix with it a tablespoonful of hot vinegar, one-half a saltspoonful of powdered thyme, as much finely minced parsley as will make it quite thick. Boil a large Spanish onion in three or four waters until it is tender, press it well, mince it finely; mix with it the vinegar and add two ounces of boiled pickled pork cut up in very small pieces, a little pepper and salt; sew up tightly, place in a dripping pan with a pint of water, baste frequently, turning over once so as to bake both sides equally until a rich brown.

Hotpot.—Materials: Two pounds of lamb suitable for stewing, two pounds of potatoes, four onions, salt, pepper and a little flour, water or stock. Directions: Cut the meat into pieces convenient for serving. Peel the potatoes and cut them into small, thick pieces. Slice the onions thin. Mix the salt, pepper and flour and roll each piece of meat in the mixture. Put a layer of potatoes in a deep dish or bowl (a wide mouth bean pot is a satisfactory dish), then a layer of meat, next sliced onion, repeating the process till the dish is filled. Have potatoes for the last layer and fill the dish with water or stock. Bake three hours in a moderate oven, adding more water if necessary. Serve in the dish in which it is cooked.

Creamed Chicken.—Take the white meat of a boiled chicken and cut it into thick slices or disks and put into a saucepan. Put the saucepan on the stove, moisten with hot cream (just enough to cover the chicken), add one whole sweet red pepper cut into disks, a pinch of salt and pepper and let simmer gently for about fifteen minutes. Remove the saucepan to the side of the stove, beat the yolk of an egg and mix with the cream, but do not allow it to come to a boil. Add a piece of sweet butter the size of a walnut and serve immediately, very hot; over some fresh made toast.

Pork Stew.—Cut up and wash one pound of pork from neck or fresh spareribs, put in kettle with enough water to cover. Cut up in quarters one turnip (or yellow turnip enough to equal a large potato), one small onion (fine) and one small carrot. Put in pot with salt to taste and let cook about one and one-half hours until vegetables are done and pork nearly done, then cut up two potatoes and cook whole until done. Thicken if desired.

Baked Tenderloin of Pork.—Take two strips of tenderloin of pork and wipe clean with a damp cloth. Make a stuffing of stale breadcrumbs highly flavored with onion, sage, pepper, salt and melted butter, with milk or melted butter to moisten. Place stuffing between two tenderloins, tie all together and bake in a moderate oven until done. Baste often with melted butter.

Anna Thompson

Money talks, but all of Carnegie's millions can't coax the scrappers over there to stop and listen.

Hopewell is considering a change of its name to "Tryagain."

# TODAY'S FASHION NOTE

This exquisitely simple frock is carried out in embroidered crepe in a delicious shade of Bordeauz red. The deep flounce is attached to the hip-yoke under a wide tuck and where the skirt and bodice join there is a crushed girdle of black satin. The straight line of embroidery around the waist instead of scallops or a yoke effect entitles the frock to original classification. Filling in the round neck is a yoke of lace, 3-8 yard being required. In medium size the dress calls for 5½ yards 36-inch material.

Pictorial Review Costume No. 6573 Sizes, 34 to 44 inches bust.

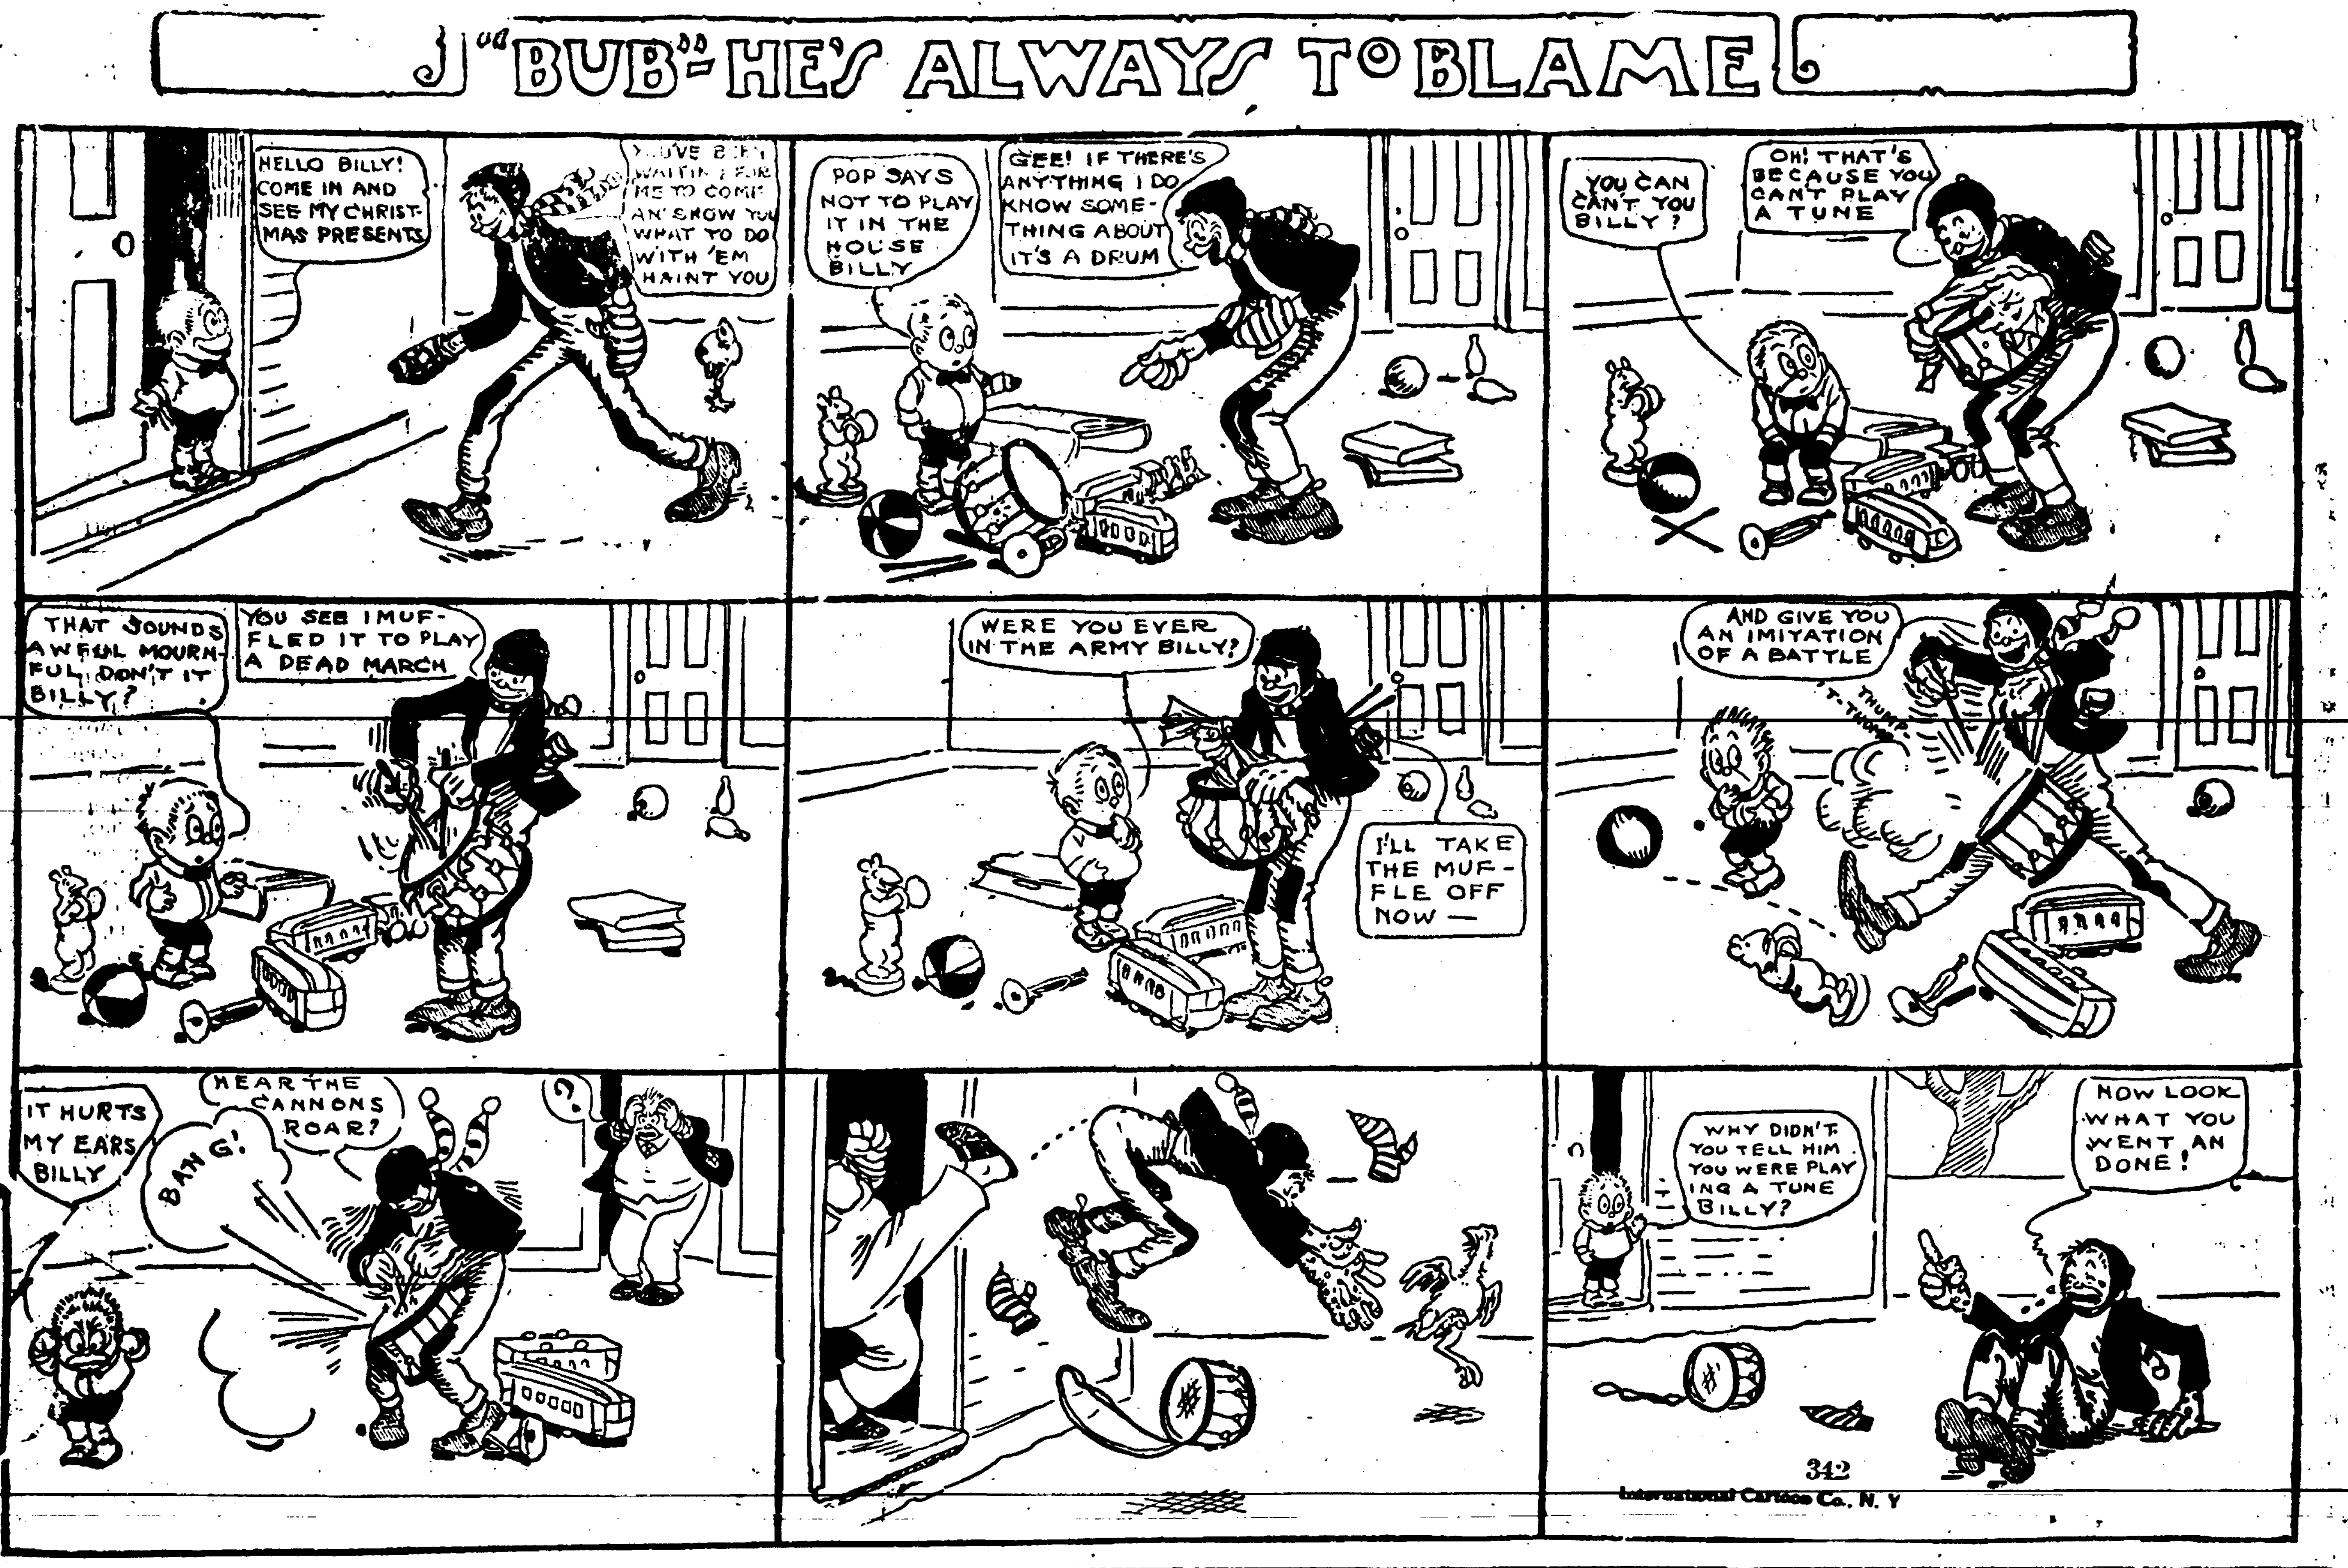
Pictorial Review Patterns may be procured at the J. R. Sullivan and M. Katz & Co. Department store, Fulton.

### Sperm Oil and Brass.

Sperm oil makes one of the best polishes to use on brasswork that is exposed to the weather.

### Keely's Motor.

The Keely motor was a machine invented by John W. Keely of Philadelphia, which he claimed was capable of generating its own power without cost. It was described by himself in the high sounding term as a pneumatic-pulsating-vacua engine. So successful was Keely in manipulating the machine and concealing the real agent by which it was operated that many capitalists were induced to put thousands of dollars in it. Scientific men always regarded it with extreme suspicion, and after the death of Keely in 1899 it was found to have been operated by compressed air supplied from a concealed tank.



# PACK YOUR KIT FOR CAMP

Everyone who has enough time for a fishing, hunting or camping trip, may now get close to nature, under the sublimest conditions, for very little money. The United States government, which has been taking over great tracts in the White Mountains, offers to lease five-acre plots to campers for $5 a year, with permission to erect a shelter on the tract. One may therefore have his camp at Mount Washington, Bethlehem or Franconia quite exclusively and aristocratically, for the price of a good dinner for two at a Boston Hotel. We have known a journalistic and literary gentleman of national reputation who has been accustomed at times to go into these White Moutain forests taking a fortnight's supply of food and a blanket and "dog-tent" on his back, and totally disappear from the world's view for the space of two weeks. Hereafter, with this leasing opportunity on the government's preserve, it will not be necessary for him to live in the forest so primitively. He can put up his shack and dwell on his own forest demesne and in as complete a retirement as he chooses. Communion with the forests and the mountains may be expected to become more common under this leasing system; we shall have a new race of Thoreaus, who in their ordinary life at home may be as mondaine as so many Ward McAllisters. There is but one danger in connection with the system, and that is that the authorized "shelters" will have a tendency to become permanent. A certain acquaintance with the "camps" that have grown up in the Adirondacks, where the butler serves you with wines from France or caviar from Astrakhan, suggests the necessity of defining this word "shelter" with some rigidness.—Boston Transcript.

## HOPKINS—BRENNAN

An early morning wedding occurred at the Church of the Immaculate Conception, the Rev. John Lindsman officiatng, when Miss Nellie Brennan became the bride of Mr. James W. Hopkins.

The wedding hour was 7:15 a. m. Mr. and Mrs. Maurice oCnley attended the couple who left the city immediatel yafter partaking of a wedding breakfast served at the home of the bride, 519 Harrison st.

Mrs. Hopkins is a daughter of Mr. and Mrs. John Brennan, sr., and Mr. Hopkins' home is in Syracuse.

## SCHENECTADY FELT EARTHQUAKE SHOCKS

Schenectady, N. Y.—A distinct earthquake shock was felt here at 11:25 last night.

Reports from all sections of the country showed houses were shaken. windows and dishes smashed and persons thrown out of bed.

Reports from Albany, Troy and Gloversville are that the earthquake was noticed in these cities at the same hour that it was here. Places west of Albany experienced two distinct shocks.

In Troy the shock was the second within a month. Windows in many houses rattled for several seconds and some structures vibrated so violently that residents hurried into teh streets.

In Gloversville buildings were shaken and furniture and other articles moved from their places. The shock lasted for several seconds.

## MORGAN GIVES FAMOUS RAPHAEL; WORTH $500,000

New York—Threem unigficent gifts haveb eenm ade to the Metropolitan Museum of Art by J. Pierpont Morgan, it was announced yesterday by the Museum—the famous "Colonna Madonna,"b y Paphael; the great Hoenttschel collection of Gothic and Renaissance Decorative Art, and the famous sculptures fromt he Chateau de Biron.

The aggregate value of the gifts is estimated to be about $1,75,000. The Raphael is valued at $500,000. the Hoentschel collection at $1,000,000a nd the sculptures at $250,000. Allo f the objects are in the collection formed by the late J. Pierpont Morgan and are now on view at the Museum, having been lent to it by the collector.

### Passports.

Passports are a very ancient institution. Some of the old monkish chroniclers mention as an achievement on the part of King Canute that he obtained free passes for his subjects through various continental countries, on their pilgrimages to the shrines of the Apostles Peter and Paul at Rome. Each pilgrim was furnished with a document in the nature of a passport called "Tracturia de Itinere Peragenta." Hall in his "Chronicle" makes reference to a system of passports in the time of Edward IV. and the enforcement of this system is known to have been very strict in the reigns of Elizabeth and James.—London Chronicle.

### Described.

"Pa, what is the difference between good taste and good judgment?"

"Well, my boy, the man who marries a pretty girl may have excellent taste but mighty poor judgment."—Detroit Free Press.

# GOVERNMENT'S FUR BUSINESS

The National Government is taking steps to have the Government's raw fur skins dressed, dyed and sold in this country. This is commonly done in London, with the result that the freight has had to be paid both way and a duty paid on top to get furs back in the country again. Secretary Redfield of the Department of Commerce states that the department has under consideration a plan by which the furs of both the 1914 and 1915 catch may be dressed and dyed by the best process known anywhere and not hitherto employed in this country.

The Government has in cold storage 3,296 sealskins taken last year and there is to be added to this number the seals taken this year. Owing to the fact that the international market was closed last year the sale was postponed, and will probably be postponed again.

The Government has afforded protection to the Alaska herd of seal, so that it is increasing again. A census made by officers last summer shows 360,000 animals ,against 294,700 the year before. At this rate, the Government sale of seal may grow in importance.

Authority is asked from Congress to permit more strict regulation of the taking of fur animals in Alaska. The complaint is made that there is a great deal of waste of young fox life by the indiscriminate digging of young animals from their nests by irresponsible persons for use on fur farms. This trouble has grown up with the fur farm business, which has increased rapidly in late years.

That the Government pays attention to the fur business is further indicated by statement that the 1915 yield from the Government's herds of blue foxes on the seal islands was 253 pelts and white foxes, 40. The Government's fox farm is not at all artificial.

Alaska as a fur producing country is shown by the shipments of fur from that region. The statistics were taken for the year ending November 15, 1914: Ermine. 6.873; red fox, 14.967; white fox. 6.530; lynx. 6.930; marten, 6.947; mink. 35.623; muskrat. 101,202, and otter. 1.008. It is evident that there are many trappers in Alaska, and the fur industry is one worth preserving.—Utica Observer.

## HOODOO SHIP MAKES MONEY

**The Old Algoa Has More Than Paid Her Purchase Price.**

San Francisco.—The old Algoa, formerly hoodoo freighter of the former Pacific Mail, has blossomed out as a real war baby.

This steamer, which in times of peace used to be tied up in the lower bay with cold boilers for long periods has earned $300,000 that was paid for her when she was rechristened the California. Also she has earned $90,000 more.

Furthermore, the California—nee Algoa—has now been chartered to a powder company at $1,700 a day, or $15,000 a month, or $612,000 a year, or more than twice as much as her owners paid for her.

It is stipulated in this last charter that she shall ply only between neutral ports, which is taken to mean that she will became a nitrate carrier between South America and the Du Pont powder mills in the United States.

## KISS FOR A JUDGE.

**Carpenter's Daughter Gave Him a Good Smack in Open Court.**

Pittsburgh.—Congratulations showered on Judge James McF. Carpenter when he took his place on the bench of the common pleas court recently did not make nearly so great an impression on the throng of well wishers as a resounding kiss implanted fairly and squarely on the jurist's lips.

Judge Carpenter, who was elected last November for a full term of ten years, had been sworn in and had stepped down to shake hands with the politicians in the courtroom. As he left the bench his daughter, Miss Alice Lazear Carpenter, stepped up, threw her arms around his neck and kissed him.

"Oh, I'm so proud!" Miss Carpenter exclaimed as the judge disentangled himself.

"Eh, umph! And so am I," her father replied, as he reached for a dozen hands stretched in his direction.

### TAXATION.

The fairest of all taxes are the income and inheritance taxes.

This question, however, must be carefully weighed, since the tax is paid by one class, while the benefits are largely enjoyed by another.

Care should be taken that it does not become confiscatory and thus stifle individual incentive and effort.

In addition, I believe that every individual should pay his proportion, no matter how small it may be. It will inspire in him a feeling of citizenship and make him an integral part of our nation.—S. Thruston Ballard.

# WOULD TAX ALL OUR EXPATRIATES

## Kenyon Introduces Measure Proposing Big Increase.

## MIGHT REACH 30 PER CENT.

**All Property They Own In America Would Be Made to Pay Heavily. Tax on Dowers to American Girls Who Marry Foreigners Is Included In the Measure.**

A measure proposing a high graduated tax on the incomes of American expatriates derived from their American property has been introduced in the senate by Senator Kenyon of Iowa.

The Kenyon bill would place an annual tax of practically 30 per cent on the incomes of the wealthier expatriates. It also would make the dowers given to American girls who marry titled foreigners a source of considerable revenue to the United States government.

Under its provisions a normal tax of 3 per cent instead of the existing 1 per cent on American incomes would be levied on the incomes under $25,000 of all expatriates and foreigners derived from their investments in the United States.

### Provides Supertax Too.

In addition a supertax would be levied as follows:

| | Per cent. |
|---|---|
| $25,000 to $50,000 | 4 |
| 50,000 to 75,000 | 6 |
| 75,000 to 100,000 | 8 |
| 100,000 to 200,000 | 12 |
| 200,000 to 400,000 | 16 |
| 400,000 to 500,000 | 20 |
| Over $500,000 | 28 |

Under the terms of the Kenyon law William Waldorf Astor, now Lord Astor of Hever, wealthiest of all American expatriates, would be compelled to pay to the United States government each year 28 per cent of his entire income derived from investments in this country.

At the present time Lord Astor pays only a tax of 7 per cent. It is estimated that the tax on the Astor fortune alone would net the government upward of $5,000,000 annually.

### Affects Many Expatriates.

Other expatriated Americans who would pay a tax ranging from 11 to 28 per cent of their incomes derived from properties in this country would be:

Duchess of Roxburghe, daughter of Ogden Goelet.

Mrs. William B. Leeds.

The Ladies Curzon, granddaughters of the late Levi Z. Leiter of Chicago.

Lady Beatty, wife of Admiral Beatty and daughter of the late Marshall Field of Chicago.

Countess of Craven, daughter of Bradley Martin.

Duchess of Marlborough, formerly Consuelo Vanderbilt.

Countess of Granard, daughter of Ogden Mills.

Duchess of Manchester, daughter of the late Eugene Zimmerman.

Viscountess Maidstone, daughter of Anthony J. Drexel.

Countess of Suffolk, daughter of the late Levi Z. Leiter.

Mrs. Lewis Harcourt, niece of J. P. Morgan.

Countess of Ancaster, formerly Eloise Breese.

Lady Waldstein.

Lady Cheylesmore, daughter of F. O. French of New York.

Princess Cantacuzene, Julia, granddaughter of General Grant.

Marchioness of Dufferin, Flora Davis of New York.

Princess Radziwill, Dorothy Deacon of Boston.

Mrs. Joseph Chamberlain, Mary Endicott of Massachusetts.

Princess Hatzfeldt, Clara Huntington of San Francisco.

Duchess of Croy, Nancy Leishman of New York.

Princess Colonna, Eva Mackay of New York.

Countess of Egmont, Kate Howell of South Carolina.

Lady Camoys, Mildred Sherman of New York.

Countess Szechenyi, Gladys Vanderbilt.

Baroness Ramsey, Frances Whitehouse of Chicago.

Henry James, the novelist, who recently took out British citizenship papers.

Lady Decies, daughter of George J. Gould.

### Millions Given In Dowers.

The exact amount of property owned by the above is not known to any one in the United States. In the following table, however, the amount of the fortune controlled by the expatriated American girls at the time of marriage or given to them as dowers is set forth:

| | |
|---|---|
| Lady Camoys (Mildred Sherman) | $12,000,000 |
| Mrs. Ralph Vivian (Mrs. Marshall O. Roberts) | 12,000,000 |
| Lady William Harcourt (Mrs. J. R. Ives) | 5,000,000 |
| The Hon. Mrs. A. H. Paget (Pauline Whitney) | 5,000,000 |
| Lady Cumming (daughter of Commodore Garner) | 4,000,000 |
| Lady Hesketh (Florence E. Sharon) | 3,000,000 |
| Lady Cunard (Maude Burke) | 2,000,000 |
| Lady Charles Wolseley (Anita T. Murphy) | 2,000,000 |
| Lady Falkland (Mary Reade) | 2,000,000 |
| Lady Bagot (Lillian May) | 1,000,000 |
| Lady Vernon (Frances M. Lawrence) | 1,000,000 |
| Lady James Butler (Helen Stages) | 1,000,000 |
| Mrs. Arthur Paget (Minnie Stevens) | 1,000,000 |
| Mrs. J. B. Roche (Frances Work) | 1,000,000 |

### Method In Her Breakage.

"Augusta is an awfully bright girl, isn't she?"

"Yes, indeed! When she is reading a novel on the front porch her mother never thinks of asking her to wash the dishes."

"Why not?"

"She's sure to break so many of them."—Cleveland Plain Dealer.

## PASTOR'S WORK EXTOLLED IN CHURCH COMMITTEE'S REPORT, LAST NIGHT

A meeting of importance to the membership of the First Baptist church followed the weekly meeting of prayer, last night. It bore upon the selection of a new pastor to succeeded the Rev. M. G. Buck, resigned, directly, and indirectly, upon listening to the report of a special committee appointed at Monday night's meeting of the Society, whose duty was to draft a letter of appreciation of the work of Mr. Buck during his nearly three years of service here. The special committee comprised Mrs. William Hinsdale, Mr. Fred Trask and Mr. E. E. Hart. It was the sense of the business meeting, which represented the corporate body of the church, that Mr. Buck's work here has been exemplary; and further, that the past and present prosperity of the church is due to his indefatigable efforts; and more than that, that he is responsible for harmonious relations which have and may exist in the membership.

A new pastor is being sought by a committee representing the different departments of the church, whose membership is made up as follows:

Mr. Trask, Prudential committee; Mr. E. E. Hart, Sunday school; Mrs. C. W. Streeter, Ladies Aid Society; Miss Clara Wilson, C. E. and clerk; Mr. William Sylvester, the trustees; Mr. W. S. Merrill, Baracca; Mrs. Bertha Hinsdale, Philathea; Mrs. Deforest, Home Department.

## GERMANS MASS TROOPS FOR NEW WEST DRIVE

London—Pronounced activity on the Western front is accompanied by many reports from various sources that the Germans are preparing an offensive on a grand scale, perhaps another attempt to break through to Calais and Dunkirk.

Amsterdam reports that 3,000 new guns of various calibre have just arrived at the German front and that for several days there has been a constant stream of troops passing through Belgium.

The French War Office has been informed that violent German attacks are imminent along the Yser. Large bodies of German troops are being brought. They are extending and strengthening their elaborate system of trench fortifications along the entire front from Westende to Lpres.

It is believed in Paris that the capture of Nieuport is the immediate object of the offensive movement, but British troops are also preparing to resist an attack in the direction of Dunkirk.

## LONDON CRITICISES WILSON'S POLICY

London.—The following editorials were printed today on President Wilson's defense speeches:

London Times: "The Germans know the President has now turned his mind toward electioneering prospects and they understand well the advantages which timely announcement of an apparent legal victory would bring him with the electorate. Success of this kind probably would whet his appetite for more.

If he could point to a legal victory over Germans on one issue, balanced by a legal victory over British on another, his attitude as an impartial judicial vindicator in international law would be visibly strengthened. Germans may not believe in a victory over the British, but an angry controversy between America and England, provoked by an ill judged attempt to gain it, would serve their purposes. The President's speech upon blockade and America's right to supply the world with cotton and wheat may perhaps encourage hopes of such an event."

Daily News: "Wilson has been speaking repeatedly of naval military preparedness. In what relation can those references stand to blockade and overseas commerce? None at all. Whatever friction necessities war between America and ourselves, let us never forget that by the 1911 treaty both nations were pledged to compose every justifiable difference by diplomacy and arbitration. It is satisfaction to realize that Germany's ultimate hope of embroiling America with allies must be permanently disappointed."

## CHAMBER OF COMMERCE

*"Fulton First, Last and All the Time"*

POWER, BEAUTY, LOCATION, SHIPPING FACILITIES UNSURPASSED, INDUSTRIES OF ALL KINDS, spells F-U-L-T-O-N. Show us the equal of it somewhere else.

* * *

Just to prove how important the Fourth Annual Meeting of the United States Chamber of Commerce is, we give the names of a few of the speakers: the President of the United States; the Secretary of Commerce; the Secretary of War; the Secretary of Navy; the president of the New York, New Haven and Hartford Railroad; the president of the Bank of Commerce of New York; the Chinese Ambassador.

* * *

FULTON is going to be represented and we shall try to make as good a showing for the city as we possibly can.

* * *

Enthusiasm is a health germ. When you get it let it run rampant in your system. It will fight and lick thehookworm and assimilating him, will chrysalis like, be converted into success.

* * *

The man behind the times is naturally a knocker. Nothing looks good from behind.

* * *

There was a man in our town, and he was wondrous rich;
He gave away his millions to the college and sick;
And people cried: "The hypocrite. He ought to understand
The ones who really need him are the children of this land."
When Andrew Croesus built a home for children who were sick
The people said they rather thought he did it as a trick,
And writers said: "He thinks about the drooping girls and boys
But what about conditions with the men whom he employs?"

There was a man in our town who said that he would share
His profits with his laborers, for that was only fair.
And people said: "Oh, isn't he the shrewd and foxy gent?
It cost him next to nothing for that free advertisement."
There was a man in our town who had the perfect plan
To do away with poverty and other ills of man
But he feared the public jeering, and the folks who would defame him,
So he never told the plan he had, and I can hardly blame him. —N. Y. Tribune.

* * *

Boost for every forward movement,
Boost for every new improvement,
Boost the man for whom you labor.
Boost the stranger and the neighbor.
Cease to be a chronic knocker.
Cease to be a progress blocker,
If you'd make your city better,
Boost it to the final letter.

* * *

In the great house of business, honesty and success are twin brothers.

* * *

The only place for a knocker is on the front door, and it is sometimes a nuisance there.

* * *

A man's friends seldom work overtime on the friendship job.

* * *

Some knockers are so sanctimonious in appearance that they would fool even Billy Sunday.

* * *

Your attention will be called sometime in the near future to several matters of importance.

## IT PAYS TO LOOK SHARP BEFORE PEERING, AT LEAST IN THE WESTERN SECTION

A "Peeping Tom" was captured in the 00 block in Hannibal st. one night this week by Frank Mangeot who lives in that neighborhood, it was learned today. The man, a foreigner, unable to speak intelligible English, was released upon declaring that he was "looking for somebody". One of Mr. Mangeot's neighbors, a woman, had watched the tntics of the man for some time. She declared that his actions were sufficient to arouse her suspicions. She was seated near a window awaiting the return of her husband when she noticed the stranger approaching her house. At first glance she mistook him for her husband. A closer view revealed to her that she did not know him. Much to her surprise the man made his way into the yard of the Mangeot home, peering into windows. In response to her alarm a number of near neighbors, including members of her household went in search of the intruder who had hidden behind a number of milk cans. Routed from his quarry the man ran across lots, his pursuers at his heels. Mr. Frank Mangeot was at the D. L. & W. railroad station when his attention was aroused by the commotion. He dashed toward the pursued man, who offered no resistance. Mr. Mangeot asked for an explanation, receiving a reply from the gazer that he was in search of a friend's house.

The incident was closed by freeing the man from arrest and advising him to watch his step in future.

## COAL CHIEFS REJECT 147,000 WORKERS' DEMAND

New York—Heads of the nineteen great coal companies in the anthracite field met at No. 143 Liberty street yesterday and rejected the demands of the 147,000 miners.

The miners demand 20 per cent increase in wages, complete recognition of the United Mine Workers of America, a two-year working agreement, an eight-hour day and changes in methods of fixing wages. The anthracite operators and their men have been at peace for thirteen years.

The operators say to grant the demands would make necessary an advance in the price of anthracite to domestic consumers of 60 cents a ton. The raise in price would apply to all domestic sizes. The coal companies assert that they will lay their whole case before the people and let the sonsumers themselves decide.

Miners in the anthracite field formulated their demands at Wilks-Barre in September. The convention of United Mine Workers of America ratified the demands last week at Indianapolis. Since 1902 the companies and the men have been working harmoniously under the arrangement recommended by the Anthracite Strike Commission named by President Roosevelt.

This Commission provided for a Board of Conciliation made up of three men named by the miners, three by the operators and an "umpire" chosen by both. The operators yesterday suggested that if the differences cannot be settled by the "interestd parties" they be referred to this board.

The operators hold the present trouble is largely due to the agreement reachd in 1912 providing for th appointment of grievance committees at each separate mine. This agreement should be abolished, the operators shold, and all labor troubles settled under the Board of Conciliation plan of 1902.

## APPAM'S PRISONERS TELL OF BRITISH CRUELTIES

Newport News.—The most enthusiastic passengers on the Appam were eight German citizen soldiers of Kamerun, the German African colony.? They had been captured by the English November 6, last year, after a spirited battle in which 165 Germans broke through the English lines and escaped, leaving behind only nine men sick in a hospital. Eight of them were on the Appam to be transferred to some prison camp in England.

These Kameruners were confined in four third class cabins on the Appam. They were not permitted to exercise on deck by the British, in spite of the tropical heat belowd ecks. They said they had to remove all their clothing and still were absolutely drenched in perspiration. The English had the freedom of the whole ship, with the exception of the upper-most boat deck.

## 45–PHONE NEWS ITEMS–45

Friday, February 4, 1916.

**Railway regulation by the government is put to a severe test in the confusion due to car shortage. That regulation is a** good thing sometimes **has** been proved to the satisfaction of **all who are not** captious. The question that remains is how much regulation there should be for the good of both the roads and the public. The railways claim by way of excusing shortage of cars and engines and terminals that regulation has denied them the chance to win profits in good years and that losses in bad years have put the average on the wrong side of the ledger. So they stood a combined loss for 1914 of $120,000,000. A prolonged trade blockade might cost the country even more than that and be taken as proof that too much and too drastic regulation is simply "penny wise and and foolish."

**Former President Taft is speaking very frankly upon the everyday problems of this country. Among other institutions held in high regard by the people which he criticises is the present system of education. This he thinks could be improved by founding a national university and having inspection and criticism by federal authorities. In comparison with the educational system of some countries in Europe—Germany, for instance—ours falls short. Perhaps good results would follow the standardizing of methods in schools of all degrees. However, the essential thing is to build up a higher standard of citizenship, and, once this is attained, the good work will spread without undue pushing.**

**The first notable death recorded in 1916 was that of the great tragedian Salvini, who died in his native Italy on New Year's day. In his prime Salvini held rank among the foremost actors of the world. Thirty years ago he played in this country with Edwin Booth, taking the part of Othello. In a visit fifteen years before that he played in the leading cities, speaking in a tongue foreign to his auditors. But the language of his parts was so familiar that his dramatic gestures and tragic tones carried their full force home to his English speaking hearers.**

**The record of exports from this country continues to make history. The classes of exports are more diversified than formerly. Of course foodstuffs and war material form a large part of the export trade. Those which go to Europe may be considered of a temporary character, but nations now at war will have to look to the United States for goods of various kinds during the years of reconstruction which are to follow.**

**There is hope for China in the fact that the people have not rebelled against government and order, but against the rapacity and cruelty of outsiders—that is, the Manchus of the deposed dynasty. Except for the natural jealousy of factions, good native rulers will find the people loyal and devoted.**

**Among other things, "they say" that the European war will make this country a center of medical study and science. Not having been voted "undesirables," we can safely greet these worthies on the strength of their very respectable looking names.**

**Certain it is that the United States is rich enough to maintain adequate fleets on both oceans. At the same time there must be other good ways of investing good money.**

**Some men put too much effort in keeping up the poise and appearance of gentlemen and all too little in being honest, industrious and dependable as mere men.**

## NO TIME FOR NEUTRALITY

Let there be no misunderstanding anywhere, in the pool rooms of the city or in the minds of the Aldermen, as to the stand taken by this newspaper upon the matter of lifting the lid for the benefit of proprieors of the resorts. The Evening Times is not and has never been a party to neutrality upon matters affecting the interests of the majority. No other policy will do. It is a principle we are fighting for. We believe in the good intentions of the Board of Aldermen and the Mayor of the city; and we as well believe those gentlemen and the proprietors of the pool rooms are misled into false beliefs by a desire to profit at the expense of the many young men who could not and would not be benefited one iota by throwing to one side a principle to secure unearned increment.

In this city we have so many resources, so many opportunities are presented, that we cannot measure the amount of good that could be accomplished by using the energy that would be expend in the pool rooms on Sunday afternoons.

Most men seeking wealth for the sake of it are painting a picture, and are too close to the canvas. They do not stand back and get a perspective. Here then is their opportunity. The city needs men whose brains are not befuddled by self-indulgences every day of the week. It needs young men of brain and brawn. Sunday pool playing is not conducive to clear thinking men when Monday morning rolls around. There are other and moral reasons why the pool rooms should not remain open Sunday afternoons. They can and will be presented as opportunity arises.

## GO AFTER MORE

It's a common excuse to hear a man say that he does not dare change his position, or try to go it alone, for fear he will make a mistake, and his family will suffer.

The family excuse is well and good; but remember, the men that have made money have probably had just as big a family, and maybe more expense than that of yours.

It's a good idea to play safe, but it's a poor idea to remain in a rut and think you are helping your family, when in reality you are holding them back. If you prefer a known certainty, a salary, to a possible betterment, make up your measure at about so much per day, with a discount of each year on account of lack of courage, lack of self-confidence.

So long as you discount yourself you will remain among the hand-to-mouth toilers. Go after a better position. You can always fall back where you are now.—Silent Partner.

## SHOULD TRY TO UNITE, NOT SEPARATE CITIZENS

When Theodore Roosevelt talks he talks either in his best manner or his worst manner. The Colonel's oratory scorns any level middle road. And just as his best manner is very good, indeed, so his worst manner is about as bad as can be imagined.

In his speech made in Brooklyn Sunday afternoon the Colonel was at his worst. The whole address was a bitter invective against Germany and against American citizens of German ancestry.

Mr. Roosevelt's insistence that we should have declared war upon Germany when the Germans invaded Belgium is unworthy of his good sense in his cooler moments. We do not believe for a minute that any declaration of war upon Germany would have been made had Mr. Roosevelt been President in 1914. We Americans have enough to do to mind our own business without setting ourselves up to be the world's tutor, guardian and shepherd. Once we adopted that offensive attitude of superior virtue, we would have a fight on hand all the time.

Mr. Roosevelt is a man who has done great service to his country. He could render still another great service to his country at this momentous time if he would devote his talents and lend his influence to the work of Uniting All Citizens in the patriotic determination to prepare the nation against attack.

We do earnestly wish that he would cease to be angry long enough to be useful when he is so badly needed in constructive work.

We can see no possible good in exciting the hatred of any of the peoples across the Atlantic, and no possible good in embittering the feelings and lessening the loyalty of at least five millions of citizens, who are none the less good Americans because they remember with affection the land from which their fathers and mothers came.

And what we say of Colonel Roosevelt applies to many thousands of superheated Americans. Get your heads cooled off and then keep them cool.

We didn't make this war in Europe. Let the ones who made it participate in it. It is their funeral, not ours.

As for us, let us mind our own business, cease abusing other nations, cease reviling our fellow citizens who do not think as we do about this foreign war, and begin to saw wood busily in preparation for stormy days to come.

Any other course at this time is as foolish and unpatriotic as it can possibly be.—N. Y. American.

## Our Washington Letter

SPECIAL CORRESPONDENCE

Washington—The deplorable effects of Democratic economic policies upon business conditions upon the Pacific Coast is shown by the story brought to Washington this week by Mr. Russell Hawkins of Portland, Oregon, who is extensively engaged in lumbering. Mr Hawkins is the man who supplied the two hundred and fifty foot flag-pole for the San Francisco exposition, the tallest single-stick flag-pole in the world.

"We have a lumbering plant in which $300,000 is invested and which, under normal conditions, employs 357 men, but which has not turned a wheel since June, 1914," said Mr. Hawkins. "Where we formerly had 357 busy men we now have one man with a grease pot to keep the rust off our idle machinery. There has been a slight revival in the last 60 days but we have lost two years of active business. We closed down before the war broke out in Europe, which shows that depression in the lumber business was not due to the war, general business depression which deprived us of a market for lumber products. Our experience was similar to that of other men engaged in logging and lumbering.

"You can readily see what the closing down of this small logging business means to industry, not only on the Pacific Coast, but in other parts of the United States. Directly, the throwing out of employment of 357 men means thel oss of $220,000 a year in wages, and the loss of another $100,000 a year for supplies for our logging plant; but indirectly it means much more, for when our logging crews are out of employment, a much larger number of men are out of employment in the saw mills and in other industries depending thereon. The $200,000 which we would have paid to the men in our camps, if work could have continued, would have been spent by them for clothing, such as overalls, boots and shoes, gloves, hats, and other articles manufactured in Eastern States. These men would have spent the money largely for provisions for the maintenance of their families. To be perfectly frank, perhaps it should be remarked that some of the money would be spent for the products that have made Kentucky and Milwaukee famous.

"Practically every industry in the United States suffered as a result of the depression in the lumberin gbusiness. Railroads lost transportation business, carpenters had little demand for their services.

"Briefly stated, the closing down of any basic industry vitally and disastrously affects almost every other line of industry."

## Opinions

### THRIFT

A national movement has been started to promote systematic saving and general thrift. Certainly the time seems opportune. The great activities in industrial circles and the high prices of farm products give ample margin from which there should be set aside a goodly amount for savings against the lean years that will inevitably come. The new movement is championed by the American Bankers' Association, in cooperation with other organizations of national scope and a great many public and private institutions. The movement is broad enough not to be suspected of being conducted for selfish interests and will reach into many rural districts.

Systematic saving by farmers is not generally practiced as among salaried workers in the city. The farmer has not been given to saving by means of endowment insurance or savings banks, though he has been a strong supporter of building and loan associations in many instances. The principal difficulty has been that his income has not been so regular as the weekly pay check of the city worker and it has not been so easy to put aside a small sum regularly. The well-balanced farm now has a more steady income. The milk check on a dairy farm is almost as regular as the pay envelope in the factory, and has done much to systematize saving on many farms.

The man who needs to practice this form of thrift most effectively is the young farm hand who is saving against the day when he will become a tenant and later when he will buy his own farm. If as his regular monthly pay is received he sets aside ten dollars to fifteen dollars in a savings fund, in five years he will have capital for the purchase of a modest equipment with which to start on a rented farm. Another five years of regular saving will place him in position to make a first payment on a small place of his own.

The ambitious young man is likely to regard this period as discouragingly long, and small amounts regularly put aside as trifling, but this rate of progress is even more rapid than actually occurs in most instances.

Someone has well said that it takes a young man ten years to get ready to farm another ten years to learn to operate his farm properly, and ten years more to learn how to be the best farm citizen. By that time the average allotted span of life has expired. He who develops the habit of thrift early lengthens the period of independence which he may expect after he has established himself.—Country Gentleman.

## A GREAT BUSINESS MAN

Henry Ford announces that he is going to treble the output of his plant at Detroit, which is producing this year 500,000 cars. The addition to his plant will cost several millions and he will employ a great many more men than the 20,000 he now has working for him in that city. An outstanding feature of Ford's success is the fact that it is founded on straight business achievement. He is the kind of a business man for whom an American abroad need not apologize. He didn't make his money through rebates, a monopoly, or watering the securities of corporations and selling the liquid by theg allon. He hasn't made his money by exploiting his labor. In the usual sense of the term, he pays his labor more than it earns. He pays it several times the market price, which is quite an unheard of thing. When philanthropists distribute their earnings, it isn't usually among the common folk who helped them to earn it. It goes elsewhere. Ford started at home first.

As a peace-maker Ford is a joke but as a straight-forward business man he is a giant. One has never seen Henry Ford hanging around Washington asking for a special chance at the public through the monopolistic effects of a tariff. Ford has never expressed a fear of a flood of automobiles manufactured by cheap foreign labor. He has never been afraid that Chinamen will go into the manufacture of cheap machines, employing laborers at a few cents a day, and selling the motors to American citizens at a few dollars each, thus putting Ford and all his employes out of business and harming American citizens generally with a flood of machines to he had almost for the asking. Ford doesn't ask that America be taxed to support him and his workmen. Altogether he is a man who should set an example in business.—Utica Observer.

## OREGON FLOWERS FOR PERFUME

Tons of petals of Oregon flowers are wanted in the East for the manufacture of perfumes and sachets.

Receiving an inquiry, and realizing it may portend the beginning of an important industry, the Chamber of Commerce at once set about developing a supply. Father George Schooner, the plant wizard, was called upon to take up the matter.

The war in Europe, cutting down the supply of flower petals that has been shipped annually to the United States for this purpose, has apparently led the manufacturers to turn to home markets seeking a source of supply of raw material.

The bureau of manufactures and industries of the Portland Chamber of Commerce received a letter from the Napier Chemical Company, New York, asking for names and addresses of persons in Oregon from whom ton lots of flower petals may be secured.

"We are importers from Europe of many varieties of dried flowers," says the letter, "and it occurs to us that some similar flowers could be obtained in your state, although frieight rates are much less from Europe than from the Pacific coast.

"We can use in ton lots red rose leaves and rose buds, rose geranium leaves, lemon verbena leaves, lemon leaves, orange blossoms, violets, carnation pinks and, in fact, almost any kind of dried flowers, either of brilliant color or sweet odor."—Portland Oregonian.

**First Colonial Assembly.**

The first legislative assembly that ever met in America was at Jamestown, Va. Governor Yeardley, feeling that the colonists should "have a hand in the governing of themselves," to use his own language, called the assembly together at Jamestown July 30, 1619. It consisted of the governor, council and "burgesses," as they were called, chosen from the various plantations. The laws passed by this body had to be ratified in England; but, in turn, the orders from London were not binding unless ratified by the colonial assembly. In 1621 these privileges were embodied in a written constitution, the first of the kind in America.—New York American.

# LABOR MUST BE GIVEN A VOICE

## Demands Right to Participate in Matters Affecting Welfare.

## PREPAREDNESS PROBLEMS.

**Workers Can Give Valuable Advice and Service to the Nation In This Capacity—Statesmen Must Recognize the Significance and the Power of the Organized Labor Movement.**

[By SAMUEL GOMPERS, president of American Federation of Labor.]

Before the outbreak of the war we had talked much of the ideals of peace, fraternity and national interdependence, but we made no provision for the establishment of agencies to perform the function of war—which is organized force. War came. Democracy with its free institutions and its humanitarian ideals was confronted with a fight for existence. War is a test of physical fitness and of the organization of material resources. The nation that has failed in these will pay dearly in the perils of war. But these qualities whose value is demonstrated by the inexorable demands of war are equally essential to most effectual progress and best development during times of peace.

In the affairs of the nations there stands out one dominating fact—the existence and the power of organizations of wage earners. Long ignored, persecuted and outlawed, these organizations have proved themselves an essential constructive factor in human affairs. Private industry and commerce have generally remained outside governmental jurisdiction. They constitute the domain of voluntary activity and voluntary institutions. For the protection and the betterment of human beings engaged in industry or commerce labor organizations were developed. The workers have made labor organizations a constituent element in the organization of production and therefore a part of organized society.

Labor organizations are the channel for the expression of the desires and purposes of the wage earners. They are the instrumentalities for making effective their demands for justice.

Whether in peace or war the wage earners are a constituent element in the nation, numerically strong and creatively essential. Therefore a national policy, whether industrial or political, that does not take into account the welfare of the wage earners will fall short of concepts of broadest statesmanship. Not only must the wage earners be considered in determining policies, but in the council that determines policies they must be given representation and voice equal to their importance in national life.

The wage earners will not longer be denied their right to participation in determining those things which affect their welfare. Their demand is in accord with the principles upon which our republic is founded. They are unwilling to delegate to others the determination of their lives.

Now that our nation is giving thought to the problems of preparedness the wage earners present their claim to consultation and participation. No true plan for preparedness can fail to include service for them. Therefore they demand that the plans shall be democratized.

Not only is this demand just, but that wage earners can give valuable advice and service to the nation in this capacity is evident from their achievements. And their experience and opinions are needed in considering national preparedness. No part of our citizenship is more unalterably opposed to ideals of militarism and compulsion than are the members of the trade union movement. If provisions for national preparedness are to be constructive they must escape the perils of militarism and autocracy; they must be based upon voluntary and democratic principles.

Essential to any plan for human and national conservation are physical fitness, power and ability for self protection and the attitude of mind insistent upon rights and justice. The trade union movement has done more for the maintenance of these qualities than any other force. Trade unionists will carry these qualities into places of formal responsibility to the nation.

If our nation is to keep its place among the leaders of the world its statesmen must recognize the significance and the power of the labor movement, which represents the ideals of the masses of men, women and children. Wherever it has established itself it has brought with it ideals of humanity—ideals that make a strong appeal to heart and mind. There is a human side to every relation of society. The trade union movement is the one institution that represents distinctively the human element and human welfare. Therefore spokesmen for labor ought to be in every commission, committee or representative body that is intrusted with consideration of problems and determination of policies.

The workers are quite willing to bear the full share of their responsibility in any issue. They are ready to give service, whatever might betide, but in this day of the workers' realization of their citizenship and sovereignty they are insistent in the demand that they have the fullest opportunity of advice and consent in the councils of all the affairs of our nation.

## RAISE FOR STEEL MEN.

**Unskilled Workers Get an Increase of 10 Per Cent.**

The United States Steel corporation has decided to share its prosperity with the wage earners by granting an increase of 10 per cent to unskilled laborers and proportionate advances in other departments, including the mining properties. It is estimated that the total increase will reach close to $15,000,000 a year, affecting 240,000 men, the largest number ever in the employ of the company.

In announcing that the wage increases would become effective Feb. 1, Mr. Gary said:

"In view of the prosperous conditions now existing it was unanimously voted at a meeting of presidents of our iron and steel companies, held recently, to recommend that there should be made adjustments of the wage rates, to take effect Feb. 1, and at a subsequent meeting of the finance committee it was unanimously decided to adopt the recommendation of the presidents.

"It is proposed to increase the rate of common labor about 10 per cent. As to other departments, increases will be equitably proportioned. Adjustments in wage rates in our mining companies are under consideration."

Of the 240,000 men in the employ of the steel corporation about 150,000 are the so called common laborers who will benefit by the 10 per cent wage advance. Their daily wage now amounts to about $2 for a ten hour day, which will be increased 2 cents an hour, or $60 a year. This means that about $9,000,000 of the total proposed increase will go to the unskilled workers.

The men in the plate and rolling mills are among the best paid in the country. They work on a tonnage basis, and many of them make anywhere from $5,000 to $7,000 a year. In view of the fact that many of the mills are now working overtime, even the water boys are now making on an average of $2 a day.

## WARNING TO EMPLOYERS.

**No Wage Cuts Allowed In Pennsylvania to Pay For Insurance.**

The Pennsylvania state workmen's compensation board has adopted a ruling aimed at employers who endeavor to reduce wages to pay for compensation. The ruling was as follows:

"It is contrary both to the letter and spirit of the workmen's compensation act of 1915 for an employer to levy contributions upon his employees by reducing their wages or otherwise for the purpose of meeting his liability under the act."

An official statement issued by the chairman of the board on the subject says in part:

"Our board up to the present time has been extremely gratified by the spirit of thorough co-operation shown by the employers of the state toward the compensation law. In a very few instances rumors have reached us that some employers were preparing to meet the expense of carrying insurance, or the anticipated cost of compensation, by an enforced contribution from their employees, which, of course, amounts to nothing more or less than a reduction of wages to the extent of the contributions.

"The great benefit of compensation is the fact that the cost of injuries or deaths incident to the prosecution of industries is charged to the employer, so that ultimately that cost can be so equally shifted to the consumer that no one will feel the burden.

"We have adopted this rule as a warning and trust that our board will not be called upon to handle the question in any other way. If necessary we will undertake to protect the wage earner from this imposition by very drastic measures."

**Oppose Eight Hour Day.**

The problem of an eight hour day, which threatens to take 400,000 locomotive engineers, firemen, conductors and trainmen in the United States and parts of Canada out on strike, was considered at a recent meeting in New York city of representatives of all the eastern railroads. At its close a high official of the conference stated that the demand of the men, if granted, would mean huge financial loss and possible bankruptcy to some of the railroads, and that, unless radical amendments were enforced, it would therefore be refused when presented.

## PAPEN'S CLOTHES IN PERIL.

**Retained Them Only by the Grace of the British Navy.**

When Captain von Papen, the recalled German military attache at Washington, was held up at Falmouth he produced the safe conduct which had been given to him by the British government at the request of the United States state department and demanded that he be allowed to proceed unmolested.

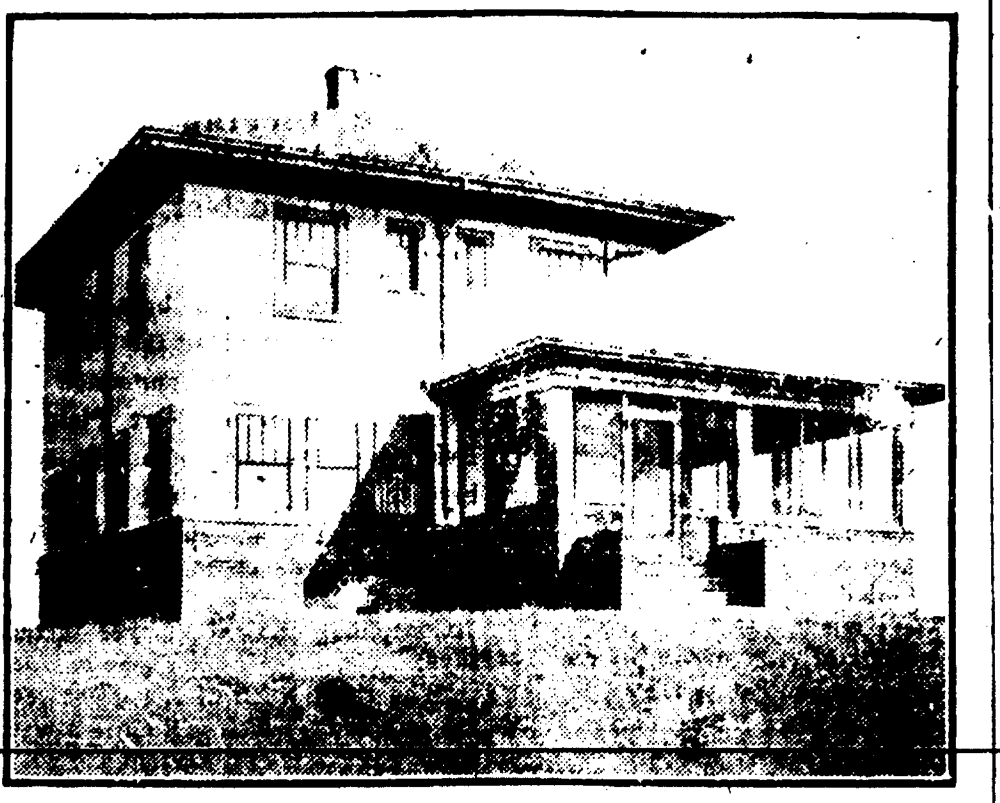
The former attache was politely informed that the safe conduct only concerned his body and that the fact that he was allowed to retain his clothes was entirely an act of grace of the British navy. At that Captain von Papen used very uncomplimentary language in English, the British report said, and surrendered with bad grace the documents he carried.

**Wife Too Beautiful; Wants Divorce.**

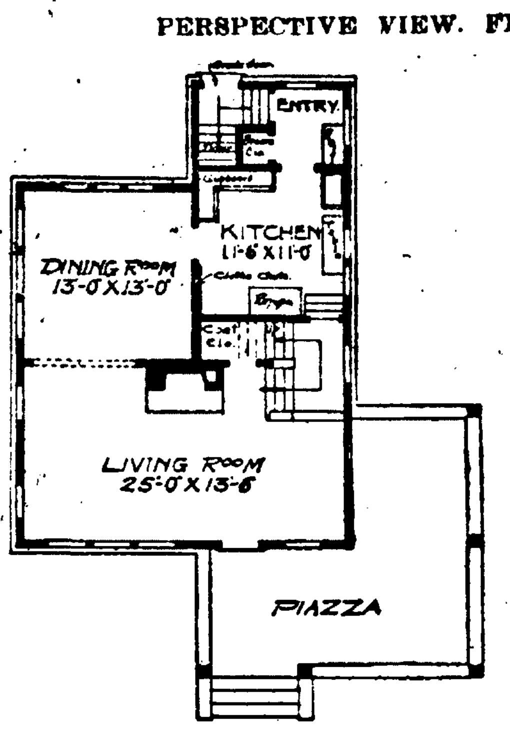
John F. Suits has filed suit for divorce in the circuit court of Chicago because, as he says, Mrs. Suits is too beautiful to be the wife of a salaried clerk. Suits has come to realize, he says, after ten years of effort to support an extremely beautiful woman in the "correct setting" that it cannot be done on $100 a month.

# IN PLASTER AND BRICK VENEER.

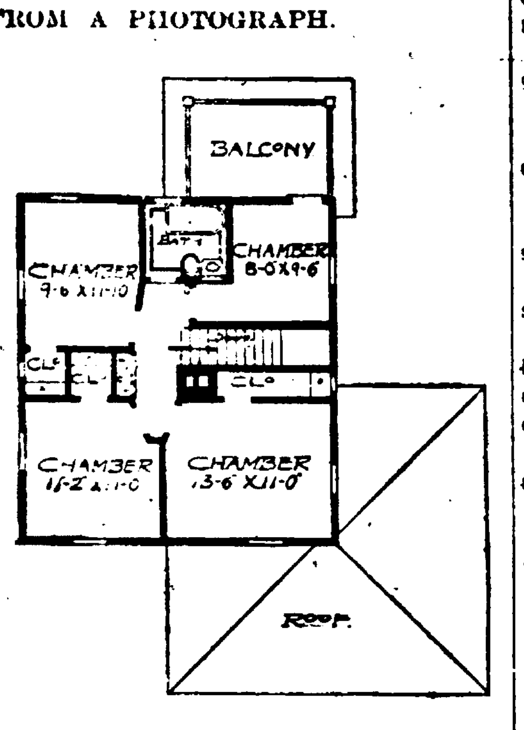
**Design 1021, by Glenn L. Saxton, Architect, Minneapolis, Minn.**



PERSPECTIVE VIEW. FROM A PHOTOGRAPH.



FIRST FLOOR PLAN.



SECOND FLOOR PLAN.

This design calls for brick veneer up to the first story window sills. On top of this cement rough cast. Piazza to extend ten feet each way. Between the living room and dining room is a cased opening for the purpose of hanging draperies. The kitchen has built in cabinet work. Combination grade door and outside kitchen door at the rear; also large broom closet in the entry. In the second story there are four chambers and large bath, with clothes chute leading into the basement, where the laundry is located. Size twenty-six feet by twenty-eight feet over the main part. First story nine feet high, second story eight feet. These heights in the clear when finished. First story in birch or red oak. Second floor pine to paint or white enamel.

Upon receipt of $1 the publisher of this paper will furnish a copy of Saxton's book of plans, "American Dwellings." It contains over 300 designs costing from $1,000 to $6,000; also a book of interiors, $1 per copy.

# ILLITERATE FOLKS ARE BEING TAUGHT

## Work Being Carried on Into Dark Corners of America.

## KENTUCKY TREATED FIRST

**Moonlight Schools Established In That State In 1911 and Now Work Is Being Copied In Other States—Founder Tells What Work Means To Backward Thousands.**

Lexington, Ky.—"Amusing indeed have been the various impressions that have prevailed throughout the country in regard to moonlight schools," writes Cora Wilson Stewart, founder of the famous moonlight schools of Kentucky. "Some have imagined them to be schools where children studied and played and scampered on the green like fairies in the moonlight. Others have believed them to be ideal courting schools."

It was in the obscure position of county superintendent of Rowan county that Mrs. Stewart began four years ago the work that has carried the alphabet and spelling book into the darkest corners of her state. Today she is president of the Kentucky illiteracy commission, author of "Country Life Readers" and has the satisfaction of seeing her work copied in many other states. How that work began and what it has meant to the backward thousands of her state she herself tells:

"When I was superintendent of Rowan county schools I served as secretary to a number of illiterate folk—a mistaken kindness. I ought to have been teaching them to read and write. Among these folk was a woman whose children had grown up without education, except one daughter, who had had limited schooling. She had gone to Chicago and there had profited by that one advantage at least which the city possesses over the rural district, the night school. Her letters were the only source of joy that came into that aged mother's life, and the drafts which they contained were the only means of relieving her necessities.

"Often she brought the daughter's letters over the hill, seven miles, to the county seat, for me to read and answer for her. After an absence of some six weeks she came in one morning fondling a letter. I anticipated her mission and said: 'A letter from your daughter? Shall I read and answer it for you?'

"With dignity and pride she replied, 'I kin answer it fer myself—I've larned to read and write.'

"In amazement I questioned her, and this is the story she told: 'Sometimes I couldn't get over here to see you, and the "cricks" would be up between me and the neighbors or the neighbors would be away from home, and I would not get a letter read and answered for three or four days, and anyway it jist seemed like thar wuz a wall 'twixt Jane and me all the time, and I wanted to read with my own eyes what she had writ with her own hand. So I went to a store, and I bought a speller, and I sot up at night till midnight and sometimes till daylight, and I learned to read and write.'

"Incidents like this led directly to the establishment of the moonlight schools. The public school teachers of the county were called together. The fact that there were 1,152 men and women whom the schools of the past had left behind was dwelt upon. The teachers were asked to volunteer for night school service, to open their schools on moonlit evenings—to give these people a chance. This they cheerfully agreed to do, and on Labor day, Sept. 4, 1911, these teachers celebrated by visiting every farmhouse and every hovel, inviting people of all classes to attend the moonlight schools."

## U. BOATS MAY CARRY MILK.

**Submarine For Blockade Running a New but Practical Idea.**

Lieutenant Commander Ralph Craft, U. S. N., received a delegation of the citizens' committee for food shipments, who went to the Brooklyn navy yard seeking expert advice on their plan to send condensed milk to Germany by submarine.

"If the submarine were constructed for the purpose," said Craft, "there is no scientific reason why it could not make the voyage across the Atlantic with a cargo. The idea of a commercial submarine for blockade running is new, but practicable."

Dr. Edmund von Mach, chairman of the committee, said he and his associates were determined to get milk to the babies, but had not given up hope of humane concessions on the part of the allies.

In the absence of fresh air cars there's no bar on open air homes and offices, with the lungs storing enough of the commodity to last over the trip.

**THINK OF OTHERS.**

If you think how much suffering and poverty there are in the world you will fall down upon your knees and, instead of repining at one affliction, will be thankful for the many blessings that are yours.—Sir William Temple.

## THOSE FRENCH FANGLES.

**Aristocratic Names For Quite Everyday Things.**

Aspic is a savory jelly. Usually it is made with meat stock, and vegetables or meat is prepared with it while it is hot and liquid and inserted before it has cooled and hardened.

Au gratin is a term applied to a dish baked with crumbs or cheese and a sauce and served in the dish in which it is baked.

Bain marie is the French name for a double boiler—a dish kept hot over boiling water.

Braise means to smother or cook closely covered with vegetables and herbs.

Canapes are appetizers composed of some dainty spread or set on a small piece of toast.

Cannelon is a piece of meat stuffed and rolled.

Croustades are forms of fried bread in which minced or stewed meat is served.

Croutons are dice of dried bread browned in fat or in the oven and served usually with cream soups.

Glaze is stock reduced by boiling to a stiff jelly.

Maigre means meager or made without meat, so a soupe maigre is a soup made without meat.

Marinate means to steep in a seasoning, as oil or oil and vinegar.

Petits fours are little cakes.

Piece de resistance is the main dish of the meal.

Potage is a thick soup.

Puree is a pulp pressed through a sieve.

Ragout is a highly seasoned and rich stew or hash.

Ramekins are cheese souffles served in china or paper cases; hence the china dishes in which souffles are cooked.

Rissoles are bits of pastry containing a mince of fish or meat rolled and fried.

Roux is a mixture of butter and flour, cooked, for thickening soups and sauces.

Saute means fried brown in shallow fat.

**"And Thy Neighbor as Thyself."**

Willie—Ma, may I have Tommy Wilson over to our house to play, Saturday? Mother—No; you make altogether too much noise. You'd better go over to his house and play.—Boston Transcript.

## HYGIENE NOTES.

**A Scientific Chat About the Daily Vital Needs of Our Bodies.**

To be trite, every one has a body in the health of which he or she is more or less interested. "Tell me what you eat and I will tell you what you are" has in it more significance than most people appreciate.

That the body needs proteins and energy metabolism has long been recognized, but not every one is aware of the importance of the body's need for mineral substance.

Mineral foods are as necessary to physical well being as are those furnishing nitrogen or energy.

Contractility and irritability of muscle tissue are dependent in some way upon certain inorganic salts. The rhythmical beating of the heart, according to the most modern medical science, is controlled by calcium, sodium and possibly potassium present in the blood in the tissues, and it is known that the retention of sulphur and phosphorus within the body run parallel to the retention of protein; also that the regulation of the alkalinity of the blood is accomplished, in part at least, through the phosphates. The blood and other fluids must be kept alkaline through a balance between acid and base decomposition products in metabolism.

Vegetables are sources of mineral foods. They furnish iron plentifully and in far larger proportion than do most animal foods. Remember that the pleasantest way to incorporate minerals is through the daily use of fresh salads.

**Banana Custard.**

Place slices of bananas in the bottom of a serving dish, sprinkle with lemon juice and cover with soft custard made by scalding two cupfuls of milk in a double boiler; mix two eggs, one-third cupful of sugar and one-quarter teaspoonful of salt; add the scalded milk, return to double boiler and cook until the mixture thickens and is smooth and creamy. Strain into a cold dish and flavor when cold with one-half teaspoonful of vanilla. If the custard begins to curdle set at once into a dish of cold water and beat briskly with an egg beater.

**Liver and Rice.**

Materials: Lamb's liver, well boiled rice, salt, cayenne, chopped parsley and butter.

Utensils: Chopping tray, knife, cup, spoon and buttered baking dish.

Directions: Boil the liver until tender and chop. Put in the baking dish alternate layers of rice and liver, season well with salt, pepper and parsley. Have the top layer rice and moisten the whole with melted butter. Brown in the oven.

**A Wholesome Salad.**

Two cupfuls Tokay grapes or white grapes halved and seeded, one cupful of chopped walnuts, one cupful chopped celery. Beat the yolk of one egg, add one tablespoonful vinegar and one tablespoonful of boiling water. Cook until thick. Stir in one tablespoonful of creamed butter and season to taste. When cold add an equal quantity of whipped cream.

**BELL-ANS**

**Absolutely Removes Indigestion. One package proves it. 25c at all druggists.**

## BEAUTIFY GATUN LOCKS AND ALSO THE VILLAGE.

**Zone Authorities Devoting Attention to Ornamenting Canal and Village.**

The beautifying of Gatun locks and the village of Gatun has been started by the canal zone authorities. This is the first step in making any of the work of the canal assume its permanent aspect from an artistic viewpoint.

The first work is concerned with the removal of the superfluous trackage needed while the work of construction was in progress. It will be necessary to leave some of this, but it will be so rebuilt that it will not interfere with the beauty of the general effect. The track removal will give a wide and level lawn which will not be broken up either with buildings or flower beds.

Already all temporary structures needed for construction purposes have been removed and their former sites converted into lawns. The huge cranes and cableways that were used for conveying concrete from the mixers to the lock walls and floors are being removed. The lock walls have been cleared of all unnecessary material.

The village of Gatun, which will house the lock operating force and such military establishment as is needed to guard the locks, will be greatly beautified through the addition of many trees and ornamental shrubs. Additional roadways and pathways will be built. A new clubhouse is to be constructed, the old one being in such bad repair that it would not pay to repair it.

## MODEL WORKMEN'S TOWN.

**Goodyear Tract Has Been Included In the City of Akron.**

So successful has been the home building plan for employees of the Goodyear Tire and Rubber company that the city of Akron, O., recently included the whole Goodyear tract in an annexation ordinance that has recently been passed, and Goodyear Heights is now a part of the city.

The plan was stared three years ago by President F. A. Seiberling, who felt that many of the 10,000 workmen desired to become home owners, but were barred by the "down payments" necessary in the usual real estate deal. Thereupon 100 acres of land were purchased close to the plant, the ground was allotted, streets laid out, paved, sewered, etc.; water, gas and electric light provided for, and homes built and sold to workmen on the basis of rent, no down payment being necessary.

Most of the commonplace features of allotment development have been eliminated. There are no rows of houses all alike. Each is a real home, with architectural individuality—brick and stucco prevailing as to material.

A small lake partly within the property has made it possible to arrange a fine pleasure ground, with tennis courts, football and baseball fields, swimming and skating facilities and restful parks. Goodyear Heights already has a population close to 1,000 people, with school, church, stores and all the rest of the usual community trimmings. The tract is one of the show places of the city, and its fame has spread so that manufacturers from many parts of the country have made detailed inquiries, with a view to the possibility of adopting, in whole or part, similar housing plans.

**Gems of Architecture.**

The three buildings which are considered the finest examples of colonial architecture in the United States are the city hall in New York, the state house in Boston and Independence hall in Philadelphia.

## Odd Happenings In The Day's News

Old kid gloves donated by Montclair (N. J.) women to be used as lining for soldiers' vests.

By fiddling on one string Columbus (Ind.) man hopes to play his way into office of sheriff.

Only meteor known to hit a human being is reported from Japan, where one struck a twelve-year-old boy on the head.

Eel, caught two years ago at Port Jervis, N. Y., that knocked over lamp and escaped with body partly in chimney, has been recaptured still incased in the lamp chimney.

A man's home is where his wife is, White Plains (N. Y.) court decides in case of man who spent six days in Manhattan at business and the other day with wife at White Plains.

Complaint that pet cats and dogs were missing in Bridgeport, Conn., led to discovery of six cat skins back of restaurant in which rabbit stew has been favorite dish of police patrons.

## S. LIPSKY & SON

*"The Store That Makes Good."*

27 FIRST STREET — FULTON, N. Y.

# FISH AND GAME COMING HERE

**Gun and Game Club to Receive as In Other Years a Quota of Young Fish and Birds.**

Information has reached the Fulton Gun and Game Club, Mr. J. C. Murphy, secretary, from the Conservation Commission, that last year's apportionment of fish and game will be received here this year. Mr. Murphy said yesterday: "The full quota of young fish and pheasants will be contributed and the news encourages us very much. We can attribute a great deal of our success to the fact that we are affiliated with the New York State Fish, Forest and Game League, a State wide-organization which is doing a lot for the amateur sportsman."

It developed in a conversation with another officer of the club that although there were more than 700 hunting licenses issued at City Hall during the year 1915, only one-seventh of them were applied for by members of the organization. The low fee which is exacted from members, $1 ayear, is applied to a fund, the purpose of whic his to further the interests of sportsmen who look after the work of the legislators.

**Unity Needed Here**

Although the State of New York maintains at its own expense a number of game preserves or farms and game refugees, adding to the complement each year, the nearest preserve is located at Watertown. There the sportsman are organized. Four preserves have been established by the State in the past two years and it is the consensus of opinion among the members of thel ocal club that if the membership is increased "a new industry," as one of the men termed it, "will be brought to Fulton."

Not only should the sportsmen become members of the club, it is stated, but the busineess men, who may never lay a hand on rod or gun, should join. In other cities, argue the club officials, the business men are enthusiastic supporters of gun and game clubs.

A meeting will be held in the near future when plans will be discussed by the officials of the club for increasing the membership list of Fulton's club. Any individual in the city, regardless of race, creed, or social position will be heartily welcomed as a member of the organization.

**Farmers Got Chicks**

That the public may become enlightened relative to the work done by the State Conservation Commission through the Fulton Gun and Game Club, an officer of the organization furnishes the following facts: During 1915 the trout streams in the immediate neighborhood of this city, including the lake, received 5,000,000 pike fry, 20,000 Jack perch and 10,000 bass. The fields and forests within a radius of ten miles of the city were stocked with 100 settings of pheasant eggs, and farmers made application for and received 450 young pheasants. It is no wonder then that the Gun and Game Club members are enthusiastic about the intentions of the Conservation Commission through whose good offices a repetition of last year's contributions will occur.

**Wonderful values in Coats at McDonald's, "The New York Shop."** adv.

### THE QUIRK TODAY

World Film Corporation presents the five part photoplay "The Flash of an Emerald," based upon a well-known magazine story of the same name.

Hobert Warwick adds a new character to his repertoire, that of a polished and unscrupulous man of affairs who stops at nothing to gain his ends. First of all, Lucius distinguishes himself as a safe robber and then seeing an enormously valuable emerald in the possession of an elderly lady, steals intoher hotel, cholroforms her, heer maid and child, and secures the emerald.

Later on he grows careless in his success. He falls in love with a girl to whom he presents the emerald. Th girl is the daughter of the woman whom he robbed of the emerald.

This faux pas leads to his undoing, and there is nothing left for a villian of his type but suicide.

We invite the ladies to inspect our stock of house paint that are beinr closed out at cost. Call while we have a nice assortment of colors. Souvenirs for the ladies next Saturday afternoon. Van Wagenen, Inc. adv348

# PEACOCK'S WORK IS SUCCESSFUL

**Fort Plain Newspaper Predicts Closing Week of Evangelistic Campaign Will Be the Greatest.**

"Campaign bound to be a success," is the heading used by the "Mohawk Valley Register" to announce the work carried on in Fort Plain by Evangelist Peacock, who will come here in April to conduct a monster revival in the tabernacle that will be constructed especially for that purpose.

Continuing the newspaper article says:

"The third week of the great revival campaign, which will close a week from next Sunday, was a week of great activity in all lines of the work. The attendance was up to the standard which had been established during the first two weeks. The collections far surpassed those of the previous weeks. Many conversions have been recorded and 563 persons have "hit the trail" since last Tuesday. On Friday night a delegation of women were present from St. Johnsville and took in the services. Sunday afternoon Peacock preached his famous sermon, "Chickens Come Home To Roost," to men only. About 500 men were present and listened attentively to a straight from the shoulder talk about physical sin. Warth brought out his men's choir and they did some great singing. At the same time this meeting was going on, Miss Spear talked to women only at the Reformed church. Her text was from 11st Corinthians 19 and 20. About 400 women were present and 8 of them "hit the trial", beating the mens meeting out by 1.

"Sunday night's service at the theatre was remarkable both for the spirit displayed and fhe sermon preached. Peacock was at his best and held his audience by his forceful delivery and the "hot shots" he gave them. Everyone stayed to the after meeting which was the most enthusiastic yet held. Some of the most prominent men in town "hit the trail" and the audience was "with" them every minute—they got a big 'hand.' "

### BOWLERS TO BOOK MATCHES OUTSIDE CITY

Manager Powell of the Onyx Bowling alleys announced today that he would make no effort to continue the City Bowling League. from which several teams dropped out last week but that he would instead book matches with a number of out-of-town teams to be bowled on the Onyx alleys.

In explaining the failure of the league to continue for the rest of the season. Mr. Powell stated that the captains of the teams to have their quintet appear on the night of a match game. Usually, one or two members of each team would be absent and it would be necessary to fill out the quintet with inferior bowlers drawn from among the spectators, which dis heartened the captains of the teams to the extent that two of them decided to discontinue. Two other teams followed the same course within a few days.

"There are about a dozen exceptionally good bowlers in this city who would have liked to see the league prosper," Mr. Powell added, "and in order to make matters interesting for these fellows, I am arranging to form several teams to represent this city in matches with out-of-town quintets. I believe these men will find the idea satisfactory."

**The Kline-Wood Drug Co.**

## *A Physician of High Standing*

said that there is a lot of so-called grip in town—self-diagnosed, so to speak, but as a matter of fact, that there are very few genuine cases of it.

This goes to prove that you cannot always be depended upon to diagnose your own case correctly.

If you are suffering from a cold or the grip you may be able to obtain relief from some patent medicine, but *you must know* for what you are taking it.

Avoid delay and possible complications by consulting a physician, then be on the safe side by bringing your prescription here to be filled.

## No More Loose Lenses

In keeping with our policy of "always the best—first" we announce the local agency for the new "Kee-Lock" Rimless Bows and Nose Pieces. The "Kee-Lock" has

### No Screws in the Lens.

Screw holes naturally weaken the lens. The "Kee-Lock" lens fastening fits into a slot cut in the lens. This is solidly cemented by a heat process, thus making the fastening an integral part of the lens. The "Kee-Lock" has no weak spots—neither can the lens possibly wobble or work loose.

Ask to see the "Kee-Lock"—you'll surely be convinced of its superiority.

Wm. C. Morgan - - Optometrist

### MACCABEE TEAM GOES FORTH TO CONQUER

Prepared to administer a decisive defeat to the Oswego Normal five on their court ,the Maccabee quintet accompanied by a number of rooters, will go by trolley to Oswego tonight and endeavor to clinch the claim to the championship of Oswego county.

The same quintet which defeated the Company D team of Oswego on Wednesday night will represent the local lodge.

### SPORT NEWS

A record attendance is expected at the Phoenix High-Fulton High basketball game tonight at the City Hall. The students at the high school have been encouraged by the recent string of victories which the reorganized quintet have scored since the Solvay High game.

Coach Merrill has been well pleased with the number of players who have reported at the city hall court on practice nights to give the first string men a hard workout. This has resulted in a number of the less-experienced players gaining more know ledge of the game and preparing them for next season's squad.

## PUBLIC NOTICE

NOTIIE is hereby given that the undersigned intends to file with the Commissioners of the Land Office at the office of the Secretary of State, Albany, on the 24th day of February, 1916, an applicationfor grant of certain abandoned canal lands described as follows:

Situated at a point in the junction of First and Oneida streets "beginning at a point in the North line of Oneida street 35.17 feet westerly from the Southwest corner of block No. 20, thence N. 28 degrees 31 minutes East 154.12 feet, thence N. 64 degrees 28 minutes W. 46.52 feet; thence S. 28 degrees 45 minutes West 95.40 feet; thence N. 81 degrees 54 minutes West 95.40 feet; thence N. 81 degrees 54 minutes E. 72.78 feet to a beginning, containing 0.213 acres of land.

NOTICE is further given that it is the intention of the undersigned to appropriate these lands for the purpose of a Public Municipal Market and that a two (2) story brick and stone building of the dimensions as follows: Width front, 72.48; width rear 46.52; length Eastern side 154.12; length western side 194.18, will be erected thereon.

Dated, January, 1916.

Signed
City of Fulton by
Victor C. Lewis Mayor.

## Those You Know

The committee in charge of the Elks' charity ball announces that plans are already under way to make the affair the most elaborate social event of the season.

* * *

Miss Julia Frazier is among the graduates in the mid-year graduating class at Oswego Normal.

* * *

An evening of enjoyment attended the thirty couples who appeared at the C. R. B. A. hall last night. A leap year party, arranged by the Misses Ethel Sweet, Helen Parker and Victoria Beauchamp, was the attraction. Reynold's orchestra furnished the music.

* * *

The Rev. Mr. Thompson who so acceptably occupied the pulpit of the Baptist church, last Sunday, will preach both morning and evening the coming Sunday.

* * *

Mr. Charles Davis, head clerk at the Wallace confectionery, West Broadway, is spending a vacation of two weeks with Syracuse friends.

* * *

The Standard Bearers of the First Methodist church will hold a food sale in the L. P. Smith store tomorrow at 9 a. m.

* * *

Mr. Francis Campbell, who has been ill at his home in W. 4th st., is improving.

* * *

Mr. Fred Radder, of the Endicott, Johnston & Co., store, is in Binghamton.

* * *

The leader for tonight's class in salesman and business efficiency will be chosen just prior to the meeting.

### POLVERT—PETH

Miss Mary Peth and Mr. Rosario Polvert were married yesterday in the Italian Catholic church, Syracuse.

Mr. and Mrs. Polvert returned to this city and were guests of friends at a reception at 310 Utica st., where they will reside.

Mr. Polvert belongs to the Massaro Macaroni company's force of employes.

# GRANGE OPPOSES PREPAREDNESS

**Convention Goes on Record Against Scheme of Munitions Makers---Favors Prohibition.**

Jamestown, N. Y.—Dean Galloway, of the Cornell college of agricultural, and State Master John A. McSparran of the Pennsylvania state grange, were honored guests of the New York state grange at Wednesday's session, each addressing the delegates at the forenoon session.

Master McSparran, who is also a member of the legislative committee of the national grange complimented the capacity of the farmeer for legislative work. In referring to some of the important questions before the public he spoke of the spread of prohibitive sentiment and of the work of the grange as an organization in furthering temperance reform.

Master McSparran announced that the national grange, at its recent annual session, had gone on record as opposed to campaign for preparedness now being waged in the United States, and the applause which greeted his statement showed a like opposition on the part of many of the delegates.

The speaker believed that the governmental supervision of transportation companies was helping to solve the problem of transportation as related to agriculture and was bringing about more efficient service.

Master McSparran urged the members of the grange to take a more active interest in civic matters in an effort to raise the standard of public life.

**Cornell Asks for Meet**

Invitations were received from Ithaca and Oneonta for thee 1917 session of the state grange.

Dean Galloway referred to the invitation which had been extended to hold the annual session of the state grange for 1917 in Ithaca, and pledged the delegates that Cornell university would extend to the visitors every facility for making their stay in Ithaca profitable. The dean stated that the college of agriculture now has 2,800 students enrolled.

When the Committee on credentials rendered its final report the following substitutions were made on the Jfferson county delegation: C. E. Ripley for Adam, Dorr and Mrs. George Butts for Mrs. O. A. Johnson, the regularly chosen delegates not being present.

A large number of resolutions were presented for consideration by the state grange, among those of the last period Wednesday being the following; endorsing campaign of state Horsemen's Association for safer highways; endorsing principle of state wide prohibition; asking railroad companies, with docks in New York city, to permit auction sale of farm produce at docks; urging more stringent legislation against undesirable immigrants; favoring postponement of legislative action on proposed township school bill until measnre has been more closely studied by rural communities; opposing policy of preparedness.

The annual memorial service was held at 4 Wednesday afternoon.

the value of county conference of lecturers. The state lecturer has sent to the lecturers of the state during the year a handbook embodying suggestions for their work.

**Public Department Efficient**

A modest but valuable factor in the spread of grange news and principles is the Grange Review, edited by J. W. Darrow and published under the auspices of the state grange. Mr. Darrow has for many years been the official reporter of state grange proceedings and sends out these reports to about 25 daily papers of the state. Mr. Darrow also furnishes to 400 newspaper man and his work in the grange news letter. He is a former newspapeer man and his work in the state grange has been of invaluable benefit in diffusing more widely a knowledge of grange work.

Excellent reports have been given of the week's proceedings by the Jamestown Journal and Jamestown Post, who have had special representatives present.

Before announcing the appointment of a committee on election Master Vary announced very plainly that he did not wish to be considered a candidate for re-election. A canvassing committee of seven was named to act, with W. R. Randall of Jefferson, as chairman for the biennial election.

The first batch of resolutions were presented at Tuesday afternoon's session, among them being the following: Opposing any change of school system to township plan; amending method of construction of highways, to make the m less dangerous for horses; favoring state constabulatory system; favoring plan of co-operative milk station at New York City under state supervision; favoring government control of public utilities; opposing exportation of war munitions to belligerent nations of Europe; extending local option law to cities and villages ;making written consent of owner necessary to hunt on private property.

# STATE GRANGE COST $14,000

Jamestown, N. Y.—In his annual report to the state grange, Overseer Lowell stated that the expense of the Jamestown session of the state grange would be about $14 000, or $6 per minute. The central theme of the overseer's report was co-operation, and he believed the chief difficulty was in co-operative selling. The unwillingness of producers to properly grade their products had proven a great stumbling block to co-operative selling, he said, and he regarded its removal as the key to the solution of the problem.

Chauaaucua county is theh ome of the first grange organized in New York state, Fredonio No. 1, established 48 years ago, and this grange is still in vigorous condition, with a membership of about 650. Overseer Lowell is a member of Fredonia grange, and as he is to be the next head of the state grange, this fact is of special interest

State Lecturer F. E. Alexander of Oswego county paid a high tribute to the work of the subordinate grange lecturers of the state and emphasized

# OIL-DRIVEN CARS MUST COME SOON

Albany—The up-state Public Service Commission today sounded a warning to the railroads of the state that they must find some more convenient and economical means for handling local passenger business to meet the competition of the trolley and the automobile unless they want to see a continuance of the falling off in local passenger revenue that has marked the last few years. The Commission urges the railroads to study the possibilities of the gasoline driven railroad car.

"The familiar local train," says an opinion by Commissioner Frank Irvine, "composed of locomotive, baggage and express car, and two or three coaches, is in a state of obsalescence. Such trains carry only those who have no other available means of transportation. Some cheaper, faster, and more comfortable method of transporting local passengers must be adopted or else the railroads must continue to transport them at a loss in spite of wise economies and in spite of reasonable curtailment of service."

The opinion was rendered upon the denial by the Commission of the complaint of Ralph Harter and other residents of Cortland, and points between there and Auburn on the Lehigh Valley Railroad, asking for earlier morning and later evening service into and out of Auburn. The case, says Commissioner Irvine, is typical of course through that part of the state, gridironed by main and branch lines of railroad. As in many other cases, it has been shown that public convenience would be served by additional trains; yet the railroad has been able to show that even if the cost of this service could be barely met, it would be at the expense of revenue now being derived from the present trains, which are barely paying, and would result in a generally unprofitable operation.

### TUBERCULOSIS HOSPITAL ADDITION NEARLY DONE

It was made known by contractors in charge of building the addition to the county's hospital at Orwell, that in about seven weeks the annex will be ready for patients.

The members of theb oard report finding the affairs at the hospital to be satisfactory. Many applications have been made by ma le patients, but owing to the fact that there is no room to accommodate them, they must wait until after the completion of the a ddition. Female patients could be accommodated, however.

Souvenirs for the ladies at the Van Wagenen, Inc., sale next Saturday afternoon. adv348

### MONTHLY CONFERENCE OF FIRST METHODIST CHURCH

Announcement ism adeb y the Rev. J. W. Barrett of the Fourth Monthly Conference of the First M. E. church. The meeting will be held tonight at 8 o'clock, the Rev. Dr Miller, of Rome, as the presiding officer.

Every department o f the church will make its report and a large attendance is anticipated.

### THOMAS DODGE

Thomas H. Dodge, 72, a life-long resident of the Town of Volney, died at the home of his daughter, Mrs. Herbert Kerfien at Lindsley's Corners in the town of Palermo last night at 6:30 o'clock.

Mrs. Kerfien is the only near relative surviving.

Mr. Dodge was twice married, his second wife being Stella Burcham-Dodge.

Mrs. Kerfien's illness madeit necessary to remove Mr. Dodge's body to the home of Mrs. Benjamin Congdon, a neice, at Bundy's Crossing, at which place the funeral will be held Sunday at 1 p. m. Rev. Mr. Crawford will conduct the services at the Methodist Protestant church at 1:30 o'clock. Burial will be made in Fairview cemetery.

### MRS. MARY HUBBARD

Mrs. Mary Hubbard, 72, died suddenly this morning at 12:3 o'clock at her home 303 S. 2nd st. She is survived by two sisters, Mrs. John Horgan of Syracuse, and Mrs. James Palmer, of Toledo, and one brother, Maurice Stafford, of Toledo.

Mrs. Hubbard has resided in this city for 21 years. She was born in Onondaga county. She was a member of the Daughters of Liberty.

Funeral services will be held at the home at 2:30 o'clock Sunday afternoon, the Rev. Mr. Thompsan officiating. Friends are invited to call.

On Monday morning the body will be taken to North Syracuse for burial.

WHAT APPEAR TO BE CALAMITIES ARE OFTEN THE SOURCES OF FORTUNE.

# Is Advertising Wisdom

IT IS APPARENT IN THE CASE OF THE MAN WHO FIGURES TO GET INTO HIS STORE 10 PER CENT OF THIS TOWN'S POPULATION BY PAYING OUT THREE TIMES AS MUCH MONEY FOR SPACE AS HE WOULD PAY WERE HE TO USE THE HOME PAPERS TO REACH THE BUYING PUBLIC. THE STING IS IN THE COMPARATIVE RATES FOR ADVERTISING PLUS THE COMPETITIVE BUSINESS BROUGHT INTO THIS CITY. THE MERCHANT WHO CANNOT SEE THIS LOGIC IS A SUBJECT FOR PITY. IF HE FAILS TO REALIZE THE TRUTH HIS DAY OF RECKONING IS ASSURED.

## Realization of the Truth Will Be His Source of Fortune

Remember the old German proverb: *"As fortune is sought so is it found,"* and then seek to reach your 10 per cent by Advertising in the Home Papers, which cover your field of trade better than the out-of-town papers.

## WARTIME NURSES

### The Great Battle of Mercy Won by Florence Nightingale.

### WORK OF THE GREAT PIONEER.

**She Changed the Military Hospital From a Shambles Into a Life Saving Station and Became the Mother of Modern Nursing Methods.**

Florence Nightingale, whose death occurred in 1911 at the advanced age of ninety, was a revolutionist in the most splendid sense of that term. She it was who revolutionized nursing to that extent that she may be considered as the mother of that profession.

Previous to her entrance into the field the sick were the victims of callous ignorance and grasping indifference. But Florence Nightingale introduced the trained, skilled and gentle hospital nurse, district nurse and military nurse of today.

Certainly to few women—and to few men—has it been given to serve their fellows so splendidly and so effectively. Florence Nightingale found chaos in military hospitals; she created order and all that order implies.

After the battle of Alma, in the Crimean war, the military hospital at Scutari was like a dirty shambles. Wounded men died in hundreds in the midst of squalor and vermin. Crowds of poisonous flies buzzed ceaselessly above the sick; medical supplies were inadequate; proper food could not be had; there were no arrangements for washing or sanitation.

The plight of the wounded soldiers, herded together in this hotbed of pestilence, was worse than if they had been left upon the battlefield. "Are there no devoted women among you," wrote Russell, the famous war correspondent of the London Times, "able and willing to go forth and administer to the sick and suffering soldiers in the east in the hospitals at Scutari? Are none of the daughters of England at this hour of need ready for such a work of mercy?"

This appeal was answered almost instantly. Sidney Herbert was then at the head of the war office, and when the authorities began to be inundated by letters from women of all classes anxious to respond to the call Mr. Herbert's thoughts at once turned to the lady who was in his opinion the one woman capable of organizing and taking out to the Crimea a staff of nurses. The woman was Florence Nightingale.

Miss Nightingale was thirty-four at the time, and from her childhood she had devoted herself to the study of hospital nursing and hospital management. In 1849 she had enrolled herself as a volunteer nurse at the first training school for sick nurses established in modern times—the Deaconess institution at Kaiserworth, on the Rhine. When the war broke out there was no woman in all England better fitted than Florence Nightingale to give to England's soldiers comfort and relief.

Mr. Herbert wrote to Miss Nightingale and asked her if she would go out and supervise the whole thing. His letter crossed one from her, for on the same day Florence Nightingale had written to the war office offering her services in the hospital at Scutari. The offer showed splendid courage.

Within a week of making her resolve Miss Nightingale had her first contingent of nurses in marching order. She had selected thirty-eight nurses to accompany her, and they arrived at Scutari on the day before the battle of Inkerman. And without a moment's loss of time that lady in chief and her staff set to work to cleanse the Augean stable which they found waiting for them at the great barrack hospital.

In a short time the place was entirely renovated. Everything was scrubbed, old clothes were burned, a kitchen and laundry were established, and the place became a comfortable, well organized hospital. Florence Nightingale superintended everything. She worked as hard at the routine and organizing as at the nursing itself. At all hours of the day and night she would walk silently, lamp in hand, through the wards, giving a word of comfort here or instruction there. She saved the lives literally of hundreds.

Wounded men, so horribly mangled that doctors gave them no hope, and other nurses could not bring themselves to touch them, were saved from death by the tireless care of this one wonderful woman. The men worshiped the very shadow of this "lady with the lamp."

The supreme womanliness of the work of Miss Nightingale made her the idol of the English people. Three monarchs paid their tribute to her. Remembered by royalty she was not forgotten by the people. On her return, shattered in health, from Scutari, $250,000 was presented to her by a grateful nation. She used it all for the founding of the Nightingale Training Home For Nurses at St. Thomas' hospital, England, which is practically the parent of modern training homes throughout the world, just as Florence Nightingale was the mother of all present day nurses. — Cleveland Plain Dealer.

#### Spiritual Victory.

If after victory on the field of battle we fail to win spiritual victory and to place ideals where they truly should be the heroism of our soldiers will have done no more than postpone our own catastrophe for a few years.—M. Paul Sabatier.

Duty makes us do things well, but love makes us do them beautifully.—Phillips Brooks.

## A GERMAN ARMY CORPS.

**Just What It Means In Men, Animals Vehicles and Food.**

Just how much space does an army corps require? According to a German writer, a German army corps consists of 41,000 men, 14,000 horses and 2,400 vehicles, including the cannon.

Such a body of men and their belongings, on a single road, make a procession about thirty miles long. Even when in fairly close touch with the enemy, the length of a corps is about fifteen miles, and when the front detachments become engaged in a battle it is five or six hours before the men in the rear get into action to assist them.

Before this war began it was generally supposed that a single army corps would occupy about two and one-half or three miles of the fighting line, but in actual experience it has been found that the average front of a corps is considerably broader—namely, from three and one-half to five miles. An army of ten corps is not very large as armies go in this war, but it would fight on a front about thirty-seven miles long, and a man who undertook to walk from one wing to the other would require twelve or fourteen hours to do it.

An army corps consumes nearly 300,000 pounds of food a day, about 100,000 pounds for the men and 200,000 pounds for the horses. Even under the most favorable conditions it requires a train of 150 wagons to bring up a day's food.

#### To Identify Babies.

Use of footprints to prevent confusion in the identification of babies has been adopted in Chicago's largest maternity hospital. The prints are obtained in the first hour of life, and the methods used are simple. The infant's feet are pressed against an ink pad, and then the inky foot is placed on a paper of moderate gloss, on which the impression of the tiny lines is made. This new method of identification is regarded as a permanent record of value from a scientific standpoint. Scientists say the lines will never change. There will be no chance, they contend, of a substitution of babies.

#### Gold Mining In Alaska.

The sequence of events so often observed in the history of gold mining camps has been repeated in the Willow creek district, Alaska. The earliest prospectors in 1897 were primarily interested in the search for placer gold and, having found it, were too busily engaged in mining to trace the stream gold to the veins from which it originally came. It was nearly ten years later that the first of the valuable quartz veins that now yield most of the gold mined in the district was discovered. Since 1906, however, quartz mining has progressed steadily and has rested upon a substantial basis.

#### The Word "Movie."

To a thousand editors the question was recently submitted as to whether the word "movie" is to be regarded as a legitimate English word to be used without quotation marks. Five hundred voted for the word's admission without adornment; 220 declared that the word is still on probation; 280 failed to express an opinion, but are probably to be counted with the majority.

## SUICIDE CHANGED MIND.

**Taste of Carbolic Acid Showed Smith He Didn't Want to Die.**

Indianapolis.—Edward G. Smith, aged twenty-five, of 632 North Jefferson avenue, decided to commit suicide but quickly changed his mind after he had tasted a small quantity of carbolic acid.

The customary fateful note, in which he attributed his despondency to a quarrel with his wife, was found in his pocket.

Smith staged his attempt at suicide in a drug store at Illinois and Washington streets. After the clerk had sold him the acid he turned around and held the upturned bottle to his lips. A moment later he gave out a shriek, threw the bottle and remaining bit of acid at the clerk and then fell against the counter. An ambulance took him to the city hospital.

Physicians at the hospital said that Smith's tongue was slightly burned, but that he had not swallowed any of the acid.

## ONE LOOK WAS ENOUGH.

**Farmer Flees When He Sees Bride by Mail Get Off Train.**

Kansas City.—When Timothy Riley, farmer, got one look at his bride to be the romance was "busted." Riley drove his brand new farm wagon up in front of the Union station, hitched the team and then stood guard at the exit door.

He wore a red carnation, by which sign the bride to be was to know him, all the love making having been done by mail. The bride, who was to have come from Nevada, was to wear a Palm Beach suit.

A few moments later a Palm Beach suit, garnished with numerous boxes and bundles, hove in sight. Riley took one look, snatched the carnation from his buttonhole and fled. The bride to be appeared to be fully twenty years older than he, which probably was the excuse for his hasty flight.

#### Love Tokens In Spain.

Spanish lovers present their fiancees with fans on which they have written the most impassioned poetry, embroidered garters with love mottoes woven in silk and innumerable boxes of sweets. Engagement rings are not given, the bride elect receiving instead a gold medal, which she wears suspended from a chain around her neck.

## In Hard Luck

By M. QUAD

Copyright, 1916, by the McClure Newspaper Syndicate.

Had you asked in the village of Lorain which was the happiest family in the community nine out of ten would have answered that Deacon Thurston and his wife filled the bill.

Deacon Thurston was long, lean and smiling. His wife was fat, content and good natured.

The deacon had never been known to get mad or to do a selfish action. His wife was seldom known to borrow, but was always willing to lend.

Of a summer evening they sat on the porch—sometimes for three hours—without speaking a word to each other.

After supper of a winter's evening the deacon built a roaring fire in the sitting room, and then with a candle in one hand and a blue pitcher in the other he descended to the cellar. The barrel of cider stood in the northeast corner. He knelt before it and drew exactly a pint and a half of its contents. This was a pint for himself and half a pint for his good wife. It was never more and never less. The apple bin stood against the south wall. He went to it and selected four fine Baldwins and put them in his coattail pocket and marched up the stairs. His wife was ready with a damp cloth to give the apples a wipe. Three of them were for the deacon and one for his wife.

One winter when the first snowfall came the deacon hitched up the old horse to the "pung," or homemade sled, and started for the woods. Four inches of snow had fallen, and it was a brisk morning. The old horse squealed and kicked up his heels, and the deacon heard himself saying:

"Well, if I ain't glad to be alive this morning, though they have raised my taxes $2 more this year!"

When the deacon and his outfit entered the woods there was a rabbit's trail leading in the direction he wanted to go. He therefore followed it. It led into the woods and stopped at a hollow log.

The deacon advanced to the log and with the head of his ax struck a resounding blow. He did not see whether the rabbit ran out or not. His ear caught a jingling sound, and in the excitement the presence of bunny was entirely forgotten. It was a jingle of money—not greenbacks, but solid coin.

Five minutes later he was splitting the old log wide open and his eyes were bulging out and his cheeks were pale. There was coin before him—heaps of coin. It was all silver coin.

One, two, three, four capfuls of silver treasure. He carried each capful to the sled and emptied its contents upon the horse blanket. When all the money had been gathered he tied up the blanket. When he finally mounted the sled he gave the old horse three or four sharp cuts with the whip. They were the first blows the old nag had ever received at his hands, and they started him out at a lumbering gallop.

Horse and driver appeared at home in a sweat. They did not stop at the kitchen door, though Mrs. Thurston was there to ask what had happened.

"S-s-h! You go right into the house, Judith, and I will be there in a minute."

In five minutes he followed after her and laid the bundle of coin on the kitchen table with a clink that made her exclaim:

"Oh, deacon, have you picked up a lot of horseshoes?"

"Horseshoes nothing!!" he whispered as he untied the blanket and folded it back.

"Why, it's silver—it's money!"

"Of course it is, and I didn't rob anybody to get it either. I found it in a holler log."

"Deacon, we are rich!" whispered the wife as she locked the kitchen door and pulled down the shades.

"You bet we are," replied the deacon. "Help me count the money."

They counted it. It took them a full hour, but it was over at last, and there was just $5,000.

"Deacon," said she after a moment, "we allus wanted to go to Niagara Falls and see the water wasting itself, but you could never spare the money. We will go now, won't we?"

The deacon was silent, but there was such a look on his face as she had never seen before. It was a look of avarice and selfishness combined, and it was not good to see. She had to repeat her question before he replied.

"Judith, I want you to understand," said the deacon as he walked backward and forward, "there is to be no nonsense about this money. I may have to go to Niagara Falls on business, but you will stay at home and care for the house. I shall have to have a new suit of clothes, but you can get along with your old ones."

"But I have not had a new bonnet in fourteen years," she wailed.

"Your old one is all right."

And that treasure from the hollow log bred dissension almost within the hour it was found. Husband and wife took opposite stands, and things were getting ripe for a separation when the deacon passed one of the coins at the grocery. The grocer found it counterfeit, and the whole pile of silver was overhauled, to find that every coin was bogus. It had been hidden in the log by those who made it. When the sad truth stood revealed and the deacon had fumed and fretted and his wife had shed a few tears he stood before her and queried:

"Well, Judith, what are we going to do about it?"

"Quit being idiots," she answered. And they then and there quit.

# MODEL FROCKS AND WRAPS

**French Gowns Just Arrived—Taffeeta—Spangles—Lace and Chiffon in New Combinations. Hips Distended and Bodices Gauzy.**

New York—"It's always Summer somewhere" someone remarks, and therefore designers find excuse for rushing advance models. and enticing the money from private pocket

6965

... Design

books into the tills of trade, which keeps things moving, and a lot of people industriously employed.

**Tilting Hips**

The tight hip has vanished from any outer apparel, except a few conservative sport skirts. Tight tilted lines are the rage for hip draperies, and the waist defined by full soft gathers where puffings are not preferred, yet the strapped girdle of substantial silk continues in vogue and offers efficient aid to the woman who would look unshapely in the "meal bag" adjustment of draperies One of the favorite methods of draping leaves wide pockets of drapery at the hips usually two on either side and stiffens these with trimings that insure their fashionable swaying tilt, so charming on lithe slender wearers, but quite impossible for other people.

Some of the prettiest models shown built of lace and silk or satin, have the more substantial fabric disposed in long panels, like wide stripes over the lace petticoat. while the waist trimming carries out the same effect. This type of dress becomes the woman who can not wear flamboyant hiy draperies and lends itself admirably to refurbishing a partly worn dress, or to constructing a pretty gown of short length of silk or velvet. Never have I seen so many opportunities for using remnants for modish fancy frocks as later models offer. Hardly any dress is built of less than three materials and often more are used with excellent results.

**Materials and Trimmings**

Taffeta silk is still leading for fussy frocks of all sorts, and spangled trimmings are extremely modish. At the Opera a few nights since, I was especially impressed with a wrap all of green spangled net that shimmered and shone in enticing fashion at every movement of the wearer. Gold brocades and those of gorgeous Oriental hues shot through with threads of gold or silver, make gorgeous wraps that are a most striking color note of fashionable audiences, and a most necessary protection when waists as flimsy as those now worn expose their wearers to the sligtest chill or draft. Even the scarfs that cover the neck are of tulle, while while undoubtedly becoming affords even less protection than the former chiffon throws.

Voluminous as to cut most of the evening wraps one sees, can be readily copied at home with the aid of a good pattern and clever seamstress, and a well selected coat of this sort lasts several seasons and pays for itself many times over in comfort and appearance.

**Fashionable Coiffures**

Fashionable coiffures are extremely simple following closely the lines of the head. Even the waving is done on as natural lines as possible while many of the younger set elect to wear the hair parted and straight and [illegible] the neck in [illegible] Ex[illegible] [illegible] except by the dowagers [illegible] to pompadours and marcel waves, with jewelled combs and pins.

**Long Sleeves and Gloves**

The mode is for either long transparent sleeves reaching the wrist, or none at all, and with either mode gloves are as often dispensed with as worn. It seems to be quite a matter of taste or inclination as fashion endorses either method

**A Pretty Afternoon Frock**

A pretty afternoon frock of pale tan Border voile, seen lately, had the full straight gathered skirt banded with black satin ribbon from the top of the hem well up toward the belt. The lower band about three inches in width and the others graduating up to half an inch. Strange to say these graduated bandings do not shorten the wearer as even widths would do. The waist draperies were edged with the narrowest width ribbon, and the sash made of the widest width.

Summer frocks can be made up now with the assurance that there will not be any changes in style from the models already launched.

VERONA CLARKE.

**PRACTICAL HEALTH HINT.**

**The Baby.**

Never take babies of tender age on shopping tours, to motion picture shows or other crowded places.

Never permit the baby to play upon the floor where drafts are frequent and its tiny hands collect dirt and carry the filth to its mouth.

If the baby is sick don't ask your neighbor for advice, but send for your family physician.

Don't cough or sneeze in the baby's face, and do not kiss the baby on the mouth or permit others to do so.

## PUZZLED THE PORTER.

**And It Wasn't Even a Simple Problem In Algebra.**

Figures are very deceptive, according to former Judge Daniel G. Taylor, who has a portly figure himself.

"I was traveling in Michigan last month in a train which had berths, a smoking compartment and a baggage room all in one car, when I decided to take a berth.

"The porter told me a berth cost $1, and I gave him a five dollar bill. He had no change and went to the other passenger, who also wanted a berth. He took the five dollar bill, gave the porter $4 and said the other $1 was for his berth.

"The negro porter gave me my change and started to fix the berth and then asked me what size bill I had given him. I said $5 and that he had given me $4 change. He said that was correct.

"Then the porter turned to the other passenger and asked him about the change for the bill. He replied that he had given the porter $4 and $1 for the berth. The porter again said that was right.

"The porter kept puzzling, and I asked him what was wrong. He said he was trying to figure where the railroad would get the $2 for the two berths.

"Finally the other passenger laughed and gave the porter $2.

"'Is that what you white folks call algebra?' the porter asked."—St. Louis Globe-Democrat.

**On the Human Understanding.**

"It's mighty strange," said Mr. Wood,
"How shoes wear out so fast,
For I have always understood
That they were made to last."

"It's not so strange," said Mr. Weld;
"No wonder they're soon dead.
With sole and body merely held
Together by a thread."
—London Standard.

**He Needed Practice.**

A musical man in Cologne
Was learning to play the trombogne;
Sweet strains he'd essay
To touchingly play—
Alas, all turned sour when blogne!
—New York World.

**Beginning Right.**

Papa he has been a-sayin'
We should start the new year right,
An' not quarrel in our playin',
An' mind mamma day an' night.

An' he said there's no disputin'
That whatever we might do
On the first day, sure as shootin',
We would do the whole year through.

An' I saw the chance was splendid
To do something right away
That, until the year was ended,
I would like to do each day.

An' on New Year's, startin' squarely,
I got up soon as 'twas light
An' learned all my lessons fairly,
So's I'd always have them right.

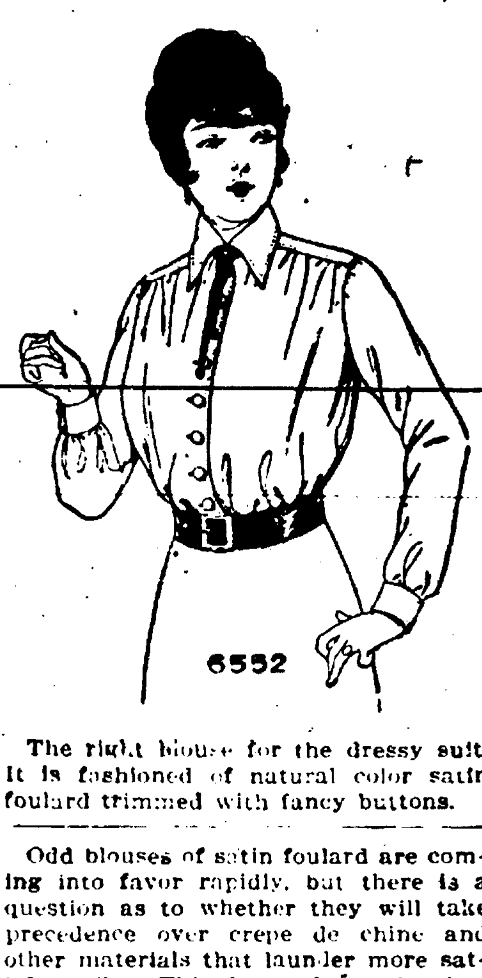
## Shirt Waist of Satin Foulard.

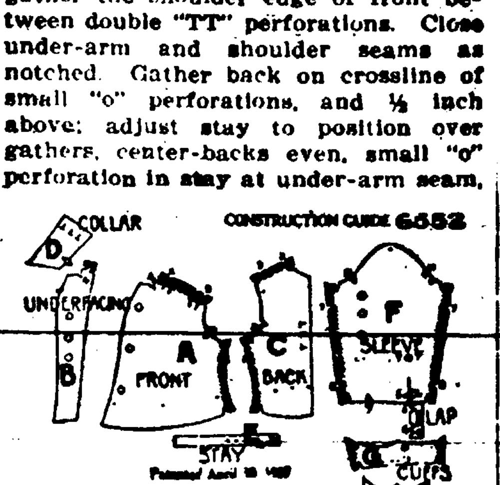


6552

The right blouse for the dressy suit. It is fashioned of natural color satin foulard trimmed with fancy buttons.

Odd blouses of satin foulard are coming into favor rapidly, but there is a question as to whether they will take precedence over crepe de chine and other materials that launder more satisfactorily This design is cut in simple fashion, the front being rolled back to form revers. The collar may be fastened close to the throat, however. The sleeves may have turn-back cuffs or straight sleevebands. In medium size the waist requires 2¾ yards 36-inch material.

In order to make it, first adjust the underfacing to position underneath the front, corresponding edges even. Then gather the shoulder edge of front between double "TT" perforations. Close under-arm and shoulder seams as notched. Gather back on crossline of small "o" perforations, and ½ inch above: adjust stay to position over gathers, center-backs even, small "o" perforation in stay at under-arm seam,



and fasten at center-front. Center-front of waist indicated by large "O" perforations.

Next, face the collar and sew to neck edge, notches and center-backs even; roll collar and front as illustrated.

Sew lap of sleeve to slashed edges as notched, fold on line of large "O" perforations and fell remaining edge over seam; turn the lap underneath the front slashed edge and stitch lower edge to position. Close seam as notched. Gather entire lower edge of sleeve. Face cuff, turn the lower part of back on small "o" perforations and sew to sleeve as notched, small "o" perforation in cuff at seam of sleeve. Sew sleeve in armhole, notches and small "o" perforations even, easing any fulness.

Daintiness is the chief characteristic of the newest blouses. The tailored effects are seldom trimmed with anything other than handsome fancy buttons.

Pictorial Review Shirt Waist No. 6552. Sizes 34, 36, 38, 40, 42, 44, 46 and 48 inches bust. Price, 15 cents.

# Woman's World

**A Beautiful Bas-relief of a Suffrage Pioneer.**

SUSAN B. ANTHONY.

The historical department of the Smithsonian institution at Washington has just accepted and placed on view a bronze bas-relief of the late Susan B. Anthony by Michael Jacobs, a painter and sculptor of note residing in that city.

The bas-relief, which is in the "modern style," being of the school of Rodin, is a noteworthy example of the present tendency in sculpture, which is to keep the relief as [illegible] as possible. The relief on the medallion of Miss Anthony is only one-fourth of an inch high. The picture is that of a thoughtful idealist, with just a suggestion of the unconquerable fire which shone out through the bold personality of the great suffrage leader.

As a compliment to the National American Woman Suffrage association, of which Miss Anthony was president from 1892 until her death in 1900, Mr. Jacobs has had cast a second copy of the bas-relief, which was formally presented to the national association during its forty-seventh annual convention in Washington Dec. 14 to 19.

Mr. Jacobs is well known as a portrait painter, having executed many commissions for titled Europeans during his stay abroad.

**Infant's Knitted Afghan.**

This is a beautiful robe, consisting of five strips, two blue and three strips white, length 32 inches, with crocheted shell border to finish.

Materials—Five banks white, 4 fold Germantown; 4 banks, color blue; 2 bone knitting needles, No. 6; 1 bone crochet book, No. 4. With white yarn cast on 30 stitches, knit plain until strip is 32 inches long. Bind off loosely. With colored yarn cast on 31 stitches.

First Row—Knit plain.

Second Row—Knit 1. * yarn over, knit 3, pass the first over second and third stitch. Repeat from * to end of row.

Third Row—Knit plain.

Fourth Row—* knit 3, pass the first over the second and third stitch, yarn over, repeat from * to end of row. Repeat these four rows until strip is 32 inches long. Join strips by working one row of sg. c. down both sides of each strip with white yarn. With colored yarn join the strips together with sg. c., taking up back stitch of each strip.

Border—With white yarn work a row of shells of 6 d. c. Fasten, shell down with 1 sg. c. Finish with picot edge of colored yarn.

**Rubber Plant's Winter Cure.**

Rubber plants need a sun bath every day. Their feet should be kept damp, but not wet. The leaves should be washed twice a week in good soapsuds and rinsed in clear water.

When the pot gets too full of roots repot the plant. Also give it a dose of diluted ammonia occasionally.

With regard to the housewife's potted plants generally, Uncle Sam says she should chase the woolly white mealy bugs and the little red ants away from them with a toothpick. She may drown the red spider with a squirt gun. If the bugs and spiders shatter your preparedness program you are advised to cut the plants off within an inch of their lives and throw the cuttings away. The plants will grow again.

The green fly, which is not so green as it looks, won't bother your plants if you keep them well bathed and fed.

**For Dry Cleaning.**

In cleaning any fabric with gasoline or similar fluid it sometimes happens that a ring is left around the garment in process of cleansing. To prevent such a ring it is recommended that by adding common table salt to the gasoline used spots can often be removed from delicate fabrics in a most satisfactory manner.

If, however, a ring has been left the place cleansed should be wet again and immediately covered while still damp with fuller's earth, extending just beyond the ring. Let this remain on for some time, and when brushed off the spot should have disappeared. Gypsum may be used in like manner instead of the fuller's earth if preferred.

**Sufficient Proof.**

A citizen was standing on a street corner looking a bit depressed when a friend sauntered along.

"What seems to be the trouble, old man?" solicitously queried the latter.

"I have just had something of a jolt," answered the sad one. "I was bequeathed a silver service as the solid thing a few weeks ago, and now I know that it is only plated ware."

"Sorry to hear that, old fellow," returned the friend. "But you may be mistaken."

"Oh, no, I'm not!" was the mournful rejoinder of the sad one. "The service was on the sideboard the other night when burglars broke in, but they never cked it."—Philadelphia Telegraph.

# The Woman of Today

The wise ones who look at the age and would diagnose its ills call one symptom a "sense of restlessness." Women are restless, yes—but more than that it's a restless age. Everybody is trying to do something, to get somewhere, to change over from the old order to the new, but just what the new is they cannot tell you.

And we would hold no argument for stagnation or for that listlessness which lets well enough alone and leans back comfortably on the past and is content with what is.

But it is possible that in this very quest for the next thing, or the new thing, we are but providing for ourselves ingeniously enough a cloak to cover our excuses for not doing the thing that's here today.

We are all very eager and very restless and so sure that the big thing is just ahead or somewhere else. We could do this all so well if we were just in a bigger city or at a bigger job, sadly forgetting that the job of today is, after all, the thing we have been given to work with.

"Will you seek afar off?" writes Walt Whitman in a "Song of Occupations." "You surely come back at last."

In things best known to you finding the best, or as good as the best,
In folks nearest to you finding the sweetest, strongest, lovingest,
Happiness, knowledge, not in another place, but this place, not for another hour, but this hour.

Such was the strong philosophy of Whitman, wholesome medicine for a restless age which wants always the thing that is just beyond the prosy reality of today.

Feverishly we mark time, waiting for a chance to live, unmindful of the fact that in the very act of marking time we are doing the living. Sooner or later we will then come back, "finding the best in folks nearest; * * * not in another place, but this place; not in another hour, but this hour."

No mystery touches the life of a tomorrow that may not be yours today; no magic makes the big metropolis hold for you the thing that is not really in you to work out where you dwell now.

## FOR JANUARY.

**Two Styles of Winter Gloves Popular For All Sports.**

One pair of these heavy gloves comes in any modish shade. They are wool with one-clasp fasteners and are not so

REAL COMFORT.

clumsy as mittens while just as warm. The other pair is heavy brown leather, with gauntlet tops. The strap is especially good for motoring, as it keeps out the wind, while for rough sports these gloves are stitched in such a way as to prevent splitting.

**Sandwich Fillings.**

Pimento cheese and thinly sliced tomatoes.

Tomatoes, sliced thin, with mayonnaise dressing and English walnuts.

Sardines made into a paste spread on white bread and dotted with tiny bits of lemon and ripe olives.

Peanut butter and paprika.

Cottage cheese and minced onion.

Stuffed olives (ground) and mayonnaise.

Chicken, finely minced; bits of celery and mayonnaise.

Brown Bread Sandwich.—Jelly mixed with wet ground raisins and candied orange peel.

Bananas sliced thin, dipped into juice of lemon, mayonnaise dressing and nut meats.

Ham, chopped fine, with hard boiled eggs, mayonnaise dressing.

## TODAY'S FASHION NOTE

The Russian influence still remains and this blouse suit in navy blue serge trimmed with silk braid is eminently stylish. In medium size it requires 4 3-4 yards 54-inch material and 7 yards braid.

Pictorial Review Blouse No. 6443. Sizes, 16 to 20 years. Price, 15c.

Skirt No. 6499. Sizes, 15 to 20 years, Price, 15 cents.

Pictorial Review Patterns may be procured at the J. R. Sullivan and M. Katz & Co. Department store, Fulton.

**Worth Trying.**

"I washed Willie's pants t'udder day, and dey shrunk so dat de po' chile kin ha'dly walk in 'um. Won'er how I gwan fix 'um?"

"Try washin' de chile. Maybe he shrink too."

# The KITCHEN CUPBOARD

**"THE MUFFIN MAN."**

WHEAT MUFFINS.—Two cupfuls of flour, one-half teaspoonful of salt, three teaspoonfuls of baking powder, two tablespoonfuls of sugar, one tablespoonful of butter, one teaspoonful of molasses, one egg and one cupful of milk. Mix the dry ingredients and sift twice; rub in the butter. Separate the egg, beat the yolk and add it to the milk and molasses. Mix with the dry ingredients and stir until smooth. Fold in the beaten white of the egg and pour into hot, well greased muffin tins. Bake fifteen to twenty minutes in a hot oven.

Oatmeal Muffins.—Soak two cupfuls of rolled oats in one and one-half cupfuls of sour milk or buttermilk overnight. In the morning add one-fourth cupful of melted butter or lard, one well beaten egg and one cupful of flour sifted with one teaspoonful of salt and one teaspoonful of baking soda. Bake in buttered pans in a hot oven for twenty minutes.

Cornmeal Muffins.—One cupful of flour, one cupful of cornmeal, two teaspoonfuls of baking powder, one teaspoonful of salt, one tablespoonful of sugar, three tablespoonfuls of melted butter or lard, one egg and one cupful of water. Beat the egg and mix the flour, meal and baking powder together, add the salt and sugar; then the butter, the egg and, lastly, stir in the water. Bake in muffin tins.

Date Muffins.—For date muffins take one-third cupful of butter, one-fourth cupful of sugar, one beaten egg, three-fourths cupful of milk, two cupfuls of flour sifted with two teaspoonfuls of baking powder, half a teaspoonful of salt and half a pound of dates seeded and chopped.

Corn Muffins With Dates.—Mix and sift one cupful of cornmeal, one cupful of white flour, one-half teaspoonful of salt, two teaspoonfuls of baking powder and one tablespoonful of brown sugar; add one well beaten egg, one cupful of sweet milk, two tablespoonfuls of melted butter and mix; then add one-half cupful of stoned and chopped dates. Bake in buttered and floured muffin pans in a hot oven.

Rye Muffins.—Sift one and one-half cupfuls of rye flour, one-half cupful of cornmeal, one-half teaspoonful of salt and three level teaspoonfuls of baking powder together. Beat two eggs until light and add one and one-fourth cupfuls of milk. Add this to the dry ingredients and mix well. Add two tablespoonfuls of melted butter and pour into greased pans and bake in a quick oven about twenty-five minutes. Serve warm. This will make twelve muffins. If preferred the cornmeal may be omitted and all rye flour used.

# INITIATIVE AND RECALL IS TRIED

A hearing has been set for next Tuesday before the Assembly Cities Committee on the three bills of the Municipal League, amending the Charter to provide for the initiative, the recall and for preferential voting. These measures are a part of a program which brought into existence the Progressive Party; also, various short and long ballot agencies and governmental whirligig associations having in view a general statutorial revolution.

The substantial parts of that program have gone through in this State, the most important one being the direct primary. Here in Buffalo we have gone a step farther than most other localities of the State and, along with our new Charter, have adopted the referendum.

The new bills call for the balance of the program, particularly the initiative and recall. Even in theory these measures are not in conformity with the representative system of government. As practical propositions —if they could be called practical —they call for the constant participation of the individual in politics. If these proposed functions are any good they ought to be exercised, and if exercised, they would take up all the time of the citizen proposing legislation, signing petitions for recalls and referendums and voting on this, that and the other question throughout the year. We are told that these functions ought not to be exercised, but should be retained as agencies for emergencies. Then they would simply be the plaything of those who have nothing else to do but fuss around with the promulgation of far-fetched policies and ideas.

The average man, under our theory of government, is protected in life, liberty and the pursuit of happiness. It is contemplated that he shall select from among his fellow citizens those who are to represent him in the affairs of government, primarily, because in his daily work his time is fairly well taken up and he desires the remaining hours for recreation and rest. It is expected that he shall take a deep interest in the work of government, but it is not expected that he can attend to all the affairs of government; there must be some stability of procedure and some settled courses. Official terms are not so long, and officials are sufficiently limited in their operations to obviate the necessity of calling the people into action because some one or some association is oppressed with a disapproval of some action of government.

The new Charter has been launched. These proposed bills, probably, wouldn't help or hurt it, but why muss up the government in an effort to satisfy that craving for a change which can never be satisfied —Buffalo Times.

## PATRIOT'S DAUGHTER TO BE MARRIED

New York—Announcement has been made of the engagement of Miss Eileen O'Donovan Rossa, youngest daughter of th elate O'Donovan Rossa, Irish patriot, to Mr. John F. McGowan, previously of Port Jarvis, N. Y., now of Long Island. Their romance began five years ago, when both were at school.

The marriage will be solemnized in St. Peter's Roman Catholic church, New Brighton, S. I., on February 7, and will be followed by a nuptial mass Mgr. Charles A. Cassidy, pastor of the church, will officiate.

Miss Rossa aided her father in his writings on Irish history subjects and travelled with him on his lecturing tours in the United States and Europe. For five years she has been engaged in social service work, and now she is superintendent of social service work, Department of Charities, for the Borough of Richmond; chairman of the Social Service Committee of Staten Island and a member of the Ladies' Auxiliary of St. Vincent's Hospital.

## KAISER AND HEIR ACCUSED OF MURDER

London.—An inquest was held yesterday in the cases of thirteen Zeppelin victims in Staffordshire, and a verdict was returned of "wilful murder against Kaiser and Crown Prince ct Germany, as being accessories to and after the fact of the deaths."

An inquest in connection with the death of ten persons in Leicestershire resulted in a verdict of death from bombs dropped by a hostile airship. The verdict contains a warning to the authorities to take greater precautions for obscuring lights after sunset.

## JEWISH RELIEF FUND TOTALS $2,112,048.21

New York—The fund of the American Jewish Relief Committee now totals in cash and pledges, $2,112,048.-21.

The largest contributions yesterday: New England A. J. R. C., $20,-000; Ft. Worth Committee, $2,000; Johnstown Committee,, $2,000; Superior Committee, $1,500; Greensboro Committee, $1,886.50; Charlesburg Committee, $1,500; Amsterdam Committee, $1,141.44; Pittsburgh, Kans., Committee, $1,046.

## BILL WOULD OPEN FLATS TO CHILDREN

Albany—Landlords who refuse to rent apartments to families because they have children will be guilty of a misdemeanor and subject to a fine of from $50 to $500 if a bill introduced by Senator Walker today becomes a law.

It is a amendment of that section of the code which protests the civil rights of citizens.

# BREAKING RECORDS IN SALMON EGG TAKING

## Hope This Year's Fish Run In Puget Sound Will Increase.

Olympia, Wash.—All the salmon egg taking records of this state were smashed this year as the result of the enormous number of eggs obtained from the Columbia river and the Grays harbor districts, according to State Fish Commissioner L. H. Darwin.

Unprecedented November storms and high water were handicaps, but on the Columbia river the state procured more than 45,000,000 salmon eggs. On Grays harbor, where the Chehalis hatchery last year took 22,591,000 eggs, there have been procured this year to date 44,000,000 eggs, and all are now in the hatcheries. The three large salmon hatcheries on Puget sound are busy taking eggs, and it is expected the records will be broken in this district, or close to 50,000,000 eggs procured.

It is expected that the hatcheries this winter will have 150,000,000 salmon eggs to care for, and the number of young fry will be the largest ever nurtured in the state's history.

The entire product of the hatcheries this winter will be released in Puget sound next fall. By so doing it is hoped to increase the run of salmon there in spite of the heavy increase of salmon taken in recent years.

## TO TAP GILA'S UNDERFLOW.

### Dry River Bed Will Be Made to Yield Water For Irrigation.

Palomas, Ariz.—S. H. Woodruff of Los Angeles and associates plan to utilize the underflow of the Gila river, near here, for the reclamation by irrigation of a big tract of land.

A number of caissons will be sunk in the dry bed of the river to the water level, and large pumps will be installed to lift the water to the surface and deliver it into the irrigation ditches. The pumps will be operated by electricity.

Formal application for the withdrawal from public entry of 14,000 acres that are embraced in the proposed irrigation scheme has been filed in the United States land office here by the state land commission, as required by the Carey act.

## PRIZES RING FROM FRONT.

### Made by German Soldier and In Possession of Los Angeles Girl.

Los Angeles, Cal.—A ring fashioned from aluminum obtained from a projectile, which has for a setting a replica of the German iron cross, is the valued possession of a talented Los Angeles girl.

It was made by a German soldier while at the front in southern Poland. The possessor of the ring is Miss Mary Goodrich Read, who has spent several years abroad, in Belgium, Germany and other countries, studying.

Miss Read recently returned to this country, bringing with her the finger ornament.

### College Romance Revived.

Marysville, O.—A romance dating back to college days at Ohio Wesleyan university culminated recently when Miss Alice M. Goode, aged forty-three, of Cincinnati, was married to James W. Magruder, forty-five years old, of Mechanicsburg. They will take up their residence at Mechanicsburg.

**BUSINESS—Particularly the most desirable business—is very much like the sport of fishing. You can catch it if you use good bait. The Evening Times offers you the correct bait.**

# N.Y. POULTRYMEN TO ORGANIZE

## Purpose Is to Cooperate in Marketing and Buying Supplies---Encouragement for Exhibitors.

The poultry department of the New York state college of agriculture announces a meeting of the representatives of all poultry organizations in New York state and of persons who are interested in a federation of the poultry associations of the state. Such a federation was agreed upon at a meeting of poultry organizations recently held at the Madison Square Garden Poultry Show. The Cornell meeting is to be held Wednesday, February 9, at 2, during Framers' Week at the college of agriculture.

A survey of the State's poultry organizations indicates, it is stated, that there are already in existence nearly one hundred poultry organizations, societies or clubs, which have been working independently. The proposed federation aims to bring together, for efficient action and mutual helpfulness, all of these organizations.

The officials actively engaged in establishing the proposed federation of poultry clubs are as follows: President, Robert Seaman, Jericho, Long Island, president of the Grand Central aPlace Show Association; Vice President, W. H. Manning, Saratoga Springs, New York, superintendent of the poultry department of the New York state fair; Directors, Grant M. Curtis, Buffalo, New York; Valentine Thompson, Amenia, New York; Henry Trafford, Binghamton, New York; W. P. Schwab, Rochester New York; K. M. Turner, West Nyack, New York; W. C. Houck, Buffalo, New York; and T. S. Hewke, Middletown, New York. Information in regard to the proposed federation will be furnished, it is said, by the Cornell poultry department.

### What the Federation Proposes

The principal objects which the proposed federation is desirous of acomplishing are set forth by the organizers as follows: to facilitate cooperation in marketing and purchasing poultry, poultry products, and supplies, among the poultrymen of the state; to improve methods of breeding and management of poultry; to encourage the holding of exhibitions of poultry, pigeons, poultry products, and pet stock; to disseminate information for the benefit of the poultrymen; to aid in establishing a uniform, legal standard for poultry and poultry products; to take an active part in the suppression of theft; to encourage educational and experimental work in poultry husbandry; to cooperate with the American poultry association in the development of the poultry industry of the nation; to encourage and foster any other phase of the poultry industry that seems desirable.

## INGALLS CROSSING

Miss Thurston and Miss Weller of Syracuse were over Sunday guests at E. C. Bowering's.

• • •

Mrs. C. Goss of Fulton spent Saturday and Sunday with her parents, Mr. and Mrs. Waffle.

• • •

Mrs. M. G. Lewis and daughter were over-night guests at Mrs. Lena Morehouse' recently.

• • •

C. McDougal and family spent Sunday with Mr. McDougal's parents in Fulton.

• • •

Mrs. Bessie Brown of Fulton was a recent guest of Mrs. J. Van Epps.

• • •

Fred Eames, who has been working for the Oswego Milling Co., in Oswego, is spending a few days with his parents.

• • •

George Hollenbeck was in Phoenix Tuesday. Mrs. Hollenbeck's father, Mr. Baker, came home with him to spend the remainder of the winter.

• • •

W. L. Smith went to Syracuse on Monday with a load of potatoes.

• • •

Mr. and Mrs. Frank Weller spent Sunday at W. H. Weller's.

• • •

Frank and Jay Weller entertained their sister and her husband, Mr. and Mrs. Churchill, of Cortland last week.

• • •

E. M. Hopkins and family attended the funeral of his nephew, Harry Raymond, at Vermillion Saturday. His brotheer, Erwin Hopkins of Wolcott came home with them and remained until Monday.

## STEEL STOCK DISTRIBUTED AS PRIZES AT WHIST PARTY

### Mrs. E. H. Gary Awards One Share to Each of Six Persons.

Mrs. Elbert H. Gary, wife of the chairman of the United States Steel corporation, entertained with a bridge party at her New York home the other day, the guests including many well known members of society. The prize at each table was one share of United States Steel preferred stock.

Bridge parties are of ordinary occurrence in society, and handsome prizes are given as a rule, but Mrs. Gary's party will go down in social history as something entirely new, in this respect at least. The first intimation that the stock had been awarded as prizes was heard in Wall street, and it was not long before it was being talked about on the Stock Exchange.

The stock given out in prizes, in the aggregate, was worth about $702, as it is quoted at $117 a share. Prizes of much greater value have been awarded at society bridge parties, but it was the novelty that gave significance to Mrs. Gary's awards.

There were six tables and twenty-four players. At the end of the game there was considerable speculation as to the nature of the prizes, as is always the case at any spirited game of bridge. If the women winners expected to receive silver bonbon dishes, powder puff boxes or vanity cases they were no doubt agreeably surprised when they received the stock, indorsed in blank. The stock draws dividends of 7 per cent. The names of the winners are not known.

Mr. Gary confirmed the report of the nature of the prizes at Mrs. Gary's bridge party, but declined to comment on it in any way, saying that it was a private affair.

Mrs. Gary entertains frequently in the winter season at her home, and she gives a bridge party once a year.

## "CYCLONE" WEARS A COLLAR.

### Heeds Wife's Plea and Violates Half His Pledge to Constituents.

"Cyclone" Davis, representative from Texas, has succmbed to the whims of civilization. He startled his colleagues by appearing on the floor of the house the other day wearing a linen collar and a calico shirt decorated with pink flowers.

When "Cyclone" first came to Washington his only neck adornment was a gray woolen muffler. While campaigning among the farmers of his state he had taken a solemn oath never to wear a collar or necktie. He violated half of his promise to his constituents, because he was minus the necktie.

Davis explained his "change of front" as follows:

"Ever since I came to Washington my wife wept daily because I was dubbed the 'collarless congressman.' This morning when I had finished dressing with my muffler buttoned in place she began to cry. I inquired the reason, and she explained to me. I purchased a collar and a shirt.

"I don't know what my constituents will say when they hear about this, but anyhow I am going to keep peace in the family, even if I have to break my vow. This is the first collar I have worn in more than twenty years."

### John Brown's Compass.

A compass, once the property of John Brown, which played a part in early history, is in the museum of the Kansas State Historical society in Topeka John Brown used the instrument when he was living in Osawatomie, in the years between 1855 and 1858. During the Missouri-Kansas border warfare in those days, the story goes, the abolitionist leader used the compass in a pretence of surveying land, when in reality he was locating and mapping the camps of proslavery men.—Kansas City Journal.

## MUSIC HEARD 3,000 MILES—COAST TO COAST

One of the most novel concerts the world has ever known will be given at the Waldorf-Astoria in New York, tomorrow. Lieut. Henry Liff, bandmaster of the veteran corps of Artillery Band, will conduct the orchestra and Courtenay Casler, Baritone, and Marie Leoa Brackman, soprano, are the singers. The occasion is the annual banquet of the Real Estate Board of Brokers—both in New York and San Francisco. Cal. There will be about 1500 brokers at the Waldorf and 1000 in San Francisco. The New York Telephone company have installed a telephone at the tables and in the boxes for every member and guest at either end of the line—making about 2500 telephones. The greatest number of telephones with one connection ever used at one time. The speeches and musical program at the Waldorf will be heard in San Francisco by the brokers there, and vice versa. At a given time Lieut. Henry Liff will start his orchestra, and Courtenay Casler, who has been chosen for this wonderful demonstration on account of his marvelous voice, will give the popular song, "Hello Frisco," followed by the balance of the program. The musical program is under the management of M. E. & E. A. Sieffert, 59 West 37th street, New York city.

## CHAMBER OF COMMERCE

*"Fulton First, Last and All the Time"*

There is a get-together spirit in the city now. Last evening quite a large crowd turned out for the dinner at the Citizens Club. It is interesting to note the good fellowship that was prevailing there and it is to be hoped that the committee in charge with Mr. Flanders as chairman will be able to get a good crowd out every time a dinner is announced. It is the greatest thing in the world to see John and Tom sit next to each other and to talk things over. Let the good work go on.

* * *

"O, why should the spirit of mortal be proud?
Like a swift-fleeting meteor, a fast-flying cloud,
A flash of the lightning, a break of the wave,
He passes from life to his hest in the grave.

The leaves of the oak and the willow shall fade,
Be scattered around, and together be laid,
As the young and the old, the low and the high
Shall crumble to dust and together shall lie.

The infant a mother attended and loved,
The mother that infant's affection who proved,
The father that mother and infant who blest—
Each, all, are away to that dwelling of rest.

The maid on whose brow, on whose cheek, in whose eye,
Shone beauty and pleasure,—her triumphs are by;
And alike from the minds of the living erased
Are the memories of mortals who loved her and praised.

The peasant, whose lot was to sow and to reap,
The herdsman, who climbed with his goats up the steep;
The beggar, who wandered in search of his bread,
Have faded away like the grass that we tread.

So the multitude goes, like the flower or weed,
That withers away to let other succeed;
So the multitude comes, even those we behold,
To repeat every tale that has often been told.

For we are the same that our fathers have been
We see the same sights that our fathers have seen;
We drink the same stream, and we feel the same sun,
And run the same course that our fathers have run.

The thoughts we are thinking our fathers did think;
From the death we are shrinking our fathers did shrink;
To the life we are clinging our fathers did cling,
But it speeds from us all like the bird on the wing.

They loved, but the story we cannot unfold;
They scorned, but the heart of the haughty is cold;
They grieved, but no wail from their slumbers will come;
They joked, but the tongue of their gladness is dumb.

They died, ah, they died; we, things that are now,
That walk on the turf that lies over their brow
And make in their dwelling a transient abode,
Meet the things that they met on their pilgrimage road.

Yea, hope and despondency, pleasure and pain,
Are mingled together in sunshine and rain;
And the smile and the tear, and the song and the dirge,
Still follow each other like surge upon surge.

'Tis the wink of an eye; 'tis the draught of a breath
From the blossom of health to the paleness of death
From the gilded saloon to the bier and the shroud;
O, why should the spirit of mortal be proud?"

## GERMANY'S NOTE REFUSES TO ADMIT SINKING WAS ILLEGAL; 1 WORD IN WAY

Washington, D. C.—Count von Bernstorff, the German Ambassador, delivered to Secretary of State Lansing the latest reply of the German Government to the demands of the United States in the Lusitania case.

In official and diplomatic quarters tonight the strong impression prevails that this new communication paves the way for further informal negotiations that will bring the controversy between the United States and Germany to ac lose.

The one word "illegal," as differently interpreted in the United States and Germany, is the stumbling block which has caused Berlin to refer to the negotiations as having reached a crisis, and Washington to characterize the situation as grave.

Nevertheless Germany has made further concessions to the United States in its latest communication. This is admitted, both at the State Department and at he German Embassy.

The German view is that these concessions will bring about a complete settlement without any further communication between Washington and Berlin.

In authoritive official sources, it is declared that "the matter will be at issue for the next four or five days," during which time there will be further negotiations between Secretary Lansing and Cout von Bernstorff.

Germany's answer proposes, instead of an out-and-out admission of illegality of the method of submarine warfare used by the German naval authorities in sinking the liner, an acceptance of liability for the loss of neutral lives, which Berlin hopes will satisfy the United States and still not prevent Germany from continuing the submarine campaign.

Two developments of the day are regarded as strongly indicative of a favorable turn in the negotiations.

First came the admission that the informa negotiations between Secretarp Lansing and Count von Bernstorff will continue. Second, came a decision to delay consideration of the Lusitania situation by the President's advisers until the regular Cabinet meeting next Tuesday, instead of calling a special meeting, as was planned, if the German reply precipitated a crisis.

It was authoritatively announced after the draft of the tentative proposals were sent to Berlin by Secretary Lansing and Count von Bernstorff last week that if Germany flatly rejected the demands of the United States the informal conferences between the Secretary and the Ambassador would be brought to an abrupt ending. The next step, it was said then, would be to draft immediately a virtual ultimatum to Berlin.

The fact that the informal conferences will continue therefore was held to indicate that no precipitate action is to be taken.

The next steps taken in the negotiations, it may be said on the highest auhority, will be:

Secretary Lansing and Count von Bernstorff will continue their informal conferences at the State Department.

## LATEST OFFICIAL WAR BULLETINS

Paris, via London—The War Office communication says:

"The day has been comparatively quiet. Our heavy artilleery shelled a column of infantry and so emenemy convoys entering the town of Roye.

"We have bombarded German organizations in Champagne, in the region of Tahure and Mount Tet, in the Argonne, in the sector of La Harazee and in Lorraine on the front of Nomeny Morville.

"There is nothing important to report from the rest of the front."

The War Office in the afternoon gave out the following statement:

"There were no important events last night except in the Vosges, where the artillery on both sides was rather active near Braunkopf, in the valley of the Fecht, and atAltmatt, northwest of Metzerol."

* * *

Berlain, (via London).—Continued and increasing activity by the allied artillery along the Franco-Belgian front is reported in today's statement by German Army Headquarters. Explosion of a British mine which destroyed one of the mine craters near Hulluch which the Germans were occupying is announced, as well as apparently inconclusive hand grenade operations along the front near by. The text of the statement is as follows:

"Western Theatre of War.—North of Hulluch one of the mine craters which waso ccupied by us has been destroyed by another mine, exploded by the English.

"Near Loos and Neuville there has been lively hand grenade fighting.

"The enemy artillery has been increasingly active at various places along the front, especially in the Argonne.

"West of Marie, a French fighting biplane, the pilot of which had lost his way, fell, undamaged, into our hands.

"Eastern Theatre of War.—There is nothing to report.

"Balkan Theatre of War.—Our airmen noticed extensive fires in the Vardar Valley south of the Greek frontier, and also at depots in the port of Salonica."

## WHAT'S THE MATTER WITH FULTON?

*By I. E. Hyde.*

What's the matter with Fulton? Why, Fulton's all right,
If the dummies in Fulton will turn on their light
We'll yet have a city all sparkling and bright.

We hear the crooks croaking, we list' to their whine
They sing, Home, Sweet Home, we know it is fine,
But, I tell you my brothers, they're all out of line,

They're pumping home trade while they sport out of town
When they craze a stout phiz, or, a rotten come down,
They hike to the city and bat like a clown.

I say, you big fellows spread out a clean sheet,
And we'll all follow quickly, we'll form a big fleet,
And we'll load up your charity carts with good meat.

We're poor, but we're honest and stand for the straight
So clean your back yards and we'll swing on your gate,
If you don't I'm afraid, you're alone with your fate.

We love our home town and we'll boost on the square
But when you round corners we'll kick for a fair,
For I fear you have many small fish in your snare.

What's the matter with Fulton? Is Fulton all right?
Will the big bugs in Fulton turn on a pure light?
May we look for a city all sparkling and bright?

## LOAN BILL TO PERMIT BOND ISSUE OF $15,000 TO BE PRESENTED MONDAY

Mayor Lewis and City Attorney Hillick returned from Albany this morning. While at the capital they made application to the Legislature for authority to bond the city in a sum sufficient to wipe out the $15,000 of accumulated city indebtedness, which was handed down to this administration from former administrations.

Speaker Sweet informed the visitors that he will have the bill printed and introduced in the assembly on Monday. Mr. Hillick was requested by the speaker to forward to Albany as soon as possible, for the purpose of filing with the Committee, a statement describing the nature of the city's deficit based upon the report submitted by City Chamberlain Adkins. Mr. Hillick will at once prepare a statement and send it to Albany.

While at the capital, the two city officials spent some time interviewing the Speaker and with expert in municipal accounting in the State Comptroller's office.

**260 South Sixth St.**—New house finely finished in oak, hardwood floors; large veranda; the heating, lighting and plumbing are the best; the arrangement is very attractive. Five rooms, hall, and refrigerator room down; three bed rooms, 4 clothes closets, bath and hall up; large attic, concreted cellar. One of the finest homes in the city.

**508 Fremont st.**—A nine room house in good condition; complete plumbing; gas for lights; furnace heat, for only **$1,550.00.**

**208 Gansevoort st.**—10 fine large rooms; high ceiling; nicely arranged; modern plumbing, electric lights; furnace heat; good barn 20x24; lot 66x100; owner desires to leave the city. At the price **$3,300.00,** its a bargain.

## Opinions

### A PROPOSAL TO TAX SIGN-BOARDS

Senator Brown's legislative committee, it is reported from Albany, intends to recommend as a source of revenue for this city the taxing of signboards. That is a project much discussed here, which has everything to commend it so far as the authorities and the public are concerned. Yet officialdom has never brought itself to take action on the proposal.

Most of the large cities of Europe derive a snug revenue from the letting of street advertising privileges. The result is twofold—money in the treasury and the limitation of the size and character of the street signs. In both respects the public is benefited.—N. Y. Tribune.

### FARM MORTGAGES NOW IN DEMAND

At the recent meeting in Chicago of the Farm Mortgage Bankers' Association of America it was officially declared that there are some 7 billion dollars of investments in farm mortgages. Of this $600,000,000 is foreign capital, and the tendency is to increase, rather than diminish. There are few demands for payment, renewals at mateurity being the rule. That is confirmation of the report that the insurance companies now are favoring farm mortgages rather than city mortgages. The explanation probably is that the rise in values of farm products has enhanced the values of farms, and that the results of taxation are felt less in the country than in the city. For a year or two past the effect of rising taxation in this city has been the depression of the farm mortgage market.—N. Y. Times.

### UPHOLDING THE MORRIS PLAN

Efforts to interfere with the operation of the anti-loan shark Morris Plan for making small loans to wage earners are being defeated by the courts.

The New York company operating this plan loaned last vear—the first of its existence—$851,000 to 7,335 borrowers in sums aggregating less than $115, while the thirty companies throughout the country have lent to more than one hundred thousand persons.

The fact that more than a dozen new companies are now being formed in various States—including one at Cleveland, where Mr. Myron T. Herrick is chairman of the Organization Committee—shows that there is widespread appreciation of the good work done by the Morris Plan in affording small borrowers the means of obtaining relief on fair and reasonable terms.—N. Y. Herald.

### THE PERSONAL TEACHER

Is there danger of our schools growing too larfie? The rapid increase in numbers in the agricultural colleges has brought the teachers face to face with the problem of how to give the necessary practical training and personal attention so essential to good teaching. When an instructor has a class of two hundred students even the best of laboratory equipment and assistants cannot provide personal guidance. The student must shift for himself and the system becomes as heartless as military training. Graduates are permitted to go out without experience in farm practice.

The best remedy thus far tried has been to send students to certain accredited farms where they may get practical work under the guidance of successful farmers. Summer camps in good farming sections, where the students under leadership of their instructor visit and study good farms, have been tried with gratifying results.

And it is the same story to some extent down the scale, in the county high school and the consolidated district school. When classes become too large the personal supervision of the teachers is lost and education becomes a mere machine-like drill. The great teachers of the past are revered by those who were trained by them because the teacher worked with the student and did not merely talk at him.

Along with the growth of numbers in our schools must come new methods of supplying personal oversight. To reduce training to mere lectures and exercises robs the student of a form of development that comes only from personal encouragement by a teacher who is sincerely interested.—Country Gentleman.

## WHY NOT ALDERMEN AT LARGE?

A house in the country without a lightning rod is in the same position as a city unprepared to defend itself against the attacks of persons who contrive to defeat the cause of real reform in government.

Both the lightning rod maker and the manufacturer of office holders earn something by supplying the mode of defense; but of course there is no reason why their services should be refused.

Because somebody sees in the plan to abolish one of the city's many boards a way to subserve the interests of the people who are ready for the right kind of reform government is no reason why we should all fall into line at the crack of the whip. Granting that no hue and cry is raised to prevent a realization of the plan to give the city a cheap imitation of Commission Government, and the thing through the proper channels, becoming a law, who is going to profit the most, the lightning rod maker or the people of this city who have been victimized to the tune of a $600,000 indebtedness? Were there no manufacturers of office holders in existence the answer might be, the lightning rod maker; but as matters stand, the wiping out of a city board, giving over to an elective board composed of men who would not be representatives of the city at large, but of individual wards, furnishes the best reason in the world why the taxpayers should be the watchdogs of the proposed bill.

It is up to the manufacturer of office holders to give this city "preparedness"; to give it a chance to elect the aldermen at large, and not by wards as at present. Unless the city secures this amendment to the proposed law that would do away with one of the many boards, we fail to see who is to profit most—the people or the manufacturer of office holders.

## WE ARE WAKING

At this moment we are in the process of waking out of a slumberous state of the public conscience. Society is passing before a new mirror. Public men find new tests set up by the old paths. It is a time of readjustment, a period of reform, a turning of a new leaf in the book of life, a taking of new observations, fixing the place and progress of our age in the history of man. We are getting some new glimpses, into that mystery of the ages, the ultimate significance of human life. Some people are content to call it a time of unrest, as if the world of man were simply turning over in its sleep. But the mighty fact is that the moral sense of the world is quickening into action, the whole world's conscience is waking up. We are told that the morals of men are falling below old standards or finding a frail footing on new ideals. There is hurry and scurry to prop up the ancient levels of conduct by new devices underneath and readjustments up above.

What is needed at this moment most of all is a recognition of the roused spirit that is abroad, moving on the souls of men as the creative spirit marched on to kindle light and life out of the primitive "deep." These unwonted stirs are not a refluent, but an advancing, tide. The sea is coming in. Humanity swings in response to heaven, that call from its own deep answering to the deeps on high. All this restless, yearning struggle is a sign of health, a symptom of irrepressible growth. Why treat it as a signal of decline, decay, and death? The world is not waxing evil. The patient we are called to treat is a live and going on a higher life.—Rollin A. Sawyer.

### WITH THE SUFFRAGISTS

"Child labor in Chicago took a decided drop last year," so began an editorial in a recent New York Post. The suffrage leader welcomed it as a piece of news that was at the same time a suffrage argument. Chicago being a city in which women have equal voice with men in the city government.

* * *

For the first time since women in Federated Australia became voters, a political party adopted a woman candidate for Parliament. The lady's name is Mrs. Gallagher and it happened in New South Wales, and the moral can be drawn that voting and office holding for women do not necessarily go hand in hand as woman suffrage has been in force in Austrailia since 1901.

* * *

The women in the suffrage organizations in New York think that their task of winning the vote is a big contract and that success will bring at least a breathing spell.

Not so! The women of Chicago where women have the vote have taken the job, if the New Year's Resolutions of the Chicago Political Equality League are to be trusted—of securing women in all the offices connected with the Morals Court and weeding out all the dead laws from the statute books. According to Lieut. Gov. O'Hara these number eleven thousand.

* * *

Full suffrage for women in Iceland and Denmark and municipal suffrage for the women in Saskatchewan and South Africa: these are the big gains recorded for the year 1915 in the revised woman suffrage calendar.

* * *

"It wasn't a woman who wrote: 'I didn't raise my boy to be a soldier,'" declared Mr. Owen who represented the woman's section before the National Security Congress, and she added amid great applause, "A man wrote the lyric; a man set it to music; and the only time I ever heard it, a man sang it."

The enthusiasm shown by the women on the question of 'preparedness' indicated the inaccuracy of an erstwhile sex distinction which labelled men and women as respectively belonging to the warlike and peace loving sexes.

* * *

In the United States objection is offered to woman suffrage on the ground that men represent women. In Canada there has developed a strong agitation for woman suffrage and the major argument seems to be that while the men are representing the women on the battle fields of Europe, the women should be able to represent the men at the polling places in Canada.

## LITTLE TALKS ON THRIFT

By S. W. STRAUS

*President American Society for Thrift*

It is from humble things that great fortunes often are made when people with the thrift instinct—the instinct to find at least one use for every thing and two or three uses for some things—put their brains to work. For instance Judge Martin E. Moran of Alaska, plans to import Angora goats to that territory to feed on the reindeer moss which grows plentifully there. Judge Moran sees a great future in the Angora industry. Three million acres of logged-off lands in Western Oregon and Washington are being cleaned by these goats and at the same time they furnish meat and Angora wool, the importation of which has been cut down by the war. Angora wool is a staple and brings from $1 to $8 a pound raw, the first grades being used in the manufacture of the most expensive grades of mohair and plush.

German thrift has found a new use for the Kansas sunflower. Germans have discovered that sunflower oil is a good substitute for the olive extract and much less expensive. Therefore, many people are now planning on raising large quantities of sunflowers and no doubt the children will find this a new field for thrift, as they require no care and will grow in any marshy land. Nature in the form of sunlight will be the fertilizer.

Another source of money that is now going to waste in this country is peanut shells. A Southern business man, however, was thrifty enough to find a use for them so they are now ground and used in Pittsburgh for polishing tinplate, and after that the oily substance is sold in packages as a sweeping compound.

Luck does not figure in fortunes made from such small beginnings any more than it figured in Russell Sage's fortune. Mr. Russell Sage always said there was no such thing as luck, for he started out as a grocery clerk at one dollar a week. But he was contented and ambitious and as his wages slowly increased he saved always a little, till at the age of twenty-one he had a store of his own. Later he sold the store and went to New York where he took a place as office boy at very low wages. But he worked himself steadily up until he became a financier himself. Mr. Sage believed that any one could succeed if he would, but that most young men are not anxious to rise. Of course, he said, if they found themselves rich they were glad, but they were not willing to work and make themselves rich. "I never knew any one," Mr. Sage is quoted as saying, "to obtain lasting wealth without lots of hard work."

### Charley Hot For Preparedness

### W. C. T. U. NOTES

The superintendent of schools of Ithaca, N. Y., told the following incident at a W. C. T. U. meeting: When a lad eight years old he recited a temperance selection and the teacher induced him to sign the pledge. After many years he went back to his boyhood home intending to tell the teacher what that pledge had meant to him. He found her resting in an unkept country cemetery, but on his knees before his God he told her what had been the saving influence of his life. "I have never hired as a teacher any one who was not a total abstainer, neither will I sign a paper of recommendation for a teacher who is not a total abstainer," declared the superintendent.

* * *

It was announced through the press not long ago that the directors of the National Brewers' Association were to offer $5,000 in prizes for the best essays on the most feasible plan for a practical solution of the saloon problem. It would seem a waste of words to write an essay on the subject, when the only really practical solution can be given in three words.—National Constitutional Prohibition

* * *

Shut out of the advertising columns of the best journals, where will makers and sellers of liquor get publicity? On the billboards? But it has come about that on the first of the year an edict against advertisements of spiritous liquors became effective which will prevent such inducements to buy being spread about in 5000 towns and cities of Canada where the Poster Advertising Agency does its business. That is to say, so far as the largest "outdoor" advertising agency in North America is concerned, it will not be party to any such form of tainted business. This steady cutting off of ways of publishing its temptations helps to create the conviction among men in the brewing and distilling business that the days of traffic are numbered in the United States and in Canada.—Christian Science Monitor.

## Charley Now For Peace

Copyright, 1916, by J. Keeley.

# JAPAN HAS HER "WAR BRIDES" TOO

## Millionaires Made by Selling Goods to Beliigerents.

## ARMS SALE IS $34,500,000

**Shipping, Mining and Other Industries Thrive and Invention Feels Big Spur: Munitions on Hand Are Being Sold to Russia—Scientists, Spurred by Necessity, Make Many Inventions.**

While because of the war depression prevails in certain lines of industry and business, yet in shipping circles there is tremendous activity, says a Tokyo dispatch. It is reported in the Japan Times that several new millionaires have been developed since the outbreak of the war.

The paper gives the names of certain fortunate ones. One young clerk in the Kobe office of the Mitsui company is said to have made 2,000,000 yen ($1,000,000) in one year by chartering small vessels at first and afterward larger steamers. Almost fabulous prices are now paid by charterers, who also make big money. The Tokyo small shipping companies have been suddenly metamorphosed into big and busy concerns. One such company is reported to have netted $5,000,000.

The mining industry also is having an unusually good season. The price of zinc, for instance, has run up fivefold since the beginning of the war.

In this connection I may add that Mr. Asano, who is already a multi-millionaire and is also president of the Toyo Kisen Katsha, the chief steamship line running between Japan and California, is reported to have decided to establish a ship building yard. It will be at Tsurumi, near Yokohama, and will cost $2,500,000. Mr. Asano deems this step necessary to keep pace with the progress of the shipping industry.

**Stimulus to Invention.**

One of the best phases of the benefit that the war is bringing to Japan is evident in the stimulus to Japanese invention. This is especially seen in scientific lines, in which Japan had been too content to follow the lead of Germany. But now that trade with Germany is cut off and supplies of many materials are lacking the Japanese are thrown on their own resources. In consequence Japanese scientists are busily engaged in experiments, some of which have already produced good results. For instance, Professor Inouye of the Ueda Sericultural college in Nagano prefecture has discovered a method of getting chromin from the silk worm chrysalis.

The necessities of the time have also given an impetus to the plan for the establishment of a great chemical laboratory, which has long been a pending question in the imperial university circles.

**Gun Throws Grappling Iron.**

That "necessity is the mother of invention" has again been illustrated in the matter described in the following paragraphs from the Japan Times:

"The anti-entanglement gun on which Captain Ochi has recently obtained a patent is intended to throw a specially prepared grappling iron to the wire entanglements, which can be manipulated so as to destroy them by an operative remaining out of range of hostile fire. Even if the wires be highly charged with electricity, the operative can efficiently work the grapple with impunity, as it is completely insulated. The invention is expected by the experts to bring about a revolution in position tactics.

"The captain is a youthful officer. The recent invention is said to have had its inception during his bitter experiences with the entanglements when he took part in the siege of Port Arthur. For ten years since then he has worked upon the idea. He intends to apply for a patent on his invention to England, France, Russia and the United States and to have it employed in the European war if possible."

The paymaster general of the army has given the diet some figures of the sales of munitions of war, which he figures have amounted to more than 69,000,000 yen ($34,500,000), of which almost 40,000,000 yen's worth were sold in 1915. In addition to this, almost 20,000,000 yen has been realized from the sale of military shoes and clothing. The arms and other munitions sold are those taken as prizes and those purchased for the imperial army in the Russo-Japanese war. Japan will have a new supply.

The minister of war assured the diet that there was no fear of a deficiency in the supply of ordnance for national defense. He also explained how the government was taking means to replace the arms sold; how the arms necessary for the mobilization of troops were prepared, and how the necessary arrangements had been made with private factories to supplement the work of the arsenals.

These arrangements were temporarily suspended because of misunderstandings, but seem to have been resumed.

**Veteran of 1870 Again Fighting.**

Corporal Sarrugue, aged seventy-six and a veteran of the Franco-Prussian war, is today fighting in the ranks for France. Forty-five years ago he won the Legion of Honor medal; today he wears the war cross, recently bestowed upon him for gallantry.

---

Changing the seat of war gives a welcome relief from spelling out those outlandish Russian, Hungarian and Polish names in the news dispatches.

All of this talk of what indemnity will be demanded when there is no whipping in sight belongs in the class "too previous."

A tax on automobile speed instead of on the machine's horsepower would win the applause of the wights who must walk.

About now the efficiency of the water wagons which went into commission New Year's is under the supreme strain.

So every year for some time to come Uncle Sam may find a bunch of new dreadnaughts in his Christmas stocking.

There will be no protests, diplomatic or otherwise, against any one submarining his own bed habits.

### PRACTICAL HEALTH HINT.

**Children's Ears.**

It is astonishing to learn what an apparently sensible woman will do by way of cleaning the inside of a child's ear and what preposterous instruments she will use. Healthy ears do not need syringing, and only persons who are expert in the operation should perform it on ears that are not in good condition. Hard instruments for cleaning out the ear should never be used. There are little spoons contrived for this purpose in the shops, but no one should buy them; neither should mothers or nurses think of twisting a towel into a spike, or wrapping it round a match and therewith exploring a child's ear. Earwax is a normal secretion. It is found in all healthy ears and is not something to be pursued as if it were a disgrace. You can always keep the ears properly clean by using a towel dipped in warm water and wrapped round a finger.

When a small child gets a foreign body into the ear, gently syringing with warm water will often remove it, and that should always be tried before any other method. The attempt to extract the object forcibly may do much injury. No one except an experienced physician or nurse should think of doing that.

### The Silent Company

If once the dead could speak! * * * If they who went
Gurgling beneath the brine and moved no more;
If they who through the vapors born of hell
Battled for breath and sank in tumbled heaps;
If they who knew the sudden stab like fire
And screamed aloud and into silence passed;
If they who through the ache of thunderous hours
Moaned thinly for the end, yet in the dust
And smoke of engines vomiting black death
Still lay neglected by their very God;
If they who in the glad line suddenly saw
Their goodly bodies stricken and the gush
Of widening red that brought the message home;
If they who in the ghostly aisles of white
Went out like lamps beneath the balm of sleep;
If they who writhed on trench floors black with blood,
Or whimpered in the tents of cotted woe,
Or raved thirst harried in the falling rain;
If they who gave abruptly all the surge
Of warmth and singing hope that made them men
And now sleep still as sand beneath the flow
Of rivers, not of water, but of blood—
If they could speak I wonder then if war,
Confronted by the legions of the dead,
Could dare to answer when God questioned, Why?
—Arthur Stringer in McClure's Magazine.

## SILKS GETTING SCARCER; FAMINE IS SEEN HERE.

**Shortage of Dye and Cost of Labor Given as Causes.**

The silkworm has turned.

And the whole world of styles and textiles is on its knees before the royal cocoon. The silk loom worker, once so humble, is demanding the wages of a baseball star or a prima donna. Dyestuffs of all colors are getting as rare as the rainbow. A worldwide silk famine is threatened. At the present time silk which once retailed at 75 cents a yard now sells for $1, and goods once ticketed at $1.25 now command from $1.50 to $1.75 a yard. Wholesalers see a rise of 30 per cent in silk prices next fall.

Prosperity is at a high mark, and millions of women are financially entitled to revel in silk, and nothing but silk, for gowns, underwear, stockings and nightgowns, it was asserted. With the heaviest demand for silk in years, stocks are dwindling to such an extent that even the greatest wholesalers predict a "hand to mouth" era in supplying the market. The dyestuff shortage comes on top of a dearth in textiles in all corners of the globe.

And then there is a paucity of loom workers, who, it seems, can earn better wages lifting shrapnel shells on flat cars than performing the delicate and skillful operations required on the loom.

"It is most essential that the dye shortage be relieved before we can hope for anything approaching normal in the silk industry," said a dealer who has worked "in silks" for more than forty-eight years. "The public does not realize how serious the dye problem is. Germany has not only quit sending dyes, but has practically quit making them. Its chemists have found that the same elements may be useful in munitions. Imitation rubber for motor trucks is one of the products practically produced from dye materials.

"And in this country dye materials are soaring so high that recently in New York a barrel of red-coloring matter which a firm had bought before the war for $100 was taken for $7,000. One manufacturer recently informed a customer that no more orders would be taken for navy blue and Russian green in silks. Other hues are diminishing rapidly."

**Did They "Hock" Them?**

"In the olden days they had no watches, you know," said the father.

"And how did they tell the time?" asked the son.

"By sundials."

"Well, father," said the young man, feeling of his watchless chain, "how much could a fellow get on a sundial, do you suppose?"—Exchange.

# UNION THRIVED DURING CONTEST

## Story of a Strike That Brought Solidarity to Toilers.

## BEGAN WITHOUT MONEY.

**Remarkable Success of the Chicago Clothing Workers In Their Recent Fight For Justice—Employers Refused to Submit to Arbitration. Fight Financed During Struggle.**

After twelve long drawn out weeks the strike of the Amalgamated Clothing Workers in Chicago ended with victory for the toilers, says Graham Taylor in the Survey. Its dreariness and violence were enlivened by many picturesque scenes and lightened by not a little heroism. Although not all the shops represented in the Wholesale Clothing Manufacturers' association came to any agreement with their striking employees at once, the largest of them entered into negotiations, and Sidney Hillman, international president of the amalgamated association, sanctioned the return to work.

This virtually closed the strike. Some of the workers did not go back until their employers came to the agreement that has already been made with the majority of the shops' crews, but 15,000 strikers were in their old places shortly after the opening of the year.

It was difficult to get authentic information concerning the number of strikers and other controverted details. This has been due, on the one hand, to the unwillingness of the employers to hold any communication either with their striking employees or with representatives of the public and, on the other hand, to the fact that the workers were not thoroughly well organized. Their new unions, however, are in far better form than they were when the clothing workers successfully terminated their last great strike five years ago by the noteworthy agreement with Hart, Schaffner & Marx. Mr. Hillman, then one of the striking employees of this firm, helped to negotiate and operate that agreement.

The recent strike was called for little more than to secure for other shops the terms of that agreement, which has worked so satisfactorily to both parties in this largest manufacturing establishment in Chicago's clothing trade. The associated manufacturers would yield naught, however, to the success of their competitors, the independent manufacturers, in effecting that permanent basis for settling differences with their employees. Collective bargaining was, of course, demanded as indispensable to any such basis, but not the closed shop. This was denied consideration from the beginning of the strike until after the strikers went back to work.

As soon as the strikers had returned their shop committee went into conference with their employers to arrange the details of settlement. The union and its officials received no recognition thereby, yet the principle for which it struggled was recognized. The shops that have settled with their crews have conceded another claim of the strikers also—namely, the reduction from fifty-two to forty-eight hours a week without diminution of wages.

Mr. Hillman claims that the struggle was "the most successful strike ever waged against the association, which is the bitterest and strongest anti-union organization in the industry." And he added: "We have done something better than punish the enemy. We have infused a new solidarity among our people."

The employers' association issued no public statement. It refused in silence all appeals from public officials, groups of private citizens and its employees either to arbitrate or confer.

Perhaps the man most competent to estimate the outcome of this long struggle is John E. Williams, chairman of the board of arbitration established by the agreement between Hart, Schaffner & Marx and their employees, who acted in the same capacity under the protocol in the New York clothing trades. Says Mr. Williams, in part:

"I have been close to it from the beginning and think it was one of the best organized, best fought strikes ever pulled off in this country. Starting without money, the strikers raised $140,000 and spent it so well that scarcely a person suffered from actual hunger or want. They developed a wonderful loyalty and devotion among many different races and peoples and held them together with very few desertions to the end. They developed also a remarkable corps of commanders right out of the raw material on the spot."

**Big Year For Labor.**

An unusual year for labor—probably the most unusual in a generation—ended with 1915. For some of its earlier troubles the war in Europe was to blame. Its present problems are largely due to unprecedented prosperity. In New York city it closed with a statement from union sources that 200 business institutions had increased the pay of their employees, but this does not include the many independent concerns that were equally and in some cases even more generous.

From Boston, from Chicago, from the textile industries in New England and from other sections of the country come more notices of higher wages for the workers.

## SMART OUTLINES.

## WILSON'S IDEA OF A HERO.

**Men Who Risk Lives to Better Conditions Are the Brave Men.**

Here is President Wilson's idea of a hero, expressed in a letter from him to Secretary Lane:

"The rescuer of the bureau of mines who braves the poisonous gases and saves a miner from death, the coast guard who at the peril of his own life saves passengers of a helpless vessel from death, the surgeon of the public health service who stops a dreaded scourge in its incipiency, the engineer who succeeds in reducing the hazards of industry to its men and the man who brings about better conditions of living among people I consider all types of the hero who will be best regarded in the near future."

## PRISONERS OFFER CANES.

**Want to Sell Product to University Students.**

Hearing that the law students at the University of Washington were planning to "wear" canes this year, No. 7795, an inmate of the penitentiary at Walla Walla, has sent two samples of his craftsmanship in the hope of opening a market for the spare time product of the prisoners.

The canes are of leather with a steel foundation, and the handles are of German silver with inlaid bits of abalone shell.

The manufacturer has set no price upon his art, preferring to leave that to the "good judgment" of his customers.

**Seventeen Varieties of Congratulations.**

Salutations in seventeen languages were given to Judge Sulzberger of Philadelphia at a special reception tendered to him. The occasion signalized Judge Sulzberger's retirement from the bench.

**Cowed.**

He taught her how to fence with foils,
To box with gloves, and now
That they are wed he doesn't dare
To raise the smallest row.
—Boston Transcript

**The Proper Way.**

"I thought you quarreled with the laundress over the ironing?"

"So I did, but that difficulty has been smoothed over."—Baltimore American.

# SHOW THIS TO YOUR HUSBAND!

Any woman who can earn $1 a day at other work is wasting time doing her own washing and ironing, because we will do it for less than she could earn in the same length of time.

If your washing and ironing take two days of your time, it costs you $2 to do it, to say nothing of the expense of fuel, soap, starch, bluing, wear and tear on wringer, tub and boiler. You actually lose 50 cents to $1 every time you do your own washing. This is not taking into consideration the effect upon your health and necessary neglect of meals and other family duties on these days.

**You Will Enjoy Better Health, Have More Time for Recreation, and Be Money Ahead by Sending Your Entire Washing to Us Every Week.**

# J. A. BORT ALLEGED TO BE BANKRUPT

### Petition Returnable Feb. 14 ---Three Creditors Named Whose Claims Aggregate Less Than $1000.

Th creditors named in the petition in the case of John A. Bort, who is alleged by them to be a bankrupt, caused the arrival here yesterday of a U. S. Marshal, who served papers on the defendant in the sum of $801.82 with costs. The papers name February 14 as the date when they are returnable, naming Mr. Bort's creditors to be: Swift & Company of Chicago, $244.18; Royal Company, whose co-partners are Phillip and M. H. Sugarman and F. Cyrus Street of New York, and the Fulton Light, Heat and Power company. The last named firms have claims for $199.73 and $357.91 respectively.

Attorney A. T. Jennings represents the petitioning creditors, who allege in part that Mr. Bort "within four months preceding the filing of the petition, and while insolvent, committed an act of bankruptcy, in that he did, on or about October 20, 1915, and while insolvent as aforsaid, mortgage his business block and real estate" in this city to L. W. Emerick in the sum of $4,400, "to secure a past due indebetedness" of the defendant to the First National bank of this city.

It is further alleged that Mr. Bort made the transfer with intent to prefer the bank as a creditor over his other creditors, and thus to hinder and delay his creditors. This mortgage will expire about February 19, 1916. It is further alleged that Mr. Bort gave to the First National Bank a mortgage on property in Rochester, in the sum of $887, with the same intent as noted in the former instance.

The petitioners also allege that on December 15, 1915, Mr. Bort conveyed the property, 219-221 Cayuga st., to R. Bonner Sworts of Dundee, N. Y., "together with certain personal property." This property is valued at $12,000, according to the petitioners, incumbereed by mortgages held by the First National Bank and the Fulton Savings Bank, in the sums of $4,400 and $5,400 respectively.

The petitioners further allege that while insolvent Mr. Bort committed another act of banknruptcy, in that he transferred to the First National Bank "$5,100 par value of stock in the Simplex Wrapping Machine company," which was Mr Bort's property, thus preferring the bank over his other creditors

Mr. Bort't provable debts are set at $5,000, and that he has no property than that enumerated. Judgments entered against him at the present time total about$2,000, which have been filed in the County Clerk's offices in Oswego and Monroe counties.

## "THE RED ROSE" COMES HERE NEXT FRIDAY

The very quintessence of musical comedy, embracing a score that is catchy, without being ragtime, and a consistent and dainty love plot, are summed up in the entertainment offered by the world-famous musical comedy, "The Red Rose," which comes to the Quirk, one night only, Friday, February 11, with the original John C. Fisher company and production. "The Red Rose" comes here with a record of one year at the Globe Theatre, New York city, six months at the Grand Opera House, Chicago, five months at the Forrest Theatre, Philadelphia, and four months at the Colonial Theatre, Boston.

"The Red Rose" is in three acts with book and lyrics by Harry B. and Robert B.Smith, authors of "The Spring Maid," "Robin Hood," "Watch Your Step," and last season's greatest musical success, "The Debutante," as produced by John C. Fishr. The scene was written by Robert Hood Bowers, who has to his credit over twenty popular musical comedy hits in America, and his "Bohemia," "Men, Men, Men," and "Come Along, Ma Cherie," have all proven greater musical numbers than did Leslie Stuart's sextette number, "Tell Me Pretty Maiden," in "Florodora."

## EXPERT BOWLING MATCHES PLANNED AT ONYX

The first of a series of expert bowling matches for which Manager Powell of the Onyx alleys has been arranging to take place during the remainder of the bowling season, will be rolled on thel ocal alleys Wednesday night, the All-Oneida outfit being the opponents of an All-Fulton team, whoich quintet has as yet not been chosen.

# INSTAL LOWELL GRANGE MASTER

### Oswego County Has One State Officer, Mr. F. E. Alexander---Tribute Paid to Late Major Daniels.

Jamestown, N. Y.—The installation of officers finished today the week's sessions of the New York state grange. State Master Vary again demonstrated his ability as presiding officer and to him in a large measure is due the smoothness with which the four days program has been carried out. Indeed, so thoroughly satisfactory has been his work that only Mr. Vary's firm refusal to accept prevented his being re-elected for another two years as master.

Sherman J. Lowell, Mr. Vary's successor, enters upon his duties as prosiding officer, well fitted for the task of serving at the head of theg ranges, of the Empire state. He is 56 years of age and is a member of Fredonia grange, of Chautauqua county, the first grange organized in the state and United States. His son is the present master of that grange. Mr. Lowell has served as master of his own grange and of the Chautauqua Pomona. In 1906, he was elected assistant steward of the state grange. Two years later he was chosen state lecturer and four years ago he was elected to theo verseer's chair, stepping now into first place after ten years' service in the state grannge.

### A Strong Deputy

Albert Manning, who succeeds to the position of overseer, is ap rominent granger and dairyman of Orange county. His grange service includes eight years as master of Orange county Pomona and a term as steward of the stateg range. He has been a regular attendant at state grange sessions for many years and iswell qualified for the position, which came to him, wholly unsought and unexpected. Mr. Manning has also served for many years as secretary of the State Dairymen's Cooperative League.

County Deputy Elon O. Andrus of Jefferson was chosen president of the state deputies at their annual meeting, this week, held in connection with the state grange. This is a merited recognition of Deputy Andrus' ability and good work, as his has long been considered one of the best deputies in the state. By reason of illness Deputy Andrus was not able to attend the state grange.

The election of officers this year wasn ot completed as promptly as usual, three periods being necessary before all offices were filled At the session Wednesday evning, Mrs. P. J. Eysaman of St. Lawrence was chosen as Pomono, Mrs. C. H. Pratt, as Ceres and Mrs. Guy Chamberlain as lady assistant steward, with the positions of gatekeeper and Flora, still unfilled

Following the special session Wednesday evening, a reception was held in the Eagle Temple parlors by Master Vary and wife and Overseer Lowell and wife.

During thep ast year two prominent members of the order have died. Former State Lecturer Mrs. B. B. Lord of Chautauqua, and A. J. Bartlett of Seneca, or as he was familiarly known "Uncle Jack." Both were regular attendants of stateg range sessions, and well known throughout the state. Mr. Bartlett had attended every session of the state grange up to the 41st session.

### Would Change Mail Routes

Master Vary invited Commissioner Charles S. Wilson, of the state agriculture department, to address the grange at Thursday afternoon's session. Commissioner Wilson asked for the hearty co-operation of the grange in the department's efforts to enforce the agricultural law. The department, he said, was striving to disfuse a more general knowledge of the provisions of the law.

A resolution offered by the St. Lawrence delegation on the death of Maj. W. H. Daniels of Ogdensburg was adopted and the secretary was instructed to extend to the family the sympathy of the state grange.

The committee on parcels post recommends increasing the weight limit of parcels to 60 pounds and approved the plan of increasing the mileage of rural mal routes. The committee also recommended increasing the limit of deposits in postal savings banks to $2,000.

The complete list of officers elected follows: Master, Sherman J. Lowell, Chautauqua; overseer, Albert Manning, Orange; lecturer, George Watson, Wayne; steward, Frank J. Riley, Cayuga; assistant steward, Fred Hecker, Monroe; chaplain, E. E. Gross, Ontario; treasurer, W. L. Bean, Cortland; secretary, W. N. Giles, Onondaga; gatekeeper, H. S. Coe, Livingston; Flora, Mrs. F. E. Alexander, Oswego' Pomona, Mrs. P. E. Eysaman, St. Lawrence; Ceres, Mrs. C. C. Pratt, Erie; member executive committee, Ira Sharp, Lewis; lady assistant, Mrs. Guy Chamberlain, Otsego.

The committee on good roads reported in favor of resurfacing state roads, so that they will be furnished with a surface less slippery and dangerous for horses. The committee also favored legislation prohibiting motorcycles traveling with cutouts wide open; favorably on the state assuming cost of all bridges costing over $3,000; adversely on proposition to have license fees on autos revert to the towns in which issued for local highway contractors to properly repair all private approaches when building state highways. The recommendations of the committee were all adopted

Two short sessions of the grange were held Thursday, reports of committees taking up the most of each period. The close of the third day found the week's woork well along with excellent prospects to an early closing Friday afternoon.

State Commissioner of Agriculture Wilson was present at Thursday afternoon's session adn was among the number to take the sixth degree Thursday evening.

That the cooperation of theg range with the State Health Department to bring about better sanitary conditions is bearing good fruit seems evident Chairman C. T. McLouth of the state grange rural health committee, reported a marked decrease in the death rate in rural communities during 1915, as was the case also in 1914. He said that the grange had done most effectual work in helping to secure the establishment of tuberculosis hospitals in the various counties Several rural communities were reported as employing community nurses with excellent results. The committee recommends adding discussions on sanitary matters to grange programs.

Past State Master, E. B. Norris and Past State Master F. N. Godfrey, with their wives, have been in attendance at the grange during the week.

The report of the death of Major W. H. Daniels, of Ogdensburg, brought many expressions or regret, as Major Daniels had a host of friends among those who attend state grange sessions. His untiring labors for the pleasure and comfort of those who attended the state grange session at Ogdensburg will be long remembered.

State Secretary Giles at Thursday's session read a communication to the grange from Lewis county's veteran granger, P. E. White, and the secretary was instructed to send a telegram of fraternal greeting to Past Deputy White.

# PUBLIC NOTICE

NOTIIE is hereby given that the undersigned intends to file with the Commissioners of the Land Office at the office of the Secretary of State, Albany, on the 24th day of February, 1916, an applicationfor grant of certain abandoned canal lands described as follows:

Situated at a point in the junction of First and Oneida streets "beginning at a point in the North line of Oneida street 35.17 feet westerly from the Southwest corner of block No. 20, thence N. 28 degrees 31 minutes East 154.12 feet, thence N. 64 degrees 28 minutes W. 46.52 feet; thence S. 28 degrees 45 minutes West 95.40 feet; thence N. 81 degrees 54 minutes West 95.40 feet; thence N. 81 degrees 54 minutes E. 72.78 feet to a beginning, containing 0.213 acres of land.

NOTICE is further given that it is the intention of the undersigned to appropriate these lands for the purpose of a Public Municipal Market and that a two (2) story brick and stone building of the dimensions as follows: Width front, 72.48; width rear 46.52; length Eastern side 154.12; length western side 194.18, will be erected thereon.

Dated, January, 1916.

Signed

City of Fulton by
Victor C. Lewis Mayor.

## POOL PLAYERS SCORE, LEADING BY 25 POINTS

The Fulton pool team which is playing the Oswego cue artists a 1,000 point match, increased their lead to 25 points by scoring a well-earned victory over Morris and Shirtz, the Oswego players, at the Alhambra in that city last night. Walsh and Simoneau represented Fulton. The final score in the game was 100 to 90 in favor of Fulton.

The next game will be played in this city Monday night. The same men who played last night will compete Monday night with the exception of the substitution of McMann for Shirtz.

## WOODMEN'S THERMOMETER MAY RISE TOMORROW

A special meeting of the Modern Woodmen of America will be held tomorrow afternoon, at the lodge rooms at 2 o'clock, for the purpose of raising the thermometer to 100 degrees. Providing this is done, we shall go to the class adoption in Syracuse on February 14, by special train.

Mr. George Phillips won the prize for securing members in the month of January, and Mr. Fred Shettell won the prize for selling the largest number of tickets in the recent contest.

## LEGAL NOTICES

### Notice to Creditors

In Pursuance of an Order of Clayton I. Miller, Surrogate of the County of Oswego, New York, notice is hereby given according to law, to all persons having claims against Faustina H. Langdon, late of the city of Fulton, in said County, deceased, that they are required to exhibit the same, with the vouchers therefor, to the subscriber at the lew office of A. T. Jennings, No. 9 So. First street, in the city of Fulton, in the County of Oswego, New York, on or before the 26th day of April, 1916.

Dated this 18th day of October, A. D., 1915.

HAROLD H. BRISTOL,
Administrator with the Will Annexed.

STATE OF NEW YORK— SUPREME COURT, Oswego County.

THE DIME BUILDING AND LOAN ASSOCIATION vs. EARL POOLER, BERNARD H. SHARP, MERRITT W. MILKS AND LOUISE POOLER.

To the above named Defendants:

YOU ARE HEREBY SUMMONED to answer the complaint in this action and to serve a copy of your answer upon the plaintiff's attorney within twenty days after the service of this summons, exclusive of the day of service, and, in case of your failure to appear or answer, judgment will be taken against you by default for the relief demanded in the complaint.

Trial to be held at the County of Oswego.

Dated this 6th day of January, 1916.

LOUIS C. ROWE,
Plaintiff's Attorney,
Office and Postoffice Address.
Oswego, N. Y.

To Earl Pooler, Defendant:

The foregoing summons is served upon you by publication, pursuant to an order of Hon. Irving G. Hubbs, Justice of the Supreme Court of the State of New York, dated the 14th day of January, 1916, and filed with the complaint in the office of the Clerk of Oswego County, at Oswego, N. Y.

LOUIS C. ROWE,
Plaintiff's Attorney,
1 and 2 Grant Block,
Oswego, N. Y.

## MRS. J. H. BENNETT GIVES NOVEL ENTERTAINMENT

It remained for a woman whose former home was in gay New York to provide for her friends yesterday an entertainment novel to the people of this city. The newcomer in this instance is Mrs. J. H. Bennett, of 515 Oneida st., wife of the East 1st st. out fitter, whose marriage to Mr. Bennett late in the fall was one of the society events of Washington Heights, in New York.

Mrs. Bennett searched her brain yesterday to find something new by way of entertainment for her guests, finally deciding upon one of those old German forms of spending an afternoon. She arranged the rooms in her home to accommodate the accessories necessary to holding a "Kaffee Klatch," and when the guests left for home it was with a feeling of reluctance. Music and dancing were also enjoyed by theg uests, among whom were: Mrs. Amdursky, Mrs. Pollock and Miss Lillian Waldhorn.

## THEODORE ENTERTAINED HIS SCHOOL FRIENDS

Twenty tots, marching two by two, led by their teacher, Miss Farrell, attracted attention in the downtown section yesterday afternoon.

The children, especially togged out in their best clothes for the occasion, attended the Happy Hour theatre as the guests of a classmate, Master Theodore Prowda. Theodore, as well as the other children, all pupils in the first grade of grammar school.

## GRANDJEAN—JASACK

Mr. Ray Grandjean of South 2nd st. and Miss Nellie Jasack of Pratt st. were united in marriage on Wednesday evening by the Rev. H. D. Holm a at the State street parsonage.

Miss Elsie Grandjean and Mr. Edward Beals attended the bride and groom.

**An auction advertisement in The Evening Times for six days prior to the sale is the cheapest way to advertise a sale.** adv.

### CHILDREN NO EXCEPTION

**In Fulton as Elsewhere Youth and Age Suffer Alike From Kidney Weakness**

Is your child weak, frail and pale?
No control over the kidneys' action.
Kidney weakness is a serious thing
Far too serious to overlook.
It may mean a life of sickliness.
Profit by Fulton experiences.
Use Doan's Kidney Pills.
Endorsed by Fulton parents.
Read this Fulton mother's endorsement:

Mrs. Edward Billings, 361 S. Second st., Fulton says: "Our little girl had kidney trouble, and bed-wetting was common. One box of Doan's Kidney Pills cured the child and I am pleased to say a good word for this medicine."

Price 50c. at all dealers. Don't simply ask for a kidney remedy—get Doan's Kidney Pills—the same that Mrs. Billings recommends. Foster-Milburn Co., Props., Buffalo, N. Y. adv

**Lost**—Lavillier with blue sapphire, in neighborhood of Erie and Academy on 5th or on 6th between Academy and Broadway. Reward. Times 350

**Small House Wanted**— Must have conveniences;not over 6 or 7 rooms; central location. Address W., Times office. tf.

**Gentleman**—Who got coat and vest by mistake. January 22, kindly return to 123 West Broadway. 350

**Polish Girl**—Wanted as chambermaid Pontiac. Oswego.

### WEATHER FORECAST

**Probably snow flurries tonight and Sunday Strong shifting to West winds**

## Those You Know

Mrs. Claude C. Wade of Syracuse, is the guest of her sister, Mrs. Thos, Coleman.

* * *

Assistant Fire Chief Rude made an appearance in East 1st st., today, the first since his illness began.

* * *

Miss Ma Belle Hyde, of North 6th st., is spending the week-end with friends in Mt. Pleasant.

* * *

The Symphony Orchestra will meet at the Elks' home Monday evening.

* * *

The Symphony Orchestra will met at the Elks' home Monday evening.

**Sound Waves.**

**A sound wave consists of an alternate compression and refraction of the air. A singular result of this was noted after a great powder explosion at Erith, England, in 1864. The leaded glass windows of a church several miles away were all strongly bent inward on all sides of the church. The explanation was given in these words: "The sound wave on reaching the church separated right and left, and for a moment the edifice was clasped by a girdle of intensely compressed air, which forced all its windows inward." The subsequent dilation of the air was insufficient to force the bent panes back into shape.**

**OPPOSITION.**

**The effects of opposition are wonderful. There are men who rise refreshed on hearing of a threat—men to whom a crisis which intimidates and paralyzes the majority comes graceful and beloved as a bride.—Emerson.**

**In a Bad Way.**

"Is he hard up?"
"I should say so. He can't even get credit for his good intentions."—Judge.

# PHOENICIANS FAILED IN TEST

## It Was a Good Game, One of the Best Played Here This Year.

Fulton High 43; Phoenix High, 18. This is the result of the basketball game which was played on the City Hall court last night before an enthusiastic crowd of students, as well as other supporters of the local team.

Reynolds, of the local outfit proved to be the "demon" of the event, dropping the ball into the net 14 times from the field for a total of 28 points, which estabzlishes a record for the local high school during the 1915-1916 season While it is not intended to discredit Reynold's ability as a brilliant player, if the Phoenix High school had in some way found another Reagan (four of their quintet were named Reagan, all brothers) to displace the guard who was supposed to keep a vigilance over Reynolds the defeat would not have been so humiliating

The game was, notwithstanding the large score, one of the best seen on the City Hall court this year. Aside from Reynolds and his Phoenix opponent, the men were all nearly evenly matched The other three guards playing in the game attended to their dut yin first class style

C. Reagan was the star individual performer of the visiting outfit. Wallace, due to illness, was not in the Fulton High lineup, his place being taken by Don O'Brien who performed in first class style, getting two baskets and keeping his opponent down to one lone tally

The score at the end of the first half was 26-18. In this period, C. Reagan, Reynolds and Martin held the limelight, Reynolds getting nine baskets before the whisle blew for the rest period.

The lineup of the teams was as follows:

| Fulton | | Phoenix |
|---|---|---|
| Reynolds | Right forward | C. Reagan |
| Martin | Left forward | M. Reagan |
| O'Brien | Center | R. Reagan |
| Frawley | Right guard | F. Daniels |
| Johnson | Left Guard | C. Roberts |

Substitutions, L. Reagan for M. Reagan. M. Reagan for Roberts. Referee. Hollingsworth. Baskets from field. C. Reagan (4); R. Reagan, C. Roberts, Reynolds (14); Martin (4); O'Brien (2); Johnson. Basketsf rom foul line. C. Reagan (6); Martin.

**Animal Peculiarities.**

All animals, hens included, have peculiarities, and to obtain the best results in working with them we must take this fact into consideration. Not only is it true that each class of animals has its peculiarities, but individuals in the same class have their distinctive traits. To illustrate this take for example two horses. One is a heavy work horse, and when you speak to him it is quite awhile before he obeys. Yet he may be as willing and obedient as the other horse, which is of driving stock and quick in its thoughts and actions. In fact, it is wrong to both to drive such horses together.—Farm and Fireside.

**Very Little Difference.**

**First Childhood—When older friends of the family condescendingly ask you how old you are.**

**Second Childhood — When younger friends of the family condescendingly ask you how old you are.—Judge.**

**Suspicion.**

"Father," said the small boy, "what is political economy?"

"To be perfectly candid, my son, I can't tell you. Sometimes I think there isn't any such thing."—Washington Star.

**Hard to Say Sometimes.**

Willie—Pa, when has a man horse sense? Pa—When he can say "Nay," my son.—Philadelphia Evening Ledger.

# LANDERS MADE IT WARM FOR MACS

## History But Repeated Itself and Normals Got Away With Hopkins' Fine Work.

Landers, the hoodooo f practically every team which is defeated by the Oswego Normal five again proved his ability to play basketball when the Maccabee quintet was severely trounced on the Oswego court by the school five to the tune of 42-17.

Although Hopkins secured as many baskets as Landers, practically every basket which was scored by the school five was the result of passes in which Landers figured more than any of his teamates Lack of teamwork spoiled the chance sof the local quintet who at one time during the first part of the second period looked like sure winners of the contest .

Thep assingo f thel ocal outfit was far superior to that of the Oswegonians, but too many long shots fo which every man was responsible, made thed efeat possible With the score at the end of the first half at 18-8 in favor of the school team, the Maccabees repeated their performance of last Wednesday when they staged an sensational come?back in the second half of the Company D game and won out by a narrow margin For five minutes at the beginning of the second stanza, the Normal five were closely guarded and were unable to score while the Fulton team succeeded in netting goals which brough the score up to within a difference of one point. A long shot by Landers seemed to dishearten the Maccabee five and from that time on to the end of the game, the School five increased their lead by plays in which Landers, Frawley and Hopkins figured.

Thel ineup of the teams was as follows:

| Oswego Normals | | Maccabee |
|---|---|---|
| Frawley | Right forward | Ives |
| Hopkins | Left forward | Snow |
| Landers | Center | Crockett |
| Carroll | Left guard | Freedman |
| Myers | Right guard | Merrill |

Substitutions, Park for Carroll. Rohrball for Freedman. Referee Legg. Timekeeper, Rosbeck. Baskets from field—Frawleq (3), Hopkins (8), Landers (8), Ives (2), Snow (2), Crockett (2), Merrill (1). Points from foul line—Ives (2), Crockett, Landers (2).

# HIGH SCHOOL GIRLS WON OUT

TheF ulton High school girls' basketball team, mainly through the brilliant playing of Miss Margaret Howe, won an interesting game of basketball from the Mexico High school girls' quintet last night in the Mexico town hall. The final score was 11-9.

At the end of the first half the score was tied at six all; at the end of the final period, the score remained at 9-9, so that an extraperiod . was necessary. Miss Margaret Howe made the winningb asket in the extra session. Miss Eva Wells was substituted for Miss Natalie Butts in the "rubber."

Miss Margaret Howe and Miss Butts, were the forwardso n the Fulton team, Miss Elizabeth Howe, center, and Miss Elizabeth Royce and Miss Florence Furness guards

Miss Margaret Howe made all of Fulton's points, with the exception of one made by Miss Florence Furness. This was the girls' first game with an out-of-town team. Several gamesh ave been scheduled with Central New York High school teams which will be played on the City Hall court.

### MRS ELIZABETH SCHENCK BRACKETT

Mrs. Elizabeth Schenck Brackett, one of the early Fulton settlers died early this morning at her home in Hannibal Center at the age of eighty-one years.

Surviving are three sons, James and John of Hannibal Center, and Jay of Mohawk; also one daughter, Miss Alice Schenck of this city.

The funeral will be held Tuesday afternoon at 2 o'clock from the home. Rev. F. W. Dunning of Hannibal Center will officiate. Burial will be made at Hannibal Center.

### SENIOR CLASS TOOK STRAWRIDE ON WHEEL

The senior class of the high school last night enjoyed a straw ride to Volney Center. About forty of the young people participated in the Moore acted in the capacity of chaperones.

Upon arriving at the hall in Volney Center a substantial supper was enjoyed and the merry makers twinkled their feet to the seductive strains from theh igh schoo lorchestra.

### STUDEBAKER MAN COMES FOR CONFERENCE

The Board of Public Works held an informal conference this afternoon with a representative of the Studebaker Wagon company No decision could be reached in relation to that company making repairs to the street flushing machine

**BUSINESS—Particularly the most desirable business—is very much like the sport of fishing. You can catch it if you use good bait. The Evening Times offers you the correct bait.**

**Montenegrin Caps Speak.**

The Montenegrins carry on their caps a reminder of the history of their race, in the shape of a deep black border surmounted with five semicircles of gold. The black border is symbolic of mourning for the fatal battle of Kossovo, which shattered the Servian empire, while the five lines signify the five centuries which have elapsed since that event, and stand also as a sign of hope that one day the glories of the old Serb empire will be restored.—London Globe.

**Object, Matrimony.**

"So you don't believe in advertising, eh?" scornfully remarked the up to date business man.

"No, I don't," insisted his sad eyed neighbor. "I got my wife that way."—Judge.

**Utility.**

"Did your audience throw you bouquets after your speech?"

"No," replied the reckless orator. "They brought only useful gifts, such as bricks and other building material."—Washington Star.

Cook, dead drunk, 10 shillings.

Anne Adams to be washmaid at Lady day. She went away the 29th of June for being wanton and careless. She lost five pairs of sheets and five pillowbeers, for which my wife made her pay £1.—Diary of Sir Richard Newdigate.

**The Rhodum Sidus.**

An amusing story told by Hood describes how a country nurseryman made a large sum out of sales of a simple little flower which he sold under the name of the Rhodum sidus This charming name proved quite an attraction to the ladies, and the flower became the rage of the season. It was one of those freaks of fashion for which there is no accounting At length a botanist who found that the plant was not an uncommon weed requested to know where the nurseryman got the name from. He elicited the following reply: "I found this flower in the road beside us, so christened it the Rhodum sidus."

**Not a Pleasant Prospect.**

Mrs. Cross—This book says that married women live longer than single ones.

Cross—Heavens, woman! Do try to talk about something pleasant.—Boston Transcript.

WHAT APPEAR TO BE CALAMITIES ARE OFTEN THE SOURCES OF FORTUNE

# Is Advertising Wisdom

IT IS APPARENT IN THE CASE OF THE MAN WHO FIGURES TO GET INTO HIS STORE 10 PER CENT OF THIS TOWN'S POPULATION BY PAYING OUT THREE TIMES AS MUCH MONEY FOR SPACE AS HE WOULD PAY WERE HE TO USE THE HOME PAPERS TO REACH THE BUYING PUBLIC. THE STING IS IN THE COMPARATIVE RATES FOR ADVERTISING PLUS THE COMPETITIVE BUSINESS BROUGHT INTO THIS CITY. THE MERCHANT WHO CANNOT SEE THIS LOGIC IS A SUBJECT FOR PITY. IF HE FAILS TO REALIZE THE TRUTH HIS DAY OF RECKONING IS ASSURED.

# Realization of the Truth Will Be His Source of Fortune

Remember the old German proverb: *"As fortune is sought so is it found,"* and then seek to reach your 10 per cent by Advertising in the Home Papers, which cover your field of trade better than the out-of-town papers.

### WHAT THE UNION MEANS.

To the union man the union means something more than a machine to maintain fair wages and working conditions. It means an agency for securing employment if employment is to be had in his particular craft. The union man pays dues into his union for protection. He expects his union to protect him against the competition of the nonunion man. If a union man is out of work while a nonunion man in his craft is working, then the union man feels he is not receiving the protection for which he is paying. At the bottom of the whole problem lie the dread of unemployment and the competition for jobs.—Luke Grant.

## AID DANBURY HATTERS.

### Workers Sacrificed Themselves For Cause of Industrial Freedom.

The plight in which the hatters of Danbury, Conn., find themselves arouses the concern and sympathy of all liberty loving citizens of America. The Danbury hatters have performed a service of historic importance in the struggle for industrial freedom, says the executive committee of the American Federation of Labor.

Efforts of employers in America to keep their workers in subjection have been particularly heartless and unrelenting. They have used all their power and influence, economic, political and particularly in the courts. The legal theory that has enabled the employers to restrict the industrial freedom of their employees was based upon a concept that labor power was a commodity and that employers possessed certain vested rights and a kind of ownership of their labor. This principle was the basis for flagrant abuse of the injunction writ and for interpretation of the anti-trust law.

In the case of the hatters' union the suit was brought against members who had reached old age, those between sixty and eighty years. They were selected simply because they had some little savings, an ownership in modest homes. It is a matter of common information that the framers of the Sherman anti-trust act did not intend that law to apply to the normal activities of the wageworkers. The decision was a great injustice to the hatters, who were innocent victims of the government.

The Danbury hatters did not falter in that which they did for the benefit of all organized labor. They did their duty and made the test, and upon them has fallen the burden of injustice. If they are left to bear the full burden it will mean great suffering and privation to them. Every member of organized labor is urged to do his duty in the matter and bear his share in the common struggle to establish industrial justice.

## COMPENSATION UPHELD.

### Chief Justice of New Jersey Reverses Supreme Court Decision.

In an opinion filed with the New Jersey court of errors and appeals Chief Justice Gummere upheld the workings of the compensation act of the state in the case of Mrs. Amy L. Winfield whose husband was killed while working for the Erie railroad. The opinion reverses one handed down by the supreme court and upholds an original award to the widow by the Hudson county court.

The company set up the claim that Winfield was engaged in interstate commerce and that his rights should be determined under the federal statutes relating to common carriers. The Hudson county court held that the man was not so employed and gave an award to the widow under the compensation law. The supreme court then reversed the lower court.

Justice Gummere holds that what Mrs. Winfield seeks to enforce against the company is not liability arising out of negligence as treated by the federal statutes, but a "contractual obligation" created by the workmen's compensation act with the consent of the employer and employee and which the court holds still exists. The court stated that no proof of negligence was offered by either side.

### Railway Strike Averted.

Settlement of the threatened strike of 4,000 switchmen emloyed by the railroads entering Chicago was announced when word came that the railroad general management committee had agreed to the employees' contention that transfer trains should include cabooses for the accommodation of the trainmen. The dispute between the trainmen and the railroads was largely based on this point, the railroads having ruled against cabooses.

## LABOR NOTES.

The National Print Cutters' Association of America will meet at Philadelphia April 29-30.

It is estimated that more than 3,000,000 workers will contribute to the Danbury hatters' fund.

The recent riot at Youngstown, O. caused the deaths of two persons and a property loss of $1,000,000.

The Journeymen Tailors' organization is composed of 303 local unions, with a total membership of 12,000.

The convention of the Amalgamated Association of Iron, Steel and Tin Workers will be held at Cleveland May 2 to 16.

# Bowser Buys Coal

## And He Meets With a Dishonest Honest Dealer.

By M. QUAD

Copyright, 1916, by the McClure Newspaper Syndicate.

The Bowsers had eaten dinner. A cheerful fire burned in the grate, and the cat licked her paws as she lay upon the rug.

Outside the house there was a cold north wind and a squall of snow now and then.

Mr. Bowser was half nodding in his sleep when a voice crying out interrupted his contentment. It was Mrs. Bowser's voice, and it was exclaiming loudly:

"There, there; I have forgotten that coal again!"

"Hey! What! Why don't you scare a fellow to death and be done with it?" demanded Mr. Bowser.

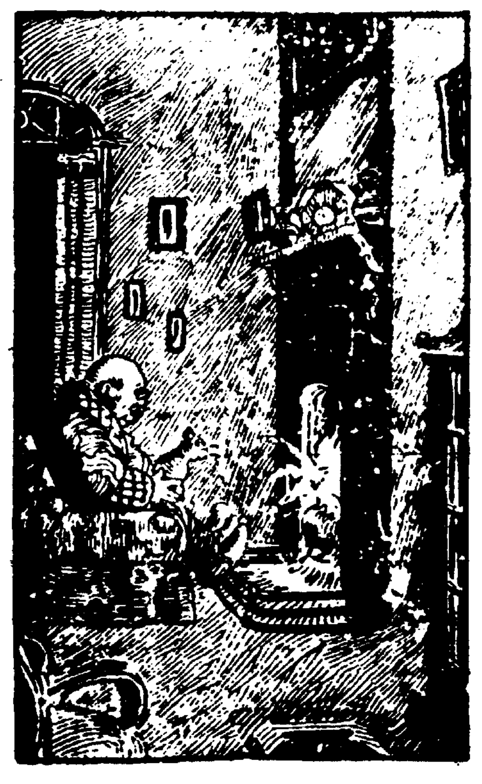
"I only said I had forgotten to telephone for some new coal. I suppose it is too late now? All the dealers will have gone home by this time."

"Yes, they must have gone home. Is the coal for the furnace all gone?"

"There may be enough to last tomorrow. I ought to have telephoned early this morning, but I had a hundred different things on my mind."

"Mrs. Bowser, it seems to me that the last two tons of coal went very fast," said Mr. Bowser, as he jabbed at the fire with the poker.

"I know it did, and yet I tried my best to be saving. I don't believe there



"A CHEERFUL FIRE BURNED IN THE GRATE."

were two tons of it. I believe you were cheated of at least a quarter of a ton of coal."

"More likely it was half a ton."

"And can't you do anything about it? Other husbands tend to such things. Why don't you, instead of leaving it to me? The coal men will cheat a woman quicker than a man. They know that she won't come to the office to complain about short weight. We are being cheated becaause you won't see about it."

"Well, I will tell you what I will do," said Mr. Bowser as he suddenly made up his mind. "I will start out in the morning to buy two more tons of coal. I will visit five or six coal offices and let them know I am up to snuff and can't be imposed upon, and we will get the biggest two tons of coal we have had in three years. It will be a little trip that I have often thought of making, but haven't got around to it yet. Yes, by George, we will put a foot down on this short weight business!"

Nothing more was said that evening, although Mrs. Bowser could have added that he had better stop at the grocer's and the butcher's before his trip was over. After breakfast, with the light of a scrap shining in his eyes, Mr. Bowser started out among the dealers in coal. At the first office he entered he said:

"I have come for two tons of coal—furnace coal."

"Certainly, certainly," replied the man. "This weather burns up the coal very fast."

"I want to ask a few questions before you take my order."

"Oh, to be sure," smiled the dealer. "You can ask a dozen questions."

"Can I depend on you sending me 2,000 pounds full weight for a ton?"

"Why, of course. You don't think I would send you less, do you?"

"And it will be clear of slag and slate?"

"As clear as noonday, sir. No one can find fault with our coal in any direction. Full weight, prompt delivery and no slag or slate. What is your address, sir?"

"Didn't I read in the papers a short time ago that you had a contract with the city to supply one of the public schoolhouses and that you were short in tons in the contract and had to make it good?" asked Mr. Bowser.

"Oh, as to that," laughed the dealer, "my weigher of coal, who has been with me for the last fifteen years, got drunk one day and made a mistake about weights. When my attention was called to the shortage I was only too glad to correct it at once. Shall I send the two tons of coal to your house at once?"

"I am going up the street," replied Mr. Bowser, "and I will stop when I come back and leave the order."

At the next coal office they were weighing a load on the scales as Mr. Bowser came along. He cast a look at the weight, and as near as he could figure they were giving 1,850 pounds for a ton. Nevertheless, he went in.

"Good morning, sir," saluted the dealer. "How much coal did you wish to order this morning?"

"That depends somewhat on circumstances," was the reply. "Will you assure me of full weight?"

"Oh, most surely. That is one of the things I pride myself on."

"And clean coal?"

"That is another of the things."

"I just noticed a ton load on your scale, and I saw that it was 150 pounds short, and there was a heap of slag and slate in sight."

The dealer turned very red in the face and rushed out into the yard and was absent three or four minutes. When he returned to tell Mr. Bowser that it was a ton of coal ordered for the house of one of his employees and was sold almost at half price he found his customer was gone. He ran out again and berated the weigher, but it was too late.

Mr. Bowser found the next three dealers courteous, honest men. They gave full weight and sometimes a little more; they sold only clean coal; their aim was to satisfy all customers; they had never had a complaint. The grocer and butcher might give short weight, but never the coal man; his conscience forbade that.

Mr. Bowser extended his trip for two miles without placing his order and finally entered the sixth office.

"How many tons and where to?" asked the dealer as he wet the point of his pencil with his tongue.

"I want two tons of coal, but"—

"But you want to do a little kicking first. Kick away."

"Will you deliver me a full 4,000 pounds?"

"No, sir," was the emphatic reply. "If I deliver 3,700 pounds you might thank your stars!"

"But will it be free burning coal?"

"No, sir! There will be the usual amount of slag and slate mixed in."

"But—but"— stammered Mr. Bowser, in his surprise.

"Oh, don't take me for a fool!" said the dealer. "You have doubtless been to other dealers, and they claimed to be honest men and filled you up with promises of full weight and free coal. I am not an honest coal dealer myself, nor am I a liar. No man is in the coal business for his health. We are all driven into dishonesty. I have just received a consignment of 200 tons of coal. It is at least ten tons short. Am I going to make up for the loss, or have my customers got to do it?"

Mr. Bowser did not reply.

"Look here, old man," continued the dealer. "The mine owner cheats his railroad. The railroad cheats the wholesale dealer. The wholesale dealer cheats the retailer. The retailer cheats the consumer. I have six drivers, and every one of them cheats me by selling from his load three or four buckets of coal on every trip he makes. Besides that, there is stealing from a yard, and my watchman sells a barrel or two of coal every night. It is an endless chain of cheating, and they who won't cheat are out of the business after one year."

"But who will I cheat?" asked Mr. Bowser.

"You may cheat the man who shovels the snow off the sidewalk—if you can," was the sobered reply. "At least you will have to cheat somebody or suffer the loss. I am sorry it is so, for I would like to be an honest man, but I can't be, the way things are run. Will you give me your order, sir, and let me cheat you? It might as well be me as any of the others."

"I—I think I will," replied Mr. Bowser. "I have tried honest men long enough. I will make a change and try a dishonest one."

And Mr. Bowser gave his address, paid for the coal and walked out. He was at home when the wagon drove up, and as there was a public scale within two blocks of his house he said to the coal wagon driver:

"Had you just as soon drive over and weigh this coal?"

The driver said he would be delighted, and the load was weighed and the extra weight for the vehicle figured out. There were just 4,150 pounds.

"How does this come?" was asked of the driver.

"Oh, my boss is one of those dishonest coal dealers," was the laughing reply.

And when Mrs. Bowser was told of the strange occurrence she replied:

"Mr. Bowser, you go out and look for a dishonest grocer and butcher, and we will solve the problem of the high cost of living. I knew there was a way to do it if we could only strike it."

### Preserving a Memento.

"So this is the house where General George Washington made his headquarters!" said the stranger as he gazed at the inscription.

"No, boss," replied Erastus Pinkly. "Tain' exackly de place. De house where de sign used to be was tore down, so we had to move it."—Pittsburgh Press.

### The Stranger.

"Who's that stranger, mother, dear?
Look! He knows us. * * * Ain't he queer?"

"Hush, my own. Don't talk so wild.
He's your father, dearest child."

"He's my father? No such thing!
Father died away last spring!"

"Father didn't die, you dub.
Father joined a golfing club.

"But they've closed the club, so he
Has no place to go, you see—

"No place left for him to roam—
That is why he's coming home.

"Kiss him; * * * he won't bite you, child.
All them golfing guys look wild."

—Chicago Herald.

## A THREE PIECE SUIT.

**A Smart Outfit For the Matinee Girl This Late Winter.**

SO MODISH.

Quite the fascinating link that connects the hat, coat and frock is the clever introduction of elaborate metal brocade. Joffre blue panne velvet is used to fashion the coat and make the hat's foundation and the basque of the gown. The fur is black fox.

## A UTILITY BAG.

**Directions For Making One That's a Regular Carryall.**

A utility bag which answers the purpose of a laundry and shoe bag, with two other pockets for various articles, will be found very convenient when traveling. This bag can be taken from the trunk or suit case and hung up without disturbing its contents.

Cretonne is perhaps the best material for such a bag. It would require two pieces for the foundation of the bag. One piece should be a yard long and twenty-one inches wide, the other a yard and one-fourth long and twenty-two inches wide. Before joining the two strips attach pockets to the longer piece. Turn up one-fourth yard at the bottom for the flap of the laundry bag. Slightly round it and bind the raw edges with tape. When the bag is completed this flap will snap or button over the back of the bag.

Across the bottom after the flap has been measured off attach shoe pockets. Bind a long piece of material with tape across one side, then lay it into four box plaits, dividing them by means of a stitched piece of tape; also stitch a piece of tape across the bottom after the pockets are basted in place.

Above these pockets attach another bag the width of the strip underneath and any desired depth. Bind top edge with tape divided into two sections and stitch tape acorss the bottom.

Now lace the long strips to a depth of five inches with satine and stitch a casing for double drawstrings. Stitch the two pieces together on the right side and bind with tape. Snap the flap at the bottom over the back of the bag.

**Candy Apples on the Stick.**

Select nice apples that are not too large. Mount them on thin sticks—meat skewers will do. Have them ready so that by the time the sirup is ready for dipping no time may be lost.

Sirup.—One pound of sugar, one-half cupful of molasses, one-half cupful of water, one-quarter of a teaspoonful of cream of tartar, one tablespoonful of butter. Cook until when dropped in cold water the sirup is hard, or to 390 degrees F. on the candy thermometer. Keep hot while dipping the apples. Coat thoroughly. Lay in a greased dish, and then they will harden immediately.

A reliable candy thermometer can be bought for $1. As an investment it will pay for itself time and time again. Learn to make jelly by using the thermometer.

**Stewed Okra.**

Three cupfuls of okra, one cupful of canned tomatoes, one tablespoonful of butter and one teaspoonful of salt and pepper to taste. Wash the okra and cut it into thin slices. Put it into the saucepan with tomatoes; bring them to a boil; then lower the heat and let them simmer half an hour. Add the salt ten minutes before they are done and the pepper and butter just before serving.

**Braised Veal.**

One and one-half pounds of the neck of veal cut into cutlets. In the stewing pan place two tablespoonfuls of fat, then dust the meat lightly with flour and brown in the fat. Add one pint of boiling water, cook gently until tender, add one medium sized carrot and onion. Dish on hot dish, garnish with finely chopped parsley.

## BYRON'S UNHAPPINESS.

**His Icy, Frozen Mannered Wife and His Cruel Parents.**

Marie Corelli, the English novelist, says poets do not really love. If they did they could not write about it. They imagine they love. And their imagination embraces many fair objects.

"Byron," she says, "was an unhappy man. But he was not as unhappy as he imagined himself to be. He found pleasure, even inspiration, in dwelling on his own troubles. Many poets do."

She tells us that Byron's mother had been a Miss Gordon before she married the shiftless and dissolute Captain Byron, the poet's father, and that amid constant quarrelings, thrashings and unjust abuse and the most coarse and intemperate language poor Byron began his career.

"With such a father and such a mother," says Miss Corelli, "the wonder is that he managed to store his mind with so many impressions of beauty and grandeur and that he was able to lift his soul above his surroundings to such a height of intellectual power. His mother's furious temper and her cruel mockeries stung him, not into a reply, but into silent and lonely brooding on his wrongs.

"He himself describes the sense of horror and humiliation which came over him when, in a fit of passion, she called him 'a lame brat.' When Sir Walter Scott met him he said he should scarcely have noticed it. In fact, the great novelist was as lame as the great poet, only Byron's brilliant personality made him, more than Scott, an object of comment. His marriage was a failure. It was a fortunate thing for literature that his wife left him after one year of matrimony.

"Had she remained with him his genius might have perished under the freezing influence of such a paragon of propriety and dullness. William Howitt tells us that Lady Byron had 'frozen moments.'

"'I have seen her,' he says, 'come down in the morning as if she had lain all night on a glacier, frozen, as it were, to the very soul, and no efforts on the part of those around her could restore her for the day to any genial social warmth.'"

**"The Wind Is In the Palm Trees."**

But the glory of palm trees! No pictures or description in books had ever made me realize that before. "The wind is in the palm trees" had been for me but a haunting phrase in Mr. Kipling's most famous ballad, but when the bellboy threw open the door of my room (in Nassau of the Bahamas) looking into the hotel gardens I cried, "What is that sound?" for my ears had been instantly filled with a delicious rippling, as though the room was alive with invisible rivers of running water. I ran to the window. It was the wind in the palm trees—the freshest, purest, gladdest sound to be heard in the world.—Richard le Gallienne in Harper's Magazine

**A Delicate, Tasteful Breakfast.**

Apropos of monotonous unimaginative breakfasts, Thomas Love Peacock once drew up the menu for breakfast "for a man of taste." "Coffee, tea, cream, eggs, ham, tongue, cold fowl," he wrote, "all these are good and bespeak good knowledge in him who sets them forth. But the touchstone is fish. Anchovy is the first step, prawns and shrimps the second, potted char and lamprey the third, but lobster is, indeed, matter for a May morning and demands a rare combination of virtue and knowledge in him who sets it forth."—London Standard.

**Scotch Judges' Frugality.**

Scotland might safely be backed at least to rival England in the matter of frugality among her judges. There is Dean Ramsay's story of the dinner party given by Lord Polkemmet. When the covers were removed the guests were surprised to find that the dinner consisted of veal broth, a roast fillet of veal, veal cutlets, a florentine (an old Scottish dish composed of veal), a calf's head and calf's foot jelly. Observing the sensation, Lord Polkemmet explained: "Ou ay, it's a' cauf. When we kill a beast we just eat up ae side and down the tither."—London Chronicle.

**Mammoth Cave.**

"To me the Mammoth cave of Kentucky is simply a portion of the Grand Canyon of Colorado underground," says George Wharton James, the traveler and author, in "Our American Wonderlands." "Almost all the phenomena of the great cave are revealed in the Grand canyon region, and, given time enough, it is not inconceivable that the Mammoth cave might develop into a Grand canyon region of its own."

**Kept Them Quiet.**

"I went to a symphony concert yesterday afternoon."

"Did you enjoy it?"

"It was the most wonderful experience I ever had. Just think of sitting in the same room with 2,000 women and not one of them saying a word."—Melbourne Age.

**Disappearing Cannon.**

"Some of our cannon are disappearing," remarked the lieutenant.

"Well, things will disappear when you have careless help," responded the lady who was going over the fort. "I find that a great trouble about keeping house."—Louisville Courier-Journal.

**Saving.**

Governess—Why don't you use your brains, Douglass?

"Because I want them to last."

Try this: When telling a piece of scandal, don't say "they say;" just say "I say."

# Indeed, a Wonderful Back

THIS is a study in spring greens. The tunic is of panne velvet of a soft, sagey green, cut very full and hanging in a graceful drape over a net base pricked out with iridescent sequins. The negligible bodice, which is sleeveless, is also sequined net, while a sash of velvet ribbon quaintly hangs a la mode.

• • •

There is always a charm about the combination of fur with any very sheer fabric. So the new net sleeves that have cuffs of fur are very attractive. One of these sleeves is very long and flares so that it is wide at the wrist. There it is finished in a wide band of fur.

• • •

Gaberdine is again a leading fabric. It proved its durability as well as its style last winter and the preceding summer, and it has every reason to remain in favor.

ANNA MAY.

**Steam Fire Pumps.**

The first fire engine in which steam was used to drive the pumps was that of Braithwaite in 1829.

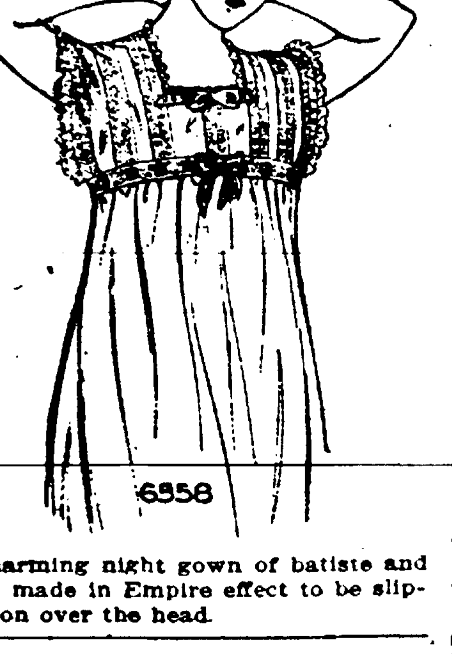
**What Started the Quarrel.**

Young Wife (at home)—Hello, dearest! Young Husband (at the office)—Hello! Who is it?—Puck.

## *Easy & Practical Home Dress Making Lessons*

*Prepared Especially For This Newspaper by Pictorial Review*

**An Empire Night Gown.**



Charming night gown of batiste and lace, made in Empire effect to be slipped on over the head.

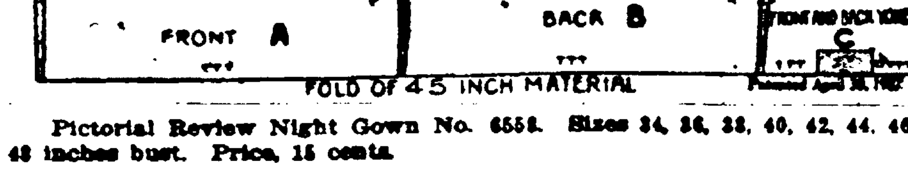
A model that echoes the daintiness of the separate blouse is this Empire night gown trimmed with rows of lace and bows of satin ribbon. The gown is made to be slipped on over the head, the front and back yoke being cut in one, with square neck and large armholes.

In medium size the design requires 9 yards insertion, 3⅝ yards edging, 1½ yards beading, 2½ yards ribbon and 3½ yards 45-inch material.

There are three pieces to the pattern, giving half of each part needed. The material is folded in half on the cutting table and all of the pattern sections are laid on a lengthwise fold, the front coming first, then the back and the yoke.

It is well to stitch the lace onto the goods before it is cut. The material may be cut from under the lace afterward, however. To make, first join the front and back sections as notched and gather upper edges between double "TT" perforations. Turn hem at lower edge on small "o" perforations. Sew front and back yoke to gathered edges of front and back, notches, center-front and center-backs even; tack the side edges of yoke together at under-arm seam. Front of night gown is indicated by large "O" perforation in yoke. Finish jointure of yoke and gown with beading.

If preferred, the neck of the night gown may be finished with buttonholed scallops in place of the lace edging, for embroidery is quite the smartest form of decoration for underwear this season.



Pictorial Review Night Gown No. 6558. Sizes 34, 36, 38, 40, 42, 44, 46 and 48 inches bust. Price, 15 cents.

## CITY TREES AS REWARDS OF MERIT.

**Woman's Municipal League of New York City Makes Novel Suggestion.**

"How many trees will your street earn?" says a pamphlet recently issued by the Woman's Municipal league of New York city, giving the report of the committee on streets and transit of the league. The report says:

"The committee on streets and transit has decided to take up one street in each district and try to make it a model street. A paid inspector, employed by the committee, has already begun on East Seventy-ninth street to visit the janitors in order to interest them in keeping their garbage cans covered, not to overfill the cans and to sweep their sidewalks. It has been suggested that the house keeping its walk the tidiest should receive a tree as a reward of merit—either a large tree planted permanently in front of the house or a small boxwood tree for the front door. We think that a street which has been beautified is likely to be kept more cleanly. The department of parks and the department of street cleaning are both very much interested in the scheme, and both wish to co-operate with us. The park department has no money to plant trees, and the league must therefore raise the money for this purpose."

**A Great Chess Player.**

Sir Walter Parratt had an extraordinary memory. Some eight or ten men were assembled one evening in one of the lodges attached to St. Michael's college, Tenbury. Sir Walter Parratt and Herr von Holst played in turn upon the piano such music as was asked for. This went on for some time until at last the chessboard was brought out. Sir Walter then proposed to play two men at chess in consultation, still remaining at the piano and playing from memory what was demanded either from Bach, Beethoven, Mozart, Chopin or Mendelssohn. Without even a glance at the chessboard he won the game in an hour.—London Globe.

**Miners Get Raise.**

The Calumet and Hecla Mining company of Michigan has given an increase of wages of 10 per cent to all of its employees. The raise, which will benefit 14,000 men, became effective from Jan. 1 and is taken to indicate that the company has its output sold up to July 1.

## The KITCHEN CUPBOARD

**WEEK END MENU.**

SATURDAY—BREAKFAST.
Grapefruit. Cereal.
Salt Pork With Cream Gravy.
Popovers.
Coffee.
LUNCHEON.
Creamed Oysters. Celery.
Bread and Butter.
Doughnuts.
Cocoa.
DINNER.
Cream of Celery Soup.
Breaded Veal Cutlets With Brown Gravy.
Mashed Brown Potatoes.
Brussels Sprouts. Cabinet Pudding.
Coffee.

**Tasty Winter Relishes.**

YORKSHIRE PUDDING.—Materials.—One cupful of flour, one-half teaspoonful of salt, two eggs and one and one-half cupfuls of milk.

Directions.—Sift the flour and salt together, add one cupful of milk, add the eggs lightly beaten, together with just enough milk to moisten the flour. Beat until perfectly smooth; add the remainder of the milk and let the batter stand aside for an hour before cooking. Place in a biscuit pan two tablespoonfuls of beef drippings. Let this get thoroughly hot and run over the pan; pour in the batter and bake about twenty-five minutes in a moderate oven. Cut into squares and serve with roast beef.

Real Scotch Shortbread.—One pound of fresh butter beaten to a cream; gradually work in half a pound of powdered sugar, one tablespoonful of lemon juice (two tablespoonfuls of caraway seeds if liked). When this has been beaten until very light and creamy sift in a pound and a half of flour. Work on baking board until it can be kept from crumbling. Roll it in a sheet about one inch thick; then cut into pieces three inches square. Pinch a neat edge about it and prick with a fork. Bake from twenty-five to thirty minutes in moderate oven.

Celery Relish.—Take celery, onions, cabbage and chop them fine, using celery leaves. Take one-fourth teaspoonful of English mustard, add paprika and vinegar. This is fine and can be made any time. Try adding endives.

Maitre d'Hotel Sauce.—Materials.—One-third cupful of butter, ten drops of onion juice, one tablespoonful of lemon juice, one tablespoonful of chopped parsley, salt and pepper.

Directions.—Beat the butter to a cream as for a cake; add the lemon juice a little at a time and, when blended, stir in the parsley, onion juice and seasoning. Form into a ball or flat cake and set aside to chill before serving.

*Anna Thompson.*

## TODAY'S FASHION NOTE

Vivid worsted embroidery on a background of white silk crepe de chine is a new note for blouses and this design with shoulder yoke and deep sleeve cap is characteristically new. At thew rists the sleeves are new. At thew rists the sleeves are size the waist requires 2 3-4 yards, 30-inch material.

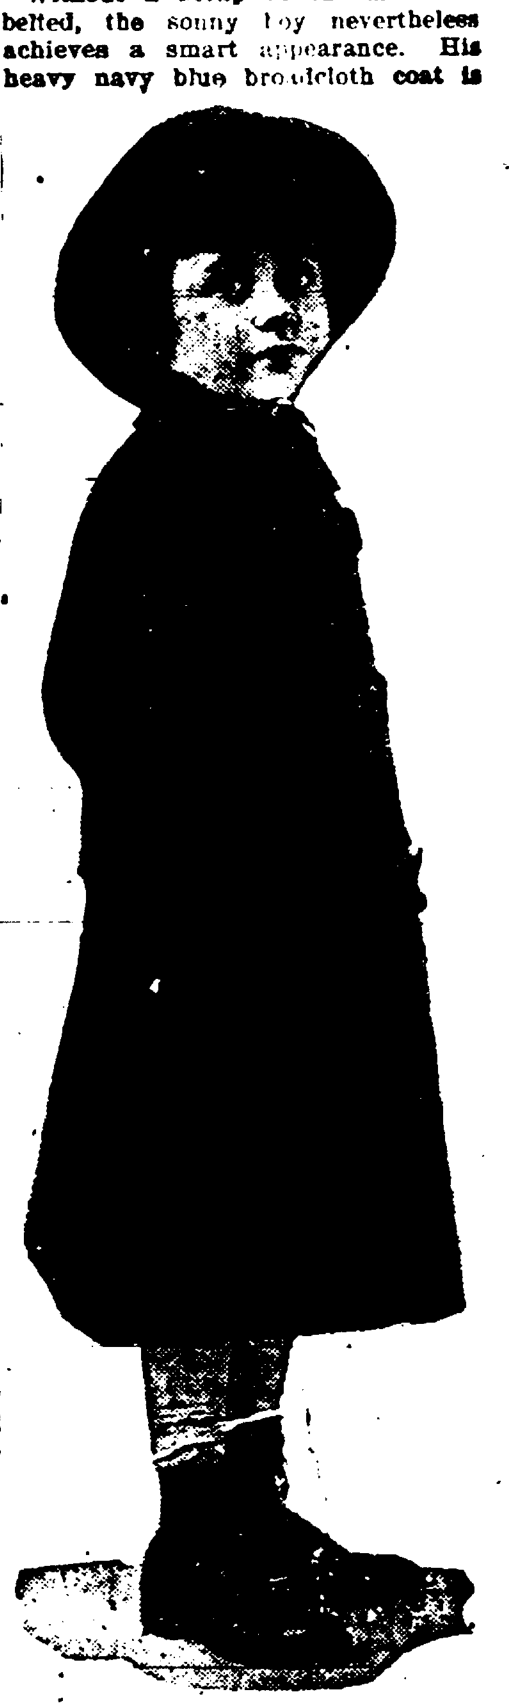
Pictorial Review Waist No. 6506. Sizes, 34 to 44 inches waist. Price 15c.

Pictorial Review Patterns may be procured at the J. R. Sullivan and M. Katz & Co. Department store, Fulton.

## A MANLY EFFECT.

**The Kind of Winter Outfit That Is Always Good Form.**

Without a scrap of fur and nonbelted, the sonny boy nevertheless achieves a smart appearance. His heavy navy blue broadcloth coat is



OUT FOR A WALK.

finished with three black silk frogs. The good cut gives the smartness. His rolling brim hat is black beaver, with a pressed beaver crown and a grosgrain band.

**Pound Cake.**

A pound of butter, a pound of sugar, a pound of flour, a pound of eggs (usually eight), salt, a pound of raisins, a little nutmeg and a little baking powder. Bake this in a large tin.

**Wiser Than He Seemed.**

"Miss Tartleigh told young Binks he was too unintelligent for her to think of marrying him, but he proved her estimate mistaken."

"How? By making her change her mind?"

"Not at all. By making a successful dash for the tall timber before she had a chance to change it."—Richmond Times-Dispatch.

The Student's Glide, One of the Big Dancing Numbers in John C. Fisher's Production of the Globe Theatre, New York, Musical Comedy De Luxe, "THE RED ROSE," Quirk Theatre, Friday Night, February 11th.

# VOCATIONALISTS TO MEET IN UTICA

### Conference Will Comprise Teachers of Central New York—Will Embrace Study of Important Subjects.

Vocational education is fast growing into public notice, especially since U. S. Senator Smith of Georgia introduced Bill No. 703, on December 7, which provides for the "promotion of the work by cooperating with the States in the promotion of such education in agriculture, the trades and industries, to provide for cooperation with the States in the preparation of teachers of vocational subjects; and to appropriate money and regulate its expenditure."

There will be held in Utica next week a conference of the Central New York Vocational Teachers' Association, on Friday and Saturday.

It will be held under the direction of the president of the association, James M. Scott, supervisor of industrial education at Syracuse, and the program includes the names of a number of competent, capable and interesting speakers on the subjects assigned to them. Friday will be devoted to an inspection of the schools of Utica, and on Saturday there will be morning and afternoon sessions held.

The complete program for the conference is as follows:

Friday—Inspection of Utica schools

Saturday—9 a. m., registration, Utica Vocational school; a meeting for principals, supervisors, teachers and others interested in vocational education, 9:30, general meeting, assembly hall, Utica Vocational school, chairman, James M. Scott, supervisor of industrial education, Syracuse; topic, "Continuation Schools in the United States," Dr. Frederick W. Roman, professor of economics, Syracuse University, Syracuse; Dr. Roman is author of the book, "The Industrial and Continuation Schools of the United States and Germany," topic, "The Interest of Club Women in Vocational Training for Girls," Miss Ida J. Butcher, Utica; Miss Butcher is chairman of the Committee on Education of the New York State Federation of Women's Clubs and is also a member of the Industrial and Trades School Council of the University of the State of New York; topic, "Types of Vocational Schools in New York," illustrated. Lewis A. Wilson, specialist in industrial education, the University of the State of New York, Albany topic, "A Message From the Minneapolis meeting." H. H. Denham, principal Technical High school, Syracuse busness meeting.

Saturday Afternoon—2 o'clock, industrial arts section, chairman, Leon H. Beach, principal, Utica Vocational School; "New Methods and Materials in Manual Training Work," Joseph C. Park, director of industrial arts department, State Normal School, Oswego; "Art and Its Relation to Industrial Training," Charles B. Bradley, director of industrial arts, Utica; "Manual Training in the Graded Schools," A. O. Persson, principal, Solvay Process School, Solvay; "Problems of the Grade School Finishing Rooms," R. G. Waring, department of industrial education, Syracuse; question box.

House arts section: Chairman, Miss Anna C. Hedges, specialist in vocational education for girls, the University of the State of New York Albany; topic, "The Strong and Weak Points in Our Work," Miss Jennie M. Bettinger, teacher of cooking, Utica Vocational School; Miss Marie Hutchinson, teacher of book work, Utica Vocational school; Miss Mary A. Dempsey, teacher of book work, Utica Vocational school; Miss Margaret Frink, teacher of sewing, Utica Vocational School; Miss Katherine Baynes, teacher of cooking and sewing, Utica Vocational school; Miss Harriet Streeter, teacher of sewing, Oneida; question box.

### CONFERENCE OF BUREAU OFFICERS AND OTHERS

A conference of farm bureau association officers and committeemen will be held at Cornell, as part of the farmers' week program, on February 9. M. C. Burritt, state director of farm bureaus for New York, will be in charge of thep rogram and will give at 9 a. m. the progress in farm bureau work in 1915.

The afternoon session at 2 o'clock will take up plans and suggestions for 1916, which will be followed with a general discussion by officers, committeemen and delegates. Among the questions suggested for discussion are the following: the part of the local association in the farm bureau; first, in organizing to direct and support thew ork locally; second, in determining the work to be done; third, in carrying on the field work and fourth, miscellaneous matters, including farm bureau news, etc.

At the present time there are 33 farm bureaus in the state with a total membership of about 11,000 or an overage of about 350 each. Inasmuch as the managers have already attended a state conference, they will not be called to Ithaca again. It is particularly desired that executive and advisory committeemen be present and each farm bureau association will be asked to send at least one delegate. All farm bureau members and others interested are invited and an opportunity for an excange of views and for general discussion of the various phases of farm bureau work in the counties, will be given to everyone.

It is stated that all persons interested in farm bureau work are welcome, particularly those from counties which do not have farm bureaus at thep resent time, and who desire to gain information regarding the formation and purposes of such bureaus.

### MRS. PATRICK CAMPBELL TO APPEAR IN OSWEGO

It is safe to designate Mrs. Campbell, who will be seen in "Pygmalion" at the Richardson theatre, Oswego, on Thursday evening, February 10th, without exception as the greatest representative English actress of the present day. Her supremacy is undisputed. In London they accept her as the French do Sarah Bernhardt, as the Italians do Duse, and as the Germans do Agnes Lorme. Representing, as she always has, the intellectual, the mysterious drama, her present tour of the country promises much to the American Theatregoers.

She will present as her principal offering the present season a romance entitled "Pygmalion" by one of the most brilliant of the world's framatists, Bernard Shaw. The chief object of "pygmalion" will be to reveal Mrs. Campbell as a comedianne. Her impersonation of Eliza Doolittle, the flower girl is the highest vein of comedy, and her enjoyment of the part is infectious.

The opening act shows Mrs. Campbell as a vulgar, begrimed flower girl of the slums of London with an atrocious cockney dialect. She attracts the attention of one, Henry Higgins, an experimental theorist, whose hobby is phonetics and the study of dialect. The following four acts show how in the course of six months, Eliza is transformed under the training of Professor Higgins into a woman with all the airs, graces and mannerisms of speech that one expects to find in a duchess; although the erst-while gutter-snipe, though strictly correct as to grammer and pronounciation, cannot keep away from the topics that savor strongly of the slums.

Mrs. Campbell's supporting company comprises J. W. Austin, H. Conway Wingfield, George Frederick, G. Gateby Bell, R. P. Donaldson, Steuart Halliday, Thomas Robinson, G. Watton, F. Herbert, Madeline Merewit, Gladys Hopeton, Beatrice Irwin May, Esther Evans and Elsie Saunders Seat sale open Tuesday 9 a. m. Checks 8 a. m. Mail orders received now if accompanied by check or money orders made out to Richardson theatre.

## Pulpit and Pew

### CHRISTIAN SCIENCE

Christian Science services held on Sunday at 10:45 a. m. and at 8 p. m. Wednesday, in the Van Wagenen Block. Miss Ada Thayer, first reader; Mrs. Frank Wooley, second reader. You will be welcome and interested to attend one or both services.

The subject for Sunday is: "Spirit". Golden Text: Romans 8: 11. Responsive Reading: Ezekiel 11: 15-21; 12: 26-28.

### ALL SAINTS' CHURCH

Rev. Minor J. Peters, Rector ..

Sunday, February 6th, Fifth Sunday after Epiphany.

Services as follows:

Holy Communion. 8 a. m.

Holy ommunion and Sermon, 10:30 a. m.

Sunday school, 12 m.

Evensong and sermon, 5 p. m.

All the seatings are free and strangers are cordially welcomed.

### FIRST METHODIST CHURCH
Oneida and 3rd streete

Rev. J. W. Barrett, Pastor

9:30 love feast in charge of John Distin. 10:30 Holy communion, and reception by transfer of members.

Bible school, Brotherhood and Bethany at noon. Junior League at 3 o'clock.

Following the procession and don't miss going to the Happy Sunday Nighters where they break up the humdrum of life and furnish sunshine for your heart and everybody feels at home. New and popular songs led by large chorus. Short illustrated story and hymns, illustrated by the finest specimens of photography—all refreshing and inspiring.

No reserved seats. Beginning promptly at 7. Come early to the church that exists for the community.

### STATE STREET M. E. CHURCH

Rev. H. D. Holmes, Pastor

Services will be held at the regular hours at the State Street church Sunday, February 6. At the 10:30 service the subject of the sermon, "Expressed by the Life". Meeting of church and congregation for Bible study and 12 m. Classes for everyone. Boys and Girls meeting at 3:30, under the auspices of the Junior League. Devotional and Bible study. Subject "What it Costs to be True." Leader, W. H. Singleton.

At 7 o'clock Prof. W. H. Tilroe of Syracuse University will give an address. Prof. Tilroe needs no introduction to a Fulton audience. Hear him once and you will want to hear him again. The singing is a stronge feature of our Sunday night services especially when assisted by the orchestra. At the close you will enjoy the Sacred Concert. Tell your friends. A splendid place for the stranger. The welcome is of the kind to make him forget that he is a stranger.

A meeting for all Fulton Sunday school officers, teachers and worker's in the Sunday schools will be held in the chapel Wednesday evening at 7:30 o'clock.

General meeting for the church and the congregation Thursday evening at 7:30.

### FREE METHODIST CHURCH
State and South 3rd streets

Rev. C. A. Balch, pastor

Sunday morning at 10:15, evangelist Mrs. Anna Curtis will preach.

Sunday school at 12.

Evening conference meeting at 6:15.

Preaching at 7 by evangelist, Mrs. C. A. Balch.

Class meeting Tuesday night.

Prayer meeting Thursday night.

On Friday evening at 7:30 will be the first service of the second quarterly meeting for the year. Rev. G. L. Skinner of Camden, district elder, will preach. Preaching also by Rev. Skinner Saturday at 2:30 and 730: p. m.

The quarterly meeting will be followed by four weeks of revival meetings conducted by evangelists Harriet F. Sheldon of Africa, and Misses Evangeline Crockett and Maybelle Hayes, both of Wedsport, N. Y.

### CONGREGATIONAL CHURCH

Rev. Charles Olmstead, minister

The theme for the pastor's sermon tomorrow a. m. will be "The Call and Claims of Christ." The Christian Endeavor meeting at 6 p. m. will be in charge of Miss Pearl Parke. The S. S. meets at the noon hour.

Endeavor Day will be observed by a rally at 7 p. m. at which the delegates to the Utica convention will make reports.

The Woman's Missionary Union willll hold its monthly meetinng at the home of Mrs. F. J. Switzer, on Wednesday p. m. The subject will be "Our Chart and Compass for the Year." The leader will be Mrs. Chas. Olmstead. The Young people are especially invited to the prayer meeting on Thursday evening, the sujbect will be "A Gospel for the Young."

The Delta Alpha class served a cafetaria lunch at the church last evening, which was well attended. After the refreshments, a musical and literary program was enjoyed. Among those who took part were Miss Edith Ackroyd, Miss Gladys Kresge, Miss Jesse Wilcox, reader and the quartette composed of the following members, Mrs. Lester O. Todd, Mrs. C. J. Seltman, Mrs. H. J. Alexander, Mrs. E. J. Bishop and Mrs. O. C. Taft, accompanist. In view of the departure of Mrs. Todd, vice president of the class, for Syracuse in the near future, a handsome cut glass dish was presented to her by the members of the class, as a token of appreciation and esteem. The presentation was made by Mrs. F. E. Chubb, president of the class, Mrs. Todd responded in a fitting manner.

The Circles have resumed their usual activity. Several meetings for organization haveing been scheduled for this week.

### WARM WORDS OF PRAISE FOR GEORGIE CAMPBELL

Miss Georgie Campbell as the saucy Princess Bozena in "The Spring Maid" is serving sparkling draughts of bubbling, joyous melody to crowd houses everywhere she has appeared this season. The revival of this daintiest of all the many Viennese operas has brought success to all concerned. The tour, whis is being conducted by Andreas Dippel of Metropolitan Grand Opera fame, thus far has been a continuity of crowded theatres. Miss Campbell has been compelled to sing the "Day Dream" waltz number from six to ten times at each performance and there are almost equal demands for repetition of the song hits—"Fountain Fay" and "Two Little Love Bees." When the audiences are not applauding the composers delightful melodies it is convulsed with laughter at the rich comedy of the authors.

"The Spring Maid" is booked to appear in this city at the Quirk, on Tuesday, February 8, matinee and night.

Leave orders for Miss Crysler's Baking with Mrs. J. K. Steele. Phone 378. adv

## MORE THAN 400 SIGNERS TO PETITION OPPOSING OPEN SUNDAY POOL ROOMS

Rudyard Kipling's statement that the German species is destined to be exterminated by the European war, finds a counterpart in the minds of the men who have resolved to foreveer silence the clamorers for open pool rooms on Sunday in this city. Immediately following the hearing given two of the city's ministers who are ringleaders in opposing the ordinance which would permit the amusement places to remain open each Sunday afternoon, and the publication in Thursday's Evening Times of an editorial which called upon the Mayor to use his veto power to defeat the measure hurdled through by the Aldermen, there arose a vertiable tempest in a teapot, and a "Jackjohnson" in the form of a petition to which have been signed more than 400 names is in circulation. This petition opposes the new ordinance and will be presented to Mayor Lewis for his perusal between now and Friday, the limit set by law when he can approve or veto the act.

Proprietors of pool rooms are also active. They held a meeting yesterday, but no official action was taken, more than to discuss a suggestion that they prepare and circulate a petition favorable to opening the pool playing rooms. In the event of Mayor Lewis signing the law, resulting in reopening the pool rooms on Sunday afternoons, the sense of the proprietors is to maintain order in their establishments and to prevent undue noises.

While Mayor Lewis has not indicated publicly his intention relative to affixing his signature to the ordinance, it is the opinion "of the street" that he will heed the heavy sentiment in opposition to he ordinance by putting the kibosh upon the document. It is further predicted that in the event Mayor Lewis takes a negative stand on the measure, there will arise in the Board of Aldermen at the next meeting a movement to pass the measure over his veto.

## LONDON AND PARIS READY TO MEET GERMAN OFFENSIVE

London—There appears to be a growing belief in both Paris and London that the Germans are preparing to launch some important military movements on the western front. For nearly a fortnight increasing German activity has been reported along this line.

The Times says today that the pressure of events may force the Germaan Staff to stake much to preserve confidence at home and to stiffen the troops by giving to them an illusion of victory by a movement and the possible occupation of a few advance line trenches.

"There have been several recent indications after the enemy's artillery firing at various points," says the Times, "that it was intended to use German infantry to complete some scheme or other, but for reasons unknown they deferred their visit to our lines."

The Daily Graphic says:—"Every argument from the enemy standpoint favors a great western offensive. The sweep through Serbia has released several hundred thousand men for service under German direction. For a month past near Loos, Givenchy and Armentieres and at other points attacks have been made, with the evident object of finding a weak spot. Furthermore, the whole theory of a successful war, according to the General Staff, is that the best form of defence is an attack. On the political side there is necessity to convince German and Austrian public opinion that something decisive is near."

### MRS. JOSEPH GARDNER INJURED BY FALL

While on her way downtown at 8 o'clock last night, Mrs. Joseph Gardner, of 6th and Erie sts., stumbled after stepping from thec urb at the corner of Cayuga and 2nd sts., and suffered injuries. She was alone at the time and her cries brought a number of people to her aid and she was carried into the O. & W. station and a physician summoned.

### HALTS SON'S WEDDING BY PERJURY ARREST

Trenton, N. J. —To prevent the marriage of his son, George Hososky today caused the arrest of seventeen year old John Husosky. The father says that when the boy obtained a marriage license he gave his age as twenty-one, when he is only seventeen.

The boy was held in $300 bail. This was furnished by the father of his finance. She is fifteen year old Mary Blanar, of No. 214 Furnam street.

## CHAMBER OF COMMERCE

*"Fulton First, Last and All the Time"*

An interesting and thoughtful treatise on the value of advertising by one has reaped its benefits, together with some timely suggestions which are of unquestionable value, by George W. Perkins:

"For many years I have been a firm believer in the value of publicity as in a sense, a cure-all for many of the ills in our business and political life. My first experience with publicity and its great value as a business asset was when I was connected with the New York Life Insurance company. During my young manhood, while with the field force of the Agency Department of that Company, the practice of all life insurance companies was to give their policyholders, their agents and the public generally just as little information as they possibly could. The idea was to conceal everything as nearl yas possible, on the theory that their competitors would find out something that would be to the competitors' advantage. This practice, as a matter of fact, often led the management of life insurance companies to cover up mistakes in their internal management an daccounts, and transactions that were often worse then mistakes. This practice naturally caused them to drift into the habit of doing this because under their secret practices and lack of publicity the chances were that no one would find out the mistakes and wrong doing. Of course, under such a system some improper transaction would come to light every once in a while and there would be a great turmoil and exposure, with the result that the life insurance business generally would be injured because of the distrust and uncertainty engendered in the public mind as to the exact standing of the companies or the business methods employed.

"As I worked up through the different departments of the New York Life Insurance company until I became one of its Vice Presidents, a group of men, headed by John A. McCall, President of the New York Life, found themselves in accord as to the desirability of complete publicity in the affairs of the company, and step by step, in a few years, the New York Life came to adopt a system of absolute and complete publicity in its affairs. Its policy contract was simplified: it was freed of all legal and complicated phraseology and became a document so simply worded that the holder of a policy did not need a lawyer to interpret it and detect catch phrases. The Company's annual statement became complete in all its details as to assets, expenditures, reserves and liabilities. It was printed in full in the newspapers and it was issued in full in pamphlet for many a copy sent to each policyholder for his information and to each agent for his use as a canvassing document with which to secure new business. The step was revolutionary. For some time the other companies fought it, and we in the New York Life were regarded as a set of madmen; but almost immediately the change in the company's practice brought its reward in a largely increased new business, and the business of the New York Life grew so rapidly that other companies, one by one, were forced to follow, in whole or in part, the New York Life's example of complete publicity.

"The adoption ofa policy of complete publicity was not only beneficial in securing new business but it showed results at once in the financial management and every other branch of the company's affairs; for every man, in every department, realized every day that his transactions were bound to become public; that the company's investments, whatever their character, must be scheduled item by item at the end of each year and exposed to the scrutiny of the entire world.

"The more I have studied, worked with and seen the results of full, frank and complete publicity the more I have come to believe that it is almost a cure-all for many of our modern business ills. I firmly believe that all our people as a whole want or ask is a fair, square deal. They do not expect Managers of business concerns or leaders of political parties to be infallible; they know they are human and liable to make mistakes; but the people want to know how their business managers and political leaders handle the affairs entrusted to them.

"So far as complete publicity has been practiced in our large industrial corporations it has been equally successful.

"I stand for and believe in publicity—full, frank complete."

The man behind the times is naturally a knocker. Nothing looks good from behind.

## DAIRYMEN ENCOURAGED BY W. J. PEACH'S PROMISE TO INCREASE MILK RATES

Dairymen in the viicnity of Fulton are aroused to the situation confronting Mr. William J. Peach, of Pulaski, whose efforts to locate at the old station, in Erie st., hinge upon whether the country's leading dealer will be able to secure enough of the dairy product to make it worth while to come here. At the time of the last meeting of the Dairymen's Associatiaon, held in the Chamber of Commerce rooms, Mr. Peach made it known emphatically that he would not come to this city to operate unless he could be assured on this one point. The dairymen responded to the objections by informing Mr. Peach that were their brethren in business to learn that the old station would resume its activity milk would be forthcoming enough and some to spare. At the same meeting the question of price was discussed, with the result that the dairymen were assured they would be paid the same rate collected by the dairymen who sell to Mr. Peach at his Pulaski station. This news provides a source of great satisfaction to local milk sellers, as thep rices prevailing here during 1915 were consciderably lower than in Pulaski.

By way of comparison the following table of milk prices as furnished The Evening Times, by Mr. Peach, and which were received by his customers at Pulaski in 1915, show what may be expected providing thel local station is reopened:

Grade B—January 1, 1915, $1.80; Jan. 16-31, $1.75; February 1, $1.75; February 16-28, $1.70; March 1, $1.60; March 16-31, $1.55; April 1-30, $1.40; May 1-31, $1.50; June 1-30, $140; July 1-31, $1.45; August 1-31, $1.60; September 1-30, $1.60; October 1-31, $1.60; November 1-30, $1.70; December 1-31, $1.90.

The old milk station in Erie st., would, if reopened, become one of Fulton's leading industries. General regret is expressed that the station has not been marked as a successful issue, as the place is described by Mr. Peach as one of the best in the State.

## TEUTON'S OBJECT TO SALE OF GRAIN; RUMANIA ARMY IS MOBILIZED

London—Austin West telegraphs from Milan to the Daily Chronicle:

The Austrian and German governments have notified Roumania that the sale of 80,000 wagon loads of grain to England and the election of two irredentists to the Roumanian Parliament from Transylvania are acts hostile to the Central Powers, which will take measures accordingly.

Roumania has replied that the sale of the grain was justified in the interest of the country, and that the election of the irredentists is a matter involving the sovereignty of the people, which cannot be discussed.

The Roumanian army, fully mobilized, is now facing the Austro-Hungarians, some of their trenches being only fifty yards apart.

The government monopoly of the export of wheat from India, which was originally intended to extend through the fiscal year ending March 31, will be continued indefinitely, probably to the end of the war, it was announced today.

The results of them onopoly are stated to have been entirely satisfactory, the net profit to the government of India from the experiment thus far having been about $650,000.

The Times states that the monopoly has been a considerable factor in holding down the price of bread in Great Britain, the entire amount of Indian wheat exported reaching a value to the end of October of $28,000,00 0and representing a quantity sufficient to provide four weeks' consumption of the United Kingdom. Meanwhile the Indian producer received an excellent price for his crop, with a minimum speculative activity.

BUSINESS—Particularly the most desirable business—is very much like the sport of fishing. You can catch it if you use good bait. The Evening Times offers you the correct bait.

## 45—PHONE NEWS ITEMS—45

Monday, February 7, 1916

A Chicago alderman has the frankness to avow publicly what has long been apparent to thoughtful observers as to the cause of congestion among the unemployed in cities. He says that it is due to cheap food and cheap rent, which attract all sorts of shiftless persons, vagrants and ne'er-do-wells. The presence of these classes in large numbers is a detriment to the honest workmen, who would be employed if they could find work. Cheap food and cheap rent are a boon to the struggling mass, and governments have no right arbitrarily to interfere with the matter. In the domain of sanitary food and housing, however, the authorities may interfere and insist upon a certain degree of decency in living. Neither hovels nor anything approaching them in the way of garrets and cellar rooms should be tolerated on the grounds of health and morals. In new construction the problem is comparatively easy, but the sanitary room is expensive, and life in the up to date tenement can be sustained only by the industrious and thrifty. Congestion is an evil of cities that cannot be too rigorously attacked for the good of all concerned.

With the Sixty-fourth congress in harness and facing a long and more or less stormy session; with an exciting presidential campaign looming large, promising distracting and vexatious political turmoil; with the convulsions of the most gigantic, destructive and costly war the world has ever witnessed shaking the very foundations of the thrones of the eastern hemisphere; with this same war, despite the rumors of peace proposals that come and go, apparently far from its finish, the outlook seems to be that the year 1916 will be a most strenuous and historic era. It may give birth to startling events that will add another chapter to the "staggering of humanity," or it may be that reason will resume its sway and the war madness pass away. Let us breathe the fervent hope that its closing may be more promising for the peace, happiness and prosperity of the world and its troubled peoples than its opening would seem to warrant.

It comes as a welcome relief to business men of the country that the department of justice intimates that it doesn't contemplate any ill advised prosecutions and would overlook the faults of a suspected concern if the latter were willing to change its ways. Without a doubt it is the duty of the law to prevent violations as well as punish the evildoers. Business is still in its infancy, and infants must be told when they go wrong and be set right. In the past the trouble has been that the officers of the government didn't give any real assistance to business.

It is worthy of note that the cost to shipping by the stoppage of the Panama canal by the dirt slides is much greater now than in normal times, because ocean bottoms are at a premium, and every day's delay represents a real loss to shipowners. The dirt slides must be [illegible] So why should you and I be impatient? Let nature take its course.

Although the savage war in Europe is [illegible] possible exception of [illegible]

Sci[illegible] in this war, not senti[illegible] as we may judge by the fact that not a patriotic melody of consequence has developed since "Tipperary."

## WHY TALK ON THE CORNER?

After all that has been accomplished by the Chamber of Commerce during the few weeks of its existence under an efficient head, there are men who maneuver their forces around street corners, in stores, in offices, or wherever men are wont to congregate, telling us that the task of pulling Fulton out of a hole is like marching a body of troops on paper.

We have heard old soldiers of the Civil War say that the greatest lesson they learned was to know that marching troops on paper and the actual march were two very different things. Old soldiers know that the battles fought at home over well-filled meal tables, without the hindrances established by an enemy, require more of men than can be printed on paper. It is hard for the corner store soldier to realize what it means to fight, march and maneuver up and down hill, through mud and rain, sleet and snow, in the face of a keen-eyed, energetic opposing foe. Yet men have been found by the thousands ready and willing to leave the front of an illustrated daily newspaper, to fight for the destinies of the human race. There Feeling that it is o ur duty to prepare ourselves to give whatever is no commercialism in that. It is duty first, last and all the time force we have to the uttermost, not shrinking from sacrifices nor daunted by difficulties, we become more than mere drizzlers of words in corner store battles. We forget such things as failures, which could be at all times avoided if men would only stop trying Also, lots of successes would be missed.

What if we do make failures? They are only stepping stones to success. Failures are the result of mistakes made by men and women The Chamber of Commerce has made mistakes, but no more than the maneuverer of corner soldiers. Think of the man, 86 years old who sold for a large sum of money an invention which he had perfected only after making three hundred models. Two hundred ninety-nine failures to one success! Is not the incident enough to convince one that, after all, it is intelligent perseverance that wins? The old man must have carried the right thought. He did not move his forces on paper. His intelligence spurred him on— and he won out.

Oh ye pessimists and ye rebels against the things that are meant for the greatest good for the greatest number, will you not see that the intelligent perservance which is now a force working in and through the Chamber of Commerce will make of you ultimately a mere drizzler of a citizen?

## THE CORRECT IDEA

One of the really great men of the U. S. Senate is John Sharp Williams of Mississippi. He is a scholar, a thinker, a statesman. Educationally he is in close proximity to the top of the ladder. As a reasoner he has few, if any superiors in either branch of our national legislature.

On the subject of preparedness for national defense—not aggression, bear in mind—he is in full accord with sane, sober public sentiment. In a recent address he said: "We want adequate preparations for defense. Mark you, nothing else. An army may be a preparation for defense but it may also be a temptation to attack an enemy. I see no reason to spend money upon land forces, with the exception of trained and equipped officers who will be competent to train soldiers. To do this if necessary there should be more schools like West Point and Annapolis and courses for officers should be made a part of the curriculum of the state universities.

"I would guard every dollar of money spent upon the army and put more into the navy. I have repented of my little navy view. Our navy would be our first line of defense. If strong enough it would be our sufficient line of defense. I would have the second navy in the world. The second because it might shortly grow to be first." However, Senator Williams thought that it would be quite safe to have England with the first navy as we were most unlikely to ever have trouble with that country.

In closing Senator Williams said: "I would have a prayer for us that we may not be so weak as to be trampled upon or oppressed, and that we may not be so strong as to trample upon or oppress." Guided by sentiments like these it is hardly to be apprehended that Congress will be tempted to go to extremes in the matter of "preparedness." The great body of the American people don't favor either recklessness or extravagance. They want Congress to first make sure of being right—then go ahead. Jingoism must not be permitted to have sway. It is a dangerous ailment of the body politic. It needs constant watching. Greed and jingoism are very closely related. Mere allusion to that fact ought to put the people on the alert.—By John B. Stoll, South Bend, Ind.

## Our Washington Letter

SPECIAL CORRESPONDENCE

Washington—"I am satisfied that there are about 75 Democrats in the House who will not vote for the preparedness program of the President," said a Southern member who is bitterly opposed to the scheme. "I think the number of opponents is on the increase, as they hear from the folks back home. If the President has any idea that his program is going through, he is doomed to disappointment, for unless he can get the Republicans to get behind his policy in this respect, it is a goner."

* * *

"This administration is going to hear from the farmers next November," said Iowa member of Congress. "The way the Post Office Department has handed it to the people in the rural districts of our state and many others throughout the country, has aroused intense indignation and disgust with the present method of running things. The curtailment of rural delivery and even abandonment of it in some sections, has stirred the people of the sparsely settled localities. They are going to take no chances of a continuation of this policy. They tell us at the Department that these complaints come only from rural carriers who are out of a job, or who have been given more mileage to travel, but I know differently. The protests that I as well as other members of Congress get, are from the people who have had their mail facilities crippled annd curtailed."

* * *

Re presentative Bailey of Pennsylvania, a thick-and thin supporter of Bry... and himself a fighter from Fightville, makes no attempt to minimize the gravity of the situation in the Democratic party which has been brought on by Wilson's desertion—as the Bryan men term it—of the sacred cause of peace. Mr. Bailey expects Bryan to trail Wilson's "swing around the circle" and to emphasize the difficulties which have arisen between the President and the man who made him; and he looks for serious ruptures in the Democratic part yas a result of the Wilson-Bryan controversy. "The real trouble," he says, " will come when Congress undertakes the task of providing the revenues necessary for paying the expense of this military program. Then there will be more hell around this Capitol than you have ever seen here."

Mr. Bailey's language is not what one would expect to drip from the lips of an apostle of peace, but the accuracy of his prediction cannot be questioned. We cannot build a fleet and increase the army with the mythical balances which Secretary McAdoo's facile pen has written into the Daily Treasury Statement. The hard-hearted shipbuilders and ammunition makers will demand real money for their goods; and even if the ships are built in government navy yards it will take something beside stage money to pay the bills. Mr. Bailey can easily foresee hell at the Capitol, but nobody can foresee money in the Treasury.

## Opinions

### FIFTY MILLIONS FOR SHIPS

"I am not what I am," said Iago. Likewise the administration's new shipping bill is not what it is. The bill fathered last year by President Wilson and Secretary McAdoo provided for government ownership and operation of merchant vessels in competition with private owners. It was a clear-cut application of the theory of state socialism. It was passed by a Democratic House and defeated in a Democratic Senate Mr. Wilson said that the Senate in defeating it misrepresented the people. Yet with the House still Democratic and the Senate more Democratic than it was last year, the administration [illegible] federal treasury [illegible] merchant ships [illegible] the government is to do with these ships after it gets them is left in the shadow. They are to constitute an auxiliary fleet for naval use. They may be leased or resold to private shipping companies. They may even be operated by the government as ordinary freighters. All these details are slurred over and left to the discretion of a shipping board which is, besides, to take over the duty of regulating interstate and foreign commerce by water, now performed by the Interstate Commerce Commission.—N. Y. Tribune.

### DIDN'T TELL THE WIFE

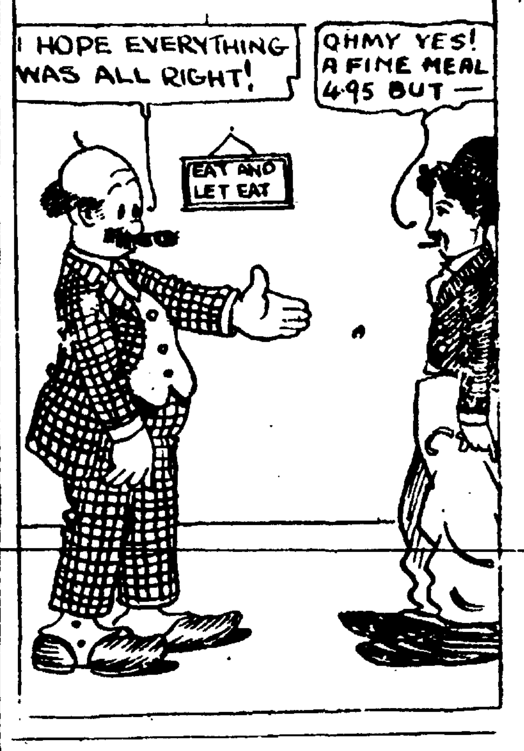
An interesting entry in the absent-minded contest is submitted by the Shelby Globe. C. E. Kingsboro, the prominent wool gatherer of that centre of population, it seems, started off the other morning under instructions to mail an important letter, which he held tightly in his left hand [illegible] not to forget it. Well [illegible] came surging back to him.

A prominent friend happened to come along at this very moment, and Mr. Kingsboro, not seeing any reason why he should walk all the way back to the postoffice as long as the prominent friend was going that way anyway, intrusted the missive to him with the most explicit warning as to promptitude in posting. The next day the two friends chanced to meet again and Mr. Kingsboro was somewhat annoyed to note that the letter had been forgotten once more and was still being carried around as if it had been a permanent institution.

Seizing it with a word or two of scorn for a person who can't remember anything, Mr. Kingsboro strode a full half mile to the postoffice and after walking up and down before that imposing structure for a time thinking hard, finally succeeded in recalling his errand and, what is more actually accomplishing it. Mr Kingsboro later made something of a joke of the experience, speaking of it rather freely with prominent conferers, each of whom he warned however, not to mention the matter to Mrs. Kingsboro.

"I have never believed," said he in his dry way, "in discussing one's business affairs with one's wife."—Ohio State Journal.

Charley Likes the Meal All Right



## OPINIONS OF STATE EDITORS

Partisanship is a good thing in government. It accepts responsibility. It can be called to account. The evils of government come from those who prefers no party affiliations and trade on both sides and from those who rating themselves partisan deal and dicker with the other side. With party lines drawn strong very little that is bad can be accomplished. When Democrats and Republicans reach an amicable understanding it is a good idea to watch out for the personal advantage of both.—Watertown Standard.

* * *

Mayor Mitchell is still talking for Home Rule. Yet if the State of New York had been financed as poorly as the metropolis during the Mitchell administration the rural legislators, to whose supervision of city affairs the Mayor objects, would have been damned from Niagara Falls to Montauk Point.—Jamestown Post.

* * *

When Mr. Wilson was elected in 1912, of the thirty-two Congressmen from New England, eighteen were Democrats and fourteen were Republicans. In the elections of 1914, New England elected twenty-six Republicans and six Democrats. The Republicans gained four in Massachusetts, five in Connecticut, two in New Hampshire and one in Rhode Island The industrial east is expected to approve Republicanism and protection even more emphatically in 1916. —Newburgh Journal.

* * *

Today we are face to face with a crisis that a firm hand, not benumbered with an elegant epistolary habit, would have crushed months ago. The one shining glory of Mr. Wilson's patriotic utterances today is that they are just sixteen months too late.—Cohoes Republican.

* * *

Every year new men gather at the Capitol to make laws for the state. It is true that among them are many veterans, but it also is true that there are many new legislators, totally unaccustomed to their duties. Under these circumstances a "short, snappy session" would result in a considerable addition to the already sufficient [illegible] of half baked legislation.—Buffalo News.

## TALES OF TURKISH NERVE.

**They Take a Chance With Death Just For the Sport of the Thing, While the Germans Are More Cautious—How Aviator Fooled British and Attacked Vessel.**

"Humors of War In the Air" is the subject of an interesting article in the Daily Express by Mr. C. M. Grey, editor of the Aeroplane, in which he narrates an aviator's version of the old farce "Box and Cox" and some incidents of Turkish "cheek."

"A story that appeared in a Turkish communique the other day relating how a Turkish aviator dropped bombs near one of the allies' cruisers and caused her to change her course, after which he attacked a destroyer with his machine gun," he writes, "is probably something of an exaggeration, but it would be quite a mistake to put it down as an absolute fabrication because people who have returned from the Dardanelles have quite a high opinion of the Turks as fighting men and even respect their aviators. The Turkish communique refers to the aviator as a Turk, but the pilots of the Turkish aeroplanes have been Germans chiefly.

"There is one incident, however, related to me by an officer who has just returned from Gallipoli of which the hero was more likely to have been a Turk than a German, for the German, although he may on occasion fight quite well, does not apparently believe in taking chances purely as a sport.

**The Diving Aeroplane.**

"One night when things were fairly calm both in the air and on the ground the sound of an aeroplane engine was heard approaching the British lines. It drew nearer and nearer, and it was evident from the sound that the aviator was flying very low. Suddenly he appeared over a certain part of the British camp so low that he could have been hit with a revolver if anybody had seen him in time. As he went he dropped several bombs, which did no particular harm. Half a dozen officers rushed out of their tents and began firing at him. The sound of his engine stopped, and his machine was seen to throw up its tail and dive down over the cliff at the edge of the plateau on which the camp stood.

"Everybody thought he had been hit and had fallen into the sea or on the sand just over the cliff edge. Much to their surprise, a few seconds afterward his engine was heard running again, and a minute or so later there was a burst of firing a mile or two out at sea.

"Next morning a destroyer came in and said that, hearing the noise of bombs in the camp, some of the officers had come up on deck and were looking up at the shore when suddenly an aeroplane dived off the cliff, flew straight at them almost level with the water and as it passed them raked them from end to end with a machine gun.

"The seaplane pilots also have their humorous incidents. Some little time ago one of the smaller seaplanes was getting off the water when a wave struck it, and it turned over on one side and dived head first.

**A Grim Joke.**

"As the machine struck the water the passenger was thrown clear, but the pilot, who stuck to his lever, went under with the machine and was more or less trapped. The passenger naturally came up first and, not seeing the pilot, took a long breath and dived under the wreck to his help. Meantime the pilot, having freed himself from the machine, came up to find himself under one of the wings. He worked along this till he got to the edge and came to the surface apparently just about a second after the passenger had dived. Not seeing the passenger he also took a deep breath and dived to rescue the passenger.

"By this time the passenger had reached the limit of his diving capacity and came up again for breath after the pilot had again disappeared. After again taking in fresh air he dived for the pilot just as the pilot came to the surface for the second time only to find that his passenger was still apparently in the wreck. In this way each of them dived four or five times until finally one of them came to the conclusion that the other must by this time have been drowned, so he sat on one of the floats to wait mournfully till he was picked up by one of the boats which was coming out from the shore.

"A second or two afterward up came the other officer, also convinced that his friend was dead. Each was naturally surprised at the wonderful capacity of the other for stopping under water till explanations made clear what had happened, after which they both nearly fell into the sea again laughing at one another."

**Bridge Twenty-one Miles Long.**

Engineers have pronounced practical the scheme of building a bridge connecting the island of Ceylon with the mainland. The distance is twenty-one miles, and the foundation will be a rocky reef known as Adam's Bridge.

# RED TAPE IN JAPAN

## They Have as Fine a Brand There as We Have Ourselves.

## BUT IT IS NOT VERY COSTLY.

**An Experience With the Circumlocution Office That Would Have Been Amusing to the Innocent Victim but For the Dread of the Expense.**

There are many curious customs in Japan, and many things are done in that interesting empire according to methods that would be called topsy turvy when judged by the standards of civilization in western lands. But in one respect the Japanese are fully abreast of any of the occidental countries, and that is in their ability to manipulate official red tape. The following incident, recounted by a correspondent of the Youth's Companion, admirably illustrates the point. He writes:

"Although I have lived long in Japan, I have tried to keep pace with western ideas. A corner in my compound bears witness to the fact that I once tried to make practical application of the modern maxim 'Help the poor to help themselves.' It worked out in a rather surprising way. A beggar asked me for money one morning, and I saw a way to help him without, as the expression goes, 'pauperizing' him.

"There was a bad place just inside the compound gate that needed to be filled in with stones, of which there were plenty on the seashore near by. Here was a man who could transfer the stones to the compound for the 30 sen (15 cents) that he had asked of me. The man fell in with the plan cheerfully and set to work.

"The job was about completed to his satisfaction and mine when a policeman, who appeared on the scene, asked my man if he had received permission to remove the stones. The workman referred the officer to me, and I had to confess that I had not thought it necessary. Evidently the officer thought otherwise, for I was politely but firmly told that I might secure a permit by applying at the city hall.

"To the city hall I went, knowing that it is not wise to trifle with the regulations of the police department. From there I was referred to the provincial building. As I was personally known to the governor of the province, I sent my card into him, only to learn that he was absent. The lieutenant governor, however, said he would be glad to receive me. That courteous gentleman was going to pass the whole thing by, but thought it well first to speak of it to the department of public works.

"Now, the department of public works had an efficient head, who believed in letting nothing go at loose ends. He announced that I must fill in a certain form in duplicate, making formal application for the stones. Then two maps would have to be drawn showing where the stones had been found and the place to which I wished to remove them.

"The board of public works stood ready to make the maps—at my expense. There was nothing to do except to agree to this arrangement, since I had already had the stones moved. I thanked the lieutenant governor for his assistance and withdrew.

"In a day or two a messenger came with the maps and forms requiring my signature. After that they were sent to the city hall. Then another messenger took them to the governor for his signature. One set was filed at the city hall and the other at the office of the executive.

"In due time notification came by special messenger that I was permitted to remove the stones which every one knew I had done a week before. All that prevented me from thoroughly enjoying the whole affair was the thought of the bill that I should receive from the department of public works.

"After several weeks of suspense I was notified to appear before the treasurer, at city hall, to pay my indebtedness to the municipality. Armed with my bank book, I appeared at city hall. What was my surprise and relief to find that the bill for all this red tape and infinite trouble amounted to 11 sen, equal to about 5½ cents in good American money."

# MARINES RESPECTED ANTHEM

**But Were Forcibly Ejected From Theater When They Stood Up.**

Washington.—Because they insisted on standing up while the "Star Spangled Banner" was being played and refused to sit down when ordered to do so by persons in the rear two privates of the United States marine corps, in full uniform, were forcibly ejected from a local motion picture theater.

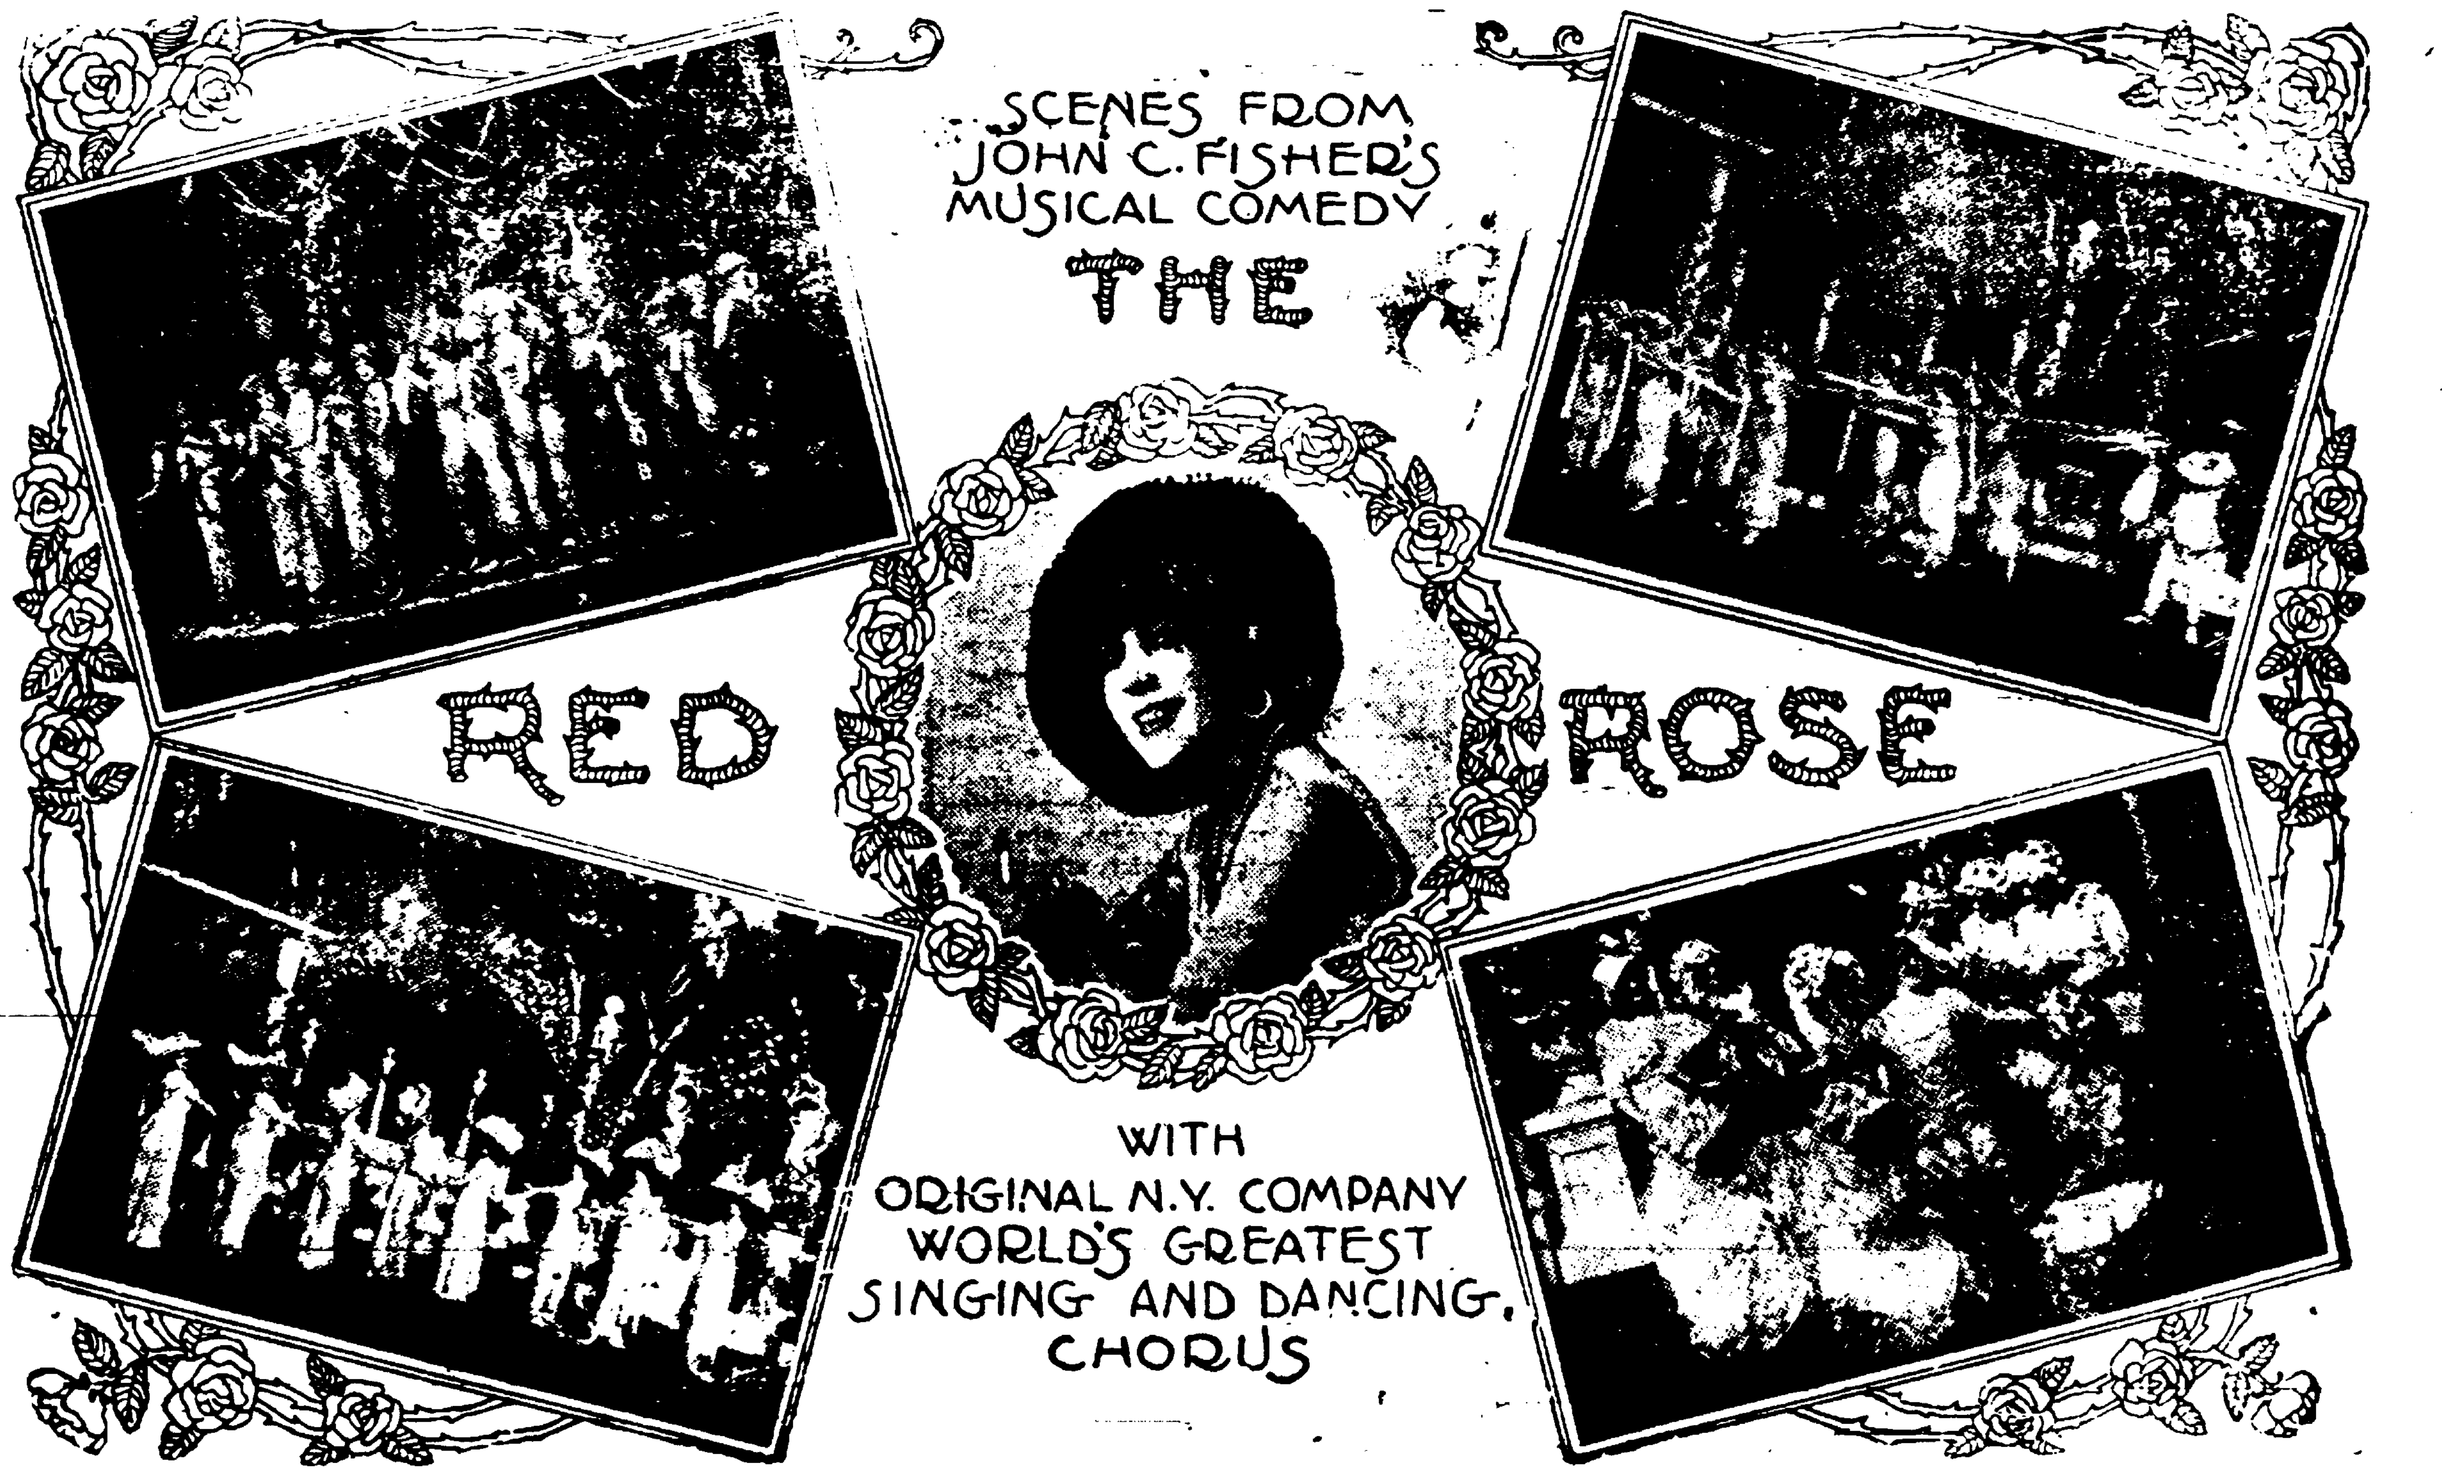
A recent ruling by a justice of the District supreme court gives the management of a theater the right to eject patrons under similar circumstances, and no official protest by the marine corps authorities will result.

**Aged Shakers Alone.**

Lexington, Ky.—Four elderly and infirm persons are the only occupants of the immensely valuable Shaker settlement, one of the few remaining colonies near here. Sisters Christine Johnson, eighty-four, and Martha Olson, eighty-seven, died recently within an hour of each other.

**PLAY THE GAME.**

Play the game! We are not here to whine and complain, to stay down because we are knocked down, to blame the inequalities of the ground or the unfairness of the umpire. Where there are no difficulties there can be no victories. We are here to win, if we can, in every condition that confronts us, to do our best in any case, and to do it to the end.



Here's a Big Musical Comedy Coming to the Quirk Theatre, Next Friday Night, That's Really Worth While

# GRAND LODGE OF ODD FELLOWS

## Will Meet in Buffalo in August---All Lodges to Participate.

Buffalo—The grand lodge of the state of New York, Independent Order of Odd Fellows, will hold a grand lodge session in Buffalo in August. The Odd Fellows' lodges of Buffalo and Erie county, consisting of more than 12,000 members, have each appointed a committee of three to arrange for the session and entertainment of the officers and members. The committe, is known as the grand lodge entertainment committee and is meeting regularly at fraternity hall for the purpose of making arrangements. The officers are: President Edward E, Lewis, Vice President W. Tyler, Secretary Walter P. Dietzer and Treasurer Ferdinand F. Lansill.

The committee will entertain the grand lodge in splendid style and entirely at the expense of the lodges Each subordinate lodge, of which there are 50 in the county, has consented to contribute a pro-rata share of the expense. The business men of the city of the members will not be called upon to contribute a penny for advertising programs, donations, or other means usually used in raising funds. The Odd Fellows feel that they have sufficient funds to pay the expense. The business men, however, will be requested to assist in the way of decorating their places of business during the convention. A big parade will be held during the convention week in which all the lodges will participate with the Cantons or militant branch of the order.

Buffalo has been honored this year by the Odd Fellows, in that it has the present grand master of the state, George E. Judge, the grand patriarch of the state of the encampment branch, Francis W. Bagot, and also the grand marshals of both branches of the order. It is in their honor that the Odd Fellows of this city will make a special effort for the entertainment of the grand lodge.

# SHORT WEIGHT SCALE IS NEAT

The County Sealer, C. E. Bulson, of Jefferson County has in his possession a scale, taken from a junk dealer, that is unique in its method of short weight and is a ready money-maker for the owner. The scale is of the hand variety, the material to be weighed being held by a hook which operates on the dial pointer. From the front, as seen by the customer, the scale appears in good condition, but the removal of a rivet near the top and at the back permits the handle to operate on the weighing device in such a manner that a heft of five pounds is necessary before the scale records any weight whatever.

It is said that the junk dealer, who was also equipped with proper scales inspected and certified, used the short weight device only where 35 or 40 pounds were to be weighed. The scale capacity is 50 pounds. The dealer bought much copper, and it was in this that the scale is supposed to have been used. Copper brings 19 cents and in a 35-pound transaction the purchaser would make 95 cents by using it.

Both County Sealer Bulson and City Sealer Martell agree that junk dealers are often slick on short-weighing scales. Some of them carry improper scales, such as that confiscated by Sealer Bulson, as well as correct weighing machines and employ the short weighers where a favorable opportunity presents itself.

Sealer Bulson searched the particular junk dealer's equipment, when he found the scale to which allusion is made. Owing to the fact that the sealer wasu nable to catch the man operating the scale, no criminal prosecution was attempted.

Leave orders for Miss Crysler's Baking with Mrs. J. K. Steele. Phone 378. adv

## LADIES' AID OF VOLNEY CENTER TO ENTERTAIN

A valentine social and supper, with every known fixin', will be given by the Ladies' Aid Society of Volney Center, in the town hall, Friday evening. Immediately after supper has been served an hour of two will be consumed in presenting a good program of music and literary selections.

## ROCHESTER TO HOLD MEET OF AEROPLANES

Rochester—Models, not of the sort one reads about in stories of Parisian life, but of biplanes and monoplanes such as help to protect the city in which models pose, will flit about at the will of aviators on the ground at an indoor meet to be given soon by the Rochester Model Aero Club. It probably will be held in one of the large Exposition Park buildings. February 19th or the first Saturday in March is the date desired.

This will be the first indoor meet held by the Rochester Model Aero Club, for were the club a child it would still lack teeth. In the summer an outdoor meet was held, and many persons gathered to watch the mechanical birds fly. When it was considered that the aviator had to manage his machine from a distance, the exhibition was surprising; and the wind at the outdoor meet was not to the liking of the birdmen, either.

## FARM BUREAU INSTITUTES TO BE HELD NEXT WEEK

E. Victor Underwood, manager of Oswego county Farm Bureau, announces the institutes to be held in Grange hall, West Monroe, and in Pennellville, on Feb. 17th and 18th respectively. Mr. Underwood will have as his assistant at these institutes Mr. O. F. Ross, manager of the Oneida county Farm Bureau. The sessions will begin at 10:30 and 1:30 to which a general invitation is extended.

The program will be short and crispy, embracing the following numbers: Lime and its uses; potato growing; feeding and management of the dairy cow; keeping dairy records; farm bureau work for 1916.

## 1915 LICENSE TAGS SHOULD BE "CANNED"

Many old licenses were exhibited on automobiles during last week's motoring days, including yesterday, the occurrence being explained by the fact that many car owners were enticed by the recent fine weather to bring forth machines prior to the arrival of the new tags, or in some instances, to their tardiness to secure the new plates. An officer of the local Automobile Club issues a warning that the display of last year's tag is illegal, therefore club members who violate the law should not expect protection in the event of being arrested.

## FIRST LINCOLN BIRTHDAY CELEBRATION ANNOUNCED

Lower Oswego Falls Grange is first in the field to announce a local observance of the Great Emancipator's birthday anniversary. The grange will provide one of its famous suppers in the East 1st st. hall Saturday evening, February 12, from 5 to 8 o'clock.

## FORMER FULTON PASTOR TO GO TO VERMONT

It has been announced that the Rev. B. J. Lehigh, former pastor of the Baptist church in this city, and more recently pastor of the First Baptist church, Oswego, has received a call from one of the largest churches in Barre, Vt.

## WOODMEN ASSURRED OF RUNNING EXCURSION

At a special meeting of the Modern Woodmen of America, the committee on excursion and class adoption in Syracuse on February 14, have formed plans which assure the success of running a special train on that date.

Neighbor Schaefer was appointed badge committeeman and instructed to secure samples of badges and report at Wednesday's meeting.

It is expected that Fulton Camp will enter about 75 candidates in the class adoption in Syracuse. Sunday the thermometer registered several degrees above the point that indicates warmness. The scouts report that the mercury will go far above the 100 degree mark which is required by the committee. Neighbor Palmer, one of the committee leads with the most favorable report.

## ATHLETIC CLUB TO HOLD WRESTLING MATCH

The recently organized Independent Athletic Club will stage its first public show at Church's Hall on next Monday night, the program consisting entirely of wrestling matches.

The Chief of Police of East Rochester will oppose 'Iron Neck" Mott in the Main event for a side purse of $100. "Young Tunk", of this city will have as an opponent George Chip, of Oswego. A purse of $25 is placed on this bout, while a purse of $10.00 is placed on the third event, a match between Tony Ryan of this city and Fred Parsons of Minetto.

The three matches will be referred by Fred Stewart. The winner of each is to score the best two out of three falls with no time limit attached.

## HOBSON WILL SPEAK IN OSWEGO NEXT WEEK

Captain Richmond Pearson Hobson, who meant well enough when he and two companions succeeded in sinking an old hulk at the mouth of Santiago harbor, during the war with Spain, but failed to bottle up Admiral Cervera's fleet, is coming to Oswego on February 16th, to wage a bottling up campaign against the "Destroyer of Destroyers," as the brave captain terms intoxicating liquor.

## THE QUIRK TODAY

The name of Jose Collins inevitably recalls that of her celebrated mother, Lottie Collins ,who made a world-wide reputation in vaudeville theatres of the English-speaking world. Jose has done her distinguished parentage the utmost credit, for she has earned fame as a light opera star, and now appears before the world for the first time as a motion picture artist in the World Film Corporation's motion picture on Douglas Murray's successful play "The Impostor."

Miss Collins plays the part of "The Tearer," a wild gypsy girl, who marries a man who impersonates his dead brother. The dual role is in the hands of Alec B. Francis.

This is the seconnd production for World Film of M. Capellani, the famous French director, who produced "The Face in the Moonlight," in which Robert Warwick is starred, a thrilling dramatic success, also on a dual role theme. The story is powerful and exciting, and holds from beginning to end. The acting is very intense and convincing, and the film makes a thoroughly sound offering which will please all patrons of the movies.

## DAUGHTERS OF LIBERTY HONORED MRS. HUBBARD

At the same time that the funeral services for Mrs. Mary Hubbard were being conducted yesterday afternoon, the Daughters of Liberty, of which order Mrs. Hubbard was a member, held services, Councilor Jennie Davis delivering an address followed by the funeral ode by Sister Jennie Lester

The body was taken from the family residence, 303 S. 2nd st., this morning to North Syracuse, where burial will be made.

The card party which was scheduled to take place at the home of Mrs. Ellen Anderson on Friday night, at which the members of the Daughters of Liberty were to be the guests, was postponed indefinitely due to Mrs. Hubbard's death.

# SUNDAY NEWS BOILED DOWN

Mrs. Elizabeth F. Mohr was acquited Saturday night by a jury in the Superior Court of a charge of having instigated them urder of her husband, Dr. C. Franklin Mohr. C. Victor Brown and Henry H. Spellman, negroes, accussed of the actual killing, were found guilty. The jury reported at 6:07 o'clock after having been out since 10:15 o'clock in the morning.

* * *

The German raider which captured the British steamship Appam was the Pongo, according to Captain H. G. Harrison, former master of the Appam, who reached New York Saturday from Norfolk on the steamship Hamilton. With Captain Harrison wereh is officers and crew numbering 150 who probably will be sent to England on the White Star liner Baltic.

* * *

Geroldine Farrar, famous Metropolitan Opera Star, and Lou Tellegen, actor, will be married in New York tomorrow. The announcement was made Saturday coupled with the statement that this time there would be no denial by Miss Farrar's family. Miss Farrar has often-declared that she would not wed until she was 40. She has asserted that her husband would be an American and has ridiculed reports that she was marry duke or prince or tenor, notably Scotti, who sang Baron Scarpin to her Tosca. Yet she is to wed before she is 40 and her choice is not an American.

Miss Farrar will be 32 February 27th. Lou Tellegen is Holland born. His father was a Greek, his mother French. He is 29.

* * *

An offer of five cents a piece for 100,000 cast-off railroad ties was received by the Boston & Maine railroad from the British government. Formerly the railroad burned all its old ties, but orders were sent throughout the system directing that they be saved.

* * *

Bare toes on the stage are proper, but any bareness above the very lowest part of the ankles is contrary to the Boston Mayor's standard of morality.

For this reason, although the city's board of censors has decided to take no action in regard to the Russian ballet at the Boston Opera House, John M. Casey, chief license clerk has been instructed to request the ballet management to cover whatever bareness exists on the lower limbs above the ankles of any of the persons in the ballet.

# TAKING CENSUS OF AGRICULTURE

## School Children Doing the Work Covering Farm Products of New York---Two More Coming.

Children in the rural district schools all over the state are now taking a census of the farms of New York under a plan formulated by the State Agricultural and State Education departments. There are about 500,000 school children in the rural districts in this state, and upon them is placed the work of collecting information as to how many horses there are in active service, the number of cattle on farms, the quantity of grain, hay, fruit and vegetables produced, and the state's agricultural resources generally during 1915.

The agricultural census began last Tuesday and is expected to be completed by February 15th.

The State Commissioner of Agriculture, Charles S. Wilson, in a statement said that the information gathered would be of much benefit not only to the state, but also to the school children who take the census, since it would stimulate their interest in agriculture.

The information will be valuable to the state in showing what the Department of Agriculture ought to doin the way of building up agricultural industries, and in what sections this is most needed. It also is claimed that it will be of benefit to the county bureau agents in planning their work, and to all institutions interested in increasing agricultural production.

**Report in June Proposed**

In June it is proposed to take another census, with the school children as enumerators, and in this way reports on growing crops and the condition of crops or grain, hay, fruit and vegetables will be obtained. On January 1, 1917, a census will be begun on the production of a year in the state. If it shows that in any section an industry is suffering, the department will direct an investigation and will make every effort to furnish what the industry what the industry needs, that it be made to thrive as it should.

The blanks for the present census were received by the children last Wednesday. It was the desire of the Department of Agriculture that the children should return the blanks with the desired information to the district school superintendents not later than February 15th, so that they can be forwarded to the department. As so many school children are engaged in the work and are expected to take pride in doing it accurately and quickly it is expected that the census will be completed before the 15th.

**Hope to Make System Permanent**

With regard to the census, a circular letter to the school teachers and principals says:

The population of the cities and a large proportion of the villages in the state has been increasing much faster than that of the rural districts, and the state is becoming more and more dependent upon sources beyond its own limits for food products to supply thepeople. The rapid growth and development of the country makes it desirable to have accurate knowledge of all matters pertaining to agriculture oftener than the ten-year period provides, and it is hoped that the experiment of securing such information through the pupils of the public schools of the state will be so successful and so accurate that we can depend upon that source each year for the information desired along that line. Many of the states of the Union provide for taking such a census annually, but the work is performed by enumerators in the employ of the state or other public officials.

In the directions to the district superintendents an dteachers, it is asked that a copy of the blank on which is set down the subjects on which information is desired be written on the school blackboards, so that the children ma ybecome familiar with it.

A state census is taken every five years, but does not include the gathering of date on agricultural industry. The census by the school children covers registered stock, and this is considered a valuable feature.

**MARY THERESA MAHANEY**

Mary Theresa Mahaney, 19, a popular youn gresident of this city, died yesterday afternoon at the family home, in West 6th st. She had been ill since last April.

Besides her parents, Mr. and Mrs. John Mahaney, she is survived by three brothers, William, Edward and Leo, all of this city. She was a devout member of the Church of the Immaculate Conception.

Thef uneral arrangements have not beenm ade.

**EMMA KELSEY**

Emma Kelsey ,three weeks old, died yesterday at the home of her parents, Mr .and Mrs. Ira Kelsey, 414 Worth street.

The funeral will be held tomorrow afternoon at 2:30 o'clock from the home. Rev. J. W. Barrett will officiate.

**THOMAS DODGE**

At Bundy's Crossing yesterday was held the funeral of Thomas Dodge. Rev. Mr. Crawford officiated at the funeral services which were held in the Bundyville M. E. church. Burial was made in Fairview cemetery.

**MRS. BRIDGET O'NEILL DIES IN 104TH YEAR**

Boston — Mrs. Bridget O'Neill, whom Professor Fisher, of Yale, declared to be the most remarkable woman i nthe United States, died tonight in the Chelsea in her 104th year. Until November, when a general breakdown began, she retained all her faculties. Professor Fisher and other college investigators began a study of her several years ago, because of he remarkable vitality.

Her diet particularly interested them. Every morning she had only toast and coffee and at noon a hearty meal and at night a very light repast. For forty years she never ate meat on Wednesday, Friday or Saturday.

She took the pledge from Father Mathew in Ireland when she was twelve years old.

# KNOT WAS NOT TIED

## A Highland Lassie in Our City and Her Gude Mon Could Nae Find Minister.

Can Mayor Lewis perform the wedding ceremony, and if he can will he, were the questions which City Clerk Allen asked himself this afternoon after Nellie Maclaren and John H. McConnell had admitted their inability to find a clergyman to tie the knot.

The two, natives of Scotland, applied for a license early today at the City Clerk's office and after securing the necessary paper left the City Hall with the intention of having the ordeal over with as quickly as possible. Crestfallen, they appeared before Mr. Allen shortly after noon and told him that they were unable to find a minister to perform the ceremony. They had been advised that thhe clergymen of the city were all in attendance at a meeting in Syracuse today. Mr. Allen's efforts to find an official by the use of the telephone proved unavailing. After J. R. Somers, Commissioner of Charities had flatly said "No," the city clerk suggested a visit to the mayor. Mr. Allen is not certain as to his own authority to perform the ceremony, but he did not consult the city charter while the couple were in the office.

"The present week has started out in a business-like way," Mr. Allen stated this afternoon after Kejoti Ywanicki and Mike Klus, both of 405 W. 3rd st., presented themselves at his office for a license.

There were only eight licenses issued during January of this year as compared to 14 in January, 1915, but with a total of five issued already this month, a record is looked forward to. Of course, City Clerk Allen does not expect to average two licenses a day, but one can never tell as this is leap year.

**COLORATURE SOPRANO COMES HERE FEB. 29**

The Schumann Club will be entertained at the home of Mrs. A. I. Morton tonight. A business session will be included in the meeting, when arrangements will be perfected for the evening of music, which will occur Tuesday evening, February 29th.

The attraction for the coming event will be Miss Julia Allen who is a colorature soprana of distinction. She will be heard in a song recital at the First M. E. church, the preceeds to be devoted to the work of the Ladies' Auxiliary of Lee Memorial hospital.

## Community Notes

Mr. George Walker spent the week-end with his daughter at Palermo.

• • •

The City Hall offices will be closed on Saturday in observance of Lincoln's birthday.

• • •

Miss Lucy Kelly of Syracuse has returned to her home after being the guest of Mrs. R. L. McCully of So. 3rd st.

• • •

The regular meeting of the Board of Public Works will take place tonight at City Hall.

• • •

Mr. Merton E. Reynolds, Utica st., left this morning for Danver, Mass., as a representative of the horsemen of this city.

# WE WANT READERS TO KNOW IT

## The Evening Times Has Been Issued More Than 350 Consecutive Days

From the very beginning it was said this could not be done---in Fulton. The city was described to us as a "Ten-,Fifteen-,Twenty-,Twenty-five-,and Thirty-Cent-Town—Nothing Over Thirty Cents."

It has been proven that the *informant was wrong. His estimate was a guesstimate.*

Knowledge of the Daily Newspaper Business is the backing for the foundation of Fulton's First and Only Daily Newspaper—which is destined to become a successful business.

## THE EVENING TIMES

### OF FULTON, N. Y.

Will become sufficiently broad in its scope to meet every need of the people of this vicinity. Why? Because its underlying principle is right. There's no Guesstimating in the assertion. THE FULTON EVENING TIMES is for

*FULTON-- First, Last and All the Time*

### CIVIC PROBLEMS.

One might with good reason question wherein a city profits through its improvements if they injuriously react upon the home life of its people. In our American communities there is an enlarging group of citizens who are finding their environment growing adverse, their homes growing smaller and the free space surrounding such where their children may play under parental oversight more restricted. Our cities are themselves growing larger. The census of 1910 shows an urban increase in population of 34.8 per cent as contrasted with a rural increase of only 11.2 per cent. In keeping with this growth there has gone an increase in urban wealth with enlarged municipal appropriations for public improvements that steadily force up taxes, both because of the cost of such improvements and their reaction on social welfare. Various reasons have been assigned for this. Undoubtedly there should be a greater centralization of authority in the management of municipal affairs which would bring about a better coordination of the subdepartments and produce greater administrative efficiency. — Carl Aronovici in Town Development Magazine.

## CITY AND RURAL MARKETS.

### Advantages of Co-operation In Marketing Farm Products.

The advantages of co-operation in the marketing of farm products are emphasized in the annual report of the office of markets and rural organization of the department of agriculture which has just been published. "The conclusion seems warranted," says the report, "that in communities where co-operation is practically applied to the farmer's business the results obtained are far more satisfactory than those secured by individual methods." It is estimated that farmers' co-operative marketing and purchasing organizations will transact this year a total business amounting to more than $1,400,000,000. Agricultural co-operation in the United States is therefore far more prevalent than is generally believed, but it is not yet upon a sufficiently strong business basis. For this reason the office of markets has studied the various methods employed by these associations and has worked to devise means by which these methods can be perfected. The studies also have included the prevailing methods of marketing perishable products—grain, cotton, cotton seed, live stock and animal products.

Studies have also been made of city markets in order to secure in this way information which may open up outlets for farm products. In this connection the report calls attention to the experimental work in distributing timely market information concerning perishable products. An effort has been made to keep producers informed of arrivals and conditions in the large markets and, on the other hand, to keep dealers informed of shipments from the important producing sections. Strawberries, peaches, tomatoes and cantaloupes were the crops covered in this way during the past season. There is evidence, says the report, that as a result of this service distribution has been improved, glutted markets have been prevented to some extent, total shipments from several districts have been greater than they would have been otherwise, and large bodies of growers have received accurate and disinterested information concerning prevailing conditions in competing producing areas and in distant markets. Several important newspapers have co-operated in this work by publishing these reports.

The work of encouraging the proper preparation of products for market has been continued. The ultimate aim of this campaign of education is the national standardization of market grades and also packages or containers.

Investigation into the problems of transportation and storage has been continued with a view to determining the causes of the great loss of foodstuffs between the producer and the consumer. Experimental shipments by parcel post and express were made during the year with many kinds of fruits and berries, lettuce, milk, butter, eggs, sirup and vegetables. In nearly every case it was found that the success of the shipment depended upon the judgment used in selecting the quality of the product and the type of container.

Another important division of the work of the office for the past year is its rural organization investigations and in particular its study of the problems of rural credit and insurance.

### Young Men For Civic Work.

For the purpose of utilizing the energy and enthusiasm of the young men of New Orleans, La., in behalf of the development of the community a young men's branch of the New Orleans Association of Commerce has been organized. The efforts of this branch of the association will be directed to the training of men at an earlier period than has formerly been the practice in the work of co-operating for the civic and commercial advancement of the community. Operating under a plan which has been worked out with great care, it is anticipated that by this means many trained leaders and workers will be produced within the association

# FOR YOUNG FOLKS.

## Winter Snow Brings Joy to Many Boys and Girls.

## BUILDING A FORT OF SNOW.

**Little New Yorkers Make the Most of Their Opportunities—Things to Guess That Keep Little People Busy. Stories and Games.**

Children of the rich had a great time during the New Year holiday. Ordinarily these little folk do not live in the big city, although that is supposed to be their home.

In the summer they spend most of their days in the country, but when

© by American Press Association.
MASTER HOAGLAND VAN NORDEN.

cold winds blow New York city receives them, and there are splendid opportunities for good times in Central park. The boy in the picture is Master Hoagland Van Norden, son of O. H Van Norden. When a big snowstorm came to New York a short time ago the snow shovelers got busy. Hoagland also got busy. With his little shovel he went to Central park and began the interesting task of building a snow fort. Then along came the camera man and caught him on the film.

### Age of Boy Scouts.

One of the misunderstandings about the boy scout movement is that it is open only to boys between the ages of twelve and eighteen. Twelve years is the minimum age, but eighteen is not the maximum. There is no maximum age at which a boy ceases to be a scout. We have scores of men registered as scouts who are eighteen, nineteen, twenty and even twenty-one years of age.

It is from the ranks of these older boys that our assistant scoutmasters are largely recruited. Within a few years they will develop into a splendid group of trained scoutmasters.

Once a scout, always a scout! — Scouting.

### Music Box—A Game.

In order to play this game each player is given a slip of paper and pencil. Some one sits at the piano and goes briskly through snatches of one air after another, each of the players writing on his slip the name of the air or leaving a blank if he is unable to name it. The one who names the largest number of airs correctly wins.

This is a very good game to use for old songs, such as "Annie Laurie," "Blue Bells of Scotland," as well as the popular airs of the day.

### Boy Scouts Rescue Companion.

Boy scouts after a long and difficult search of the thick forests in the Shawangunk mountains near Port Jervis, N. Y., rescued Harry Taylor, twelve years old, from freezing to death. He was found in the woods with both feet frozen, but recovered under the care of a physician. The snow was very deep, and Taylor, on a hike with companions, became separated from them and lost his way.

### A Riddle.

Whole I am a house for beasts; behead me and I am found in the dining room. Again, I am skillful; transpose me and I am a person found in the old testament; again and I am a bundle of goods.

Answer. — Stable, table, able, Abel, bale.

### Jack's Discovery.

Jack was looking over the dictionary, and once he laughed aloud.

"Why are you laughing?" asked Dot. "Is your book interesting?"

"No, not interesting," answered Jack, "but amusing. It spells words so different from the way I spell them."

### Decapitation.

One is to mix and two to loan,
To lose I sometimes fear.
Three's as a termination known
And wears that meaning here.
Answer—Blend, lend, end.

# A Close Call

By DONALD CHAMBERLIN

During the administration of President Huerta of Mexico I was employed by the United States government to do certain service for the state department. I went by land, crossing the Rio Grande at Laredo and entering Coahuila. I soon fell in with a prominent leader of the rebel forces, who, after I had satisfied him that my mission was not detrimental to his interests, expressed a willingness that I should go to my destination, the City of Mexico.

"How would you like to earn some money?" asked the general.

"I would gladly earn money if I can do so without compromising my employers at Washington."

"What I have in mind would not interfere with that at all. I desire to get a message through to a certain person in the City of Mexico. As a messenger of the United States you would not be suspected. Your government has not taken sides in this matter, and there is nothing to prevent your being the bearer of a letter from me to a friend."

"But supposing I am caught with such a letter on my person?" I asked.

"In that case you would be shot."

"And what would I receive for taking this risk?"

He named a sum that tempted me. It seemed to me that, being in the employ of the United States government, there would be little or no risk in my bearing the general's message. I needed the sum he offered for a certain purpose and concluded to stake being shot against it.

He wrote his message on a bit of thin paper about three inches square. I was to take it to a man high in favor with President Huerta. His name and address were given me, but were not written on the message, though it was signed by a fictitious name. I decided to carry it in the upper vest pocket on the left side, my object being to have it where I could easily get it to destroy it in case I was cornered. The general paid me the money for the service I was about to render, for I was to receive it whether I succeeded in delivering the message or not.

Going southward on the general's pass I struck the Federal lines not far from the City of Mexico. I informed the commanding officer of my mission and was received by him with the courtesy due one in the United States service. Indeed, being stationed at a point where he saw no one except his officers and men he seemed pleased to see me, and since I reached his quarters in the evening he insisted on entertaining me overnight.

He proved to be an inveterate gambler, and nothing would do but that I must play cards with him. I dared not antagonize him by refusing and after the evening meal sat down with him in his tent to play. He soon won all the cash I had provided for my journey, and I proposed to quit. He seemed inclined to play on, and I feared to refuse him. I had the money the general had given me, a roll of bills, in my pocket and was obliged to produce it.

My opponent looked at this large quantity of Mexican money with interest. He said nothing about it, but from that moment he began to talk about the difficulty of my getting on in the morning and expressed the opinion that I would be delayed. His prophecy came true, for he gave orders that no conveyance was to be furnished me.

The next morning I asked my entertainer to cash a draft on the American consul at the capital. He promised to do so, but made no move to produce the funds. His actions were so suspicious that I began to think I had better seize upon any opportunity to destroy the general's message. But I was given no opportunity. My host never left me for a moment unless there was some one else in the room. All the while he was telling me that he was endeavoring to secure conveyance for me, that he expected a team very soon, and when it came he would furnish me with money for the journey.

About 10 o'clock in the morning I saw a sergeant posting a guard about the house. My heart stood still. I was suspected, would be searched, and the message would be found on me. That meant death. The officer was looking over some military papers at a table, with an unlighted cigarette between his lips. Taking a cigar from my pocket, and with a show of coolness I did not feel, I deliberately cut off the end with my penknife and asked him if he had a match. He produced one, struck it and was about to light his cigarette when, remembering politeness, he extended the match to me

"After you," I said

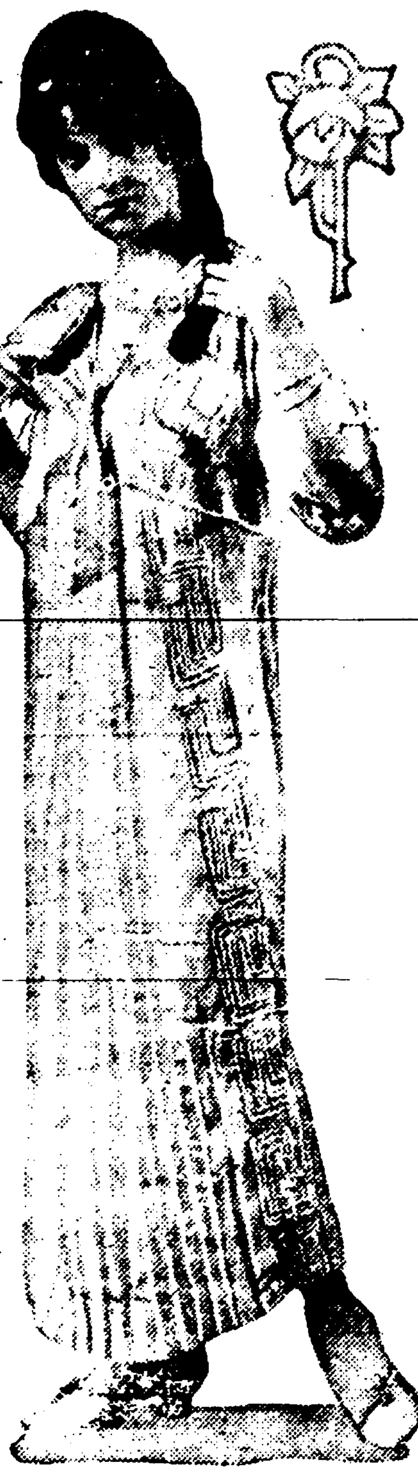
He touched it to the end of his cigarette and handed it to me I put the flame to the end of my cigar, but purposely failed to close my lips tight in order to prevent suction. When the match had burned near my fingers I took the message from my vest pocket, put one end to the flame and lit my cigar with it, taking sufficient time for it to be entirely consumed.

I saw the officer look up at me quickly, but he said nothing. Dropping the ash of the paper on the floor, I put my foot on it, rubbing it with the sole of my shoe so that it could not betray me.

I think he saw by my expression that experienced a great relief and had made myself safe, for he permitted me to depart without further delay.

## MODISH LINGERIE.

Quite the Newest Design For a Spring Nightgown.



A DA NTY MODEL.

White crepe de chine is used for this gown, whi h is so simple in outlines and trimming. The yoke and paneled front are tucked in a Greek pattern, the neck and sleeves being finished with val lace. This model can be duplicated in batiste if preferred.

## GRIP DO'S AND DON'TS.

**One Health Commissioner Gives These Rules to Grip Victims.**

DO.

Keep away from crowded places of asse ably when grip is prevalent.

Have plenty of fresh air at home and where you work.

Wear clothes according to the out side temperature, but avoid too heavy clothes indoors to prevent unhealthy skin coddling, which will make you more liable to attack by the grip germ

Keep in the open air as much as possible.

Keep the body functions regulated so that waste matter may be eliminated.

Be temperate in eating and drinking.

Keep your teeth well brushed. Many evil minded germs lurk in the mouth.

Think of the other fellow if you yourself already have grip.

DON'T.

Don't sit around with wet feet.

Don't be promiscuous in your kissing. The grip germ may be readily passed from lip to lip.

Don't sneeze or cough in your friends' or neighbors' faces.

Don't ride in a crowded street car where all the windows are closed.

Don't be afraid of fresh air. Even drafts will not hurt you unless you are fatigued and overheated.

Don't fail to remember that grip is very contagious. Keep away from it if you can. The next best thing is to keep physically fit, so you can resist attack.

### War Bracelets a Paris Fad.

Frenchwomen prize highly these days heavy bracelets made from the rings of shells fired by the French "75's." Mlle. Sorel, a favorite of the Paris stage, wears constantly one of these bracelets, which is large enough to slip up the arm above the elbow. Rings made up of metal which once formed part of menacing shells are also in favor and are worn outside of the glove.

Copper and aluminum jewelry is fancied more than ornaments of gold and precious stones just now, for all Paris is going in for economy and economical effects, and any ostentatious display is discountenanced.

But the war jewelry—the massive bracelets and the ungainly rings—are regarded as treasures indeed, for they may not be bought, but come as gifts from the very trenches themselves, where the soldiers occupy their leisure hours in fashioning these rude but valued gifts for sweethearts at home.

### Cooking Pork Chops.

This is a [illegible] of cooking pork chops [illegible] or more chops [illegible] ly [illegible] the pan [illegible] water [illegible] spoonfuls of [illegible] dry ginger [illegible] taste and [illegible] sliced. Put [illegible] simmer slowly for half or three quarters of an hour. Four cloves can be used if they are liked. Thicken the gravy after removing chops and pour over them and serve with baked potatoes.

## AN ESSAY ON PANTS.

**Introducing One Pair That Made a Boy a Fearless Man.**

Pants are of two kinds, human and dog.

The human pants of commerce are worn mainly by males.

But equal rights prevail among dogs.

Human pants are worn thicker in winter and thinner in summer.

A dog's pants come thicker in the summer.

The dog's lungs are the seat of its pants. (I ate 1875.)

White pants are not a garment. They are a business to themselves.

The man who wears them doesn't work at much else at the time.

When I was small and on a farm I wore pants that were not new.

So far as I could find out, they never had been new.

When they had been first worn out by the last tailless ancestor I had they had been patched at all the ventilated places.

When the original goods wore out between the patches the first patches were connected by other patches.

And I sew on.

Where they overlapped—the patches—the goods became about an inch thick.

And when human legs made of any material less durable than vulcanized flint are incased in a set of inch and a quarter Deer Island jeans trousers patched with every kind of heavy goods from horse blankets to remnants of rag carpet—when, I say, any human nether limbs are incarcerated in these bendless tubular garments in a wheatfield on a southwest hillside at 2 o'clock on a clear, still day when the temperature is 120 in the shade and there is no shade, the owner of said legs thinks longingly of the bastile, the stocks, the pincers, the guillotine, the pillory, the thumbscrew, the rack, the stake and other pleasantries.

I have gone long days in the wheat field in a pair of such asbestos pants lined with sandpaper and barbed wire, and now death or public speaking or fashionable dinners—none of those things has any terror for me.

I playfully inquire of death as to the location of its stinger.—Strickland Gillilan in Farm Life.

### Passports.

Passports are a very ancient institution. Some of the old monkish chroniclers mention as an achievement on the part of King Canute that he obtained free passes for his subjects through various continental countries, on their pilgrimages to the shrines of the Apostles Peter and Paul at Rome. Each pilgrim was furnished with a document in the nature of a passport called "Tracturia de Itinere Peragenda." Hall in his "Chronicle" makes reference to a system of passports in the time of Edward IV, and the enforcement of this system is known to have been very strict in the reigns of Elizabeth and James.—London Chronicle.

### Worth Trying.

"I washed Willie's pants t'udder day, and dey shrunk so dat de po' chile kin ha'dly walk in 'um. Won'er how I gwan fix 'um?"

"Try washin' de chile. Maybe he shrink too."

## An Impossible Ideal?

Perhaps, after all, the real danger is not that women will ever forget the value of the home and their obligation to it, but that men will never entirely learn them.

We are indebted to that gifted and charming essayist, Elizabeth Woodbridge, for the following: "To say that it is woman's task to make the home is to miss its most exquisite meaning. No one of the group can make the home, though any one can mar it. It must be made by all for the uses of all."

Well, if it is one thing for all to use the home, it is another thing for all—and by that we mean every one under the rooftree—to help make the home.

And we will probably never learn the true significance of this difference unless we first distinctly understand that making a home is more, far more, than a matter of cooking food and making beds, of fetching and carrying and running the vacuum cleaner.

There can be no quarrel with that division of labor which makes household tasks very largely a woman's business and breadwinning outside the home a man's business.

But after both men and women have accomplished thus much there still remains the finest part of the task of homemaking.

It lies in heart interest, in love for the home as an institution and in a thorough belief in its sacredness. A woman once said: "I can conceive of such a fine [illegible] the meaning and value of home that in case of difficulty or disagreement between two people the very idea of the home itself would outweigh the personal element and conserve unity."

The idea that two people might be willing to submerge personal differences to the larger ideal of home itself may be an ambitious conception, but surely not impossible. And in this role of homemaker a man may serve as largely and as truly as a woman.

## A Study In Drapery

Design by Franklin Simon & Co., New York.

TWEED in gray, brown, green and the spring shades of tan develops this sport coat, so mannish of cut. The cuffs of the raglan sleeves are trimmed with glazed leather, as are the revers of the deep collar. This smart garment is worn over a white serge skirt and is topped by a white felt sport hat, banded with white grosgrain ribbon.

• • •

Cut steel buckles are especially suitable for trimming the high crowned hats. ANNA MAY.

### A White Flour Illusion.

This is what the surgeon general of the United States public health service has to say about white flour:

"I want to warn you against the craze people in this country have for white flour. The whitest flour is not the best; it is not the purest; it is only the dearest, and when you buy it you buy looks and not nourishment. In order to make it white some of the most nourishing and essential components of the natural wheat have been taken away."—Osteopathic Magazine.

### THE SHADOWS.

**Do not borrow trouble and do not anticipate misfortunes. Were a man's sorrows and disquietudes summed up at the end of his life it would generally be found that he had suffered more from the apprehension of such evils as never happened to him than from those evils which had really befallen him.**

## The KITCHEN CUPBOARD

### SNAPPY WINTER CUES.

ICING.—Boil two cupfuls of granulated sugar and half a cupful of water until they spin a thread; pour in a fine stream over the well beaten whites of four eggs, beating constantly. When cool add half a pound of marshmallows, each one cut in four pieces. The marshmallows should not melt in the icing, which should be exceedingly light and fluffy. Flavor to taste.

Stewed Prunes and Kumquats.—Cut in halves a cupful of kumquats and soak and stone two cupfuls of prunes. Cook the prunes in the water in which they were soaked for an hour; then add sugar to taste and the kumquats. Cook until the latter are tender, but not broken. About half an hour will be required.

Sauce For Raw Oysters.—Take one dessertspoonful of vinegar, one tablespoonful of olive oil, one-half teaspoonful of Worcestershire sauce, the juice of one-half a lemon and one-half teaspoonful of tabasco sauce. Add a little salt and half an onion, grated fine.

Vinaigrette Dressing.—Mix together a teaspoonful of salt, dash each of pepper and paprika, three tablespoonfuls of vinegar, five of olive oil and one tablespoonful each of chopped cucumber, pickle, chopped green pepper, chopped parsley and chopped chives. Add a few capers just before serving. This dressing must be very cold.

Anchovy Sandwiches.—Now that there are so many afternoon teas sandwiches in demand this good recipe for anchovy filling may be of use: Put into a bowl that has been rubbed with garlic one dessertspoonful of olive oil, one-half teaspoonful of salt and red pepper, as much as can be held on the point of a knife. Mix into this two cakes of Neufchatel cheese and one tablespoonful of butter. Mix thoroughly. Then mix into this a piece of Roquefort cheese the size of an English walnut and two teaspoonfuls of anchovy paste. This is enough for twelve sandwiches.

Chestnut Sauce.—Take the shells from a pint of large chestnuts, scald, then remove the inner skins, break in halves and cook in salted water, boiling, or stock until very soft; wash fine in the water in which they were cooked. Mix together one tablespoonful of flour, two tablespoonfuls of browned butter, add to the chestnut puree and season to taste with salt and pepper

# NORTHCLIFFE PREDICTS LONG WAR; SCOUTS PEACE

London—"Peace? Peace before we are really ready for war?"

Lord Northcliffe, head of a score of the most powerful newspapers in England, almost exploded with disgust as he answered the question.

Hardly a day passes in Parliament that some member does not utter a protest against the compulsory military service bill, because the "Northcliffe press" dragooned the Government into adopting the measure.

"Any one who would attempt to talk peace on the streets of London or in any public place would be mobbed," Lord Northcliffe continued. "A Quaker tried to make a peace speech the other day and was silenced by an angry crowd.

"No sir, the word peace has disappeared from the English vocabulary. And that is a deep underlying conviction in the very hearts of the people, who do not want peace and will not listen to any talk of peace until this war is fought to a finish and won, honorably won, and the score with Germany settled for all time.

"It is the same in France, a deep-rooted feeling of the plain French people—not the politicans and public men—that the very existence of their race depends on winning this war. This overwhelming feeling is well recognized here, and it needs no official envoys from the United States to gather it, for it is perfectly apparent for any one to see."

# MANY DETOURS TO BE AVOIDED

The Watertown Times says of the Adirondack region, as follows:

The large number of detours, necessary in northern New York last year, will be avoided during the coming season and touring in the Adirondacks will be more satisfactory than it has ever been. Local roads were better in 1915 than previously, and they will be still better in 1916.

Last year was the best touring season ever known in the Adirondacks, the great uplands of northern New York, sprinkled with a thousand pretty lakes, most of them connected by cool, sparkling streams. Long stretches of good roads have been built into the wilderness from the principal directions, so that now the tourist running east or west across New York state between Albany and Buffalo, north or south between New York and Montreal, or diagonally across the northern section of the state between upper Lake Champlain and the St. Lawrence River has a choice of ways into a region that ranks with the White Mountains as a popular motoring rendezvous.

From Hudson River points, western Connecticut, and the Berkshires, the principal gateways to the Adirondacks are Albany, Troy and Schenectady, the routes through each of these cities conveying again into a choice of two popular ways to Lake George, via Corinth and Luzerne, or through Glen Falls. From Lake George north the main Adirondack route, turns north and northwest through Warrensburg and past Schroon Lake, to Elizabethtown, the principal gateway to the Lake Placid, Caranac Lake, Paul Smith's district, with intermediate branch roads to Blue Mountain Lake and Long Lake; though it is perfectly feasible to go up along the western side of Lake George to Ticonderoga, Crown Point, Port Henry, and Westport, especially for variety in making round trips.

The Long Lake-Saranac Lake route via Tupper Lake will be opened in July and will make another highly interesting loop in a round trip.

Additional lines come into that section also from Keeseville, Plattsburg, Malone an dthe St. Lawrence River and Thousand Island points. From Utica and Rome there has been opened up within the last year an all-macadam route to Old Forge and the Fulton Chain of Lakes, providing an excellent highway to the Adirondack League Club Preserve, and a fair road as far east as Eagle Bay and Inlet or north by a branch road from Eagle Bay to Big Moose. While it is not possible to use this route as a short-cut from Utica or west to Saranac Lake and Lake Placid, it provides one of the most inviting short runs in the state, and is a specially popular side-trip from the main route east and west through the Mohawk Valley. A tour may be planned into the Adirondacks one way, and usually out by quite another route, adding a pleasing variety to the round trip. Throughout most of the 1915 touring season construction work on the celebrated "Wilmington Notch" closed that one route to tourists, but it is expected to be open early in 1916.

## MR. WHITMAN DENIES POLITICAL RUMORS

New York—Governor Whitman announced yesterday that hew as ac andidate for renomination as Governor of the State . The declaration was made at the St. Regis Hotel after he had laughingly denied that he was a party to the agreement between factions of the Republican party to nominate him for Vice President on the Republican national ticket.

"I will state that I am desirous of another nomination for oGvernor in this State if the people are satisfied with my stewardship," he added, and then entered into an explanation of the urgent necessity right now of solving the question of the State's finances.

## LEGEND OF THE DONKEY.

### Showing Why the Arabs Beat the Brute With Impunity.

In his article on his journey to Babylon, in Harper's, William Warfield tells a legend prevailing among the natives by which they justify beating of donkeys, but not horses.

"We stopped to change our mules. In the roadway before the khan sat a group of Arabs. A servant supplied them with little cups of tea from a rude samovar. We saluted them, and, taking our places in the circle, we were served in turn. Some one in the dark doorway was thumping away on a drum. A boy came out of the khan beating a poor lame donkey with fly infested sores. I turned to one of my neighbors:

"'Is it not cruel for that boy to beat a lame donkey in that way?'

"'Effendi, it is the will of God!'

"'But you do not allow horses or camels to be beaten thus.'

"'Effendi, the donkey is not like the horse, nor yet is he like the camel. The reason is this: Upon a certain day the donkeys went before Allah and complained that they were grievously beaten by men, so that life was a greater burden than they could bear. Then said Allah: "I cannot make men cease from beating you. It is no sin, neither does it cause them any great loss. But I will help you. I will give you so thick a hide that, however much you are beaten, you shall not suffer."

"'So,' said my informant, 'it is of no consequence if men beat a donkey. So thick a skin did Allah give him that after he dies men use it in the making of drums, and the donkey continues to be beaten after death.'"

### True to Life.

"First really realistic novel I ever read."

"What's so realistic about it?"

"Didn't you notice? The heroine does about six times as much talking as the hero."—Exchange.

### He Can't.

Blob—Woman is a conundrum.

Slob—And man never seems to want to give her up.—Philadelphia Record.

## RUNNING THE BLOCKADE.

### It Was Successfully Done Ages Ago at the Siege of Syracuse.

Blockading and blockade running is not a young war measure by any means. One of the earliest authentic instances of the practice dates back two centuries before the Christian era. Marcus Claudius Marcellus, commanding a powerful Roman army and an efficient fleet, laid siege to Syracuse, a rich city on the isle of Sicily. Carthage, Rome's great rival on the north shore of Africa, one of the great sea powers of that time, was not at all pleased with the idea of Rome capturing Syracuse, a free city and probably a source of great revenue through trade with Carthage.

Syracuse was a well fortified city, and there seemed to be no immediate prospect of Rome taking it by storm, so Marcellus decided to starve its inhabitants into submission. He put a cordon of ships across the entrance to the harbor and arrayed his army on the land side so that no succor could come from without. But he had underestimated the boldness of the Carthaginians. There was no question of contraband in those days—conditional or other.

In their swift oar driven galleys the sailors of the African city easily eluded the ships set to watch the port and carried provisions and war material into the beleaguered city. So successful were the Carthaginians in getting supplies into the city—running the blockade—that had it not fallen through treachery it would have been enabled to hold out indefinitely. While blockades probably had been established before on a small scale, the blockade of Syracuse is one of the earliest instances where the efficiency of a blockade by sea was of vital importance in determining the success of war on an important seaport.—Munsey's Magazine.

### Effects of Frost.

An egg expands when it is frozen and breaks its shell. Apples contract so much that a full barrel will shrink until the top layer is a foot below the chine. When the frost is drawn out the apples assume their normal size and fill up the barrel again. Some varieties are not appreciably injured by being frozen if the frost is drawn out gradually. Apples will carry safely in a refrigerator car while the mercury is registering fully 20 degrees below zero. Potatoes, being so largely composed of water, are easily frozen. Once touched by frost they are ruined.—Northwest Trade.

### Devilfish.

In Japan devilfish weighing 200 pounds are sometimes caught. These fish are amphibious; they are often seen wabbling on their tentacles like giant spiders in search of patches of sweet potatoes. The natives kill them with clubs. In the water they are caught in jars lowered to the bottom, which the octopus enters, thinking them a good retreat from which to catch his food.

### Discouraging.

After a mother has taught her son not to keep his hands in his pockets, to turn his toes out and not to sniff his nose or smack his lips when he eats, it must be discouraging to hear people remark a month after his marriage that his wife made him.—Wichita Eagle.

### Sand In Holland.

In Holland sand is plentiful and inexpensive and is used instead of hay and straw as beds for cows. It keeps the animals perfectly clean, requiring only a slight raking in the morning to soften and freshen it.—London Telegraph.

### Perfectly Tame.

To say of a man that he will make a good husband is much the same sort of compliment as to say of a horse that he is perfectly safe for a woman to drive.—Puck.

### Warned.

The Poet—It's but a step from the sublime to the ridiculous.

The Girl—Watch your step!—Judge.

## MOTHER SELLS BABY'S RING TO AID JEWS

Brooklyn—One hundred thousand dollars was raised to aid the Jews in the war zones of Europe at a meeting of the Brooklyn Jewish Relief Committee and the Brooklyn Jewish Volunteer Committee at the Academy of Music in Brooklyn last night.

The meeting, which overflowed into music hall, was attended by more than five thousand persons and so enthusiastic did some of them become during the speeches than many subscriptions were doubled and gold and paper currency were piled into the hands of the treasurers and contribution solicitors.

## REPUBLICANS TO FIGHT BILL AIMED AT LOBBY

Albany—Senator Elon R. Brown has called a conference of Republican Senators tomorrow night. It is to plan opposition to the drastic amendment to the Senate rules offered by Senator Wellington, of Troy.

This amendment would strike a death blow at corporation lobby methods and invisible government in the Legislature . Ie provides that twenty days after introduction all bills come automatically before the Senate. It would do away with the secret defeat of bills in committees, the method employed by corporation lobbies.

Senator Wellington has given notice, he intends to move tomorrow night to discharge the rules committee and force a vote on his proposal.

## PRESIDENT UPHOLDS GERMANY'S POINT

Washington—President Wilson is understood to hold the opinion that the British steamship Appam must be considered as a German prize under the Prussian-American treaty of 1828.

It was stated tonight that this accords with the view of the State Department.

No final decision has been reached as to the length of time the Appam will be allowed to remain in an American port.

Children Cry FOR FLETCHER'S CASTORIA

## WITHOUT FOOD SIX WEEKS.

### Farm Hands Discover Emaciated Man in Straw Stack in Michigan.

Escanaba, Mich.—That he had remained more than six weeks in a straw stack without anything to eat was the story told by Charles Kowbowski, who is being nursed back to health at the Delta county almshouse

Emaciated, the mere shadow of a man, Kowbowski was discovered by men who were working on a farm near Gladstone.

Kowbowski, who is of German Polish birth, came to this country two years ago. He has worked in various cities of the upper peninsula, but he could not find steady employment. When he reached Isabella his shoes were worn out and his feet were sore. He was also weak from hunger when he came upon the straw stack, which he decided to make his home. He does not remember all the details of his long stay in the stack. He says he remembers going out three times to get a drink of water, but that he had nothing to eat.

He lost the power of swallowing, and liquid food had to be given to him by artificial means. The power to swallow has now returned and with it strength to tell of his suffering.

Francis Golden and Jess Willingham in "SPRING MAID" at the Quirk tomorrow

Melodies that set you humming, a fine dramatic story revealing the romance of a saucy princess and her naughty prince charming and an endless skein of sparkling comedy that keeps the audience convulsed with laughter, are some of the reasons—only some—for the tremendous success during it's long run in New York and it's present revival entour of "The Spring Maid."

Andreas Dippel of Metropolitan Grand Opera fame is responsible for its return to activity this season and this well known impressarois connection with the present tour lends assurance that a brilliant cast has been gathered together. Miss Georgie Campbell, thhe dainty little prima donna soprano, who plays the part of the saucy Princess Bozent, scintillates as radiantly as the most vociferously heralded star. Miss Francis Golden is a most captivating sonbrette and her rabbit dance is one of the most delectable hits of the opera. Ben Byron as the burlesque comedian contributes one of the richest comedy characterizations seen in light opera in years, while Arthur Wooley as the father of thep rincess disguised as her sipinster aunt is a perpetual scream of aughter. If still another reason were required the lively chorus of spring girls are amply inspiring, youthful and shapely to provide it.

This is the attraction that is booked for The Quirk Tuesday, February 8, matinee and night.

## NAVY FIGHTS TO KEEP WIRELESS SECRETS

New York—Of extreme importance to the United States Navy at this time when spies of other countries are seeking to obtain the secrets of various war devices, was the hearing this morning in the United States Circuit Court of Appeals of an action brought by the Marconi Wireless Telegraph Company of America against H. M. Simon, an electrical engineer, who is manufacturing certain wireless apparatus for the navy.

The United States Navy, which has contracts with the Marconi company, has developed its naval equipment to what is declared to be the most powerful in use on the seas. It has made contracts with Mr. Simon for the manufacture of certain parts and the Marconi company seeks to enjoin Mr. Simon from thism anufacture. Theg overnment takes the position that ith as developed these devices so they may communicate with vessels all over the globe. It does not want to be forced to reveal to any one else just what it has done and wants to control all its own apparatus.

## BISHOP GREER FAVORS "DEFERRED SALARIES"

New York—"There is no element of charity in this undertaking; it is a scheme of deferred salaries," is the way Bishop Greer described the undertaking of the Protestant Episcopal church to raise $5,000,000 this year for a pension fund for its clergy, in the course of a sermon he preached yesterday morning in the Episcopal church of the Holy Apostles.

Bishop Greer was one of fifty bishops of the Episcopal church who yesterday in that many different parts of the country made pleas for support of the pension project. At the head of them ovement is Bishop William Lawrnce, of Massachusetts, who has handed over the duties of his diocese to his suffragan Bishop and has moved to this city to wage the campaign from an office of the new corporation which is in Wall street.

## City Attorney Reports Chamberlain's Findings to Speaker T. C. Sweet

City Attorney Hillick has made public the figures relative to this city's indebtedness, as requested by Speaker T. C. Sweet upon the occasion of the visit of Mayor Lewis and the Attorney in Albany last week.

In compiling a statement of the deficits in the various departments, the City Attorney divides the deficits, in relation to their causes, into two distinct parts. In the first part he attributes the cause of the deficits to a practice maintained by various boards in incurring indebtedness in excess of appropriations, the sums totalling about $9,000.

The statement of the city's financial condition prepared by City Chamberlain Adkins at the close of the fiscal year, December 31, 1915, shows the following definite result:

| | |
|---|---|
| Poor Fund | $1,033.16 |
| Light Fund | 1,356.44 |
| Improvement Fund | 1,617.31 |
| Public Works Fund | 1,037.15 |
| Police Fund | 353.56 |
| Sewer Fund | 25.22 |
| Fire Fund | 14.18 |
| School Fund | 3,679.01 |
| Sprinkling Fund | 118.50 |
| | $9,234.43 |

### Taxing Limit Reached

Continuing his report to Speaker Sweet Mr. Hillick says in part as follows:

"This means that this amount of indebtedness exists in outstanding unpaid bills. It is not the fault of any one administration, but the accumulation of many years of carelessness. It is the general feeling of the people generally of the common council and of the present administration (which is absolutely faultless in the matter) that, all things considered, these bills should be paid and a new method instituted. A line has been drawn at the close of business December 31st, 1915, but the City has no funds nor present means of obtaining same. The limit of the annual tax levy has been reached and maintained for some years, and the present appropriations

(Continued on Page Five)

## Scout Round-up to Result in New Features

The annual indoor round-up of all of the Boy Scouts of America living in Fulton, five troops in all, will be held on Friday evening of this week, at the Presbyterian church parlors. In anticipation of the event there is a lot of rehearsing going on by those who will entertain the boys, and some lively stunts are looked for by the knowing ones.

A dinner will precede the other items on the program, the eats to begin at 6:30, and from then on the events of the evening will occur in rapid-fire order. Speeches will be made by Professor Lanigan, W. A. Butts, Rev. H. D. Holmes and Scoutmaster Willis P. Morin. Parker Van Buren is rehearsing some new Scottish songs and dances, and, what may prove to be the most interesting feature of the evening for the average Scout, a number of wireless messages will be received and transmitted. For the present, at least, the contents of the messages must remain secret, but it is sufficient to add that no boy will regret his presence at the round-up, as the messages will deal with events past and present in the lives of Scouts. In order that the wireless feature may not become irksome a few personalities are likely to be injected into that part of the program—just for the sake of bringing smiles to the faces of boyhood.

## CHAMBER OF COMMERCE

*"Fulton First, Last and All the Time"*

### THE PROBLEM OF CITY PLANNING

One might with good reason question wherein a city profits through its improvements if they injuriously react upon the home life of its people. In our American communities there is an enlarging group of citizens who are finding their environment growing adverse, their homes growing smaller, and the free space surrounding such where their children may play under parental oversight, more restricted. Our cities are themselves growing larger. The census of 1910 shows an urban increase in population of 34.8 per cent. as contrasted with a rural increase of only 11.2 per cent. In keeping with this growth there has gone an increase in urban wealth with enlarged municipal appropriations for public improvements that steadily force up taxes, both because of the cost of such improvements and their reaction on social welfare. Various reasons have been assigned for this. Undoubtedly there should be a greater centralization of authority in the management of municipal affairs which would bring about a better co-ordination of the sub-departments and produce greater administrative efficiency.

The movement in behalf of the City Manager form of administration is a step in this direction. But essential to its success is the possession on the part of the City Manager of a broad conception of the purpose of government. Centralized authority will reduce certain costs now due to bad management, but such a reduction, desirable as it is, is not the goal. The great need in our cities today is that beneficial control of improvements which will permit the attainment of advantages without inflicting irreparable injuries upon home life.

In municipal affairs this foresight has heretofore been largely lacking. Take as an example the comparatively simple matter of street layout. In no one particular do American cities fail more frequently to take into consideration the time element than here. In the plotting of streets large sums of money are involved and lines are fixed for centuries. As time passes mistakes become more mostly in their rectification while, pending such correction, the problem of the proper orientation of buildings, enhanced by other cost factors largely due to the absence of restrictive legislation, is almost impossible of satisfactory solution. One can see this in any American City. Not only does this illustration hold true with reference to past developments but it can be cited with equal strength in developments of today where new areas are plotted and new streets laid out in large measure irrespective of the future use to which they are to be put. The City planner today is, fortunately, evidencing much better judgment than heretofore but the important point, so far as safeguarding the home is concerned, is that every street laid out without due thought as to its possible future use, and irrespective of the contour, means a street that has great possibilities for waste when the undeveloped area comes into the zone of development. For example, streets, straight as the crow flies, may pass over small knolls In order to open them up, to lay them out, they must be brought to grade.

Another factor which enters in through the plotting of streets has to do largely with public sanitation. When streets are laid out according to a hit or miss plan the proper orientation of the buildings is interfered with. What holds true here with reference to streets, holds equally true in the plans made for sewer construction and water lines, the plotting of parks, the location of public buildings and other forms of public improvements.

Another popular fallacy in the development of municipal projects is that whatever tends to increase land values is beneficial.

There is hardly any sphere of municipal activity that, if mismanaged does not react upon the home life of the people, always hurting those least able to meet the injury. Thus, in the matter of levying taxes, the bad method of assessing values prior to collecting the tax in vogue in many communities has only one consequence and that, baneful. Where the assessor is a man of limited intelligence politically appointed, who holds his job not because he knows how to ascertain values but because he happens to be a friend of the boss, useful at election time, the judgment displayed by him as to values of property must necessarily be limited. However, characterized the fact remains that central realty is almost invariably under-assessed while smaller holdings with their improvements are rated at their full value. The result is a disproportionate tax, with the heavy burden resting upon that portion of the community that can least afford it, and the lighter the burden placed upon those who rightfully should bear a heavier share.

Before the efficient management of the plans themselves, there must come a community conception that the city is made for man and not for the commercial or industrial or business interests attracted to it because of its natural advantages in the form of light and power, of commerce and transportation or of its proximity to a good labor or sales market.

## Washington Grandeur Established In Mind of Secretary Hollenga

BY D. S. HOLLENGA
*Secretary Chamber of Commerce*

Washington, Feb. 6.—Washington, D. C., pride of our Nation! It is within your gates where history was made and it is within your gates, where the future of the greatest Country will be shaped. Very few people are aware of the fact that within those mighty structures laws are made; treaties are signed; notes are written; finances, industry, commerce are discussed. It is this place where we send the representatives of the people. It is here where foreign countries send their ambassadors and ministers to confer with our Government in matters of importance. Is it a wonder, therefor, that Washington, D. C., is the pride of the Nation?

Tomorrow, one of the most, if not the most, important meetings in the history of the country, will take place. The meeting of the United States Chamber of Commerce is NOT a meeting of politicians; it is a meeting of men vitally interested in the growth and future of the country. Commerce, industry and finances are represented in the true and liberal sense of the word.

Today our Country is living through the most critical period in the history of the world. Far away from us, nations are busily engaged in destroying each other. The only Country in the world able to supply those other countries, after the war, is the United States of America. It is therefor necessary that we discuss intelligently how we are going to solve the problem.

The average citizen does not give these weighty problems very much consideration, leaving the matters to commercial organizations to thresh them out.

Hundreds and hundreds of men are arriving in this city to take part in the discussion; they are coming from all over.

And who are these men? Most of them are business men in the true sense of the word, anxious to see this country do the right thing and anxious to see it prosper. And you may rest assured that Senators and Congressmen are are very keenly watching the results of the Fourth Annual Meeting of the United States Chamber of Commerce because as in other countries commerce, industry and finance are really represented in the National Chamber, and our Federal laws will certainly be shaped in accordance with the voice of all these commercial, industrial and financial men.

We are here to watch things closely and are prepared to not only defend the rights of Fulton, but to see that we will get our share of national prosperity.

### WARNER GROCERY STOCK TO BE SOLD FEB. 15

Deputy Sheriff John Dennis last night placed an attachment on the grocery stock of A. L. Warner, 70 S. 1st st., by virtue of an execution issued out of the Supreme court. The stock will be sold by Sheriff Buck on February 15 at 2 p. m.

It is understood that a Syracuse wholesale firm was responsible for the issuance of the execution.

### MACCEBEES TO HOLD SPELLING BEE TONIGHT

A spelling bee, with humorous trimmings, will be the attraction offered by the entertainment committee of the Maccabees.

Mr. Warren S. Gardner heads the committee, whose duty it is to prepare entertainment for each meeting night. It is planned to have music and speaking later.

### STORM PREVENTED MEETINGS OF SOCIETIES

Last night's storm affected the attendance at meetings of different organizations. Certain ones of fraternal orders were fortunate in having quorums, while several meetings had to be postponed.

The Board of Public Works meeting did not take place but will be held tonight.

## JUDGE NAMES 3 APPRAISERS

On application of Attorney A. T. Jennings, Judge George W. Ray, yesterday, appointed a receiver in the estate of Mr. J. A. Bort alleged bankrupt, of this city, he being Leonard T. Haight of Syracuse.

Messrs. John J. Jordan, H. J. Fanning and George Pomphret are appointed appraisers of the estate, and a restraining order is issued against all creditors and other persons from disturbing or interfering in anyway with the assets, or the Simple-X Wrapping Machine Co., Inc.

Mr. Jennings represents all of Mr. Bort's unsecured creditors, and the order out of court which he secured authorizes the receiver to collect all rents and profits from Mr. Bort's Rochester real estate for the benefit of his creditors. Also in the discretion of the receiver, to prosecute action for damages amounting to $7000 against R. [illegible] Swartz, of Dundee, N. Y., on a charge of alleged fraud and deceit growing out of trading his property in Rochester for property owned by Mr. Bort in this city.

### IMPROVING WESTCHESTER.

**New York's Beautiful County Has a Planning Commission.**

A commission, the first body of its kind ever constituted by law of the United States, has been organized for the development and beautifying of Westchester county, N. Y. It is headed by James G. Cannon.

The appointment of this commission was largely due to the activities of the Westchester county chamber of commerce, and the commissioners, who are men of wealth and deeply interested in the development of the county, will serve without salary. They were selected by the board of supervisors and have authority to employ landscape architects, surveyors, engineers and other experts.

They will submit to the supervisors a survey of the county, with a map showing the proposed improvements, and they may recommend changes in the width or route of highways, the construction of new trunk line roads and the acquisition of public lands for parks and playgrounds. They may also suggest the subdivision of the county into drainage areas and alterations in the system of water supply.

Westchester's growth in the past few years both in the matter of population and of estates and country houses has caused the leading citizens to take serious thought as to the best manner in which its natural beauties may be preserved.

"Several of the towns," said Mr. Cannon, "already have systems of street planning and are seeking to make their part of the county as pleasing to the eye as possible, and one of the first things the commission will do will be to take these efforts into account and to correlate them. It is necessary that the rapidly growing communities should have adequate park space and that their streets and principal highways should be considered with reference to the appearance of the entire county. Westchester is a pioneer in this line.

"Then there are in the county many reservoirs, and it is proposed that they should be approached by suitable roads and that picturesque and convenient paths be built about them. The great Kensico reservoir is one of the finest bodies of water in the country.

"The new Bronx River parkway, of the cost of which New York city pays three-fourths and this county one-fourth, will naturally become part of the general plan. It runs for fifteen miles on either side of the Bronx river.

"The county also contains much forest land, and the commission will consider how its natural appearance may be retained as much as possible, and while there is yet time the provision of park spaces will be considered with reference to those already existing.

"Such towns as Dobbs Ferry and White Plains have already done much in laying out municipal parks and in making their surroundings pleasing. To obtain the co-operation of every town in the county is part of the general scheme."

Citizens of Westchester are enthusiastic over the project to make their county a "garden of the gods." Parks and lawns will be established at the railroad stations, steps will be taken to destroy unsightly structures, and the traveler will see about him everywhere the natural beauties of the woods and the fields preserved by the skill of landscape architects.

There are many beautiful country homes in the county, especially along the Hudson. The commission hopes that its efforts will increase the pride of all Westchester property owners in the adornment of their grounds and in the appearance of their homes.

**Recreation In Cleveland.**

A complete survey of the recreational facilities of Cleveland, O., will be made by the public recreation committee of the chamber of commerce to precede the mapping out of a five year recreation program. Recreation for Sundays, Saturdays and holidays will receive special consideration.

## OUR INTENTIONS

A minister of the Gospel in a neighboring city, in prefacing his sermon yesterday, laid emphasis on the importance of discrimination in the selection of newspapers and of learning to judge the real value of news and editorial utterances. He advised his audience to acquire the habit of looking into evidence.

Newspapers are human institutions and vary in their character just as men vary. Most men, even correspondents of newspapers, hold their jobs to make money. Newspapers are founded on a business basis, but some of their correspondents get confounded. Some men feel that, in their businesses, they are performing a public service; that they must remain true to themselves and their city in their pursuit of success. It is different with newspaper correspondents.

A newspaper cannot be 100 per cent. infallible all the time. It is prone to error, because its sources of information are not at all times reliable. It is as prone to error as the man who buys and reads it. The newspaper should be judged by its intentions, just as its correspondent is judged by his intentions. Intentions of any kind cannot be hidden from the public.

The newspaper which consistently opposes, either openly or hiddenly, everything that stands for good in the community; which uses its energy in an attempt to keep pace with the will of the selfish element, will sooner or later expose its own designs. If its correspondent is one of the powers that prey on the public for what can be squeezed from the pork barrel, he may, by hook or crook, keep up some sort of success, but his place and that of the organ he represents, will surely drop in the community's esteem as low as he deserves.

It must be uncomfortable to find oneself on the horns of a dilemma, facing the choice of endorsing that Sunday pool playing ordinance or joining the throng of people who are denouncing its inception.

## THINK THIS OVER

There were fourteen hundred applications for lodgings at the Municipal Lodging House in New York City the other night, and nearly every man admitted that whiskey brought him there.

In Kansas, the wealthiest state in the Union per capita, they have the lowest death rate and own the largest number of autos per family.

Kansas has eighty-eight empty jails, and forty-seven almshouses without an inmate. Kansas has twenty-eight counties where they have not had a criminal prosecution for a year.

Whiskey in New York or whiskey in Kansas works the same, when it works. Whiskey begins at the top, in a man's head, and it finally reaches his legs. The poison paralyzes his mental and physical powers, and makes him absolutely worthless and positively dangerous.

The subject is a serious one for the business man who hires and who fires. It is getting a more serious subject for the man who is hired and fired.—The Silent Partner.

## SAY SOMETHING GOOD

*(Borrowed and now dedicated to the KNOCKER who can do no harm).*

Pick out the folks you like the least and watch them for a while;
They never waste a kindly word, they never waste a smile,
They criticise their fellow man at every chance they get,
They never found a hunan just to suit their fancy yet.

From them I guess you'd learn some things if they were pointed out—
Some things that every one of us should know a lot about.
When someone "knocks" a brother, pass round the loving cup—
Say something good about him if you have to make it up.

It's safe to say that every man God made holds trace of good
That he would fain exhibit to his fellows if he could;
The kindly deeds in many a soul are hibernating there,
Awaiting the encouragement of other souls that dare

To show the best that's in them; and a universal move
Would start the whole world running in a hopeful, helpful groove.
Say something sweet to paralyze theknocker on the spot—
Speak kindly of his victim if you know the man or not.

## Our Washington Letter

SPECIAL CORRESPONDENCE

Washington—At a moment when the peripatetic Carranza had not been reached with our protest against the murder of Americans in Mexico, when Southern Senators were grandiloquently vocal in an attempt to embroil our relations with Great Britain, when our controversies with the Teutonic Allies were still in process of discussion. when Congress wasw restling with the grave problems of providing for the national defense and of finding the money to pay for that while at the same time wiping out the deficit caused by Democratic extravagance and folly in the conduct of the nation's finances—at a time, in short, when, if ever, there was occasion for dragging to the front once more that well-worn theatrical property of the administration, a "crisis," how did the President deal with it?

Did he come forward again in his well-remembered character of "the lonely man in the White House?" Did he, for an unnumbered time, fill the ears of the people with the muffled click of his rickety typewriter as he closed the door of his study and composed another of those "notes" so fine in their phrasing and so barren in their benefits? Did he summon the chiefs, either of his own party or of the opposition, to confer with him as to the national policy? Did he go again n person to Congress to demand a "blank check" of indeterminate power to use the military forces of the country as he alone might see fit? Did he do any of the things which a man clothed with heavy responsibility might be expected to do in the face of a situation grave enough to be described by that weighty word "crisis?"

He did not.

He boarded the presidential yacht, the "Mayflower," and went off for a pleasure cruise.

* * *

"If the President wants to explain his Mexican policy, let him come down into Texas," said a Congressman from that state. "The folks down there will give him plenty of opportunity, but he will have to do a mighty lot of it. With the situation on our border line as it has been for the past two years, it is impossible to reconcile our citizens in the do-nothing policy that has prevailed. They cannot understand it and they are disgusted at the apparent indifference of the Federal administration."

* * *

"The thing that worries me is not preparedness, the Mexican policy or rural credits," said a prominent Democratic Senator, "but what is giving me anxiety and serious thought is where is the money coming from to meet the necessary running expenses of the government. Where are we to raise the funds to meet conditions connfronting us and how are we going to do it? That is what staggers me."

## Opinions

### THE MACHINE FIRST

The tendency of occupational training, says the Rochester Post-Express in an article which has much food for thought in these days of extremes in educational matters, "is to make machines of men and women—mechanisms for the economical production of certain wares—and to measure the human machine or compute its value to society by its output. Heretofore the American people have always placed the man above the machine, the aim of our educational system being to make the boy a man first and a mechanic afterward. The tendency of vocational education is to make him a mechanic first, the danger of which is that his education will often if not usually end at this stage and he will never become a rounded man." This seems to admirably sum up that side of the question.—Utica Press.

### POOR TACTICS

Suffragists are besieging the Legislature again this year, although the sentiment of the State was given decidedly at the last election.

Manifestly, the work of the suffragists should be carried on, not at Albany, but throughout the State where the voters live. It is hardly fair to urge assemblymen and senators to act contrary to the plain vote of their constituents so recently given. Before the election, the situation was different, for it was not known, just how the State stood on the question. The sentiment has now been fairly taken. The job for the suffragists is to change this sentiment, and the source of political sentiment is not in Albany, but all over the commonwealth. If they can succeed in educating a majority of the public to their way of thinking, there can be but little question about what the Legislature would do.—Utica Observer.

### WAY WE TREATED NEUTRALS DURING OUR WAR

The apologists for the British blockade of neutral ports against neutral shipping rest their case upon the assertion that the United States, during the Civil war, seized neutral ships bound for neutral ports with cargoes which were meant for reshipment to the Confederacy.

This would be a strong argument but for one thing.

The United States did not do anything of the kind.

The two test cases submitted to the Supreme Court of the United States for a final determination of the doctrine of continuous voyage and ultimate destination were the cases of the ship Springbok and Peterhof.

The ship Springbok was ostensibly headed for one of the neutral West Indies ports, but was really headed toward the blockade line, with the intention of running the cargo through.

This ship the Supreme Court held to be a lawful blockade prize.

The ship Peterhof was headed for Mexico, and although it was clearly apparent that her cargo was to go overland from Mexico to the blockaded Confederacy, the Supreme Court of the United States ordered the Peterhof to be released, on the ground that the presumed disposition of her cargo after it was discharged in Mexico did not abrogate the ship's right to voyage from a neutral port to a neutral port.

And this is exactly the rightful American contention in the case of American ships voyaging to neutral countries contiguous to Germany.

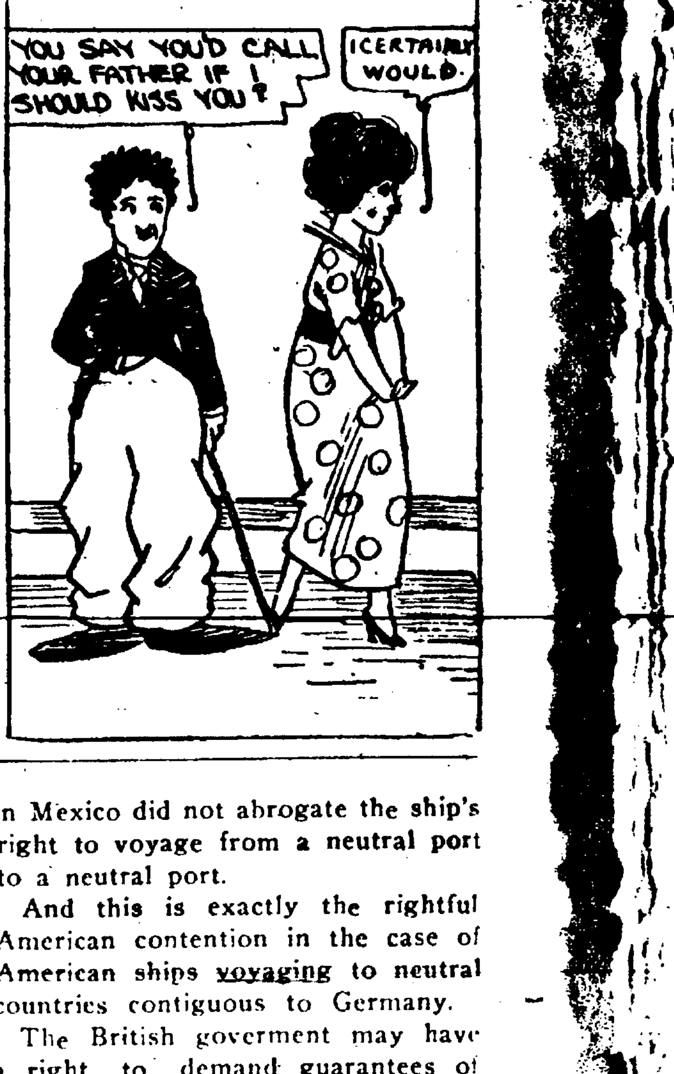
The British goverment may have a right to demand guarantees of Sweden and Norway and Holland as to shipments of American goods into Germany— though that it is a debatable question.

But the British government has no right to seize American ships bound for neutral countries because it suspects that the cargoes sold to those countries may afterwards find their way into Germany.

Our own Supreme Court upheld this same contention of Great Britain against American seizures of British merchantmen during our great war, and our Government ought now to uphold the same contention of American shippers against British seizures of American merchantmen.

We ask nothing but the same justice and the same respect for international law which we granted Great Britain in the time of our own sore distress and dreadful civil strife. —N. Y. American.

## Charley Meets a Bashful Maiden



### SATISFACTORY EARNINGS

There are few enterprises more profitable than banking. "War brides" are not in it by comparison. A statement of earnings of trust companies in the city of New York show that a number of trust companies earn over 100 per cent. on their capital and only one or two have earnings that look like the 7 or 8 per cent. of a healthy railroad.

The Farmers' Loan & Trust Company, which plainly doesn't deal with farmers, earned 151.9 per cent. on its capital of $1,000,000, and counting its surplus with the capital the earnings were at the rate of 20.6 per cent. The other companies have high earning rates, and when dividends are declared they are handed out at the rate of from $60 to $2,800 a share.

If a man owned a few "odd lots" of such shares he wouldn't need to worry about belonging to the odd lot class.—Utica Observer.

### WITH STATE EDITORS

President Wilson says the time may come when he will not be able to uphold our honor and keep peace. Let him uphold our honor and we will take a chance on peace.—Tarrytown News.

* * *

What the next somersault of the president, as leader of his party, will be, no one can tell. That it will be carefully thought out no one can doubt. It is safe to say that it will be prompted by patriotism, for Mr. Wilson is a patriotic man, but there will be with it that semblane of the expediency of a man who reads the signs of the times accurately even though the lettering stretches across the Republican skies.— Watertown Times.

* * *

Issuing bonds to saddle public debts on posterity is an expedient which is losing its popularity. Taxpayers are beginning to notice that interest payments begin immediately, not at bond maturities, and eat taxes from the day of their birth. Hence more care is being exercised in approving bond issues, as may be noted by observing the number of proposed issues in various parts of the United States overwhelmed at the polls in recent months. —Ithaca Journal.

## BRANDEIS REGARDED AS RADICAL, OUTSPOKEN AND A HARD FIGHTER

**First Jew to Be Nominated For Place on United States Supreme Bench In 127 Years' History.**

**Known as the "Trust Buster" and "People's Lawyer" He Has Made Both Friends and Enemies.**

LOUIS DEMBITZ BRANDEIS is regarded as one of the most radical and outspoken lawyers in the country. Therefore when President Wilson sent his name to the senate for confirmation to fill the vacancy on the United States supreme bench caused by the death of Justice Lamar the entire nation was surprised.

Mr. Brandeis, who is the first Jew to be nominated for the office of supreme court justice in the 127 years' history of the court, had not even figured in the calculations of the politicians of either party. As near as can be learned his name was not among the twenty-seven proposed by the leaders of the Democratic party for the position.

There is reason to believe, however, that the president, who has always entertained a high regard for the Boston lawyer upon whom he finally settled, has had him in mind ever since the death of Justice Lamar of Georgia made a vacancy on the bench.

The senators and party leaders of eight states had proposed names for the place to the president, among them former President Taft, Frederick W. Lehmann and some of the most distinguished jurists of Texas, Georgia, North Carolina, Kentucky, Missouri, West Virginia, South Carolina and Arkansas.

Following the receipt of the nomination of Mr. Brandeis in the senate the leaders of the president's party recalled that Mr. Brandeis figured extensively in the president's cabinet plans following his election in 1912. As a matter of fact, it was the conviction of several men who aspired to cabinet honors at that time that the Massachusetts lawyer, variously described as the "trust buster" and the "people's lawyer," would be appointed to the portfolio of justice.

### He Was Wilson's Adviser.

The president is reported to have conferred with Mr. Brandeis frequently while he was governor of New Jersey regarding the construction of the "seven sisters" anti-trust bill that he afterward caused to be passed by the legislature of that state and also with reference to several features of his inaugural address.

When the fire of opposition trained on Mr. Brandeis prevented his appointment to Mr. Wilson's cabinet he by no means lost prestige in the estimate of the president. It was at the instance of the president that the Massachusetts lawyer was selected to represent the government in the application of the railways of the country for permission to increase their rates, which resulted in a concession approximating 5 per cent of their average business.

The methods pursued by Mr. Brandeis in opposing the requests of the railroads to increase their rates provoked a storm of criticism against him, but that such methods were most thorough and conclusive, however, was admitted generally by railway officials themselves and members of congress.

The fact that the railways were not given permission to adopt an even higher tariff than that granted was credited to the success of Mr. Brandeis in showing that, with efficient management, the railway systems of the country could be conducted on a more economical basis and earn a larger percentage of profits.

The results did not make friends for the man whom the president nominates for the supreme court bench.

### Some of His Views.

Some of his public utterances have been:

"The great trouble with all forms of business today is that too little attention is given to the men at the bottom of the ladder."

"The best brains should teach the men lowest down."

"All the powers of capital and all the ability and intelligence of the men who wield and serve capital have been used to make slaves of these steel workers."

"Capital in many instances really earns a great deal less than is safe for industry."

"There is little choice between unions and employers when it comes to violence."

"There must be not only a division of profits, but of responsibility."

"The worker must have a voice in saying how the business shall be run."

"Crush the trusts and the high cost of living will decrease."

"The liberty of the workingman is a hoax."

"Competition in business corresponds to liberty in political and civil life."

"To preserve the liberty of the many we find it necessary to restrict the liberty of the few."

"Price cutting merely is one of the many methods of unfair competition."

"Excesses of competition lead to monopoly just as excesses of liberty lead to absolutism."

Louis Dembitz Brandeis is known a "the people's lawyer" because of his labors in behalf of the public good. Much of his arduous work has been for the public, whom he served without fee. His one hobby is humanity. Whenever he feels he can lend his aid to the solution of a sociological or economic problem affecting the common people he does so—gratis.

He is a member of the law firm of Brandeis, Dunbar & Nutter of 161 Devonshire street, Boston, and commands large fees as counsel for and against trusts and corporations. But money means little to Mr. Brandeis. It is said of him that on the first day of the year he and his wife figure out their budget for the next twelve months, including a sum to care for them in their old age. This budget may be $15,000, $20,000 or $50,000, but the amount is fixed. Mr. Brandeis then works until he has this amount assured and after that will accept no more retainers, preferring to devote his remaining time to study or to helping humanity.

### Was Born In Louisville.

Mr. Brandeis is a southerner, having been born in Louisville, Ky., Nov. 13, 1856, but with his parents moved to New England at an early age. He is a typical New England lawyer—green bag and all—and has even lost his southern accent.

Personally he is a medium sized, wiry man, with piercing gray eyes and a mass of black hair which years have streaked with gray. His hair is always more or less tousled. He gives little attention to tailors. He wears queer looking glasses, sometimes high on his puckered forehead. He is a good story teller and has a most infectious laugh. He talks with emphasis and to the point, with a trick of gesturing when he is engrossed in developing an idea.

His life has been a fight for principle: Some twenty years ago he became convinced the gas and insurance companies were charging too much. He began a battle to reduce the prices of both and after a hard struggle won. The fees he received he turned over to charities. For years he fought and won victories in the courts against corrupt franchise grabbers in Boston.

### Some of His Victories.

Early in 1907 he learned the New York, New Haven and Hartford Railroad company, in defiance of law, was endeavoring to secure control of the Boston and Maine, and for two years he prevented the consummation of the New England transportation monopoly. Later he was instrumental in bringing about the reformation of the New York New Haven and Hartford.

In that same year he argued the appeal of the women of Oregon in the supreme court of the United States fixing the hours of labor. On Feb. 28 1907, the supreme court paid him the almost unparalleled tribute of complimenting him by name in its opinion and of quoting extensively from his unique brief. The same thing happened when he won a similar victory for the women of Illinois, fixing ten hours as a day's work.

In the Ballinger-Pinchot controversy Brandeis espoused the cause of Louis R. Glavis against Secretary of the Interior Ballinger. Ballinger had been whitewashed by the administration, but when the matter came before a congressional committee Glavis won. During the summer of 1909 Brandeis almost unaided, settled the disastrous garment workers' strike in New York.

After investigating the railroad situation and appearing as the advocate of the shippers against the railroads, Mr. Brandeis made the statement that the railroads of the country could save $1,000,000 a day if proper economies were practiced and the roads put upon an efficiency basis. He undertook to demonstrate this without salary.

He espoused the cause of President Wilson and was mentioned prominently as a cabinet possibility. His appointment was bitterly opposed by the Massachusetts Bar association and by Massachusetts politicians. While never an office seeker, Mr. Brandeis [illegible] ly became counsel to the interstate commerce commission.

He received his early education in the Louisville schools and studied law at Harvard. He was admitted to the Boston bar in 1878, and was married to Alice Goldmark of New York city in 1891. He is a member of a number of Boston clubs, including the Union City and Exchange, the Harvard club of New York and the Dedham (Mass.) club. He is an honorary member of Phi Beta Kappa society of Harvard and is the author of a number of books, monographs [illegible] on life insurance, [illegible] banking and finance. He is a frequent contributor to legal publications.

About two years ago he became interested in the Zionist movement, and has since taken his place in its ranks. He has become one of the most active workers in the [illegible] and much of its success is due to his effort. He is an [illegible] of woman suffrage, although he [illegible] opposed it.

## WAR BRINGS BOY BABIES.

**Birth Rate In England and Wales Breaks All Records.**

Although many scientists insist there is no foundation for the belief that more boy babies than girls are born in wartime, the [illegible] statistics in thirty six large towns in England and Wales break all records in those countries for boy babies.

In the period from January to March for every 1,000 girl babies there were thirty-two more boy babies, and since that time the preponderance of the number of boy babies has been increasing materially.

The marriage rate for England and Wales in a recent three month period was 21.08 in every 1,000 population, being the highest ever recorded.

**East Too Cold For Icelanders.**

An Icelander visiting in Utah recently stated that probably a third of his countrymen had come to this country most of them settling in Washington and ended with the startling assertion that "they seek a milder climate, more like Iceland. The east and central states are too cold for them."

**Napoleon's Power.**

General Foy, the French military critic of the time of Napoleon, speaking of Napoleon's strength and his weakness, said: "Only the founders of religion have exercised upon their followers an authority comparable to that which made him the absolute master of his armies. This moral power became to him a fatal gift. He came to believe that he could prevail even against the most powerful material force, and this led him to scorn certain rules, the long continued violation of which could not remain unpunished."

**Some Difference.**

"How is it that Smith seems to be rolling in money? I understood from friends of his that he had got into a hole."

"So he did, but it was an oil well."—Baltimore American.

## Some Queer Ones

Hat made of fifty new $1 bills worn by a girl of Columbus, Ind.

How to manage hotels is being taught women in a recently opened Paris school.

How to become a soap box orator is being taught in ten lessons by mail for $5 by New York suffs.

Sixteen marriage proposals in four months caused Miss Dorothy Jones to resign as teacher in Kanak Peak (Cal.) schools.

Red hair a matrimonial disqualification, Denver eugenist tells fiery headed girl, in advising them to grab off a man while it's leap year.

Clothes don't make the man, but when fiance of Cleveland girl showed up among guests for wedding wearing overalls, she had him thrown out and declared the marriage off.

## WARN LEAP YEAR GIRLS TO AVOID FLAT HEADED MEN.

**Phrenologist Also Tells Them to Carefully Inspect Lips.**

To all daughters of Eve who have leap year [illegible] the [illegible] vocational guide and [illegible] William J. Kibby of Cleveland, O., offers advice concerning [illegible] qualities, characteristics and [illegible] of various sorts of men [illegible] intended to help the girls win their heart's desires without suffering [illegible] in the process. A good deal of what Kibby says is based upon phrenology.

A man who has thin, straight lips is branded a cold blooded, stony hearted creature, upon whom the dearest girl's appeal would have no effect. This sort of man will do his own proposing, [illegible] his own wedding and rule his household, and he'll do it more with his head than his heart. But if the man of your choice has full, well formed [illegible] Kibby says you may depend upon his capacity for and inclination to love. He also is susceptible to the right sort of feminine approach.

Kibby says the way to tell whether the [illegible] [illegible] [illegible] human emotion gives some [illegible] demonstration when it is aroused [illegible] evidence that love has been [illegible] is given by the deep crimsoning of the under lip. If his under lip is [illegible] pale when he is with you he doesn't love you. If it is crimson and you want him, grab him quick; [illegible] won't run.

A man with a broad, square, massive forehead is a good business man. He can plan ahead, has good business judgment. If the crown of his head is high and round he is absolutely conscientious, too, and if the back of his head is well rounded out he will love his home, his wife and his children and show them consideration above everything else in the world. The man whose head is flat on top, flat and almost even with his ears in the back and narrow and foreshortened on the front, whose lips are thin, whose eyes are cold, will not make a good husband in any sense of the word, says Kibby. The longer a man's jawbone the greater his capacity for affection, according to Kibby.

All these things are as applicable to women as to men, in the expert's opinion.

**BELL-ANS**
**Absolutely Removes Indigestion. One package proves it. 25c at all druggists.**

## TESTING GREATEST CABLE.

**New Design Stands Pull of 746,000 Pounds Without Breaking.**

A section of the largest hoisting cable in the world, made under a new design, withstood a pull of 746,000 pounds in a tension test at Lehigh university, South Bethlehem, Pa.

The cable was designed for use in the Mayari mines, in Cuba, of the Spanish-American Iron company and will be attached to fifty ton ore cars operating on an inclined plane of more than a mile, with a grade of 25 per cent.

In addition to the high strength demonstrated in the Lehigh test, the new cable is expected to have superior wearing quality because of its design, which includes six strands of thirty-seven wires and an independent wire rope center.

[illegible] a change of [illegible]

Finale, Act II, from John C. Fisher's Production of the Globe Theatre, N. Y. Production of the Musical Comedy Success, "THE RED ROSE," Quirk Theatre, Friday Night, February 11th

**Have You Seen the Kee-Lock?**

KeeLock THE PERFECT LENS MOUNTING

The Kee-Lock lens fastening is positively solid - no objectionable lens screws to weaken the lens or work loose. The "key" (W. S. C. Fig. 2) fits into a slot cut in the lens. This is heat cemented on all sides. The exposed portion of Kee-Lock fastening (light outer line, Fig. 2) acts as a flange and supplements the "key" in preventing any play or loosening of the lens. Much stronger and neater in appearance than the old style.

May we have the pleasure of showing you the Kee-Lock without obligation on your part?

**Wm. C. Morgan - Optometrist**

# OSLER THEORIES UPSET; SPEAKER DECLARES MAN REACHES ZENITH AT 40

Mr. Irving Galusha addressed the Borrowed Time Club at yesterday's meeting in part as follows:

According to that reported theory of Dr. Osler I have two years yet to live before I reach the chloroform climax. You who sit here before me have completed many a year in proof of the fallacy of and to give the laugh and the lie to that theory. To say that a man at forty has completed his terms of usefulness is utter nonsense, particularly when the light of evidence of all you borrowed timers is thrown upon the subject. Why, most of you had just begun to live at forty and most of you can testify that your fullest years have been enjoyed since the passage of that mark. We'll grant to that Osler person that most of the mistakes of life are made before the fortieth milestone has been passed, but we'll take issue with him and against the chloroform route on the ground that we insist that we poor humans should have opportunity in our years of discretion to profit by the wisdom gained through the mistakes of our forty years of childhood.

**Dr. Osler Accused**

Isn't it your belief, gentlemen, that Dr. Osler was influenced by a pessimistic spirit when he laid down that obnoxious dictum? Isn't it just possible that he was animated by a spirit of jealously against someone who was about to reach the age of forty? Certainly we cannot feel that a spirit of optimism prompted the startling thought that a man lay down his labors and his interests just when he had entered into the fullest enjoyment of them. Take it from me, the idea of youth and age of the man who gave birth to that thought was sadly warped or had not been arrived at by the following of proper channels.

I have long been an admirer of the Borrowed Time Club and have gloried over the lesson that its organization and continuance may teach. Often, as I have given thought to the Borrowed Time Club and considered the lives and years of its members, there has come to my mind the words of that Scripture that saith: "As a man thinketh in his heart so is he." Perhaps you may object to the application of this Scripture in the particular manner in which I am about to apply it. However, I'm going to risk your displeasure at the start in the hope that as we proceed your hearts will warm toward the subject and toward me.

When you hear that Scripture text: "As a man thinketh in his heart so is he" hurled at you from the pulpit desk what is your first thought as to the sermon that is to follow? You just settle back in your pew secure in the knowledge that

"A wretched thing it were to have thine heart.
Like a thronged highway or populous street,
Where every idle thought has leave to meet,
Pause, or pass on as in an open mart,
Or, like some roadside pool which no nice art
Has guarded that the cattle may not beat nor foul it
With a multitude of feet, 'till of the heavens it can give back no part.

With this knowledge you are prepared to listen to the admonition:

"But keep thou thine a holy solitude,
For He who would walk there must walk alone;
He who would drink there must be first endued
With single right to call that stream his own.
Keep thou thine heart close-fastened, unrevealed.
A fenced highway and a fountain sealed."

**As the Root so the Tree**

Nine hundred and ninety-nine times out of every thousand you would be absolutely right in your thought as to what you might reasonably expect in the way of a sermon from the text. The text was written in exposition of the thought that if a man is bad at heart the fruits of his life will be bad. The text was written in exposition of the thought of protest against hypocrisy. Don't think for a moment that you can fool God as to your goodness or badness. Don't think for a moment that you can have rottenness of soul and a fair exterior and pass yourself off as a paragon of morality with impunity. Remember, it doesn't matter what you may look like if your heart is rotten you are bad. In other words, when you hear this Scripture text you rightly expect and usually get a sermon. But, you're not going to get a sermon today. I'm going to apply this text in a different way. I'm going to show you that this Scripture may be applied in a little homily on the subject: "Youth and Age." "As a man thinketh in his heart so is he."

I have sometimes heard it remarked that living in the past is a mark of old age and living in the present and looking into the future is a mark of youth. To me these sentences are but a mark of superficiality of thought on the part of him who utters them as statements of fact. They are no better than half truths at their best. To him who is full of years and who has made his heart the treasure trove into which he has stored away the unlimited sunshine and happiness of good deeds to sit in the firelight in the snowy winter of earthy life and dream the dreams of the golden past may be but the means of confirming faith and a glorious hope of eternity. I'll grant you, then, that to him who can thus contemplate the past his looking into the future is his mark of youth in age.

The fundamental definition of that term "Youth" as given in the dictionaries is "the state of being young" and, conversely, I suppose, though I have not looked it up, the fundamental definition of the term "age" must be "the state of being old." I presume that the makers of the dictionaries might be charged with having in mind as they wrote their definition the consideration of years as a means of determining "youth" and "age." Wherefore I take it as our right to hurl at them the question: At what particular year of life does one cease to be young and become old?

**Value of Play**

I have seen old children—little bodies crushed with the weight of toil and with their countenances wizened with hardship and the young light of their eyes blotted out because they have never been permitted to feast in childish delights upon the beauties of nature. I have seen men of seventy with a spring in their step and the light of the joy of living beaming from their eyes and illumining their faces. The children were old and the men were young in the light of those definitions of youth and age: "the state of being young" or "the state of being old."

Adam lived 930 years, Seth walked the earth for 912 years, Enos lived 905 years, Cainan lived 910 years, Methuselah, the oldest of our antediluvian ancestors, registered an earthly life of 969 years, and so the story goes in holy writ and in the Genesis of the Bible you do not find it written of these men that they were "old." The general terms used concerning the years of these men were "and all the years of "so and so were so many." If you want me to tell it I would say it thus— A man dies—separates from this earthly life—when he's ready for eternity and not before, no matter whether his readiness is for heaven or for hell. However, that is a digression and wanders from the thought in hand, to wit—those Bible characters were not spoken of as "old"—they were just full of years—and my assertion is that years are not the true measure of oldness or youth.

Thomas A. Edison is not old just because his hair is white and his step slow and the years of his life many—he's working yet, twelve, fourteen, sixteen hours a day.

**It pays to Venture**

In the current number of "The Country Gentleman," February 5th date, is an article by Helen Christine Bennett entitled "A Venture in Cold Storage." The writer sets forth the factor concerning the incidents or conditions which led up to the building of a cold storage plant on his farm by George Smith of South River, New Jersey. The narrator's purpose is to set forth for the particular clientelle of "The Country Gentleman" an enlightening array of proof to the effect that a cold storage plant situated on such a farm as Mr. Smith's under the peculiar conditions encountered by Mr. Smith was to be looked upon as a paying venture and, therefore, she went into detail concerning the farm, it's location, it's natural advantages, it's trees and their arrangement. She told minutely of the construction of the storage plant and it's cost of building and expense of operation. Through it all, too, the writer wove the story of the man, Smith, whose aggressiveness and energy and buoyant hope had carried his plan through to completion—and, mark you, she prefaces the article thus:

"Apples, as perfect as the day they were picked, selling in May for prices averaging three dollars a barrel, ungraded, just as they were packed when they came from the trees, seem to confirm George Smith, of South River, New Jersey, in the belief that his venture in a cold storage plant is going to be justified.

"The storage plant is in it's fourth year. It was built before the orchards were quite ready for it; only one-sixth of the trees are at present in bearing. Last year it held 1,100 barrels of fruit, which filled it to about one-third of it's capacity.

"Mr. Smith says the apples sold from the plant brought at the lowest estimate one dollar more a barrel than those sold direct from the orchard in the fall. This gross profit of $1,100 is sufficient to pay the running expenses, the interest on the capital invested and to allow something for depreciation, all of which means that the plant is already self-sustaining. Mr. Smith calculates that when the plant is filled to capacity it will pay for itself in five years.

" 'Probably that will not be for ten years' he says, 'but in fifteen, when all the 3,000 trees are in full bearing, it is going to be too small.'

Then comes the writer's significant word which is the point of the illustration I have quoted thus to lead up to.

"This prophecy," continues the writer, "is noteworthy in face of the fact that Mr. Smith is sixty-nine years old—an age at which many prosperous farmers retire. Mr. Smith's method of retiring is to start something ned. At sixty he abandoned successful truck farming to grow trees, because he liked trees better than truck. At sixty-five he had an idea he would like to try a cold storage plant."

I hold, gentlemen, that the writer put it wrong when she said that Mr. Smith is sixty-nine years "old." To put it tritely Mr. Smith is sixty-nine years "young" or in the words of the good book "the years of his life" are sixty-nine years, for I hold that "as a man thinketh in his heart"—conceives plans, builds, living every day and year as a day and year of achievement—"so is he."

### 14,000 ACRES OF LAND TO BE OPENED IN NEBRASKA

Postmaster P. T. Conley is in receipt of a communication from the Department of the Interior, U. S. Reclamation Service, Chicago, conveying information of value to persons thinking of settling in Nebraska.

The Department will on March 24, open by drawing 14,000 acres of land under the North Platte irrigation project. The drawing will be held at Alliance, Neb., the size of farms to vary from 40 to 80 acres each of irrigable land, four miles from railroads. The lands are fairly smooth, easily prepared and are located in the midst of an agricultural community already developed. This particular section is adapted to general farming, live stock raising, dairying and the growing of potatoes, sugar beets and other root crops and vegetables.

Settlers are required to live on homesteads three years and to purchase a water right at actual cost from the Government. Water rights are payable in 20 years without interest.

Further details concerning the opening may be obtained by addressing the Settlement Agent, at the above address.

# PUBLIC NOTICE

NOTIIE is hereby given that the undersigned intends to file with the Commissioners of the Land Office at the office of the Secretary of State, Albany, on the 24th day of February, 1916, an applicationfor grant of certain abandoned canal lands described as follows:

Situated at a point in the junction of First and Oneida streets "beginning at a point in the No th line of Oneida street 35.17 feet westerly from the Southwest corner of block No. 20, thence N. 28 degrees 31 minutes East 154.12 feet, thence N. 64 degrees 28 minutes W. 46.52 feet; thence S. 28 degrees 45 minutes West 95.40 feet; thence N. 81 degrees 54 minutes West 95.40 feet; thence N. 81 degrees 54 minutes E. 72.78 feet to a beginning, containing 0.213 acres of land.

NOTICE is further given that it is the intention of the undersigned to appropriate these lands for the purpose of a Public Municipal Market and that a two (2) story brick and stone building of the dimensions as follows: Width front, 72.48; width rear 46.52; length Eastern side 154.12, [illegible] western side 194.18, will be [illegible]ted thereon.

Dated, January, 1916.

Signed

City of Fulton by
Victor C. Lewis Mayor

### NEIGHBORS TO SCAN THE WOODMEN'S THERMOMETER

Special arrangements will be made at tomorrow's meeting of the Modern Woodmen of America, to receive the reports of all the excursion committeemen. Neighbor Roy will be stationed in the reading room, where each man can reach him before entering the Camp rooms.

Neighbor William Carl will register the degrees on the thermometer as fast as reports come in. Each ticket sold to the class adoption counts one degree.

Several Neighbors of the Syracuse Camp have been invited to be in attendance here tomorrow and if events transpire as on former visits, a good time is in store for all.

The member who fills in the most will be presented with a beautiful emblem of the society.

### BILLY SUNDAY TRAIL HITTERS COME TONIGHT

Another pilgrimmage of Billy Sunday trail hitters will come to this city tonight, making the First M. E. church their destination. They are representatives of the Syracuse Business Men's Association of trail hitters, and include Eugene A. Beach, real estate broker; George Wilson, ex champion wrestler; F. E. Ergood, life insurance agent. Billy Sunday songbooks will be used and the meeting will begin at 7:30 sharp.

### MISSION WORKER TO LECTURE THURSDAY

The Rev. Hugh W. Rankin will deliver an inspiring address at the Presbyterian church Thursday night at 7:45. His subject will be "Sunday school missions on the American Frontier." Dr. Rankin is one of the most successful workers in this great field and all should hear him who are interested in the true development of the wonderful West. The public is invited. No admission will be charged.

### DELTA ALPHA CLASS TO BE ENTERTAINED

Members of the Delta Alpha class of the Congregational church have a treat in store tonight. It is to attend the reception and entertainment to be given by Mrs. George Franklin and Mrs. Fred Castor, at the latter's home in Fulton ave., Friday evening. The place of meeting will be at the Fairman store in West Broadway, at 7:45 o'clock. Conveyances will be in waiting there for the class.

### WOODMEN TO DANCE THURSDAY EVENING

Old and new dances will be the amusement afforded to the Modern Woodmen of America and their guest at the ball which occurs Thursday evening, from 9 until 1 o'clock. Good music will be provided for the 75 couples who are expected to attend.

## Those You Know

Mr. and Mrs. B. W. Bennett and sons, and Mr. and Mrs. F. B. Dilts have returned from their trip to the Sunny South—Florida.

• • •

The Rev. Charles Robertson, pastor of the Presbyterian church announces his return to the city Thursday morning. Mrs. Robertson accompanied her husband to East Orange, N. J.

**BUSINESS—Particularly the most desirable business—is very much like the sport of fishing. You can catch it if you use good bait. The Evening Times offers you the correct bait.**

## WITHOUT HAT OR COAT.

**West Virginia Man May Have Found a New Health Cult.**

Wheeling, W. Va.—A new health cult may be founded here following the great success achieved by Joseph Bleifus, who has not worn a hat in two years and has not had even the semblance of a cold in that time. Bleifus has not only gone hatless for two years, but he has gone coatless. In all kinds of weather he has gone about without hat, coat or overcoat, and he has not been sick during that time.

Bleifus is a big strapping fellow not yet out of his teens and with his brothers conducts a meat market. He is regarded as one of the finest specimens of physical manhood in the city. Bicycle riding induced him to shed surplus clothing. He found hats and coats cumbersome and superfluous, got out of the habit of wearing them and then passed them up altogether.

## HERO MEDAL ASKED FOR BABY

**Four-year-old Ran Two Miles For Aid For Injured Parents.**

Springfield, Mo.—Members of Florence lodge of Elks of this city have forwarded to the Carnegie hero fund commission at Pittsburgh the name of four-year-old Cleta Comstock, who lives near Cabool, Mo., as deserving of recognition for an act of heroism.

Cleta was the only one not hurt when her parents, Mr. and Mrs. William Comstock, her baby sister and herself were hurled from a wagon in a runaway accident in the timber near their home. The wagon collided with a tree. Both legs of both parents were broken, and the baby was bruised. Cleta ran two miles through the dark woods to the home of the nearest neighbor and summoned help. The accident occurred last November. The father and mother have recently been released from the hospital.

## FEARED THROUGH LIFE SHE'D BE BURIED ALIVE

**Strange Provisions Made In Will of Woman.**

Los Angeles.—The will of Mrs. Laura Hemans White, who died in Pittsburgh nearly a year ago, has been received by Public Administrator Bryson in view of the distribution of the estate in Los Angeles county. The city of Los Angeles desires to purchase property belonging to the estate, at 3721 Downey avenue, now North Broadway, for school purposes.

Before the deal could be closed it was necessary to have the will, because a clause bequeathes the property to Mrs. Apollonia P. Melber for life. After Mrs. Melber's death the property is to go to Mrs. Katherine L. Hahn, a niece of Mrs. Melber and daughter of Victor Hahn.

Because of her fear of a premature burial Mrs. White provided unusual means to determine that the spark of life had left her body before it was cremated. In her will she declared:

"Having been all my life subject to bondage through fear of premature burial I will my body be kept until evident signs of decomposition declare themselves—at least a week—that it be visited and carefully inspected three times daily, for which the person performing this office shall, upon making affidavit that it has been faithfully performed, receive the sum of $50. Just before cremation it shall be stabbed three times through the heart by a duly accredited physician, who shall receive therefor the sum of $20."

A trust provision prohibits distribution of the estate for ten years. Among the holdings are a Bakersfield ranch, lots in San Diego and lots at Sunset beach and La Canada park.

## FIVE CENTS FOR HORSE.

**Farmer Made Bid as a Joke, but Creature Was Sold to Him.**

Georgetown, Del.—The lowest price ever paid for a horse in Delaware was received at a public sale of the property of Delaware Burton when David Warrington bought one for 5 cents.

When it was offered for sale the bidding was very slack; in fact, there was no one to start it. Warrington, after considerable speculation, bid 5 cents [illegible] was dumfounded a moment later when it was knocked down to him at that price. The [illegible] soon hauling [illegible] it is rather thin, [illegible] proper care, horsemen say [illegible] animal worth $100.

## ROBIN A FALSE CUPID.

**Love Note He Bore Gave Address Which Exists Not.**

Washington, D. C.—Cupid's robin, which made its appearance at Penn Yan, N. Y., recently, with a love note tied around its leg signed with the name of Miss Beatrice Hinman of 1182 Pennsylvania avenue, Washington, is apparently a false love messenger.

There never was such a number as "1182 Pennsylvania avenue," for the postoffice building happens to occupy the entire block between Eleventh and Twelfth streets on that historic thoroughfare.

Furthermore, the Washington city directory fails to record the name of Miss Beatrice Hinman. There is only one woman Hinman listed in the directory, and she is superintendent of Sibley hospital.

**Man's Limitations.**

Man has been able to learn some things, but has forgotten many others. He has not added one sense to his senses, one limb to his limbs, one faculty to his soul. He has merely explored another region of the circle in which he is confined. The human mind is always in motion. It runs from one point to another. It exalts what it embraces and forgets what it has abandoned. It never manages to cultivate one part of its domain without leaving the others fallow.—"The Inequality of the Human Races."

**Air We Breathe.**

Two thousand gallons of air is a grownup person's allowance for twenty-four hours.

# LOCAL WOMEN AT KANATENALI

## Brilliant Social Event Held at Syracuse Club Yesterday ---Musical Given by Men.

Among those who participated in the monthly luncheon at Ka-na-te-nah Club yesterday afternoon were a number of local women. The Fulton women who are members of the club are Mrs. F. E. Goodjon, Mrs. Walter Bradley and Mrs. N. H. Haviland, and their guests were, Mrs. Gustav Amsermet, Mrs. Harvey MacMurchy, Miss Safford, Mrs. G. B. Farley, Mrs. S. Jess Newton and Miss Abagail Morton.

Valentines were the main feature of the decoration used. A musical was presented by men following the luncheon.

The musical program was arranged by Mrs. O. D. Burhans and Mrs. Anna Gregg Ackerman was chairman for the afternoon. Those who contributed to the entertainment were the Central City Male Quartet, comprising William A. Snyder, Harry S Wisehoon, Ralph L. Stilwell and Clarence Dillenbeck and Prof. Harry S. Vibbard of Syracuse University, accompanist.

The auditorium, where the 121 diners sat, was brilliant with red candles and festoons of hearts. Similar decorations were used on the table where Mrs. Daniel Crimmins was hostess for her guests. A large "Kewpie" centered the board and held ribbons attached to a bouquet of deep red roses at either end of the table. The miner decorations, place cards and Valentine's day. The guests were:

Mrs. Edwin S. Jenney, Mrs. Albert H. Hildreth, Mrs. Merwin W, Lay, Mrs. Nellis S. Rich, Mrs. Jerome L. Cheney, Mrs. Frank B. Hodges, Mrs. William Jerome Lewis, Mrs. Ralph Avery, Mrs. Mary J. Sibley, Mrs. F. Mrs. Sidney J. Kelly, Mrs. William A. Le Brun, Mrs. Nicholas Peters Woof.

Mrs. William W. Knapp, Mrs. B. ton, Mrs. John Garnett, each of whom Syracuse, Mrs. T. H. Mesick, each Sarah Millen, Mrs. Ackerman, Mrs. Comstock and Mrs. Burhams; Mrs. F. H. Wood and Mrs. A. F. Coon, Fayetteville; Mrs. Henry Chilos, S. Bend, Ind.; Miss Grace Brayton, Utica; Miss Mary J. Purdy, Boston, Mrs. W. S. Marion, Newark.

The hostesses dispensing hospitality were:

Mrs. Charles H. Brooks, Mrs. N. Nelson Tubbs, Mrs. John C. Wurzburger, Mrs. William H. Wiltsie, Mrs. George W. Stark, Mrs. T. C. Hopkins, Mrs. Baldwin, Mrs. John Kullmer and Miss Frances Driscoll

## FULTON MAN PORTRAYS SPAETLING HERE TONIGHT

Mr. Frank Wooley, whose residence is in this town will be seen at the Quirk Theatre today, afternoon and evening, portraying the character of Spaetling in "The Spring Maid," in which part he scored an emphatic hit in the original production of this Viennese masterpiece, in New York several seasons ago.

In addition to playing one of the leading parts, Mr. Wooley is stage director of the company and has to his credit the success accorded the production for its scenery, costumes, etc., by the press of all cities that have played this charming operetta by Heinrich Reinhardt.

The Spring Maid has never before played in this city. Manager Darleigh this morning stated a number of local people are confusing this operetta with the Rose Maid which was played here last season.

## PROMINENT MEN LEAVE TO INSPECT DETROIT

Mr. Frank C. Ash, electrical engineer and secretary of the Oswego Falls Pulp and Paper company, and Mr. L. W. Emerick, president of the First National Bank, left for Detroit last night to familiarize themselves with details connected with the construction of the proposed steel dye casting plant in this city.

A meeting of men who have indicated their intention of buying stock in the new company was scheduled to take place last night, but it did not materialize, due to the bad weather conditions.

## STEAM HEATNG BEING INSTALLED IN CHURCH

The work of installing a steam heating plant in the new parish house of All Saints' Episcopal church began this morning under the direction of Mr. William C. Church. The building will be ready for occupancy in the early Spring, it is expected. No expense has been spared in making the building serviceable throughout, extra precautions being taken to cover it with an especially strong roof.

## LAD AND LASSIE FORSOOK THE PARSONS

Miss Nellie Maclaren and Mr. John H. McConnell, whose difficulties in securing a clergyman to tie the nuptial knot, after they had secured a license at the City Hall yesterday morning, caused City Clerk Allen a lot of discomfiture, forsook the limits of this burg early in the afternoon and departed for Oswego aboard an interburban trolley car, where, it is presumed the pair were more fortunate.

## MARY THERESA MAHANEY FUNERAL TOMORROW

The funeral of Mary Theresa Mahaney, who died at the home of her parents, 8 W. 6th st., on Sunday, will be held tomorrow at 8:15 a. m. from the house, and at 9 o'clock from the Church of the Immaculate Conception. The Rev. John L. Lindsman will officiate. Burial will be made in St. Mary's cemetery.

## H. WALLACE SUMMERVILLE

Mr. H. Wallace Summerville, 67, died at the home of his sister-in-law, Mrs. B. Bradshaw, 206 E. Broadway, yesterday. Mr. Fred Summerville, of West 4th st., his brother, is the nearest relative living.

Mr. Summerville's body was removed to his brother's home, from which place the funeral will be held tomorrow afternoon at 2:30, the Rev Chas. Olmstead officiating. Burial will be made in Mt. Adnah cemetery.

Mr. Summerville had been a resident of this city for a number of years, enjoying a reputation for being an enthusiastic horseman.

Leave orders for Miss Crysler's Baking with Mrs. J. K. Steele. Phone 378. adv

# CITY ATTORNEY REPORTS OFFICIAL'S FINDINGS

(Continued from Page One)

are insufficient for the current year. We are asking power to raise the necessary money to pay these bills.

"Second, arises from the appropriation of moneys applicable to certificates of indebtedness in anticipation of the payment of special improvement taxes. This accrued through book-keeping errors.

## Tapped Wrong Fund

"The water department has improperly, though evidently not with intention, paid out about $6,900 of this money. It has used all the cash it has received and $6,900 of this improvement tax money. This accrued in the following manner; About four years ago it was determined to build a concrete stand-pipe for the water work (municipal). $30,000 was raised by bonds. The money was credited to the water fund. In 1913 an expert was called in and a new set of books opened. It was properly determined to make a separate account for the standpipe moneys. Accordingly $6341.48 and $571.92, a totalof $6913.40, the balance unexpended was credited to this amount. But, through oversight evidently, the amount was not charged out of the water fun; thus that fund appeared to have $6913.40 more than it actually had. All of this apparent balance was paid out on orders by the chamberlain. The special improvement moneys were deposited with the general moneys of the city (they should have been paid on certificates) and it was from them that this amount was paid.

"In the improvement fund, a former chamberlain evidently added up the receipts of this fund, on an occasion, $1,000 too much and this error was carried on. The improvement department expended al its apparent balance and so, likewise, about $1,000 of special improvement money was improperly expended by this department.

This makes a total of approximately $7,900 of special improvement taxes, applicable to certificates of indebtedness, improperly or otherwise used. This must be replaced, or the city will be sued on these certificates."

Mr. Hillick concludes his statement by adding that the receipt of some small sums has reduced the deficit about $4,226. However, it will require about $15,00 to liquidate the deficits, and the Legislature is besought for the necessary relief.

# FIRST TIME ON STEAM CARS AT AGE OF 82

## He'd Drive Any Place Where He Liked Conversation.

Kansas City.—Not until his six-year old grandson took him in charge did Peter Franklin McCubbin of Virginia eighty-two years old, ride on a railroad train. He passed through this city recently with the grandson, Morris Williamson, on the way to Salt Lake City, where he will live with his daughter, Morris' mother.

At the Union station Mr. McCubbin showed a keen interest in things around him and said he had enjoyed his trip a great deal.

"It wasn't because I was afraid of trains that I didn't ride on them," he said. "I just never had occasion to go anywhere I couldn't drive.

"I raised a family of eight children, and, although they all insisted, I never went to see any of them. They usually came home once a year and saved me the trouble. My wife traveled considerably, considering, and one of my daughters has been to Europe, but I always got along fine on the farm. When I got tired there I would hitch up and drive to Pittsville, and if the conversation there didn't suit me I would drive over to Eldredge, twenty miles away."

## HE BET ON THE ATHLETICS.

### Georgia Tax Collector Now Admits $11,000 Shortage In Accounts.

Waycross, Ga.—After losing more more than $3,000 belonging to the city of Waycross in bets laid in the chances of the Philadelphia Athletics to win the world's series of 1914 Alex C. Lowther, city clerk and tax collector of Waycross, attempted to regain the money lost by using other sums belonging to the city until his accounts were more than $11,000 short, according to a letter from Lowther made public by Mayor Scott T. Heaton.

Lowther in his letter says he expects to repay the money taken. He returned the keys to the city vault.

# THEY LOVED TEACHER SO MUCH SHE FLED

## Had So Many Proposals of Marriage She Couldn't Stand It.

Oroville, Cal.—Miss Dorothy Jones, who has been teaching school near here, has thrown up her job. The schools of the Kanak Peak district can go teacherless so far as she is concerned. She handed her ultimatum to the school board, and since her demands were not met she has quit, resigned and fled.

In her communication to those who hold the destinies of the Kanak Peak youngsters in their calloused palms Miss Jones says that a man is needed. During the four months in which she has been wielding the chalk to improve the budding native sons they have learned one thing well—the art of proposing. Sixteen of them have suggested that Miss Jones abide permanently in Kanak Peak and change her name to something less commonplace than Jones.

It got so that every time one of the ardent pupils raised his hand the teacher feared he was about to pop the fatal question. When it came to adding up a column of figures the Kanak Peak boys were not there, but at proposing they were unanimously present. Miss Jones admits that she can stand it no longer. There is a limit to everything, she avers. To be a successful schoolteacher in Kanak Peak, she says, one must have a husky husband near by or else be a man.

### The Turnip.

The turnip is supposed to be a native of Asia and Europe. It has been cultivated for centuries. The wild East Indian turnip is said to be remotely kin to the edible turnip. It is the size of a walnut and first tasted is sweetish, but in a moment the taster's tongue feels as though it were pricked by a hundred hot needles, and he feels like expectorating for hours after. It is the country boy's favorite medium for a joke on the visiting town boy.—London Tatler.

# NORMAL TERROR UNDER LEASH

When the Oswego Normal five make their appearance on the court at Church's hall tomorrow night, to oppose the Maccabees for the third time this season, it will be impossible for Landers to repeat his past performances, according to Captain [illegible]ves of the local team, who believe that he has devised a method to eliminate the center of the Oswego outfit from the scoring column.

Transferring Crockett from center to forward, Snow from forward to guard, and Merrill from guard to center, will materially affect the working order of the local team and will result in a better balanced outfit.

Last night the first team held a stiff practice in preparation for the coming game and the new lineup worked to excellent advantage. With an advantage of height and the fact that the game is to be played on the home court, the Maccabees should prove victors in the match.

Manager Snow of the Maccabees, in response to the request of a number of Fulton friends of the school boys, has made arrangements to hold a dance following the game. A large crowd of Normal students will accompany the team, it is understood, and arrangements to comfortably seat the audience anticipated will be taken up with the basketball committee of the lodge tonight.

## MRS. ANTHONY DE BARBER RETURNS FROM SANITARIUM

Mrs. Anthony DeBarber of Buffalo street has returned from Mt. Clemens where she has been for physical treatment. Mrs. DeBarber is greatly improved in health and is warm in the praise of her physician.

Miss Theresa Musante of the Katz department store accompanied Mrs. DeBarber.

## OSWEGO LEADS LOCAL POOL PLAYERS

For the first time since the 1,000-point pool match was arranged between All-Fulton and All-Oswego, the Oswego team took the lead through the defeat last night of Walsh and Simineau, the local representatives. The Oswegonians are now four points in the lead.

Walsh had no difficulty in disposing of McMann, the Oswego cue artist although the latter had a 22-point lead which the Fulton man had to overcome. This contest ended in a score of 50 to 39. Guzzo, who has so far in the series failed to maintain his reputation as the best pocket billiard player in Oswego county, loosened up and surprised everybody by defeating Simineau 61 to 21.

The match was played in Walsh's Pocket billiard parlors. A game will be played in the Alhambra, Oswego, tonight, the same two players representing Fulton, while Morse and Powers will represent the All-Oswego combination.

## LEGAL NOTICES

### Notice to Creditors

In Pursuance of an Order of Clayton I. Miller, Surrogate of the County of Oswego, New York, notice is hereby given according to law, to all persons having claims against Sarah Hancock, late of the City of Fulton, in said County, deceased, that they are required to exhibit the same, with the vouchers therefor, to the subscriber at the law office of Claude E. Guile, 35 South First street, Fulton, in the County of Oswego, New York, on or before the 1st day of September, 1916.

Dated this 7th day of February, A. D., 1916.

# WE WANT READERS TO KNOW IT

## The Evening Times Has Been Issued More Than 350 Consecutive Days

From the very beginning it was said this could not be done---in Fulton. The city was described to us as a "Ten-,Fifteen-,Twenty-,Twenty-five-,and Thirty-Cent-Town—Nothing Over Thirty Cents."

It has been proven that the *informant was wrong. His estimate was a guesstimate.*

Knowledge of the Daily Newspaper Business is the backing for the foundation of Fulton's First and Only Daily Newspaper—which is destined to become a successful business.

# THE EVENING TIMES

### OF FULTON, N. Y.

Will become sufficiently broad in its scope to meet every need of the people of this vicinity. Why? Because its underlying principle is right. There's no Guesstimating in the assertion. THE FULTON EVENING TIMES is for

*FULTON--First, Last and All the Time*

# STRAIGHTENING NEW YORK CITY'S FINANCIAL TANGLE

**BROWN INVESTIGATING COMMITTEE RECOMMENDS RELIEF MEASURES IN ITS FIRST REPORT TO THE LEGISLATURE, BUT SAYS PERMANENT RELIEF CAN BE SECURED ONLY BY THE PRACTICE OF RIGID ECONOMY BY THE CITY ITSELF.**

New York.—Such relief as it is possible for the Legislature to give the taxpayers of the City of New York will be given if the recommendations just made to the Legislature by the Brown committee, which has been investigating the financial condition of the city government, are enacted into laws.

In addition, the way will be opened for the voters of the city itself to correct conditions over which the Legislature has no control through the medium of referendum bills.

Unless the voters of the city take advantage of the opportunity given by the Legislature to correct the present methods of administering the city's affairs, the conditions complained of, which have placed the city's credit in jeopardy twice in seven years, will continue.

The mandatory legislation complained of by the city administration is not the result of up-state influence as has been charged in an effort to line New York city up against the rest of the state. Practically all of the mandatory legislation was initiated in New York city, supported by the New York city delegation in the Legislature and approved by the mayor of New York.

There is still a very acute difference of opinion right in the city administration as to the merits of some of the mandatory legislation complained of by Mayor Mitchel, and it is on this account that the Brown committee has recommended that questions on which the official representatives of the city are unable to agree be settled directly by the voters through the medium of referendum bills.

No partisan issues have been raised by the committee which has devoted months to ascertaining the actual financial condition of the city government, the causes thereof and endeavoring to find a remedy.

**Rigid Economy Absolutely Necessary**

The conclusion reached by the committee in its first report is that permanent relief for the people of New York can be secured only by the practice of rigid economy.

Fourteen bills will be introduced by the committee.

If these bills are enacted, the city's tax levy will be reduced, as compared with the tax levy of this year, by $12,900,000. It will further be reduced by just so much as New York city's portion of the direct state tax is less than $14,000,000. If there is no direct state tax this year, the total relief to New York city's next budget will be $26,900,000.

**Bills Will Not Give Permanent Relief**

That these measures will not afford permanent or reliable relief is plainly set forth in the first report of the committee, which went to the Legislature Feb. 7. On this point the report says:

"It is apparent that the city has availed itself of its debt-incurring capacity to the utmost limit, and that the debt has been increased through various devices, partly statutory and partly judicial, in actual excess of the prescribed limit. This policy has served the purpose of getting more money to spend, while keeping down the tax rate. The inevitable has happened, and the tax rate is mounting so fast as to lead the city officials and the taxpayers' association to protest that the last budget creates a tax crisis. In this view the committee coincides. It is true that the tax rate may go higher, and that it is in fact higher in some American cities, but with every increase the condition must become more critical. As appears from published statistics, the present debt of Boston is $84,000,000; of Philadelphia, $100,000,000; of Chicago, $26,000,000; of St. Louis, $22,000,000; of Baltimore, $60,000,000. The debt of New York is THREE TIMES THE COMBINED DEBT of these five cities, ALTHOUGH ITS POPULATION IS LESS than their combined population.

"On the basis of the city's present municipal activities, there is no prospect of a reduction in taxes. The Comptroller has made estimates for the committee showing that the budget of 1916 will exceed $215,000,000; the budget of 1917, $216,000,000; the budget of 1918, $225,000,000; and the budget of 1919, $238,000,000.

"This critical condition may be partially and temporarily relieved by an improved real estate market, by new sources of revenue, or the absence of a direct state tax. BUT THERE IS NO PROMISE OF PERMANENT OR RELIABLE RELIEF UNLESS METHODS ARE CHANGED; otherwise the crisis will continue under more aggravated conditions."

**Banks Saved City's Credit**

The fact that twice within seven years the banks have had to come to the city's rescue to protect its credit is cited as an indication of the critical condition of the city's finances; that this condition is recognized by the bankers is indicated by their making the adoption of a pay-as-you-go policy by the city government a condition to their financing of the loan of $100,000,000 in 1914. That this policy which is now pursued under a resolution of the Board of Estimate be enacted into law is one of the recommendations of the committee and the recommendation is accompanied by a bill.

The practice of borrowing money in anticipation of the collection of taxes is pointed out by the committee to be very expensive. The annual interest charge for these loans has averaged $3,500,000. The total amount paid in the last ten years is $36,470,-377, or substantially $5,000,000 more than the city has paid during the same period in direct state taxes. On this point the report says: "The city always spends borrowed money for its current expenses. Such issues could be avoided if taxes were collected in January and July. The committee favors making this change."

**Put Pay-As-You-Go Policy in Charter**

In connection with its recommendation that the pay-as-you-go-policy, now carried on under resolution of the Board of Estimate, be written into the city charter, the committee says in its report: "This resolution sets forth a sound policy and will unquestionably be adhered to by the present administration. It was adopted, however, not as a pledge by this administration but as a pledge by the city, in part consideration of the loan. In no other way could the city's credit be saved. The resolution should be incorporated in the city charter. If, as some have argued, this may tie the hands of the city when the public interest requires it to incur a liability too great to be paid as a current charge, a special bill can be had if it meets administrative and popular approval. In any event such a crisis would be negligible in comparison with the crisis that is sure to follow a breach of faith, and the greater crisis that will follow a return to past financial policies."

**Referendum on Salaries**

The chief complaint of the New York city administration of mandatory legislation that calls for the expenditure of forty-nine and a half million dollars over which the Board of Estimate has no control, is considered at length in the report. Of this amount 66 per cent is for the department of education. Since 1899 the school attendance has increased 85 per cent while the salary list has increased 222 per cent. The laws responsible for these increased expenditures received the support of the New York city delegation in the Legislature and the approval of the Mayor. In order that the city may determine for itself the question of the fixing of salaries, the committee has introduced a bill conferring on the city power to fix the salaries of its officers and employes other than judicial and elective officers with a referendum.

Another bill to be referred to the voters of the city in the event that the city administration and the New York city legislators cannot reach an agreement on the question, places county expenses, including salaries, under control of the city.

The committee recommends that the city be relieved of the expense of supporting its normal schools by having the state take them over and maintain them at state expense as are the other normal schools.

**Drastic Action Required**

The committee recommends that large powers be conferred upon the Board of Estimate to abolish and consolidate departments, of which there are now 124 in the city, and says: "The financial situation requires some drastic action in seeking better government by having less government. Departmental activities should not increase several times faster than population."

Regarding the reduction of expenses, the report says: "The committee is satisfied that the administrative expenses of the city can be materially reduced without injury to the public service and that measures of relief are by no means limited to the recommendations of the committee. It is a hard saying, but New York city will remain for many years in cramped financial circumstances unless an economy obtains which not only checks increase of administrative expenses, but actually reduces them.

**The City Must Choose**

Of the difficulties in the way of retrenchment, the report says: "It is evident that the people of the city do not realize or will not acknowledge the city's true financial condition. The demand for new and greater expenditures is almost universal. Three schemes involving the expenditure of $50,000,000 are on the verge of execution. Ten million dollars for the court house; $10,000,000 for the Marginal railway, and $25,000,00 for the Schoharie reservoir. If these are completed for less than $60,000,000 they will stand as isolated monuments of economy. Their utility and desirability cannot be questioned, but the city must choose between public inconvenience for want of new utilities and public and private inconvenience from hopeless financial burdens. It must reject all plans for expenditure except the absolutely essential."

**What the Report Shows**

The report shows:

That the city spends $40,000 a year to maintain the civil jail with an average population of fourteen prisoners, or at the rate of $2,857 per prisoner.

That the city has over 80,000 employes on its payroll which amounted last year to $102,106,430.

That while the population increased less than six per cent in five years, from 1910 to 1915, the payroll increased twenty per cent.

That the city has no control over the court house board or the water supply board, although both boards were created by legislation initiated by the city and approved by the city.

That about $5,000,000 of county charges are mandatory and entirely beyond the control of the city administration.

That the city is paying the regulative charges of the first district public service commission, which charges should be paid by the state.

That $500,000 of city revenue is diverted to special service by law.

That there is no security for the city bonds in the hands of the public, except the debt-paying capacity of the city.

That in fifteen years the population of the city increased fifty per cent and in sixteen years the city budget increased 130 per cent.

That the city is always in debt from $50,000,000 to $100,000,000 for revenue bonds and bills issued in anticipation of the semi-annual tax levy.

That there is now outstanding $8,700,000 of uncollectible taxes and assessments inherited from the past that are not computed as part of the city debt.

That the city issues annually $6,000,000 of special revenue bonds for current expenses which is paid by a charge to "debt service" in the succeeding budget.

## PLAY FOR YOUNG AND OLD.

**Recreation Is As Essential As Education Declares Chicago Expert.**

Play and outdoor exercise are as necessary to the modern city dweller as is education, according to J. R. Richards, the Chicago superintendent of recreation. In a paper on the subject, prepared for the current issue of the American City, Mr. Richards urges that it is as much a duty of the government to provide facilities for both children and adults to play in and about cities as to provide adequate educational facilities.

American cities have approached the play problem in too haphazard a fashion, Mr. Richards declares. Most of the legislation on the subject, he says,

A CHILDREN'S PLAYGROUND.

has been passed without adequate study of the real needs of the public and from a restrictive rather than a constructive point of view. The public agencies in charge of recreation work have worked independently and with no common goal.

For children Mr. Richards suggests that the city should be districted and that the city government should provide a play leader for each district. The duty of the play leader would be to help all children who play in the street, to direct their play in the most beneficial channels and to guide them when there is opportunity to the nearest public recreation centers. He points out that even where there are recreation centers children may be found playing in the streets near by, particularly at hours when their parents have warned them not to get beyond "calling distance" from their homes. It is for this reason that the street leader is needed.

In speaking of the need of play for adults, the writer quotes Spencer in saying: "We stop playing not because we grow old. We grow old because we stop playing."

**BOOST.**

Boost for every forward movement,
Boost for every new improvement,
Boost the man for whom you labor,
Boost the stranger and the neighbor.
Cease to be a chronic knocker.
Cease to be a progress blocker.
If you'd make your city better
Boost it to the final letter.

## GOING SKATING.

**All Cozied Up In White Angora Is This High School Athlete.**

This voluminous sport scarf of white angora takes a slouch hat of the same

THE NEWEST VARIATION.

material trimmed with a worsted rosette. Many of these latest models have the scarf ends embroidered with wool flowers—daisies, roses and quaint Dresden patterns.

**Apple Crumb Pudding.**

Chop six or eight large apples, add to them the same bulk of dry breadcrumbs or cracker crumbs, and stir together in a pudding dish with a pint and one-half of milk. Add three well beaten eggs, sugar to taste, and add a very little powdered cinnamon. Bake one hour in a slow oven. Eat cold, with rich cream.

# Woman's World

### How One Englishwoman Describes Her Many War Duties.

THE COUNTESS OF ESSEX.

"Every morning," recently said Lady Essex, who was Miss Adele Grant of New York, "I go to St. James' palace and work, with a large number of other ladies, from 10 o'clock until 1—that is, for Queen Mary's Needlework guild. We have made 1,000,000 respirators for the soldiers in the trenches against gas attacks, and we have made innumerable surgical stores—bandages, etc.

"A good many other things fall to our care. This morning, for instance, 100 bales of towels arrived from the country. Dressing gowns, shirts, underwear, all sorts of things, come to us as we ask for them. We sort these, repack and send them, in required quantities, to their destinations. You may recall the war office asking for 8,000,000 pairs of socks about Christmas time a year ago. These were sent to us from everywhere, many of them incorrectly marked or not marked at all as to sizes. We had to measure every pair, label them and put them in packets of ten. That task alone meant six weeks' continuous work.

"My other duties are really too numerous to remember offhand. Let me see. At Watford—Watford is a town of 40,000 inhabitants in Hertfordshire, where we have a country place—I am on the executive committee of the urban council for war relief—that is, for the relief of civilians. I am president of the Soldiers and Sailors' Families' association, which supplements when necessary the war allowances given to wives and families. We have voluntary helpers, who take different districts, visit, write letters, find out if the families are getting their allowances and give privately additional help where it is needed. Often a woman wants to attend some function of her husband's regiment and lacks proper clothes, or, as an instance, a wife had word that her husband was wounded and in hospital at Plymouth. She had no means of her own to go to see him, and these had to be privately supplied her.

"Take the motors. At the beginning of the war the Automobile club was immediately offered 2,000 motors for war service. Since then many more have been quietly given, and those private individuals who have any left do not keep them for their own pleasure.

"Then everybody who has one lends it three or four afternoons a week for convalescent soldiers. We may be told after awhile that the use of motors must be cut down on account of petrol.

"Another luxury that may seem strange—the theater. No one dreamed of going to a theater at first. We hadn't the heart to do anything. Later the actors came out and said they were starving. Then the children returned from school for their holidays, and we felt we must exert ourselves to make things a little cheerful for them. We took them to the theaters. Gradually we ourselves got to going again. Now there are the convalescent soldiers who need entertainment, and their relatives, and the soldiers on leave—there must be relief.

"There is no longer any such thing as dinner parties," Lady Essex added. "We've quite put them out of our minds. Eight or ten people meet perhaps several times a week and happen to dine together, but there is no thought of dress and little of the dinner, except to keep it simple and sufficient. A dinner used to begin with soup and fish; there was an entree. But now! Now it is soup or fish; there is a meat course and a sweet; that is all."

### Kentucky Scalloped Potatoes.

Slice potatoes and lay in the water half an hour. Place a layer of potatoes in a well buttered baking dish, sprinkle with pepper, salt and pieces of butter; repeat the process until there is a sufficient quantity. Pour over this enough milk to cover and bake an hour and a half or until the potatoes are thoroughly cooked. If onions are liked with the potatoes alternate layers may be used.

### Caper Sauce For Boiled Mutton.

For this the regulation proportions of a tablespoonful each of butter and flour are cooked together until they bubble, and a half pint of boiling water is then poured upon them and the sauce stirred until smooth and thick and seasoned with pepper, salt and at least a tablespoonful of capers.

## CARE OF CLOTHES.

### Slip Your Garments on a Hanger Instead of a Chair Back.

Never leave your suits or dresses lying on a chair or on the bed rail, but put a hanger in them the minute you take them off. It is simply a matter of habit, and it is just as easy to learn to slip a hanger into your coat and put it in the closet at once as it is to throw it on a chair, to hang up later. Creases and wrinkles wear out the cloth, and the only way to keep your clothes free of wrinkles is to hang them up when you remove them.

Shoes, too, retain their shape much longer if trees are kept in them. You can always tell the shoes which are neglected by their wrinkled, shapeless look. It is a matter of a moment or two to slip shoe trees into your boots when you take them off, and this will prevent the leather from relaxing. Footgear which has no acquaintance with shoe trees usually splits and cracks just twice as quickly as the well cared for variety. If you will rub a little vaseline into your shoes when new it will prevent the damp and wet from splitting the leather.

When your tailored skirts become wet from the rain do not let them stay wrinkled, but press them with a hot iron before they become dry. By the way, it is a real economy to invest in a good, durable raincoat, because it will protect your suits and frocks to a great extent and will actually save you money.

### Wicker Hampers.

A wicker hamper is perhaps the ideal laundry container. But it must be kept clean. One enameled white looks so clean that it is hard to remember that it may harbor impurities, even germs. It must be washed in hot water occasionally and dried in the sunshine, and then sometimes it can be further refreshed with a clean coat of enamel.

Perhaps the ideal method is to have a sunny, dry laundry and there to gather the soiled clothes. Everything damp, like bath towels, should be spread out on a washable wooden or metal rack and dried each day, then placed in a basket or hamper. The clothes should not be piled together pellmell. Table linen should be kept by itself in a separate hamper. Household linen can be kept in another and clothes in a third.

### Mock Bisque Soup.

Cook a can of tomatoes with a tablespoonful of sugar and an onion cut in slices half an hour. Add half a teaspoonful of soda and pass through a sieve. Make a white sauce of half a cupful of butter, half a cupful of flour and a quart of milk. When boiling stir in the hot tomato, season to taste and serve at once. Made in this manner, if the fresh tomatoes are not overripe or the canned goods too old, the soda may be omitted without danger of curdling.

Money talks, but all of Carnegie's millions can't coax the scrappers over there to stop and listen.

### In an Australian Sleeping Car.

The sleeping cars of Australia are in many ways better than those of the United States. Instead of being of continuous length they are broken up into compartments, each one of which contains two berths running crosswise the track, a separate lavatory and divers shelves, racks, hooks and cubby holes for disposing of a traveler's belongings. The privacy of the arrangement is much to my mind. The porter, who is also the conductor, takes charge of all heavy bags, satchels and packages and puts them in an apartment specially reserved for that purpose.—Bishop E. E. Hoss in Dallas News.

### A Varnishing Tip.

When varnishing wood the work must be done in a warm room at a temperature of at least 75 degrees F. At a lower temperature the moisture in the air will give a milky and cloudy appearance to the varnish. On the other hand, at the higher temperature the moisture is not precipitated until the alcohol of the varnish has sufficiently evaporated to leave a thin smooth film of shellac. The durability and gloss are dependent on this.

### Tall English Authors.

Inches would seem not to lack significance in literature. Of the great English writers of the Victorian era almost all were tall. Tennyson, Carlyle, Edward Fitzgerald and Matthew Arnold all reached six feet. Ruskin touched five feet ten, Froude five feet eleven. Dickens and Browning fell short of the six foot level by only a narrow space, and Thackeray turned six feet three.—London Chronicle.

### An Anachronism.

When some celebrated pictures of Adam and Eve were seen on exhibition Mr. McNab was taken to see them. "I think no great things of the painter," said the gardener. "Why, man, tempting Adam wi' a pippin of a variety that wasna known until about twenty years ago!"

### Squared.

"By George, Tom, you have been in a fight!"

"No; I just met an old school chum of mine I used to lick when we were kids, and he paid me a debt he's been owing me a long time."—Pittsburgh Press.

### Handicapped.

"Jinks is a born poet." "That's no reason why he shouldn't try to make something of himself."—Boston Transcript.

## The Debutante Wears Her Spring Frock

Design by Lane Bryant, New York.

PINK is one of the popular spring shades for youth—pale peachblow and a strange other toning into salmon. This debutante's frock is of peachblow taffeta cut in tiers, with a bouffant overdrape of matching tulle. The neck is charmingly simple, smocked into a "baby waist" effect, while crimson rambler clusters in the corsage and daintily wanders down the front. This makes a delectable dance frock.

• • •

Plaid and striped silks in dark, warm colors are having even more than their share of favor. ANNA MAY.

## *Easy & Practical Home Dress Making Lessons*

*Prepared Especially For This Newspaper by Pictorial Review*

### An Interesting Spring Frock.

Fetching costume in striped challis with a cape collar of taffeta. The attached two-piece skirt is shirred slightly at the waist-line.

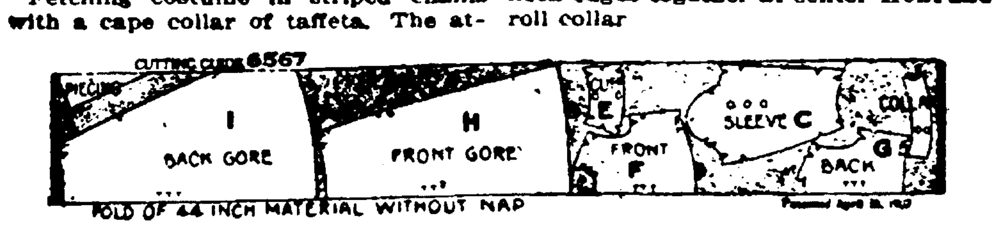
The fashionable collar cape is artistically utilized on this one-piece frock of striped challis in two shades of blue. About the bottom of the skirt there is a band of plain blue faille to correspond with the cape. The deep cuffs on the sleeves are also of faille. In medium size the dress requires 4¼ yards 44-inch material and the cape, which is separate, 2¼ yards 36-inch silk, including enough for the trimming.

Today's dressmaking lesson has to do principally with the cutting of the dress. A study of the cutting guide shows that the back and front gores of the skirt are laid on the lengthwise fold of material, with the front of the waist placed next to the front skirt gore. The cuff is laid on a lengthwise thread of material and fits nicely into the space opposite the front of the waist, the lower corner of the cuff meeting the armhole. The sleeve is also laid on a lengthwise thread. Then comes the back of the waist, on a lengthwise fold, with the collar last, on a lengthwise thread.

The neck of the dress is cut in round outline, and to do this the underbody is cut out at the neck edges on small "o" perforations. The small "o" perforations on the gores of skirt indicate the outline for making them shorter.

To cut cape avoid mistakes by laying out pattern on material in accordance with cutting guide. Place pieces with edge marked by triple "TTT" perforations on a lengthwise fold of material. If desired, cut off front edge of collar section J along small "o" perforations.

Trim collar with a narrow band. Sew collar to cape, notches and center-backs even; close, bringing the neck edges together at center-front and roll collar



Pictorial Review Costume No. 6567. Sizes 34, 36, 38, 40 and 42 inches bust. Price, 15 cents.

Cape Collar No. 6572. Sizes small, medium and large. Price, 15 cents.

## A Word About Possessions

Some people are very much concerned about their possessions, while all the time the only things that it will ever be possible for them to own are scarcely worth having. Because, after all, the only things that belong to you are the things that you are big enough to love and appreciate, not the things that you can pay money for.

To be sure you can go out and pay money for chairs and tables, for coats and diamond sunbursts, and they will belong to you after a fashion. But in the end it's all a matter of chairs and tables, isn't it?

Not so with the ticket to a concert or the price of a book. You can buy your way into a violin recital or pay money for a poem. But the man or woman to whom the poem truly belongs, and for whom it was meant, is the man or woman who loves it and understands it. And once having that sort of a possession no one can take it away from you.

"I get to the opera once a year," said a woman who is not often able to meet grand opera prices, "but the opera is mine all the year. It belongs to me, not to the people who have season tickets and sit in the orchestra circle and the boxes and go as often as they wish, unless, perchance, they, too, go because they understand and love the music."

So what is the use of wasting time envying people their possessions?

Let them roll along in their autos and lean back in their furs. It's yours to look at them and laugh if yours is the capacity for owning one fine thing they can't buy with their money.

"The furs," you may say to them, "are yours—the stenciled line of that rugged tree, sketched against the gray of a winter sky is mine, all mine because I have eyes to see it."

So why get excited about possessions, after all? The big possessions of life, the things that are most worth having are within yourself, and no matter how slim your purse the world always holds fair riches that are made especially for you if you know how to own them.

A woman once moved to the country from the heart of a busy city. "But I miss the flowers so," she wrote back.

"Flowers! What, flowers in crowded streets?" you ask.

"Why, the flowers in the shop windows, for whenever I wanted to," she explained. "I could walk a block or two and feast my eyes on some florist's window. They were always there the year round; always where I could see them, and they belonged to me as much as to anybody."

## HIS FIRST DRESS SUIT.

### All Togged Up In Velvet, Sonny Attends a Wedding.

Black velvet gives this smart suit for the small boy's gala days. The blouse with its plaited ruche around collar,

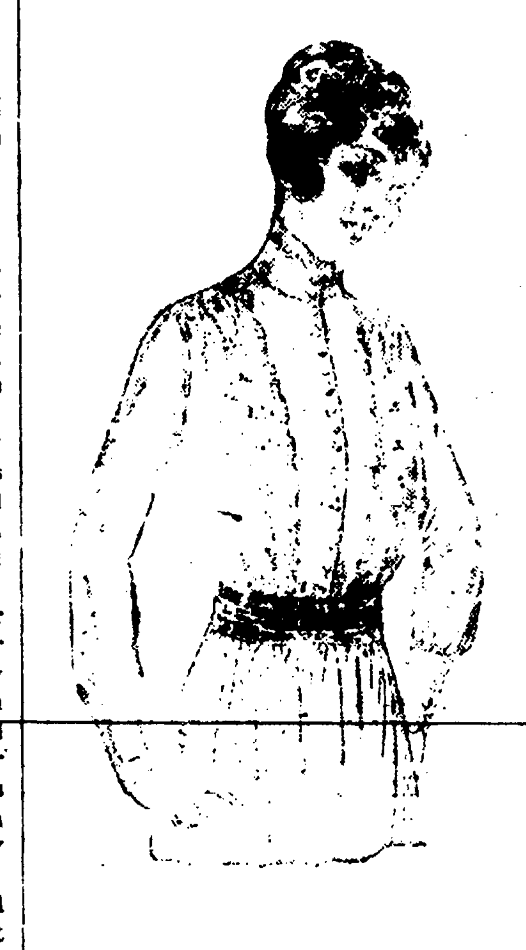
A PORTRAIT.

front and cuffs is of white georgette crape. From the top of his hat brim to the toe of his black patent leather pumps, which take white silk socks sonny boy is faultlessly correct.

### To Keep Wall Paper Clean.

To keep wall paper from becoming blackened from hot air furnace try this: Purchase as many wire dish drainers as you have registers, cover with thin unbleached muslin, a few pins only being required to fasten the muslin covers; turn over the registers. It is necessary to wash covers occasionally, but your paper and curtains will not be blackened. Wire dish drainers may be purchased at any house furnishing store.

## TODAY'S FASHION NOTE



Embroiderred dimity so manipulated that its scalloped edges rest upon a straight vest of organdy buttoned close up to the throat is lovely for this wash waist. The sleeves are gathered into deep cuffs ornamented top and bottom with embroidery insertion. Two yards of 18-inch dimity flouncing for the fronts, 1 yard plain dimity for the back and 3-4 yard organdy, make the waist. Pictorial Review Waist No. 6536. Sizes, 34 to 48 inches bust. Price 15 cents.

Pictorial Review Patterns may be procured at the J. R. Sullivan and M. Katz & Co. Department store, Fulton.

### Information Wanted.

"Nora," said the mistress to the new servant, "we always want our meals promptly on the hour."

"Yis, mum. An' if I miss th' first hour shall I wait for th' next?"—Birmingham Age-Herald.

### Sunday Night Suppers.

ROAST SQUAB.—Clean squab nicely and truss as if it were a turkey, using wooden skewers. Pass a piece of nice fat pork over the breast of each pigeon and fasten behind. Put a small piece of butter inside of each pigeon and stuff with truffles, but that is not necessary. Put the pigeons in roasting pan and add a tablespoonful of butter and about two tablespoonfuls of water. Baste frequently and be careful not to scorch, letting the birds roast from fifteen to twenty minutes. Have a slice of toast for each pigeon. Butter well, remove fat pork and place on toast. Pour over each a little of the gravy in roasting pan, allowing it to soak into bread. Serve hot with jelly or cranberry sauce.

Lamb Loaf.—Trim and cut in small pieces a forequarter of lamb, place in kettle, cover with cold water and cook until meat will leave the bones easily; remove meat from liquor and bone, chop fine, season with pepper and salt, moisten it with three-quarters cupful of the liquor, put in bread tins and leave in a cool place.

Creamed Shrimps.—Melt two tablespoonfuls of butter, add the same quantity of flour and stir until well blended, then pour on gradually, stirring all the time, three-quarters of a cupful of rich milk. Bring to the boiling point and add three-quarters of a cupful of stewed and strained tomatoes mixed with a pinch of soda, two cupfuls of finely cut cheese, two eggs slightly beaten, one pint of shrimps cut in pieces and salt, mustard and cayenne to taste. Serve on pieces of toasted bread or crackers.

Creamed Sweetbreads. — Creamed sweetbreads calls for one pair of blanched sweetbreads, a half pint of cream, one tablespoonful of butter, one tablespoonful of flour, salt and pepper and two tablespoonfuls of chopped mushrooms. Cut the sweetbreads into small pieces. Melt the butter in a porcelain lined pan, stir in the flour, and when this is thoroughly mixed add the cream. Now add the sweetbreads and the mushrooms and cook for five minutes. If you like you may add a tablespoonful of sherry wine just before serving.

# DANISH PRINCE TO WORK ON A FARM

## Erik, King's Cousin, to Study Advanced Methods.

## EXPECTS TO DROP ALL RANK

**Wishes to Learn Scientific Agriculture So as to Help Both Himself and the People of Denmark—Son of Ranking Admiral and Is Young and Democratic—Likes a Simple Life.**

New York.—When the Scandinavian American liner Hellig Olav made her way into quarantine a pleasant faced young man stood beside her rail, peering through a mist and trying to get a glimpse of the quarantine station that loomed indistinct and shadowy off the port bow. Almost as the vessel let go her anchor to await the arrival of the health officer of the port the coast guard cutter with the customs officials nosed a way out of the fog.

On the cutter were Georg Bech, Danish consul in New York, and Dudley Field Malone, collector of the port. They were on board to welcome to the United States Prince Erik of Denmark, son of Prince Waldemar and cousin of the King of Denmark. The prince was the smiling young man on the steamer's deck.

The cutter ran alongside, and as the officials started up the ladder an officer of the Hellig Olav appeared and "presented the skipper's compliments," but told reporters, photographers and moving picture men that they were not to be allowed on board. He was unmoved by their protestations and the cutter, with a disappointed crowd on board, backed away into the fog. The ship's officer smiled as he gravely touched the visor of his cap.

There was no wait for customs officials to examine the prince's trunks, for the courtesy of free entry had been extended to the royal visitor. Prince Erik was described by his fellow passengers as having pleasant and democratic manners. He was popular with the cabin passengers. His traveling companion is Johannes Plum, a friend. The prince, instead of traveling incognito, as European royalty sometimes does, registered at a hotel here as "Prince Erik of Denmark."

The prince intends to study scientific farming as it is carried on in America and to drop all rank and to settle down to the life of a real farmer. He speaks English, for he has lived two years on a farm in East Gloucestershire, England, where he made his home with a gentleman farmer and lived in a simple way.

Erik is the son of the ranking admiral of the Danish navy. His mother was Princess Marie of Orleans. He has a brother who is also devoting his life to agricultural pursuits.

## PAINTED 1,000 CAT PICTURES.

**Woman Stricken Blind After She Finishes Her Painting.**

Pitman, N. J.—Just as she has finished her thousandth painting of cats Mrs. E. M. Gardner has been stricken with blindness in her home here. Her sight held out just long enough for her to realize the ambition of her life.

Mrs. Gardner, who has made her home here for many years, is a native of Colchester, Conn. Asa Packer, founder of Lehigh university, was a relative. She began painting thirty years ago in Philadelphia. Ever since she has painted only cats—cats of all types and degrees—aristocratic Persians and plain back yards. One room in her modest little home here is filled with such pictures.

## FIND FAN 400 YEARS OLD.

**Police Get Fan Once Owned by Pope's Mother In Stolen Loot.**

Evansville, Ind.—An ivory and mother-of-pearl fan which the owner said formerly belonged to the mother of Pope Pius IX., and is more than 400 years old, was recovered by the police here among loot from a number of Evansville homes which was found following the arrest of Walter Scott, thirty-six, an alleged housebreaker.

The fan was given to Miss Minnie Henrich of this city by her mother, who had received it from her cousin, Rev. Mother Mary Magdalena, formerly connected with the family of Pope Pius IX.

**Defeat.**

What is defeat? Nothing but education, nothing but the first step to something better.

## HID HUSBAND'S FALSE TEETH

**Jefferson Swears That is the Way His Wife Got Money From Him.**

Pittsburgh.—It behooves all married tightwads who wear false teeth to beware. Often the subject of ridicule, artificial teeth have at last been found to serve a practical purpose in domestic life.

Frank Jefferson in divorce court told a harrowing story of the manner in which his wife had frequently forced him to "come across" with money by the simple expedient of taking his false teeth and hiding them.

The odd thing, to Jefferson's way of thinking, was that even when he waxed angry his wife would refuse to return his teeth. Only Uncle Sam's coin of the realm would persuade her that her husband's molars were essential and necessary to his daily existence.

Mrs. Jefferson's side of the case was terse and to the point—her husband had refused her the money she believed she was entitled to as lady of the house. Consequently she took these measures to get it.

## USES SPOONS TO SAVE LIFE.

**Knife and Rubber Tube Also Doctor's Implements In Operation.**

Elkins, W. Va.—With two tin teaspoons, a pocketknife and a piece of rubber tubing as his instruments Dr. H. W. Daniel of the Elkins hospital performed an operation on a woman apparently dying of diphtheria and saved her life, it was learned. Called to the mountain home of Mrs. Thurman Coberly, the doctor found the woman unconscious.

Having no surgical instruments with him and realizing that death was near, he made an incision in the woman's windpipe with his knife, and, using the teaspoons bent double as retractors, he inserted the rubber tube. Respiration was restored, and within a few hours the patient regained consciousness, and it is said that her recovery is expected.

## ODDLY HEARS OF LEGACY.

**Benefactor Learns of Bequest After He Nearly Drowned.**

Gloucester City, N. J.—Through an account published of the fact that he had been rescued from drowning when he fell overboard while unloading coal at the Gloucester ferry wharf, Frank Taylor of 402 South Fourth street received word that he had been left a legacy by a relative in South Jersey, who died several months ago.

An aunt wrote from Deerfield, N. J., stating that they had been endeavoring to find him for several months and that they had read in a Philadelphia newspaper of his accident and hastened to notify him that when the relative died he had been mentioned in the will for a portion of the estate, which consisted of a farm and agricultural implements.

## TRAMP DWELT IN STYLE.

**But Police Cut Short Vacation of Uninvited Guest.**

New York.—William D. Lowery of Kingston, N. Y., moved. Lowery, it is charged by Police Chief Howard, made himself a lone and uninvited guest in the luxurious home of Mrs. John Brown on Peconic bay at Greenport, N. Y., after she had closed it for the winter.

The intruder, it is charged, helped himself from a well stocked wine cellar, lived on canned food and in the guest bedroom covered his couch with a Persian rug and a silk portiere because his unknowing hostess had thoughtlessly taken away the bed linens.

Chief Howard followed Lowery to the house when he saw him staggering through the streets. Lowery, who had supplied himself with candles, went into the house through a window. Some silverware and trinkets are said to be missing. Lowery is in the Riverhead jail, awaiting the action of the grand jury.

## REFLECTION SAVES BABY.

**Hogs Attack Infant, but Flee When They See Own Likeness.**

Elkins, W. Va.—Sanford Phillips, Jr., two years old, owes his life to the fear of wild hogs for their own likeness when reflected from a mirror.

Wild hogs which exist in the mountains of Randolph county came down into the foothills and charged into the home of Sanford Phillips, upsetting furniture and attacking Phillips' two-year-old son.

The animals had torn nearly all the clothing from the child when he ran into a corner where a big mirror hung. The hogs followed, but soon stopped when they beheld their likeness in the big glass. Only a second did they hesitate, however, then turned, plunging from the house back up the mountainside. The child was only slightly injured.

# SPAIN'S KING WINS PRINCESS' LIBERTY

## Austrian Army Head's Daughter and Spouse Get Freedom.

**Through King's Kind Offices Princess Emmanuel of Salm-Salm and Her Husband, Imprisoned at Gibraltar, Have Been Exchanged—All Previous Efforts to Free Them Were Failures.**

Madrid.—Princess Emmanuel of Salm-Salm, the eldest daughter of Archduke Frederick, commander in chief of the Austro-Hungarian army, who, with her husband, has been a prisoner of war in the hands of the British, is to be given her liberty, her husband likewise to be freed, this being the latest knight errantry of the king of Spain.

When war was declared in August, 1914, the prince and princess were in South Africa on a hunting trip, the first time they had ever been so far from home. They were at once arrested and placed in a concentration

Photo by American Press Association.

KING ALFONSO.

camp, later sent to Gibraltar in captivity after months of negotiations between the American ambassadors in London and Berlin with the British government.

All efforts to obtain freedom for them to return home were failures. The prince is of military age, a man in his early forties, a very competent cavalry officer in the Prussian army as well as in the Austrian army and, besides, a person of great official importance. He is to be exchanged, it is reported, for Colonel Gordon, a special friend of Lord Kitchener, who was captured some time ago by the Germans.

Princess Emmanuel of Salm-Salm was the Archduchess Marie Christina of Austria, and her bad luck in this war, which was brought on by the assassination of the Archduke Francis Ferdinand, heir to the Austrian throne, is a curious coincidence since she was the wife selected for the archduke by Emperor Francis Joseph. He fell in love with Countess Sophia von Chotek, lady in waiting in the household of Archduke Frederick, and the royal lady was jilted. Her marriage to Prince Salm-Salm has nevertheless been a happy one. They were married in Vienna fourteen years ago and have five children, three girls and two boys, who will be glad to see their parents after a separation of nearly two years since they left their castle in Westphalia.

It was at first reported that the prince captured by the British was the son of Prince Felix of Salm-Salm, who married the American actress, Miss Agnes Leclercq of Baltimore. He came to the United States during the civil war, having had some experience in both the German and Austrian armies, and President Lincoln gave him a commission as brigadier general. He was killed at the battle of Gravelotte, having returned to Germany for the Franco-Prussian war of 1870. His widow died at Karlsruhe in December, 1913, as Mrs. Charles Heneage, having made a second marriage in 1876, but spending most of her life in Germany. Her marriage with the prince was never recognized by his family, she never had the legal right to be called Princess Salm-Salm, and she left no son who assumed that title.

**Woman a Moonshiner.**

Parkersburg, W. Va.—Mrs. Sarah Reed and Wiley Marks of Calhoun county began serving prison sentences recently after pleading guilty to a charge of operating a still for the manufacture of moonshine whisky. The couple were sentenced to pay fines of $1,000 and serve terms of six months.

**Chokes Eating a Steak.**

Springfield, Mass.—John B. Marellle, a well known railroad man, choked to death while eating a steak in a restaurant.

Good Long Cut Means Good Long Smokes and Long Chews

That's LIBERTY every time. Just note how *long* a pipeful or a chew of LIBERTY lasts you.

Why? 'Cause LIBERTY is *real* Long Cut tobacco. That makes it slow-burning in a pipe and gives it a chewable body that holds together in a chew.

LIBERTY is *all* pure, clean, good tobacco. *No* loose, hard stems in it—they're all picked out by hand.

LIBERTY

Long Cut Tobacco

is made from pure Kentucky Long Leaf—no short or broken leaf is used. Ageing up to 5 years puts full-bodied richness and snap into LIBERTY that give sturdy, two-fisted *men* the hearty satisfaction they want.

Stack LIBERTY up against bigger-looking packages—you'll always get *more* good smokes and chews out of a package of LIBERTY. Just try it.

THE AMERICAN TOBACCO COMPANY

*Sold all over*

# ROBERTSON MAY FOLLOW "K. OF K."

## London Hears Chief of Staff Will Become British Commander in Chief.

London.—Lord Kitchener is about to leave the War Office to assume more important duties, according to a report published in the Daily Sketch.

Coincident with this charge, Sir William Robert Robertson, at present chief of staff( will become commander in chief of al lthe British forces, while a civilian, probably Lord Derby, it is said, wil lbe made Secretary of War, General Robertson will have the active direction of the war without interference, except from the Cabinet as a whole. Lord Kitchener, the same reports say, will assume "more important duties elsewhere."

Lieutenant General Sir William Robert Robertson, K. C. B., K. C. V. O., D. S. O., chief of the general staff, once was a humble trooper of cavalry in the old British army, the army that defended Torres Vedras, the army that fought at the Marne.

**Ten Years in Ranks**

Not alone heroism in the field won his command for Sir Robert. His genius in organization and his broad grasp of military matters have made him indispensable to the powers which are moulding Great Britain's military desting today. The youth who "too kthe uQeen's shilling" and followed the recruiting sergeant with the beribboned forage cap to where the entrained for the headquarters of the Ninth Lancers to which command he was detailed as a recruit, toda yis maybe the guiding spirit of the great and powerful new British army.

He had served nearly ten years before he passed the examination and was gazetted a second lieutenant and the Third Dragon Guards in 1888. Even at the beginning of the South African campaign in 1899 the present staff chief had not risen above the rank of captain. The groundwork of a thorough military education in which he missed nothing of the science or the craft of his calling made of Captain Robertson a valuable officer. He was mentioned in despatches in 1900 and was brevetted a lieutenant colonel.

Following the close of the Transvaal and Orange Free State campaign many innovations were introduced into the British army. Lord Roberts recognized the worth of the officer who had risen from the ranks, and Lord Kitchener marked in characteristic fashion the capacity of Colonel Robertson for getting things done. Then followed one of those unprecedented innovations. He became head of the Army Staff College. This appointment of a man who had been nine years a private soldier startled many of the old officers. The college commandant startled many more by his great capacity, and when the present war began al leyes were turned toward him.

## BRITAIN'S WAR BURDEN GREATER THAN GERMANY

Berlin, (by Wlreiess Telegraph to Sayville, L. I.)—Dr. Karl Helfferich, Secretary of the German Imperial Treasury, today made reply, according to the Overseas News Agency, to questions propounded recently to Germany by Sir Edward Holden at the annual meeting of the London City and Midland Bank, of which Sir Edward is managing director, In addition to replying to Sir Edward's questions regarding Germany's finances. Dr. Helfferich in turn interrogated Sir Edward with regard to the finances of Great Britain.

To the question whether German assets in foreign countries still exist, Dr. Helfferich said billions of German assets were being withheld by Britain under receivership and against law and equity. He then asked what conclusion was to be drawn regarding British finance from the fact that Great Britain, through Sir Edward, floated a loan in the United States to strengthen the exchange rate on the English pound.

## CHAMBER OF COMMERCE

*"Fulton First, Last and All the Time"*

THE BUSINESS MAN AND CHARITY

In this age of efficiency the charitable efforts intended to meet the problems arising from individual shortcomings and social maladjustments are coming within the realm of the efficiency expert. The business man who assumes the largest responsibility for the maintenance of welfare agencies is eager to secure the highest possible return on his investment in "Charity" work. In establishing measures of efficiency in business the standards are so easily determined upon that it is not difficult to measure the return. In case of charity work, however, this is not true. Inefficient business carries with it its own destruction. In charity work, however, inefficiency is more difficult to detect, and may continue at the expense of the public without hindrance from anyone. It is for this reason that it is more important to establish standards of measurements of the inefficiency of welfare agencies than it is in the case of individual business. This efficiency should be measured along three distinct lines:

1. The efficiency of the giver in selecting the agency or cause to which to give.
2. Efficient services on the part of the agency receiving the support.
3. The efficiency of the agency in meeting the needs and problems of the community.

Within recent years, commercial organizations in the form of Boards of Trade and Chambers of Commerce have undertaken the task of separating the efficient from the inefficient organizations, and are determining the business and monied people the channels into which their bounties should flow. There is a triple motive in this undertaking. The first is the desire to save the time of the business man in determining upon his charities. The second is to promote in the communities the charitable work that is most efficient and the third is to avoid supporting organizations and agencies with subversions and principles.

This effort is worthy of attention especially on the part of the so-called professional social workers who are daily called upon to consider and assist in the solution of local problems that are constantly taking on new forms and requiring new treatment.

In considering the efficiency of any charity or welfare agency there are three definite lines of thought that present themselves.

1. The efficiency of methods of work.
2. The use of funds.
3. The need or fitness of the service rendered by the young to the community.

All standardizing work so far done in connection with welfare agencies in this country has been very largely along the lines of improving the efficiency of methods, and in developing modern systems of accountancy. This may have helped to introduce certain business elements into welfare work, but it did not add a single element to the efficiency of these agencies in dealing with social problems beyond improving service already in existence. We might call this kind of efficiency an attempt to crystallize into definite form machinery handling all existing problems without regard for the evolution of community needs and social Institutions The Board of Trade and Chamber of Commerce have developed what are called "Endorsement Committee," varying in their methods of work from voluntary committees to the most expensive and most highly specialized, Bureaus of Charities as part of the general undertaking of business organizations.

B O O S T it to the final letter.

## KITCHENER NOT GOING TO EUROPE

**London Hears He Is Bound for Egypt---Kaiser Withdraws Troops From Russian Front.**

London—The report that Lord Kitchener's withdrawal from the War Office would be for the purpose of going to France, where he would aid in meeting the new German offensive which it is certain soon will be launched in the West, apparently is unfound ed if there is any basis for another report published in the Weekly World.

According to this report, Lord Kitchener is to take over the command of the British forces in Egypt, a part of thew orld with which he is thoroughly familiar, and there organize the armies for the defence of the Suez Canal as well as put down the tribal uprisings threatening Egypt from the West. The Weekly World also is authority for a statement that the new Secretary of State for war will be Lord Derby, director of recruiting, who recently has returned to London after an inspection of the British forces in Flanders.

Further evidence of the determination of the Kaiser once more to try to batter a road through to Calais, an offensive which was predicted in a special despatch last Sunday, is contained in reports received yesterday from Petrograd. These stated that the lull extending over the entire Russian front, with the exception of artillery duels in Galicia and aeroplane and mining warfare on the Dvinsk-Riga line is due to the withdrawal of large bodies of German troops for service in the west.

**To Hold Lines in East**

For the present Petrograd believes the Germans will be content if they can hold their lines near Riga as well as in Bukowina and on other sectors.

The Petrograd despatch indicates this shifting of troops from the east to the west has been heavy and there are other signs that the Germans are massing a great body of men for one of their most ambitious effects of the war.

## 10 PORTS OPEN TO GERMAN PRIZES

New York.—Vessels with a draught of water equal to that which the German steamship Appam requires, it was declared yesterday in marine circles, can utilize, south of the Virginia Capes, the ports of Wilmington, N. C., Charleston, Savannah, Fernandina, Key West, Pensacola, Mabile, New Orleans, Port Arthur and Galveston.

The German raiders, it was held in naval circles, are hardly likely to send in prizes to neutral ports until such time as they find themselves burdened with prisoners. It is recalled that the Appam was used to transport the combined passengers and crews of four other steamships as well as the Appam's complement.

Durin gthe civil war the Confederate cruisers were unable to make use of neutral ports as havens for their prizes, since nearly every neutral port in the world was closed through proclamation. The home ports of the Confederates were closed by the Union blockading ships. In the circumstances they only recourse was to burn prizes, but when the total number of prisoners as made up of passengers and captured crews became too great to carry further the Confederates' practice was to ransom a prize and send her in under her own master with all prisoners transferred to her decks. These ransom arrangements provided that at the close of the war a stipulated sum should be paid to the Confedeeacy in consideration for the sparing of the vessel. The ransom papers were signed by the masters of the ransomed ships, acting for and in behalf of the owners. Inasmuch as the Confederacy did not survive, none of these ransomed were ever paid.

IT MAKES A DIFFERENCE.

### WEATHER FORECAST

**Snow flurries and colder tonight and Thursday. Fresh west winds.**

## Sunday Pool Playing Ordinance Gets Veto

Mayor Lewis announced at noon today that he has attached his veto to the resolution passed by the Common Council at the last meeting, which provided for open parlors and bowling alleys at all hours with the exception of the period from 12 o'clock Saturday night until Sunday noon.

Various city officials are of the opinion that there is very little probability of the Board of Aldermen passing the resolution over the executive's head. The resolution will come before the next meeting of Council.

Mr. Lewis states that his action in disapproving of the measure is dictated by a desire to serve the general public. Numerous petitions, all in opposition to the new ordinance, had been presented to the Mayor since last Tuesday, on which date the ordinance was placed before the Council and favorably voted upon. No petition was presented to Mr. Lewis approving of the act.

## Board Plans to Pave "Bad Lands;" Lack of Cash One Hindrance

If the sentiment expressed relative to repaving East 1st st. between Rochester and Broadway, at last night's meeting of the Board of Public Works, means anything, that thoroughfare will receive the drastic treatment it deserves. It will be uprooted, rolled down and otherwise improved until the city can boast of something more than a quagmire, or the worst "bad lands" in any city in this section of the state.

The controversy which agitated the citizens affected by the proposed widening of the street, last year is not likely to have any influence with the present Board of Works. "The street should be paved," it was declared by Commissioner Allen, "and we should devise a way to carry out the work." City Engineer Hill has estimated the cost of the work, the width to remain as at present, as $30,000 of which the city will have to pay $2,219, the property owners residing along the paved section $4,438, the trolley company approximately $14,000 which is estimated to include also the cost of the new rails and other equipment; and the State's share, $9,666.

How to raise the money which the State requires was the question placed before the Board. Before the completion of the contract, the State requires that the city finance the job, assuming the property owners as well as the trolley company's share of the cost.

City Engineer Hill stated that there are two methods by which the city may get the cash necessary, one of which is in accordance with the provisions of the City Charter, which says that the city can borrow money for paving in anticipation of the receipt of the next year's taxes, or a bond issue can be made. The latter method is not looked upon with favor, as the city has almost reached its bonding limit. Mr. Allen suggested the advisability of securing personal loans from First st. property owners to the amount needed, $21,000.

While nothing definite developed relative to the proposed paving, the improvement is no doubt forthcoming, as the City Attorney was instructed to advise the next Board meeting as to the legality of a former resolution, passed in 1913, which authorized the paving of East 1st st. Mr. Hillick's basis for raising a question is the possible

## Opinions

### HISTORY REPEATS

An episode in the history of conscription is set forth in the New York Gazette and Weekly Mercury of October 20, 1777: "There was a Draft from the Militia of Bergen County, in New Jersey, last Week; but few turned out. Those that refused, had Effects seized and sold to the amount of £20, to hire a person in their place for one month. 'Tis given out they were wanted to go as far as the Clove in order to remove a large quantity of stores deposited there."—N. Y. Sun.

### RUNNING AWAY FROM NO DANGER

What is the matter with the republican aspirants for the Presidency? Mr. Taft doesn't want it; Justice Hughes is quite certain he doesn't want it; Mr. Roosevelt is inclined to let nature take its course; Senator Weeks is out; Governor McCall is out, and so it goes.

So far as recalled there are only three bona fide candidates in the field—Senator Cummins, of Iowa; Senator Borah, of Idaho, and a Mr. Eastbrook, who threatens to be the John Hays Hammond of the next Convention.

There is Senator Burton, of Ohio, seeking the tall timber and Mr. Herrick seeking the Senatorship. Mr. Fairbanks hasn't made one of those unguarded and impetuous speeches which he is justly famed for a long time, and our own Governor Whitman has suddenly acquired a liking for the Governor's residence at Albany, which has impelled him to say that he doesn't want to be President.

After all, will the party have to return to "Uncle Joe" Cannon? He hasn't declared that he is not willing to run for the Presidency, and he has all the ripeness of age, the agility of youth and the staying power of experience.—N. Y. Herald.

### A NOVEL FINANCIAL SCHEME

Great Britain has published a list of American and Canadian securities that it desires either to buy or borrow for a period of two years. Its object and its plan for attaining it are extremely interesting.

During a long succession of years English investors have bought many hundred million dollars' worth of American securities. Although large amounts of bonds and stocks have returned to the United States since the war began, immense amounts still remain abroad. The British government proposes to turn the fact to financial profit by making use of the remaining seucrities to raise money and to stablize the rate of American exchange.

Its plan is as follows: It offers to buy the securities on its published list at the New York price on the day of sale, and to pay for them in five-year Exchequer bonds that yield five per cent interest. The persons who will not sell their securities, but who are willing to lend them, will continue to receive the interest as before, plus one-half of one per cent, which the government will add. Using the bonds and stocks as collateral, the government will borrow money in the United States, and will thus procure the gold needed to pay for food, clothing, horses and munitions of war and to strengthen the rate of sterling exchange.

If the scheme is successful, it will transfer a large part of the stock of gold in the United States to the possession of Great Britain. As our supply of the yellow metal has become unnecessarily and embarrassingly large, we should be glad to get rid of the surplus. A lessening of the supply will tend to discourage wild speculation in the stock market.—Youth's Companion.

## WE ARE DODGERS

Billy Sunday is a believer in personal service, as may be seen in a recent description of a condition in the Christian world. He said: "Many people are sick and tired and disgusted with just professing religion. They are tired of trotting to church and trotting home again. They sit in a pew and listen to a sermon. They are getting tired of that, not speaking to anybody and not engaging in personal work. They are getting tired of it and the church is dying because of it."

Mr. Sunday lands a blow because it cannot be dodged. He sees that the churchgoing is all right and the sermon and the services are all right. Also, he sees as do other persons that these things are nonessentials of Christianity. The evangelist means to tell us that the greatest need of the people is personal service.

It is personal service for others that gives vitality and strength and satisfaction. We are—everyone of us—derelicts. We talk of what we are going to do in giving personal service, but, like the lazy man, who could stand more rest than any other man in the town, we never start. We get ourselves worked up to the pitch of wanting to do things for the alleviation of young men who cannot be trotted to church and Sunday school, and in whose behalf the movement has been made to open pool rooms on Sunday afternoon: then we become blind, refusing to see ourselves as others see us, the bettering movement going for nothing by not getting to work. While working to keep down the lid, wouldn't it be a good idea to start an account book of what we are doing and not doing for the young men of Fulton? In striking a balance we shall find we have lacked vitality and strength, hence must be found wanting in a rounded existence.

If the Board of Aldermen attempt to pass that Sunday pool playing ordinance over the Mayor's veto, the result may be the last lingering kick in their political life.

In spite of the weather, cheer up. 'Twill soon be time for the old fashioned ones among us to punch a hole in a biscuit and fill it with maple syrup.

## THINGS WE NEVER LEARNED

To some extent it is possible to go back and piece out the stitches dropped in the course of an education; only, one is not allowed to go back so far as I desire. Roughly speaking, I should say that life does not allow one to relearn what one has failed to learn before 16, where as it is the knowledge belonging to 8 years, and 10 and 12, after which I hunger and thirst. I wish some one would open a school for able-minded but ignorant grown-ups. Believe me, enough of us could be found to attend, enough of us glad to jump down from college chairs, to leave our laboratories with their clutter of advanced research, our counting houses with their problems, and gladly go to school, gladly learn once and forever how much nine times thirteen is, and build Vesuvius past and present out of clay, and follow out of doors some charming young lady who would tell us exactly what the birds and the wild waves are saying.—Winifred Kirkland.

### DOESN'T WANT REFORM

New York newspapers get fussed a lot over the city's financial relations to the state, usually charging that the city is the victim of greedy hayseeds who compel the city to pay an unfair share of state expense and add to local expense the city would avoid. These newspapers and the Mitchel administration boasted that the city was conducted wisely in its finances. It was approaching the pay-as-you-go system. The Whitman pay-as-you-go budget, however, which provided for obligations neglected by the Democrats, was regarded only as another effort to mulct New York. Senator Brown took a committee of legislators to New York and inquired into the grievances. He induced Mayor Mitchell to attempt to organize city legislators so that the legislature would be able to deal with city affairs intelligently. He makes other propositions of which the Evening Sun says

"The Brown committee's program of fourteen legislative amendments to improve the financial status of New York city contains one item in particular which cannot but cause real concern here. If the proposed amendment 'not to permit the contracting of indebtedness unless funds are available for the payment there of, means what his description says it means it would tie the hands of the city hopelessly as to many imperative improvements.

"If the board of estimate and the board of aldermen are not to be allowed to authorize bond issues, how is the city to obtain the funds for our badly needed port development? This is as vital a necessity as the transit development now being effected, although the public generally does not appreciate the fact. If New York must wait until she has the millions in hand to develop her waterfronts and ship channels she will be outstripped by Boston and Philadelphia as a port in spite of her greater natural advantages.

"There is such a thing as running the 'pay-as-you-go' system of financing into the ground, although it is notable that Mr. Brown and his committee do not propose to do so— and relieve the city's tax burden, incidentally—by applying that policy to the State highways and other extravagances of the Legislature."

The city doesn't want to pay as it goes it simply wants to talk about the sane system.—Watertown Times.

A few hundred 1-2 pint cans of inside house paint in nice colors left at 10c per can. Van Wagenen, Inc. adv.

## TALKS ON BANKING

*SAVINGS BANK CENTENNIAL SERIES*

### No. 3.—GETTING YOUR MONEY OUT OF THE BANK

If the bank rendered no other service to the community than to protect its valuables it would render a useful one; but it would be a mouse-trap proposition, you could only go one way; but the bank makes it easier to get money out than in, and in the outgoing process assumes risks and renders benefits too often lost sight of in the busy whirl of business.

We take many things for granted and live in a matter-of-fact age. We want our morning paper at the breakfast table with never a delay and with little thought of what it costs to collect, transmit, type, print and deliver the news. We want our train on the dot or we get impatient. We want our milk and our coal, blizzard or no blizzard. We likewise expect the bank to do our business smoothly, efficiently, and without thought of the cost or the risks attending.

When your bank hands you a check book, it gives you license to draw as many checks, in as large or as small sum as you wish, with the only provision (except in certain cases where a minimum balance is required) that you do not overdraw, and promises to honor your checks as presented as long as your balance is sufficient to pay them.

Whether you want to pay your creditor in the next block, or a thousand miles away, the checking privilege of a bank account permits you to make your payment with ease, safety and despatch.

When you mail your check your trouble is over and the bank's has just begun, for the bank warrants to you three things, all for your own protection and at its own risk. It is well to know them.

It guarantees (a) That it will pay only the checks you have signed. If your name is forged and the bank pays the check, it cannot charge the amount to your account; (b) That it will pay only in the sum originally drawn. If some one gets your check and raises the amount, making it apparently a genuine check, the bank can only charge the amount in which you originally drew the check, unless it can show you were grossly careless in so drawing that you invited fraud. Therefore be careful to draw your checks properly; (c) To pay to the party to whom you ordered the amount paid and none other. If the check gets into the hands o f strangers who forge the indorsement, so that the party to whom you ordered the money paid does not get it, the payment is at its risk, and you are harmless.

All this is ultimately for your good as a depositor. You know that your account cannot be drawn against except on your order. You know that the party you want to receive payment get it. You get back the most perfect voucher known to the business world. Many a dispute has been settled and loss and law suit avoided by producing bank vouchers that told in no uncertain way that payment had been made according to the intent of the drawer. Therefore for your own good you ought to keep your money in a bank, and draw it out by check.—American Bankers Association.

### NEW ROCKEFELLER GIFTS TO EDUCATION

New York—The General Education Board, which administers funds established by John D. Rockefeller for the promotion of education in the United States without distinction of race, sex or creed, yesterday announced many appropriations. Since its organization, thirteen years ago, the Board has appropriated to colleges $12,322,460 toward a total of $57,375,525 to be raised. The appropriations announced yesterday are:—

To Western College for Women, Oxford, Ohio, $100,000; Milwaukee-Downer College for Women, Milwaukee, Wis., $100.000, and Maryville College, Maryville, Tenn. $75.000.

Calhound Colored School, Calhoun, Ala., $5.000; Fort Valley and Industrial School, Fort Valley, Ga., $2,000; Manassas Industrial school, Manassas, Va., $2 000; Anna T. Jeanes Fund for Employing Industrial Teachers for Negroes, $10.000; and for Home Makers' clubs among negroes in the South, $16.250.

See the new $615.00 Overland, complete electric equipment. Van Wagenen, Inc. adv

### WAIST MAKERS FIX INCREASED WAGES

New York—The board of arbitration which has been considering the differences between the Ladies' Waist and Dress Manufacturers' Association in a decision yesterday affecting part of the wage scale at issue allowed certain increases. The board, of which Louis D. Brandeis was once chairman, consists of Judge Mack, of Chicago; Hamilton Holt and Robert W. Bruere.

Cutters, who have received a minimum of $25 a week, hereafter will receive a minimum of $27.50 a week, according to the ruling. Apprentices were divided into four grades and the scales ranges from $6 a week to $21.

Morris Hillquit, on behalf of the union, and Julius H. Cohen, in behalf of the manufacturers, accepted the decision.

For callous or hard lumps on domestic animals apply Hanford's Balsam of Myrrh. Rub it on thoroughly. adv.

CATARRH CANNOT BE CURED

with Local Applications, as they cannot reach the seat of the disease. Catarrh is a blood or constitutional disease, and in order to cure it you must take internal remedies. Hall's Catarrh Cure is taken internally, and acts directly upon the blood and mucous surface. Hall's Catarrh Cure is not a quack medicine. It was prescribed by one of the best physicians in this country for years and is a regular prescription. It is composed of the best tonics known, combined with the best blood purifiers, acting directly on the mucous surfaces. The perfect combination of the two ingredients is what produces such wonderful results in curing catarrh. Send for testimonials, free. F. J. Cheney & Co., Props., Toledo, O.

Sold by Druggists, price 75c.

Take Hall's Family Pills for constipation.

### MT. PLEASANT

The quarterly conference to have been held Monday evening has been postponed until March on account of the blizzard.

* * *

The W. F. M. S. at Mrs. Lewis Ives' on Wednesday of last week was attended by over fifty members and visitors. Duane Streeter invited Mr. and Mrs. Albert Paddock to spend the following day with him to aid in celebrating the 40th anniversary of the Streeter's marriage and the 30th anniversary, of Mr. and Mrs. Paddock's marriage. This gave the people an idea, so on the following day Mr. and Mrs. Streeter were surprised to find that more than fifty neighbors and friends had accepted impromptu phone invitations. An oyster dinner was served and a handsome book was presented by the merrymakers.

* * *

Prof. Jesse Lawton of Fulton was a week-end guest at John Salisbury's.

* * *

Mr and Mrs. Huie are ill

* * *

Meade Osborne, who spent the past two months in Chester, Pa., returned Saturday evening just in time to see the Grange play, "A Woman's Honor." Also to greet old friends. Although he saw a small portion of the world while away he thinks Volney a very satisfactory place to live. Several trips to Philadelphia and one to Washington, D. C., were thoroughly enjoyed by him.

* * *

Roy Martin was called to Ogdensburg recently by the serious illness of his mother.

* * *

Miss Ruth Dutton of Granby was a week-end guest of Mrs. Don Vant.

* * *

Mr. and Mrs. Theodore Stewart were recent guests at James Jones' in Scriba

* * *

Mrs. Emma Howard has returned from Mexico leaving Mrs. Carmen Willis much improved.

* * *

The meetings at Luddington school house were full houses and splendid meetings.

* * *

Rev. Wililams entertained his brother over the week-end.

* * *

Mrs. Fred Whittemore and Harold Distin of Syracuse were guests at Delos Distin's Saturday and Sunday.

* * *

George Paddock is attending Farmers' week at Ithaca.

* * *

Byron Distin has added an acetylene gas plant to the comforts of his home.

Some of our Saturday afternoon Auction bargains—Wagons, Sleighs, Harness, Robes, Blankets, Whips, Auto supplies, a hundred others too numerous to mention. Come next Saturday at 1 p. m. Van Wagenen, Inc. adv

### ADVERTISED LETTERS

Thef ollowing letters remain uncalled for at the Postoffice February 9, 1916. Inquirers will please say advertised.

**Men**: Frawley, Benny; Kane, E.; Lewis, Thomas A.; Lytle, J. —; Roberts, Fred; Phillips, Will; Ruttan, Wellie; Stevenson, J. M.; E. A. Strouts Farm Agency.

**Women**: Kohl, Miss Grace; Mahoney, Miss Francis; Cummings, Mrs. Frank; Dunning, Mrs. Pearl; Fulton, Mrs. Louise; Prentice, Mrs. Jane S.

Peter T. Conley, P. M.

Were you at our Auction last Saturday afternoon? If so, come again; if not don't miss it next Saturday. Big Bargains. Van Wagenen, Inc. adv

### CAUCUS NAMES NEW MEN FOR REGENTS

Albany, N. Y.—Three new regents of the University of the State of New York were designated last night by the Senate and Assembly. They are William Berri, of Brooklyn; James F. Byrne, of Manhattan, and Walter G. Kellogg, of Ogdensburg. The Manhattan Republican organization met defeat in the caucus in both houses. Sam S. Koenig presented William Bondy, of New Yorw, as a candidate against Mr. Byrne.

For old sores, indolent ulcers, poisoned wounds or gangrene on domestic animals, apply Hanford's Balsam. adv.

# IMPROVING THE CITY STREETS

## Cultivation of Shade Trees a Paying Policy.

## WASTE PAPER BASKETS.

**Safety Isles, Advertising Regulations, Wall Hydrants and Uniform Street Signs Greatly Add to the Safety of the Public and the General Appearance of City Streets.**

By FRANK KOESTER,
Author of "Modern City Planning and Maintenance," etc.

The cultivation of shade trees has proved very advantageous in European cities, as the trees in affording shade increase the attractiveness of the street. They also reduce the amount of flying dust and temper the winds, improve the air and conduce to the healthfulness of the city. Shade trees should be planted two or two and a half feet back from the outside edge of the curb and an earth surface of from two and a half to three feet in diameter left around the trunk for natural watering.

In addition to this, a desirable method of watering is that of gutter seepage, a hole being cut in the curbing, protected by a grating, and the water finding its way through the earth to the tree roots.

In some European cities waste paper baskets of meshed wire are placed at intervals around the trunks of shade

STREET WITH SHADE TREES IN BERLIN.

trees and the bases of lighting poles. The bottoms of such baskets are some two feet above the surface of the street and the tops two feet or so higher. It is the duty of the police and of the individual citizen to see that no garbage is thrown on the sidewalks or into the streets, since the baskets, being conveniently placed, afford a place for such rubbish. The streets are thus much more easily cleaned and do not so quickly become cluttered with rubbish.

In wide streets in which vehicular traffic is heavy, so called safety isles should be placed to facilitate crossing. Such aisles should be edged with granite curbing, some six inches above the crown of the street, and should be about four feet in width and of suitable length. They may be placed at the side of the street car tracks or in the center of the street and added prominence may be given to them by ornamental electroliers.

At important focal points are placed small structures for supplying meteorological information. On the outside weather charts and forecasts are displayed and thermometers and barometers with continuous records of their fluctuations are provided. Condensed time tables of arriving and departing trains and vessels are shown.

An additional feature found in such structures and throughout European cities, of great convenience to the public, and one which would prove of even greater convenience to the American public if placed in similar locations, is the electric clock. Not only on the meteorological stations are such clocks placed, but also at every few blocks at some convenient location. Such public clocks are electrically controlled and operated from a central point. They are attached to lighting poles, news and subway kiosks, advertising columns and in whatever locations they will be of greatest use.

Fire hydrants, especially in prominent streets, if not placed against the building wall, should be sunk below the surface, not only for the sake of the appearance of the street, but to obviate danger of freezing in winter. Covers for such hydrants should be flush with the sidewalk and properly marked. Objection may be made that in case of fire such hydrants would be difficult to find, but this is overcome by signs placed on the buildings directly over the hydrant in the form of a red H and by other signs intermediate, with arrows pointing both ways, giving the number of meters to the fire hydrants in either direction.

The name of streets should preferably be placed on the corners of buildings, and each of the four corners should have the names of both streets. This is a cheaper and more effective method than the placing of signs on posts, which obstruct the sidewalk and which, owing to the expense, are usually only placed on two of the corners, diagonally. The post method is, however, at times a necessity. The combination of a white letter on a blue ground has proved to be the best arrangement of colors.

## AN IMPROVED VILLAGE.

**Civic Pride Is Abundantly In Evidence In Ramsey, N. J.**

Among the villages where civic pride is abundantly in evidence to the visitor who inspects the municipal equipment is the borough of Ramsey, N. J., less than an hour's ride from New York city, writes F. W. Gertzen, mayor of Ramsey, in the American City. It lies on the old Franklin turnpike, an improved state road, built of amiesite, the direct road for motorists from New York to Tuxedo and "up the state." The main business street is clean, well shaded and inviting looking and is lined with modern stores. Many of the thoroughfares are kept oiled, and most of them have cement sidewalks and curbs. The council meetings are held

ON THE WAY TO THE BASEBALL FIELD.

in the fire house, thus making it a sort of town hall. The borough's pride is the municipally owned water system.

The village schools are well planned and kept in good condition. One building houses all the grades from primary to sixth. It is equipped with modern sanitary arrangements and ample fire protection. On adjoining ground stands the fine high school, built about two years ago. It contains seven classrooms, a large office for the principal and the board of education, a library, an up to date auditorium, seating 300, with manual training rooms, gymnasium and toilet facilities. The entire building is ventilated by one of the modern systems, with a motor in each room.

At the side of the high school two full size clay-coated tennis courts have been built. These are so popular as not to be able to meet the demand for their use. There is a fine baseball diamond on another side of the building. Back of the "old school" is a playground for the little folks, neatly set off from the other grounds by a privet hedge.

The ladies of the village have been active in matters of civic improvement. They have formed a free library and have improved the station grounds, giving a bright and welcoming touch to the entrance to the village. The board of health has done considerable work in seeing that dairies are kept in first class condition and has also undertaken publicity work in regard to the killing of mosquitoes. The work of the shade tree commission in caring for and setting out shade trees on newly improved streets deserves commendation. Electric lighting and good police protection are among the other features of the municipal housekeeping which make Ramsey a good place in which to live.

### First Duty of a City.

A city is in reality a kind of apparatus or mechanism consisting of fixed places in which to live, work and be amused, with means of transportation of products to and from desired points.

The first duty of the city is to furnish a free means of access, belonging to the public, to the private property of each individual. Such avenues of communication in the rural districts are called roads and are widely separated, but in cities they are multiplied and called streets. It must always be possible, and it is possible, for a citizen to take to the highways and reach without interference the land of any other citizen throughout the United States.

**Of all poverty that of the mind is the most deplorable.—Gregory.**

## Transportation and Civilization—

By DR. FRANK CRANE
Copyright, 1916, by Frank Crane

Did you ever think how much CIVILIZATION is a matter of TRANSPORTATION?

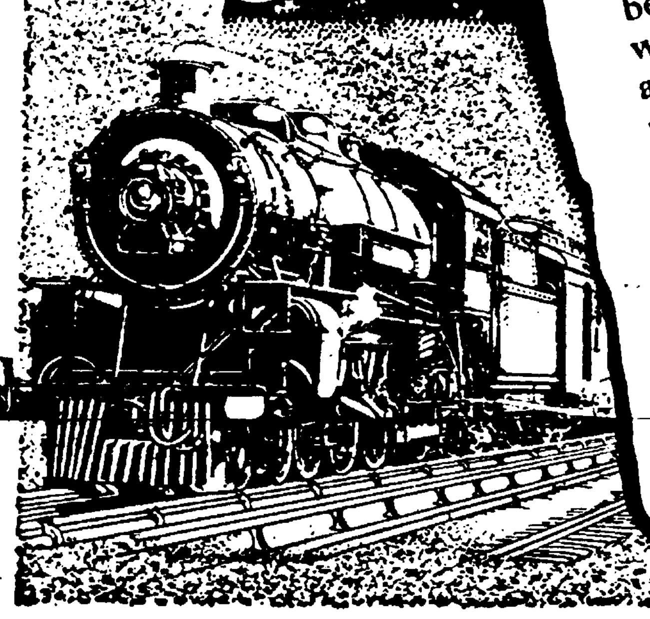
People were narrow, barbarous and cruel in olden times, because they hardly ever TRAVELED. They were PROVINCIAL. Hence full of PREJUDICE and IGNORANCE.

The Railway train and the Steamship make men BROADMINDED.

The railroad links your town with the WORLD.

It takes you everywhere. And it brings to you STRANGERS, PAPERS, letters and the best of all creation.

The Railroad needs YOUR THOUGHTFUL CONSIDERATION when questions of policy affecting its interests are discussed with you.



THE above from the pen of Dr. Frank Crane is reproduced in this advertisement with his permission.

In such expressions we note with pleasure a growing confidence between the public and railroads who dedicate their facilities and activities to the Public Service, the motto of the New York Central Lines.

NEW YORK CENTRAL LINES
"For the Public Service"

### GRANBY CENTER

Lawrence Dickson is home from Pennsylvania.

# Let Edison Bring You Happiness

Sixty-nine years ago tomorrow, February 11th, Thomas A. Edison was born—destined to revolutionize the mechanical world. Just a few short years since, the Edison Diamond Disc Phonograph was brought into being by this great wizard—and it is fast revolutionizing the musical world.

**THE EDISON DIAMOND DISC**

is acknowledged to be the most perfect reproducer of sound. It is making thousands of homes happy in the realization of perfect music. Wouldn't you like to settle down for an evening of joy, listening to the greatest of musicians and singers—to hear every note as clearly as if the artist were actually in the room?

A few dollars will place the supreme Edison in your home—a few dollars from time to time will pay for it.

Stop in and hear the Edison—you'll surely like it.

**WM. C. MORGAN** - - THE EDISON DIAMOND DISC STORE

# CITY'S BASTILE GETS PRAISE

**Inspector Recommends Improvements Immediately In View of Certain Bad Conditions.**

A lbany, N. Y.—The State Commission of Prisons has approved the report of inspection of the cit yjail here. The report is in part as follows:

The city hall and police station consists of a two-story brick building, originally a private residence. * * * In the rear end farthest from the street is a stage and underneath the stage is the jail, consisting of a cell room for men and a detention room for women and juveniles. The jail portion is of brick construction with plastered walls and cement floor. The ceiling is of metal

The room for men has three steel cells of square bars on all sides, size 5x7x7. Each cell has two steel bunks without bedding. There is a sink with running water and a common flushing closet in the cell room. This portion has three good sized windows.

The detention room is adjacent with separate entrance. It is furnished with two cot beds and bedding, but there are no tolets or washing facilities. Both rooms are heated by steam and lighted by electricity. The jail is reached by passing through the yard to the rear of the building.

The jail was found in a fairly clean condition but an odor was present in the men's department. The cells are painted black and the interior of the room a rather dark color; a light color should be used.

The number of arrests during 1915 was 438, of which number 18 were women and 5 were boys. About 200 lodgers were housed during the year and were permitted to use the cell room.

This is a fairly good jail but the location. When a new city hall is constructed, provision should be made for a modern police station and jail.

Recommendations: That modern jail toilets be installed in the cells. That a toilet and lavatory be placed in the detention room.

Respectfully submitted
Clifford M. Young,
Inspector.

## Have You Seen the Kee-Lock?

KeeLock THE PERFECT LENS MOUNTING

The Kee-Lock lens fastening is positively solid—no objectionable lens screws to weaken the lens or work loose. The "key" (W.S.C. Fig. 2) fits into a slot cut in the lens. This is heat cemented on all sides. The exposed portion of Kee-Lock fastening (light outer line, Fig. 2) acts as a flange and supplements the "key" in preventing any play or loosening of the lens. Much stronger and neater in appearance than the old style.

May we have the pleasure of showing you the Kee-Lock without obligation on your part?

**Wm. C. Morgan - Optometrist**

## IMPORTER REMOVES STOCK TO NEW STORE

Frank Massaro, groceryman and importer, who lately purchased the grocery stock and bakery of Peter Massaro, after extended improvements to Peter Massaro's property, this morning, moved the entire stock from his former store to the new place.

Mr. Massaro will confine most of his business efforts towards popularizing the Italian made bread, in which he has, as a retailer, worked up a large trade.

## GRANGE SUPPER

## SHELLS MUST NOT BECOME SOUVENIRS

Watertown—If any of the employes of the New York Air Brake Company's shell manufacturing plants are detected carrying away shells as souvenirs they will be placed under arrest and forced to face a charge of petty larceny. The above statement was made today by Chief of Guards Robert Rastley when asked about the matter.

Every day we sell several lots of paint. We still have a variety of colors and sizes. We have enough $200 gal. cans left of outside white for several houses. $1.55 per gal. while it lasts. Van Wagenen, Inc. adv

## VICTOR HERBERT COMIC OPERA COMING SOON

"The Princess Pat," a new three act comic opera, book and lyrics by Henry Blossom, music by Victor Herbert and staged by Fred C. Latham, produced by John Cort will have an early presentation at the Quirk Theatre. The authors of "Mlle. Modiste," "The Red Mill," "The Prima Donna" and "The Only Girl" have in their latest work "The Princess Pat" more than duplicated their former successes. The story of the opera has largely to do with the flirtations of the youthful American wife of an Italian prince, the Princess Patricee alled "Pat" for short. She is peeved at the lack of demonstrative affection on the part of her husband and enters into a plot to bring that gentleman to his senses. An elderly, "having-got-rich-quick" person named Schmolz, overburdened withs elf-esteem, takes her flattery seriously, and they oung lady finds herself ind ifficulties when he insists upon an elopement.

The opera will be presented with a cast and chorus of superior excellence and with an augmented Herbert Orchestra. Mr. Herbert's score is delightful and contains more than twenty numbers. The scenes of the opera are laid on Long Island. The production is elaborate and the costumes beautiful.

## MOUNTY MAY RECEIVE ANOTHER APPOINTMENT

If a bill, which passed the House of Representatives Monday becomes a lew, Congressman L. W. Mott will havet he appointment of another candidate to the Naval Academy at Annapolis for the examinations to be held April 18th next.

The bill, which now goes to the Senate, provides for one additional midshipman at Annapolis from each Congressional district, so that all the Central New York members are affected. The bill is expected to pass the Senate. It is the first legislation of the present Congress in the interest of preparedness, and was passed unanimously.

Leave orders for Miss Crysler's Baking with Mrs. J. K. Steele. Phone 378. adv

## MAXAM—CLARK

The Rev. J. W. Barrett, pastor of the First M. E. church, performed a private wedding ceremony at the parsonagel astn ight uniting Miss Mabel Clark of this city, and Mr. Leroy J. Maxam, of Mexico. The wedding occurred at 5 o'clock and was attended by Mr. Homer Stratton and Mr. A. W. LaBeef. A brief honeymoon trip follows, and upon their return the young people will live at Rice's station, where Mr. Maxam is in charge of a milk station.

# LENTEN SEASON OPENS MARCH 8

Catholic, Episcopal and Lutheran churches wherever they exist are at this time preparing for the opening of the Lenten season, Ash Wednesday, March 8. The season of Lent opens later this year than for some time past and Easter Sunday, which marks the close of Lent, falls upon April 23. While the Lenten season is observed by people of all demoninations ,it is a period of prayer and fasting for the people of the Catholic faith and its restrictions are many. Social festivities and al lother affairs of an entertaining nature are dispensed with and religious devotion is increased. The only break in the Lenten season is St. Patrick's day, March 17, when all of the Lenten restrictions ared ropped and on this date there is always an abundance of social events.

Special services are held daily in most of the Catholis churches and special nights are set aside each week for Lenten devotions. Holy week is the mostr estricted of the Lenten season and special devotions are held in al lthe churches every day. With the coming of Easter Sunday there is general rejoicing and the services in the churches on that day are often the most elaborate of the year.

Easter is the principal feast of the Christian year. Its commemorates ther esurrection of Christ, the corner stone upon which our faith rests. Since Christ rose from the dead on Sunday the custom obtained from Apostolic times of regarding every Sunday of they ear as ac ommemoration of Easter and of designating Sunday as the Lord's day, when the Christians assembled for "prayer and the breaking of bread," i. e., the celebration of mass and the reception of holy communion, as we find in the Acts of the Apostles. Easter is the oldest feast of the Christian church, the connecting link between the Old and the New Testaments. The feast of the Passover is thec entral feast of the Jews. Between it and Easter there is ar eal connection. The Passover commemorates the departure of the children of Israel from Egypt and points to the giving of the law of Godw to Moses on Mount Sinai, which marks the making of the Old Testament. Christ ate the paschal lamb on the feast of the Passover with His disciples and afterwards institued the last supper or the mass as the sacrifice of the New Testament, ordained His apostles priests and on the following day died for our redemption. Hence Christ is designated as the Lamb of God who was sacrificed for our sins, as the new Pasch. Thus it is that the Jewish feast is taken over into the Christian Easter celebration, for the liturgy sings of the liberation from Egypt, the passing of Israel through the Red sea, the paschal lamb, etc.

The Executive Committee comprises: Mr. George True, Mr. W. A. Church, Mr. A. L. Warner, Mr. H. L. Paddock.

**Elks Were Thanked**

The recent Elks' benefit at the Quirk theatre produced a total of $716 in admissions. Mrs. Victorine Lee, of New York City, donor of the hospital, recently sent a letter enclosing a check for $100 to the vice-president, advising that the money is to be used for the benefit of the institution.

# AUXILIARY HAD CASH BALANCE

Mrs. E. E. Morrill, recording secretary of the Women's Auxiliary of the hospital, in making her report for 1915, says in part:

"The hospital has been visited each month by an especially appointed committee from the Auxiliary, so as to keep in touch with its needs.

"Flowers have been sent to the patients and eleven baskets, each containing at least three dollars worth of groceries, have been sent during the year. These baskets have been paid for by different ladies of the city, six being responsible for a basket each month. The reports of the "work"an d' 'supply" committees will show how much time, thought, and money has been expended each month to provide necessary materials in the housekeeping department, and also in the nursing division of the hospital:

"Our efforts were not confined to the household supplies alone, but have reached out to needed repairs in the building. Two verandas were repaired and painted; tile replaced on a portion of the roof; and the entire second floor painted and re-decorated; making an outlay of over three hundred dollars.

"In March $100 was also given to the Board of Governors as one-third of a debt which they had to meet.

"The two "Papeer Days", when old newspapers are gathered from all over the vity and sold to the paper mills, netted the Auxillary about $35. This, with the dues and fines, were the only means used this year to bring in funds.

"Once during the year we appealed to the public—that was to assist at Thanksgiving by sending donations to the hospital, which would help stock the store room shelves for the winter, and every can of fruit, cup of jelly, or package of groceries was received with gratitude.

"Arrangements have been perfected with the Board of Governors and the Superintendent of the hospital, by which each of the senior nurses shall do the work of a City Visiting Nurse for three months before her graduation; the Auxiliary agreeing to pay forty dollars a month to the hospital for her services. This arrangement is to be tried for a few months—and the money which was given by the Elks from their Charity Ball helped supply the treasury for this purpose."

(Treasurer's report willb e published tomorrow.)

Wanted—Girl for general housework. No laundry. Apply 509 W. 3rd st. —354

To Rent—Upper part of barn for storage. 56 West 1st st. 353

# FURNITURE CO. IS BEING SUED

Civil redress is sought by a number of Oswego and Fulton people who claim they were victimized by the Western Grand Rapids Furniture company, of Albany, retaining Attorney John Tiernan to prosecute their cases. Mr. Tiernan has brought suit for the amount of the money paid into the company on contracts. The amount involved is in the neighborhood of $1,800. It is claimed that the company has a large warehouse in Albany where a considerable amount of furniture is said to be in storage. The furniture company is at present under indictment here and the civil suit will either force the company into bankruptcy, it is claimed, or force them to pay back the amount of the money collected in Oswego.

The furniture company, it is alleged sent smooth agents to Oswego and had contracts entered into, whereby patrons of the company would pay in the sum of 25c a week until $18.50 had been paid, when choice of a piece of furniture would be given. As an inducement there would be a drawing each week and the lucky person would receive a piece of furniture regardless of the amount paid in and further payments would then cease. It is claimed that for the first two or three weeks the plan worked all right but afterward the lucky person would be someone whose name was not in the directory. It is also claimed that several contributed $16 and $17 into the fund and that collectors then failed to appear, and the furniture never came.

**Help Your Liver—It Pays**

When your liver gets torpid and your stomach acts queer, take Dr. King's New Life Pills and you will find yourself feeling better. They purify the blood, give you freedom from constipation, biliousness, dizziness and indigestion. You feel fine—just like you want to feel. Clear the complexion. 25c at druggists.

## ACTION TO SET ASIDE DEED TO CITY PROPERTY

Justice DeAngelis in Special Term has directed that briefs be submitted in one week in the action of Mora Joseph, of Fulton, against Mary J. Rogers, Dora A. Campbell and John W. Campbell to set aside a deed to property in Fulton worth about $12,000, given by Mrs. Rogers to the Campbells after Mrs. Joseph had started an action against her to recover damages for alienation of affections. The case was undefended and the jury returned a verdict of $8,000. Thomas L. McKay appears for plaintiff and F. G. Spencer for defendant.

An interlocutory decree of divorce was granted Stella Haythorn from Elmer H. Haythorn. Plaintiff was represented by D. Page Morehouse, while defendant made no appearance. He is now a resident of Rochester.

A decree of divorce was granted yesterday Maude Ouderkirk, of Fulton, from George Ouderkirk. There was no defense. The case of Leon E. Shares vs. Walter M. Fry, et al., was referred to A. H. Sheldon, of Syracuse.

For fresh cuts wet thew ound occasionally with Hanford's Balsam of Myrrh. adv.

**A Versatile Savant.**

Since Sir David Brewster in September, 1831, with the help of a few colleagues gathered together at the archiepiscopal palace at York, founded the British Association For the Advancement of Science, many great savants have addressed the annual meeting. None among them, however, can have eclipsed the founder in the high qualities that make the born scientist. He found time, in the middle of researches into the mystery of light, to invent the kaleidoscope and play the part of a pioneer in photography, as well as to write innumerable magazine articles with a regularity that would have made him the favorite of the most exacting editor.—London Express.

**The Real Albanians.**

South of Valona lies the only part of Albania where the people call themselves Albanians, or something like it. It is said, according to Sir Charles Eliot, that the names Arboeri and Arboerec are applied to this region and its inhabitants. The natives of the rest of the country know what is meant when Turks speak of Arnauts and Europeans of Albanians, but they do not use this name themselves, preferring to be called Shkyipetar, which means eagle men. Northern Albanians are also generally known as Ghegs, southern Albanians as Toska, but these names are considered not quite complimentary.—London Telegraph.

## MILLIONS FOR DEFENCE OF RETIRED MINISTERS

The 4,598,000 members of the Sunday schools of the Methodist Episcopal church are to be enlisted in the work of raising the $15,000,000 fund for retired ministers, ministers' widows and dependent orphan children, according to plans laid Wednesday at the meeting of the board of conference claimants in Chicago.

Every Sunday school pupil who contributes to the fund is to be presented with a small United States flag. The children are also to be taught to honor the memory of the ministers who have died by joining with their elders in an annual memorial service. This is to be held in June, when the graves of deceased ministers will be decorated with flowers.

An increase for the last year of 213,000 in the membership of the Sunday schools of the church was reported at the meeting of the Sunday school board, which was also held in Chicago. Bishop W. F. McDowell is president of both boards. In the evening a banquet was held at which the joint boards, their wives, and invited guests were present.

Reports extending over four and eight years were given in preparation for the general conference of the church in May.

"During the last four years," said Dr. Edgar Blake in his report, "596,000, and in the last eight years 1,252,000, have been added to our Sunday school enrollment."

## INVENTOR'S WIFE WANTS MORE MODEST DRESS

New York—Too far from the floor at the bottom, and not far enough from the floor at the top, evening gowns worn by a few young women at dances of the Women's Club of Orange, N. J., have incurred the displeasure of members of that organization and as a result the officials have undertaken to have the women of Orange adopt a simpler and more conservative standard of dress, particularly for entertainments at the club. Among the women directing the movement are Mrs. Thomas A. Edison, Mrs. William L. Smith, president of the club, and Mrs. Frederick Seymour, chairman of the Committee on Dances.

We can now take in a few more Overlands and Fords for overhauling. Van Wagenen, Inc. adv

**War Upon Pain!**

Pain is a visitor to every home and usually it comes quite unexpectedly. But you are prepared for every emergency if you keep a small bottle of Sloan's Liniment handy. It is the greatest pain killer ever discovered. Simply laid on the skin—no rubbing required—it drives the pain away. It is really wonderful.

Mervin H. Soister, Berkeley, Cal. writes: "Last Saturday, after tramping around the Panama Exposition with wet feet, I came home with my neck so stiff that I couldn't turn. I applied Sloan's Liniment freely and went to bed. To my surprise, next morning the stiffness had almost disappeared, four hours after the second application I was as good as new." March, 1915. At Druggists, 25c.

An auction advertisement in The Evening Times for six days prior to the sale is the cheapest way to advertise a sale. adv.

*COLD FEET*

Are unhealthy as well as unpleasant. How often have you wished that you had a HOT WATER BOTTLE tucked in bed, down at your feet. They bring no end of comfort these cold nights.

We have Hot Water Bottles from 98c to $2.50 each, all guaranteed—the cheaper ones for 1 year, others for 2 years.

You cannot afford to be without one of these at this price.

*KLINE-WOOD DRUG CO.*

## AUBURN IS HAVING SUNDAY MOVIE WOES

Auburn—The fight waged here to secure a footing for open movie houses has resulted in the indictment of J. Howard Morgan, on the charge of breaking the Sabbath in conducting a motion picture show on Sunday, will be tried at the term of County Court which convenes next Monday, or whether it will go to the Appellate Division within the next few weeks, will depend upon the next few weeks, will depend upon the decision which Justice Irving R. Devendorf hands down on Monday of next week, on the dumurrer to the indictment interposed by Attorney Frank S. Coburn, Should Justice Devendorf sustain the demurrer, District Attorney Albert H. Clark will at once take an appeal from the decision and the case will move to the Appellate Division. In the event that he sets it aside or overrules i.t Morgan will be tried at the coming term of County Court.

## ELECTRIC ROAD HAS THREE THUSTEES NOW

Syracuse—In a letter addressed to thestockholders ofthe Auburn & Sy- nounced that plans have been laid for the operation of the road and that three voting trustees had been named who are Hendrick S. Holden and Arthur W. Loasby of Syracuse and F. W. Roebling Jr., of Trenton, N. J.

The letter sets for the proposition as follows: On February 1, 1916, the $250,000 of one year notes issued by this company, the Auburn & Syracuse will mature and six months' interest at five per cent. on these notes will have to be paid, the interest amounting to $6,250. On August 1, $115,000 of 18 months' notes issued by this company will mature. At the present time $72,000 in cash is required by the company to provide for its outstanding short time paper past due vouchers, accounts and accrued interest.

## THE IRON CLAW," A NEW PATHE SERIAL

**PEARL WHITE, CREIGHTON HALE, AND SHELDON LEWIS IN CAST—ARTHUR STRINGER, AUTHOR.**

### TWELVE TWO-PART EPISODES

**Over Six Hundred Newspapers Have Already Bought the Serial Rights of the Story.**

Pathe has become known as "the house of serials." Certainly that enterprising organization has more successful serials to its credit than any other in the motion picture business, and it was one of the very first to make one, "The Perils of Pauline" having been begun about two years ago. The first episode of "The Red Circle" was released on December 18th. Now comes announcement from Mr. Ramirez-Torres, Assistant Managing Director of Pathe, to the effect that sometime in February will be released another serial, "The Iron Claw," by Arthur Stringer, the well-known novelist, and Geo. B. Seitz.

It is interesting to note that Mr. Stringer's work was selected on its merits from a large number of manuscripts submitted by some forty-seven different authors, among them many of national reputation. It is a strong story of mystery and love with the hero's identity kept in mystery until the last moment. Many of the scenes are laid on an island off the coast of South Carolina.

"The Iron Claw" will be in twelve episodes of two parts each. It will be produced by the Feature Film Corporation, and directed by Edward Jose, who has achieved fame as a producer of of Gold Rooster Plays. The principals of the cast have been determined by the numerous letters which have been received by Pathe from exhibitors and movie fans all over the country, requesting that Pearl White, Sheldon Lewis and Creighton Hale of "The Exploits of Elaine" fame be featured in another serial.

Over six hundred newspapers all over the country have already been lined up on this serial, among them the New York World, the Philadelphia North American, and the Chicago Herald.

Arthur Stringer will be well remembered as the author of "The Shadow," "The Secret Agent," "The Wire Tappers," "The Gun Runners," "The Hand of Peril," "The Occasional Offender," etc. His stories are all characterized with that vital quality known as "punch," and "The Iron Claw" displays plenty of that characteristic.

Creighton Hale, who is featured with Pearl White, acquired great fame as "Jameson," "Craig Kennedy's" assistant in the "Elaine" serials. He possesses a remarkably engaging personality, and his talent has been recognized by his being given important parts in a number of Pathe features.

**FLORENCE REED**

**PATHE USES REPUBLIC THEATRE AS A SET—NEW STUNT IN FILMING "NEW YORK."**

Recently Pathe got over a new stunt at the Republic Theatre, New York, with the assistance of A. H. Woods, the theatrical producer.

As soon as the curtain was rung down at 11 o'clock on "Common Clay," Producer Fitzmaurice with his star, Florence Reed and many extras, came in and took possession of the theatre. Special lights were installed and some twenty scenes taken in jig time. The use of a big theatre as a motion picture set is a new scheme and proved to be a very effective one. In order to carry out the realism the floor of the theatre was crowded with extras, and friends of various Pathe officials. Mr. Woods himself was present and gave many valuable hints as to detail. The picture is "New York," an adaptation of one of Mr. Woods' theatrical productions.

**CO-OPERATIVE EFFICIENCY.**

Co-operative efficiency is the keystone of the successful commercial organization. When the business men of a city give their time and money to promote the welfare of their city and community they expect results. Unfortunately most of the things which the commercial organizations working for the general benefit of the community must do are of a general rather than a directly pecuniarily, beneficial character. Therefore for the best interests and advancement of commercial organizations it is practical that they incorporate departments that will produce definite, direct, pecuniary benefits for their proprietor members.

For the past decade the tendency in this direction has been very noticeable. Chambers of commerce, commercial clubs, boards of trade and retail merchants' associations whose original purpose was to promote industry and enhance the value of real estate have created departments and bureaus which produce definite and tangible results. The organization of the credit bureau as a department of activity is an example of this changing order in commercial organization progress.—Town Development Magazine.

## DOG KNOWS PHONE RING.

**If Master Isn't Home Bud Goes Out and Finds Him.**

Winsted, Conn.—Bud, a Boston terrier, owned by W. B. Pinney, an employee of the Southern New England Telephone company and a member of the volunteer fire brigade, can distinguish his master's telephone call—two rings—from the other numbers on the 316 line.

When the bell rings twice and Pinney is at home and does not hear the call the dog searches for him. By barking and other means he attracts his master's attention to the telephone.

When Pinney fails to respond at night to the double ring Bud dashes to his master's room and rouses him. That is one reason why Pinney never fails to report for duty at a night fire.

**Value of an Inch of Rain.**

Every inch of rainfall above four inches in the Dakotas, California, Washington, Kansas and Nebraska in May and June means an increase of $15,000,000 in the wheat crop. Every inch of rainfall above three inches in July in Indiana, Illinois, Kansas, Iowa Ohio and Nebraska increases the value of the corn crop by $160,000,000. These figures are compiled by E. J. Cragoe for the Journal of Geography.

**Hollow Shafts.**

By careful experiments it has been proved that a solid column subject to bending strains is no stronger than a hollow one. Consequently all iron shafts are made hollow, and the steel shafts which drive the screws of steamships have a hole bored down the center so that the weight may be reduced

**Penny Weddings.**

Until 1645 marriage feasts, known as "penny weddings," were held in Scotland. Each guest paid a penny or a small sum of money to defray the expenses of the feast. If any money was left over it went toward the furnishing of the new home.—Exchange.

Idleness wastes a fortune in half the time that industry makes it.—Samuel Smiles.

**The Great Philhellene.**

There is at least one Englishman for whom Greek affection has never wavered—Lord Byron. Not only is he commemorated in Greece by statues and street names, but his portrait is to be found everywhere, even in the most unlikely places. Mr. W. Miller in his "Greek Life In Town and Country" tells how he came upon a portrait of the poet in a provincial restaurant. The moment he took notice of it "the proprietor, a stout, prosaic looking man, whom no one would have suspected of sentiment, stepped toward the picture, clasped his hands in pathetic gesture and, with a faraway look in his eyes, stood for a time in rapt admiration of the great Philhellene."

**Sound Waves.**

A sound wave consists of an alternate compression and refraction of the air. A singular result of this was noted after a great powder explosion at Erith, England, in 1864. The leaded glass windows of a church several miles away were all strongly bent inward on all sides of the church. The explanation was given in these words: "The sound wave on reaching the church separated right and left, and for a moment the edifice was clasped by a girdle of intensely compressed air, which forced all its windows inward." The subsequent dilation of the air was insufficient to force the bent panes back into shape.

**Repartee.**

"Ah, would I were a glove upon that hand," quoted the ardent swain.

"Quit your kidding," retorted his lady love.—St. Louis Post-Dispatch.

**In the Dark Ages.**

When Rastus Johnsing's son arrived,
He looked just like his poppy.
In fact the doctah done declared
He was a carbon copy.
—Cornell Widow.

# FOR YOUNG FOLKS.

## Two Members of an Outdoor Kindergarten.

### THE MORNING SONGBIRDS.

**The Story of Forty-nine Children Who Go to School Outdoors All the Year Around and Are Ever So Happy About It Too—Also Some Games.**

This nice pair is singing "So very, very early in the morning" at Morningside avenue and One Hundred and Sixteenth street, New York city. Here, winter and summer, Mrs. Calvert has her outdoor kindergarten for children

ALL OUTDOORS.

all the way from two years old to eight. There are three classes in all—a morning and an afternoon class outdoors and another that does primary work indoors all the morning and then goes out in the park afternoons. All the children wear teddy bear suits—blue, brown and red. When Jack Frost pinches their toes they skip and play ring games to keep warm. "Once there was a princess" and "Red rose growing in a garden" are what they love best of all. When it snows they have the greatest fun rolling in it and making snow men. All the pleasant days they braid mats and sew cards and do arithmetic examples on the park pavements with pretty colored crayons. The very kind park commissioner lets them have four benches for a "house," and they learn all about the trees and shrubs from tiny sprouts in the spring, through flowers all the summer time to seed babies in the fall.

On days when it mists and rains all the children wear waterproof caps and capes. But when it pours Mrs. Calvert takes them home with her and buries sea shells and marbles in her sandpile for the children to dig up with little blue and green shovels. It's just like going to a party outdoors every day, isn't it?

**The Scoutmaster.**

Every troop of scouts has a leader, a man who is known as scoutmaster. He receives a commission annually from the national council of the Boy Scouts of America upon the recommendation of the troop committee. This commission certifies as to his fitness and gives him authority to act as scoutmaster in carrying out the boy scout program in accordance with the official handbooks.

He must be at least twenty-one years of age and is chosen because of good moral character and his interest in work with boys. He attends all the meetings and outings of the troop and is responsible for the general program and supervision of the work of the troop.

**Some Queer Drums.**

Drums have always been used by primitive races to drive away evil spirits, to terrify foes, to make men fight better or to summon friends together. They are of all sizes, sorts and shapes. In China drums are made of baked clay, bowl shaped with a skin stretched across the top. A drum from Central America is cone shaped, over four feet in height and is hollowed out of a solid block of wood. An Ashantee drum is shaped like a bottle—a very large one. A Mandingo drum resembles a tenpin upside down, while a Friendly islands drum, between four and five feet high, is just like a post, with a head of leather not more than six inches across.—Chicago News.

**Judge and Jury.**

To play this game the players should be seated in two lines facing each other. One of the players should be chosen judge. Each person must remember who is sitting exactly opposite. The players, asking, "Do you like apples?" The player spoken to must remain silent, while the player who is opposite to him or her must reply before the judge can count five. A rule in regard to answers is that the reply must not be less than two words in length and must not contain the words yes, no, black, white or gray.

**A Lullaby in the Rain.**

Fairies fly in their overshoes,
Orchards drip and meadows ooze.
Drip and drizzle and drop.
Will this downpour never stop?

Beetles gather beneath toadstools,
Muskrats play in the forest pools;
Drip and drop and drizzle.
What ways the waters whistle!

Squirrels hide in the hollow tree,
The lawn is like an open sea;
Drop and drizzle and drip,
If we only had a ship!
—Philadelphia Record.

# For the Children

**A Two-year-old Who Plays Outdoors All Winter Long.**

Photo by American Press Association.

This delightful roly poly is the two-year-old newest baby in Mrs. Calvert's outdoor kindergarten at One Hundred and Sixteenth street and Morningside park, New York city. Most schools stop in June, but this outdoor one goes all the year, and the children play even in snowstorms. When it rains very hard Mrs. Calvert takes them home with her and ... fishes and charming seashells in ... sand pile for them to ... with little red and blue shovels. When Jack Frost takes charge of the p... children run and skip and d... like "Yes, I know the mu... and "Once there was a pri... keep from getting cold toe... gives them red cheeks and h... In the spring the p... ...wer lets the children h... for a "house," and the ... tells them lovely stories ... flowers and leaves. ... mats and learn to ... examples on the asphalt ... pretty colored crayons ... their teacher tells them all ... babies and autumn leaves ... from 9 till 6 every day but ... much nicer than going to ... doors. Don't you think so, too?

### About M...

The natural m... loadstone, is an ore of iron ... of which is composed of ... of iron and four ato...

This loadstone ... power of attracting small p... iron and if balanced and ... will point nearly north and s...

Artificial magnets are pieces of iron or steel which ... under the action of either the loadstone or other magnets or of ... have been subjected to percussion while in certain positions.

Permanent magnets are those which retain their magnetic properties permanently. They are made of hard steel, in bars or bent in the form of a horseshoe.

Temporary magnets are those which retain their magnetic properties only as long as they are under the influence of other magnets or an electric current. They are bars of soft iron, either straight or bent like a horseshoe.

The poles of a magnet are the two points of greatest attraction and repulsion. They are near the two ends.

### Beheadings.

Behead what falls in winter and leave the present time.

Behead a boys' toy and leave everything.

Behead that which is rowed and leave a cereal.

Behead the entire and leave a tear.

Behead a testament and leave not well.

Behead a part of a window and leave a Scotch maiden.

Behead a piece of furniture and leave an exclamation of pain.

Behead a low seat and leave a carpenter's necessity.

Behead a hurt and leave a part of the human body.

Answers.—S-now, b-all, b-oat, w-hole, w-ill, c-lass, c-ouch, s-tool, h-arm.

### "Weezy Deezy."

The "weezy deezy" game is played as follows: Any number of boys and girls can participate.

Two players are chosen. One is named Weezy and the other Deezy. They are then blindfolded and supposed to be helpless. Weezy shouts, "Won't somebody here please help me and take this Deezy away?" Deezy shouts out: "There is somebody here annoying me. Won't somebody take him away from me?"

One player then pulls Weezy away, and another pulls Deezy away. Weezy and Deezy must then guess who pulled them away. If they can't guess correctly, then the players who pulled them away become Weezy and Deezy.

### Boy Scout Movement.

The boy scout movement is not anti-military. The boy scout movement neither promotes nor discourages military training, its one concern being the development of character and personal efficiency of growing boys.

## PRACTICAL HEALTH HINT.

### The Mustard Bath.

This is an excellent treatment for a beginning cold. It brings the blood to the surface in sudden congestion of the lungs, in collapse, shock or heart failure from any cause. The bath may be prepared by mixing four or five tablespoonfuls of powdered mustard for a minute with one gallon of tepid or warm water. To this should be added four or five gallons of plain water at a temperature of 100 degrees F. Place the patient in the bath and let him remain about eight minutes. The bath should never be continued over ten minutes. A bath of this kind is excellent for children and adults to break up a beginning cold. After the bath one should go to bed immediately and cover up with blankets and remain in bed for twenty-four hours.

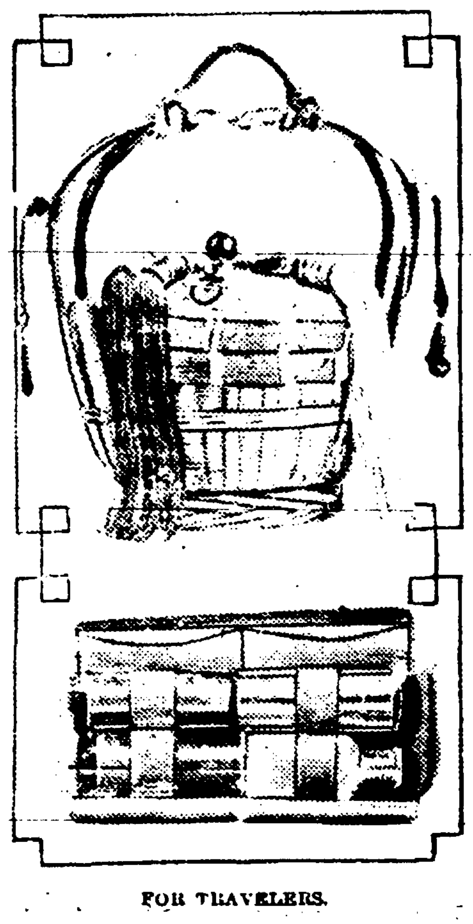
### A Classic Monster.

"Write down all you know about centaurs," said a schoolteacher to a few pupils. The boy returned to his seat and presently handed the teacher the following attempt at composition: "A centaur was ancient cavalry and archery all in one piece. He could not be knocked out of his saddle because he hadn't any, being the same person as his horse. If he needed a tent he ... if he needed a stable ... not need a tent. I do not know ... if he needed forage he ... need ... or if he needed ... A... though he was mythical and primitive this made him very convenient for war."

## ATTRACTIVE NOVELTIES.

### Two Gifts For Her Who Goes on a Journey.

One of these articles is a Chinese workbasket of wicker, with a smart handle of straw and kid strappings ornamented with jade drops. Two beautiful silk tassels of oriental colors finish the lid. The basket is lined with satin and fitted with sewing utensils. The leather case contains a cut glass toothbrush holder and two bottles for powder and a mouth wash.



FOR TRAVELERS.

Money talks, but all of Carnegie's millions can't coax the scrappers over there to stop and listen.

### Showed Them How.

In "Welsh Humor" is this story. "Sir Foulk Fitzwarren was recounting to his knights his exploits against the Saracen. These being calmly received, Sir Foulk said, 'But right here, the other day, I jumped from the ground to the top of my castle.' The knights being skeptical, Sir Foulk invited them to come the next day and see him perform the feat. When they assembled he jumped up one step of the stairway and continued jumping, step by step, till he was on the top of the tallest tower. 'But we could do that too,' chorused the knights. 'Not till I showed you how,' retorted the redoubtable warrior."

### Radium Too Dear For Soil.

Professors Hopkins and Sachs of the University of Illinois have been testing the effects of radium on the soil and find that any quantity that can do any possible good to the crops will cost so much as to make its use prohibitive. One milligram of radium costs $100. This distributed over an acre of ground did no appreciable good. Merely to double the quantity of radium emanation normally in the earth would, as the Scientific American points out, cost the farmer $7,500 an acre!

**A Positive Cure for Colds and Cough**

Mrs. W. C. Simons, Little Falls, N. Y., says Chamberlain's Cough Remedy is a positive cure for colds and coughs. "Since I first commenced to use Chamberlain's Cough Remedy a few years ago," writes Mrs. Simons, "I am unable to say too much in praise of it. I keep it in the house at all times and have found it a positive cure for colds and coughs. As it is free from opiates I have no hesitancy in giving it to my children.

# A Lamp Shade a la Mode

© Ira L. Hill, New York.

DESIGNED by Lady Duff-Gordon for Edna Mayo in "The Strange Case of Mary Page," this charming frock upholds the prophecies of spring, 1916. The bodice and top of the skirt are fashioned of pale blue taffeta, the lower part being a deeper shade and the silver lace petticoat edged in pale blue. The fichu is banded with pale yellow and green like the bow on the front of the bodice, and the two lace aprons are worn on the sides of the skirt.

• • •

For every day and windy weather there is nothing better than a trim little velvet turban finished with a perky velvet bow. ANNA MAY.

*Prepared Especially For This Newspaper by Pictorial Review*

### Distinctive Coat For Spring.

Serviceable and attractive coat of checked silk, also suitable to development in white serge or broadcloth.

Featuring a high collar, which may be turn down when warmer days come, large pockets and unusually well-cut sleeves, this coat is excellent for spring wear. It is made of heavy plaid silk, but it is unnecessary to suggest that serge, cloth or gabardine may be used instead. In medium size only 2¾ yards 54-inch material are required for the coat. When the collar is rolled back it adds revers to the front of the coat. If a belt is added, an attractive blouse effect is gained.

Only two sections of the pattern are placed on the lengthwise fold of the cloth, the back and the collar. The sleeve is laid on a lengthwise thread and is laid between the back and the collar. The cuff, pocket and front are placed on a lengthwise thread, while the underfacing runs parallel with the selvage edge of material.

Plain white serge is employed to fashion many of the new spring coats, the smooth, twilled variety being first in popular favor. It is eminently serviceable and adaptable to many occasions.

Broadcloth in chiffon weight is used for more expensive models, and a coat of the style here illustrated carried out in white broadcloth would be excellent for dressy occasions.

Jersey cloth may also be employed to fashion the coat.

The vogue of jersey weaves is not confined to sports garments, its original use, but is now to be found for whole tailored suits, waists, frocks and separate coats. There is also a tricot serge, a serge with a jersey weave, that is not quite so elastic as the plain jersey cloth. Of course the craze for sports clothes is responsible for the jersey vogue, and probably it is its ease and adjustment to the form without overmuch fitting that recommend it to the present styles.

# The Beauty of Harmony

Few women seem to realize the advantage, assistance and general help that are obtained from having the tone or note, as it were, that of harmony through and part of the various phases of life. Even educated women and women of more or less nice instincts seem to fail to realize how much can be done by the individual to make a certain amount of harmony in life.

If a woman is in the least high strung, temperamental or nervous, it is advisable, if not necessary, that her surroundings should be as much as possible harmonious and in good taste.

Unfortunately to carry out the idea satisfactorily more or less money is necessary. But a woman who can plan well and also has good taste can choose her pictures, wall paper, rugs and furniture to look well in a conservative way both singly and as a whole. No matter how few her possessions may be, a woman can have around her a something that suggests calm and peace wherever the eye rests.

Every one is better mentally, physically and temperamentally if the home life is free from disputes, bad temper or irritation from any member of the family. Harmony counts for more in home life than anywhere, and there it is most important and farreaching in its beneficial results. The one and only way to obtain harmony in home life is to have each and every member in the home circle considerate of the others in every way—in other words, self control, which so many do not think worth while just in the family circle.

Observing a certain amount of care in selecting the colors for one's garments is not only more satisfactory in the long run to the wearer, but has a pleasing and more or less soothing effect upon others. Few women seem to realize how necessary it is to dress in colors that harmonize with the complexion and eyes. Another important point is that as women grow older it is wise to change the style of clothing as well as the color, so as to as much as possible still have that harmonious general effect.

Many of the unpleasant and even dangerous occurrences in life would be done away with if people were more careful in conversation to observe a rule to have every topic one that is conducive to a feeling of general harmony for all.

A certain amount of harmony can be expressed by the attitude of the body, which with some people is merely the outward expression of the working of a soul and mind in harmony and accord with all their fellow beings.

Harmony in the speaking voice is a desirable quality. Even, well regulated tones are rare. That so few people have harmony in the speaking tones is because almost anything that is not in normal condition shows in the voice, especially a disordered state of the nerves. Few women realize how much it helps to be self controlled to keep the voice free from unevenness and a quaver or a sobbing voice, which so many women have. A controlled, well modulated voice is among the assets in life.

Wise women select their friends, if possible, only from those who are in mental harmony, those people whose tastes and points of view are agreeable to them. So called friendship not founded on that harmony does only harm.

Some few women are fortunate enough to have perfect harmony between mind and body. Most women are obliged to be content with keeping the two in harmony as much as they can.

### Overtime Pay.

"Pa, what is meant by overtime pay?"

"Overtime pay, my boy, is the reward for doing a little extra labor, and there are two kinds."

"That so? What are they?"

"Well, some men insist on collecting their overtime weekly and at a specified rate, and others are willing to work overtime and take their reward in a successful future. I recommend the latter course for you."—Detroit Free Press.

### Dreams As Omens.

From the earliest times recorded in history men have believed in the prophetic character of dreams. So far as we know, the first to deliberately and systematically attempt the interpretations of dreams was Amphyctyon of Athens, who lived about the year 1490 B. C. The Bible mentions dreams in many places, and we are entitled to conclude from the Biblical references that there were professional interpreters of dreams who were not infrequently resorted to by the dreamers.—Exchange.

**Coughs and Colds are Dangerous**

Few of us realize the danger of Coughs and Colds. We consider them common and harmless ailments. However statistics tell us every third person dies of a lung ailment. Dangerous Bronchial and Lung diseases follow a neglected cold. As your body struggles against cold germs, no better aid can be had than Dr. King's New Discovery. Its merit has been tested by old and young. In use over 45 years. Get a bottle today. Avoid the risk of serious Lung ailments. Druggists.

# TODAY'S FASHION NOTE

In the spring the fashionable woman's fancy turns instinctively toward separate waists. This design is embroidered crepe de chine fastens over a vest of hemstitched chiffon, finished with a high collar. White silk cuffs finish the sleeves at the wrists. In medium size the waist requires 2 1-2 yards crepe, 3-4 yard chiffon and 1-4 yard silk.

Pictorial Review Waist No. 6582 Sizes, 34 to 50 inches bust. Price 15c

Pictorial Review Patterns may be procured at the J. R. Sullivan and M. Katz & Co. Department store, Fulton.

**Stomach Trouble Cured**

Mrs. A. M. Spears, Chadwick, N. Y., says: "About a year ago I was suffering from indigestion, biliousness and dizzy spells. The food I ate made me sick at the stomach. I tried a number of medicines but nothing did me much good until I began taking Chamberlain's Tablets. They helped me at once and two bottles of them cured me."

## BEHOLD THE REDINGOTE.

**Cut on Beautiful Lines, This Suit Gives a Smart Effect.**

A WINTER IDEAL.

Over a full skirt of deep purple broadcloth goes its redingote, which is modishly banded with black fox. Two interesting details are the slit pockets in the front skirt of the coat and the demi-belt fastened with two novelty buttons. With the chic little turban this makes a handsome outfit for the business woman.

## THINK OF OTHERS.

If you think how much suffering and poverty there are in the world you will fall down upon your knees and, instead of repining at one affliction, will be thankful for the many blessings that are yours.—Sir William Temple.

# STOCK CRITICISER MAKES FORTUNE

## Bethlehem Steel Rise Brings $6,000,000 to Untermyer.

## SHUN MARKET, HIS WARNING

**Said It's Hopeless For Average Man to Expect to Accumulate Big Sum of Money by Stock Dealing—Lawyer's Wise Investment Years Ago Brought a Fortune—Has Never Speculated.**

New York.—"It is worse than hopeless for the average man to expect to amass a fortune or to make money by dealing in the stock market."

And yet Samuel Untermyer, who made the foregoing statement in a letter addressed to the Rev. C. F. Reisner, Grace Methodist Episcopal church, this city, is today some $6,000,000 richer than he was a year ago as the result of the phenomenal rise in the price of Bethlehem Steel stock.

But Mr. Untermyer has not speculated. Twelve years ago he bought 15,000 shares of stock of the Bethlehem Steel company as an investment. For some of it he paid as little as $25 a share, while none of it, according to the wiseacres in Wall street, cost him more than twice that amount. The same stock today is selling around $450 a share, and Mr. Untermyer still holds the bulk of the 15,000 shares which he bought originally. He is holding the

Photo by American Press Association.

SAMUEL UNTERMYER.

stock because of his belief in its intrinsic value. On its merits he believes the stock is worth $1,000 a share.'

This belief rests partly upon Mr. Untermyer's estimate of Mr. Charles M. Schwab as the greatest manufacturer and salesman of modern times. The story of how Mr. Untermyer came to form this estimate of Mr. Schwab and invest so heavily in the stock of the present Bethlehem Steel corporation recalls an interesting episode in the financial history of the United States when the methods of so called "high finance" were first exposed. This occurred early in 1903.

A few months previously the United States Shipbuilding company had been organized under the laws of New Jersey, with $16,000,000 of first mortgage bonds and many millions of preferred and common stock. That company acquired a number of the leading shipyards of the country that are now owned by the Bethlehem Steel corporation. It also acquired the Bethlehem Steel plant from Mr. Schwab, who took a mortgage of $10,000,000 in part payment of the purchase price. Among the shipyards that went over to the new company were the Nixon works, at Elizabeth, N. J., owned by Lewis Nixon; the Bath Ironworks of Maine; the Harlan & Hollingsworth shipyards, in Delaware, and shipyards in San Francisco owned by the Union Iron works.

Within a few months after the organization of the company it went to smash. At this juncture Mr. Untermyer was retained by Roland B. Conklin, Max Nathan and certain other bondholders, together owning about $290,000 of the bonds, face value.

On their behalf he began an action in New Jersey for the appointment of a receiver, declaring that the promotion and flotation of the securities was a fraud and that the properties, except the Bethlehem Steel works, had been turned over loaded with debt. A receiver was appointed.

After a couple of years of legal warfare a settlement was reached by which a new company—the present Bethlehem Steel corporation—was formed, with $15,000,000 each of preferred and common stock. The old bondholders received 60 per cent of new common stock and 40 per cent of new preferred stock of the Bethlehem corporation for their bonds.

While Wall street operators have sought to stimulate the bull campaign in the so called "war stocks" by calling attention from time to time to the big war orders received by the various steel, automobile and railway equipment companies, Mr. Untermyer has traveled about the country telling the public that he favors an embargo on arms and munitions.

# BOARD OF WORKS PLANS TO PAVE "BAD LANDS"

(Continued from Page One)

confliction of the amended resolution with certain provisions embodied in the State highway law. On June 21, 1915, ex-Commissioner Garrett offered an amendment to the resolution, providing for a wider street, 38 feet in all, and this action, together with the bitter opposition presented by the property owners affected by the proposed change of width resulted in tying up the improvement.

In submitting a petition signed by owners of property in Hannibal st., South side, west of the Lackawanna tracks, Police Captain Norton stated that the signers of the petition were well aware that the city was without funds to expend on sidewalk construction. They have secured the promise of a sidewalk builder, in effect that if the walk is constructed this year, the bill for the city's share will be withheld for a year. Again, a number of the property owners are willing to pay the entire cost of the construction and wait until the city is in a position to pay its share.

"The conditions in our vicinity are the worst that could be found anywhere," Captain Norton stated, "and immediate action to remedy this state of affairs should be taken. I just want you to picture yourself or your wife or child wallowing through the mud in the street in an effort to get to church, or to school. This is just what we have to go through. It is impossible to make any detour and we simply have to brave the center of the road in mud kneedeep."

Mr. Norton was promised that the board would give him a definite answer at the next meeting.

Chamberlain Adkins' report ending February 8th showed that there was $1,900 in the Public Works fund, $3,362.31 in the Improvement fund, $15,000 in the Light fund, $1,924.10 in the Sewer fund and $415.08 in the Water fund.

A resolution to have the Chamberlain submit weekly to the board a statement of the standing of each City fund was passed. The bill of the Fulton Light, Heat & Power company for January was ordered paid, also several small bills and salaries of the water department.

No action was taken an Superintendent Rumsey's suggestion that the Board buy about six carloads of coal in anticipation of a miners' strike. He said that on all sides coal buyers are providing for a probable tight coal market. He made a further request that the Fulton Sand & Gravel company be paid $84, which represents an overcharge on water rents since the installation of a meter in 1913. The books in the water department made it appear that the company was consuming an excess quantity of water, which was not the case. The company was therefore charged just seven times as much as should have been paid.

## WILSONISM IN TARIFF BILL PRESENTED TODAY

Washington—The administration's views and plans for a tariff commission were today laid before Congress. A ne wbill differing widely from the measures already introduced and cereating a commission with broad powers was introduced in the House of Representative Doremus of Michigan, chairman of the Democratic congressional committee. Doremus, one of the original tariff commission Democrats, has been in close touch with Secretary of the Treasury McAdoo and other administration officials since the President announced himself in favor of the scheme.

## PUBLIC HEARINGS IN BRANDEIS CASE

—Washington—When the Senate judiciary sub-committee opened its doors today and welcomed the public to come in and protest or approve President Wilson's appointment of Louis D. Brandeis to the Supreme Court, it created a new landmark in the country's history.

## DISPUTES TO BE TAKEN UP WITH BRITAIN

Washington—With the settlement of the Lusitania dispute with Germany assured, the administration today was prepared to bring to a head many questions in which Great Britain and her allies are deeply interested.

**Lines.**

Railroads, poems, plays, drawings, thoughtful brows, palms of hands and geometry are made up of lines.

Lines sometimes have a president and a board of directors, and presidents and boards of directors usually have lines. The care of lines produces lines of care.

Fishes and sentimental young ladies are frequently caught with lines.

Poets formerly were much given to inditing certain lines to young ladies, but the modern lady who desires certain lines usually goes to a modiste.

A man who gets a line on other people is either a profligate son, a detective or a tattoo artist.—Judge.

**A Luxury.**

"But," objected the heiress, "I have been accustomed to every luxury."

"That's all the more reason why you should marry me," replied the impecunious suitor. "I'm a luxury myself."
—Exchange.

## CHAMBER OF COMMERCE

*"Fulton First, Last and All the Time"*

The city must live by the life of its sons,
As rivers are only the water that runs
If only the rocks and the gorges remain,
The river is dead as the sand of the plain;
If men are not there with their vigor and might
The city is dead, and forlorn is its plight.
So the city must live by the life of its sons,
As rivers are only the water that runs.

* * *

Edward A. Filene of Boston, Mass., says:

"A business man in a community who is not sufficiently interested to contribute his moral and active support to the Chamber of Commerce should not receive the same consideration from his business associates as the man who does support the Chamber and through it the commercial and industrial advancement of his city."

* * *

Nothing worth while can be accomplished without co-operation. The most important work of the Chamber of Commerce is educational and not securing factories. If the Chamber of Commerce shall succeed in educating the people of its community to the need of better things, and if it can enlist the citizens into unselfish coöperation for the good of all, it will do its most important work."

* * *

What's the matter with this town?
Nothing sir, it's you!
Are you helping it along?
Lots of things to do!
Finding fault with this and that
Doesn't cure the ill;
Taking off your coat and hat
Is the way to fill the bill!

What's the matter with this town,
Anyway? you ask,
If there's anything that's wrong,
Righting it's your task!
Knocking, maybe, has its place,
But it's up to you—
With a bright and smiling face—
To do some B O O S T I N G, too!

What's the matter with this town?
Matter is that men
Find it easier knocking down
Than helping up again;
Let's get busy right away,
Lots of things to do;
Nothing matter with the town,
The matter is with you!

* * *

Support the city that supports you.

Help to make Fulton's business wheels spin faster.

* * *

Keep the dollar at home and you will see it again.

Dollars spent in Fulton remain here and work for Fulton.

# BUSINESS FORUM IN WASHINGTON DECLARES IN FAVOR OF HEARING VOICE OF THE PEOPLE

BY D. S. HOLLENGA
*Secretary Chamber of Commerce*

Washington, Feb. 8.—When the National Councilors, of the United States Chamber of Commerce met today, 300 members were in attendance. President John H. Fahy, of Boston, opened the session, and immediately it was made apparent that several of the Councilors were favorable to dispensing with the so-called political speakers, claiming that a majority of the people of the United States know the minds of the Secretaries of War and Navy relative to national defence; that there is a growing sentiment all over the country in favor of hearing the voice of the people upon such matters; or, in other words, the Councillors rejected the idea of having politicians tell them what should be done or what should not be done; that the business men of the country want to hear what the business men think about national defence. The result of the arguments was that the official program should be allowed to stand as printed, but that in making up programs for future meetings business men will get the preference as speechmakers.

### Men of Business Are Serious

At the conclusion of the Councillors' session the National Chamber began its sessions, with about 1700 delegates in attendance, the largest in the history of the organization, which fact points to the serious thinking the men of commerce are doing in this country on all problems affecting our National business life, because of the terrible conditions prevailing in Europe.

President Fahey's address was masterful, saying in part as follows:

"I am convinced that if we are quite frank with ourselves we must realize that for many years we have been very poorly informed as to the real facts involved in great questions before the country of special interest to us.

"The workmen in their organizations and the farmers in theirs have been far better posted on matters of particular importance to them than have the business men in their field, but we have nof come to the period in the history of America when less dependence can be placed upon thep roverbial guess. We must begin to do constructive thinking.

"I believe also that American business men would be much more useful to the country and to themselves if they were less inclined toward partisanship in dealing with the great economic questions which so vitally affect their interests. A number of our most important problems would have been disposed of in Congress years ago, but for petty politics.

"Another thing we business men should set out systematically to discourage is the altogether too prevalent and continuous disparagement of the efforts of men in public life. When the business man himself has a little experience with holding office or when he comes to understand Congress or the average State Legislature as it really is, he usually begins to change his views about public servants if he is at all fair minded."

### A Constructive Meeting

Mr. Fahey's speech was greeted with round after round of applause, indicating to the people all over the country that the 1700 men assembled here representing only the largest financial, industrial and commercial organizations in their home cities were in perfect harmony with the sentiments he expressed in such forcible language.

This is a wonderful meeting of men who are in control of the business energy of the country. The men are here to discuss what added facilities the United States most needs for the development of its trade abroad: what changes are to come affecting immigration and what should be done with the alien population to knit it more closely together; what part business men should play in the evolution of a constructive national program; vocational education; a merchant marine; and the general theme of commercial preparedness.

Three hundred thousand members of 700 commercial bodies in the United States ,Alaska, Porto Rico, Hawaii and the Philippines

(Continued on Page Four)

## GERMANS FAIL TO HOLD TRENCHES TAKEN FROM FRENCH; 800 YDS. LOST

London—Berlin yesterday officially reported the capture of 800 yards of the French first line trenches west of Vimy. The report adds that more than a hundred soldiers were made prisoners and five machine guns were captured.

The Paris report admits the capture of some portions of the French trenches but says that at certain points the Germans were driven out by a hand grenade attack.

It appears that two German mines, heavily charged, were exploded at points under the trench extending from Hill No. 140 to the raod from Neuville St. Vaast to La Folie. The Germans dashed out of their trenches and occupied the portions of the French line that had been destroyed.

This line has been debatable ground ever since last September, when the French made a notable advance here but lost part of it to the Germans in January. Hill No. 140 is near the western end of the French front a short distance below the Belgian border. Vimy is two miles northeast of Neuville, near which town the Germans late last month made their infantry attack.

Military critics here are divided in opinion whether the German attack was merely designed to win back all the positions they lost in September or whether it is preliminary to more extended operations. The latter conjecture is based on the report that large numbers of German troops have been transferred recently to Northern France.

The Amsterdam correspondent of the Central News, who reiterates this report, telegraphs that it is reported from the Belgian frontier that 600,000 men have been sent to that front. The message also says the Germans are intending to extend the Belgian port of Zeebrugge so that it will shelter more ships.

## KENTISH COAST RAIDED BY GERMAN SEAPLANES; AIRMEN PURSUE INVADERS

London—Two powerful German seaplanes made a daylight raid on the Kentish coast yesterday afternoon, their bombs injuring two women and a child. Four bombs fell near a schoolhouse, three of them exploding. Property damage was said to be confined to shattered glass.

The seaplanes were seen approaching the coast at half-past three o'clock and in a few minutes they were over Ramsgate, dropping bombs. From there they steered from Broadstairs, where they aimed their explosives at the schoolhouse.

By this time the alarm had been spread along the coast, and several British aeroplanes and seaplanes quickly took to the air to repell the invaders. The German machines turned and flew out to sea pursued by the defence craft. As no word of an engagement in the air reached London last night, it is believed here the Germans escaped their pursuers.

The following official statement on the raid, prepared before news of the injury to the women and child was received was given out last night:—

"At half-past three p. m. today two German seaplanes were reported approaching the coast of Kent. A few minutes later these two seaplanes dropped three bombs in a field on the outskirts of Ramsgate. Four bombs were dropped near a school at Broadstairs. Three of the latter exploded.

"No casualties have been reported. No damage was caused other than to glass."

The county of Kent forms the south eastern extremity of Great Britain, running north to the Thames. It includes part of the city of London. This portion of the English coast was the object of the last German attacks by aeroplanes, made on January 23 and 24, in which one person was killed and six were injured.

Ramsgate is a seaport and watering place on the east coast of the Isle of Thanet, fifteen miles from Dover, the principal city on the Kent coast. It has a good harbor and is the seat of shipbuilding and fishing industries. Its population is nearly 38,000.

Broadstairs is a town of about 7,000 on the Isle of Thamlet two miles from Ramsgate.

## OSBORNE TRIAL FEB. 21 NO CHANGE OF VENUE

White Plains N. Y.—The case of Thomas Mott Osborne formerly warden of Sing Sing Prison, will go to trial here on Februrary 21 according to a statement made by Federick E. Weeks, District Attorney.

Today was thel ast day in which George Gordon Battle attorney for Mr Osborne,, could serve notice that he would apply for ac hange of venue. Mr. Battle wrote the District Attorney stating that no application would bef made. It was learned that the letter was prompted by one received by Mr. Battle from Mr. Osborne in which the one-time warden declared that he had found in Westchester county loyal supporters of the new system of prison management and also many personal friends. Mr. Osborne stated also that the fact that the attack had been made upon him in the county was a reason why the fight should be settled on the spot.

## 45—PHONE NEWS ITEMS—45

Thursday, February 10, 1916.

**The people have been impressed by the arguments for a larger military force. The figures are very liberal, probably the idea being that they may be reduced. On second thought many will conclude that it is wisest to develop and maintain what has already been organized and perfected. For instance, the militia and national guard. This body is supposed to number upward of 125,000 men in the active ranks. It would be simpler to double this number of the militia than to organize and train separately 125,000 men. It would also be simpler to reenlist the discharged militiamen and, with new recruits added, form a reserve equal in strength to the active force, the two services thus providing a half million men. The militia stands for preparedness in normal times. Its efficiency for abnormal times could easily be extended.**

**Admiral Dewey has been put upon record as advocating a United States navy strong enough to whip the strongest possible adversary. The admiral didn't say whip, but must mean that. His thesis will be found fault with. Critics will be heard to say that it really means that this country must be ready to fight the whole world. That could only follow when the whole world should be bent upon our destruction, a dilemma unthinkable. What the admiral and his class probably have in mind is a navy that will size up to any occasion likely to confront the United States.**

**A considerable number of national representatives favor a retirement scheme for the civil service. That the faithful servant who becomes incapacitated by age should be provided for is a natural and ever growing conviction. However, laws in such cases work arbitrarily, and it will happen that efficiency is often laid on the shelf to give stupidity, or something like that, a chance for promotion. Age limits should not be too arbitrary either in the matter of dismissal or retirement, for it is solely a question of efficiency and the public good.**

**The axiom, "In peace prepare for war," may be balanced by the reverse proposition "In war prepare for peace." War is abnormal and all its creations abnormal. It starts industries and business booms that must collapse. Hard times are sure to follow, and all the gain of prosperity may be swept away. It is good sense, then, for the people of this country to give staple trade and normal industry a fair share of attention.**

**Hartmannsweilerkopf, which is, as its name indicates, a mountain, is in Alsace, a few miles northwest of Mulhausen. It commands a range of a road in a valley between the mountains and the river Rhine and is fully 3,000 feet above the valley. It has changed hands many times as a result of alternate efforts by the kaiser's army and the allies to control it.**

**Recently a couple set out on their married journey sharing the cost on the fifty fifty plan. They started in by splitting the license fee and met the minister who tied the knot with installments duly parceled out and produced a bridal ring owned in common.**

**If any converted anti-preparedness folks are inclined to apologize now to Richmond Pearson Hobson there would be plenty of innocent bystanders ready with applause.**

**It might pay the belligerents to wait for the different nationalities composing the armies to brush up on Esperanto so as to fight in the same language.**

# REAL OBJECT OF TRAINING PUPILS

Advocates of vocational training, combining a course in agriculture, are legion in this vicinity. Indeed, there are thinking persons who see in such an institution something of far more and lasting value than additional industrial plants. The idea is based upon the theory that in order to secure and retain the interest of our neighbors beyond the narrow confines of the city, we must establish a working force such as an agricultural course would undoubtedly afford.

The growing need of all communities for vocational education, which would include agriculture as well is right now under discussion by the United States Chamber of Commerce in Washington and thousands of persons have their eyes open for the result of the deliberations.

An editorial writer, John B. Stoll, of Indiana, in a current number of a magazine, says under the caption, "Qualifying Pupils for Citizenship," as follows:

"The object of educating the youth of the land is to qualify them for doing the things they will be expected to do upon growing into manhood and womanhood and from thereon to the end. The training of the mind supplies the pupils with the implement needed to undertake whatever pursuit may be chosen as one's career. Usually it is assumed that this pertains chiefly if not wholly to productive pursuits—to making a living at this or that sort of work and incidentally laying up something for the proverbial rainy day.

* * *

"In the more progressively conducted schools a broader foundation is laid for the alert and ambitious pupil. The important fact that in a few years after graduation the duties and responsibilities of citizenship will rest upon the pupil is not lost sight of. Instructors will realize that the intelligent performance of these duties ought to be of as much concern as that of becoming qualified successfully to perform the tasks chosen to gain a decent livelihood. As a matter of fact the two should always be closely allied. It is inconceivable that a normal pupil should not have in mind to be both a capable workman and a good citizen.

"The study of citizenship should be deemed a pleasure, if for no other reason than that it is so easy—and yet so inspiring and so assuring as to future benefits.

"School authorities should reach a definite conclusion as to the grades in which citizenship should first be studied. Municipal governments—town or city—should have first consideration. Next in order should come township organization, to be followed by thorough study of county government. Inasmuch as woman suffrage may be regarded a strong probability by the time pupils in the eigth grade attain their majority and are clothed with citizenship, girls ought to feel as deeply interested in this study as those of the sterner sex. As soon as the theory of municipal government is fully understood, the form of an election for officers of town or city should be provided for and held in conformity with existing laws relating thereto. Such "going through the motion" will awaken a deeper interest than any performance that might be suggested. A similar procedure as to county, state and nation should be had in higher grades—that pertaining to the national government being reserved for the last, or rather for the highest grade. This plan, carefully worked out and systematically applied, will not only equip the pupil for the intelligent exercise of the elective franchise but furnish a diversion that will be highly appreciated by all permitted to participate therein.

* * *

"Properly conducted, these studies and these contests will lay the foundation for intelligent citizenship and at the same time put to shame the illegitimate and disreputable methods made to do service in some localities under the guidance of unscrupulous manipulators to accomplish their base purposes.

"With the right kind of instructors study of government in its practical working can easily be made the most attractive feature of a curriculum. There being really nothing intricate about the entire scheme, the average pupil will delight in learning to know who may vote, what voting is for, the different offices to be filled by popular vote and by appointment, the duties and powers of such officials, etc., etc. These preliminary features duly mastered, the governing machinery may be set in motion, beginning with a meeting of the town board, followed in a larger municipal sphere by sessions of the city council, the various boards, and an exemplification of the functions of the mayor of the city. The workings of a county government may be made equally interesting and instructive. Coming to state and nation the exemplification may well be confined to the higher grades.

* * *

"Inasmuch as public policies will in the future be vastly different from those of the past, the importance of laying the foundation of citizenship in good time—during the formative period of the future citizen and voter—cannot well be over-estimated. Abstract questions will, at least for the time being, have to be subordinated to the disposal of those larger problems demanding solution at an early day. What these problems are may be comprehended by a studious perusal of this significant abstract from a recent speech by Theodore Roosevelt: "Germany offers a striking example of national efficiency on a gigantic scale. Germany has been far in advance of us in securing industrial assurance, old age pensions, and homes, a reasonably fair division of profits between employer and employed, and the like. She also has been far in advance of us in the way she has controlled and encouraged industry. Above all, she has been far in advance of us in securing national cohesion in requiring both from the great employer and from the man who toils with his hands the fullest and most complete loyalty to the nation. She has not had to improvise methods of meeting crisis in industry any more than of meeting crisis in war."

"The sooner the American people adjust themselves to changed conditions the better the nation will be enabled to grapple with the difficult problems that confront it now and will confront it far more acutely in the near future. The duty of the hour is to get rid of slipshod methods and learn to become exceedingly practical, efficient and proficient."

WEARING OUT HIS WELCOME.

—Hodge in Spokane Spokesman-Review.

### WORKMEN'S HEALTH INSURANCE

A bill which provides for the insurance of workmen in New York state so as to assure medical attention and disability wages during illness or after accident is to be considered at the present session of the State Legislature. The financial burden created by the proposed health insurance system is to be borne pro rata, forty per cent by the workmen, forty per cent by the employers and twenty per cent by the State.

Undoubtedly some such arrangement for the protection of workmen and their families against the sufferings consequent to illness and accident must come as a development of the present social trend. Already some dozen of countries in Europe have successfully instituted and maintained such health insurance without in a single instance a confession of failure or the abandonment of effort to solve this serious problem.

Nearly everywhere, however, the plan originally adopted for this purpose has had to be modified in practice. There are many elements to be considered—physicians, drugs, dispensaries, sanatoria and the like. With the present temper of labor organizations there is a definite likelihood of more being attempted by legislation than can be successfully performed. Only the most judicious drawing up of the law, then, will save the State and employers from an unnecessary burden at the beginning and a complication that might even discredit, for the time at least, the movement for relief.—N. Y. Herald.

### THE ANTHRACITE QUESTION

A committee representing the anthracite coal operators publishes a statement giving their side of the questions raised by the wage demands of the miners. The miners have given out a statement that they will continue mining during the progress of negotiations for a settlement. Both sides have thus recognized, tardily but none the less frankly, that public opinion is a factor they can no longer lightly ignore. In the past the policy of both parties has appeared to be to look at the consumer as though he had no rights worth considering, and this attitude was apparently justified in the past by his helplessness, since on him has been saddled every increase in the cost of mining since 1903. He has learned by bitter experience that while his purse has been subjected to a yearly increasing drain, the prosperity of the anthracite region and of the anthracite carriers has been constant and progressive. He is beginning to think that perhaps the burdens of the cost of coal may not be evenly distributed. He suspects that the "cost of coal at the mine," granting that ... low, is not the only question that ought to be subjected to rigid scrutiny at this time.

The consumer is told that the operators have nothing to do with the exactions of the coal-carrying roads or of the retailers. Some of the operators say—in effect—that their margin of profit is so small that they only continue to mine coal from force of habit or from some altruistic and patriotic motive. Others again have said that coal was mined at a loss and when the connection between the operators and carriers was an open one they have frankly admitted that the loss on the one side was recompensed by the profits from the enormous freights on anthracite on the other. When the money all came from or went into the same pockets it did not greatly matter how the thing was balanced on the books. "To-day, however," says the Philadelphia Public Ledger, "the situation is complicated by a technical severance of mining from transportation, and the difficulties for the consumer are not by any means removed. He finds small comfort in the assurance that the operators are not drawing exorbitant returns from the mines—his coal bills mount steadily upward. What he asks is an 'open, frank and fair' exposition of the subject which shall cover the whole ground. If it is too much to expect anything except ex parte arguments from the United Mine Workers and from the Anthracite-Coal Operators' Committee, then the consumer feels justified in demanding that the issue shall be submitted to an impartial tribunal, with powers broad enough to sift the facts to the bottom and to reveal 'the actual situation.'"—Utica Dispatch.

### TO WATERTOWN'S CREDIT

Governor Whitman seems to have taken a leaf from the charter of Watertown in the matter of making public officials personally responsible for any deficiencies they make over the appropriations assigned them. He has sent a special message to the legislature, asking for the passage of bills which will prevent the enactment of annual supply bills by providing that state officers and department heads who contract debts exceeding their appropriations shall be personally liable for the excess. The ways and means committee of the assembly and the senate finance committee have introduced bills to that end. In his message Gov. Whitman says of the custom of overdrafts on appropriations, that "though it has been recognized by state officials and by the annual passage of a deficiency bill for years, the custom is vicious in principle and subverts all orderly methods of government finance. The annual appropriation act should carry in itself all the necessary expenses of the state government." This was found out in Watertown years ago and our city charter provides for the same thing that Gov. Whitman recommends for the state.—Watertown Times.

# THE CITY BEAUTIFUL

## CITY MANAGEMENT WORKS WONDERS.

### What New Methods Have Accomplished In Certain Municipalities.

The misrule of American cities is notorious at home and abroad, writes Charles B. Strayer in Leslie's Weekly. Graft is rampant. Political spoilsmen mulct our cities and the taxpayers foot the bills. German municipalities, on the other hand, are famous throughout the world for the absence of graft and the efficiency of their administration. There the administration of cities is a distinct profession to which men devote their lives. The administrator who has made a good record in one city is called from a small municipality to a larger one.

"Great industrial corporations, such as the Standard Oil company and the United States Steel corporation, are conducted with an efficiency nowhere excelled. The taxpayers can have the same results in municipal administration whenever they get thoroughly tired of being robbed by the politicians and grafters and demand municipal reform.

"An increasing number of American cities are reaping the benefits of administration by managers chosen because of proved ability to conduct great enterprises. Gaylord C. Cummin, as manager of Jackson, Mich., worked wonders in that city of 35,000 people in one year. Municipal employees were taken out of politics. Property to the value of $383,000, formerly exempted from taxation without legal reason, was restored to the tax rolls. The poor department was consolidated with the organized charities, with a trained social worker at the head. Rigid milk inspection was inaugurated and sanitary inspection made efficient for the first time. Without raising the tax rate these and numerous other reforms were inaugurated, a floating deficit of $20,000 wiped out, the city's net indebtedness reduced $50,000 and a cash balance left of $10,000, exclusive of the sinking fund."

## FINANCING BEAUTY.

### How a Small Michigan Town Has Made Improvements.

For years a rapid little stream wasted its energy in the heart of Paw Paw. The flats along the river were unsightly; the banks were not beautiful. At last civic pride and business instinct correlated. The uplift clubs agitated; the business men thought. At a cost of $50,000 they improved the river and formed a beautiful lake in the heart of the city, and that without condemning any valuable land. The city is more sanitary. There are hundreds of homes that now have a lake front, and all this beauty is more than self supporting. The power furnishes light for the homes, and all the city lights, used with freedom for advertising signs and illumination, come from its own power

SHRUBBERY AND VINES ADORN THE MUNICIPAL BUILDING.

house. The light sold to private consumers more than pays for the city light.

The Woman's club in Paw Paw has a neat clubhouse and is now using it for social purposes. It is a part of the civic life. It is not selfishly locked for members only. The club has realized the financial side of community life. On reception night of the woman's week carnival the club members wore gowns purchased in Paw Paw. They published the papers for the week. It was Paw Paw week and woman's week combined—uplift, financial prosperity, health, beauty, social happiness, all to the front.

Paw Paw has gone sane on its uplift plans. The business club adopted a suggestion to control the concession and amusement features about the lake, the boating and bathing facilities, with the double purpose of saving any income from them and keeping them on the moral plane.

In this way they follow the plan adopted by a Canada club which controls all the pool halls and other places of amusement. The money gained finances the club; the moral gain helps the home. Correlation is coming at last. Ethics, art and business sense make for the better city when doing team work.—American City.

## ORGANIZED TREE PLANTING BEAUTIFIES A SMALL TOWN

### How the Marvin (S. D.) Commercial Club Inaugurated a Movement.

Marvin, S. D., is a small town of some 300 people located in a prosperous portion of the northeastern part of the state, about 200 miles directly west of Minneapolis, writes Herbert J. Poppelman, secretary of the Marvin Commercial club, in the American City. The town is not organized (for local reasons) and is governed by the township-organization, which has two members in the county and one in the town.

The town obviously could not undertake to carry out such a proposition as tree planting at the public expense, but the Marvin Commercial club could. This is a live organization which derives from club dues and the management of local dances and other public entertainments a small annual sum which is used in public betterment. Last winter some of the members presented the idea of planting trees on the streets of the village. The matter was thoroughly discussed and plans were laid, and long before spring arrived the club had bargained for 200 ash, 200 elm and 200 box elder trees from six to eight feet tall. Exceptionally low terms were quoted by the nurseries, which were strongly in sympathy with our good intentions.

Planting 600 trees of that size is no small matter. Many members volunteered to plant twenty trees each, and others made larger offers; but, feeling assured that such a plan would not work out well, we hired two able men to dig the holes, which were about four feet in diameter and twenty-four inches deep. Then we secured volunteers among the men who had had experience in planting trees, each to give a day of his time. Other volunteer assistance was also accepted.

When the trees arrived a local Arbor day was proclaimed. Organized squads began the work, and by 5 o'clock of the second day all the trees were planted. The ladies of the town gave the workers good lunches in the middle of the morning and the middle of the afternoon, so that the hard work was made pleasant, and all enjoyed the diversion.

The summer was very favorable—a little too wet for crops, but just right for the new trees—and almost every tree grew and flourished. Many of them now measure eleven feet in height. The topography of the town site is rolling, and we placed the ash and elms on the upper streets and the box elders in the lower parts of the town. In the fall the trees were properly mulched with old straw, etc., and there is every reason to anticipate a vigorous growth in the coming summer.

Of course in every community there are a few who will not assist in any undertaking. Such people are known the world over as local knockers. There were a few of that kind in Marvin, and they almost succeeded in discouraging the lukewarm workers, but the leaders went right ahead until even the knockers were delighted to see that their knocks availed nothing. We are now making plans to lay out a park and plant it this spring with shade trees. This is a still larger undertaking, but we believe we are big enough for the job.

## CHILD WELFARE PRIZES.

### Kansas Rewards For Towns That Are Best For Children.

To interest the residents of Kansas in child welfare work prizes have been offered to third class towns which are the best for child rearing. The contest was arranged only recently, and already more than 300 towns have entered.

The contest is being conducted by Professor W. A. McKeever, head of the child welfare department at the University of Kansas. He had charge of a similar contest last year, when W. R. Stubbs, former governor, offered a prize of $1,000 to the city of the second class which showed the most improvement in child welfare work and was found by competent judges to be the best town of that class in Kansas in which to rear children. Winfield won that prize, and Independence received second honors.

The state is furnishing each city with a copy of the findings of the commission that picked that winner in the former contest, so that the towns will know the points upon which the scoring will be based.

The six chief points are: Opportunity for play and athletics, school work and industrial training, social and recreational activities, physical and moral safeguards, activities of child fostering clubs and societies, attendance at Sunday school and kindred organizations. The contest closes May 15.

### Pay Up Week.

Pay up week, which, as its name implies, is a kind of warfare against long standing debts, was recently inaugurated in the little city of Waukon, Ia., and so successfully did it prove that in the week set apart and advertised as such over $50,000 in old accounts was wiped off the books of the local merchants. The slogan was, "You pay your bills; I will pay mine."

HERBERT L. SAMUEL.

# HONOR FOR NEW BRITISH OFFICIAL

## H. L. Samuel First Professing Jew to Be Home Secretary.

## NOT A STRANGER IN OFFICE

### Successor of Sir John Simon Spent Four Years In Home Department as Parliamentary Undersecretary of State—Is Not Only Member of His Creed In Cabinet.

London.—For the first time in her history of nearly 2,000 years England has a professing Jew in the role of principal secretary of state to the crown.

True, Benjamin Disraeli attained the dignity of premier and died as the Earl of Beaconsfield. But he was a member of the Church of England, like his father before him, whereas Herbert Lewis Samuel, who recently succeeded Sir John Simon as secretary of state for the home department, has remained a strict adherent to the faith of his forefathers.

Nor is he the only member of his creed in the cabinet, for in the shuffle following the retirement of Sir John Simon owing to his objections to the compulsory military service law for single men Herbert Samuel's first cousin, Edwin Montagu, has been advanced from the secretaryship of the treasury to the chancellorship of the duchy of Lancaster.

Edwin Montagu, it may be remembered, contracted a matrimonial alliance last summer with Lord Sheffield's youngest daughter, the Hon. Beatrice Venetia Stanley, who abjured Christianity for the sake of Judaism in order to wed her husband, who would by the terms of his father's will have been divested of his large fortune had he married a Christian.

Herbert Samuel will be recalled by many in the United States as having paid a prolonged visit a little over two years ago while holding the office of postmaster general.

His family was founded by his [illegible] who kept [illegible] shop in Liverpool [illegible] two sons, Moses and Edwin. [illegible] Ellen Cohen [illegible] on the London Stock Exchange [illegible] eventually established a banking house in Broad street, London, associating his brother Edwin in the business. In 1894, on being created a baronet, Moses Samuel obtained a license from the crown to change his name to Samuel Montagu and in 1907 was raised to the house of lords as Lord Swaythling.

The Right Hon. Edwin Montagu, the [illegible] chancellor of the duchy of Lancaster, is his second son. The late [illegible] Swaythling's brother Edwin declined to change his patronymic. He [illegible] two sons, the elder of whom is Sir Stuart Samuel, member of parliament for the Tower Hamlets division of London, [illegible] who received a baronetcy in 1912. Sir Stuart's younger brother is Herbert Louis Samuel, the new secretary of state for the home department. He is married to his cousin, a [illegible] of the late Ellis Abraham Franklin.

Herbert Samuel, who was born at [illegible] in [illegible] and who as a Balliol [illegible] first class honors [illegible] has not come to the home department as a stranger. He spent four years there as parliamentary undersecretary of state, from the defeat of the Unionist administration in 1905 until 1909, under Lord Gladstone and thus is intimately acquainted with the workings of the office. It was during that period that he made his mark by the skill with which he piloted the so called children's act through the house of commons. Afterward, although he had come to be regarded as a specialist in the problem of child legislation, he showed by the clever manner in which he handled the liquor licensing measure in 1908 that he knew quite as much about beer as about babies.

He was rewarded in the following year with a seat in the cabinet as chancellor of the duchy of Lancaster and twelve months later became postmaster general.

### Homemade Gas.

Spanish peasants living in the cork oak region use homemade gas obtained from cork refuse. As described by one authority, the process consists in filling several large teakettles with the waste bark and placing each in turn over the fire during the evening, burning the volatile gas as it escapes from the spouts. The carbonized residue forms the fine black-brown pigment known to commerce as "Spanish brown."

### His Golf Prize.

When the Duke of York was living in Edinburgh in 1681 he was told that a certain shoemaker named Patersone was the best golf player in Scotland, and him, the duke, later James II., chose as partner in a foursome, winning a huge stake. He promptly turned over the money to Patersone, who forthwith built a house in which the duke placed a stone with a Patersone crest bearing the motto, "Far and Sure."

### Always Wrong.

Manager—I'm disgusted with the mistakes that new man makes! He gets everything balled up. Assistant Manager—Oh, well, some of the best ones are that way at the beginning. He may bring home the bacon yet. Manager—He won't unless we send him for ham.—Judge.

### His Motive.

Judge—Why did you commit a second theft after you had just been acquitted of the first one? Prisoner—I had to pay my lawyer, your honor.—Boston Transcript.

## FOR THE CATERER.

### Hints About Giving Your Family Enough Variety For Life's Spice.

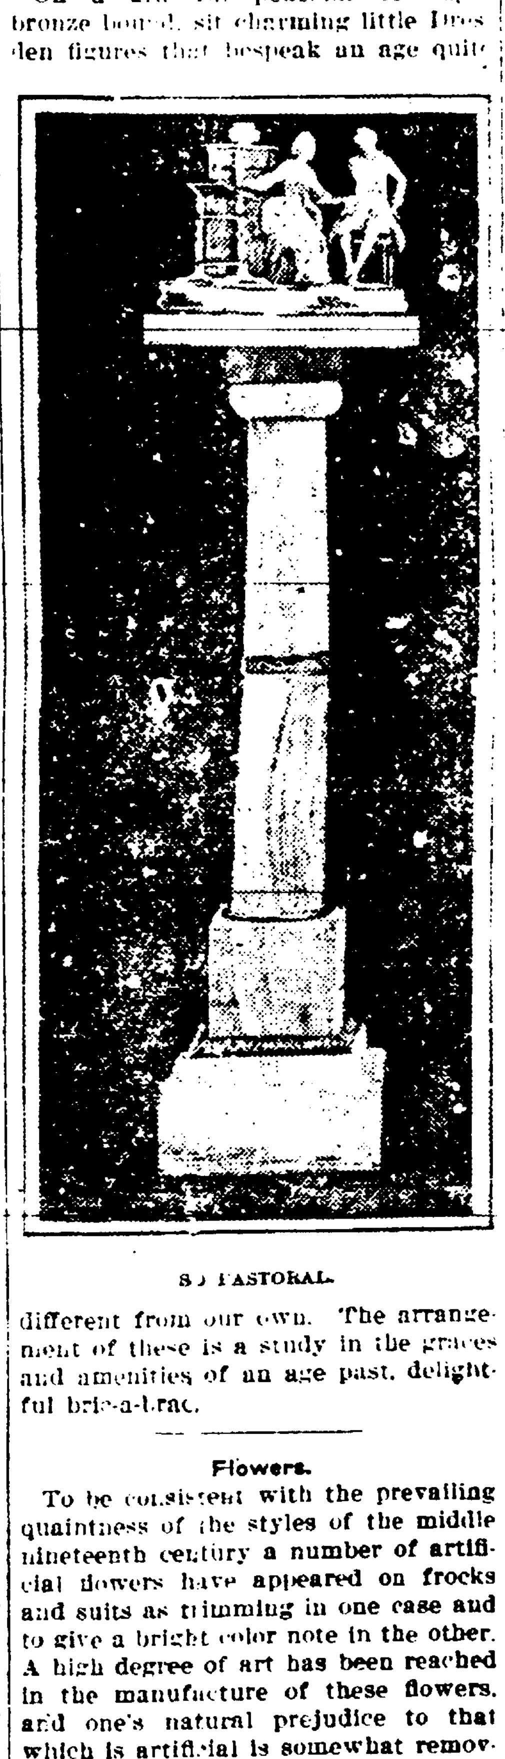
Of the household routine duties perhaps none is more dreaded by the average housekeeper than that of marketing, and this is often due to the fact that she has had no special training along these particular lines and that therefore she is apt to run along from one month to another in the same old rut, serving the same foods cooked in the same way without exercising her own ingenuity to provide that variety which we are so often told is "the spice of life." It most assuredly is a fact that the housekeeper who assures us that she sets a plain table is likely to be the one whose grocery and meat bills are very much higher than those of her neighbor who apparently provides infinitely more variety and appears to serve more fancy dishes, when in reality what has been spent is time and thought rather than money. The little made dishes—croquettes, haricots and ragouts—have an inexpensive base, but their plebeian origin is masked and hidden by sauces and gravies carefully compounded and delicately flavored. In such a household if the meat course is scanty its lack of bulk is made up by a heavy puree or thick cream soup, hearty, yet inexpensive, just as in the less expensive table d'hote dinners and lunches one is given a generous service of vegetable soup, macaroni and salad, which prove so satisfying that the smallness of the portion of chicken is scarcely noticed, yet this is the only really costly course of the whole meal.

A dinner of several carefully thought out courses in reality costs no more than the so called plain meal of steak or chops, two vegetables and pie or other dessert, yet the man of the house will be more than content with the course meal, while the housekeeper will have something extra to put aside in her bank for the entertainment of the guest, whose coming appears to demand somewhat more elaborate service than that of the home folks.

## QUAINT STATUARY.

### One of the Art "Pieces" That Women Like In Their Parlors.

On a graceful pedestal of onyx, bronze bound, sit charming little Dresden figures that bespeak an age quite



A PASTORAL.

different from our own. The arrangement of these is a study in the graces and amenities of an age past, delightful bric-a-brac.

### Flowers.

To be consistent with the prevailing quaintness of the styles of the middle nineteenth century a number of artificial flowers have appeared on frocks and suits as trimming in one case and to give a bright color note in the other. A high degree of art has been reached in the manufacture of these flowers, and one's natural prejudice to that which is artificial is somewhat removed by their close resemblance to the real growing blossoms.

The boutonnieres for wear with the tailored suits most often consist of a single flower surrounded by smaller ones rather stiffly arranged. This one flower may be a rose, a poppy, a gardenia or a carnation. Whatever the flower, the color is more or less dull. Dull roses, gray forgetmenots and plenty of foliage make these small boutonnieres small pastels of art.

### Drawn Work and Swedish Weaving.

Many of the new luncheon sets are square instead of round. Whether it is merely a passing fad or a fashion here to stay remains to be seen. These square sets have a wide hem and a drawn work border three-quarters of an inch wide, and a feature of this new drawn work is the introduction of colored threads.

Swedish weaving is another form of needlework being revived and is applied to household linens. It is really based on drawn work, but is slightly different, worked in color and quite simple. The delightful part is, after one has acquired a working knowledge of the few stitches used, one can create one's own designs.

**BELL-ANS**
Absolutely Removes Indigestion. One package proves it. 25c at all druggists.

**Why Duffy's is Healthful!**

Because it differs from the ordinary or beverage article in that it is especially made for medicinal use by the Medical Profession and Public and serves well when a reliable tonic-stimulant is required.

**Duffy's Pure Malt Whiskey**

is one of nature's foods; processed from the finest grains of the field and freed from possible impurities so as to give an article of uniform strength and reliability. The wholesomeness, purity and rich malty flavor of Duffy's Pure Malt Whiskey permit it to be retained by the most delicate stomachs when other foods are rejected. Taken as directed it serves splendidly it assisting the proper assimilation of food so that the body gains health, through proper digestion, to resist dangerous coughs, colds, grip and pneumonia. In aiding the aged and infirm to a better enjoyment of life, Duffy's can be relied upon. That is why so many "Get Duffy's and Keep Well."

At most druggists, grocers and dealers. If they can't supply you, write us. Useful household booklet free.

## LITERARY HYPOCRITES.

### Here's a Writer Who Frankly Admits He's One of the Clan.

How many of us if we were really honest could make a list of great books that we have tried to enjoy and couldn't rise to?

We have for our own part a greater sin than that on our conscience. There are a number of books that we habitually pretend we have read which we have never read at all. They are great books, we suppose. At least we've heard a lot about them and read a lot about them, and people who assume to know say they are great books. Some of them we have tried to read and couldn't read, but we have pretended at one time or another to have read all of them. Here is our list of shame:

"Tom Jones." We have tried to read it four times and could never get five pages into it.

"The Vicar of Wakefield." We have attempted it at least six times and taken the count in the first round every time.

"Dante's Divine Comedy." We have been going against the Cary translation, which we hear is a good one, at least once a year for twenty years, and we can't get interested in it. Yet up to the present moment we have always pretended that we had read all of it and liked it.

"Don Quixote." We have read a little of it, and we know all the usual things that are said about it, and we even wrote some stuff about it one time, saying all the things that are usually said about it, for which we got $25, but we don't really like it. It puts us to sleep; it seems long drawn out and clumsy to us.

"Boswell's Life of Johnson." We never read any of it. But we have pretended to and have pretended at times to quote incidents from it and have got away with the incidents.

We have always pretended that we were familiar with Walt Whitman's poetry, but as a matter of fact we never read anything through, excepting "When Lilacs Last In the Dooryard Bloomed."—Don Marquis in New York Sun.

## THE TREE ON THE ROOF.

### An Old Building Custom to Propitiate the Pagan Gods.

Did you ever stop to think why a bit of ornament in the form of conventionalized fruit, grain or flowers is almost invariably added to the gable of a Gothic building and very frequently to the gable of any other type of building? Do you know why the lightning rods of our grandfathers were branched at the ends like little trees and why the old fashioned Scandinavian, Danish and German contractors contrive to fasten a branch of a tree or an ear of corn to the topmost peak of a house that has progressed so far in the course of construction that the rafters are in place? Usually the contractor laughs sheepishly when he is asked about the matter, giving no other reason than that his father always provided the birds with some grain or offered them a green branch to rest in.

The fact is that the birds have nothing whatever to do with the custom. It is purely religious in its significance and entirely pagan. It had its beginning before Christianity was "inflicted on the barbarians of the north." The gable of a building was exposed to both wind and lightning, so the gods must be propitiated. For Wotan there was a small evergreen tree and for Thor there was a bunch of flowers. If the favor of the god had been invoked while the house was still incomplete, the ceremony must be finished the day the house was done by the burning of the little tree or the withered flowers. Then a bunch of grain was tied to the gable to feed the white horse of the death god, so that he would hasten on his journey without stopping at that particular house.—St. Louis Globe-Democrat.

# WHAT IS BACK OF THE BILLS?

**Motorists Aroused by Pending Legislation---Officials Oppose Turning Over Highways to Counties.**

Albany, N. Y.—The 1916 session of the legislature already has under consideration bills having for their principle object important changes in the automobile law. There are also bills affecting thed isposition of funds collected as automobile taxes and at least one extremely important, and objectionable, act to reorganize the State Highway Department.

Melvin T. Bender, General Counsel of the New York State Automobile Association, has prepared an elaborative memorandum on these bills. Among the most important are:

Senator Cristman's bill which provides for registration of motorcycles with a $2.50 annual fee. No person under 16 years of age to aperate a machine, and cycles must have number plates.

Assemblyman Adler's bill repeals section of present statute which provides that auto moneys from all sources should go to maintain State highways. This is objected to by motorists because they want to be sure that special taxes, which they alone be devooted to repairing thed amage which they are said to cause. They pay these taxes cheerfully now and maintain that this and other moneys which should be secured from commercial and industrial users of the highways, ought to be assured to the highway maintenance fund, without question.

**An Iniquitous Act**

Senator Argetsinger's bill to reorganize the highway department is revolutionary. Mr. Bender says it should be entitled, "An act to ruin the highways of the State in the shortest possible time." He calls upon automobilists to write promptly to their representatives in the Senate and Assembly theirp rotest against this destructive legislation. Agetsinger's bill would do away with State maintenance and turn the repair of roads over to the counties.

Care of the roads was left to local authorities from 1898, when State aid was first given in road construction, until 1907 and in most counties the improved roads went to pieces resulting in a loss of millions of dollars. State wide improved roads can only be properly maintained through centralized management by men skilled in road construction and maintenance. No one would think of suggesting the maintenance of the Barge Canal by the counties through which it passes."

Commissioner of Highways, Edwin Duffey, states that the Argetsinger bill is "vicious and destructive:" that if it became law it would be "disastrous in its effect."

Former Commissioner of Highways, John N. Carlisle, is emphatic in his condemnation of this measure. "To abolish division engineers and substitute for them deputy commissioners, who were not reduired to be engineers and who would be in the exempt class, would be a serious blow to the civil service system of the State Highway Department, which in the last few years has been in large measure liberated from political control and the Department would again be devastated by partican politics." The feature of maintenance by counties cannot be defended on any ground.

**Bad in Principle**

Former Deputy Commissioner of Highways, George A. Bicker, C. E., says, "the Argetsinger bill which contemplates turning over the maintenance of all improved roads, now over 6000 miles, to teh county superintendents of each of the 57 counties outside of greater New York, is absolutely wrong inp rinciple.

The entire State system has been built on the theory of through roads across the State. Great pains have been taken to connect the highways in the various counties so that they will constitute through routes. When these routes are completed, tourists would notk now when they crossed county lines, if the roads were maintained by a competent central authority.

In the Argetsinger bill, "57 varieties" of county superintendents would exercise their own ideas as to methods and time of repairing the roads in their counties without reference to what is being done in adjoining county. Such a system could not be other than unsatisfactory."

It is plain that this bill will not result in economy. It is unbelievable that 57 different sets of officials can buy materials and perform work at as low prices as one central office could do. The bill is reactionary, unscientific and unnecessary, since the department of highways asn ow organized, when properly manned andd irected, can do the work better and cheaper than by such division of authority as is proposed.

# THIS IS A BUSINESS-BUILDING SALE

It means that you'll get so much value here that you'll come back to us again and again; it's an honest, helpful sale—the only kind that can be held by a store that puts your interests first.

## YOU GET HART SCHAFFNER & MARX CLOTHES AT LESS THAN REGULAR PRICES

# VICTOR FIVE PLAY TONIGHT

Wallace, center of the High school quintet, may not appear in the game tonight, at the City Hall, against the Victor five, owing to illness. Don O'Brien may take his place.

The quintet which was used in the last game—Reynolds and Martin, forwards, O'Brien, center, and Johnson and Frawley guards may start in the game against the Victors.

That the local five may have to battle every minute is quite evident. The visitors will bring along Mars and Poucher, who are conceded to be the two best basketball players in Oswego. Both men have been members of the professional quintet which represented Oswego. Their knowledge of the game should prove a stumbling block for the less experienced school boys.

In case there is difficulty in stopping the starch city boys, Coach Merrill may give certain second string men a chance to show their ability. Kraus and Calkins, two members of the 1915 football team, in the praetice session Wednesday night showed up to excellent advantage and outplayed some of the first string men.

A dance, inh onor of the visitors, will follow the game. The dancing will be in the Library basement.

**BOWLING MATCH DID NOT TAKE PLACE**

The bowing match which was to have taken place ta the Onyx alleys last night between a picked team from this city and the All-Oneida cuintet did not materialize, the Oneida bowlers being unable to come here. During the past week, a city bowling league was organized in Oneida and matches were scheduled for Wednesday and Thursday nights, preventing the bowlers from coming to this city. An effort will be made to have the team come here next week.

Manager Powell of the Onyx alleys is negotiating with Oswego bowlers for a series of matches to be bowled at frequent intervals in each city.

**H. PUTNAM ALLEN MADE HOSPITAL MANAGER**

Information comes from Albany of the appointment of Mr. H. Putnam Allen of this city as manager of the St. Lawrence hospital. Governor Whitman made then omination which will be undoubtedly confirmed by the Senate.

Mr. Allen has served heretofore as a manager of the hospital. The previous incumbent was Fred M. Riley of Oswego, whose term expired some time ago. Mr. Riley was named to serve the unexpired term of the late S. M. Coon of Oswego.

Mr. Allen's many friends are glad of the honor conferred upon him, which comes as a partial reward only for the work he has done in years gone by for the public good.

Leave orders for Miss Crysler's Baking with Mrs. J. K. Steele. Phone 378. adv

**PARISIAN PRIMA DONNA HEARD BY LOCAL FOLK**

Extremely fortunate were the persons invited to partake of a feast of music at the Onondaga, Syracuse, last night, when a noted aPrisian singer, the prima donna of the Metropolitan Opera company, accompanied by a no less celebrated violinist, presented a "tone test" of the Edison Diamondn Disc.

The event, given under the auspices of a Syracuse agency, for the Disc machine comprised vocal and instrumental music of the highest order, played and sung so that the instruments could record and then reproduce it. In this way the audience of about 800 persons were enabled to test the accuracy of the Diamond Disc. Special invitations were issued, Mr. and Mrs. W. C. Morgan, of this city, being the only recipients of the cards. It is needless to add the invitations were accepted and that they attended the musical.

# WAR PREVENTED SINGER'S PLANS

**Talented Coloratura Soprano Might Still Be Singing in Dessau, But for Compulsory Return Home.**

The brief announcement made during the present week of the appearance here, February 29, of Miss Julia Allen, prima donna soprano, under the auspices of the Schumann Club, and for the benefit of the Women's Auxiliary of the Lee Memorial Hospital, is arousing a lot of interest among the musical folk of this and surrounding communities.

Indeed, it is believed to judge by the way the advance sale of tickets has started that the capacity of the library auditorium may be severely taxed when Miss Allen comes to town.

The Evening Times is in possession of a number of extremely flattering press notices concerning Miss Allen, one of which, from the Musical Courier, is reproduced in part as follows:

"Apparently there have been very few idle moments in the career of Julia Allen since she made her debut in Italy. After a most successful first appearance, this gifted coloratura soprano sang for three months in Nice after which she went to Holland, where she was engaged to sing a month of concerts.

Upon her return to the United States, Miss Allen was engaged as the soloist with the Victor Herbert Orchestra, which was then giving concerts at the Hippodrome, New York. She was also heard in many concerts throughout the country until autumn, when she returned to Holland for another seven months' engagement. At the end of this engagement she sang at concerts in Paris and London, and the following spring she returned to her native county. While in the United States, she was heard by the manager of the Metropolitan, who engaged her as soprano of the concert party, which accompanied Caruso on this tour including eight of the leading cities of the United States.

A six months' tour with an Italian Opera company the following autumn next claimed her undivided attention. After this tour, which covered every section of the United States, Miss Allen fulfilled concert engagements with many of the important musical clubs, including the Rubinstein Club of Washington, and an appearance at a concert with the Pittsburgh Symphony Orchestra under Emil Paur. These engagementsw ere the result of her successful singing while on tour with the Italian Opera company.

Feeling that her repertorie needed careful study, she next went to Florence, Italy, where she spent several months of repertorie study with Vincenzo Lombardi, after which she sang severala engagements in Italy. Her next climb on the ladder of progress was the acquiring of German. She accordingly went to Berlin, where she studied various Mozart operas as well as some of those already in her repertorie in German.

In the summer of 1914 Miss Allen sang so successfully for the manager of the Hof Opera of Dessau, that she was engaged as first coloratura soprano of that company. Then came the war, putting an abrupt end to her European plans. Last September she returned to America, and during the winter just past has fulfilled various concert engagements in the middle and western part of New York State.

### WHEN WOMEN SAW WOOD THEIR TROUBLES BEGIN

It is conceded by nearly everybody that women have a right to "saw wood" and drive nails, but it is not obligatory that they should continue to "saw" if by chance blow they strike a finger while wielding a hammer in a nail driving contest. Yet a doubt exists in the minds of some people about the legality of the opinion and the doubt may be removed, but only after the women of State Street church have indulged in the event of next Monday evening. Upon that evening the Epworth League will hold a "measure social" in the church parlors. Different contests have been arranged for the event, the chief ones to be the wood-sawing and nail-driving matches. Women only will be permitted to participate in these events, but them en are going to be recognized a little bit, as it is planned to try them at trimming women's hats and at sewing buttons upon men's clothing.

In addition to the fun that should ments, there will be given a fine musical program—vocal and instrumental ,and then a liberal snack of refreshments. The fun bag opens at 8 o'clock.

### MUSICAL TREAT TO BE GIVEN HERE

A rare musical treat under the auspices of the Brotherhood of the State Street M. E. church will be given Wednesday evening, February 16, in the auditorium of the church.

The program arranged is as follows

March, Orchestra; Overture, The Bridal Rose; Cello Solo, L. A. Richardson; Orchestra, Reverie, Shadow Time; Banjo Solo, Mr. Fred Smith; Orchestra, Garland of Old Fashioned Roses, Violin Trio, Mrs. L. R. [illegible], Mrs. Robert Ottman, Miss Edith Parnes; Orchestra, Chin Chin; Harp Solo, Miss Olga [illegible]; Orchestra, The Prince of Pilsen; Vocal solo, Miss Ruth Allen with violin obligato and orchestra, The Red Mill; Organ Selection, Mrs. H. S. Matott; Violin duet, Mrs. L. [illegible] Owens, Mrs Robert Ottman; vocal solo, Miss Francis Wells; Orchestra, Anvil Chorus; Overture, Light Calvary.

### BANQUET PI ANNED BY K. OF C. ON FEB. 22

An elaborate banquet, the plans for which will be completed on Monday next, will be held by the Knights of Columbus in their rooms on the night of February 22, Washington's birthday.

D. M. Sullivan is chairman of the committee which has the affair in charge and he will be assisted by Joseph H. Connors, George Moore and W. E. McCormick. Invitations will be sent to friends of the members.

### DAUGHTERS OF LIBERTY TO HOLD BENEFIT

At a meeting of the Daughters of Liberty held last night, announcement was made that a benefit performance would be given under the auspices of the order at the Happy Hour theatre on February 24th, on which day "The Five Faults of Flo," a new release will eb shown. A popular young Oswego girl who has recently made her debut in the motoin picture field takes a prominent part in the play.

### LOUISA A. ANDREWS

Mrs. Louisa A. Andrews died last night at the home of her son, George Andrews, near Volney Center, aged 89 years. Mr. Andrews is the only survivor.

The funeral arrangements have not been made. The body will be sent by Undertaker Cole of this city to Mannsville, Jefferson county, for burial.

### SESSION OF SUNDAY SCHOOL UNION WEDNFSDAY EVENING

A meeting of the Seventh District of the Oswego County Sunday school Union was held at the State St. M. E. church on Wednesday evening, February 9th. Plans for work in our city were discussed and the following officers elected:

District Superintendent, Wm. H. Klein; District treausrer, Norman J. Holley; District secretary, Fred E. Chubb; superintendent of community, Betterment, Prof. L. D. Wilcox; elementary superintendent, Miss Bertha Palmer; secondary supt., James Robinson; adult supt., Mrs. O. S. Bogradus; home dept. supt., Mrs. Bert Jones; teachers' training supt., Rev. Charles Olmstead; missionary supt., Rev. J. W. Barrett; temperance supt., Rev. C. A. Balch; evangelistic supt., Rev. H. D. Holmes.

**BUSINESS—Particularly the most desirable business—is very much like the sport of fishing. You can catch it if you use good bait. The Evening Times offers you the correct bait.**

### MISS DE VON DISPENSES WITH CORSETS ENTIRELY

We who admire the exquisitely moulded figure of Miss Marguerite De Von, to be seen in the part of Lola, the artist's model in "The Red Rose" at the Quirk tonight, would believe it is uncorseted. Miss De Von owes the firmness of her cantour to underwear specially woven for her. The Islands of Ponon import large quantities of flax which is stripped to its finest fibres and woven under water by natives, the water enlarging the fibre and making it easy to handle. The weave is octagonal like the comb of a bee or the weave of the Panama hat ,this preventing its stretching in incorrect shapes when placed in any mould. When the flax is woven into underwear it resembles silk suits, but when put on the body it dispels the thought of extra avoirdupois. The trigon weave, as this material is called, is expensive, one suit costing from $100 to $125.

Miss DeVon discovered the new material while traveling and was so impresse dwith its adaptability to every day wear that she at once ordered several suits madef or her own use. She says that the new woven stuff is cool in summer and warm in winter and there is no sense of being laced in or bound up with whalebone stays.

### DRIVING AUTO FROM SYRACUSE DIDN'T WORK

Norman Bidwell, employed at the Van Wagenen garage ,in endeavoring to drive an automobile in a snow drift from Syracuse to this city became stalled in a snow drift a few miles from Liverpool, where he spent the entire afternoon.

Towards evening he was able to extricate the auto from the snowbanks with the assistance of a team of horses loaned by a farmer who was passing. Mr. Bidwell did not attempt to make any further progress towards this city, but ,drove the car back to Syracuse instead.

### POOL MATCH WON BY OSWEGO ARTISTS

The 1,000 point pool match, in which teams from Oswego and Fulton have contested in a series of games during the past month, was won by the Oswegonians last night when they administered a decisive beating to the local pair, Westover and Walsh. Shirtz and Morris were the Oswego cue artists in the last game.

A large purse goes to the winner. The local team is arranging for another series.

## Community Notes

Mr. F. W. Lasher is ill at the local hospital.

* * *

A few Fultonians journeyed to Oswego last night to witness the "Pygmalion" performance at the Richardson, with Mrs. Pat Campbell in the leading role. Among those who attended were Dr. Doane and the Misses Dickerman, Helen Ottman, Grace Nealis and Mayme Nealis.

* * *

Canton, No. 120, I. O. O. F., entertained last night by giving a luncheon and smoker following the business session.

### GERMANY WARNS ALL NEUTRAL COUNTRIES

Berlin, via Amsterdam.—Germany has determined to stop the destruction of its submarines by hostile merchant ships equipped with guns and in reality serving as auxiliary cruisers. With this purpose it will, after March 1st, claim the right to torpedo without notice al larmed merchant vessels. The ships armed "for defense only" will be regarded as warships and neutral citizens taking passage on such vessels will do so at their own peril.

# WASHINGTON HAS PUZZLE IN WOMEN

## Officials' Wives Stand Reception Strain Better Than Men.

## MRS. WILSON NEVER EXCITED

**After Shaking Hands With 4,226 Persons She Appears as Fresh When Her Duties Are Completed as at Start. Mrs. Lansing Only One to Leave Line Early Because of Painful Shoulder.**

Washington.—"How can the women stand it?"

This was the question asked hundreds of times by the guests at the first really truly White House reception that has been given by the present administration, which recently took place.

How they did no one knows, but they did, and the new mistress of the White House, after shaking hands with 4,226 persons, appeared just as fresh and happy when her duties were completed as she had at the start. It was not a question of being buoyed up by the excitement of the occasion either, for the next morning Mrs. Wood-

© 1915 by Genthe.

MRS. WOODROW WILSON.

row Wilson was up bright and early and at 10 o'clock was paying a friendly visit to one of her older, but close personal friends in this city.

When it came to the men the matter was different. It is safe to say that the strain of the reception was harder on the president than days of the utmost worry over the various international questions that would cause the ordinary man to come close to the breaking point of nervous energy. The members of the cabinet, though not compelled to go through the handshaking which was inflicted on the chief executive, also showed the strain, and when the end of the long line was reached were each and all ready to take a long rest.

Only one of the ladies of the cabinet showed any effects from her exertions. Mrs. Lansing left the line early in the evening as the result of a shoulder which she recently strained while playing golf. This brought Mrs. McAdoo to the position of second in the reception line, and she showed herself to be completely at home in the gracious manner in which she greeted her father's guests. The petite Mrs. Burleson was one of the most attractive of the women who received. Sparkling and vivacious, she appeared at the end of the evening as though ready to go through a similar experience at a moment's notice.

There was just one disappointing feature—at least to some of the guests. They did not get anything to eat. A simple supper had been prepared, but when it came to midnight none remained. The waiters had done their best, but the appetites of those in the first ranks of the crowded rooms had been too hearty, and even the attempt to divide sandwiches in halves failed to bring the needed relief.

Washington society, however, was happy again. It was the first of the old time White House functions held for years. It will be by no means the last and will be followed by a revival of dinners, receptions and other entertainments which promise great joy to many, especially to the caterers and florists, who see a return of good times after a long term of lean months in their lines of business.

## SAW AND CHOP FOR CHURCH.

**Wood Enough to Heat the Place For the Winter In One Day.**

Columbus, Ind.—How to get wood to last the Garden City Christian church through the winter bothered some of the members of the church, which is situated two miles southwest of this city.

Then somebody suggested a "wood chopping and sawing." The members of the church turned out, cut down trees, sawed the logs into the proper lengths and then split the blocks into stove wood. Mrs. Mack Neptune, one of the members of the church, served dinner at noon. The Rev. W. H. Book, pastor of the Tabernacle Christian church of this city, used a crosscut saw a part of the day.

# The Power of Song

By F. A. MITCHEL

There was a girl of one of those states which now compose the Balkans whose ambition was to emulate men in athletics. Expert in throwing the discus, she won contests against those who were champions in this game. She was the best chariot driver in the kingdom and had won many races. But her most remarkable feats were in running. In this no one was found to beat her.

So proud was she of her swiftness on her legs that she made a vow she would marry no man who could not beat her on the cinder path. Having many suitors, this only added to the rivalry among them. But since an ability to run fast does not argue that a man is otherwise attractive, those whose muscular development warranted their entering the list were not likely to win the girl even if they won the race. Several fleet runners came so near beating her that if she had chosen she might have thrown the race without appearing to do so.

One day a young man came to the village where this girl, Eudoxia, lived and announced that he would enter the list against her, only he made the provision that should he win the race she must marry him. He sent a challenge, and Eudoxia dispatched her brother to look the man over and report to her whether he would likely outrun her. The brother returned and reported that, while the challenger was shapely, he was not muscular, and his physique did not warrant the inference that he could beat an ordinary runner.

The slight risk of being beaten by one whom she would be pledged to marry and yet might dislike tempted Eudoxia to consent to the terms. So an agreement was drawn up between her and the stranger, who called himself Boris, to race, and if he beat her she was to marry him. This agreement was signed by Eudoxia without having seen her suitor.

The race was to take place on a track in the form of an ellipse, the length being half a mile and there being seven laps. A large concourse of people were gathered to see the race. The stranger stepped forth in a pair of short running pants such as are worn at the present day. One thing about him was noticeable—his manly beauty. It was evident that he was not built for fleetness. But what astonished every one was that he held in his hand a harp. Eudoxia was attired in the same fashion, with the addition of a shift falling only to the thighs.

When the two confronted each other it was noticed that the stranger's manly beauty, which all agreed rivaled the statues of Apollo, made a marked impression on Eudoxia. When she saw the harp in his hand she was surprised, and when he did not lay it aside before taking his position for the race she wondered.

The signal was given. Eudoxia started off so fast that she did not know that Boris was walking slowly. She heard behind her sounds from the strings of the harp, soothing rather than inspiring. When she had made three-quarters of the first lap there, directly opposite her at the other end of the minor axis of the elliptic course, was Boris, walking and striking his harp. Then he began to sing.

Eudoxia, who had nothing to fear from such a tortoise, stopped to listen. Boris was singing her praises, the love he felt for her, pleading that she would not turn a deaf ear to him. She listened till he had gone out of hearing, and then she proceeded to the other end of the minor axis and waited till he had come around to the point where she had been listening to his song.

It seemed that in the meanwhile it had grown sweeter. He was walking very slowly, putting all his feeling into it. Again Eudoxia went on till she reached the point at which he had been singing, while he proceeded till he took her place. Here both stood still, the man singing of the beauty and the virtues of the peerless Eudoxia, she seeming to be spellbound. Then he went on singing, "Wait for me, fair one," repeating the words again and again till he came around to where she stood, and the two walked side by side.

In this way they proceeded, the girl rapt in the song, till they came within a few yards of the goal, when Boris, still singing, turned and walked backward, keeping his eyes fixed on Eudoxia, till he passed over the goal.

Then the spectators, who had appeared to be enthralled as well as the girl, drew a long breath and burst into a cheer.

And so Eudoxia was won, not by fleetness, but by the power of song. As soon as he had won the race Boris announced himself to be the son of a powerful noble of what is now Montenegro, and, without holding Eudoxia to her contract, appeared himself as a suitor for her hand, which, after a period of maidenly reserve, she gave him.

Many of the people who were not cognizant of what passed after the winning of the race believed that the stranger was Apollo, who had come down from heaven to win an earthly bride.

After the wedding Boris and his wife disappeared and when they reached his home were received with as much interest as had attended the race. For Boris had been in Greece and, hearing of the girl who must be won in a foot race, had stopped on his way back to see her. He resolved to win her by making love to her in song.

# FROM SOUTHERN FIES TO PATHE PICTURES

**ARNOLD DALY DISCOVERS ENTRANCING FACE FOR FILMS BEHIND LUNCH COUNTER.**

## NORA MOORE A LUCKY "FIND"

**Ability and Beauty So Extraordinary That She Starts at the Top as "Lady Dardinilis" in "The King's Game."**

Arnold Daly, whose fame is about equally divided between Broadway "legitimate" productions and Pathe motion pictures, was traveling through the south not long ago, and in a certain town of South Carol'na stopped off between trains to get a hasty lunch in a railroad restaurant. His eye wandered from pile to pile of crullers, cakes and pies as he tried to make up his mind on which particular dainty he should take a chance. Thus engaged in this engrossing hunt for edibles he failed to notice at first the girl who with hands folded upon snow white apron waited patiently for his order. His decision made, he turned to her and then at once forgot what he had taken so long to decide upon. The girl before him was surely a waitress extraordinary. Oval face delicately tinted with old ivory and the flush of youth and health; brown hair combed with Quaker like simplicity, yet somehow looking better than if it had been worked over by a fashionable hairdresser; blue eyes that looked at him modestly and yet unafraid.

While Mr. Daly punished his stomach with the usual small town railroad station lunch counter delicacies, he questioned the lady of the apron. He asked her if she would like to work in pictures and told her if she would, he would give her a chance. The girl refused to commit herself. "You'll have to ask my mother, suh," was her reply.

Mr. Daly decided to miss his train and see her mother. He did. He called at the address given him by the girl and talked things over with the kindly old lady living in the weather-beaten house not far away. He found that like so many southern families the two had seen better days. The father, once a leading lawyer of a neighboring town, had died poor. The grandfather was an officer in the Confederate army, and was killed in the Wilderness. The one-time large estates had vanished, and now the girl was supporting her mother by working in a railroad restaurant.

Mr. Daly made an offer that caused the old lady to gasp with surprise. When the girl returned from work that evening it was talked over and decided that such a golden opportunity could not be neglected. So two days later Nora Moore and her mother took their soft southern accent and a few belongings to New York.

That was two months ago. Now Mr. Daly wagers his judgment as a producing manager that he has made a "find." "That girl is going to be great," he says. "I tried her out with a big part the very first thing—that of 'Lady Dardinilis,' in Seitz's play, 'The King's Game,' which I'm putting on for Pathe, and she has more than made good. I'm going to use her right along. She'll make a name for herself one of these days!"

## RUTH ROLAND

Ruth Roland, the well-known photoplay star, won the hearts of almost countless screen enthusiasts by her consistent playing in the now famous "Who Pays?" series of stories. She bids fair to extend the conquest through "The Red Circle," the gripping romantic serial which Balboa has filmed for Pathe.

# Woman's World

**An American Novelist Founds a Paying Workroom In Paris.**

EDITH WHARTON.

Mrs. Wharton, author of "The House of Mirth," tells how a paying workroom for war sufferers is founded:

When the war broke out an immense number of benevolent and unoccupied women in Paris felt a violent but vague impulse to "help." This impulse found its chief expression in the traditional pursuits of making lint, hemming towels and crocheting baby jackets. Such activities are harmless in days of peace, but in wartime any unpaid industry encroaches on the rights of the unemployed, and this fact was so promptly understood in France that I can claim only by a few weeks' priority the honor of having founded the first paying workroom in Paris.

My ouvroir, which started tentatively and on a small scale, was at first meant only to supply work for a few seamstresses of my own quarter, but with the temporary paralysis of trade such a wave of misery swept over Paris that the most prudently circumscribed charities had to enlarge their borders and take their chance of finding the means to exist. It was impossible to confine my aid to seamstresses when typists and accountants, nursery governesses and dramatic artists, cooks and concert singers were all pleading for help, but I kept and have continued to keep to one of my original rules—that no one I employed should be in receipt of what is called the "military allowance." All over Paris in these early days workrooms were being opened to help the wives and mothers of soldiers. Wives, widows and young girls without near relatives in the army were not unnaturally overlooked, and it was for their benefit that my workroom was started.

My first step was to appeal for help to my compatriots in Paris. I collected over $2,000 within a week or two, and with that sum the foundations of the work were laid. I bought a large supply of materials, made arrangements to have my women fed in a neighboring restaurant and put over my door the sign of the Red Cross, under whose auspices the work was begun. The women receive 20 cents a day and a good midday meal in return for six hours' work. On Thursdays they have a half holiday with full pay, but whenever there is a sudden call for hospital supplies or any urgent order they cheerfully give up their Thursday afternoon.

When a woman applies for work she shows her papers, gives references and is asked to prove that she is not receiving either the "military allowance" or what is called the "assistance to the unemployed." Her statements are verified by inquiries at her mairie, and if the report is favorable she is engaged for two months.

The two months over, she has to leave, but if she chooses we give her piecework at home for a month. At the end of the month, if there is a vacancy, she can return to the workroom for another two months, and so on. This system of rotation was established as soon as it became evident that the war was to last a long time, and the result has been satisfactory.

### So Transparent!

The transparent hat has been such a welcome comer that its popularity has extended for more than the usual one season run. This is also true of the transparent hem which has had such a vogue during the fall and winter, while the transparent frock that reveals the silken trousers beneath is a creation of this season. Transparent scarfs, too, of white or flesh colored tulle, so wrapped that they cover the chin, are also receiving a great deal of attention by this year's debutante. So it will be understood that the advent of a coat which reveals the frock beneath and such a coat trimmed with fur to add to the luxurious effect will not be such a startling idea as it sounds on first hearing.

### O'Brien Potatoes.

Boil potatoes with the skins on till tender, then cool and cut into dice. Make a white sauce according to usual manner and add to it a teaspoonful of onion juice and a large tablespoonful of chopped green pepper. Pour over the potatoes and simmer for five minutes.

## ART IN BOOKBINDING.

**How Miss Lahey Won Mercier, the Master, For Her Tutor.**

A woman who spent ten years and all the money she had in the world to become a skilled bookbinder is Marguerite Duprez Lahey. After studying with the most skilled tooler in Paris, says the American Magazine, Miss Lahey went to the world's greatest craftsman, M. Mercier.

M. Mercier was a man of large wealth and broad culture. He tooled for the love of it in his beautiful Paris home. His only pupil was his only son. No one in the Latin quarter had dared to penetrate M. Mercier's atelier. Undaunted, this American girl, armed with the "Life of Fragonard, by Pierre de Nolac," the toil of years and which had earned M. Domont's praise, went to M. Mercier's home.

The master was at his country seat. "Is this your work?" cried his son, when Miss Lahey had disclosed the volume. "Leave it with me. I will show it to father. It will please him to see such strong work."

"And now what do you want of me?" asked the master, when tremulously she called later for the book and Mercier had sent his praise.

"To work with you."

"Good! I take you!"

Three times a week for two summers she worked under Mercier's supervision, the master tactfully refusing the pupil's proffered money.

"Perfect!" he said, when she had finished Prosper Merimee's "Chronicle of Charles IX."

Before this triumph her gold tooling on a volume of Frederic Masson's "Napoleon and Women" procured for her the work of the late J. P. Morgan's library. This was in 1908—the turning point of her unique career. Hers is the distinction of having designed, tooled and bound the cover of Mr. Morgan's personal copy of the catalogue of his world famous Chinese porcelain collection.

## BREAK YOUR MATCH IN TWO.

**A Suggestion That Became a Rule In Forest Fire Prevention.**

One day late in June a man in a room on the seventh floor of an old fashioned brick building in Washington, holding a sheaf of telegrams in his left hand, was busy with his right taking red headed pins out of his mouth and sticking them into little irregular blocks of green ink scattered over a large white wall map of the United States.

"The big problem," he said, taking a fresh pin out of his mouth and turning sidewise to his assistant, "is to get at the fellow who knows what conservation is but forgets to apply it when he lights up a cigar in the woods."

The assistant sat at a flat topped oak desk in the middle of the room, struggling through a mass of reports from field men in the endeavor to find suggestions for a set of fire prevention "rules."

"Well, what do you think of this?" he said, holding up a report from the Pacific northwest: " 'Break your match in two before you throw it away.' "

The other man stuck the last red pin into the map, reached for his pipe and lighted it.

"Let's see," he said. He snapped the burning match in his fingers. As the pieces dropped to the floor he uttered a sharp exclamation and tenderly licked the index finger of his left hand.

The assistant laughed. "That's the idea!" he said. "You've got to blow it out before you break it or get burned."

So this suggestion became No. 1 of a set of ten rules which the forest service sent to 6,000 newspapers at the beginning of the summer's fire season in the national forests.—Outlook.

### Sandwich's Wonderful Drum.

The eccentric Lord Sandwich had, according to his biographer, a strange passion for the thunder of big drums, for the gratification of which passion he had caused the entire side of one large music room in his mansion at Hinchinbrook to be covered with parchment, so that when it was struck with a massive stick it gave out a roar sufficient to terrorize any sensitive soul. Many who heard this drum once struck positively declined ever to enter the apartment again lest they should be given a second performance.—St. Louis Republic.

### Our Biggest Industry.

Measured by the number of persons employed, what is the country's biggest manufacturing industry? Lumbering, with its 48,000 sawmills, its $1,000,000,000 investment in these plants and its employment of 605,000 men to operate them. This does not include, says the Nation's Business, the standing timber, which brings up the total investment to $2,500,000,000.—Wall Street Journal.

### Good Start.

"I'm going to start a comedy company on the road in a couple of weeks," said the theatrical manager.

"What play?" asked the critic.

"Oh, I haven't that written yet, but I heard a good joke today that we can use in it."—Exchange.

### Beat Him.

"My ancestors came over in the Mayflower," announced the man who prides himself on his blue blood.

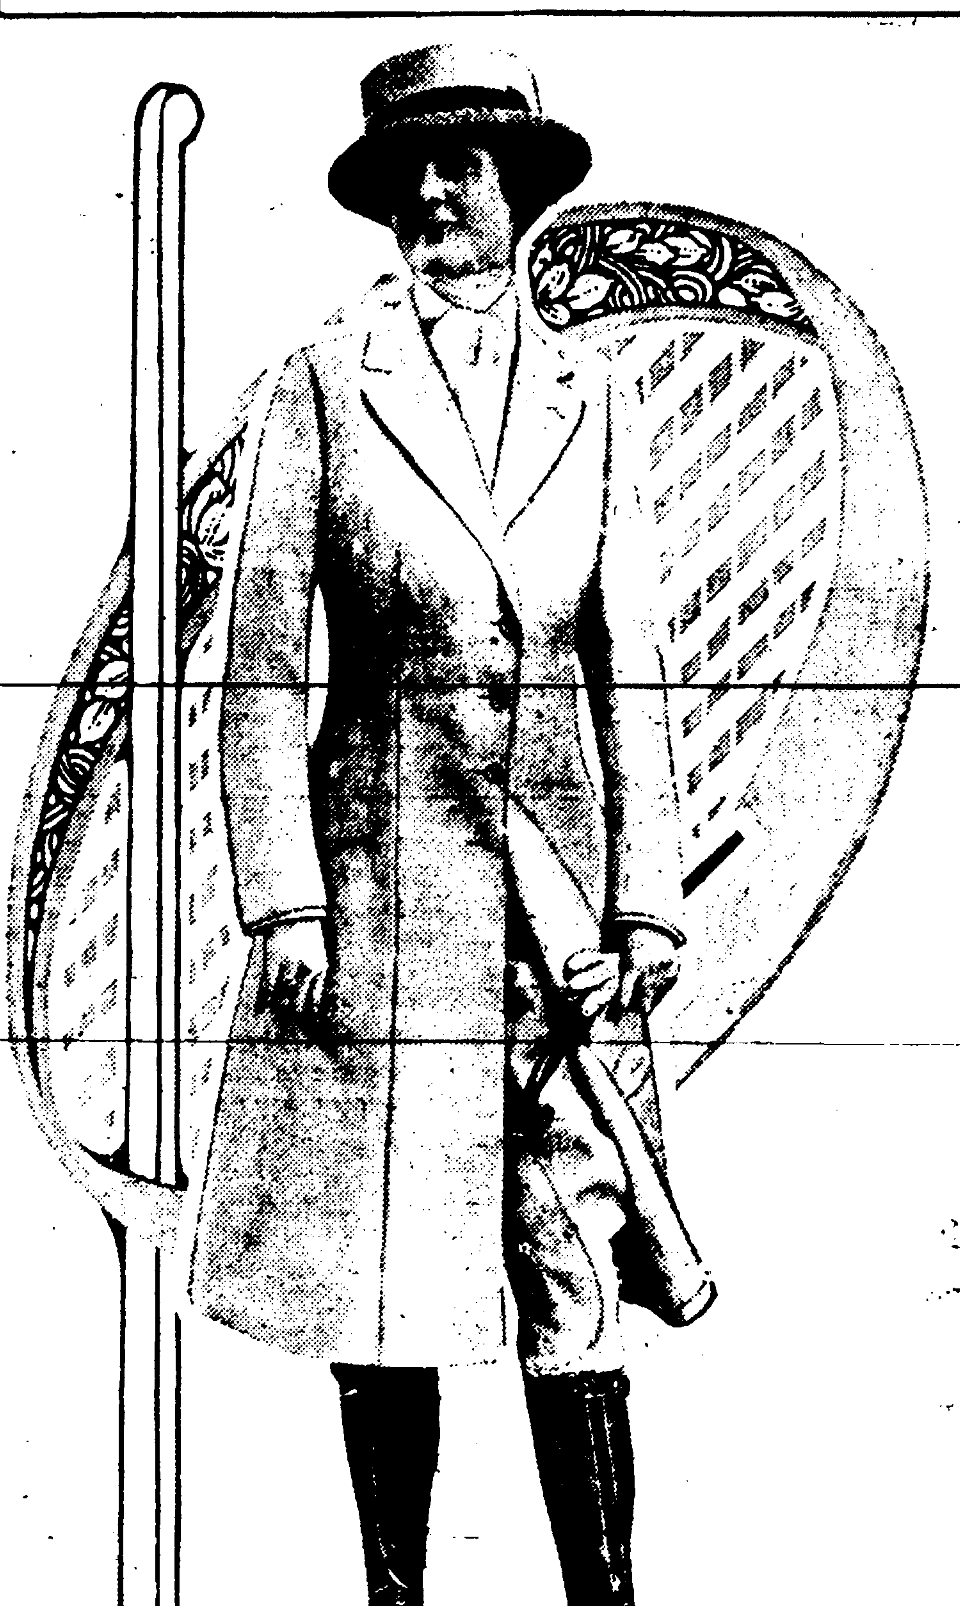
"Huh!" snorted the man of red corpuscles. "Mine sailed in the ark!"—Dallas News.

### Not Acquired.

N. Read—How you stutter! Did you ever go to a stammering school? J. Terry—N-n-no, sir. I d-d-do this n-nat-urally.—Brooklyn life.

To ease another's heartache is to forget one's own.—Abraham Lincoln.

# Off For a Morning Canter



Design by Franklin Simon & Co., New York.

THIS riding habit comes in English melton, black and white checked worsted, covert, khaki and linen crash. The cut is the thing. Beautiful lines, bone buttons and slit pockets are interesting details. The tan calf boots and straw sailor are as correct as springy. All lovers of outdoor sports will respond to this design.

• • •

An evening coat of nattier blue velvet and gold grosgrain silk has accents of black velvet ribbon.

ANNA MAY.

### Any New Methods?

"Ain't it strange th' way Jack beats his wife?" "I dunno. How does he do it?"—Cleveland Leader.

### What Started the Quarrel.

Young Wife (at home)—Hello, dearest! Young Husband (at the office)—Hello! Who is it?—Puck.

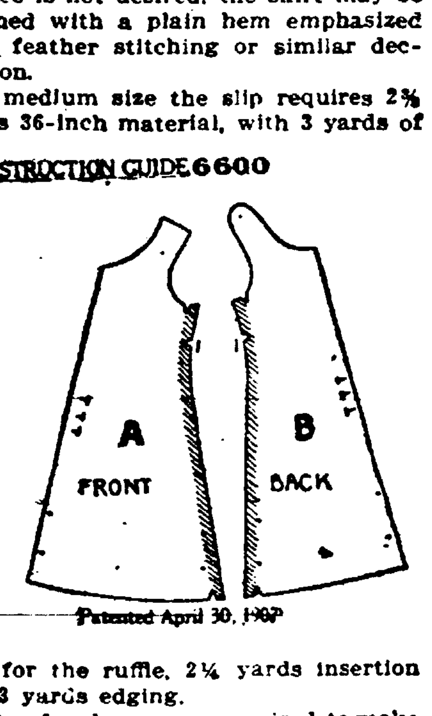
## Princess Slip For Juniors.

Princess slips for girls and juniors made of nainsook and trimmed with embroidery and lace. It is made to be slipped on over the head.

Just as emphasis is put upon proper lingerie for grownups, we find the new spring underwear for juniors punctuated here and there by novel designs. Charming to wear under sheer frocks is this princess slip of nainsook trimmed with embroidery and lace. It is to be slipped on over the head and closes at the shoulders. If the ruffle of lace is not desired, the skirt may be finished with a plain hem emphasized with feather stitching or similar decoration.

In medium size the slip requires 2⅜ yards 36-inch material, with 3 yards of

CONSTRUCTION GUIDE 6600



lace for the ruffle, 2¼ yards insertion and 3 yards edging.

But a few hours are required to make the slip. First, close under-arm seam as notched and turn under the lower edge of the skirt on lower line of small "o" perforations, should a hem be preferred to the lace ruffle. If the ruffle is to be used, then it will be necessary to cut off lower parts of front and back on upper crossline of small "o" perforations. Sew the straight gathered ruffle to lower edge.

Next, lap shoulder edge of back on front, matching small "o" perforations, and close with a button and buttonhole.

The embroidery design is exceedingly dainty and works up quickly.

Pictorial Review Princess Slip No. 6600. Sizes 10, 12, 14, 16 and 18 years. Price, 10 cents.

Embroidery design No. 11744. Transfer pattern, price 15 cents.

# The Children's Pleasure

How to amuse children is one of the problems which every mother must face. The little ones often become restless and want new amusement.

A delightful pastime is played with a small feather. The children are grouped together, and a mass of fluff is thrown into the air. It is the business of every player to blow the feather toward his or her neighbor, for if the mass of fluff should fall on or near an individual that person loses the game.

The children are not allowed to run away from the feather outside a definite line, which may be marked with chalk. Any one who is responsible for sending the fluffy stuff outside of bounds also goes out of the game.

An old fashioned game, which is none the less absorbing, is known as "rural spillikens." A number of straws or little straight sticks are gathered together, and these are stood up so that they all meet at the top and spread out like a tent at the bottom.

Two or three additional sticks are obtained, and on the end of these are placed crooked pins.

Each player takes a crook in turn and endeavors to remove a straw or stick without shaking or throwing down the others. Any culprit goes out of the game, and the winner is the child who has obtained the greatest number of sticks.

Another simple game which can be arranged anywhere is called "take care," played out of doors.

On a flat piece of ground a little pile of dry earth or sand or snow is made. Take a small stick and in a cleft at the top fit a square of white paper to represent a flag. Finally push the stick down the center of the mound.

Each player is given a stick, and the object of the game is to remove a little of the snow from the mound without upsetting the flag. The last stages of the game are exciting, seeing that a trifle will often upset the flag.

The player who is responsible for the failure goes out of the game, and the flag is set up once more. The player who holds out to the end is the winner.

Another delightful pastime for stormy days is Japanese water flowers, which may be bought for 5 cents a box at any oriental bazaar. Give the children a bowl of tepid water and let them drop the charming wads in. A flower blooms instantaneously. Convalescent children, who must be kept quiet and happy, adore these flowers.

### What Held Her.

Dinah Snow was a colored cook in the home of Smith. One morning on going to the kitchen Mrs. Smith noticed that Dinah looked as if she had been tangled up with a road roller.

"Why, Dinah," exclaimed she, "what in the world has happened to you?"

"Was me husban'," explained Dinah. "He done went an' beat me ag'in, an' jes' fo' nothin' too."

"Again!" cried Mrs. Smith, with increasing wonder. "Is he in the habit of beating you? Why don't you have him arrested?"

"Been thinkin' of it seberal times, missy," was the startling rejoinder of Dinah, "but I hain't nebah had no money to pay his fine."—Exchange.

### Effects of Frost.

An egg expands when it is frozen and breaks its shell. Apples contract so much that a full barrel will shrink until the top layer is a foot below the chine. When the frost is drawn out the apples assume their normal size and fill up the barrel again. Some varieties are not appreciably injured by being frozen if the frost is drawn out gradually. Apples will carry safely in a refrigerator car while the mercury is registering fully 20 degrees below zero. Potatoes, being so largely composed of water, are easily frozen. Once touched by frost they are ruined.—Northwest Trade.

### Devilfish.

In Japan devilfish weighing 200 pounds are sometimes caught. These fish are amphibious; they are often seen wabbling on their tentacles like giant spiders in search of patches of sweet potatoes. The natives kill them with clubs. In the water they are caught in jars lowered to the bottom, which the octopus enters, thinking them a good retreat from which to catch his food.

### Discouraging.

After a mother has taught her son not to keep his hands in his pockets, to turn his toes out and not to sniff his nose or smack his lips when he eats, it must be discouraging to hear people remark a month after his marriage that his wife made him.—Wichita Eagle.

### Sand In Holland.

In Holland sand is plentiful and inexpensive and is used instead of hay and straw as beds for cows. It keeps the animals perfectly clean, requiring only a slight raking in the morning to soften and freshen it.—London Telegraph.

### Perfectly Tame.

To say of a man that he will make a good husband is much the same sort of compliment as to say of a horse that he is perfectly safe for a woman to drive.—Puck.

# TODAY'S FASHION NOTE

Youthful, original and dainty is this costume of figured cotton crepe, with vest of plain silk and sleeves punctuated with narrow bandso f ribbon velvet. The girdle corresponds in color with the designs of the crepe, 5 yards of material being required for the dress.

Pictorial Review Costume No. 6250. Sizes, 16 to 20 years. Price 15c.

Pictorial Review Patterns may be procured at the J. R. Sullivan and M. Katz & Co. Department store, Fulton.

## SET UP FOR WINTER.

**A Bit Dressier Than Her School Coat Is This One.**

At this difficult age a girl needs a serviceable coat, even for best. This one is not too dressy for harum scarum comfort and yet presents vel-

vet in the modish stripe of navy blue and gray. Plain blue velvet is used for the collar, cuffs and belt, which fastens with two novelty buttons while the blue velvet hat to match has a tiny ostrich tip above a ribbon rosette as appropriate trimming.

### Baked Crab With Cheese.

Remove the meat from one or two crabs, crack the claws and take out the meat also. Flake the crab meat. Butter a baking dish and spread the bottom with a layer of white sauce, then put in a layer of crab meat and season with salt and pepper. Next sprinkle over with fresh breadcrumbs, grated cheese and more sauce. Continue this until the crab meat is used up. Cover the surface with white sauce, then sprinkle over with breadcrumbs and grated cheese. Put here and there a few tiny bits of butter and bake in a fairly hot oven for about twenty minutes.

# STOCK SELLER ON FRENCH LEAVE

New York.—The United States Post Office Department is desirous of knowing the whereabouts of John H. Putnam. He is a member of the brokerage firm bearing his name which was entered yesterday by Post Office Inspectors. The firm is understood to have received in the last two months between $300,000 and $400,000 from its customers who were induced to buy stocks on the installment plan.

For the last two months the firm has been flooding the country with circulars offering to purchase stocks for investors on the instalment plan.

The Post Office Department has been investigating the concern and Post Office Inspectors McQuillan and Mayhew yesterday entered the firm's offices at No. 68 Broad street. Manager Louis Thonet was escorted to the Federal Building.

Under examination Mr. Thonet said that he found a note yesterday morning from Mr. Putnam bidding him good bye.

Thonet said when he reached the office in the morning he found a note from Putnam telling him to pay off the clerks and stenographers and shut up shop.

As to Charles S. Harkness, the other supposed member of the concern, Manager Thonet said he knew nothing because he was supposed to California.

The belief is that Putnam is now abroad the Baltic on his way to England. He is described as being forty-three years old, six feet three inches tall, weighing 280 pounds and having a drooping moustache.

### Apples and Morality.

Coleridge would have been in sympathy with the prison governor who regarded a liking for apples as indicative of moral soundness. "No man can have a pure mind who refuses apple dumplings," he said, and Coleridge's friend, Charles Lamb, who reports this saying, adds: "I am not certain but he is right. With the decay of my first innocence, I confess a less and less relish daily for those innocuous cates. There is a physiognomical character in the tastes for food. The whole vegetable tribe has lost its bust with me. Only I still stick to asparagus, which still seems to inspire gentle thoughts."—London Mail.

### According to Signs.

"Little Johnnie is rather cross this morning," said the doctor, "but then that is a good sign. It shows that he is convalescing."

"According to that," said Johnnie's mother, "my husband must be recovering from a severe illness. There's just no living with that man."—Exchange.

### How They Do It.

In a hotel in a certain city is the following notice:

"Boarders are taken by the day, week or month. Those who do not pay promptly are taken by the neck."—Exchange.

# GARRISON LEAVES WILSON CABINET

Washington, D. C.—Secretary Garrison resigned yesterday because President Wilson would not "irrevocably" support the continental army plan and because he opposes the administration's program of setting a definite time for Philippine independence.

President Wilson accepted the resignation and has not selected a successor. The President himself probably will take personal charge of the administration's national defense plans in Congress.

Assistant Secretary Breckinridge also resigned as am ark of loyalty to his chief, whose views he shared. The President accepted his resignation. Both take effect immediately. Major-General Scott, chief of staff of the army, automatically becomes secretary of war ad interim.

Iti s known thatone of Secretary Garrison's principal reasons for his conviction that only a Federal continental army, instead of a reorganized national guard, could be them ain military dependence of then ation, was his belief thats ome day the United States may be called upon to defend the Monroe doctrine, and in that event he forsaw that the national guard might not be available for use outside the United States before a declaration of war.

Upon the contention, on the one hand, that the continental army or ultimately universal service, was the nation's only reliance, and the position on the other that no one plan could be enforced upon Congress, President Wilson and his secretary of war parted official company.

Mr. Garrison's resignation was a complete surprise to official Washington generally. He made no personal explanation. Several hours before the official announcement he had boarded a train with his wife for New York, and word had been passed at the department that he had gone for an indefinite stay.

The acute differences of opinion which led to the break began early in the year when opposition to the continental army plan began developing in Congress. There had been indefinite rumors of the possibility of the Secretary of War leaving the Cabinet, but they were never countenanced in official quarters. The secretary every where was regarded as one of the strong men of the administration upon whom the President leaned in the difficult situations, both domestic and international, which have marked his administration.

The circumstances which led up to ther esignation are detailed in the secretary's correspondence with the President which was made public today by the White House. The President, the letters disclose, believes that the training, organization and control of am ilitary reserve should be under immediate Federal direction but is not "irrevocably or dogmatically" committed to any one plan. He wrote Mr. Garrison that he could not force and specific plan on Congress and added:

"I must welcome a frank interchange of views and a patient and thorough comparison of all the methods proposed foor obtaining the objects we all have in view."

Mr.Ga rrison's contention that only the plans of the War Department could be considered seem to the President "wholly unjustifiable." Mr. Garrison considered "reliance upon the militia for national defense an unjustifiable imperiling of the nation's safety."

### The Important Thing.

They were speaking about looking on the practical side of things, and this incident was recalled:

One afternoon late in the fall Uncle Josh was driving slowly toward the town when an acquaintance excitedly rushed out to the road and hailed him.

"Say, Josh," he exclaimed in a palpitating voice, "have ye heard the news?"

"No; don't kalkerlate I have," responded Uncle Josh, sociably stopping his team. "What kind o' news is it?"

"Jim Smith committed suicide," answered the other. "Hung himself from a beam in the barn."

"Is that so?" thoughtfully rejoined Uncle Josh. "Wonder if he got all of his corn husked?"—Exchange.

### Confucius on Kingcraft.

"What is kingcraft?" demanded a disciple.

Confucius replied. "Food enough, troops enough and a trusting people."

"Were there no help for it which could be best spared of the three?"

"Troops," said the master.

"And were there no help for it which could be better spared of the other two?"

"Food," said the master. "From of old all men die, but without trust a people cannot stand."

### Dangerous.

"What makes Carol so disliked?"

"She got the most votes for being popular."—Chicago News.

## COURT TAKES RECESS UNTIL NEXT MONDAY

Justice DeAngelis adjourned the special term at noon yesterday, until next Tuesday morning at 9:30 o'clock after hearing the testimony in an action from this city involving questions of title to as mall parcel of land.

William J. Bradford wanted to build a garage on his lot in East Fifth street, Fulton, and found when he came to establish the lines that he did not own as much land as he thought, by 2.6 feet. He claims to have purchased the property from Herman W. Shipman, supposing that he had bought 49 feet of a parcel 99 feet front. It appears that Mr. Shipman sold 50 feet front to another purchaser and the supposed 49 feet remaining to Mr. Bradford. The measurement of the fifty feet was made by a tape measure and a line was established. It was agreed that Mr. Bradford should have the remainder. When he started the erection of the garage he found that the owner of the adjoining parcel claimed that he was encroaching on his land. A survey showed that Mr. Bradford's actual frontage was 46.4 feet. He started an action to reform the deed and made the First National Bank, this city, also a defendant.

Testimony was taken yesterday on both sides and at the close Justice DeAngelis said that if the parties could not come to a settlement briefs should be filed within ten days. It was agreed that the attorneys and parties interested meet tonight in this city and discuss terms of settlement. W. S. Hillick represented the plaintiff and R. J. Pendergast appeared for the defendant.

All attorneys and parties who have cases on the calendar that they wish to have tried are requested by Clerk Coulter to be present at the adjourned day, Tuesday next at 9:30 a. m., in the Special Term room, first floor of the Court House.

The February term of County Court will open Monday morning in the main court room.

## SWISS PAPERS REPORT INVASION OF ROUMANIA

Lausanne—Swiss papers publish reports that Bulgarian troops have invaded oumania, opening hostilities between the two countries. They state that a Bulgarian patrol which crossed the frontier was immediately set upon by Roumanian troops and forced to retire, but that reinforcements arrived for the patrol and the fighting was resumed.

## A BEAUTIFUL NECK.

### How to Improve Your Throat Without Slavery to Routine.

We all know that the neck should not be too short; should be smaller at the top than where it joins the chest and shoulders; that the shoulders should be neither too broad and well developed nor too narrow; that the bones of the chest and back should not be buried with flesh.

It is not given to every woman to have a beautiful neck and shoulders and chest. But she can make the most of the trio, as nature gave them to her, by massage and exercise. And she can do more.

She can care for the skin so carefully, perfecting the texture and coloring, that the form of the neck and chest and shoulders becomes secondary.

Often the skin of the back and chest and shoulders will have small eruptions when the face of the person is clear and free from any such disorder. This is because the clothes cover the body so tightly that the air and sun have no chance to purify the skin beneath as they do the skin of the face.

Frequent baths of sea salt also tend to clear the skin of the neck and bring the blood to the surface, giving it the glow of health. Olive oil or some good cold cream applied to this part of the body keeps the pores open and helps the skin to throw off any secretions which are clogging the pores.

Exercises which stretch the muscles of the back, chest and neck will keep away any superfluous flesh and make the flesh hard and firm.

The neck sometimes gets dark from high and tight collars. For a bleach use the magic of lemon juice diluted one-third with water. Sponge with it and allow to dry on.

Oatmeal is splendid for whitening the skin and may be used freely.

### Consider the Stomach.

The evil habit of going too long without food is one from which many people suffer in this present age. Men sit in their offices, women rush about shopping, and both become so absorbed in their respective interests that the period of hunger is allowed to pass and that of fatigue and depression to set in. The worst feature of such cases is that once the second stage is reached the desire for food is gone, and after this treatment of oneself the stomach is too exhausted to digest a meal when taken. This extreme should be avoided. It is only necessary to take a light diet. A glass of milk, a biscuit, will do to prevent after loss of appetite. And yet those who call themselves sensible prefer to ruin their health rather than take the time and trouble to turn into a restaurant and drink a glass of milk.

"What fools these mortals be!"

## CHAMBER OF COMMERCE

*"Fulton First, Last and All the Time"*

If you think you are beaten, you are;
If you think you dare not, you don't
If you'd like to win but you think you can't
It's almost a cinch you won't
If you think you're outclassed, you are
For out of the world we find
Success begins with a fellow's will
It's all in the state of mind.
If you think wou're outclassed, you are
You've got to think high to rise.
You've got to be sure of yourself before
You can ever win a prize.
Life's battles don't always go
To the stronger or faster man;
But soon or late, the man who wins,
Is the man WHO THINKS HE CAN!

* * *

Industrial departments have been commonly organized in successful community organizations over the entire country. The best advertisement for a city will be found in prosperous factories; the poorest advertisement in those dismantled. A city which is found proudly to exhibit its own products and show loyalty to its own factories is assured of industrial success and new industries will evitably search out such a city, making the work of the industrial department extremely easy.

Through the organization of trade extension work, and through convention bureaus, the community and its products become known over an ever-increasing territory, and thus the commercial advantage of a community becomes cumulative.

Uniting town and surrounding country by bonds of interest and friendship recognizes the interdependence which properly exists and adds to the common prosperity by the exchange which must result from such a union.

* * *

People may talk as much and as long as they please, the one solid truth that may be applied to the betterment of human conditions is found in the word "work". In work—useful work—we find the greatest of all uplifts, the surest promoter of social welfare, the safeguard of society the genator of human happiness.

* * *

There was a man in our town
And he was wondrous wise.
He swore by all the gods that
He would not advertise.

At last one day he advertised,
And thereby hangs a tale;
The ad was set in nonpareil,
And headed "Sheriff's Sale."

There was a man in our town
Who was wondrous wise;
He bought space in the local papers
In which to advertise.

The orders came in thick and fast,
Like seagulls at the Fair.
And now he lives a life of ease—
A multi-millionaire.

## POLICE ARREST FORMER REFORMATORY INMATE SENT TO SENECA FALLS

A quick arrest was made by the local police yesterday upon the appearance here of Chief of Police Smith, of Seneca Falls. The chief was in quest of William Morey, who was suspected of entering the store of John Ragan, of Seneca Falls, shortly after his release from the Elmira reformatory.

Morey is known to the local police. Chief Dyer and Patrolman Brannigan went to the Oswego Falls Pulp and Paper company, where Morey had secured employment on Tuesday, returning to headquarters with their prisoner. A search of his boarding place produced most of the loot taken from the Seneca Falls store which he had packed into a suitcase. Morey admitted that he had entered the place and also accounted for another suit case containing lady's apparel by stating that he had "lifted" it from outside the railroad at Lyons, where the owner had left it for a moment to go into the station.

The articles taken from the Seneca Falls store, which corresponded to the contents of the suit case; comprised some cheap jewelry, collar and cuff buttons, and an assortment of clothing, four overcoats, several raincoats and trousers.

Chief Smith took thep risoner to Seneca Falls last night. Mr. Smith was also accompanied by Sergeant Graney of the Auburn Police Department, wha had assisted in the search.

## JUDGE ORDERS CREDITOR COMPANY TO APPEAR IN COURT IN J. A. BORT CASE

Attorney Floyd Spangle appeared yesterday before Judge Ray in the United States District Court at Norwich on behalf of the iSmple-X Wrapping Machine company, Inc., and secured an order directing the Fulton Light, Heat & Power company to show cause before the court at Albany on February 17, 1916, why a restraining order directed against the Simple-X Wrapping Machine Co., in the Bort bankruptcy proceedings should not be vacated.

The restraining order was granted on the application of the Fulton Light, Heat & Power company at the same time that a receiver was appointed over the property of John A. Bort, alleged bankrupt, and it ordered the Simple-X Wrapping Machine company, of which John A Bort was a stockholder, be enjoined and restrained from removing, selling, encumbering or in any way disposing of the property of the wrapping machine company.

In making his application before Judge Ray, Mr. Spangle presented the petition of Louis W. Emerick, secretary of the wrapping machine company, which showed that the only interest Mr. Bort had in the company was tha tof as tockholder and that the Simlpe-X Wrapping Machine company had numerous ordersffi that as the corporation was restrained from selling or disposing of its property, it could not fill any of the orders.

## League to Enforce Peace Meets; Local Man Helping Cause

Mr. E. J. Penfield is a firm believer in the principles of the League to Enforce Peace, of which ex-President Taft is president. At the inception of the League Mr. Penfield lost no time in joining the organization, because, as he expressed it this morning," I am a firm believer in enforcing peace."

While the county organization is at present on paper only, the national body of the League has selected Congressman Mott as the secretary in Oswego county. Both he and Mr. Penfield are anxious to secure members, having in their possession application blanks. Membership costs the applicant nothing, although contributions are at all timbes acceptable.

A meeting of the League has beencalled by William Jay Schieffelin, temporary State Chairman for the purpose of organizing a New York State brank. The meeting is to be held at the Hotel Manhattan, New York, on Washington's Birthday, invitations having been sent to delegates in each county in the state.

The following have been appointed temporary county chairmen: Dr. John H. Finley, for Albany; La Mont M. Bowers, Broome; William McCarroll, Kings; Ansley Wilcox, Erieffi Albert G. Cornwell, Chenung; Frank Randall Hathaway, Columbia; J. M. Himebaugh, Chatauqua; Theodore S. Kessler, Sullivan; W. E. Harding, Genesee; J. D. Frederiksen, Herkimer; Delos F. Wilcox, Queens; Chas. P. Neill, Richmond; G. A. Beal, Orange; Peter A. Porter, Niagara; Geo. W. Ray, Chenango; Herbert S. Houston, Nassau Luther W. Mott, Oswego; Walter H. Jaycox, Suffolk; G. S. Shattuck, Yates; President Henry N. MacCracken, of Vassar, Dutchess; Richard C. Shannon, Monroe; James F. Hooker, Schenectady; Elmer E. Brown, Bronx; Arthus S. Tomkins, Rockland; F. R. Hazard, Onondaga; William C. Sanger, Oneida; Melvil Dewey, Essex; W. H. Vary, Jefferson; A. T. Clearwater, Ulster; Prof. Samuel P. Orth, Thompkins.

### For Compulsory Peace

The League to Enforce Peace was organized by ex-President Taft and others, in Independence Hall last June, the conference adopting a platform which has for its main feature a proposal that the United States join a league of the great powers whose joint armed forces shall be used to compel the nations to keep an agreement not to make war until arbitrational methods have been tried. The plan does not provide for the enforcement of the decree. Nations may fight after arbitration, if dissatisfied. Its object is not to try to end the present European war, but to urge a practicable plan for securing future world peace.

The four proposals of the league's platform are :

That the Unifed States join a league of nations, which shall agree to submit all disputes, either (1) to a world court, or (2) a council of conciliation, (3) the joint economic and military forces to be used forthwith against any nation violating such an agreement. (4) That an international code be adopted.

### POLLACK'S BROTHER IS OFFICIAL REFEREE

Lou Pollack, organizer in chief of the Independent Athletic Club, under whose auspices a wrestling carnival will be given in Church's hall Monday night, has learned that his brother, Ed, known to the New York sporting world, is named to referee boxing matches in New York city by the State Boxing commission.

Mr. Pollack is conducting a stable for prize fighters, training "Kid" Parker and Hank Mott, both of whom will be seen in the ring at Syracuse next week. He hopes to prevail upon his brother to bring some New York boys here for a mill.

Officers will be elected in the club next week. Plans are under way for a smoker which is to be held in the Foster theatre. Mr. Pollack reports that the membership list is growing.

### WEATHER FORECAST

## Opinions

### A DANGEROUS MAN

Having had another opportunity for closely observing him, many persons in New Haven can better appreciate why the upholders of the established order in New York prison practice and politics felt the necessity of getting rid of Thomas Mott Osborne. Obviously he is a dangerous man. He cuts loose from all theories and studies cases. He rejects all the notions of the erudite criminologists in favor of the facts which he reads in the lives of those labelled criminals. He actually regards those in prison as human beings. He scandalously credits them with sense of honor. He dares to claim them as his friends—his brothers. Of course he must be a criminal himself.

And such a man some misguided power clothed with the authority of warden of Sing Sing and turned loose to upset the whole prison system of New York with his notions. What may not such a heretic do with the existing "system?" He is bound, unless checked, to make the proverbial bull in a china shop seem a mild and docile creature. And worse than all, he is liable, with his primitive sense of honor and human rights, to play the very dickens with what such as he calls political graft in the New York penal system. Away with him! —New Haven Register.

### MAKING AMENDS

Governor Whitman's recent appointments to the Public Service Commission indicate clearly that he has profited considerably from the criticism of his own administration. This is the more remarkable, since he seemed, for a time, incapable of benefiting from precisely the same criticism that had been aimed with justice at his three predecessors.

Governor Hughes established the two Public Service Commissions firmly in the confidence of the state by filling them with men of superb abilities, integrity and training. Governor Dix began the work of destruction. Governor Sulzer pressed it forward, and Governor Glynn, while making one appointment —that of Commissioner Ervine—that was distinctly creditable, further mutilated the New York City commission by the appointment of the disreputable Wood, now under indictment for soliciting a bribe.

Governor Whitman's first act in relation to these commissions was to replace the one remaining member of superior ability on the New York commission, Mr. Maltbie, with a carpetbag politician from Nebraska, who had been the governor's political butler since he became a figure in state politics, and who was without other discernible fitness for this gravely important place. Naturally such an appointment brought upon the governor's head a storm of merited condemnation. His appointments this week evidence a disposition to make such amends as he can. Commissioner Ervine, a Democrat of proved value in the up-state commission's work, is reappointed. Travis H. Whitney, secretary of the Hughes Commission and the sole remaining link between that period of faithful, conscientious performance and the present one, is named to succeed Commissioner Cram. The appointment of Mr. Hervey, a Brooklyn Democrat, while perhaps not so conspicuous in its propriety, at least reveals an inclination to remove the color of partisanship from the commission which has disfigured it and destroyed its usefulness.—Rochester Herald.

### ELMIRA PETITIONS FOR LOCAL OPTION

The sentiment in this city is overwhelmingly in favor of home rule on the license question, and these "ifs" and "ands" that are periodically thrown out to confuse, will not be allowed to cloud the issue or to abate the zeal with which the proposition will be pushed to a successful conclusion.

The Advertiser is not afraid that the Legislature, will turn this matter down, or that the governor will act unfavorably. The sentiment throughout the Southern Tier is decidedly in favor of local option on the liquor question and this section is important to any party of any group of politicians.

When the matter is taken to Albany it will be taken there right, and our people will be heard and our wishes granted. The legal phases of this matter were the very first to be considered. The people were not asked to back up a movement of doubtful portions or questionable parts. To those who look for it to fall down or such reasons, we can only say that they will be as greatly surprised in the end as they were when it became known that the names of upwards of 4 000 voters had been gathered on the petitions.

Elmira is not interested in the Statewide Local-option Bill to the exclusion of our own proposition. * * *

The effect of that measure would be to allow wards or election districts to vote in or out saloons. That is a good measure for many cities that are not so far advanced as Elmira on the local option proposition. It will allow many cities to clean up residential sections and to drive the saloons into certain wards and districts, that would not be able to secure a majority vote for the entire city. Elmira is now ready to give an overwhelming majority against the saloons and will do so as soon as the vote can be taken.—Elmira Advertiser.

## IT IS TIMELY TO SUGGEST

Timely suggestions are at all times in order, but more particularly right now, or since Mayor Lewis so courageously placed his veto upon the Sunday pool playing ordinance.

While it is useless to cross bridges before coming to them, nevertheless time should be taken by the forelock, by reminding the Aldermen of this city of General Grant's personal memoirs, wherein he tells of how General Meade, when placed in subordination to General Grant as Commander, did not resent the authority, but met the man of iron will with utmost courtesy and begged him as his new superior to command him for any service or duty, saying the work to be done was of such importance to the whole nation that all personal feeling and ambitions must give way, and that he would serve to the best of his ability wherever placed.

That admirable spirit should be the spirit of today, not only in the big affairs of the world, but right here in Fulton—with the members of the Board of Aldermen, whose bounden duty it is to respect the will of the people who have signified their opposition to the vetoed ordinance.

If the spirit of General Meade does not apply to the men who have sought to open the pool parlors during certain hours on Sunday afternoon, it certainly does to the men who are pledged to be unselfish in the performance of their duty to the people.

"GOLD IS GOOD IN ITS PLACE; BUT LIVING, BRAVE AND PATRIOTIC MEN ARE BETTER THAN GOLD." —*Abraham Lincoln.*

## HAIL, HAIL, MR. COFFEY

Westchester county may well feel proud of being represented in the Assembly by a man like Mr. Coffey, who must be a man able to rise above his surroundings. Be that as it may, the Assemblyman should be made the man of the hour, as he has introduced a bill, which, boiled down, means "No seat, no fare," in its application to passengers on urban and interurban trolley cars and steam railways as well. The bill as introduced provides that unless a railroad corporation can furnish seats for passengers its employes may collect no fares. It is barely possible that even the many persons who have experienced every uncomfortable sensation due to strap-hanging on a long ride may think the Assemblyman's bill a joke, or a bit of the kind of legislation administered in the sunflower state. It is time that such ideas were dismissed in their relation to packing human beings in cars like sardines, following this up by collecting real money for the transaction.

There are thousands of persons, travelers upon the cars of the Empire United, who will, if the bill becomes a law, receive its author in the way that a conqueror should be received.

"I AM NOT BOUND TO WIN, BUT I AM BOUND TO BE TRUE. I AM NOT BOUND TO SUCCEED, BUT I AM BOUND TO LIVE UP TO THE LIGHT I HAVE."—*Abraham Lincoln.*

### WITH THE SUFFRAGISTS

In Manitoba on the 27th of January the legislature passed the bill giving equal suffrage to women. Manitoba thus becomes the first equal suffrage province of Canada and furnishes the first addition to the suffrage map for 1916.

* * *

In Texas the suffrage workers are trying to secure 40,000 names to a petition asking that a woman suffrage plank be put in thep latform of the Democratic party. Success will mean that the question must be submitted at the primary election.

* *

In order to bring home women suffrage as a vital issue to the Republican National Convention in Chicago in June plans are being made for a monster woman suffrage parade. It is expected that after seeing 20,000 women marching for suffrage in a city where woman suffrage is a respected fact and not a discredited theory the delegates will proceed forthwith to write a woman suffrage plank in the Republican Platform.

* * *

Under the ruling of the Bureau of Immigration any American who takes the necessary oath of allegiance and enters the army of a foreign power will still be regarded as an American citizen when he chooses to return to this country.

"Quite a contrast," comments The Suffragist editorially, "to the fact that an American woman who marries a foreigner loses her citizenship even though she never leaves her native land."

* * *

In England according to a cable in the New York Post, there is a division on the suffrage question. Some declare themselves as finding a compensation in the war in that it has put a quietus on the suffrage agitation, others assert that the war has made woman suffrage inevitable.

John Masefield, the English poet now lecturing in this country belongs to the latter group. He says: "When the war is over they will be much nearer having the vote and without any definite effort on their part. They have proved themselves such trumps."

* * *

In Mexico women are demanding the right to vote. They claim—and who can deny it?—that the men of Mexico have not justified the presumption that government is a function which men alone are fitted to administer.

The women of Yucatan, in the first congress of women held in the so-called republic of Mexico, boldly declared that Mexican women were at least as smart as Mexican men and just as fit for all political activities. The demand for women suffrage has been transmitted to General Carranza.

## LITTLE TALKS ON THRIFT

By S. W. STRAUS
*President American Society for Thrift*

President Wilson truly said: "If a man does not provide for his children, if he does not provide for all who are dependent upon him, and if he has not that vision of things to come, and that care for the days that have not dawned, which we sum up in the whole idea of thrift and saving, then he has not opened his eyes to any adequate conception of human life. We are in this world not to provide for ourselves alone, but for others, and that is the basis of economy. So that thrift and economy and everything which ministers to thrift and economy supplies the foundation of national life."

President Wilson is known as an advocate of thrift. In fact it will be found that all successful men have the instinct of thrift in one way or another. Many of the men who are serving in the United States Senate, Congress or the Cabinet, are self-made men. They were poor, but they were thrifty and poverty cannot keep a thrifty man down. Champ Clark, at the age of ten years, went to live with a farmer and paid for his board by feeding the live stock and cutting wood. Four years later he became a clerk in a country store at $8 a month.

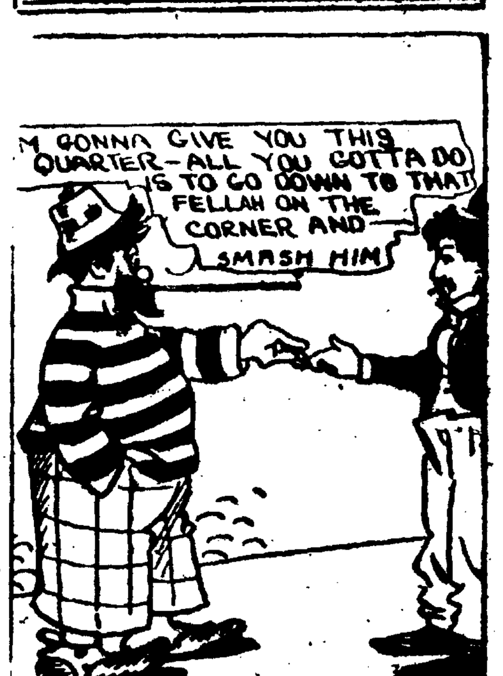
Joseph G. Cannon, the former Speaker of the House, also clerked in a country store where he received $2 a week. The President's son-in-law, William G. McAdoo, was a farm laborer, then a tunnel digger, and now is a wealthy man and Secretary of the National Treasury. The Secretary of Labor, Mr. Wilson was a coal digger.

Given the same instinct of thrift a boy can do today what these men have done. "When men tell you," says Sir Thomas Lipton, "that there are no more chances in the world, tell them that they are mistaken. There are thousands of manufacturers that are still in an imperfect state, there are millions of acres that are still to be made productive; there are, seemingly, countless achievements yet to be undertaken.

Quite an achievement was the "Save Something" club which a Massachusetts department store conducted last year. Cards were printed with four rows of even numbers. It was originally planned to have the members of the club, all employes of the store deposit two, four, six, eight and ten cents per week, but the plan outgrew that and some of the clerks deposited $1.00. Each card totals $27.56 and three cards, according to the amount of money deposited. The holder of three cards drew about $82,68 when the money was divided at the end of the year, while all drew at least $27.56.

**Seventy-five Pounds of Honey In Tree.**
Elberton, Ga.—Messrs. H. C. Rousey, W. J. Bone, Sam Bone and Frank Rousey cut a bee tree and got seventy-five pounds of honey from it. This is said to be the biggest amount of wild honey ever taken from a bee tree.

**Charley Takes Job With Misgivings**



**Off Guard.**

"Your honor," declared the policeman, "I heard an awful yellin' back in the wagon yard, and when I got there this man was beating his wife. They had just drove in from Grant park."

Judge Broyles turned sharply on the prisoner, a tall, gaunt man, with clay colored complexion.

"Is this true? Were you beating your wife, sir?" the judge demanded.

"Yes, yer honor."

"How did you come to it?"

"I don't know, jedge. For twenty years she allus wuz th one what did th' beatin', but I jes' happened ter catch her when she wasn't feelin' right."—Case and Comment.

**Cruel.**

Old Aunt (on her deathbed)—I am just making my will, my dear Heinrich. I know, alas, too well that you are not religiously disposed and have no desire to promote the cause of—

Nephew (hastily)—Beg your pardon, aunt; quite the contrary.

Aunt—Heaven be praised! Then you will be glad to hear that I have left all my property to the church!

**Realistic.**

"Why is Rosalie weeping so?"

"She and Bessie and I were playing at keeping house. Rosalie was the wife, and I was the husband."

"I hope you were not cross to her. Husbands and wives should never quarrel, you know."

"Oh, we didn't fight. Bessie was our maid, and she quit without giving us notice."—Minneapolis Journal.

### LEGAL NOTICES

**Notice to Creditors**

In Pursuance of an Order of Clayton I. Miller, Surrogate of the County of Oswego, New York, notice is hereby given according to law, to all persons having claims against Faustina H. Langdon, late of the city of Fulton, in said County, deceased, that they are required to exhibit the same, with the vouchers therefor, to the subscriber at the lew office of A. T. Jennings, No. 9 So. First street, in the city of Fulton, in the County of Oswego, New York, on or before the 26th day of April, 1916.

Dated this 18th day of October, A. D., 1915.

HAROLD H. BRISTOL,
Administrator with the Will Annexed.

STATE OF NEW YORK— SUPREME COURT, Oswego County.
THE DIME BUILDING AND LOAN ASSOCIATION vs. EARL POOLER, BERNARD H. SHARP, MERRITT W. MILKS AND LOUISE POOLER.

To the above named Defendants:

YOU ARE HEREBY SUMMONED to answer the complaint in this action and to serve a copy of your answer upon the plaintiff's attorney within twenty days after the service of this summons, exclusive of the day of service, and, in case of your failure to appear or answer, judgment will be taken against you by default for the relief demanded in the complaint.

Trial to be held at the County of Oswego.

Dated this 6th day of January, 1916.

LOUIS C. ROWE.
Plaintiff's Attorney,
Office and Postoffice Address,
Oswego, N. Y.

To Earl Pooler, Defendant:

The foregoing summons is served upon you by publication, pursuant to an order of Hon. Irving G. Hubbs, Justice of the Supreme Court of the State of New York, dated the 14th day of January, 1916, and filed with the complaint in the office of the Clerk of Oswego County, at Oswego, N. Y.

LOUIS C. ROWE,
Plaintiff's Attorney,
1 and 2 Grant Block,

# FRITTERED HOURS.

## Why One Woman Has a Career and Another Hasn't.

## HOW VALUABLE TIME FUGITS.

**What Does the Housewife Do With Her Leisure?—Play Bridge, Go to Teas, Chit Chat Over the Telephone or Build Up a Career?**

"Oh, but I must wash on Monday!" exclaims the methodical housewife.

"Of course we must have a hot dinner on Sunday noon. We've always had it."

And so it goes. The average housekeeper is quite convinced that things must be done as they always have been done and that she must spend a certain amount of time (registered only in her own mind) on certain household tasks. She may wonder why other women seem to have more time, when others in fact have a "career" on the side, when it takes her every minute of her waking hours merely to manage the home. Now, if there is one fault greater than others which we lay against women in their present state we would say it is lack of power to concentrate. How we can "fritter time away!"

The sole reason for difference between these two women is undoubtedly that the former could concentrate and that she had in mind something over and beyond her housework worthy of that concentration. She wanted to take the subscriptions, she wanted to develop as her husband's bookkeeper, she wanted to find time to be her children's companion. So she studied and shortened her work and concentrated, thinking of the most important ends first and not putting undue prominence on the details.

Any woman, yes, any homemaker, even with children, can do something outside of her home if she really wants to. We have no patience with a fairly wide circle of ladies who grumble that other women have careers or work outside the home and that they cannot. The chances are that they are not willing to make the sacrifices necessary—to stride both horns of a career and matrimony. They may not be willing, for instance, to give up an excess of telephoning to friends, gossip and chit chat. They may not be willing to spend far fewer hours running from shop to shop looking for a waist 50 cents lower and spending in doing it three valuable hours in which at concentrated work they could certainly have earned several dollars. They may not be willing to give up an undue amount of amusement and social life which eats more time out of the average woman's day than any one has estimated. We all want to be neighborly and to have friends, but that does not mean telephoning for an hour after breakfast to find out what So-and-so wore or what she said or when they are going.

Several women with children have met success in work outside of the home and at the same time managed to build up a beautiful family life. One woman with three little children has managed to support the entire family when the husband was crippled. Another, with two children and a baby, finds she can devote at least three hours a day to literary work. Another has sent children through college by representing a magazine, and in no case was the home neglected.

### Loses $150 in Ice Hole.

Waukesha, Wis.—While looking at Robert Hine cut holes in the ice on Pewaukee lake Carl Zinn of Milwaukee, who, with friends, was spending the day at the Zinn summer home, jerked a handkerchief from his pocket. A pocketbook containing $150 in bills and other valuable papers, which were in the pocket, fell into the hole.

## INDIAN DIES AT 150.

**Squaw Buried by Few Remaining Aged Members of Her Tribe.**

Bakersfield, Cal.—Mary Tecuyas, an Indian woman, reputed to be 150 years old, died recently and was buried by the few remaining members of her tribe.

The aged squaw was the oldest member of an almost extinct tribe, known as the Tejons, who live in a canyon near here. The tribe is said to include fifteen Indians who are more than a hundred years old.

### Telegrams in 1767.

Telegraphing by semaphore was invented by Richard Lovell Edgeworth in 1767 and was first regularly established by the French military authorities in 1794. The system was introduced into England the following year by Lord George Murray, and by its means the admiralty was placed within a few minutes of Portsmouth or Plymouth. The apparatus consisted of shutters placed on the top of towers built on commanding sites at intervals of from five to ten miles. Greenwich time at 1 o'clock daily was passed from London to Portsmouth and acknowledged commonly within three-quarters of a minute in clear weather.—London Mirror.

We may say that we prefer the German Modlin to the Russian Nowogeorgiewsk for that Polish town without violating strict neutrality.

Lloyd-George is a clever adapter when he says "nobody can haggle with an earthquake" instead of "don't monkey with the buzz saw."

If Henry Ford wants to tackle another forlorn hope he might try to bring harmony into the ranks of preparedness planners.

Patrick Henry also had a far ahead look when he said, "Gentlemen may cry peace, peace, but there is no peace."

Go west, young man, or maybe northwest, and eat reindeer steak. New York is already down to horse meat.

Tut, tut, tut on this growling at the weather! Old Sol scores a notch or two every day on the road to June.

The year "1915" so impressed itself upon the mind that it was difficult to drop it offhand and write "1916."

No natural law to prevent diplomatic relations from breaking under the strain of their own weight.

### CO-OPERATIVE EFFICIENCY.

Co-operative efficiency is the keystone of the successful commercial organization. When the business men of a city give their time and money to promote the welfare of their city and community they expect results. Unfortunately most of the things which the commercial organizations working for the general benefit of the community must do are of a general rather than a directly pecuniarily, beneficial character. Therefore for the best interests and advancement of commercial organizations it is practical that they incorporate departments that will produce definite, direct, pecuniary benefits for their proprietor members.

For the past decade the tendency in this direction has been very noticeable. Chambers of commerce, commercial clubs, boards of trade and retail merchants' associations whose original purpose was to promote industry and enhance the value of real estate have created departments and bureaus which produce definite and tangible results. The organization of the credit bureau as a department of activity is an example of this changing order in commercial organization progress.—Town Development Magazine.

# HOME TOWN HELPS

## DESIGN MUST FIT THE SITE

**House Improperly Adjusted Will Often Mar the Effect of Otherwise Pretty Street.**

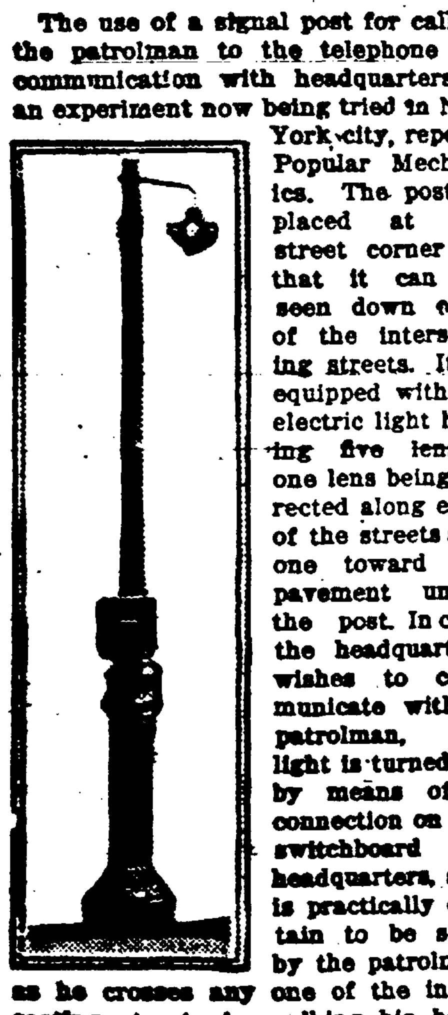
A type of house that is suitable for almost any suburban locality is the frame house, with the exterior walls of clapboards or shingles. In building a frame house, however, it is necessary to have a design that is fitted for the site. With either clapboards or shingles, an exposed foundation of brick or stone is correct. Solid concrete, as well as the stucco finish on a wooden frame, also lend themselves to certain styles of architectural work.

Another attractive combination is the first story of concrete or stucco with an upper story of shingles. A good combination is a dark red stucco lower story with green or weathered shingles above. The roof of this type of house should be tile and should be of a sloping and rambling construction so as to bring into play all the color in the roof material to offset the upper story of the house.—Building Age.

## SIGNAL CALLS THE POLICE

**New York City Experimenting With New Idea That Seems to Have Practical Value.**

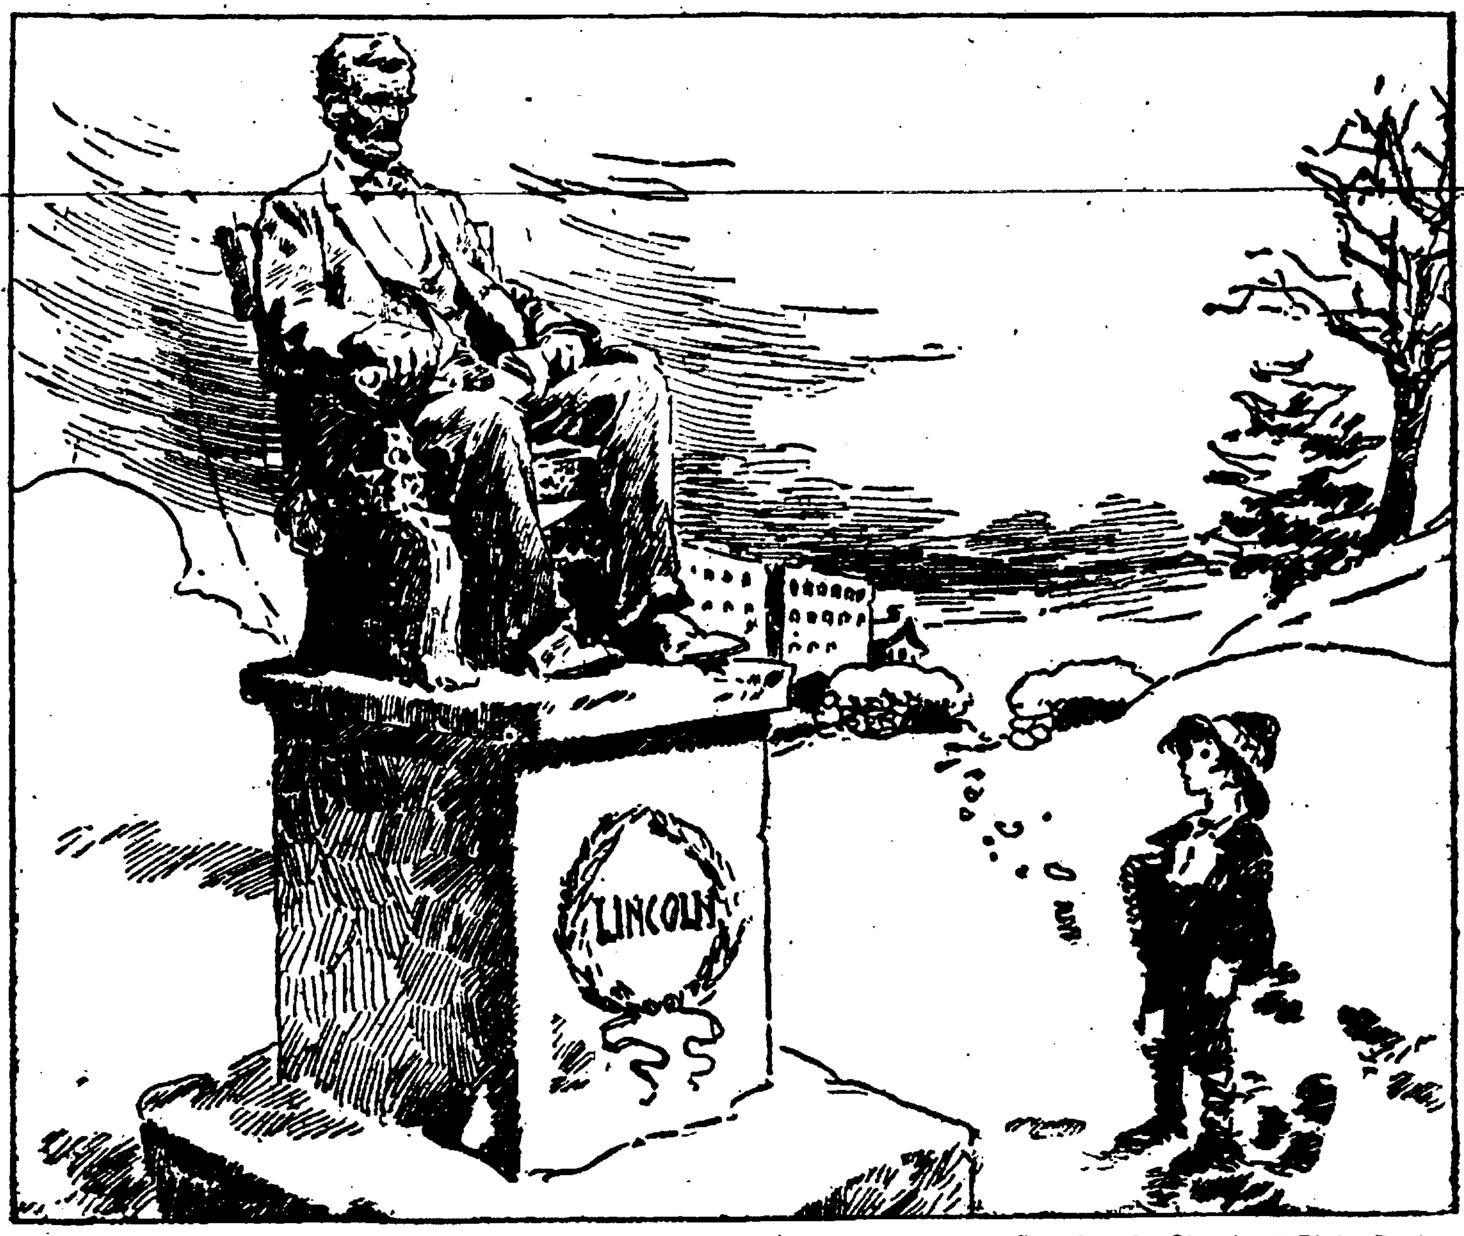
The use of a signal post for calling the patrolman to the telephone for communication with headquarters is an experiment now being tried in New York city, reports Popular Mechanics. The post is placed at the street corner so that it can be seen down each of the intersecting streets. It is equipped with an electric light having five lenses, one lens being directed along each of the streets and one toward the pavement under the post. In case the headquarters wishes to communicate with a patrolman, the light is turned on by means of a connection on the switchboard at headquarters, and is practically certain to be seen by the patrolman as he crosses any one of the intersecting streets in walking his beat. The lamp is so arranged that it is visible by day as well as by night. The signal post is provided with a telephone and also with a "citizens' push button," with which anyone needing a policeman can turn on the light and summon one to his aid.



### School Playgrounds.

Every country school could have its playgrounds—some place for the kiddies to play; and gradually, as the need arose and the interest increased, equipment could be added and much could be done for the betterment of the children of the rural school. With the proper teacher (or perhaps a neighborhood volunteer a day or so a week) games could be added to the regular school program, and who shall say that the boys and the girls are not each learning through their games and play the most valuable lessons in citizenship and their future work in the world?—Edwina Mary Layman, Colorado Agricultural College, Fort Collins, Colo.

## "MAYBE SOME DAY I'LL BE AS GREAT A MAN AS HE WAS."



—Donahey in Cleveland Plain Dealer.

## DOG KNOWS PHONE RING.

**If Master Isn't Home Bud Goes Out and Finds Him.**

Winsted, Conn.—Bud, a Boston terrier, owned by W. B. Pinney, an employee of the Southern New England Telephone company and a member of the volunteer fire brigade, can distinguish his master's telephone call—two rings—from the other numbers on the 316 line.

When the bell rings twice and Pinney is at home and does not hear the call the dog searches for him. By barking and other means he attracts his master's attention to the telephone.

When Pinney fails to respond at night to the double ring Bud dashes to his master's room and rouses him. That is one reason why Pinney never fails to report for duty at a night fire.

### One Way Out.

Despite his illiteracy Mose Belt has gathered quite a competency from his whitewashing and kalsomining trade.

Recently during the course of some business with a notary the latter produced a document, saying:

"Sign your name here, Mose."

"Look heah," said Mose, with offended dignity, "I doesn't sign mah name, suh. I's a business man, suh, an' has no time for dem trifling details. I always dictates mah name, suh."—St. Louis Post-Dispatch.

### Ice Clan and Sun Clan.

A tribe of Indians belonging to the Pueblo group is divided into an ice clan and a sun clan, with an ice priest and a sun priest. In winter the one section is in charge and the other in the summer time.

### Second Thoughts.

Mr. Gnaggs—I suppose you women think second thoughts are best. Mrs. Gnaggs—Not always. You may remember I refused you the first time you asked me to marry you.—Philadelphia Record.

### HELPFUL ACTS.

Lend a helping hand whenever you can. If you cannot do it in just the way you would like, but must submit to another's dictation in the matter, still, rather than let the opportunity pass, conquer your own desires and do the helpful act. You never know when it may rise up to repay you.

### Origin of the Word "Pagan."

The Latin word from which pagan is derived originally meant a fountain or spring; then the village which sprang up around it, and finally the residents of the village. As Christianity took strong root at first in the large centers of population and the worship of the pagan deities lingered longest in the country and among the country villages, it came to be understood that a pagan or villager was, in virtue of his residence, a worshiper of the old gods, and thus the term acquired its present significance.

### A Minister's Salary in 1756.

According to an account book of the Second parish in Falmouth, Me., dating back to 1755, which is in the possession of Henry S. Thrasher of Portland, the minister received $31.33 for preaching seven Sundays. His salary for the year 1756 was $400, and the salary of Widow Elwell the same year for taking care of the meeting house was $6.66.—Indianapolis News.

### On the Wall.

Those who go to war without their parents' consent and are killed in battle occupy a peculiar position in the after world in Mohammedan theology. They are on Al-Araf, the wall separating heaven and hell. Because of their treatment of their parents they should be in hell, but death in battle is martyrdom, which entitles the deceased to enter heaven. Because they are martyrs they should not be sent to hell; hence Al-Araf for them. There are other denizens of Al-Araf, among them those whose good and evil deeds so exactly balance that they are neither fit for heaven nor hell.—St. Louis Globe-Democrat.

### Equality.

"No such thing as stuckuppishness about her," says the loyal servitor, defending his mistress against the criticisms of the acquaintance who is inveighing against class discrimination and the attitude of the wealthy toward the working element.

"Well, but don't she order you around?"

"Sure she does! She bawls me out just the same as what she does her husband. She don't make no difference between me an' him even."—Judge.

### Magnets.

A steel horseshoe magnet can hold in suspension a weight up to twenty times its own.

## A SAILOR, HO!

**The Ever Popular Middy Suit For the Small Lad.**

This correct lad is all set up in blue broadcloth and white linen neatly braided and chevroned. The black silk tie is knotted of a memento from the battleship Connecticut. These middy suits are especially serviceable during winter months, as they take the place of leggings.

LITTLE BOY BLUE.

### Rice Snowballs.

Wash two teaspoonfuls of rice and boil it in one teacupful of water and one of milk, with a little salt. If the rice is not tender when the milk and water are absorbed add a little more milk and water; when the rice is tender flavor with vanilla, form it into balls or mold into a compact form with little cups; place these rice balls around the inside of a deep dish, fill the dish with a rich, soft custard and serve either hot or cold. The custard and balls should be flavored alike.

## CHAPEL CONCERT QUARTET COMES HERE MARCH 3

The Chapel Concert Quartet of Elmira is an organization pretty well known to music lovers of this city, both for the quality of music furnished and the high standing of the players. They are again coming to Fulton, under the ausrices of St. Joseph's Council, K. of C., on March 3rd. The entertainment will be held in the Knights' present location, in Oneida st., it promising to be even more instructive than those of former years. The company comprises a violinist, a reader, a pianist and a contralto.

Free Oyster Soup tonight at Pond's hotel, Sixth Ward. adv

## M. W. A. NOTES

Mr. Courneen and Mr. Singleton, representatives of the N. Y. C. were here last evening to complete arrangements for the Modern Woodmen's excursion. A train composed of three coaches will leave the Cayuga street station at 7 o'clock Monday, and Broadway at 7:10 o'clock. The regular ticket which was sold in advance will be used on the train without an yexchange.

About 150 members of the Camp have signified their intention of attending the class adoption. Those not being able to partake of supper at home will be taken care of by the committee immediately upon arrival in Syracuse. The time for leaving Syracuse appears on the tickets, 1:30 a. m.

A special meeting wil lbe held tomorrow afternoon at 2 o'clock to make final plans, to hear the reports of the Marshall of the day, the badge committeeman ,the song committee and all other committees in connection with the excursion to Syracuse.

Free Oyster Soup tonight at Pond's hotel, Sixth Ward. adv

## MR. SCHNEIDER'S TEAM OF "FORTY-FIVERS" DEFEATED

The completion of a series of six games of "45," Thursday evening resulted in the enjoyment of an oyster supper at the expense of the winning team of K. of C. players, headed by Mr. Fred Schneider. The supper was served in the Council club rooms, in Oneida st., and the losers; led by Mr. Charles O'Grady, of the C. M. B. A., gave a good accounting of themselves in this one instance at least.

# EPWORTH LEAGUE HOLDS SESSIONS

### Minetto Conference Presided Over by Sandy Creek Man —Social Sessions Tonight.

In the absence of the registrar of the Oswego county Epworth League, Leland T. Carner, the Rev. Spencer Baker Owens of Sandy Creek/presided at the opening session at Minetto yesterday. The convention will conclude its labors today. It includes every branch league in the Ontario district of the Methodist Episcopal church.

Yesterday's devotions were led by the Rev. G. J. McKnight of Mannsville, followed by thed iscussion of the following topics: "In Child Life—the Juniors," Rev. C. F. Miller, Mexico; "In the Life of the Youth," Rev. Adelbert Warren, Verona; "In the Life of the Community," Rev. T. J. Williams, Mout Pleasant; "In the Life of the World," Rev. S. H. Stockes, Orwell.

In the evening a praise service was observed and the Minetto choir assisted. There were devotional services led by the district superintendent. A lecture was given by Rev. Jabez Stalwood of Oswego on "If the Truth Were Known."

This morning's session opened at 8:30 o'clock with the "Morning Watch," a service, featured by a clinic in league efficiency, led by Rev. C. E. Love of Parish. Rev. R. S Thomas of Fernwood talked on "Epworth League Publicity — Getting Before Folks;" Rev. E. H. Scott of Rome was heard during the day and tonight the visitors will be guests of the leagues at Minetto and Oswego.

# THINKS WINDOW SCREENS GOOD

Window screens of cheap cloth are considered essential by many persons who have equipped homes with them. They are in use in the Fulton open air school in the Falley Seminary building and pronounced indispensable. While they are used with success in many other cities, it is uncommon to find them used to such an extent as in Syracuse, which is a result Open Air school where they have been in commission for several years. A few weeks ago 651 additional screens were ordered for school installation. Many resideces in Syracuse have also been equipped with them.

An Auburn man has installed them in the Chamber of Commerce rooms in the Auburn Savings Bank Building, and while those that he put in cost only 50 cents each, he would not take $5 for them if he had to part with them. They do all that is expected of them. They change the air without creating a draft. Most offices are so situated that you cannot raise or lower the windows without getting a draft. With these cloth screens that is obviated completely and one can sit within a few feet of the window and not feel a draft. Where rooms are steam heated this is a great advantage.

This same man also said that he was trying another stunt that he had not heard of anybody else using, and anybody is welcome to try it if they care to. He has placed a cloth screen over the cold air box which opens directly outdoors. Heretofore it required a constant change from outside to inside air, and every one knows the effect of inside air heated over and over again. The screen gives fresh air with no draft into the furnace. It saves coal and maintains an even heat. It takes much less coal to heat the air that comes in graduall in that way, than when air of extremely low temperature is forced through the flues in to the coal.

This might not work everywhere, where the cold air box is sheltered, but where it is exposed he claims that it has worked satisfactorily thus far in his home, and he claims that his house is one o fthem ost difficult in the city to heat, having 12 foot ceilings, and being opposite to a 10 acre campus where the wind gets a good sweep. Notwithstanding this, it is not at all difficult to maintain a temperature of 70 degrees with the above arrangement, and he is satisfied with the experiment thus far. He said he did not believe that it would be as satisfactory in mild weather, however, but only for cold weather.

Free Oyster Soup tonight at Pond's hotel, Sixth Ward. adv

THE TEST THAT TELLS

Is the Test of Time. Many Fulton People Have Made This Test

Years ago this Fulton citizen told in a public stattement, the benefit derived from Doan's Kidney Pills. The statement is now confirmed—the testimony complete. Instances like this are numerous. They doubly prove the merit of Doan's Kidney Pills. Can any Futon reader demand more convincing proof? It's Fulton testimony —it may be investigated.

Mrs. P. Coleman, 204 Pratt st., Fulton, says: Doan's Kidney Pills are most beneficial in relieving lameness across the back. They also remove headaches, dizzy spells and that feeling of languor and weariness so common when the kidneys are inactive. I used Doan's Kidney Pills and they promptly benefited me. I cheerfully renew the public endorsement I gave Doan's Kidney Pills some time ago."

Price 50c, at all dealers. Don't simply ask for a kidney remedy—get Doan's Kidney Pills—the same that Mrs. Coleman had. Foster-Milburn Co., Props., Buffalo, N. Y.

## Pulpit and Pew

### CHRISTIAN SCIENCE

Subject for Sunday is "Soul." Golden Text, Psalms 68: 20. Responsive reading, Psalms 67: 1-7; 33: 12, 18-22.

### ALL SAINTS' CHURCH

Rev. Minor J. Peters, Rector

Sunday, Feb. 13th. Sixth Sunday after Epiphany.

Services as follows:

Holy Communion, 8 a. m.

Matins and sermon, 10:30 a. m.

The Juniors will sing the "Battle Hymn," illustrated with 10 scenic slides. Reserved seats for Grand Army of the Republic, Sons of Veterans and Columbia Circle. Silver offering for worthy cause. Come early if you wish a good seat and bring the children.

### CONGREGATIONAL CHURCH

Rev. Chas. Olmstead, Pastor

The topic for the pastor's sermon on Sunday morning will be "Some Things not to be Disturbed."

Sunday evening at 7 o'clock the choir of the Presbyterian church will render a cantata.

The Sunday school meets at the noon hour. The attendance has passed the 200 mark, with much interest in all the departments.

The Christian Endeavor society meets at 6 p. m.

A meeting for Bible study was organized on Monday evening. The next meeting will be on the evening of February 18, at the home of Mr. and Mrs. William Woodward.

The week night service meets each Thursday eveningat 7:30.

The monthly meeting of the Woman's Missionary Union on Wednesday p. m. at the home of Mrs. F. J. Switzer was large. Many new members have recently joined the society.

Several circles have held receptions this week.

### PRESBYTERIAN CHURCH

Rev. C. S. Robertson, Pastor

The hours for services tomorrow are as follows:

Morning prayer at 10 o'clock, Prayer by families at 10:30; subject of sermon, "Breaking Up the News."

Bible school at noon hour. Junior Endeavor at 3:30.

Vesper services at 5 o'clock; theme, "Yesterday."

Christian Endeavor aat 6 o'clock; leader, Mr. H. S. Van Sanford.

## PADDOCK PLOT CHOSEN AS SITE FOR TABERNACLE

The Paddock plot adjoining the new postoffice, has been selected by the joint committee of the Evangelistic Association as the space where the tabernacle will be erected to accommodate the April meetings. The committeemen were given full authority at yesterday's meeting to proceed with all details in connection with building the tabernacle, and quite a lot of other important business was transacted, including the acceptance of the resignation of Mr. John Hunter from the delegation committee and the substitution of Mr. H. S. Van Sanford. Mr. W. H Merriam was selected to succeed Mr C W Streeter on the finance committee Mr. C. E. Wilson was made chairman of the some committee, and Miss Bertha Palmer succeeds Mrs. R. Bruce McRae on the nursery committee. Mr. F. B. Trask was appointed to supply the vacancy left by the resignation of the Rev. Mr. Buck, former pastor of the Baptist church.

## SEIGE MEMBERS WILL BECOME ENROLLED

Interesting all-day services will be the rule in the ranks of the Salvation Army tomorrow, not the least important of which will be the visitation of Ensign Grace Fitzgerald, a sister of Ensign Albert Fitzgerald. Another event of importance to the local corps will be the public enrollment of seige converts, which occurs at the evening services. Everybody will be welcomed.

The program of the local corps for each week is as follows: Saturday at 8 p. m.: Sunday morning at 11 a. m.; Sunday praise meeting at 3 o'clock; street services Saturday evening at 8 o'clock.

## ORWELL HOSPITAL

Any person having magazines which they would like to send to the Orwell hospital, kindly leave at the store of H. Putnam Allen & Son, 53 S. 1st. st., Fulton, N. Y., for transportation to the hospital. adv360

BUSINESS—Particularly the most desirable business—is very much like the sport of fishing. You can catch it if you use good bait. The Evening Times offers you the correct bait.

# PUBLIC SCHOOL IS NOT MEETING THE NEEDS

## Of Large Numbers of Boys and Girls, Says Auburn Superintendent of Schools

Speaking before the Parent Teachers' Association of Auburn, recently Henry D. Hervey, superintendent of schools, spoke of the urgent need of vocational education in that city.

"There are three distinct tendencies to be noted in modern education. One seeks to conserve the health of school children and is resulting in better school sanitation, medical inspection and physical training. The second tendency is resulting in the establishment of vocational schools, the purpose of which is to modify traditional courses of study and to bring them in harmony with the abilities and needs of large numbers of pupils to whom the traditional school made slight appeal, and to increase the efficiency of all who must work for wages. A third tendency is so to modify our courses and methods in non-vocational schools that all the work offered may be made more vital, thus arousing a greater degree of interest and calling forth the full powers of the pupils.

"These three tendencies are but phases of a comprehensive movement toward the realization of the democratic ideal. The movement for vocational schools is not a passing fad. It is nation wide. It has the hearty endorsement of every thinking educator from the United States commissioner of Education down. It has the unqualified endorsement of the Education department of our own state.

### Old Spirit is Disappearing

"Vocational education has been developed to a high degree in Massachusetts. Wisconsin, Pennsylvania and in many other states throughout the country. It is now receiving the earnest attention of the United States government. The public is beginning to demand a new and more accurate system of child accounting. It is beginning to insist, and has a right to insist, on holding the school to a strict accountability for every child. The old time teacher did not feel any great measure of responsibility for those pupils who did not succeed in school. He was not supposed to do much for those who were not "smart," and was well content when they left school and went to work. This gave him more time to devote to his prize scholars and the success of his work was always measured by the success of the few.

"This old spirit is rapidly disappearing. Professor Suzzallo of Columbia has aptly characterized this old attitude and its effect as follows:

" 'Into the ranks of commerce, industry, agriculture and professional service enter the men and women whose school experience has directly or subtly convinced them that they are partial or total intellectual failures; for the traditional school has unjustly measured the mental competencies of every type of youth by its narrow standards of pre-professional training. Somewhat dispirited these find their occupations by chance and with the feeling that they are to labor at something second best. Under any thoroughly democratic regard for varied needs and divergent abilities, the school will cease to touch the majority of its children with the hand of discouragement.

"It is this fair dealing with all kinds of work and talent that the new democratic spirit of education invokes. A program for vocational education will frighten the timid schoolmaster who is hard and fast in the clutch of his craft-habit of teaching from a book and shutting his eyes to the consequences.

"What is the situation that now actually confronts us? The p rofessions are over-crowded, because the school has trained largely for these, neglecting al lother lines of honorable and necessary employment. Industry, on the other hand, is suffering for lack of skilled workers and has been handicapped in its competition with other countries where skilled workers are developed in vocational schools. The untrained, the unemployed and the unemployable become a social menace and objects of charity. The establishment of vocational schools affords a fundamental remedy for these evils. As someone has put the question, 'Is it not a better policy to put money into competency, self-reliance, and the joy of continuous and successful achievement, rather than into charity for those whom defective school training has made incompetent and unemployable? Is not much of the charity we give with so much sense of virture in reality a fine which we pay for our own stupidity, for our guilt in sinning against social foresight?

"The report of the Royal Commission on Poor Laws and Relief of Distress, issued in London in 1909, and other similar reports issued in this country, show the fearful waste of youth due to our incomplete and defective systems of education. The London report calls attention to the reckless pauperization of England's promising youth.' It states that the mass of unemployment is being recruited by a stream of young men from industries which rely upon unskilled boy-labor, and then turn it adrift at manhood without any special industrial qualifications and wholly out of line for skilled employments. Such industries squander the physical and moral capital of the rising generation. These reports emphasize the fact that the most dangerous moment in the lives of elementary school pupils is when they leave the elementary school. Unless wisely guided, the stock of knowledge and training gained in school is quickly dissipated and these boys and girls become alike unfit for employment and unfit for further education.

### Girl Had Many Jobs

"As indicating the aimless wandering from job to job of untrained boys and girls whol eave school at 14 and go to work, the so called 'job hoboes,' the case is cited as typical of a girl who worked at 10 different jobs during the two years between 14 and 16. The length of time spent in each ranged from three days to two and one-half months. The pay was scarcely enough for decent self-support and at the end of the two years the girl was in no better condition to earn a living than at the beginning.

"The industrial surverys that have been made by competent investigators in various parts of the country prove conclusively that the public school as now organized is not meeting the needs of large numbers of boys and girls; that it is not fitting them for wage earning; that large numbers leave school as soon as the law will permit, not in the majority of cases from economic pressure, but because of dislike for school; that the occupations entered are easily learned (the sub-normal), mechanical and devoid of eduvational value; that the kind of job secured is largely a matter of chance; that wandering from job to job does not lead to better opportunity; that the pay is small; and that the net result is instability of character.

# FORWARDS' WORK WON THE POINTS

### Their Work Fell Far Behind That of Landers---Frawley Outshone Teammates in Rapid Footing.

The Fulton High school team was defeated last night by the Victor five of Oswego to the tune of 33 to 22, in a fast game.

The visitors' points were made by the forwards, Keenan and Moseberger, whose playing did not surpass that of any of their teammates. Neither man can be compared to such performers as Landers, Mars, Pouchers, and other Oswego players. Frawley was easily the star of the contest, the local boy covering a "mile of ground" and breaking up the rapid-fire passwork of the visitors time annd again. Every basket made by the Oswegonians was preceded by brilliant passwork, the best seen in the city this year.

The local boys were nearly baffled by their opponents' snappy playing, but Frawley was able to prevent a number of field baskets by shifting with the ball.

Although outplayed by the Oswegonians, the outcome of the game was hard to determine until the last ten minutes when the Fulton team seemed to relax, and the visitors secured a safe lead of ten points. With the game practically sewed up, the visitors placed their mascot, a nine-year-old youngster named King in at guard and the lad's exhibition of the game brought forth applause from the Fulton contingent.

A halt was called during the second half when a beneech in the gallery collapsed, precipitating a group of young women upon the floor. Thirty rooters accompanied the winning five to this city. They wore arm bands and kept up a constant cheering and yelling under the leadership of one of the substitute player. The same spirit was taken up by the local rooters and the hall rang with a crossfire of yells and songs. A dance in the library basement followed the game.

Keenan scored the first basket. Reynolds followed with a good shot. Keenan, Moseberger and Martin alternated throughout the period on sc ring and the half ended in the visitors' fiavor, 15 to 11.

The play was halted six different times during the second period to permit of changes in the lineup. Failure to bring the ball up to the basket lost a lot of chances for the local team to score.

The lineup of the teams was as follows:

| F. H. S. | | Victor Five |
|---|---|---|
| Martin | Right forward | Keenan |
| Reynolds | Left forward | Moseberger |
| Wallace | Center | Hess |
| Frawley | Right Guard | Taylor |
| Johnson | Left guard | Schaefer |

Substitutions—King for Brandis. Brandis for Taylor. Rosenthal for Schaefer. Kraus for Johnson. O'Brien for Reynolds. Baskets from field — Keenan (9), Moseberger (5), Martin (4), Reynolds (3), Wallace, Johnson. Baskets from foul—Keenan (4), Martin, Moseberger (3), Reynolds.

Referee—Morin.

### FIVE CENTS FOR HORSE.

**Farmer Made Bid as a Joke, but Creature Was Sold to Him.**

Georgetown, Del.—The lowest price ever paid for a horse in Delaware was received at a public sale of the property of Delaware Burton when David Warrington bought one for 5 cents.

When it was offered for sale the bidding was very slack; in fact, there was no one to start it. Warrington, after considerable speculation, bid 5 cents just for fun and was dumfounded a moment later when it was knocked down to him at that price. The horse put in a full day soon hauling wood and, although it is rather thin, will develop with proper care, horsemen say, into an animal worth $100.

**Girl Shoots a Bear.**

Lock Haven, Pa.—Miss Irene Anderson, sixteen years old, of Morrison saw a big bear headed toward a flock of sheep and with a rifle put a bullet through bruin's heart with one shot.

# LEGISLATORS' WEEKLY PAY

Deputy Attorney General Lewis, former senator, has drafted a bill which he hopes to see introduced in Albany within a few days. It reads:

Each senator and each member of the Assembly shall be paid a salary of $1,500 annually, payable in equal monthly installments, and in addition shall be entitled to receive his actual and necessary expenses while attendin gthe sessions of the Legislature, including traveling expenses, to be paid upon detailed itemized vouchers, verified by the claimant and to be audited by the comptroller. No sensator nor member of assembly shall be appointed to any office nor be employed in any capacity during the term for which he shall have been elected, the compensation for which shall be payable from the treasury of the state. No senator nor member of the Assembly shall be employed as attorney or counselor in the prosecution of any claim against the state during the term for which he may be elected.

Under the present system, the lawmakers receive an annual salary of $1,500 and mileage at the rate of 10 cents a mile to cover the cost of travel to the capital at the beginning of every session and home again, after the Legislature has adjourned sine die. The legislative salary, however, under the present system, is not paid out in weekly installments based on a division of I1,500 into 52 equal parts. The payments are based more or less on a presumption that a legislative session should last 100 days.

At the present session the members are permitted to draw $70 a week. Should the session drag beyond 17 weeks all payments to legislators who throughout the session have been accustomed to draw their $70 a week are stopped because of a rule under which $300 of the salary is held back until the closing week of the session to assure the attendance of all the members to the end, when sessions are protracted.

On behalf of his bill Mr. Lewis said recently:

It was never contemplated that a legislator should be permitted to draw his entire year's salary during the three of four months when the Legislature generally is in session. The senators and assemblymen should received a check of $125 each month of the year. That is the way a private employer would deal with the situation, and the state ought to exercise as much prudence. I think they should receive a reasonable expense allowance in addition to their salary.

### MR. E. L. COLE

The funeral of Mr. E. L. Cole, 84, who died at his home on the East river road Thursday evening, will be held at the Bundyville church tomorrow afternoon at 1:30 o'clock.

Mr. Cole is survived by one son, E. A., and one daughter, Mrs. Bert Grummons. He was one of the oldest residents of this section of the county, and greatly esteemed by everybody.

**Light on Ma.**

Little Brother—Mr. Poseyboy, won't you go and stand before the window? Poseyboy—Certainly, my little man. But why? Little Brother—Oh, ma says she can see through you. I want to see if I can.

### GRANBY CENTER

The following are ill: Mr. Charles Acker, Mrs. C. B. Davis, Mr. David Darling, Mrs. Wm. Backman, Mrs. Herbert Hicks and Mr. Calvin French.

* * *

Mrs. William Cusack visited her daughter, Mrs. Newton Ward, recently.

* * *

Mr. John Cornell had the misfortune to break his arm.

* * *

About forty members of the Brotherhood of the M. E. Church of Fulton visited our Brotherhood on Feb. 9. They furnished a very entertaining musical program, with serveral good "drives" to liven up things. After the music the Granby Center Brotherhood served refreshments. A good time is reported.

* * *

The Ladies' Aid Society will hold a Valentine Social at the home of Mrs. C. B. Davis on the evening of Feb. 15. A good time is expected. Everybody is cordially invited.

# HANNIBAL NEWS

Mrs. Elizabeth Brackett, widow of the late Levi Barckett, died February 4th at Hannibal Centre after a lingering illness. She was well known and loved by a large circle of friends and will be greatly misse din the home and community. She leaves three sons, James L. and John Brackett of Hannibal Centre and aJy Brackett of Mohawk and one sister, Miss Alice Schenck of Fulton. Funeral at the home February 8. Services were conducted by Rev. F. W. Dunning.

* * *

Ernest Clark, son of Mr. and Mrs. M. J. Clark, who edits the Sherridan County Democrat at Gordon, Neb., is a candidate for representative in State Legislature.

* * *

Mr. Frank Haven is very seriously ill Dr. Tillapaugh attends him.

* * *

Mr. and Mrs. I. E. Marsh are quite ill with the prevailing disease, grippe

* * *

Mrs. Frank Hill is recovering from a severe attack of pneumonia.

* * *

Mrs. Jacob Hamm is recovering from her recent illness.

* * *

Mrs. Ezra Tucker entertained the Thimble Club February 11th

* * *

Mr. Fred Lockwood has been confined to his bed with grippe, the past week.

* * *

Rev. W. H. Liggett, wife and daughter, Florence, arrived last week and are located at the Presbyterian manse. He was greeted by a large congregation Sunday morning and evening.

* * *

Mrs. Jasper Hopper is the guest of her father Lafayette T. Moore at Kirkville, Onondaga Co.

THE PASSING OF THE HOUSEHOLD DRUDGE

A woman need not make herself old and careworn with hard manual labor nowadays, *because*---

The up-to-date housewife does her work with the least expenditure of time, energy and money by utilizing modern Electric Labor-saving Appliances such as the Washer, Electric Iron, Cleaner, Sewing Machine Motor, Polisher, Etc.

Is your home wired for Electricity? If not, let us give you an estimate.

*"The Right Way is the Electric Way"*

# WE WANT READERS TO KNOW IT

## The Evening Times Has Been Issued More Than 350 Consecutive Days

From the very beginning it was said this could not be done---in Fulton. The city was described to us as a "Ten-,Fifteen-,Twenty-,Twenty-five-,and Thirty-Cent-Town—Nothing Over Thirty Cents."

It has been proven that the *informant was wrong. His estimate was a guesstimate.*

Knowledge of the Daily Newspaper Business is the backing for the foundation of Fulton's First and Only Daily Newspaper—which is destined to become a successful business.

# THE EVENING TIMES

## OF FULTON, N. Y.

Will become sufficiently broad in its scope to meet every need of the people of this vicinity. Why? Because its underlying principle is right. There's no Guesstimating in the assertion. THE FULTON EVENING TIMES is for

*FULTON--First, Last and All the Time*

# ROMANTIC BIRTH OF PHOTO-PLAY BUSINESS

AMAZING NARRATIVE OF HOW THE FIRST ACTED STORY WAS FILMED FOR THE SCREEN.

## CHARLES PATHE THE PIONEER

**Behind It He Put His Dynamic Personality and Transformed Toy-Like Idea Into a Mammoth Industry.**

The romance of a great business often exceeds imagination and proves more interesting than fiction. The hesitating beginning, the slow and stumbling progress, the costly mistakes, the various ailments which so often prove fatal to an infant industry do not make an impression upon the mind of a casual observer. It is only when the process of evolution is complete and the great fabric has been woven that he notices and then, forgetful of the past, he is prone to believe that, like the dragon's teeth of mythology, a particular business has sprung into life fully equipped and formidable in the panoply of might.

Remembering how much the motion business, now ranking fifth in importance of all industries of the United States, owes to the House of Pathe, a representative of this paper

CHARLES PATHE

during a recent trip to France made a visit to several of the huge factories and studios of that great international organization.

Located on the Boulevard des Italiens, "the glory of Paris and wonderful centre where the five parts of the world meet together," are the head offices of Pathe Freres, sumptuously housed in a building which by its beauty and permanent character might well be a great art museum or government offices. Here alone in times of peace are housed some four hundred employes, a small portion of the army of nearly 10,000 scattered all over the world who draw their salaries in Pathe envelopes. In Vincennes, the birthplace of the motion picture industry, the city which saw the early struggles of the Brothers Pathe, are several of their huge factories and studios covering an area of 28,000 square meters and employing over seventeen hundred employes of both sexes. Here are colored by the Pathe process these beautiful pictures of which the "Beloved Vagabond" is such an excellent and recent example. In these factories is also produced raw film stock amounting to over 300,000 meters a day, a quantity which makes Pathe one of the principal sources of raw film material in the world. Other great studios are located in Montreuil-sur-Bois and Nice, and in them daily, before the war, met the greatest actors and actresses of France. At Joinville-le-Pont is another huge factory with a payroll of 1,100 persons, where films are developed, edited, printed, and then forwarded to all parts of the world. In Paris is still another, where are manufactured cameras and accessories, employing nearly a thousand persons. Remembering that other large factories are located in England, Russia, Italy, the United States and other countries, as are studios and selling organizations, one finds it difficult to believe that this great organization is only about twenty years old, and represents the growth of an idea in the minds of two men, poor of pocket but large of vision.

Harking back those twenty years, Drama, Comedy and Opera sat all powerful and apparently inviolate on the throne of the Speaking Stage, and he would have been a rash man, indeed, who would have prophesied that they must eventually yield supremacy to the long rolls of celluloid film and the flashing of myriads of tiny pictures upon a snowy screen. But Genius gives Vision and to Messrs. Charles and Emile Pathe we must concede true Genius. With two other brothers they put all their savings into a business which then was but a mere Idea. The combined capital amounted to but $2000 and after only three weeks the other two brothers, horrified by their rashness, withdrew, taking their money with them. Messrs. Emile and Charles Pathe, who held true to their faith and stuck to their guns, today draw $100,000 per year apiece in salaries alone! Opportunity had called to them and they had heard her voice.

The original motion picture was imprisoned in a wooden cabinet where one was privileged by depositing a coin to see a succession of tiny photos tumbling over one another, and giving the semblance of life action. The original idea had been Edison's, and in it Charles Pathe had recognised the germ of great things. He rented a small store and placed within it two of those machines. The venture proved profitable, but was handicapped by the fact that there was but one picture to a machine. To make patrons return again and again, a change of program was a vital necessity. To secure his program Mr. Pathe purchased eighteen more machines and placed them in eighteen different cities. From week to week he switched his pictures in rotation, and then and there was born the modern film exchange idea.

With his profits he purchased a motion picture camera,—one of the very first to be made,—and started making his own pictures. His subjects were primitive,—a man running, chickens feeding, cattle grazing, and the like,—but he was developing his Idea and for that reason his work was important. These embryonic dramas were in short lengths, ten, twelve, fifteen feet at a time, but the idea of projecting them upon a screen instead of imprisoning them in a box helped tremendously. He took his films in his pockets and carried them (traveling third class, if you please) to London, Berlin and Rome and sold them there. By degrees his films lengthened and his market strengthened, but for weary months he was his own camera-man, shipping clerk, manufacturer, demonstrator and salesman. Man of many activities as he was, his brain could not be idle. The idea came to him that a story could be worked out upon the screen—and that that story would possess a far wider appeal than the simple little facts of everyday life which he had been filming. To think, with him, was to act. He employed Max Linder, a threadbare young actor, for $4 a day to act out a crude scenario, and Louis J. Gasnier, a stage manager and play producer of Paris, to direct the taking of the picture. That short picture was the first acted story ever to be put upon the screen, and from it the modern photoplay has developed. Max Linder jumped to fame and fortune and is still considered the best pantomime comedian in the world. At the outbreak of war his $4 per day had grown to $70,000 per year. L. J. Gasnier, the first director, is today one of America's prominent film men and still identified with the Pathe organization.

Still another great idea came to Mr. Pathe when he considered the possibility of putting news into motion pictures. The idea, like all of his ideas, proved practicable and successful, and the News Weekly came into being. Most persons, in spite of the competition which sprang up, still associate the news film in their minds with the old Pathe Weekly, the father of them all. Today there is the Pathe News in the United States, the Pathe Gazette in Great Britain, the Pathe Journal in France, the Pathe Giornale in Italy, and still another with a jaw-breaking name in Russia.

Thus are great businesses born; beginning with an Idea some strong man like Charles Pathe takes it, molds it, changes it, improves it, and makes it his own. Behind it he puts his own strong will and dynamic personality. He breathes upon it the breath of his genius and like Galatea it becomes alive, throbbing with beauty and energy, an entity and no longer an Idea!

PEARL WHITE

Pearl White, who will star in Pathe's next serial, "The Iron Claw," says the highest compliment of her career was paid by this serial being written for her. It was the result of multitudes of letters from all over the country asking for her to be starred in another serial.

# A Sailor's Confession

By DWIGHT NORWOOD

There is a record of the ship Julia Sturdevant having been burned at sea with all on board except five of the crew, who were picked up in a lifeboat while the vessel was burning off the coast of Korea. This happened many years ago when I was a young man. I am now a ninety year old hulk, laid up at the Sailors' snug harbor, ready for the junkheap. The Julia Sturdevant was set afire, and I applied the torch that burned her. Before sailing on my eternal voyage I have to confess this fact and tell how I came to do it. There is no sin on my conscience in that burning, but there are others that are a hundred times worse than burning a ship.

When I stepped on the Julia Sturdevant I was twenty-two years old. We sailed from Boston to Japan, taking out a cargo such as the little yellow men needed then, but don't need now, for that wasn't long after Commodore Perry sailed in among them and began their civilizing. The Sturdevant was one of the early steamers, having paddle wheels and sails, and her engine was a primitive one. Any well rigged ship in a stiff breeze could outsail her.

We were plowing along through the China sea against a stiff nor'easter, when before the wind came a Chinese junk. Before she reached us she hoisted the skull and bones and fired a shot at us as an order to stop. We hadn't so much as a salute cannon aboard and few small arms. There were ports for four guns on each side of the junk, and her decks swarmed with men. We saw it was all up with us, and our captain surrendered with a condition that all our lives be spared.

As soon as the pirates came aboard they began to look the vessel over and concluded to divide their force, running her as well as their own ship. Without regarding the condition they had made, they forced all the crew except five of us to walk the plank. What they kept us five for was to direct the working of the ship, since they knew nothing about the use of steam. Two of us were the engineer and his assistant. The other three they kept to post and help them in working the ship's sails that were entirely unlike those on the junk.

Fifteen of them stayed on the captured ship, taking aboard two guns and plenty of small arms, while the others sailed away on the junk. We white men were obliged to obey their orders or walk the plank like the others. And that's the crime I have to confess. For weeks, when they were overpowering unarmed vessels, looting and murdering, we were doing our part of the work. What else could we do? We could have refused and given up our lives, and it's been troubling me for more than half a century that I didn't choose the better part.

I'm not going to name all the crimes we committed because we had to. I'm simply going to tell how we finally made our escape. After awhile we agreed that we would pretend that we were contented with our lot, ask for our share of the plunder and do everything else we could to put the yellow devils off their guard. One thing we were afraid of. There was one ship that we tried to capture and failed. We boarded her and were fighting hand to hand with her crew when they saw us white men fighting with the yellow ones. We were about to join our own color when, fired with hatred against us for being part of a Chinese pirate crew, they made a desperate dash and drove us back on to our own ship. After that we knew that if we escaped the pirates and were recognized by any of the men on that ship we would dangle at a yardarm.

The next ship taken had a lot of liquor aboard, and every pirate got drunk. We watched our opportunity, pretending to drink and be drunk like the others, till they were all laid out. When eight of them were either asleep or stupid with liquor below and the rest being in the same condition on deck, we clapped down the hatches on those below. What we did to those on deck I don't mention, except that they didn't trouble us any more.

We hadn't more than fixed them all when looking ahead we saw a ship coming and made out the stars and stripes at her peak, for in those days our flag was often seen on the ocean. Some of us thought that if she overhauled us and we told our story we would be believed. Others didn't think we would. Some day some of us might meet some of the crew of the ship we had boarded. I made up my mind what to do and without saying anything got a lot of tow and oakum together and set fire to it. The wind was high, and in fifteen minutes the whole ship was ablaze. We lowered one of the boats, got into her and pulled for the Yankee ship.

When we reached her we reported that we had been afire for three days and if we hadn't met the Yankee in time we would have been lost. And that's how the ship Julia Sturdevant came to be reported burned at sea with five of the crew saved. It was never made clear what became of the rest of the crew. I managed that story by saying that when the fire finally got ahead of us the others were cut off from the boats. Some were burned below and some were drowned. True enough the pirates below were burned.

I met one of the crew of the ship we had boarded long afterward in Hongkong. He didn't remember me, but you'd better believe I remembered him and got out of his way as quickly as possible.

## A PAQUIN MODEL.

Glace Kid Is Put Up In a New Frenchy Way.

SO V. BY ULTRA

Please notice the simplicity and distinction of the perfect tailoring this coat has had lavished on it. The shoulders are finished with a cape effect, held down by two little buttons. With this wonderful garment goes a unique beaver tricorn, the only trimming being twin hatpins of Roman pearl mounts smartly set in place.

## FOOD AND CHARACTER.

How Different Diets Bring Out Various Traits In Nations.

It is proved that today the wheat eating nations lead the meat eating nations. There are some interesting observations on the subject.

The succulence and flavor of meat depend not only upon careful cooking, but on what the animal was fed with. In the same way the meat and food we eat influence our characters.

Englishmen are "beef fed," and to that they owe their stolid and tolerant characters, slow to move to enthusiasm, with a great liking for compromise and toleration and a big facility for forgiveness.

The porridge of the Scot makes him argumentative and opinionated, and the restless vivacity of the Irishman is due to his potato diet.

A famous actor carried his belief in the influence of food so far as to vary his menu according to the character he was playing, eating pork for tyrants, beef for murderers and mutton for lovers.

This may have been taking matters to extremes, but it is a fact that mutton lovers are generally of a quiet temperament and given to sentiment, while big beef eaters are more often than not of a choleric, fierce character.

Observations of regular pork eaters have not justified the allegation that they are tyrannical, but certainly pork is different from other meats, and noted bullies have been extraordinarily fond of pork chops. Fat bacon produces a lethargic character—slow in thought and action.

It is alleged that vegetarianism makes clear thinkers, but moody characters.

Last, but not least, big bread eaters are of a dominating character and become natural leaders.

### Ice Cream Cake With Coffee Filling.

Whites of two eggs, butter or lard size of walnut, one cupful of sugar, one-half cupful of milk, one and one fourth cupfuls of flour, two teaspoonfuls of baking powder, a little salt and vanilla. Sift the sugar into the beaten whites of eggs. Make three layers. For top icing use confectioner's sugar wet with the clear coffee saved.

Coffee Filling.—Two teaspoonfuls of coffee, two-thirds cupful of cold water. Steep ten minutes and strain in coffee cup, saving one tablespoonful in another dish and fill cup with milk. Mix yolks of two eggs, two tablespoonfuls of flour, one-half cupful of sugar, one tablespoonful of melted butter. Add to coffee and cook in double boiler as you would a boiled custard.

### China Book Ends.

Book ends are always interesting, and unusual ones are sought after as gifts for all occasions. There is a new set in china which is particularly pretty. The design shows one book lying flat, its covers of dark gray, with yellow edged leaves, and another book, standing upright on the lower book, is partly open. The ends are quite heavy enough for all purposes, and the coloring of the china is particularly attractive.

# HOME ECONOMICS.

Some Modern Ideas About Everyday Problems.

## PARTNERSHIP IS THE IDEA.

How Financial Relations In Households May Be Arranged to Meet Practical Demands; Also the Basic Elements of Good Taste In Dressing.

[Prepared by Kansas State Agricultural college.]

"Home economics means more than just cooking and sewing. It is really a social study which meets the needs of the people and solves their problems," says Miss Helen Hahn, instructor in home economics in the Kansas State Agricultural college.

"This study is one of the greatest of the day. More persons are becoming interested in this work and are desirous of finding out its real significance. The teaching of home economics is being made more interesting, as the work is being vitalized—that is, connected with the study of the human side of life."

The home should be made a business proposition. Husband and wife should form a business partnership and should be fully qualified to meet the demands made upon them, both remembering that money well spent is money well earned. In this new education that is beginning to hold up its head for recognition a man will be taught that he can never hold the love and respect of his wife unless there is to be established the proper financial relation between them.

Individuality, simplicity and quality of material are elements that must be considered by the girl who aspires to be well dressed, in the judgment of Miss I. Florence Hunt, assistant in domestic art in the Kansas State Agricultural college.

"Too much stress cannot be placed on the importance of developing good taste," says Miss Hunt. "Good taste includes color, line, form, material and suitability to the occasion upon which the dress is worn. Dresses for school, business or street wear or for dress affairs should, of course, be distinctive.

"Then the costume must be suited to the individual according to line and form. A tall person cannot wear the same style as the one of shorter stature. The same principles also apply to materials used.

"The study of color harmony is made practical by combining samples of materials and designing appropriate costumes. There are materials which will not combine well and colors that should not be used together. Another problem is the study of the design principles—the relation of rhythm, balance and harmony to dress."

## FOR HORSEWOMEN.

A Correct Costume That Speaks of the Morning Canter.

Brown ribbed suiting develops this well cut habit, a simple coat with self

THE EQUESTRIENNE.

revers and a side saddle skirt over Russian leather tan boots. A golden brown vest of glazed leather shows just below the cutaway, and a brown derby with heavy gloves and a rattan crop, completes the costume.

### Plymouth Sauce.

Work one-fourth cupful of butter until creamy and add one-half cupful of brown sugar gradually while beating constantly; then add two tablespoonfuls of vanilla, two eggs well beaten and one-half cupful of milk. Cook in a double boiler, stirring constantly until mixture thickens. Pour mixture gradually while beating constantly on whites of two eggs beaten until stiff.

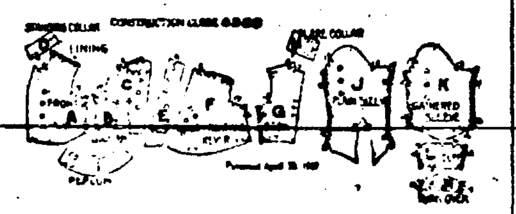
## Lovely Frock of White Crepe.

White cotton crepe frock distinguished by frills of narrow lace and a vest and cuffs of Madonna blue silk.

Because of the war dyes are difficult to get, hence white is to be extremely fashionable for spring and summer. This lovely frock is carried out in white cotton crepe trimmed with soft lace. Of particular interest is the waist, which may be used separately or en suite. In medium size the costume requires 6 yards 44-inch material, with ¾ yard Madonna blue silk for the vest and ⅝ yard white silk for revers and collar. Separately the waist calls for 1½ yards 44-inch crepe.

A good lining is necessary for the waist, and this is made first. Take up dart in front as perforated and face front from neck edge to lower line of small "o" perforations. Turn hem at notches; center-front indicated by small "o" perforations. Close seams as notched, close center-back seam.

Now underface the front of the outer front, about 1 inch inside front edge; roll back on small "o" perforations to form rever, and stitch upper and lower edges to position. Gather shoulder edge of front and lower edges of front and back between double "TT" perforations and 2 inches above lower edge. Adjust vest to position underneath front, notches at shoulder edges even; bring single large "O" perforation to



corresponding perforation in front and back. Small "o" perforations in vest indicate center-front. Turn under shoulder edge of back on slot perforations, lap on front, notches and edges underneath even; stitch along the folded edge and ⅜ inch back. Close under-arm seam as notched.

Next, plait the flare collar on slot perforations and bring folded edge to corresponding small "o" perforations and press. Sew to neck edge of outer front and back, notches and center-backs even, easing in any fulness. Arrange on lining, center-backs and under-arm seams even; stitch lower edges together, bringing folded edge of rever to center-front.

Close the sleeve seam as notched and gather lower edge between double "TT" perforations. Close seams of cuff and turn-over as notched; join together as notched. Sew cuff to sleeve, notches and seams even. Sew sleeve in armhole, notches and small "o" perforations even, easing in any fulness.

The peplum may be omitted, if desired, but it is very graceful in its lines. To make it, turn hem at front edge at notches, close center-back seam. Sew to lower edge of waist, center-fronts and center-backs even, leaving the vest free.

Pictorial Review Waist No. 6582. Sizes 34, 36, 38, 40, 42, 44, 46, 48 and 50 inches bust. Price, 15 cents.

Skirt No. 6585. Sizes [illegible] to [illegible] inches waist. Price, 15 cents.

## HOLDS RECORD FOR SERIAL STARRING.

Pearl White, world famous as the heroine of the serials, "The Perils of Pauline" and "Elaine," will be featured, it is announced, in a new serial to be called "The Iron Claw." Miss White thus enjoys the distinction of having starred in more serials than any player before the public.

She has for several years been one of the three or four of the best known stars in the business, practically all of which time she has been identified with Pathe pictures. In fact, "The Perils of Pauline" may be said to have been her first great chance and the starting point of her fame.

She was born in Missouri, and broke into things theatrical, by the "Uncle Tom's Cabin" route, that great nursery of histrionic talent. For several years she was connected with various road shows, and then obtained an engagement with a circus. For two or three years she worked under "the big top" and then went back to the stage where she has been ever since, playing with some of the best and some of the worst companies in existence, as she expresses it.

Some three years ago she received an offer from Pathe to appear in pictures, and with Pathe she has been ever since with the exception of short intervals.

Miss White possesses a marked individuality upon the screen—she resembles no other player before the public. Her popularity is tremendous as is amply evidenced by the bewildering amount of her daily correspondence which comes from all parts of the civilized world. It is said that it was because of the number of letters received from admirers all over the country begging that she be placed in another serial that Pathe selected her for "The Iron Claw."

### Whale Sausage.

In Norway it has been found that whale meat, vast quantities of which have formerly been thrown away, makes a palatable and nutritious sausage. The meat has proved so successful for this purpose in Scandinavian countries that engineers are now working to develop machinery for cutting up the huge leviathans and working their carcasses into sausage.

### War and Art.

The Metropolitan Museum of Art at New York has suffered three financial blows from the war, for the contributions of art patrons are smaller, there is no chance of the city's annual gift of $200,000 being increased, and the membership of the institution has fallen off by more than a thousand.

## WINTER COMFORT.

A Beautiful Coat For All Frosty Outdoor Sports.

This smart motorcoat is cut of sage green velour delaine, with a full skirt

A LA MODE.

that drapes from a flared top. Big self buttons and patch pockets are interesting details, while beaver bands finish the cuffs and neck. Warmly lined, this coat describes itself when good taste and comfort are concerned.

Even in Germany the Paris fashions remain pre-eminent. People are apparently not as angry at one another as they were a year ago.

### Object, Matrimony.

"So you don't believe in advertising, eh?" scornfully remarked the up to date business man.

"No, I don't," insisted his and eyed neighbor. "I got my wife that way."—Judge.

### The Candy Corner.

PEPPERMINT.—One and one half cupfuls sugar, one half cupful boiling water, six drops oil of peppermint. Put sugar and water into granite saucepan and stir until dissolved. Boil ten minutes; be sure it really boils; remove from fire, add peppermint, and beat till smooth enough to drop from tip of spoon on wax paper. Get some of the vegetable colors sold in grocery stores and color some of these a light green; flavor some others with rose and color pink.

The small jars of coloring are harmless and will make your candies look quite professional.

Molasses Candy.—Two cupfuls Porto Rico molasses, two-thirds cupful sugar, three tablespoonfuls butter, one tablespoonful vinegar.

Put butter in kettle, place over fire, and when melted add molasses and sugar; boil and stir until, when tried in cold water, mixture becomes brittle; add vinegar just before taking from the fire. Pour into well buttered pans. Pull when cool enough to handle; cut into pieces with large shears and place on buttered plates till cool; then wrap each piece in paraffin paper.

Puffed Rice Brittle.—This is another wholesome candy relished by every one—crisp the rice in the oven before using: One cupful of granulated sugar, one half cupful of water. Boil together five minutes; add two tablespoonfuls of molasses, butter size of walnut, half a teaspoonful of salt. Boil until it hardens in cold water. Take from fire and stir in one half package puffed rice. Pour into buttered pans.

Another advantage of making these candies at home is the inexpensiveness of them as compared with the rich candies one buys, often made of inferior materials. The pleasure you will find in making the candy for your family, or in having some members of the family help you make it, will add to the satisfaction.

Malted Milk Fudge.—One-half can condensed milk, two-thirds cupful of water, one tablespoonful of butter, three heaping tablespoonfuls of malted milk, two cupfuls of granulated sugar, one teaspoonful of vanilla, two ounces of unsweetened chocolate.

Boil ten minutes, stirring continually while cooking. After removing from the fire stir until mixture begins to thicken. Pour in a shallow dish, previously buttered, to harden. Omit chocolate if you wish a plain vanilla fudge.

*Anna Thompson.*

### Gypsies And Death.

The custom of placing the property of the dead in their graves has always been followed by the true Romany gypsies. It is due to some old tradition of ill luck attending the possession of an article whose former owner is gone, and much valuable property is buried in this belief. There is also a sentiment among gypsies against the possession of anything that has belonged to a dead person, because it serves to remind the living of the departed and inspire in them a dread of death. The custom of burying their property with gypsy dead dates from the earliest history of the Romany tribes.

### "Nobody Home," In Two Acts.

Act 1.—Opportunity knocks. "Who's that?" asked the wife of her husband.

"Nobody. Maybe a beggar. Let him knock. Nobody home," replied the laggard husband.

Twenty years have elapsed.

Act 2.—"What's that noise?" asked the old man of his old wife.

The noise is repeated. "There it is again. Go to the window and see what it is," said the old husband.

Wife goes to window and peers through the tattered curtains. Comes back. "It is the wolf," she says. "It won't go, as did the other visitor we turned away."—Richmond Times-Dispatch.

### Cute Little Girl.

One day while Katherine's mother was ill a cup of beef tea was prepared for her, but Katherine fancied it and drank almost all of it. Her father was about to scold her when her mother said:

"Never mind; it does me just as much good to see her drink it."

Shortly after this a dose of castor oil was prepared for Katherine, and she poured it into her doll's mouth.

"Why, Katherine," said her astonished mother, "what did you do that for?"

"That's all right," Katherine replied. "It will do me just as much good if she drinks it."—Boston Herald.

## TODAY'S FASHION NOTE

Boldly decorated, yet developed along extremely simple lines is this dress. It looks well in linen, silk or satin and lace or braid may be substituted for the embroidery, if desired. In medium size, 6 yards 36-inch material are required for the frock.

Pictorial Review Costume No. 3519. Sizes, 34 to 46 inches bust. Price 15c.

Pictorial Review Patterns may be procured at the J. R. Sullivan and M. Katz & Co. Department store, Fulton.

## THE DRESSY SWEATER.

One of the Charming Novelties For Winter Days.

## .S HELD FOR THEFT OF REVENUE STAMPS

Chicago—Three men and three women alleged to have blown up the vault of the United States collector at St. Paul on January 6th and to have escaped with $3,000 in money and negotiable revenue stamps valued at $577,357, were arrested here today. Certain papers found on the person of one of thep risoners suggested connection with the robbery of the West Minster branch of the Bank of Montreal.

The arrests and the recovery of two trunks full of revenue stamps were said by Michael Igoe, of the United States District's Attorney's office to be t.ehmost important made by Federal agents in years.

The prisoners, who live in Chicago, are Michael J. Flannigan, saloonkeeper, and wife; Edward Leonard, alleged ex-convict, and wife; John J. Zack, and wiife.

## LAYMEN TO HOLD LARGEST CONVENTION

New York—One of the most momentous religious gatherings since the World Missionary Conference in Edinburgh in 1910, will take place when the National Missionary Congress meets at Washington next April, according to announcement made today by the National Missionary Campaign.

The congress will be the climax of thirty-seven conventions now being held in the United States under the direction of the Laymen's Missionary Movement and the chief topics of discussion will be mission work in the United States an, din non-Christian lands and the future activities of laymen in all branches of mission work.

The congress will be limited to 2,000 delegates from the various Protestant denominations throughout the country and wil lbe in session from April 26th to April 30th.

## MR. GARRISON DENIES H EWILL FIGHT WILSON

New Fork.—Mr. Garrison intimated, in an interview heretoday that he might "do something" in the matter of giving support to the movement in favor of a continental army, the issue upon which hisr esignation hinged. This intimation came in response to a question put by newspaper men as to whether he would "give his moral support to those who continue urging thep olicy of a continential army.' '

"II cannot answer that question," said the former secretary of war, "because it would infringe upon politics. I say this to you now so that later if I do decide to do something you will not say that I tried to deceive you."

## EIGHTH GRADE PUPILS ENJOYED SLEIGH RIDE

The eighth A grade at Phillips st. school had a very enjoyable straw ride to Bowens Corners last night. The party stopped at the home of Mrs. Mayme Fuller. They were chaproned by Mrs. Mabel Coode, Miss Ella Nodda and Miss Mary Mehegan, all local teachers. Games and music and light refreshments were enjoyed at Mrs. Fuller's home and then they journeyed back to Fulton and enjoyed supper at the home of Mrs. Dewey, the mother of one of the members of the class. Games and music followed the supper and all appreciated the very good time.

### Hammers.

Hammers were originally fashioned from the model of an outstretched human arm and fist.

# THREE WAR HEAD POSSIBILITIES

## Lane, Houston and Polk, and Score of Lesser Lights Suggested as Garrison's Successor.

Washington—President Wilson left Washington tonight with Mrs. Wilson for a week-end cruise down the Potomac river and Chesapeake bay on the naval yacht, Mayflower, during which he will consider the selection of a successor to Lindley M. Garrison as secretary of war. He expects to return late Sunday night or early Monday morning.

It was said tonight by the President's advisers that he wished to reach a decision as quickly as possible, and that he probably would be ready to send the nomination to the Senate early next week. An assistant secretary to succeed Henry Breckenridge in all liklihood will not be named until the new secretary is consulted.

Secretary Lane, of the Interior Department ;Secretary Houston, of Agriculture and Frank L .Polk, counsellor of the State Department, are understood to be under serious consideration, and the names of twenty or more other men have been suggested to the President.

These include formeer Governor Hanmon, of Ohio, Colonel E. M. House, former Governor Walsh, of Massachusetts; former Mayor Baker, of Cleveland, Senator Stone, of Missouri, Senator Chamberlain, chairman of Senate Military Committee; Reprsentative Hay, chairman of the House Military Committee, and several other members of Congress.

The President is said to be desirous of naming a man already in touch with them ilitary situation, who could take up immediately the drecton of the War Department where Mr. Garrion left off. It is intimated by his friends, however, that he may select someone not yet mentioned publicly in connection with the position.

## MISS RUTH ALLEN ENTERTAINS CLASS

Thirty members of the Elizabeth Robertson Sunday school class spent yesterday afternoon and evening at the home of Miss Ruth Allen in Oneida st. A business session was held and the guests sewed in aid of a poor family.

An elaborate dinner was provided, the decorations being appropriate to Valentine day. The announcement was made that the next meeting will take place with Mrs. Charles Johnson, 5th st.

Miss Allen was assisted in receiving by Mrs. Russell Rogers, Miss Jane Waugh and Mrs. J. Hollingsworth.

## GIFTS OF TIN FOR THE FESSENDEN HOME

Dr. and Mrs. F. C. Fessenden, of E. 1st st., were given a surprise by a number of friends last night As a hoax the guests carried articles of tinware for use in the Fessenden home

Cards were played and a supper served Dancing and music were enjoyed. Mrs. B. Stevenson playing the piano while Mrs. Fessenden gave vocal selections.

The guests included Mr. and Mrs. Arthur Guernsey, Mr. and Mrs. M. E. Reynolds, Mr. and Mrs. Lou Pollack. Mr. and Mrs. Ray Eaton, Mr. and Mrs. B. Stevenson. Miss Madge Benz and Mr. Thomas Farrell

Mrs. Meeks—Of course. Why, you couldn't exist at that altitude, John.—Yonkers Statesman.

## HID HUSBAND'S FALSE TEETH

### Jefferson Swears That Is the Way His Wife Got Money From Him.

Pittsburgh.—It behooves all married tightwads who wear false teeth to beware. Often the subject of ridicule, artificial teeth have at last been found to serve a practical purpose in domestic life.

Frank Jefferson in divorce court told a harrowing story of the manner in which his wife had frequently forced him to "come across" with money by the simple expedient of taking his false teeth and hiding them.

The odd thing, to Jefferson's way of thinking, was that even when he waxed angry his wife would refuse to return his teeth. Only Uncle Sam's coin of the realm would persuade her that her husband's molars were essential and necessary to his daily existence.

Mrs. Jefferson's side of the case was terse and to the point—her husband had refused her the money she believed she was entitled to as lady of the house. Consequently she took these measures to get it.

## USES SPOONS TO SAVE LIFE.

### Knife and Rubber Tube Also Doctor's Implements in Operation.

Elkins, W. Va.—With two tin teaspoons, a pocketknife and a piece of rubber tubing as his instruments Dr. H. W. Daniel of the Elkins hospital performed an operation on a woman apparently dying of diphtheria and saved her life, it was learned. Called to the mountain home of Mrs. Thurman Coberly, the doctor found the woman unconscious.

Having no surgical instruments with him and realizing that death was near, he made an incision in the woman's windpipe with his knife, and, using the teaspoons bent double as retractors, he inserted the rubber tube. Respiration was restored, and within a few hours the patient regained consciousness, and it is said that her recovery is expected.

## ODDLY HEARS OF LEGACY.

### Benefactor Learns of Bequest After He Nearly Drowned.

Gloucester City, N. J.—Through an account published of the fact that he had been rescued from drowning when he fell overboard while unloading coal at the Gloucester ferry wharf, Frank Taylor of 402 South Fourth street received word that he had been left a legacy by a relative in South Jersey, who died several months ago.

An aunt wrote from Deerfield, N. J., stating that they had been endeavoring to find him for several months and that they had read in a Philadelphia newspaper of his accident and hastened to notify him that when the relative died he had been mentioned in the will for a portion of the estate, which consisted of a farm and agricultural implements.

# FEARED THROUGH LIFE SHE'D BE BURIED ALIVE

## Strange Provisions Made In Will of Woman.

Los Angeles.—The will of Mrs. Laura Hemans White, who died in Pittsburgh nearly a year ago, has been received by Public Administrator Bryson in view of the distribution of the estate in Los Angeles county. The city of Los Angeles desires to purchase property belonging to the estate, at 3721 Downey avenue, now North Broadway, for school purposes.

Before the deal could be closed it was necessary to have the will, because a clause bequeathes the property to Mrs. Apollonia P. Melber for life. After Mrs. Melber's death the property is to go to Mrs. Katherine L. Hahn, a niece of Mrs. Melber and daughter of Victor Hahn.

Because of her fear of a premature burial Mrs. White provided unusual means to determine that the spark of life had left her body before it was cremated. In her will she declared:

"Having been all my life subject to bondage through fear of premature burial I will my body be kept until evident signs of decomposition declare themselves—at least a week—that it be visited and carefully inspected three times daily, for which the person performing this office shall, upon making affidavit that it has been faithfully performed, receive the sum of $50. Just before cremation it shall be stabbed three times through the heart by a duly accredited physician, who shall receive therefor the sum of $20."

A trust provision prohibits distribution of the estate for ten years. Among the holdings are a Bakersfield ranch, lots in San Diego and lots at Sunset beach and La Canada park.

### Mighty Glacier Caverns.

It has long ago been discovered that water produced by the melting of glacier ice in summer flows down through crevasses to the bottom of the glacier and, forming a channel by erosion, emerges often as a large stream. In the arctic region these phenomena take place on a very large scale. The Danish expedition to the northeast of Greenland, conducted by Mylius and Erichsen, discovered and explored vast caverns thus formed by glacial streams. Some of these caves are sixty to seventy feet in height and more than a mile long. In winter the streams cease flowing, but the caverns or tunnels remain ready to receive the streams of the following summer.

# Long Cut Tobaccos Are Not "All Alike!"

In LIBERTY you get *quality*—in other brands *quantity*. You'll get more good smokes and chews out of a package of LIBERTY than out of a "bigger looking" package. Here's why:

*Look* at LIBERTY—long, rich, silky, fragrant shreds that make your mouth water.

*Feel* LIBERTY—smooth and soft to the touch—no hard stems there! Can't be—'cause they're all picked out *by hand*.

*Try* LIBERTY—smoke it or chew it—right away you'll know you have a big-muscled, two-fisted *man's* tobacco.

# LIBERTY

## Long Cut Tobacco

is made of good old Kentucky leaf. Only the long, whole leaf is used—no short or broken leaf. That's why there are no short cuts in LIBERTY and why LIBERTY is the one real *long* cut tobacco.

Moreover, the ageing we give this leaf up to 5 years, puts satisfying richness and snap into LIBERTY that give hearty smokers and chewers the man-size satisfaction they want.

You get more good smokes and chews, and more satisfying pleasure out of a package of LIBERTY than any other Long Cut. Try it cut and see!

## War Flyers Mix Tragedy and Comedy In a Day's Work.

## TALES OF TURKISH NERVE.

### They Take a Chance With Death Just For the Sport of the Thing, While the Germans Are More Cautious—How Aviator Fooled British and Attacked Vessel.

"Humors of War In the Air" is the subject of an interesting article in the Daily Express by Mr. C. M. Grey, editor of the Aeroplane, in which he narrates an aviator's version of the old farce "Box and Cox" and some incidents of Turkish "cheek."

"A story that appeared in a Turkish communique the other day relating how a Turkish aviator dropped bombs near one of the allies' cruisers and caused her to change her course, after which he attacked a destroyer with his machine gun," he writes, "is probably something of an exaggeration, but it would be quite a mistake to put it down as an absolute fabrication because people who have returned from the Dardanelles have quite a high opinion of the Turks as fighting men and even respect their aviators. The Turkish communique refers to the aviator as a Turk, but the pilots of the Turkish aeroplanes have been Germans chiefly.

"There is one incident, however, related to me by an officer who has just returned from Gallipoli of which the hero was more likely to have been a Turk than a German, for the German, although he may on occasion fight quite well, does not apparently believe in taking chances purely as a sport.

### The Diving Aeroplane.

"One night when things were fairly calm both in the air and on the ground the sound of an aeroplane engine was heard approaching the British lines. It drew nearer and nearer, and it was evident from the sound that the aviator was flying very low. Suddenly he appeared over a certain part of the British camp so low that he could have been hit with a revolver if anybody had seen him in time. As he went he dropped several bombs, which did no particular harm. Half a dozen officers rushed out of their tents and began firing at him. The sound of his engine stopped, and his machine was seen to throw up its tail and dive down over the cliff at the edge of the plateau on which the camp stood.

"Everybody thought he had been hit and had fallen into the sea or on the sand just over the cliff edge. Much to their surprise, a few seconds afterward his engine was heard running again, and a minute or so later there was a burst of firing a mile or two out at sea.

"Next morning a destroyer came in and said that, hearing the noise of bombs in the camp, some of the officers had come up on deck and were looking up at the shore when suddenly an aeroplane dived off the cliff, flew straight at them almost level with the water and as it passed them raked them from end to end with a machine gun.

"The seaplane pilots also have their humorous incidents. Some little time ago one of the smaller seaplanes was getting off the water when a wave struck it, and it turned over on one side and dived head first.

"As the machine struck the water the passenger was thrown clear, but the pilot, who stuck to his lever, went under with the machine and was more or less trapped. The passenger naturally came up first and, not seeing the pilot, took a long breath and dived under the wreck to h[illegible]. Meantime the pilot, h[illegible]ased himself from the machine, came up to find himself under one of the wings. He worked along this till he got to the edge and came to the surface apparently just about a second after the passenger had dived. Not seeing the passenger he also took a deep breath and dived to rescue the passenger.

"By this time the passenger had reached the limit of his diving capacity and came up again for breath after the pilot had again disappeared. After again taking in fresh air he dived for the pilot just as the pilot came to the surface for the second time only to find that his passenger was still apparently in the wreck. In this way each of them dived four or five times until finally one of them came to the conclusion that the other must by this time have been drowned, so he sat on one of the floats to wait mournfully till he was picked up by one of the boats which was coming out from the shore.

"A second or two afterward up came the other officer, also convinced that his friend was dead. Each was naturally surprised at the wonderful capacity of the other for stopping under water till explanations made clear what had happened, after which they both nearly fell into the sea again

## SILKS GETTING SCARCER; FAMINE IS SEEN HERE.

### Shortage of Dye and Cost of Labor Given as Causes.

The silkworm has turned.

And the whole world of styles and textiles is on its knees before the royal cocoon. The silk loom worker, once so humble, is demanding the wages of a baseball star or a prima donna. Dyestuffs of all colors are getting as rare as the rainbow. A worldwide silk famine is threatened. At the present time silk which once retailed at 75 cents a yard now sells for $1, and goods once ticketed at $1.25 now command from $1.50 to $1.75 a yard. Wholesalers see a rise of 30 per cent in silk prices next fall.

Prosperity is at a high mark, and millions of women are financially entitled to revel in silk, and nothing but silk, for gowns, underwear, stockings and nightgowns, it was asserted. With the heaviest demand for silk in years, stocks are dwindling to such an extent that even the greatest wholesalers predict a "hand-to-mouth" era in supplying the market. The dyestuff shortage comes on top of a dearth in textiles in all corners of the globe.

And then there is a paucity of loom workers, who, it seems, can earn better wages lifting shrapnel shells on flat cars than performing the delicate and skillful operations required on the loom.

"It is most essential that the dye shortage be relieved before we can hope for anything approaching normal in the silk industry," said a dealer who has worked "in silks" for more than forty-eight years. "The public does not realize how serious the dye problem is. Germany has not only quit sending dyes, but has practically quit making them. Its chemists have found that the same elements may be useful in munitions. Imitation rubber for motor trucks is one of the products practically produced from dye materials.

"And in this country dye materials are soaring so high that recently in New York a barrel of red coloring matter which a firm had bought before the war for $100 was taken for $7,000. One manufacturer recently informed a customer that no more orders would be taken for navy blue and Russian green in silks. Other hues are diminishing rapidly."

### Hind Legs of a Camel.

Volume 2, No. 356. MONDAY, FEBRUARY 14, 1916. Price, One Cent

# RED DEMON FIRE MORE WASTEFUL THAN ALL WARS

This being "Fire Prevention Week" all over the broad land, it remains for the Electric company to observe it, in conjunction with the city Fire Department. Accordingly there will be demonstrations of the Pyrene Fire Extinguisher at Oneida and 1st sts., daily, as announced in the advertising columns.

Concerning the need of a nation-wide concrted movement against Demon Fire the following is presented:

Every year the American people waste enough money by fire to build the Panama Canal; enough to build a navy equal to what we now have. This loss comes out of the pockets of the American people, and is the tribute they pay to carelessness and ignorance.

This was the keynote of a speech, delivered by C. Louis Allen, Sales and Advertising Manager of the Pyrene Manufacturing company, at the annual meeting of the Rotaty Club, in Kansas City, on December 16. Mr. Allen whose subject was Fire Prevention said:

### 3,000 Perish Annually

As the Sales and Advertising Manager of the Pyrene company, I do not pose as an authority on the subject of Fire Prevention. My work must be done before there is need of the counsel and services of the Fire Prevention Expert, for of what use is it to tell the people what they need to safe-guard them from the peril of fire if they are not yet conscious of their danger? So my work consists largely in the awakening of the slumbering consciousness of the people—in arousing them to a realization of their ever present peril from the Red Demon of Fire.

Three thousand lives and $250,000,000 of property is the annual sacrifice which this Nation offers on the alter of carelessness, recklessness, and lack of preparedness. Two hundred and Fifty Million Dollars more each year is expended in maintaining Fire Departments, and in Fire Insurance Premiums, so altogether we have the staggering sum of $500,000,000 as the Nation's annual Fire Tax.

I wish I could bring home to every man here thev ital, personal interest that he has in this Fire Tax. No matter what your business, no matter whether you own property or rent from others, you cannot escape your share of this annual burden. From the time cotton is ginned and baled, during its shipment, throughout the storage period, while being manufactured into cloth, on the shelves of the retailer, and finally in your own home as linen, it is compelled to pay tribut to the relentless tax tyrant.

### The Comparison

Consider for a moment what we might do with $500,000,000. We might build a aPnama Canal every year. We might equip our Army and Navy in a way which would please the most enthusiastic militalist. Five Hundred Million dollars would give us good roads from the Canadian line to the Gulf of Mexico, and from the Atlantic to the Pacific —better roads than could be found anywhere else.

We Americans are prone to boast of our intelligence, initiative, and progressivism and rightly so. We have done much and gone far, but the most superficial analysis shows that a very large measure of our prosperity and success may be attributed to our wonderful natural resources.

Conservation has only recently become a popular slogan in this country. CONSERVATION and EFFICIENCY—two big movements that go hand in hand— but in this matter of Fire Prevention our lack of efficiency and our puny attempts at conservation suffer much when compared with the records abroad. Our annual fire waste is FIVE TIMES AS GREAT as that of any nation of Europe, omitting, of course, conflagrations due to the present conflict. Regardless of where our sympathies may be in the present war, the remarkable efficiency of the German people should serve as an inspiration for all of us. Think you that such a nation would tolerate for long such recklessness, such carlessness, and such lack of preparedness as results in an economic waste of $500,000,000 a year?

And now a word about the Pyrene Company—and I offer no apology for bringing into this talk mention of my company. That is one of the difficulties with business today. Because in the past a few business men have erred, and have merited and received the condemnation of their fellows, business ,as a whole ,has assumed a more or less apologetic attitude. There is a regrettable tendency today, in matters of a public or semi-public nature, to soft-pedal the business connection. This attitude has reslted in making legitimate business the target for the poisoned arrows of every blatant demagogue. True business is service, and real service is the destiny and goal of humanity. If your business does not truly serve, then get out of it; but if it does, be not ashamed of it and offer no apologies for conducting ti.

Over 750,000 Pyrene Fire Extinguishers are now safe-guarding lives and property in homes, factories, and business establishments. That they are serving the people and helping in a esmall way to reduce this colossal fire loss ,is being daily proven in a gratifying manner by appreciative testimonials. Our difficulty, however, is not to convince people that we have a good extinguisher. Nearly everyone admits that. But our never-ending problem is to arouse the people to their present need for protection. The Mexican word, "Manana" (tomorrow) is typical of the attitude of those who have never had a fire.

### Educational Advertising

The Pyrene Company has proposed. It is deeply grateful for the confidence and good will which have been so freely accorded it. We have tried to keep ever before us the ideal that business is service, and that the measure of our prosperity will be in proportion to the value of our service. With this in view, we are devoting substantial sums to advertising of the educational type. Notice our copy, and you will observe how much we have to say regarding your need for fire protection, and how very little we dwell upon the advantages of Pyrene protection. We see in this colossal fire waste a big opportunity for genuine service, and we shall be content to help in the campaign of education, feeling certain that as the public comes into a more vital realization of its need of preparedness, we will receive our fair share of theb usiness.

Prohibition may or may not prohibit, but that Fire Prevention does prevent fire has been conclusively demonstrated by Chief William Guerin, formerly Chief of the Bureau of Fire Prevention of New York city, than whom there is no veteran better qualified as an expert in this great field of Fire Prevention .

From the birth of New York city up until January 1, 1912, the number of fires constantly increased. In the year 1911 there were 15,633 with a loss of $12,500,000. In two years Chief Guerin, by the adoption and enforcement of wise regulations, was able to reduce the number of fires by more than 2,500 and the fire loss by $8,500,000. What Chief Guerin accomplished in New York city has been done on a smaller scale in Portland, Oregon, and a few other cities.

### A "Hopeless" Town

And now, on the other hand, a horrible example of the lack of preparedness. Hopewell, Virginia, is a mushroom town of 25,000 people, which sprang up over night as the result of the establishment there by the Dupont Powder company, of a plant to manufacture gun cotton. A few months ago, one of its citizens wrote to Chief Guerin regarding Fire Protection, and recognizing the unusual hazard, he went to Hopewell to advise with the City authorities. After a personal examination Chief Guerin made his recommendations and in the letter which he addressed to the town authorities, he concluded with this warning

"Your thriving and prosperous young town has been well named, but unless the need for adequate fire protection is soon realized, you are likely to be compelled to write its name as 'Hopeless.' "

Here again, however, there was the same old, heart-breaking story of de-

(Continued on Page Four)

# CHAMBER OF COMMERCE

*"Fulton First, Last and All the Time"*

To the boys and girls as well as the men and women of thirty years ago, it must appear that the community sociability of today is far less than it was at that period. This is especially true of the small town. Thirty years and more ago the small town was isolated. It was wholly dependent upon its own resources for entertainment. If located on the line of a railway its only connection with the outside world was the one or two passenger or mixed trains that stopped there "daily except Sunday." A trip of a hundred miles was an event. Very few, if any ,metropolitan daily papers found their way regularly to the town. The inhabitants did not miss them as their interests, aside from national politics, were entirely local. They were looked upon as back numbers by their city cousins. They may not have been familiar with the latest Parisian styles and their manners may have seemed at times uncouth, but each one had a sincere regard for his neighbor—and all were neighbors. If one was sick the rest of the town felt a family concern for his welfare. When there was a birth it was an for his welfare, when there was a birth it was an event of event of interest to the entire community. A death was a cause of general mourning.

The monthly missionary teas were social functions looked forward to with pleasurable anticipation by both young and old. It was here that the people met for a general good time with the feeling that they were paying for their pleasure by helping a deserving cause. Supper was served from five to eight o'clock, When they had eaten, the elders would gather in the rooms downstairs to indulge in pleasure suited to their mature years, while t he young people took possession of the up-stairs and played postoffice, who's got the button, charades and other games that will readily be recalled by parents of the present generation. Then came the redeeming of the forfeits, mostly with kisses, sometimes by performing some unusual stunt. And, as they knew nothing about such things as germs, no one ever caught anything worse than a slight palpitation of the heart. Of course, we know that these games were wrong, that they were snares of Satan, transmitters of disease and altogether unladylike and ungentlemanly. Yet, in their blissful ignorance, the boys and girls went right ahead playing them and having lots of fun at it. But the youth of today, having learned of the dangers that lurk in such innocent appearing pastimes confine their kissing games mostly to twosomes in a dimly lighted parlor or the back seat of a touring car. The touring car is probably the more prophylactic, as the breezes blow the germs away befor they have chance to do any harm.

The old time sociability is dissipated. Instead of one or two organizations, generally of the church, to lead in the social life of the town, there are half a dozen or more women's clubs, everybody moves in cliques and each one has his or her "crowd." The glamor of years may add to the charm of their youthful pleasures, but it is difficult for people of middle age to realize that the young people of today have as good times as those of a former generation. And that is not a plea for "the good old times," either.

These changes in social life of the small town have been brought about through several causes. The lowering of thep rices and the extended circulation of daily papers have brought them into nearly every home and broadened the interests of the individual beyond the local horizon.

(To Be Continued).

# City's Departmental Expenses Revealed in Cost-finding System

The cost system which City Chamberlain Adkins has prepared is ready for examination by a representative of the State Accounting Department who is coming here for that purpose.

The chart shows a fluctuation in the cost of maintaining the various city departments during the year 1915 as well as the month of January, 1916.

Under the heading of General Department, which includes Executive, Legislative, and Financial, it is shown that an expenditure of about $1500 was necessary during January, 1915. The amount remained stationary in February and dropped to $1100 in March. In April the cost was $1800. From May to November, inclusive, it averaged from $850 to $1100, but in November and December, the last two months of Mayor Fox's administration, the chart line shows a maximum cost of about $3,500.

The cost of maintaining the Police Department throughout the year 1915, as shown by the chart, was from $1,000 to $1,300 per month, and the Fire Department averaged between $600 and $1,000. During the months of June and April it cost more to operate the Charities Department than it did during any other month in the year. In January, 1915, the cost was about $400, in February $500, March $550, April $400, May $300, and June $600. Throughout the remained of the year the average was $300.

A variation is shown in the Department of Education fund. In January the cost was about $5,000, in February $8,000, March $10,000, April $4,000 and May $4,500. During the vacation period, June, July and August, the chart shows that $3,000 was the average for each month. From $4,000 to $4,500 was spent during each succeeding month.

The Water Bureau, Sewer, Public Works and Sprinkling funds also showed a considerable variation. Beginning with a cost of $7,500 in January, there was a gradual decrease in the Water Bureau account to $2,000 during February and March. In May it took a jump to $10,000 and dropped gradually during the successding months to an average of about $1,000. The Sewer fund averaged $100 per month throughout the year, with the exception of the month of May when the cost was $400, and August when the high mark of $1700 was reached. It cost $1500 for street improvements during February of last year, The other months averaged $100. The Lighting fund was stationary at $1,000 per month, with the exception of February which shows $2,000.

The Public Works fund shows an ite mof $150 per month for the period of July to December. The first five months in the year averaged $500. $250 per month was spent from the Sprinkling fund in the first three months of the year. The high mark was reached in June whe nthe cost was $800. The average is about $250.

## EDITOR BRADT TO BE MASTER OF AN EVENT

The Odd Fellows of the city are nothing if not industrious in providing entertainment for the membership at large. No sooner does one event occur than another appears emblazoned in the newspapers and on circular letters, informing the three-link men of good times and big doings in the big temple in Oneida street.

Hardly had the ink dried on the newspapers chronicling the mock trial than it became noised abroad that a smoker and supper were in store at a very early date, February 21st, which is next Monday.

The piece de resistance of the coming event is Editor A. P. Bradt, whose fame as a master of ceremonies is far-reaching. That he will not attempt to "pi' the speakers is one of the solemn promises made to the committee on entertainment. Printers are so careless, you know.

## MOTT TO MEET THE ROCHESTER POLICEMAN

A large crowd is expected at Church's Hall tonight to witness the first wrestling carnival under the auspices of the Independent Athletic Club.

Most of the interest centers on the final bout between "Iron Necfl" Mott and the chief of police of East Rochester. The men are scheduled to go three falls to the limti.

The two preliminary bouts will go the limit, it has been announced. Fulton boys are on one side of the card, while Minetto and an Oswego grappler will be their opponents. In the first "prelim" Tony Ryan, Fulton, will oppose Fred Renous, of Minetto, while in the other contest, "Young Tunk" will meet Charley Chip, of Oswego.

## SHELDON MEETINGS ARE IN FULL SWING

The Sheldon meetings, now in progress at the Free Methodist church, received a splendid reception last evening by the presence of the district elder, Rev. G. L. Skinner, of Camden, N. Y. He preached a powerful sermon from the text, "He that committeth sin is of the devil"—I John III. 8. At the altar call, which followed, eleven responded. In the Sheldon meetings, those who respond to the invitation cannot exactly be called "trail hitters." Those who "hit the trial" in the large union campaigns, are only called upon by the evangelistic to accept Christ as their personal Savior, intellectually. At least, it amounts to a mere intellectual acceptance probably in most cases. The Sheldon party preaches on death, hell, sin and the judgment, and the necessity of repentance in such a manner that seekers often come with tears and cries to the altar. They pray aloud for themselves with evident with evident strong desires. They feel their feet slipping into hell. After they have renounced al land their fath takes hold on Christ, their manner changes and their tears give place to shouting and praises and they profess to have received a channge of heart. An uninstructed onlooker take it all for excitement, but the thing is very real to the penitents. One young man Sunday night after crying for mercy a long time, took out a package of cigarettes and gave it to the pastor, after which he professed to have found peace. Dr. Sheldon will preach tonight at 7:30.

## WEATHER FORECAST

Fair weather and rising temperature tonight and Tuesday with light variable winds becoming south.

## MR. JOHN HUNTER'S ZINC MINE IS SOLD

A zinc mine owned by John Hunter, of this city, was sold on Saturday at Joplin, Mo., by L. W. Emerick, according to Referee in Bankruptcy Avery S. Wright, who received a telegram the same day informing him of the fact.

The sale will not be confirmed before Referee Wright until February 16th.

A fire in a dwelling house adjoining the Dilts Machine Works made a run for the Fire Department Saturday night at 7 o'clock.

## 45-PHONE NEWS ITEMS-45

Monday, February 14, 1916.

It will be recalled that about a year ago when Japan made some demands upon China there were seven of the series which China positively refused to concede. In brief these demands were: That China shall employ Japanese financial and other domestic "advisers;" that Japan shall have the right to construct hospitals, churches and schools in China; that Japanese shall be employed in the police departments of Chinese cities; that China shall purchase a certain proportion of war munitions from Japan; that Japan shall have exclusive railroad concessions in China; that extensive exclusive concessions shall be made to Japan in Fukien province, virtually closing it to other nations, and that Japanese shall have the right to propagate Buddhism throughout China. It is said that Japan presses these seven demands anew, insisting that they are necessary for the well being of China. The Japanese deny that the demands if granted and lived up to would conflict with other nations operating in China. A year ago China's attitude was that she would fight rather than yield to the extraordinary demands.

A Berlin correspondent says: "In Germany, especially at this time, the public asks no questions. Every order given by the military and police authorities is blindly obeyed." Students of history know that this popular submission to authority is a development of at least two centuries. And herein lies the secret of Germany's efficiency in war. However we may look at Germany's position today, it must be conceded that her efficiency is to be admired and emulated by any people that means to qualify for war. A belated appreciation of this fact is now in evidence in this country. We should prepare, say some, to do things Germany is doing, not in kind, of course, but in manner. But blind obedience is a trait directly antagonistic to a people nourished on the spirit of '76. Can any foreign system be engrafted here in its essential essence? Self governing means self initiating, self preparing, and so on. The efficiency of the United States is founded on democracy. It has stood the test. To engraft an old world system upon a new world foundation would be revolutionary and probably create greater war evils than it cured.

That peace in the baseball leagues will lead to a marked improvement in the game this year is a view held by unbiased observers who are interested in the sport for sport's sake. It means, say some, better playing. It is prophesied that interest in the league contests the coming season will be very keen. In general the outlook for sport meetings during 1916 is believed to be very promising. National championship contests are expected to make up for the dearth of international meetings. Section will compete with section. Even Hawaii will be in evidence with a polo team, and South Americans will shoot in national tournaments. In fact, a mild invasion of the United States by a respectable army of sporting forces is to be expected.

Last year there were nearly 1,000,000 motor vehicles sold in this country. The estimated production for the current year is 1,200,000. There are over 400 auto factories in operation in thirty-four states. During the past five years the average failures among manufacturers has been eighty a year. Evidently the industry has its ups and downs, but the record of growing business shows that it has a rosy outside, to say the least.

It is suggested that "social culture" be added to the public school course. There is need enough, but what shall be left for home instruction if outside teaching is monopolizing everything which goes to the making of the true man and woman?

Judging from the returns from far and near, the war spirit which crops out now and then in the national capitol is not nationally representative.

Guatemala's president elect has already held the office seventeen years, although the little republic is in the revolution belt.

With horse meat to fall back upon New Yorkers keep right on paying 20 cents and upward for common cuts of beef.

## WANTED---QUICK WORK

Fulton is now in that severe grip of winter which usually precedes the first glimpse of spring, and with the coming of warmer weather there is certain to be a big business revival, the benefit of which will be shared by employer, employe, and lastly, the retail merchant. The prediction of fifty per cent of the persons one talks to is in effect that the coming spring will find this city enjoying its share of normal conditions.

Yet all this is peliminary to the announcement of the fact that the business men have some work to do if they intend to keep up with the business procession elsewhere.

The great problem of securing more industries—small industries, if you please.

The work of making every farm surrounding the city an industrial plant.

Eliminating the all too prevalent (and not without reason) belief that the only use we have for the farmer is the dollars to be extracted from his bank account.

These and other things remain to be cleaned up before we can expect constructive work to begin in real earnest. These things may appear small. They are not, but they ought to be cleaned up and left far in the rear—and quickly.

The city is getting good advertising. It needs more—of the systematic kind. It needs to be advertised before the world as a place loyal, "first, last and all the time," to home institutions—at all times jealous of the influence of outside competitors, those who seize upon the advantages to be gained by using printers' ink in reaching the trade that by all rules of business belongs to the merchants who support the chicken-pie suppers, the bake food sales, the concerts, and the other home institutions so often mentioned.

It is too bad that we find the city's finances to be in such deplorable shape; that we must face another bond issue to retrieve the losses suffered in the past; but a condition and not a theory confronts the people of the city. It is the duty of everybody to recognize the fact that a city's finances must be in order so that it may tackle the big constructive problems before us, chief of which is to tighten up the many loose bolts in the system, and then be in with the great progressive movement instituted by the new Secretary of the Chamber of Commerce. It will mean industry and trade at our door.

## REAL TEMPERANCE REFORM

Real Temperance reform in the state and in the country, and, in fact in the world, is being carried forward by those who believe in the cause of temperance and who are making a living out of the enterprise. Real temperance reform is being carried forward in every school room in the land where the evil effects of alcohol upon the brain and body is being taught to the children of the land. Real temperance reform is being carried forward by theb usiness men of the country who are refusing to employ intemperate men and are giving their promotions to the temperate men who keep their heads clear and devote their time and attention to becoming efficient in the performance of their duties.

In this age of modern industrial development when we have highly specialized machinery for workmen to operate it becomes an absolute necessity for the operators to be temperate men who can be relied upon to take charge of delicate and scientifically adjusted machinery. Therefore, employers cannot use intemperate men to operate such machinery.

Not only this, but it is the same with railroads, with telegraph lines and with telephone lines and nearly all other kinds of enterprises. In this day and age of thew orld when business is transacted in a hurry, when by the aid of the telephone, the telegraph, the railroads and the automobiles, distance has been annihilated and all the people have been brought closely together and business is done with a rapidity unknown to past ages, it is an absolute necessity that those who are engaged in business should have a clear head, a steady hand and an unclouded mind.

This is the reason that the temperance cause has received such momentum from the business men of the country and from the school rooms of the country and the momentum of the temperance cause has received but little aid from professional reformers and bread and butter lobbyists. The Woman's Christian Temperance Union and other organizations that advocate temperance from principle and not for profit, not for a consideration, are also doing a grand work to advance the cause of temperance, sobriety and morality.

## A KNOCKER'S BRIEF

(WHO GOT HURT)

*By I. E. Hyde*

Who got hurt?
"Not I, said the boss." Oh, no;
I make my own law and so
I didn't get hurt in the least,
To me it was quite a rare feast,
I'm calloused, I cannot get hurt.

Did you get hurt?
Not a slug of the shot your dose
Hit the merchant, altho it came close;
He's immune from danger, it's true
For he never wears his own shoe,
So the merchant did't get hurt.

Who got hurt?
Did the preacher get hurt? Well I guess!
Will he bend his knee and confess
That since he has been to hear Billy
The sermons he mimics are silly,
I hope the preacher got hurt.

Who got hurt?
Say the medicoes—"If you had hit me
I'd give you a pill and send you to sea(?)
Or else I would fumigate your grey."
They've got something coming to them, some day.
They may get hurt.

Who got hurt?
Did the press men get hurt? Not a bit,
If they had, they'd have thrown me a fit,
They are men who strike out from the shoulder.
Afraid not of pebble or boulder
They are dodgers, they cannot get hurt.

Who got hurt?
Not I, said the bloke." Not I,
If I had, I never cry
I grasp my bottle by his neck
And drain him to the dregs, by heck!
I'd never feel a hurt.

Who felt the bite?
Did you get bit? Wee Mr. Man,
If so I come and bite again
I'll pluck your down, I'll singe your wing,
You'll have to grow to dodge my fling.
It seems—the coat fit tight.

The leading magazines of the country are now beginning to discuss the temperance question on the merits. The Atlantic Monthly, one of the best magazines of the country has been printing a series of articles upon the temperance movement which have attracted wide attention and shed much accurate and illuminating information on the subject. In the January number the writer of a brilliant series of articles that have been running in that magazine, concludes an article in the current number with these significant words. The writer says:

> Measures for the effective control of the liquor traffic require collective effort and support. There is no excuse for delegating the whole question to the self-elected body of reformers who undertake to represent a public sentiment largely fictitious or of their own creation.
>
> On a closer view the real enemies of progressive liquor legislation are found to be a compact group of men who live not only for but by the advocacy of prohibition; who are given irresponsible control of sums so large that they must sow corruption; who are not oblivious of earthly ambition in their solicitude for temperance.

The above statement in the Atlantic Monthly is in exact harmony with the position which we have taken on this subject all along. The temperance cause is a noble cause. It is being carried forward in this state and in this nation, and in England, France and Russia, and all over the world by the friends of real temperance and not by the bread and butter agitators and paid lobbyists. It is the latter class, by their dishonesty, their abuse, and their disreputable methods, who have been hindering the cause of temperance and bringing reproach upon a noble reform.—Lyons Republican.

### SUFFRAGISTS TO SEND OUT MANY DELEGATES

New York—The first of a series of conferences, by means of which suffragists plan to organize the country geographically to unify their campaign in support of the Susan B. Anthony constitutional amendment, was held here today. Delegates were present from New Jersey, Delaware, Pennsylvania, Maryland and New York.

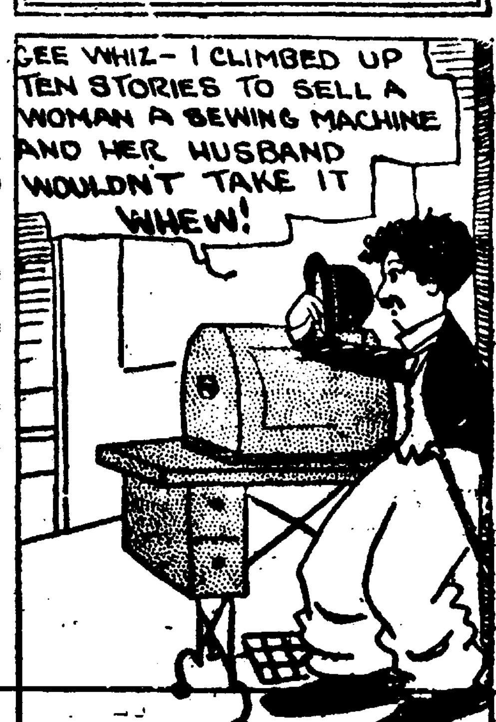
CASTORIA

### Charley Has Some Real Hard Luck



## Opinions

### A FOOLISH PROPOSITIONS

An Assemblyman from Wyoming county has proposed a constitutional amendment that would provide that the State pay members of the Legislature their living expenses while they are in Albany, and their railroad fare home and back to Albany once each week during the session. Also, that the salary of $1,500 a year be paid in monthly installments. It is remarkable how very simple some of the men who go to the Legislature are. Such a proposition as that would not have the approval of the voters of this State in a thousand years.—Utica Observer.

### BEULAH LAND

Press dispatches yesterday told of the death of Rev. Edgar Page, author of the famous hymn, "Beulah Land," at his home in Cape May. He was 80 years of age and was known as the "Fishing Jersey Poet." He was the author of "Simply Trusting," "At the Golden Landing," "Just Ahead," and "Inasmuch," and his work appears in every hymnal of the present day American church.

But for this announcement of Rev. Page's death, who would have thought that the author of such a seemingly old hymn as "Beulah Land," was still living? The hymn seems as old as the Rock of Ages. It has been running through our minds and singing in our hearts these 30, 40 and 50 years.

"I've reached the land of corn and wine,
And all its richness freely mine;
Here shines undimmed one blissful day,
For all my night has passed away."

The death of Rev. Page raises the question, Are any song writers making hymns in this year of grace, 1916, that compare with the old songs? It hardly seems possible. Perhaps "Be a Hero" and "Brighten the Corner" may become famous hymns of their day, which generations to come will remember, but we can hardly believe it. Nothing can thrill the heart as did the old hymns, "Lead Kindly Light," "Jesus Calls Us," "There is a Green Hill Far Away," "Bringing in the Sheaves," and "Crown Him King." How the old church rang with the songs of thew orshippers and how the cottage organ, sometimes wheezy, but always melodious, sent forth its strains. It is not a far cry for most of us to recall the day in the old church, when all joined in the singing and the gates of Heaven seemed to swing ajar to receive the melody of that song and the Hosannas of the choirs above seemed to mingle in the refrain.

Perhaps those were the days of youth, the impressionable days, and, therefore, the songs seem nearer to us, but it establishes definitely that they must have been good songs to linger through the intervening time. The last leaf on the tree in the spring will fall ere Beulah Land drifts from memory.—Watertown Times.

### COMMENT OF STATE EDITORS

As the time approaches for organized effort it is vastly encouraging to find conditions favoring the Republican party here in its efforts to help win back the national administration. Harmony prevails everywhere, in fact, and harmony is a great asset.—Poughkeepsie Evening Star.

• • •

President Wilson and those of his party who are giving support to the preparedness proposal cannot hope by any means to make preparedness an issue between parties. It is an issue only between factions of the Democratic party.—Albany Journal.

# TRAMPS THE BANE OF CITIES IN SOUTH

## Campaign Is Begun to Prevent "Passing On" Hoboes.

## MAYORS SEEK TO END EVIL.

**Scheme Is Evolved Providing For Free Transportation For Transient Poor by Municipalities Provided the Poor Have Relatives, a Job or Other Definite Means of Support.**

How the south is planning to prevent the "passing on" of tramps from one city to another, as has been done now for many years, is told in an article sent out by the Survey press service. It is explained that because of this "passing on" policy conditions in a number of cities and towns were becoming unendurable, and at the same time no relief was being given for the evil.

A long step forward in the handling of charitable transportation of tramps and other nonresident poor in seven southeastern states was taken at a convention in Jacksonville, Fla., called by Mayor J. E. T. Bowden of that city. More than 100 mayors and another hundred delegates, representing nearly 150 cities in Florida, Alabama, Georgia, Mississippi, Louisiana, North Carolina and South Carolina, discussed the "passing on" evil and adopted a model ordinance to solve the problem. Each delegate was pledged to do all in his power to secure the passing of the ordinance in his home city. The complete proceedings of the convention, with a copy of the ordinance, will be sent to more than 500 cities.

**Passing It On.**

The "passing on" evil has for many years been a problem of particular significance in the south. The mild climate has been partially responsible for the presence of many wandering tramps and "tramp families," and their increase has been encouraged by slipshod methods of issuing free transportation. A few charitable organizations with modern methods have worked under the transportation rules as drawn up by the national conference of charities and correction in 1903. The city of Atlanta, Ga., signed these rules by ordinance in 1906.

But most of the municipalities and smaller relief organizations continued to get rid of their visiting poor by buying them tickets to the next town or the nearest large city—the old familiar method of "passing on." And so the dismal round continued, growing ever worse. Towns and cities became burdened with an increasing number of wandering dependents, who suffered increasing hardship and pauperism from the system. In some communities, due to their geographical position, the conditions became unendurable. Jacksonville, so situated as to be the gateway of Florida, was one of these. Nearly a year ago Barry C. Smith, then secretary of the associated charities in that city, determined that some local action must be taken, and perhaps the co-operation of the entire south be obtained.

As an initial step an ordinance was drawn up and laid before the mayor and city council. No action was taken, but Mayor Bowden showed an earnest interest.

**Tramps Trooped In.**

Tramp family after tramp family drifted into the city, and the Associated Charities kept the mayor constantly in touch with these concrete instances. Photographs were taken of some of the worst types, reports were secured from other cities and definite proofs of the sending of such dependents to Jacksonville by other cities were secured. Mayor Bowden became convinced that what was true of Jacksonville must be true of other cities and that the remedy lay in the co-operative action of the entire south. Obviously each city on this plan received about as many poor as it sent elsewhere, and there was a great waste of money in shipping folks aimlessly back and forth. The call for the convention followed. The ordinance follows:

"A bill to be entitled an ordinance for the regulation of the transportation of the indigent poor. Be it ordained by the mayor and city council of the city of —— that the mayor is hereby directed and authorized to sign for and in the name of the city of —— the rules concerning free transportation and charity rates, which have been published by the committee on charitable transportation appointed by the national conference of charities and correction, which said rules are as follows:"

Then follows the transportation rules, which provide, chiefly, (1) that free or charity rate transportation be issued only on satisfactory proof that the applicant has at the point of destination a legal residence or the employment or other definite means of support, or (or) friends or relatives who will agree to provide for him; (2) that such transportation shall be clear through to point of destination, thus prohibiting "passing on" entirely, and (3) that each signer shall co-operate with each other to prevent the aimless sending of dependents about the country.

**Mexican Mules In Europe.**

Mexican mules brought to England for transport work stood all the rigors of military wear until the frost came, but now "they shiver like lap dogs."

**A Luxury.**

"But," objected the heiress, "I have been accustomed to every luxury."

"That's all the more reason why you should marry me," replied the impecunious suitor. "I'm a luxury myself."—Exchange.

**The Cooky Cat.**

Grandmamma made a cooky cat,
Brown and spicy and round and fat.
She set it up on the pantry shelf,
Safe and sound, and said to herself,
"Tomorrow morning when Bobby comes
I'll give him that cat and some sugar plums."
And grandmamma smiled and felt very glad,
For Bobby was such a dear little lad.

But, alas, when the house was dark and still
The cooky cat felt a sudden thrill,
For she heard the patter of tiny mice.
Nearer and nearer they slyly came
The cooky cat trembled through all her frame.
They climbed to the shelf on which she sat.
Alas, alas, for the cooky cat!
She pleaded for mercy. The mice said: "Nay,
For 'turn about' is, you see, fair play.
A cat will always eat mice, and that
Makes it fair for the mice to eat the cat!"
—St. Nicholas.

**Their Work.**

"What a noisy clatter children do keep up at the table!"

"They certainly do put the din in dinner."—Baltimore American.

**John Brown's Compass Found.**

A compass, once the property of John Brown, which played a part in early history, has just been received at the museum of the Kansas State Historical society in Topeka. John Brown used the instrument when he was living in Osawatomie, in the years between 1855 and 1858. During the Missouri-Kansas border warfare in those days, the story goes, the abolitionist leader used the compass in a pretense of surveying land, when in reality he was locating and mapping the camps of proslavery men.

**1,429,171 PRISONERS ARE NOW HELD IN GERMANY.**

The semiofficial transocean news bureau announces that 1,429,171 allied soldiers are now prisoners in Germany. This does not take into account many prisoners captured by German troops, but left in Austria-Hungary to shorten transport.

There are now in Germany 9,7?0 captured cannon, 7,7?0 military carriages and 3,?50 machine guns. Many captured guns were put into immediate use by the Germans and are therefore not included in this statement.

The number of rifles captured in fit condition for use is 1,300,000.

# TAX TO INSURE ALL AGAINST ILLS

## Would Have Government Collect Salaries of Physicians.

## SCHEME MOST UNIQUE ONE.

**Called Impracticable by Many, but the Idea Is New—Compulsory Insurance Would Be Collected From Every Citizen, and Patients Would Be Alloted to Various Doctors.**

Compulsory sickness insurance administered by the federal government was advocated in Chicago before the Federation of State Medical Boards of the United States by Dr. Otto V. Huffman, secretary of the New York state board of medical examiners.

Dr. Huffman proposed a plan under which he said all reputable physicians would have an assured income and the chief incentives to quackery would be eliminated.

The plan contemplated a tax of $2 a year on all wage earners whose income is less than $1,200. He estimates there are 33,000,000 such persons in the United States. Each would have the privilege of selecting his own doctor, but no physician would be allowed to carry more than 2,000 names.

"This would mean $4,000 a year for treating those that become sick or disabled. Statistics show not more than sixty of these would ever be sick at the same time," said Dr. Huffman.

**Physicians Poorly Paid.**

"In general, the public does not realize how miserably underpaid the medical profession is. There are 127,000 active practitioners in the country. Their incomes aggregate $63,500,000, an average of only $500 a year.

"Nor is it true, as has been often stated, that 'there are too many doctors.' About 2½ per cent of the population is constantly sick and disabled, an average of nineteen patients a day for each doctor. This does not take into account much of the practice of specialists.

"Furthermore, insurance company statistics show 60 per cent of the insured have some impairment of health.

"It is impossible for a doctor properly to look after more than sixteen patients in eight working hours. At prevailing fees this just about pays expenses

**Would Prevent Sickness.**

"Under compulsory insurance we would be paid to keep our clientele in sound health, and it would be against our interest to have sickness occur.

"When the medical profession is paid to prevent sickness and is a loser when any one becomes ill, the day of the quack and the charlatan will be past."

The United States in a few years will have an army of 1,000,000 men ready to take the field. To meet the requirements of this vast body of men at least 10,000 surgeons will be required. So asserted Dr. W. C. Gorgas, surgeon general of the United States army.

Dr. Gorgas was urging the adoption of a proposal for a national conference of medical examiners, composed of representatives of state medical examining boards throughout the country. Candidates who passed this examination would be eligible for the United States medical reserve corps and would not have to pass any other examination for licenses to practice.

Dr. Haven Emerson, New York commissioner of health, said Dr. Huffman's plan was "impossible propaganda."

"I'll admit doctors are underpaid. It is apparent in the city departments, where engineers and legal experts get about twice as much as doctors. I suppose the doctors can let their good works be their own reward. The public seems to expect that of them. I think the doctors of the state and country see much more promise in the new health insurance laws than in any such fanciful scheme as Dr. Huffman suggests."

## PLATINUM IS SCARCE.

**Its Price Is Soaring, and There Is No Substitute In Sight.**

Platinum is now selling at $100 an ounce, and many concerns are even getting a larger price for it. Not so long ago one could buy all this metal wanted for $24 an ounce. Jewelers are finding it unusually difficult to obtain it, and some refiners will not sell it to any one except jewelers.

Metals which are frequently mixed with platinum are osmium, iridium and palladium. The fumes from osmium are very dangerous, and workers with this metal must exercise the greatest care in making alloys, etc. Platinum is generally hardened with 5 or 10 per cent iridium, which is also used to tip fountain pen points.

Platinum is also used extensively in the electrical industry, and now, owing to its scarcity, molybdenum is being substituted. Many attempts to make other substitutes for platinum to be used in jewelry have been made, but without much success. These include cheap alloys as well as white gold, which latter in many cases, however, eventually turns yellow. The success of white gold was rather precarious owing to the difficulty in making people believe that it was really gold, every one having been taught from childhood up that gold is yellow.—New York World.

**Doesn't Like Diplomacy.**

George Fred Williams, former minister to Greece, recently stated his opinion of diplomats in general, and said that they were the cause of the present European conflict.

"I tried to be a diplomat," he said. "It is the most stupid business I know of. It was a matter of deciding on the right tie for a certain function and determining what kind of trousers to wear when we met the king and how to behave at dinner. It was a continual swapping of humbug with associates, and never, in any circumstances, lapsing into truth. It's the meanest, rottenest occupation a man ever got into."—Boston Herald.

**BELL-ANS**
Absolutely Removes Indigestion. One package proves it. 25c at all druggists.

Give congress the glad hand. Isn't it giving us a chance to think of our domestic affairs as a welcome relief from the war news?

## This Wonderful Photo Play Serial

Written by FREDERICK LEWIS, Editor of McClure's, In Collaboration With JOHN T. M'INTYRE, Author of the Ashton Kirk Detective Stories

In "Big Moments of Big Trials" Irvin S. Cobb says, "Editors and reporters are forever dreaming of the perfect murder story, which will be the story of a young and pretty woman, preferably an actress, accused of killing a rich man by poisoning him, with a lot of mystifying features and complications to go along with it. When this comes to pass, if it ever does, it will be, from the standpoint of public interest, a perfect story—which means circulation, which means everything to newspapers."

### Macaroni a la Italienne

3-4 cup macaroni, 2 quarts boiling salted water, 1-2 onion, 2 cloves, 1 1-2 cups tomato sauce, 2 tablespoons wine, 1-2 tablespoon butter.

Cook macaroni in boiling water (salted) with butter and onion stuck with cloves, drain, remove onion, reheat in tomato sauce, add cheese and wine.

TOMATO SAUCE

1-2 cup butter, 1 onion finely chopped, 3-4 teaspoon salt, few grains pepper, 1 can condensed tomato, 2-3 lb. lean beef.

Cook first four ingredients eight minutes. Add tomato, 1 pint of water, and beef cut in small pieces. Cook one and one-half hours. Remove meat before serving.

* * *

### Parker House Rolls

2 cups scalded milk (from Vogelsang dairies) 3 tablespoons butter (from Keller and Wilson's Fresh Creamery), 2 tablespoons sugar, 1 teaspoon salt, 1 yeast cake dissolved in 1-4 cup lukewarm water.

White Frost Flour.

Add butter, sugar, and salt to milk; when lukewarm, add dissolved yeast cake and three cups of flour. Beat thoroughly, cover, and let rise until light; cut down, and add enough flour to knead (it will take about two and one-half cups). Let rise again, toss on slightly floured board, knead, pat, and roll out to one-third inch thickness.

Shape with biscuit cutter, first dipped in flour. Dip the handle of a case knife in flour, and with it make a crease through the middle of each piece; brush over one-half of each piece with melted butter, fold, and press edges together. Place in greased pan, one inch apart, cover, let rise, and bake in hot oven twelve to fifteen minutes. As rolls rise they will part slightly, and if hastened in rising are apt to lose their shape.

Parker House Rolls may be shaped by cutting or tearing off small pieces of dough, and shaping round like a biscuit; place in rows on floured board, cover and let rise fifteen minutes. With handle of large wooden spoon, or toy rolling pin, roll thru center of each biscuit, brush edge of lower halves with melted butter, fold press lightly, place in buttered pan one inch apart, let rise and bake.

* * *

### Brownies

1-3 cup butter, 1-3 powdered sugar, 1-3 cup Porto Rico molasses, 1 egg well beaten, 7-8 cup bread flour, 1 cup pecan meat, cut in pieces.

Mix ingredients in order given. Bake in shallow fancy cake tins, garnishing top of each cake with one-half pecan.

* * *

### Lady Fingers

Whites 3 eggs, 1-3 cup powdered sugar, yolks of 2 eggs, 1-3 cup flour, 1-8 teaspoon salt, 1-4 teaspoon vanilla.

Beat white of eggs until stiff and dry, add sugar gradually, and continue beating. Then add yolks of eggs beaten until thick and lemon colored, and flavoring. Cut and fold in flour mixed and sifted with salt. Shape four and one-half inches long and one inch wide on a tin sheet covered with unbuttered paper, using a pastry bag and tube. Sprinkle with powdered sugar, and bake eight minutes in a moderate oven. Remove from paper with a knife. Lady Fingers are much used for lining molds that are to be filled with whipped cream mixtures. They are often served with frozen desserts, and sometimes put together in pairs with a thin coating of whipped cream between, when they are attractive for children's parties.
